THE BOMB-SHELL

BYRON RIFE

To my good friend: Colonel Byron Rice,
Commanding Officer,
Elwood Ordnance Plant.

As a reminder of our very pleasant association.

Sincerely,
Harrison Smith,
Partner.

March 28, 1945.

BYRON RIFE

ORDNANCE IS THE HEART OF VICTORY

The BOMB-SHELL

ELWOOD ORDNANCE PLANT

LETS GO! U.S.A. KEEP 'EM SHOOTING!

VOL. 1, No. 1 | JOLIET, ILLINOIS, JUNE 5, 1942 | EVERY OTHER FRIDAY

Operators of Elwood Handle Many War Jobs

S & P Build Plants For Army-Navy In Other States

Curiosity of Elwood Ordnance Plant employees, who consider themselves wedded to their job, concerning the "family" into which they have married will be satisfied to some extent by the preliminary results of questioning which is to be continued from time to time.

Like all good families, Elwood Ordnance Plant has two parents, the Ordnance Department of the United States Army and Sanderson & Porter. Who is papa and who is mamma isn't important here. They're both fine people. But, since most citizens are more or less acquainted with the United States Army, preliminary questions have dealt with Sanderson & Porter.

Sanderson & Porter is a partnership widely known in engineering and management circles throughout the country as the result of its accomplishments during 46 years of successful operation. The firm was organized in 1896 by **Edwin N. Sanderson** and **H. Hobart Porter.**

Design Loading Line

Designing and construction projects of various kinds soon attracted national attention and before long the firm began to specialize in public utility work including street railways, steam and hydro-electric power plants, and oil and natural gas pipe lines. Sanderson & Porter pioneered numerous types of construction, including the assembly line method of loading shells and bombs put into practice at the Elwood Ordnance Plant.

As the firm grew, other engineers and management experts were taken into the partnership. Among them was **Harrison Smith,** resident partner in charge at Elwood, who became a partner in 1929 after several years of association with the concern.

Mr. Sanderson died in 1932, but Mr. Porter is still active, appearing almost daily at the offices in New York. Mr. Porter, who visited the Elwood Plant recently

(Turn to page 3)

100% War Bond Mark To Be Maintained

Sale of War Bonds at the Elwood Ordnance Plant is to be a continuous activity, with no thought of resting on the laurels of the 100 per cent record achieved in all departments in the recent intensive campaign.

More than 10,000 employees are now investing $250,000 a month in War Bonds through the payroll allotment plan. All workers, except those away from the job because of illness or out-of-town duties, are participating. New employees will be invited to keep the record at the 100 per cent mark after they have been at work for two weeks.

EOP Controller **John J. Cole** said a number of workers have bought bonds for cash, in addition to participating in the payroll allotment plan. One employee invested $4,000 and several have bought $1,000 and $500 bonds.

CHECKS BRING BROAD SMILES

WINNERS ARE CONGRATULATED by W. E. Canniff, manager of operations at EOP, when he presented duplicate awards to Kathryn E. Reubart, War Department Administrative Office, and Vincent Cantarella, Paymaster's Office, for naming THE BOMB-SHELL.

Three Employees Share in Award of Prizes For Naming Elwood's New Tabloid

Kathryn Reubart and Vincent Cantarella Receive $10, Michael Gorman $5; Canniff Hails Project

Cash awards originally announced in the contest to select a name for the new newspaper at the Elwood Ordnance Plant were more than doubled as the result of the great interest manifested.

Duplicate prizes of $10 each were presented to **Kathryn E. Reubart,** Administrative office, Ordnance Department, and to **Vincent Cantarella,** Paymaster's office, for their entries as the judges decided on the name, *THE BOMB-SHELL.* **W. E. Canniff,** EOP manager of operations, presented checks to the winners.

Guard **Michael Gorman** was awarded a $5 cash prize because his contribution, "Bomb and Shell," was so near to the name chosen by the judges. Later he confided that he almost sent in "The Bomb-Shell," but decided it was too "corny." (Note to Mr. Gorman. . . . You have a right to your opinion, but it cost you $5. —Editor.)

Production Is Lauded

"I think the name selected," said Mr. Canniff, "is the most appropriate which could have been chosen. It tells the Elwood story, is easily remembered and lends itself to artistic and editorial treatment.

"My personal appreciation goes to every employee who entered the contest. This advance interest forecasts a splendid welcome for the paper, and I'm confident that the publication soon will be a popular feature with everyone at EOP.

"In this first issue of *THE BOMB-SHELL,* I want to take advantage of the opportunity to express to EOP workers the appreciation felt in Government circles for the splendid production being maintained here. It is the talk of the Ordnance Department.

"Construction of production units at the plant have been completed and operation is now on the basis originally planned. That production schedule, compared with the accomplishments in World War I, is phenomenal. It has been achieved only by the manner in which every employee has done his particular job. It is good to know that EOP is contributing its full share to 'keep 'em shooting.'"

Employees who received honorable mention for their entries are: **Ann Kulpa, Willard J. Arseneau, E. Marion McConnell, Bud Resler, J. J. Fitzpatrick, Donald J. Kane, Joe Caveny, Alfred Emiley, Woodrow W. Davidson, St. Elmo Stewart, Guy F. Brunacci, J. F. (Jerry) Walsh, LaVern T. Conroy, Edmond H. Vanwinkle, Earl R. Steen, Jr., Harry S. Walters, Jacob L. Storhow, Ernest Myers, William J. Denver, Ray Shipley, Pearl M. Marston, Maxine L. McBride, Joseph J. Peters, Edward F. Washburn.**

Paul K. Orosco, Joseph P. Motta, William J. Stanley, James P. Murphy, Thomas V. Brennan, I. G. DeMoss, Willis C. Pitzer, Paul D. Newey, Eugene T. Bennington, Henry Fatland, Thomas Tomaszewski, Harriet L. Wise, Orville J. Baron, Viola Arlene Schloendorf, Frank W. Shurte, Joe Elledge, Charles Evans, William D. Hartley, Wilda Willis, J. V. Wall, F. F. Christianson.

Bernard J. McShane, M. Ralph Hatch, Kathleen T. Conway, Orman K. Olson, Geraldine M. Ward, Charles H. Ross, Frank H. Costello, Robert Muir, Harold A. Whitmar, J. E. Fisher, John L. Fister, Grover H. Koppelman, Harry J. Babb, Anthony B. Toliuszis, Nick Belluso, James Nolan, Joseph Sacig, John J. Barry, Wesley L. Peebles, N. J. Cleary, Ikey Liker, George F. Zelke, Adhemar R. Lambert, Lewis C. Schuck.

Terms First Issue Another Milestone

"Only 20 months have passed since this great plant was started and each of those months has furnished a new and added triumph to the laurels of Sanderson & Porter at the Elwood Ordnance Plant. The initial publication of *THE BOMB-SHELL* is another milestone and amply verifies the determination of every single person at this plant to 'Keep 'em Shooting.'"

—Don M. Hoffman,
Lieut. Col., Ordnance Dept., Commanding.

Elwood Tops All Ordnance Plants of U. S.

Executive Acclaims Employees for Achievement Here

Elwood Ordnance Plant is an important unit in the Ordnance Department's program of furnishing to our armed forces adequate supplies of the best ammunition procurable, according to **Harrison Smith,** resident partner of Sanderson & Porter, EOP builders and operators.

"A primary consideration in the selection of the Elwood site by the Ordnance Department," said Mr. Smith, "was the availability of a high type citizenship, fathers, sons and daughters, who it was felt would give their best efforts toward making the Elwood Plant one of the best operated plants in the entire program.

"We who have been associated with the Ordnance Department since initial construction was started November 18, 1940, are proud of our association. Wholehearted cooperation and encouragement have been given us at all times, the results of which are apparent in the results of our work. We believe Elwood 'tops' all other similar plants in the United States, in all respects.

Shells Being Fired

"Our first loading line was put into operation July 12, 1941, seven months and 25 days from the starting of construction work. Since that date we have brought all of our lines into operation and have loaded many millions of components going into ammunition which our Allies and ourselves require. Each loaded piece has an Elwood mark, and already reports have come back in letters from far-distant places, written by Will and Grundy county boys, that they prefer Elwood ammunition to all other kinds.

"We Elwood workers have a right to be proud of our Ordnance Department, our plant, our continuing increase in production, our production methods—and our people. The combination cannot be beaten and we may expect that with increasing familiarity with our work, closer acquaintance and

Group 2 Employees Show EOP Spirit

EOP spirit is dramatically illustrated by the spontaneous action taken by employees of Group 2 following the death of one of their co-workers.

Edward Schultz, 54 years old, died May 17 at the City Hospital. He had been ill but two weeks. Friends who called on him during his illness reported he made a brave fight, displaying the same attitude he had shown in his daily work as a member of the "Keep 'Em Shooting" army.

Ed is survived by his wife and 18 children. His friends decided they would show their sorrow for his passing in a practical way. Guided by Superintendent **James J. Murphy** and aided by Assistant Superintendents **Eugene Hunt, John Johnson, Jr.,** and **John T. Kelehan,** Group 2 employees raised a purse of $315 and presented it to Mrs. Schultz.

YOU AND THE WAR

Well, here we are, a bunch of fellows and girls holding down jobs at the Elwood Ordnance Plant. Most of us are making more money than we ever did before. The war, even at this munitions plant, sometimes seems far away—something that comes in over the radio or you see in the news reels or in headlines in the papers. Sure, a lot of the boys have gone into the army or expect to go in soon, we have to do with less sugar and we've got to go easy with that car on account of tires. But with all that, life goes on a lot like it did before. And just give us time, we'll knock off those Japs and Nazis—but good.

O.K., O.K., I'm not trying to hint that you're smug or complacent or not taking all this seriously enough. This is not a pep talk. Honestly, you're doing fine. What I do want to say, and nobody can say it too often, is that you think hard for a few minutes about what all the shooting is for.

We've all heard a lot about what we're fighting *against*, but just what are we fighting *for?* What kind of a world are we fighting for with all our nerve, our wit, our men, our money?

We're fighting, I say, for the democratic way of life. And that means the right to live and work as free men and women, so that no one gets pushed around, or goes hungry, or is ill-clothed or lacks decent housing. For a world in which no gangsters prating about "that dirty deal at Versailles" or "living-space" or "a new world order" can ever again crush decent people who want only to live in peace and raise families and go to the movies and take trips on Sunday in the car and give the next guy an even break. The right, that is, to live our lives and work out our destinies as free human beings in a free world.

This is what America—the American Dream—has always meant and stood for. This is what we can all pitch in and fight for—on the battle front or at the Elwood Ordnance Plant—with all our brain and muscle and heart.

—Seymour Kurantman,
Ordnance Department.

CONCERNING WAGGING TONGUES

Talk about your operation; talk about your children; talk about your prowess as an athlete or glamour girl, but don't talk about your job and the work that goes on here.

Of late many persons have been doing too much talking about strictly government affairs. While on a recent visit to a restaurant in a nearby city, a conversation between an EOP employee and an outside individual was overheard. This individual asked the employee how many shells were being loaded daily by the groups. The employee reminded the person that it was not permissable to reveal such information. The individual then indignantly reminded the youth that it didn't make any difference if he revealed the information or not, because he already knew approximately the number of shells being loaded daily by each group. This information undoubtedly was obtained from some careless, thoughtless employee who did not guard his idle chatter.

With less than 7 per cent of the world's population and less than 7 per cent of the world's land area, we of the good old U. S. A. have enjoyed more than a third of the world's wealth and income and 100 per cent of its pleasures.

Now during this period of sacrifice and doing without and with an all-out effort for victory, let's not spoil it with a wagging tongue.

One person may start a rumor but a dozen may not be able to stop it.

—James Glade, Group 61.

PAGE THE FERRY COMMAND!

Say, now that's just carrying things a little too far.

Many Novelties Will Feature June 13 Dance

Committee Busy Arranging for Social Affair

By Harold "Red" Bowler

Interest in the dance to be held for all employees of the Elwood Ordnance Plant and their guests in the EOP Recreation Building Saturday night, June 13, is at fever pitch.

Announcement of the date immediately set tongues wagging, especially when it was learned that the arrangements committee is tying its plans in with the "Keep Them Shooting" campaign which got off to a splendid start with the buffet supper and dance held May 15.

The dancers will glide over the softly lighted floor to the music of Keith Gale and his orchestra, one of the most popular groups in this section. Red, white and blue spotlights playing on the spinning surface of a crystal ball will highlight the decorative theme of patriotic treatment.

A brief entertainment program will be featured by the awarding of a $25 War Bond and other prizes. Novel dances and specialties are included. **John E. Olson** (Ole, to his many friends) will be master of ceremonies.

In charge of the affair are: Honorary chairman, **Lt. Col. Don M. Hoffman**; general chairman, **Harold H. Bowler; Ann Kulpa, Kathryn Reubart, Michael Kelly, Helen McGinnis, Jennie Vernetti, G. B. Lyons, Carl Anker, Frank McCarthy, Josephine Rush** and Mr. Olson.

Tickets are $1.10 a couple. The committee is looking forward to welcoming all employees and their guests to this gala affair. One of each couple must be an employee of the Elwood Ordnance Plant. Formal dress for the ladies is expected to prevail.

NOTES FROM THE INSPECTORS GROUP 61

Inspection Department, Group 61, in its first contribution to the Company periodical, extends its best wishes for untold future success to the editor and staff. We shall do our level best to cooperate fully in making this periodical an instrument of great merit.

In our inaugural contribution, it is fitting to introduce **Harold Rouff**, senior inspector; **James Glade, Paul Newey** and **Ed Rashid**, shift captains, who will exercise their literary talents to the best of their ability in bringing to the readers a wealth of information from Group 61.

Also, by way of introduction, it is fitting to present Group 61 as the group which processes that Ammonium Nitrate which has made life so pleasant to many men in the loading lines.

While but two of our men have had experience in loading a shell, it was our recent privilege to have an inspection tour which enabled our men to appreciate the importance and convenience of Ammonium Nitrate which met government specifications and which was easy to handle.

We of the inspection Department, Group 61, along with every employee in the Production Department, are well aware of the value of workable and almost chemically perfect Ammonium Nitrate. It is with that knowledge that in the future, as in the past, we shall continue to put forth our best efforts in our work.

Has Art Talent

The cartoon to the left is the work of **Viola Arlene Schloendorf**, mimeo chief, Office Management, who does the cartoon on the daily menu for the cafeteria.

READY FOR DUTY at a moment's notice is the EOP Fire Department. Charles Alton (left) and Charles Jiskra (right) are shining a truck at Station No. 2.

ORDNANCE DEPARTMENT

War Department employees, in the recent "all out" campaign for the purchase of War Bonds under the Payroll Allottment Plan, pledged themselves 100 per cent.

Rita Hatting McCloud has left us. She and Dick will move to La Grange, where he is employed. It is rumored that she plans to excel in the culinary arts.

Some former EOP people whose presence is missed these days are **Captain Irvine**, who is now Executive Officer at Pantex Ordnance Plant; **Bill Quimby, Elaine Berglund, Bob Jirousek** and **Captain Watkins**, who are now at the Gary Armor Plate Plant, and **Leo Offerman** and **Jack Staub**, who were transferred to the Wabash Ordnance Plant.

Bob Rogers' many friends wished him the best of luck when he left to join Uncle Sam's air force a few weeks ago. Bob is but one of the many young men from EOP who have answered their country's call. Others who have joined the fighting forces are **Bob Winchell** and **George Lipotich** of the Auditing Department and **Bob Seelinger** of the Time Section. **Jay Reynolds** and **Bernie Lyons** have received commissions as Ensigns with the U. S. Navy, and are awaiting instructions to report for active duty.

Welcome!

Recent additions to the Administrative staff include **Josephine Vilt**, who succeeded **Wilda Gilbert** as secretary to **Major Johnston**. Wilda is now with the Santa Fe. **Mavis Emerson** replaced **Hazel** O'Connor, who is now in the Adjutant's office.

Cecil Wheeler, Purchasing, has time on his hands these evenings since Mrs. Wheeler and Judy are visiting relatives in Southern Illinois. He misses that home cooking, too.

Ann Lipsar, Operations & Engineering, is vacationing in Louisiana.

Who had a better time at the recent dance than **Johnny Welch?** . . . He and **Helen Harmon** were doing some fancy stepping. **Mary Jesberger**, the Colonel's secretary, and **Harold O'Keefe** were cutting capers, too.

CUPID'S CORNER

Dorothy Thompson, Operations & Engineering, and **John (Ole) Olson**, Pay Roll Audit, were wed in a surprise ceremony at the Immanuel M. E. Church in New York City May 5. They recited the nuptial vows on Ole's mother's seventieth birthday anniversary. Congratulations, newlyweds!

The good neighbor policy prevailing in this locality was demonstrated by the recent marriage of **Gertrude Fritz**, Auditing, and **Truman (Lindy) Lindeman** of K.O.W.

Old Dan Cupid's arrows have been finding their mark at EOP. Wonder when **Hazel O'Connor** and **Anne Kulpa** will walk down the aisle to the strains of Lohengrin?

Betty Lewis, Stores & Transportation, will wed **William Borr** of Chicago June 14. Her husband-to-be is a chemical engineer at Plumbrook Ordnance Plant. Numerous parties and showers honoring the bride-elect have been planned by her many friends.

Eleanor Fox, Operations & Engineering, became the bride of **Robert Corniels**, Yorkville, at a candlelight service at St. Paul's Evangelical Church in Lockport May 23.

—Kay Reubart.

FRAGMENTATION BURSTS

Scenes from the Shindig . . . or . . . who was there that memorable Friday night. . . . **Colonel Hoffman**, looking as a Commanding Officer should look, mingling with the crowd at the mess hall . . . really showing everyone how welcome they were. . . . **Major Johnston**, the Colonel's right hand, jovial as usual and making all feel "at ease." . . . **Captain Tunstall** . . . looking a mite serious . . . but with the ever-present twinkle in his eye. . . . **Mr. Zagade** (Audit King) . . . showing the boys and girls how to conga. . . . Must have been too much for him . . . couldn't get down to work the next day. . . . **Johnny Welch** . . . his able . . . assistant . . . really having the time of his life. . . ."**Red" Bowler** (Planning Peer) walking down the floor, hand in hand with a cutie pie . . . wait 'til Joan hears about this. . . . **Lieutenant Brandon** (the Blonde Adonis) and **Bea Berge** (Personality Kid), beating a boogie woogie. . . .

Debonair **Mr. Filips** (Stores & Transportation) . . . looking the sights over while puffing on his perennial pipe. . . . How didja like the Hawaiian dancer Mr. Filips ?????? . . . **John E. Olson** (Pay roll Playboy) or Ole to you and gals . . . with his brand new wife, having the time of his life as usual. . . . By the By . . . Mrs. Ole is the former **"Dotty" Thompson** of Operations and Engineering. . . . **Captain Grant** and **Josephine Kush** rushing the rhumba. . . . He's a peach of a guy and head of Operations and Engineering. . . . Joe is the chief of Mail & Record, and a good scout in her own right. . . . Off the Record. . . . What Lieutenant has been seen in the vicinity of the Kush domicile lately. Should we tell?????? . . .

Ask **Flossie Babecke** of Personnel how she liked the Bear Hug. . . . I bet Friday night was the first

A SHELL FOR SCHICKELGRUBER, said Recreation Director "Tiny" Cahoon as he hoisted an EOP product to please the photographer and you (it is hoped).

time a 600 pounder ever sat in her lap. . . . **Bernie Lyons** . . . looking cute with that crew haircut . . . dashing around . . . seeing the sights . . . news has it that he and **Jay Reynolds** are practicing "Anchors Aweigh" . . . **Lieutenant Durrenburger,** handsome as ever, with his constant companion **"Jymmie R."** . . . Gossip has it that this is quite serious . . . how about it Lieutenant ?????? . . .

Francis McCarthy of Auditing keeping it departmental, by traipsing the tango with **Kay Rosenbaum** . . . cupid cooking with gas there . . . says we. . . . **Mr. Bull** from Planning Division and pert **Marge Kangley** from Personnel . . . cutting a rug once or twice. . . . **Joe Puppel** and **Marie Maren** (Mail & Record) having a whale of a time . . . where was **Jimmie Veatch** about that time, Marie??? . . . Takes the jitterbugs to whoop it up, doesn't it??? . . .

Wonder where "Tommy" from Inspection was while her heart

PERTNESS PERSONIFIED is vivacious Helen McGinnis, Ordnance Department reporter. Attention of prospective reporters is directed to Helen's smile, which may be due to the fun she is having as a newspaperwoman.

throb, **Warren Weithofer,** was enjoying the entertainment??? . . . **"Duke" Douville,** Inspection Chief . . . suave and meticulous as per schedule . . . surveying the situation with interest. . . . How's the chicken on Broadway these days, "Duke" . . . or have you been there lately??? . . . **Edna Millweard** (Personnel Queen), keeping her boy friend waiting at the gate until after the dance. . . . **Ray Marquardt** of Mail & Record all dressed up for the occasion. . . . As for the dance as a whole . . . everyone enjoyed themselves . . . and sincerely hope the Plant continues the policy. . . .

THROUGH THE GUN BARREL

Frank Branger, of the Government Stock Room, has been seriously ill with pneumonia, but has recovered sufficiently to be on the job again . . . welcome back, Frank. . . .

Phil Keller of the Payroll Department, has taken off for Gary to take up similar duties . . . shure miss his pleasant smile around these here parts. . . .

Marge Horning has gone Hoosier too, seeing as how her boss, **Mr. Wylly,** took to the sand dunes too. . . . She was a well dressed gal, don't you think? . . .

Who's the man in the blue suit that **Bess Moore** (Personnel Chief) has a yen for??? . . . We understand that he reciprocates, too. . . . Shall we let our hair down and tell all?????? . . .

Speaking of well dressed people . . . take a gander at **"Sy" Kurantman,** Administrative Assistant . . . as he passes by. . . . Looks like a page from *Esquire* most of the time. . . .

Wonder what **Kay Reubart** does with her time now that **"Bud" Lancaster** has departed for Decatur. . . . He is also 1A in the Army but still A1 in Kay's heart. . . .

Tessie Townsend of the Traffic Section took up the duties of being a housewife seriously and up and quit . . . good looking **Charlotte Matheny** is now right hand gal to **Jim Pavel.** . . .

Diamond rings are the vogue this month. . . . **"Molly Baker,"** Teletype Operator, now has one on the right finger. . . . **Bob Kennedy** of Captain Grant's crew . . . hung one on **Betty Wilhelmi** of Miss Moore's office. . . . One time Betty won't be able to say "Why?"

Harriett Malloy, Sol Jacobs secretary, has gone and did it . . . she is now Mrs. John W. Dunn. . . .

INSPECTION NOTES

Mr. and Mrs. Milton W. Krissman announce the arrival of a baby girl. Mr. Krissman is acting Group Inspector in Group 5.

It's a 9-pound 7-ounce baby boy at the Hallihans. **Roy B. Hallihan** is Group Inspector at Group 3A.

Chalmers S. Wooley has finally joined the Benedicts. Best of luck, Chalmers!

Stanley L. Eisler, Chief of the Technical Section, seems now more his rotund self, having completed the landscaping of his new home.

Would you walk a mile down a country road alone at 12:30 a.m. and *past four cemeteries* after attending the party given by the Employes Service Committee Friday night? **Helen Boula** did just that! She says the party was worth it.

J. G. George went to an Efficiency Rating Meeting and lost his new green hat. Has anyone seen it?

Poor **L. E. Myers** has been kept so busy with moving and BUSINESS that he hasn't even had time to get a haircut in weeks. Is there a barber in the crowd??

We missed **Mr. Douville** and **Paul Smith** last Friday. They took a little jaunt down to Savanna Ordnance Plant but hurried back to attend the big party.

Carl Anker, Technical Division, attended the formal given by the Gamma Phi Beta Sorority of Northwestern University at the Sunset Ridge Country Club. He drove to Holland, Mich., to see the Tulip Festival the following day.

—Ethel Dirker.

Volunteers Requested, Contributions Welcome

All EOP groups have not assigned reporters to represent them on *THE BOMB-SHELL* staff. As soon as this has been done, the names of group reporters will be carried over their department columns and in the paper's editorial masthead. If you're interested, see your superintendent, and send in your contributions. They are wanted and will be welcomed.

Additions for Office Building Are Started

Extension of Wings Planned For More Space

Construction of extensions to the two wings of the Administration Building is under way and completion is expected in a few weeks.

The extensions were made necessary by the increased staff required to take care of management and administrative tasks. The extensions will add 60 feet to each of the wings and there will be two floors as in the existing building.

Employees attached to the Administration Building will greet the enlargement with pleasure as some offices and quarters are considerably crowded at present.

SWING AND SWIPE is the slogan of George E. Curtis, janitor, who was snapped at work at Richards' Farm.

Operators of Elwood Handle War Jobs

(Continued from page 1)

and became acquainted with many on the local staff, is also chairman of the board of American Water Works & Electric Company, one of the larger utility holding corporations.

In addition to building and operating the Elwood Ordnance Plant, Sanderson & Porter is engaged in a number of other projects for the Government. The firm designed and is building the Pine Bluff Arsenal for the Chemical Warfare Service at Pine Bluff, Ark. A power plant for a huge aluminum plant, to be operated by the Aluminum Corporation of America, is being built for the Defense Plant Corporation at Lake Catherine, near Hot Springs, Ark. A shell loading plant is being designed and constructed for the U. S. Rubber Company at Charlotte, N. C. This plant will be operated by the U. S. Rubber Company for the United States Navy.

Sanderson & Porter engineered and managed the exhibit of the glass industry at the New York World's Fair. **Richard T. Bassett,** now assistant to Controller **John J. Cole** at Elwood, was resident manager in charge of the exhibit.

Mr. Bassett's adventures in handling some 13,000,000 visitors from over all the world make a thrilling story, just as do the experiences of many others now concerned with loading shells and bombs at Elwood. These stories will be unfolded as questioning regarding the EOP "family" progresses.

Swap Column Planned

Do you have anything you want to swap? There will be a "Trading Post" in the next issue of *THE BOMB-SHELL* for the convenience of employees. Nothing will be offered for purchase or sale, but trades will be advertised. There is no cost, so send your items to the Editorial Office.

ADMINISTRATION DEPARTMENT

Some members of the Purchasing Department—the P. A., etc.—and their wives were honored with the presence of **J. P. Simpson** at the White Sox Ball Park Sunday, May 24. Mr. Simpson, a native of the Ozarks, was greatly impressed, from all indications, with the superb playing of the Detroit Tigers.

This isn't late news, but just in case you haven't heard—**Jimmy Forrest** and **Rube Medin** of the Expediting Department both had the same idea, they dood it—the victims: **Marge Hayden,** Personnel, and **Kathrine Guthrie** of Gerlach-Barklow. Also, **Don Lewison,** Electrical Department, and **Marjorie Cox** took *that* step. *Congratulations!*

Verne Schoenenberger, Production Cost Department, is basking in the California sunshine.

Word has been received from **Jean Mostyn Stefanich** that she and her husband, Private **Bill Stefanich,** are now residing at San Luis Obispo, Calif.

Mrs. Anita Scott of R. T. Bassett's office is back with us again after a four months' leave. We all hope that good health is now with her to stay.

Marjorie Brennan is vacationing at Baton Rouge, La.

Via the grapevine: Understand **Art O.** and **Gerry D.** are getting to be a popular twosome.

How do you like your rides in the big, brown Oldsmobile, **Eleanore D.**? We understand he is the Chief!

How's the GLAUDELL-GAFFEY combination getting along?

When are **Evelyn Reed** (the bear rider) and **Bill Murphy** of Fuze & Booster walking down *that* aisle? Soon, we heard!

Bob Bailey, buyer, is busy getting in the hours in the air for his wings.

Helen Baker, Telephone Building, and **Wrongway Corrigan,** now stationed at Ft. Brad, engaged!!!

Supervising Sergeant **Raymond Harper,** Plant Police, has received orders to report to the United States Army in Chicago June 3 for military service. Sergeant Harper made many friends during his long EOP service.

The hospital group seem to enjoy their ice cream, cake and coffee!!! They celebrated the birthday anniversaries of **Dr. George Luke** and **William D. Bryant,** insurance manager, May 18 and May 25 none other than **Dr. H. L. Schultz** was the honored hospitalite.

The hospital gang ganged up and had a steak fry Sunday, May 24. **Roscoe Sidell,** pathologist, allowed (?) the gang to have this fry at his home in Elwood.

Dr. George Giel acted as godfather to a baby girl at Gary, Ind., May 24.

RIGHT TO WORK went Maebelle Anderson, secretary to Purchasing Agent E. C. Carlson, when she was named reporter for the Administration Building. (Note . . . Pictures of all reporters will be published soon.—Editor.)

Dr. George Luke, who hails from Georgia, is becoming quite a fisherman. He and **Don Wright** of Group 3A tried their luck at a small "lake" north of Joliet. Dr. Luke claims the fish were just not biting that day.

The hospital has a "full time patient." Name is Pidg. Pidg was found injured in some wire over at Group 64. Pidg is or was a carrier pigeon. The crew at the hospital did a little praying, etc., and now Pidg's wing is all splinted up and getting along splendidly. By the way—Pidg likes orchids.

Guest's "Chatterbox" Called Appropriate

Edgar A. Guest's well-known poem, "The Chatterbox," has been quoted frequently as descriptive of the type of person no member of the EOP family wants to be. Do you remember it? It goes like this:

"A chatterbox is a man or maid
Upon whose tongue no check was laid.
A chatterbox, the truth to state,
Quite obviously was born to prate
And disregarding friends or foes
Insists on telling all he knows.
A chatterbox, with time to spare,
Will talk to strangers anywhere
And spill the contents of his brains
On buses, trolleys, ships, and trains.
On chatterboxes should be hung
This warning: 'I've a wagging tongue.'
I'm dangerous! So careful be,
Don't mention any facts to me.
Because, no matter where I go,
I can't help telling all I know."

ACTION IS FAST when the soft-ballers play. This tense moment in the Group 1 - Group 2 fracas shows Stuart Marlette of Group 2 at bat, Jim Robinson of Group 1 behind the plate and Umpire Fred Perri.

CHECKING THEMSELVES are two timekeepers, James J. McHugh (left) and J. F. Walsh (right) at Richards Farm.

NEWS AND VIEWS OF GROUP 1

We wondered about the epidemic of bruised fingers, chest and head colds, pains in the ear, and pains in the neck which have afflicted a great many of the men in Group 1 in recent weeks. When these big bullies were little fellows they did not lead normal lives unless they fell out of a tree, were kicked by a horse, got a bloody nose, or had something similar happen to them every day or so. The only time the folks found out about these happenstances was when clothing was torn.

We started to say that we wondered about this and curiosity became so strong that we dropped in at the First Aid Station a day or so ago. We don't wonder any more, for we found the nurse on duty, **Sylvia Hamper,** to be a very charming person indeed. All this is just kidding and we know that all are supposed to report injuries however slight. Any similarity to common sense or seriousness which may be found in this little squib is strictly coincidental and, by the way, we're not feeling so well ourselves.

Franklin Lewis, Group inspector, is endeavoring to line up some good ball teams among his men in an effort to encourage a spirit of rivalry on and off the job. His efforts have advanced to the point of christening the proposed teams as follows: Slack's Beligerents, Harris' Idlers and Kelly's Sleepers.

It could be that the Beligerents have earned their name on account of their ability to get into hot water which at times requires the combined efforts and talents of both Lewis and **Mid Slack** to pour oil upon the waters and restore peace and good will. On the other hand Harris contends that the company inspectors on his shift are the hardest and most conscientious workers in the entire plant. Kelly too is up in arms, figuratively speaking. He claims that his men have never been caught sleeping and that they are known far and wide for their wakefulness. Be that as it may, there will be a lot of baseball played by the inspectors in Group 1 before the football season rolls around.

WRITE TO MARINE

There is posted upon the bulletin board of the inspectors' office in Building 10 a rather interesting letter from Private **Clarence Trierweiler,** Recruit Depot, M.C.B., Platoon 405, San Diego, Calif. Until a short time ago, Clarence was a company inspector in Group 1 and he is now learning that Sherman was right. We have always heard that the Marine Corps was a tough outfit and we now have first hand testimony to that effect. The recruits or "Boots," as they are known to the old-timers in the Corps, are put through a stiff course of training and it does not end with the day's drill. In their leisure hours they are required to take care of all the other little jobs about the barracks for which they get nothing in the way of payment.

Anyone reading this notice who is acquainted with Trierweiler would make him very happy about the whole thing if he or she would jot down the address and drop a line or two. Letters are most welcome to the men in service and we have never heard of any complaint from a soldier who was receiving too much mail.

STORY OF CHALLENGE

Emmett Kennedy, popular man about Building 13, is back on the job after a few days at home where he battled a mild threat of pneumonia. Building Foreman **John Kinsella** must have figured that Kennedy's former job at the taping table contributed to his high temperature, for now the smiling Mick is going all-out for end-plate assembling.

George Gibson, assistant group superintendent, attended a recent safety meeting and thereby hangs a tale. During the course of the evening the subject of baseball came up and Group 2 stuck its chin out in the matter of a challenge to Group 1 for a set-to in the manly (?) art of softball. It was decided that Group 2 would issue the challenge in writing and then send a man along to read it just in case we didn't have anyone capable of reading. **Joseph Salmon,** superintendent of Group 1, had a pat answer for that one. "If Group 2 is able to compose and write a letter which is intelligent and legible we will be able to read it with the greatest of ease and why does Group 2 lack confidence and so forth and so forth," said Mr. Salmon.

The softball schedule has been knocked caterwampus by old Jupiter Pluvius, but we finally did manage to get one game off our chest. The Magazine team won over Building 10, but whether or not the better team won is a moot question. **Mid Slack,** senior company inspector, who umpired the game, obligingly allowed one of the Magazine batters an extra strike after three were out, and four scores, which constituted victory, trickled over the plate during the excitement. If memory serves, a somewhat similar occurrence took the heart out of the Brooklyn Bums last fall.

Johnny Nicola, who puts in his time at Building 8 change-house, is quite active in the affairs of the Cantigny Post of the Veterans of Foreign Wars at Joliet. Rumor has it that he was officer of the day at a military burial not so long ago. He got along in splendid fashion up to a certain point. That was when he issued the following commands to his firing squad. . . . "Ready—Aim—Shoot." Even at a funeral that sounded funny to the old soldiers attending.

Henry Novak, company inspector in Building 13, has a lucrative sideline. An article of his on the subject of paints and painting appears in the current issue of the trade magazine *Industrial Finishing* and the editors have informed him that another offering has been accepted and will be published in a forthcoming number. He is displaying a check in the amount of $27 for his May opus and, as Hank expresses it, "That ain't hay."

NEWS OBTAINED QUICKLY

Please accept apologies from your group reporter if it appears that he has no thought for anyone else in the group beyond the company inspectors and the men in building 13. Make allowances for the facts that this is all new, that preparations for the first issue were rushed, and that this reporter has not yet had the opportunity to go up and down the line getting acquainted.

It is the expressed desire of Superintendent Salmon that the getting-acquainted process be pursued and that this reporter will visit all the buildings on the line at frequent intervals securing items of interest and assuring each building an even break in the news columns. It's not a bad idea for the various foremen and assistant foremen to familiarize themselves with the celebrities working with them and to get their men active in turning in items of interest to the readers.

Group Supers Cover Lots of Territory

Reporter Writes About Story He Didn't Get

By Jack Barry

This writer was sent to the office of Superintendent **Joseph Salmon** to obtain a biographical sketch for the first issue of *THE BOMB-SHELL.* Well, we went there twice in an effort to make good on the assignment, but it was no soap and no sale for many and various reasons. We cooled our heels on both occasions but didn't get the interview on account of because there were too many more important affairs for the superintendent to give his time and attention to.

It had always seemed that the super had a pretty soft snap with nothing to do but come around once in a while and see if the buildings were there and that the men were getting enough fresh air and one thing or another like that. It seemed that production just took care of itself automatically and one wondered how to go about finding such a sinecure. Well, brothers and sisters, all that has been changed and the change came about during the aforementioned waiting periods.

There were two assistant group superintendents, **George Gibson** and **Mark Davis,** one putting his shift to bed and the other starting his to rolling. There were men with troubles and men with requests about being changed to other buildings or being assigned to other work. There were the safety men checking on this and that. Then there were the telephones and they were the real pay-off.

Many Decisions Made

They kept ringing on the average of a couple of times a minute and what stories they had to tell. A conveyor belt was broken down, cars had to be moved and the engine was missing, there were not enough men here and not enough there, there were tools to be turned down and tools to be turned up, there were trucks to be ordered here and sent there, in short there were a million and one things to be acted upon and ordered done after split-second decisions.

We will keep on trying and some day we will get that interview so that we will know a little more about the man we work for. This will give a general idea of a small fraction of the activities of a group superintendent during his spare time. What was that we said about a sinecure? Ho Hum! Being a company inspector and a group reporter seems more our size.

NEWS AND EVENTS OF GROUP 2

In our initial contribution to our new paper, your correspondents from Group 2 take this opportunity to wish the Editor and his entire staff the very best of luck for a successful publication.

"Pete" Fleming, Group 2 truck driver, was married Saturday at Manteno, Ill. After honeymooning through the Southern States for a few days, he and his bride will reside in Minooka, Ill.

Did you know there are two former major league baseball stars working in Group 2? Well, in case you didn't, you might check the name of **Joe Pate** and **Bob Burke** in any of baseball's record books. Pate played with the Philadelphia Athletics and Burke with the Washington Senators.

Burke was outstanding, especially for his no-run, no-hit game against the Boston Red Sox.

Frank Liker, who works at this Group on the 11:30-7:30 shift, is the proud father of a baby boy.

The Safety Banquet held at the Y. M. C. A. in Joliet was a complete success and every one agreed the program was very interesting. Superintendent **Joseph J. Murphy** and all foremen working on the day shift attended.

THINGS WE ARE PROUD OF

That we were 100 per cent in signing for War Bonds.

No lost time accidents for the month of April.

Only four lost time accidents since the start of the Group.

The magnificent way all the fellows responded toward the collection for Edward Schultz, laundryman in Group 2, who died May 17.

Our Victory over Group 1 by a score of 12 to 5, in the first intergroup game.

And last, but not least, **The Elwood Ordnance Plant.**

THE REAL LOWDOWN

There is a certain young man who works in Building 16 answering to the name of **"Bob"** who has been seen at some of the better nite-spots and is acquiring quite a tan.

Ask **Leo, Bill** or **Ed** about **Streator.** It seems funny they would have to go to Streator to do their nite-clubbing.

Did you know our Chief Company Inspector in Group 2 is about to desert the bachelors' ranks? Well, it's so. The big day is scheduled for June 17.

They say Safety Engineer **Al H.** and Production Clerk **Hilbert N.** are two of the best second guessers as far as the "ponies" are concerned. What about this, boys?

Say, **Gene,** what's this we hear about you and **Rudy** picking up a couple of lady hitch-hikers who can do 138 shirts an hour?

Now that Leon Henderson has placed a ban on the sale of rubber girdles, Assistant Superintendent **John Johnson** is really up against it. Too bad, John, but you'll have to use adhesive tape or some other substitute for the time being.

"Archie" Le Borence is scheduled to go on tour with **Paul B. Hallock** of Chicago shortly. It is rumored the tour will be sponsored by the Women's Christian Temperance Union. How about that, Archie?

"Racketts" Brophy was the unfortunate victim of a pickpocket in Wilmington a few days ago. It seems Racketts was cashing in on his selections for the day and the pickpocket cashed in on him.

In the event you are looking for some one to play the part of a bashful bride at a mock wedding, just contact **Merle Hack** at Building 3. He has the figure and everything to go with it. Of course, **Art Jennings** will gladly fill in as the groom.

SOFTBALL NEWS

The Group 2 softball team is known to those up in their sports as "Murphy's Boys." They have turned in several star performances already this year. Here are a few of the scores—Murphy's Boys 9, New Lenox 1; Murphy's Boys 11, Barrett's Sports 4; Murphy's Boys 12, Group 1 5; Murphy's Boys 18, Group 2 Scrubs 4.

The boys have many games booked ahead. Why not come out and give them a little support? Some of the boys on the team are **Eddie Keenan,** a star player from Aurora; **Georgie Zobel,** from the Joliet Rivals; **Bill Galbraith,** from Kenosha, Wis.; **Ray Murray, Bob Mcguire, Ken Peterbok, George Schoppee,** from Joliet, and Big **Otto Koch** and **Ray Bell,** from Wilmington.

They are looking for games, so if any of you superintendents have a team and would like to play "Murphy's Boys," give them a ring, because they take on all comers. The team is managed by **Gene Hunt** and **Bill Galbraith** and their captain is **George Zobel.**

We have future bookings with Group 1, New Lenox, Brown Bombers, Barrett's Sports, Dame's Aces and others.

INSPECTION ITEMS

THINGS WE KNOW — That Uncle Sam's armed forces have gained some valuable men since Inspectors **Harry Miles** and **Leonard Rosen** entered the Navy, **D. W. Casey** the Army and **Dick Conlon** the Merchant Marine. A letter to these boys would be greatly appreciated by them. We know that the "ole gray Gob" isn't what he used to be, but **Ben Rice** declares it's TNT and not red colorback.

THINGS WE WOULD LIKE TO KNOW—When will the Navy decide that **Willy Robinson** looks better in, the Blue or the Green? When will Inspector **Jilek** be able to patent his inventions before someone else puts them in operation?

If you haven't seen our cinders you've missed an eyeful.

GOSSIP

Gossip is just what you hear,
Yet it can cause alarm and fear.
Some one says this, another adds that,
By the time you hear it, it doesn't amount to a drat.
So please let's not be guilty of this
Because your guess might be a miss.
You should listen and then be quiet
And please don't add your little mite,
Because it might create an awful site
And could cause the loss of a great fight.
So let's all join the "button our lips"
And put this strength behind our "mits."

—L. T. C., G-564.

QUICK SERVICE is given at the Richards Farm garage by Leo Scoggin (left) and William Dix (right), shown here checking up on Police Sergeant Matthew Mueller's car.

HERE'S HOW TO DO IT, said Superintendents J. E. Salmon, Group 1 (batting), and James J. Murphy, Group 2 (catching), at the opening inter-group softball game. Fred Perri is the umpire.

Murphy's Boys Defeat Group 1 To Open EOP Softball Season

Opposing Superintendents Watch Result of Challenge

By Jack Barry

It could be that Group 2 really did mean business when they challenged Group 1 to a game of softball. They have made good their proud boast and taken Group 1 into camp by the one-sided score of 11 to 6. They sent over a good team and were helped no end by a lot of errors on the part of the home team. We did give them big league entertainment in the matter of a well-rolled ball field and full benefit of the press. Ray Gora, staff photographer, was on deck to snap some pictures which appear on this page and Page 6.

The dramatic high of the day was reached when **Joseph Salmon,** Group 1 superintendent, posed at bat while **James Murphy,** superintendent at Group 2, occupied the catcher's box. They looked like real ball players and Salmon proved that looks were not deceiving in his case by knocking a few out of the lot. We do not know whether or not Murphy can catch, for none of the balls got past Salmon's bat.

The starting line-up for Group 1 was **Mitchell,** second base; **Waidley,** right field; **Keller,** left field; **Goss,** third base; **Kane,** first base; **Robinson,** catcher; **Wolf,** center field; **Farnsworth,** short field; **Smith,** short stop, and **Duclis,** pitcher. For Group 2, **Marlette** played left field; **Peterbock,** second base; **Keenan,** short stop; **Zoble,** third base; **Golden,** short field; **Shoppe,** catcher; **Koch,** pitcher; **Gilbert,** right field; **Lund,** center field, and **Murray,** first base.

As mentioned, that was the starting line-up and it didn't last long. After the second inning a bewildering array of players worked for both sides. They came and went about as fast as Rockne used to switch teams at Notre Dame. In fact they came and went so fast that this reporter could not keep track of them. The official scorekeeper could though, and when he caught Group 2 putting a man back in who had been taken out of the game a little earlier it was just too, too much. The particular man, Keenan, short stop for Group 2, knocked the ball galley west and drove in two runs. Then one of the old-time variety of arguments started and the umpires were so excited that they forgot to drive anyone back into the dugout. The two scores were disallowed just before the argument reached the bloody-nose stage.

It was a pretty fair ball game up until the fourth inning. With two out in the fourth the Group 1 pitcher let go a wild pitch and the fat was in the fire. Before the inning ended everyone on the old home team contributed something to the general result. Errors and wild throws followed one another in rapid order and it looked for a while that the only way we would get them out would be to demand their badges and then sic the guard on them. We have some good pitchers and some promising material for a group team which should acquit itself well in future contests. It will take some practice to wear off the rough edges and to find the round pegs for the round holes, but we will do it and avenge ourselves at some later date.

IVAN (TINY) CAHOON is busily engaged as EOP Director of Recreation.

If we want to get technical about the whole thing we can take Group 2 before the Judge Landis of softball and have him deliver an opinion as to disallowing the victory.

Group 2 must have figured that we had something special in the way of heavy hitters, whom we were going to spring in the seventh inning.

At the end of the sixth they put on their hats and disappeared in a storm of dust. They refused to come back to finish the game, claiming that it had seemed like seventy innings instead of only six. A very creditable job of umpiring was turned in by **Fred Perri** at the home plate and **Herb Tuttle** on the bases. Something has been said about the fair, but by no means weaker, sex being interested in the ball game. Only a few attended the May 25 game and we need them out there to give our lads an inspiration.

Plant-wide Recreation Program Under Way With Naming of Cahoon as Director

Former Football Coach Plans Activities to Meet Varied Interests of All Men's and Women's Groups

"Recreation for everyone,
Everyone for recreation."

Here is a six-word outline of the comprehensive plant-wide recreation program now in progress under the supervision of **Ivan "Tiny" Cahoon,** EOP director of recreation, and other members of the Employees' Service Committee.

Sports, music, dramatics and social affairs are included in the activities scheduled, and Director Cahoon announced that any recreational activity desired by any group of men or women will be worked into the program.

Completion of an athletic field near the Administration Building is being rushed, and many of the inter-group games and contests will be staged there. Work also has been started on other fields, especially for softball, near each group.

Softball is attracting most attention just now and any superintendent who wants help in getting his own group program started is asked to communicate with "Tiny." His office is in the Recreation Building, telephone extension 4109.

In the sports field, "Tiny" will have something to offer devotees of baseball, track, golf, tennis, badminton, horseshoe pitching and swimming. Other recreational activities will include singing, radio dramatics, bridge tournaments, chess and checkers, amateur shows, dancing, picnics and archery. Groups interested in these projects or any others are asked to get in touch with "Tiny" for information and arrangements.

"Tiny" has had a spectacular career in sports. After graduation from Gonzaga University, where he won letters in football, track and basketball, he played for five seasons with the Green Bay Packers and was named on several All-Pro honor elevens. He has coached at West DePere and Green Bay high schools and at Monmouth College.

"Tiny" also was active in dramatics in college and appeared in several productions with his classmate, **Bing Crosby,** of radio, stage and screen fame.

In announcing "Tiny's" appointment, **John J. Cole,** chairman of the Employees' Service Committee, said plans were being worked out to raise a recreation fund by charging admission to sports contests and dramatic productions. The funds so raised will be used to extend and widen recreational activities. In this way, said Mr. Cole, spectators as well as players will feel they have a part in making the program possible.

Elwood Tops All Ordnance Plants

(Continued from page 1)

better understanding of our immediate associates, the place of Elwood will continue to rise in importance.

"*THE BOMB-SHELL* was originated as our Plant publication in order to bring us closer together and as an aid in inspiring us to greater achievements. We are determined that it shall be a good publication — otherwise, it will not fit into our scheme of producing nothing but the best. It must measure up to the other attributes of Elwood!"

EXPRESSIVE FACES TESTIFY to the interest of this gathering of Group 1 fans as they watched softball get under way.

CONFIDENT OF VICTORY are these Group 2 supporters and this spirit helped their team to make good on the challenge they issued.

ELWOOD ON PARADE

ANOTHER MILESTONE ADDED to EOP record is the way Lieut. Col. Don M. Hoffman, commanding officer, describes advent of new paper.

EMPLOYEES ARE ACCLAIMED by Harrison Smith, resident partner of Sanderson & Porter, in describing esteem Government holds for EOP.

GIRLS PLAY important part at EOP as this busy scene from the fuse and booster lines indicates.

PERSONNEL GROUP plans to present the operetta, H. M. S. Pinafore, soon. Shown left to right are:
First Row — Helen DeLach, Eula Weaver, Bernadine Phelan, Charlotte Doxsee, Norma Fratia, John Barford, Lynn McCoskey, Donald Peters. Second Row — Edna Goldthwaite, Dara Prew, Marcella Burnham, William Johnson. Third Row — Charles Barr, Helen Bardi, Lee Reynolds, Loren Ross, Floyd Schauland, Robert Hamlin, Kathleen O'Connor, Helen Greene, David Graves.

CONSOLATION PRIZE is presented to Guard Michael Gorman by Chief M. C. Baughman as Guard Charles Griffin looks on.

SHELLS BY THREE roll off the end of the loading line at Group 1, packed and ready to "keep 'em shooting." Similar scenes are in evidence throughout the plant. In some of the buildings, girls are pushing ammunition components along, and all are as enthusiastic in "keeping 'em rolling" as the soldiers of ordnance shown here. *(Photos by Al Gora, Joliet Herald News)*

New Ordnance Chief Knows Elwood Well

General Campbell's Career Colorful Since Graduation

Major General Levin H. Campbell, Jr., whose picture and inspiring statement appear opposite, assumed the post of Chief of Ordnance on June 1, 1942, succeeding Major General Charles M. Wesson, retired. Prior to his appointment as Chief of Ordnance, General Campbell held the post of Assistant Chief, Industrial Service Production in the Ordnance Department. General Campbell negotiated contracts totaling billions of dollars, including that with Sanderson & Porter for the design, construction and operation of Elwood Ordnance Plant.

General Campbell has visited Elwood on numerous occasions, beginning shortly after inauguration of construction November 18, 1940. He watched the Elwood site change from a group of farms into a mammoth industrial plant, and finally saw the placing in operation of many of the loading lines.

General Campbell is an inspiring leader of men and knows ordnance production in all its details. With intimate knowledge of the plant and the people, he has a deep personal interest in Elwood. To Elwood he is known as "our chief."

Graduate of Annapolis

General Campbell was born in Washington, D. C., November 23, 1886. He was graduated from the United States Naval Academy June 7, 1909. On December 2, 1911, he was appointed Second Lieutenant, Coast Artillery Corps.

General Campbell was promoted to First Lieutenant on July 1, 1916, and to Captain on May 15, 1917, to Major (temporary) on May 11, 1918, to Lieutenant Colonel (temporary) on October 10, 1918. He reverted to his regular rank of Captain on March 15, 1920, and was promoted to Major July 1, 1920, to Lieutenant Colonel August 1, 1935, to Brigadier General (temporary) on October 1, 1940, to Major General (temporary) on April 1, 1942, and to Major General (permanent) June 1, 1942.

General Campbell first served at Fort Monroe, Virginia, followed by duty at Fort William, Maine, until the autumn of 1915 when he was ordered to the Panama Canal for duty with Coast Artillery troops. He returned to the United States in April 1918 and was ordered to duty in the office of Chief of Ordnance, Washington, D. C. In September 1920, he was ordered to Stockton, Calif., for a study of artillery materiél production at the Holt Manufacturing Plant. He remained at Stockton until the summer of 1921 when he was transferred to the Ordnance Department and served to September, 1923, at Aberdeen Proving Ground, Md., as proof officer in charge of tanks, tractors, self-propelling mounts, and mobile artillery. He then became officer in charge of the design section at Rock Island Arsenal in Illinois.

In April, 1926, General Campbell was ordered to Washington, D. C. to take charge of the Automotive Section, Artillery Division, Office of Chief of Ordnance, remaining on this duty until June, 1930, when he returned to Rock Island Arsenal as officer in charge of manufacturing, serving to June, 1935, when he was ordered to Frankfort Arsenal, Philadelphia, Pa., where he had charge of the Artillery Ammunition Department until the summer of 1940. He was then ordered to Washington, D. C., for duty in the office of the Chief of Ordnance as Assistant Chief of Industrial Service Facilities. On October 1, 1940, he was placed in charge of Development of Facilities, office of Chief of Ordnance, Washington, D. C. On January 5, 1942, he became Assistant Chief, Industrial Service Production.

General Campbell became Chief of Ordnance June 1, 1942, for a four-year term; headquarters in Washington, D. C.

". . . lick the hell out of our enemies"

NEW CHIEF OF ORDNANCE

"**THE BOMB-SHELL** is an highly expressive title for an ordnance plant newspaper. It is both descriptive of the production activity America expects from the Elwood Ordnance Plant and the effect which the handicraft of your workers will have upon our enemies. We are in this war to win. We're going to lick the hell out of our enemies. We shall attain this objective only if each ordnance worker maintains on our production lines the fighting standards of our firing lines."—**Major General L. H. Campbell, Jr., Chief of Ordnance.**

Bombs Loaded Here Used on Tokyo?

Bombs that Gen. James Doolittle and his squadron dropped on Tokyo possibly came from the Elwood Ordnance Plant, a Government spokesman said recently, according to a story in the Joliet Herald-News. Destination of the munitions is a military secret, but because of the volume loaded here, it is reasonable to assume that the bombers carried Elwood products, the newspaper said.

Veterans Welcomed By Joliet Post

Thom Serena, commander of Harwood Post, American Legion, extends an invitation to all EOP Legionnaires to visit and make use of the post's elaborate clubrooms at 63 North Chicago Street, Joliet. The regular meetings of the post are the first and third Mondays in each month. Meetings start promptly at 8 o'clock and there is usually some form of entertainment. Any veteran who belongs to any post of the Legion is invited to attend these meetings so that he can keep in contact with the national program.

Memorial For Elwood Heroes Held at Plant

Fund for Families Inaugurated With Gift From S & P

Every operation at Elwood Ordnance Plant was halted for a moment while all who could be spared from their work assembled around the flag pole before the Administration Building Wednesday afternoon to honor those of their co-workers who lost their lives or were injured in line of duty in the recent explosion.

Relatives of Elwood's heroic "soldiers of ordnance" were seated about the rostrum as thousands gathered to hear eulogies from **Lt. Col. Don M. Hoffman,** commanding officer, and **Harrison Smith,** resident partner of Sanderson & Porter, builders and operators of the plant.

Chaplain (Major) Robert L. Logan, Hdqs. 6th Corps Area, pronounced invocation and joined with **Colonel Hoffman** and **W. E. Canniff** in placing a wreath at the base of the flag pole. Workers in the production lines observed silence as buglers placed strategically throughout the area sounded "Taps."

Elsewhere in this issue are details of a voluntary fund being raised for the families of Elwood's heroes. This was started at the request of employees and Colonel Hoffman issued official approval when Sanderson & Porter offered to inaugurate the fund with a contribution of $5,000.

Statement by Hoffman

The following statement was addressed to employees by Colonel Hoffman:

"The recent explosion at this plant is a serious loss to our government in production capacity with which to carry on this war. Immediate steps will be taken to repair and place this line in full operation at the earliest possible date.

"Successful execution of the mandate of 'Keep 'Em Shooting' requires that you courageous men and women actively engaged in this vital undertaking be given the same brave, loyal support from your family and friends as is bestowed upon the members of our armed forces. You are assured that nothing will be left undone to make the operations at this plant the safest in the world.

"This support and comfort is your right. You have earned it as soldiers — soldiers of ordnance. There is no phase of war without danger. The more this is recognized, the more your unselfish patriotism is to be commended.

"You are doing a vitally necessary job in magnificent fashion. Your government knows this. Your husbands, sons and fathers overseas know it, too. You know it. So do your families here at home, for you have to but read the daily press to realize that your efforts are resulting in an increasingly effective attack throughout the world.

"Therefore, any effort to hinder your work, any failure to comfort and support you in the job you have volunteered to do cannot be condoned. The production and delivery of munitions has now reached the momentum that no

SERVICE ON THE HOME FRONT

"What can I do to help win this war?" Throughout America this same question prevails. Many, many thousands have found their answer—service in our armed forces, parts in one or another of the civilian activity organizations, or places on the production lines. Once you start thinking about it, the opportunities for valuable services which lie within the four walls of our own home are limitless.

The answer is clear: First, guard and conserve those homes and all that they are and deserve. Second, keep the wheels of courage rolling—by building morale. And finally, we can do much by sharing—share cars, food, and clothing. **Sharing is a means some Americans have found to work for victory.** If you can make the possessions you have do service, not just for you but for your neighbors who need them and might find it difficult to obtain them, you can help keep our factories and our men more efficiently at work for essential war needs.

Americans haven't gone soft. This nation isn't dying of dry rot. Our firmness of character can do the trick, and we'll even bend our backs to find things which we might share to help a neighbor. So, look around you for your chance—the field is wide.

Let's make America a land of Minute Women, as well as Minute Men! And in proportion, as you and your neighbor, and your neighbor's neighbors work; we'll start a snowball rolling that will gather size and speed, and such a mighty, sweeping power that even the Axis cannot stop.

—**James Glade**, Group 61.

SECRETARY'S LAMENT

I sit at my desk all day, a wreck,
Keeping guys off'n the boss's neck.
I dodge and lie 'til I'm all a-dither,
My very soul has started to wither.
"He can't be disturbed—he'll be back at ten—
He's out of town — call back again—
He's not here now—he's home, quite ill—
You'll call tomorrow? — I'm afraid you will."
Where is this boss while I glibly rebuff
Guys who sell flotsam, jetsam and stuff?
He talks at length to an ex-classmate
About old times and a once good date—
A play-by-play game of golf he's shot—
While gently inferring he's pretty hot—
Or maybe it's college for dear Sonny Boy
(A nasty brat) but his Dad's great joy.
He's about decided on Michigan State—
High time too — the Kid's just eight.
And so when I die, I know full well
My reward will be a ticket to Hell.
For me no harp and white cloud pretty,
But a job on Satan's Reception Committee.

—**Dulcy.**

GOOD IDEA! COULD BE!

"Ain't ya got any older ones? It's to run to the Elwood Ordnance Plant."

The Burning Pit
By Scorchy

Your correspondent took this job with the understanding that before the ink was dry on his application he would be elevated to a position of prominence that would bring to his door that long queue of admirers that should most properly be addicted to this station of journalistic importance. But little did his two calloused typewriting fingers ever suspect that one great big *ego* could be so thoroughly deflated in the welter, hustle, bustle and general confusion of an ordnance plant.

Without benefit of prior ascension, he descended the throne to his present station in this worldly life where he roams around unseen, unnoticed (and probably unread) without benefit of swivel chair, wax polished desk, telephone extension or dutiful secretary. The situation has taken on the aspect of "don't look now—but I think Scorchy is crawling out of that there woodwork."

It is with no good intention that your downtrodden scribe warns you to beware of what you say, the things you wear, the people you gad about with and all of the other little items which you would not put into your autobiography. It is quite understandable that entry upon such a pseudo-literary career calls for a Policy with a capital "P." Scorchy's policy shall be broad enough to spare no one; it shall be humane enough to hurt no one; it shall endeavor to be sharp enough to point up all those little foibles, fancies, flippancies and failings that force the real man to look in the mirror and enjoy a laugh that starts at the O'Sullivans and extends far beyond the Stetson. Now and then a moral, with a small "m" will be dropped along his path and with each one so deposited the label will clearly read "Take it or leave it."

Scorchy doesn't like people with "messages." He will never have a "message." A thought here, a comment there, an occasional observation on this or that may land on fertile ground, but whether or no, he hopes his great following will defer their purchases of stillettoes, tommy-guns, brickbats, sling-shots and other devices of vengeance until a later day of judgment.

* * *

Speaking of inflated egos, isn't it outrageous that there are so many vice-presidents in the world and so few vice-presidencies. It's a downright shame the way all of these incipient brass hats around the plant are down-trodden, stepped upon, maltreated and otherwise prevented from assuming their God-given status in the world of industrial management. There is a strange kink in the minds of some of our fellow humans who think the law of gravity should be waived as far as their career is concerned and can only trace this failure of legislative rescission to the absolute stupidity of the executives in charge. If your eardrums can stand it, it doesn't take long to learn that the success of the war effort, the ultimate peace of the world, and the solution of all mundane problems is being heinously impeded by the failure of a few short-sighted big shots to appreciate the quality of sap that is running through the saplings (put the quotation marks where you will) who punch the clock every day.

The old familiar "newsboy-to-Senator-in-20-minutes" made great reading some time ago, but your correspondent has a suspicion that it may have been a bit overdone. There is good reason to believe that the story will ring true for many years to come, but it seems a pity that so much of the "picture-moulding" stock wants to be "big timber" without those many seasons of development. The seasons are the foundation of seasoning.

This wanton waste of nascent talent stands as a challenge to the older minds of any day, but there is some room for argument as to whether these young squirts have carefully read the definitions of "opportunity" and "patience" as set forth by the late Mr. Webster. Perhaps it is true that many of them need but a guiding word to bring them back to this earthly sphere and to point the road ahead to be trod, not flown. Elwood Ordnance Plant is but another chapter in the life of everyone who works here. The emotional thrill which arises from all of us being at war with our common enemy should not distort the true valuation of the opportunity that is staring each of us straight in the face and wagging a finger with a dare to lick the problem at hand and prepare ourselves for greater ones just beyond. To reword an old-timer, "Performance is the proof of the pudding."

FEMININE APPROVAL GIVEN Elwood Ordnance Plant's new newspaper is indicated by this foursome absorbed in the first issue. They are (left to right) Virginia Krause, Clare Gnandinger, Lucille Morrison and Anita Scott of the Comptroller's Office.

Letters to the Editor

To the Editor:

Following your suggestion that we help in every way we can with the new paper, *The Bomb-Shell*, I submit to you herewith my first reactions:

In our title the bomb is pointing in the wrong direction. We read from left to right and any directional illustrations are supposed to follow eye travel in that direction so that they lead into the opening of the paper instead of away from it.

Instead of the passive grouping of five shells on each side, make them mean something. We overlooked a natural in not making the shell arrangement stand for the "V" for Victory. The ends of the round casings make up the three dots—while the shell lengthwise makes up the dash. And, just for the sake of those that might chirp up with that inane "I don't get it" we put the letter "V" back of the code. This can be done in black and white — without the second color red.

Here's one that is called to one's attention in the news business probably hundreds of times. Our flag has seventeen stripes. That's sabotage, Mr. Editor. Thirteen stripes are enough—and we're not going to cater to the superstitious either. Boy, am I nasty!

Frankly, the above comments are meant to be constructive. Please take them for what they are worth.

E. T. Bennington,
Administration Bldg.

P. S. No charge for the above.

To the Editor:

Isn't our new paper grand? And what fun to know all the goings-on of other groups with whom we work.

However, I feel kinda sorry for a couple of people. Did you notice the pictures on Page 3 of the first issue of *The Bomb-Shell?* If "Tiny" should *drop* that shell, won't **Helen McGinnis** be in a heck of a spot? And if he does *throw* it, I hope our "Andy" ducks!

May I make a suggestion? The Hospital nearly went up in arms following the receipt of the first issue.

Where is the Medical Department news?—everybody wanted to know. Luck would have it that I happened to know it had been put in with the news of the Administration Building, so I promptly proceeded to quell the threatened uprising!

But do you reckon you could sort of set up a box for the news of the Medical Department, same as you have for some of the others? We think it would stand out better, and the hospital really is an institution in its own right.

Thanks.

Lucy Harkness.

To the Editor:

I am in receipt of your letter thanking me for my entry in the contest to select a title for our new publication.

My congratulations are extended to the winners, **Kathryn E. Reubart** and **Vincent Cantarella**, for their excellent selection of the name *The Bomb-Shell;* also to **Michael Gorman**, who received a cash prize for his contribution, "Bomb and Shell." It was a pleasure to be a participant in the contest.

Geraldine M. Ward,
Fingerprint Division.

To the Editor:

I am very interested in the Plant paper, the reason, perhaps, because I was once a writer on a newspaper. I wrote a little article in three different papers at home. No, I didn't get any pay for it, but I was proud to do my bit and I am herewith enclosing a small article which I think should go in your next issue, and I hope you can find room for it. I know you can't very well print every little article that is sent to you, but this is rather a special article and I would be greatly pleased if you would find room for it.

When you were looking for a title for your newspaper I made a try at it but was unsuccessful; however, I did appreciate your letter thanking me for my entry.

Thomas Tomaszewski,
Timekeeping Dept.

To the Editor:

We, of Group 61, after scanning the first edition of *The Bomb-Shell* came to the conclusion that it was interesting in every respect. However, through no fault of anyone we were not very well represented.

The boys and I are happy now that space was given to us. We are going to hold up our end in keeping *The Bomb-Shell* the newsy, interesting paper it is.

Joe Motta, Group 61.

To the Editor:

In your next issue of *The Bomb-Shell*, I suggest you put the names of the men who gave their lives for their country on a beautiful plaque so that my fellow-workers and I could admire their courage, and to remind us we should keep 'em shooting.

H. M. Hoffman, Group 3-A.

P. S. I am writing in behalf of Group 3-A and myself. Thank you.

PRAISE FROM PRESS was the reward of Capt. D. P. Tunstall, public relations officer at Elwood Ordnance Plant, for his handling of newspaper contacts incident to the recent explosion here. A commendatory editorial from the "Chicago Sun" is reprinted elsewhere in this issue.

ADMINISTRATION DEPARTMENT

Wedding bells rang June 6 for **Barbara Jean Rigby**, Labor Cost Distribution Department, and **Fred Himes, Jr.**, electrician at Kankakee Ordnance Works. The ceremony took place at the Manse of the First Presbyterian Church with the **Rev. Arthur W. Hoffman** officiating. Following the ceremony a reception was held at Castle Eden. Best wishes, Barbara and Fred, for a most joyous wedded journey.

Carl R. Johnson, who was a buyer in the Purchasing Department, resigned May 30 to accept a position in Chicago with the U. S. Army Engineers. Good luck, Carl, in the new work!

Decoration Day morning a group of girls from the Purchasing Department arose extra early so as to be at Nowell Park at six bells (A. M. now) and had the most luscious breakfast. This gang really consumed a good amount of fruit cocktails, bacon and eggs, etc., etc., and was it grand! The early birds were **Arlene Thorson, Shirley Grassle, Geraldine Drechsel, Mary Clow, Veranice Quade, Rita Dwyer** and **June Kaehlert.**

If someone is interested in tips on culinary art be sure and get in touch with our master mechanic, **E. J. McAloon.** He prepared the most delectable luncheon (he called it luncheon but we called it dinner) one Friday noon, May 29 to be exact. Ask **AnnaMae Thompson, Eleanore DuFrain, Margaret Hayden** or **Mrs. Philameno McCraley** for proof. By the way, Mac specializes in those huge angel-food cakes.

J. V. Wall, electrical engineer, is back on the job after having had to go through the experience of having some surgical work done. Good health from now on, Mr. Wall!

Wayne F. Walters, better known as "Red" Walters to his co-workers of the Engineering Department, died May 28 after an illness of three months. Besides his EOP duties, "Red" was actively engaged in orchestral work with Roy Gordon's Band. Funeral services were held at the town of his birth, East Liverpool, Ohio. Sincere sympathy is extended to his parents, W. A. Walters, who is employed at the Transportation Department, Richards Farm, and Mrs. Walters.

Dorothy Mhelic, Production Planing Department, will just have to keep her fingers away from machines. One of her fingers and the Multilith Machine met, with the finger getting the break.

George Rummell, Electrical Department, had better take his time driving through the city of Lyons. Costs good money, doesn't it, George?

Members of the Engineering Department, headed by **A. E. Frosch** and **E. K. Cortright**, gave **Wilfred Butler** a grand "send off" May 27.

A SMILING PAIR are Wanda Hudak, Administration Building receptionist, and Corp. Clare Cosgrove, to both of whom much credit is due for the favorable reaction of EOP visitors.

Marjorie Connolly purchased a $50 War Bond and beautiful wallet and key case for her boss with the money donated by the Department. Mr. Butler has returned to his home in Lawndale, Philadelphia, Pa.

It is being rumored that the Ordnance Department can outplay the Administration Area employees in a softball game. Any remarks?

A 220-yard sprint was held recently. Ask those in Room 26, Administration Building, who won "the race against fatigue."

William T. Bryant, insurance adjuster, left for his home in Maine to report to his local draft board June 3.

Ed Robinson, ambulance driver, has been graduated to the rank of truck driver in the Loading Lines.

Bill Beyer, Expediting Division of the Purchasing Department, is quite the farmer. In his spare time he busies himself growing choice vegetables and taking care of half a dozen pure-bred calves. We will all be anxiously waiting for the International Stock Show, Bill, to see you get the blue ribbons for all that beef! By the way, if the tire situation becomes very serious we probably will be seeing Bill riding one of his heifers to work.

Mr. and Mrs. Louis Sullivan (Sully) are the proud parents of twin boys.

Charles F. Connell has proven to be a demon bowler. He is near the top in a summer league in Joliet.

Over the Memorial Day weekend **Homer Smalt**, timekeeper at Richards Farm, visited his brother, **Pvt. L. A. Smalt**, formerly of Group 1 and now at Fort Reilly, Kansas.

Lucille Ambrose (Amby) of the Comptroller's Office is taking time out at St. Joseph's Hospital, Joliet. She submitted to some surgical work and is getting along wonderfully. Here's hopin', Lucille, you'll soon be back with the "gang" fit as a fiddle.

Housing Units At Wilmington Finished Soon

Details of Rental And Facilities Now Available

By Seymour Kurantman

Rapidly nearing completion, the new housing project at Wilmington is expected to ease perceptibly the problem of housing workers, common to all war plant areas.

Built under the supervision of the Farm Security Administration, this project, which is located off Route 66A, about two miles south of this plant, will provide dormitory and trailer facilities for employees of both the Elwood Ordnance Plant and the Kankakee Ordnance Works.

A visit to the housing project a few days ago disclosed a scene of bustling activity. Spread over a large area adjoining the highway, the development presents a picture of newness and spaciousness. It won't be long now! The place will soon be a thriving community.

Here are the main facts you will want to know:

Dormitories will be available for single men only. The following rental rates have been established:

Single room—
$4.25 a week a person
Double room—
$3.00 a week a person

Services Included

The services included for the dormitories are: Linen service, maid service, hot and cold water, heat, electricity, and the necessary room equipment. Dormitory rooms will be available for plant workers who are single or who have no family housing problems, and (1) are domiciled beyond reasonable commuting distance from the plant, or (2) are domiciled locally under conditions below standard, or (3) can justify their need for such housing for other reasons.

Trailers will be available for family units. These will be of two types: regular trailers and expandable trailers. Only one family will be permitted to occupy a trailer. The capacity of the regular trailer limits the family size to four persons. In general, the expandable trailers will be for families of over four persons and not to exceed seven. The rental rates for said trailers are as follows:

$6.00 a week a regular trailer
$7.00 a week an expandable trailer

Trailers will be available for families under the circumstances noted for dormitories. The services included for said trailers are: electricity, water, utility trailers, and laundry trailers. All trailers are equipped with beds, chairs, heating stove, cooking stove, ice box, drawer space, and fire extinguishers.

The supply of units is necessarily limited. Prompt action should be taken by interested employees to file applications. Application forms may be obtained by Sanderson & Porter employees from Richard T. Bassett, assistant comptroller, Room 1, Administration Building, and by War Department employees from Seymour Kurantman, administrative assistant, Room 204, Administration Building.

Record Set in Issuing Checks

Whole-hearted co-operation given by Sanderson & Porter to the Industrial Commission of Illinois, according to Chairman Alfred J. Borah, permitted the issuance of the first check to the families of Elwood's heroes of June 5 in one week from the date of the explosion.

Mr. Borah said hearings were rushed to completion and that the issuance of compensation checks established a record for the State.

GUARD DEPARTMENT

Some time ago, one of our guards, **Adolph Samuelson**, was struck by an automobile on his way to work. He suffered serious injuries and will be in the hospital for some time. A fund was inaugurated by the Chief of Guards and his Sergeants, and through the united efforts of the Guard force $475 was presented to our unfortunate fellow-worker. The comradeship displayed by our MP's is another splendid illustration of the EOP spirit. (Keep your chin up, Sammy, and we all wish you a speedy recovery.)

We wish to express our deepest sympathy to the family and relatives of **Clarence Sanders**, guard, who was fatally injured in our recent disaster. Like many fine Americans, he died in the performance of his duty for his country. This sacrifice is expected of each and every one of us, if need be, to preserve democracy in our great country. The Guard force was represented by a delegation at the funeral services.

The Guards have great pride in the 38 former guards now in the armed forces of our country. From recent reports, former Sgt. **Johnny Burke** is now a Corporal in the Engineering Corps, and former Guard **Sklut** is a Sergeant in an MP detachment. We are still awaiting word from former Sgt. **Ray Harper**, who left last week. We wish the boys godspeed in their new duties and we know they will render a good account of themselves. We are erecting an Honor Roll in our Foyer for all our boys in the armed services. We will also accompany their names with their addresses so the boys here at home can keep in touch with them.

On the Grape

Corp. Clare "Biddy" Cosgrove very capably handled his brood recently between the Administration Building and Recreation Building.

H. Schelling, Investigator

Some of the guards are inquiring as to the identity of the night Sergeant who reminds them of the day in the week, by appearing at the Guardhouse bright and early on *one* certain day in the week.

Sgt. "Curly" Boylan finally admits he receives more attention from the Guards when he doffs his cap. (What is it, Dick, a look of astonishment, or despair?)

Genial **Chief M. C. Baughman** is contemplating eating an extra meal on Thursday so as to escape the Friday ordeal of ordering food. Or maybe he thinks if he orders a day ahead he might get the meal on time.

Supervising Sergeant Murphy (although off duty) arrived at the scene of the explosion shortly after it occurred and worked diligently throughout the morning. (Evidently the force of the explosion threw him out of bed.)

Supervising Sergeant Killian is still bemoaning the fact that he lost 50 cents in a Chicago drug store recently. Ask him to tell you the story.

Corp. Frank Butala is strictly a *one gal* man. (Trouble is—it's a different gal every day.)

Our Way

Let's iron this all out in a sensible way;
I mean about people, work, and their play.
Just draw up a chair and settle yourself.
Complaining and fighting is bad for your health.

Before I begin, this is straight from the heart,
I'm going to shoot honest and right at the mark,
I don't aim to tell you that troubles are few—
War is not welcome; we'll agree that is true.

But Mr. and Mrs., of this we are sure;
Our own Uncle Sam has a marvelous cure,
And we're all on the upgrade to Safety again;
So look straight ahead, and not "might have been."

There's a beckoning service for you and for me—
Non-partisan, unbiased, hard-working, and Free!
It's not for pessimists, cynics, or shirkers,
But a haven of hope for America's workers.

For the man who is able and willing to toil,
Who has faith in the future and desires to be loyal
To himself and his country, may throw out his chest,
For his attitude's clear and his judgment is best.

Of course we believe in the Democratic Way
And the big defense program by U. S. A.,
Including our own ELWOOD ORDNANCE PLANT.
We, Here, Know that the dictators CAN'T!!

We're all well aware that we're not owed a living;
But our vision and faith, and the fact that we're giving
The best that is in us—no more or no less—
Is Our Way of saving a Grand Old U. S.

—**Edmond Van Winkle,**
Guard, Pass Desk.

KEEPING COOL is the stock-in-trade of E. O. Huey, superintendent of the Plant Protection Department, and his efficient secretary, Lola Early.

STILL GOING UP are the extensions to the two wings of the Administration Building, one of which is shown here. While completion is being rushed, administrative office workers are wondering about the details of moving.

GROUP 2

The plant-wide recreation program which is well under way has been received enthusiastically by the fellows in this group. We can think of no better man than **"Tiny" Cahoon** to head this program and we take this opportunity to wish him success in his new position as Director of Recreation.

It was very gratifying and encouraging to learn from the first edition of *The Bomb-Shell* that Elwood tops all ordnance plants of the United States. This is indeed an achievement to be proud of by each and every one of us.

All of us extend our deepest sympathy to **Robert Burke**, our general foreman, whose mother died last Friday evening.

Examinations for the rescue squad course were given at the Central Fire Station last week and we were glad to learn that **William "Jersey" Klegman** passed with flying colors. Congratulations, "Jersey."

Carl Ulrich, formerly safety engineer in Group 2, has been named assistant to Safety Supervisor **R. T. Read.** Our sincere wishes for your success, Carl.

Although this is a little belated, we take this opportunity to welcome our new safety engineer, **Mr. Eiden.**

The Real Lowdown

They say **Russell Baker's** better half was very excited the other night. It seems she found some traces of lipstick on his shirt and began to cross-examine him, disregarding the fact that it was very early in the morning.

From all reports available, **"Bill" Malone, "Pete" Kelder** and **"General" John Johnson, Jr.,** are still considered the most sought-after males in the metropolis of Wilmington. Is this true, boys?

If you see **"Bobbie" Ardaugh,** ask him if he knows a girl named "Jane" who works at KOW. His face will probably turn red or he will chase you for a couple of blocks until he is fatigued.

Does anyone have any old clothes they do not use or are not using at the present time? If so, contact "Jersey" over at this group, and he will trade some of his garden products for them. Basketball, baseball, and all sport and working jackets are preferred.

We see that **"Hickory" Griffith** has a new hat. We didn't hear of any fire sale over in Morris. Kindly let us know when a bargain such as that new hat of yours can be had.

If some of you folks happen to drive past our group please notice our new Clock House designed by **"Archie" Le Borence** for the purpose of eliminating the chance of anyone forgetting to clock their cards. There is only one thing wrong with this idea of his, there are two alleys in the Clock House and he has to stand out in front of it and call like a "Carnival Barker" and tell everyone where the cards are.

We have quite a few fellows over here in this group who enjoy eating peanut brittle, so if any of you girls in the Personnel or the Administration Buildings like to make candy, please call on **"Jerry" Phelan, "Tubby" Sohan, Al Hesley, Irv Siemsen** and we can supply other names on request such as **Frank Gaglione** and **"Bobby" Ardaugh.** Please, girls, no "duds" or trick candy boxes or cans.

Rumor has it that **"Chuck" Pierce,** our genial head foreman, is a second "Lockwood" when it comes to utility problems. As a result some of the boys have started to call him Charles "Lockwood" Pierce.

We heard **"Johnnie" Barry** received a swell post card from a pretty maiden asking when he was coming up to see her some time. We don't think it was "Mae" West, but we do know the girl signed with love and kisses. How about this, John?

Garr Burt, chief government inspector in this group, will leave shortly for a vacation trip which will eventually end in Sandusky, Ohio. Some of the boys asked "Garr" if he was going alone or if his wife was accompanying him, to which he replied, with a big smile on his face, "she's going with me." Keep it up, Garr, that's the right spirit.

GROUP 3

Group 3 is not only loading the bombs which are now being dropped on the Germans and Japs, but have made other great contributions to Uncle Sam.

Over 75 of our boys have either been inducted into our armed forces, or have enlisted since January 1, 1942. They now are represented in the Coast Guards, Marines, Air Corps, Army, Navy and Paratroops.

In the recent bond campaign, every employee of Group 3, not only made a pledge, but none signed for anything less than *10 per cent of their wages each week.*

Group 3 has as yet no baseball team. However, these men have been suggested to comprise a representing "nine."

"Prairie Farmer," "Big Tiny," "Little Tiny," "Tiger," "Kankakee," "The Tokyo Kid," "Mississippi," "Shorty," and "Seabiscuit."

Do you recognize them? What positions would you suggest that they play? Personally, we think they could take any team in the area.

A fellow at Group 3, named **"Snuffy" Gomora,** has been promoted to "Chief of the Yard Birds."

"Dutch" Ahrens has quit doing his good deed for the Paramount Theatre of Kankakee. They now have two other fellows holding up the building.

"Deacon" Pilcher has an OPA order to build a new home with running water, one-half block from his home on the Kankakee River.

"Woody" Koerner went fishing with his dog, on his day off. Woody caught a rubber boot, hot water bottle, ten freckles and a case of sunburn. The dog caught a turtle; so the Koerners had soup.

Fred Desen is unleashed again. In other words, out of the dog house.

George Weber didn't have much luck with that family of kittens, so now he's in the Victory Garden business for a pastime. Take a look along the east side of the Power House and you'll see where he gets his exercise (and suntan). George is also an excellent chauffeur.

Great excitement prevails at this time in Group 3. It is occasioned by the extensive manipulations of the "Maduro-Webber" combine. This philanthropic enterprise is the sole topic of conversation with certain interested persons. On being interviewed, Mr. Testa gave a hearty expression of his appreciation of the efforts of Mr. Maduro and Mr. Webber. He stated that he now noticed quite a difference in his home and hoped that these two gentlemen would receive the reward they so richly deserve. (Let the rest of us in on this.)

The boys in Building 3 are trying so hard to find out who the three girls are that Foreman **William (Tiny) Kautz** took out for a weiner roast a few days ago. What has Tiny got that the rest of us haven't got?

If there are any ladies who want some furniture moved or housecleaning done, just call Building 3 and ask for **"Red" Wyciskalla** and **Fred Dvorak.** I am sure they will only be more than happy to assist.

Frank Underwood is broke again. He was seen talking with **Bob Hynds** (his banker) the other day and Bob had his wallet in his hand.

The boys in Building 3 are planning a picnic in two weeks. They say there will be plenty to eat and drink; but none of our boys are very heavy eaters, so it looks as though we will have a *good* time. **Elmer Emanuelson** and **Robert Peters,** two nice, sober young gentlemen, are trying to put the affair over. They are being ably assisted by that handsome lad from Chicago, **Bernard Ilg,** and by tall, strong and dark (skip the rest) **Frank Underwood.**

Action Required To Back Up Words

Vic Venturo, manager of Building 13's softball team (Group 1), may be heard crying far and wide that his team is the best in the group and furthermore that if a tournament develops it will be the outstanding team of the entire plant. This is the sort of spirit which is wanted, but it may be well to mention that action will be required as well as words, for the group is already in somewhat of a spot over the softball situation.

We did not do so well in our first game with Group 2, but the season is young and we have not yet seen enough of our players so that we may put them in the positions which they fill best. Vic can doubtless supply us with some of the men able to make the grade in a truly championship team. By the same token we know that there are other good men in the group and feel confident that we will soon have an aggregation capable of rendering a good account of itself.

Building 13 played its first scheduled game of the season against Building 14 May 23. It looked bad for a time, as "14" had put four scores across the plate in their half of the first inning. It proved to be a flash in the pan though because it marked the end of scoring for the visitors. From there on it was all "13" and the game was concluded with an 8 to 4 victory for Building 13.—**Jack Barry.**

GROUP 1

Mike Feeney, who puts in eight hours a day at the storeroom, has been hobbling about on two crutches since an accident caught up with him a couple of months ago. Nevertheless, Mike is as as active as an Irishman's flea and we challenge any group to bring forward its three-legged champ for a race.

And while on the subject of sports we can offer a little competition in the manly art of self-defense. We give you **Davey Rosen,** an inspector who has acquitted himself well in the ring and has become well known as a promoter of sports events. And wonder of wonders, we have **Bob Winchell** of Building 14, who was five times the winner of the fly-weight championship in the Joliet Golden Gloves contests and once went as high as the quarter-finals at Chicago. When one considers that 20,000 aspiring fighters start in the preliminaries it is really something worthy of note to reach the quarter-finals. Incidentally, Bob won the 1941 EOP cup at the boxing show of last July Fourth. He is now married and settled down and foreswears the swinging leather.

Sherman Butler, inspector in Building 14, has returned after several days lay-off resulting from the extraction of twelve of his baby teeth. Sherman says that soup tastes okay but doesn't put much beef on your hips.

Bill Walsh, inspector in Building 13, recently had a Sunday picnic at his charming summer home on the banks of the river at Kankakee. Guests included the Matheny, Kennedy, Slack, Williams and McHugh duos and all their numerous progeny, and an unattached hanger-arounder by the name of **Jack Barry.** A good time was had by all, especially by the outboard motor which refused to function.

Leslie Southcomb, son of one of our expeditors bearing the same name, left June 3 to join the Army.

Max Reibert, formerly the group storekeeper, recently joined the Army and went to Camp Grant where he was assigned to the Medical Corps. Last week he was at his home in Wilmington for a three-day furlough and now he is out on the trail of the Japs.

"Pop" Kent, bay foreman in Building 10, is in receipt of a letter from his son, who is serving at Pearl Harbor. Enclosed was a picture of the boy all dressed up in a grass skirt. Seems as though there is nothing to worry about at Pearl Harbor.

Inspector Charles McHugh left us to join the Army June 6. We know that "Mac" will be in there pitching and we all wish him well.

We recommend that **"Tiny" Cahoon** get in touch with **Inspector Armand Vicini** of Building 3 in our group. Rumor has it that he consistently shoots golf in the middle seventies and that doesn't mean for nine holes either.

What appealed to **Superintendent Joseph Salmon** the most deeply was the voluntary offer of blood by his men immediately after the recent disaster. He wasn't thinking of money at the time and neither were they. Their thoughts were upon something higher than monetary value: the saving of human life.

Short, Short Story

Oh, George, please don't stop here.
Oh, George, please don't stop.
Oh, George, please don't.
Oh, George, please.
Oh, George.
Oh!

(Mr. Editor: Just in case there may be moral qualms about this short, short story, it appeared in *Liberty* and is not original, although I wish I had been smart enough to think of it first.)

Alex Bernickus, stenciler in Building 13, is once more a proud papa, this time the new arrival being a baby girl who rejoices in the possession of two brothers who are by now old-timers in the house of Alex.

Consider **John Kinsella,** foreman of Building 13. He must buy a carton of cigarettes a day in order to keep himself supplied. There's an open season on his lunch box.

Among other celebrities in Group 1, we give you **Frank Syssens,** truck foreman in Building 13. He has studied art, is a graduate of Chicago University and a talented fashion artist in his own right, having worked in this capacity for Carson, Pirie, Scott & Co. of Chicago among others. We cannot say for sure, but it may be that we will see some samples of Frank's work in *The Bomb-Shell* soon.

One and all were treated to a once familiar sight down in Building 13 recently. **Frank De Marti,** assistant building foreman, was in one of the bays engaged in feverish labor as one of the crew. Frank is familiarly known to the rank and file as the "Mad Russian" and he may have been mad about something at the moment, for he was really working madly, showing he can do what he asks others to do.

Friends of **Walter Friis,** who was absent from Building 7 for some time, is back on the job. Walter went to work out here a year ago last January and had only missed three working days until his recent illness laid him up. The last time we saw him he was at the Legion Hall in Joliet waiting for his particular pal, **Don Frey** of Building 7, to show up with the papers for his new assignment.

There is some conjecture in the group as to whether **Carl Barker,** timekeeper, is married or single. Maybe Walter Winchell could find out, but frankly we do not know.

Congratulations and best wishes go from the men of this group to **Bill Prindle.** Bill used to pester us by taking our clock numbers from time to time, but we are all glad to see that he was accorded a much deserved appointment as keyman of the Group 6 timekeepers.

Coy Bobbett, who worked in Building 13, resigned to enlist in the Navy. According to friends, he is now paying a short visit to his daughter in Florida, after which he will be seeing the world in navy blue.

Minnie Benedente of Building 14 is in receipt of a letter from her brother Clement, now serving with the U. S. Medical Corps. He likes his present assignment real well and would like to be remembered to his many friends.

INSEPARABLE companions are A. M. Lockwood, superintendent of the Utilities Department, and his well-trained dog. The two are a familiar sight about the EOP area and would rate about first in a popularity poll.

GROUP 61

Our own **George Woodburn** recently was a hero at Group 62. He captured thousands of enraged bees single handed, after several fruitless attempts by others. For a hobby, George plays with three hundred hives.

Sam O'Large is back to work after vacationing in Kentucky for several days.

Wallace Englehart, guard frequently seen around our group, is the proud father of an eight-pound boy, born May 20. The name is **Wallace James Englehart.**

Ellis "Joe" Roberts, timekeeper; **J. D. Thompson** and **Wendell Thompson**, electricians, were called to Uncle Sam's armed forces.

We were sorry to hear about the death of **Alvin Smith, Sr.**, father of **Alvin Smith, Jr.**, engineer at Group 61.

Peter Balma caught a six-pound catfish while fishing at Lorenzo, Ill.

Oscar Otterson and **William Stalker** tell about their week-end fishing trip to Blair, Wis. They say Blair is 300 miles away and claim they had to stop 62 times for refreshments because of the intense heat. Oh! The pair bragged that they caught 50 fish.

Is it possible to travel all of 300 miles, stop 62 times, catch 50 fish, all in one week-end? This sounds like a pretty good fish story to me.

What's this we hear about **Jess Shelby** working overtime—could it be because he is saving to purchase a wedding gift for **Charles O'Connor, Jr.?**

Benjamin Sutton announced his marriage to **Melvis Gibb** would take place in Columbia, Mo., June 19. They planned to spend their honeymoon in the Ozark Mountains.

A new addition to our group is **Lawrence Holz**, timekeeper keyman.

John Stufe, Dwight bus driver, has a strange hobby. The ambitious fellow captured a young fox and now is attempting to tame Master Reynard.

It Would Be Nice IF . . .

. . . we knew nitrate like **Elmer McCans** . . . **Frank Ariagno** would **regeester** . . . a gal waved at us daily—lucky **Clifford Kidney** . . . we sang like **Erny Decker** . . . I could draw like **Robert Plese** . . . **Allen Mayes** had more renown red oil . . . last week you read "CONCERNING WAGGING TONGUES" —good work, **James Glade!** . . . **Alfred Pope** had more wrist watches to dispose of . . . people could afford wearing feathers in their hat like **Loren Horrie** . . . power houses ran as smoothly as **Albert Amstien's** . . . **Howard Cadwell** played less cow pasture pool . . . buildings were as clean as **Paul Burke's** . . . it were payday every day and no work on payday . . . clerks were as efficient as **Edward Hasse**—(By the way, Ed has scientific inclinations since working at Group 61. He is now an experienced slide rule operator) . . . **Whitney Miller** would park in the lot . . . I saved money like **Seward "Curly" Brown** and still not have any . . . **Supt. Paul Deylitz** came to work mornings before the roads were being repaired . . . **F. G. Robinson** took us through "Fuse and Booster" . . . we were as handsome as **James Morey** and **James Decker** . . . **Frank Johnson** gave checks on time . . . **Megideo "Tony" Ganz** had more poultry . . . **Carl "Ray" Carlson** quit using nitrate as fertilizer—(a way to keep out of the dog house, Ray) . . . **Allen Mayes** sang "The Lady in Red," Ya Ya . . . **Jerome "Harold" Rouff** found his million pounds . . . **Steve Juricic** had permission to cash his check before arriving home . . . **Frank Kachelhoffer** had a truck . . . we could make **E. J. Eagan** and **J. C. Schmeh** happy . . . **William "Ed" Westmeyer** would paint our floor . . . the "thin man" **William Brown** got **James Halpin** lined up —(I didn't need his help) . . . we could ride a horse like **John Spacia** . . . more people had the personality of **William Dooley!**

VIXEN DREAM GIRL is the role cut out for the mascot adopted by Chief R. W. Mortensen, shown here in parental pose, and the boys at Central Fire Station.

GROUP 8

An athletic club is being formed in Group 8, and most of the employees have given their OK by signing as future members.

The main diversion will be dancing, ball games, picnics, etc.

Yer dern tootin', there's—ball teams and ball teams in the bunch —both boys and girls—challenges are open—"What have you got that we ain't got?"

We're told that **Bill Henderson** was going around whispering, "Girls, me for Treasurer." I'm sure that if his wish were to be fulfilled, we'd soon be going around whispering, "Girls, the treasury 'twas, but 'taint no more."

The girls in 8-8 are wondering if their paymaster, Willie Henderson, plans to amuse them weekly with his little tumbling act, which he painlessly performed last week, Thursday, while chasing a certain little redhead of the opposite sex. Oh, well, 'snothin'. Guess he just fell for her.

Alma, so she says, had a flat tire the other morning on her way to work (she did not say who he was). She and her six lady riders were "wringing their hands with wrath and worry" when some kind gentleman (so early in the morning, too) stopped and changed their tire, proving that the days of chivalry aren't over . . . or are they?

What foreman in 8-8 insists that the red smears on his shirt were only red paint and that any resemblance to lipstick is just coincidental with him? Amusin' but confusin', eh, Joe?

Everything is peaceful in the Group 8, Superintendent's Office, as Harriet is working nights.

Helen Frantz, from 8-8, "dood it." She became Mrs. Merwin Meents Saturday, June 6.

William Irving, better known as "Scotty," black powder room, became the proud "popper" of a nine-pound baby boy June 2.

Mildred Provence has been seen a lot lately with a certain assistant superintendent, name of Elmer. Wonder what it's all about?

Tom Flaherty is all smiles today, as he moved in out of the dog house last night and hopes to stay in at least till next week-end.

Buck says, "**Bob Otte** is sitting pretty with the little wife again, we see he's getting his oranges peeled in his lunch."

Wonder what our good looking office man is thinking about when a certain little blue eyed girl on the waxing table called Dolly looks at him.

Group 8 misses that fried chicken since **Bill Chappell** done gone away.

Frank J. Zupancic, Jr., Group 8 timekeeper, loves his school for girl timekeepers which he is schooling. Please, Mr. O'Connell, send some more down.

Kenny Schoefield is a newlywed. Ken's sad this week 'cause wife went home to "Ma," also a sore thumb. Boy, what a life, no cook.

We put the Welcome mat out for two new maintenance electricians this week. **L. Tutland** and **Gordon VanClever.** Welcome, fellows, hope you like us, we like you.

Mrs. Nelida Deschand, of Kankakee, a trained nurse on the line in Group 8, volunteered her services the night of the accident at Group 2. Nelida says she came out here for a change of work, but was truly thankful to have had a part in making those boys comfortable.

Mrs. Loretta Countryman, Group 8 assembly line, entered St. Joseph Hospital June 4, and will be confined for some time. We wish her a speedy recovery.

Ademar Ruel of Group 3 and **Teresa Shires** were married at St. Rose Church of Kankakee Sunday, June 7.

Lee "Lucky" Davis and co-writer, **Mildred Jones**, inspectors, have written a song entitled "ZOOM-ZOOM-ZOOM," now in published form. This song is written especially for the Elwood Ordnance Plant, and will be introduced at a dance given in the Chamber of Commerce ballroom the night of June 27. **Beverly "Bubbles" Long**, Joliet's promising star, will introduce the song. **John H. Walker**, superintendent of Group 8, is to be presented with an autographed copy of the song.

We, in Building 8-11, wonder if **Mina Nordstion**, floor lady, is coming to work Monday after attending to business in Wisconsin, or is she holding something out on us?

We are just casually wondering why **Robert Gould** has discontinued his "wolf howl."

What we want to know, is—Did **Anita Burke** run into the door, as she says, or did the door run into her?

Meet Group 8

There's a very happy hustle,
As in rhythmic time.
The primers go a-climbing
Down the assembly line.

How golden bodies glisten,
As they fly from task to task.
Skilled hands bring more perfection,
From the first to the last.

Till safely sealed in cartons,
They go to their destiny.
Each to pave the way
For U.S.A. Victory.
And insure a happy home
For *you* and *me.*

—**Agnes Scott,**
Group 8.

FIRE Department

The recently organized four-man golf team of the E. O. P. Fire Department at Central Fire Station challenges any foursome on the Reservation (including the Police Department) to a golf match. This team—known in the upper golf crust as the "Putt and Pray Palookas," but more often as simply the "Slice and Swear Boys"—is anxious for action. All challenges accepted. Send them into Central Fire Station.

We tip our helmets to **Steve** (Beat me as a daddy) **Forgacs.** A few days after he became the father of a nine-pound baby girl, Stephen staggered in with the biggest home grown radish of the season.

Fire Laddies' Dream Girl

We are proud and happy indeed to announce the acquisition of a lady Fireman. We believe this is the first instance of a beautiful girl being chosen to actually answer calls on the Fire Rigs in an Ordnance Plant.

GAS MASK DRILLS are a part of the training members of the EOP Fire Department undergo. Shown here, left to right, are Ted Kloeckner, Mark Settlemoir, Louis Hildebrand, Robert DeBolt, Frank Scoma and Chief R. W. Mortensen.

Ever mindful of our unspoken (and slightly unheard of) motto: "The first with the most of the best," our talent scouts have uncovered a brown-haired beauty with eyes to match. The toast of 180 firemen, she is a rare combination of reticence and gayety, with just enough wildness thrown in to create a Shan Gri La for the boys.

Since starting with the Department, this sweet young thing has spent most of her time in Chief **R. W. Mortensen's** office—behind closed doors—and his working day has been considerably lengthened. The reason given by our long-laboring Chief is that the new member must have a thorough understanding of departmental routine—in other words, give the little gal a great big hand, etc. Playful, yet moody, she keeps the daring Firemen in an "off the beam" stance and trance most of the time, but like a few of her charming sisters, she can be bribed with a bright bauble.

In spite of this shortcoming, Chief Mortenson firmly believes that with a few more lessons on what not to do in a Fire Barn, our new pet, Fox, will make an ideal mascot. This, of course, will relieve Stuart Moloney of his duties —to a certain extent.

Group 3-A

Speaking of Victory Gardens; stop and look over the one at the Superintendent's house. The "Missis" surely has done a good job.

Howard L. Gueller wins a new hat. Howard is the proud father of a 6½-pound baby girl—Carol Mabel. Thanks for the cigars and congratulations to you and Mrs. Gueller.

Roy F. Manssen resigned June 9 to join the Air Corps.

A team made up of a few Bombardier players, and enough available men to make a team, beat our group Inspectors, 15 to 10. Pitcher **"Wild" Roy Hallahan** was benched in the second inning and **Bob Walsh**, third baseman, finished with a perfect no-hit-no-run-no-error score.

James Hatz' cat's got kittens; that's why he gave his dog away.

Two years ago **William Heylek** jumped off a freight train going 60 miles an hour. No bones were broken and he was able to go to work the next day. Bill is now a sub-foreman in our line.

Does anyone know **Harry M Knarr's** middle name?

Robert Bryant resigned June 13 to go in the Army.

The Bombardiers wish to thank the boys in Group 3-A for the generous contribution made for buying their baseball outfits.

Fred Perri, manager of the Bombardiers, is eyeing a game with Group 1 as soon as some of his regular boys who are recovering from minor injuries, can get back in the line-up.

George Costello, Jr., has been eating his meals from the mantel for the past three days. Poor Junior!

The **John L. Dillons** celebrated their second wedding anniversary June 12.

Colby Erickson did a good job of building the backstop for our ball diamond, making it one of the best in the area. Colby is short center fielder on our Bombardier team.

UTILITIES Department

In every organization there stands out one man. In the Utilities Department, it is **A. M. Lockwood**, who with his quiet and unassuming manner commands the respect and co-operation of all who come under his jurisdiction.

Those interested in knowing anything about Cuba and Brazil can contact **Claude Sayre.** His tale of construction work in these countries is really an epic.

Popular **Bill Franke** of the Machine Shop has joined Uncle Sam's fighting forces.

It is noticed that our efficient **Chief Baughman** has gone off the Gold Standard. What happened to those two molars, Chief?

Is there anyone who enjoys quantities of food more than our **William D. Sexton** at the Pipe Shop?

Orville A. Evans is once again back at his desk after a serious illness. His many friends and associates are glad to welcome him and are happy over his speedy recovery.

The family of **William A. Buck**, our ever congenial wire chief, are enjoying the summer at their home in the woods of northern Wisconsin.

Who whistles while he walks and walks to his whistle? **Elmore G. McAloon.**

The Utilities Department extends its condolence to **John De Pratt** of the Pipe Shop, whose father passed away recently.

The girls who have seen our handsome landscape man, **Ted Melzer**, are wondering where he spends his evenings. How about it, Ted? Not all the "nifties" are in the Chicago area.

Mr. and Mrs. W. A. Walters and family wish to express their sincere appreciation for the kindness shown them by their many friends during their recent bereavement.

On Land! In the Air! On the Sea!

The Radio Department can credit one enlisted man to each of the services. **Cadet Ed Matteson** of Eastern Avenue, Joliet, has given up his duties at the Radio Communications Department to help his Uncle Sam. He is taking up Radio Communications work at Scott Field, where he is studying eight hours a day. Good luck, Ed.

First Lt. Glenn Johnson of Oak Park is now stationed at Rock Island Arsenal as an MP and likes the job. To you, too, Glenn—good luck.

Last but not least, we mention **John Handel**, Radioman 2nd Class, who is stationed at Great Lakes Naval Training Station. He says he is "learning" to sleep in a hammock and we are wondering if that *is* possible. Anyway, we say three cheers for the three enlistees.

ORDNANCE DEPARTMENT

Cupid cut a rug in the War Department last week—**"Red" Bowler** will leave the bachelor ranks and become a benedict any day now—the gal—lovely **Joan Hart,** society editor of the Joliet *Herald-News.* Congrats, kids.

Lieut. Wm. Durrenburger (Bill to his friends)—hung a huge chunk of ice on the right finger of the right gal t'other day—she of the gorgeous tan and blonde tresses—**Jymmie Riley.** What a beautiful couple they make.

Mail and Record Section welcomes back **Marie Maren,** who has been ill for some weeks. Speaking of Mail and Record—**Josephine Kush** gave the gang a chance to see "the B. F." the night of the dance . . . everyone agres he's a keen boy—course we still haven't given up on the Lieutenant yet—you know these Army boys—slow on the approach . . . but oh that finish . . . so keep tuned to this column for future events on this.

Eleanor Fox Corniels, engineering and operations bride of a few weeks . . . had every one scared for a few days . . . her husband (brand new) got a case of the mumps and the whole second floor wing of the Administration Building started eating pickles the next day. . . . However, everything is under control and our worries are over . . . by the by . . . so are Eleanor's.

Didja hear about **Anne Kakara** (Mail and Record Whiz) and her fishing trip the other evening? First off, she cast the pole in the drink . . . then after much work got the darn thing out, and the first catch was an eel about a foot long . . . Anne being scared to death of snakes, took off for the woods at a spritely pace.

Wedding bells tolled Saturday for **Frank Branger** and **Dorothy Disch** of Chicago. Best of luck, kids, and hope we can say the same thing on your Golden Wedding day.

Mel Huston, teletype terror . . . had to blow hard on his hands Sunday to get them hot enough to dish the dope over the wires. . . . What's the matter, Mel??? no red "Corporals."

Molly Baker of the same department returned from her vacation with glowing tales of thisa and thata—but no word about getting hitched. Didja, Molly?

Dance Big Success

The War Department Victory Dance brought out everyone . . . hat's off to "Ole" Olson and "Red" Bowler for the smooth way they conducted the big event. Everyone had a marvelous time and hope the next one is very soon.

Colonel and Mrs. Hoffman set the pace of the evening by being about the friendliest people there. . . . **Captain Bach** . . . the shy fellow . . . and the Mrs. . . . they were having a grand time dancing together. . . . **Lieutenant and Mrs. Bohannon** tripping the two-step. . . . **Seymour Kurantman** of Administrative . . . keeping the escort from being bored . . . what was the funny story???? . . . **Jimmie Walker** (Missouri Dynamo) cutting capers . . . looked pretty dapper there, Jimmie . . . course we always thought you were handsome . . . we know someone in the Engineering Department of the Contractor that thinks so too—O.K., Jim, we won't tell . . . this time.

Harold Kapsch of Timekeeping, strutting his stuff with a glamour gal. . . . Who was she, Harold? . . looked like you might be going overboard, ole man . . . by the way, understand you and your brother Bernie are quite the interior decorators. . . . Any time we invite you to our house we'll nail the furniture in place so you guys can't rearrange it like you did at **Hazel O'Connor's** house one night.

Margaret Jesberger . . . without **Harold O'Keefe** . . . we did hear rumors, though, that she is serious enough about a boy in Joliet to wear a diamond . . . how about it, Maggie??? S'true, isn't it??????

Bess (Personality Plus) **Moore,** looking her best, with **Ev Myers,** ex-War Department big wig and now top man at the Commission?? . . . We did notice, though, he didn't have a blue suit . . . we're still curious about him . . . our snoopers will find out.

Edna Millweard and her "steady," **Bob Eaton** . . . pretty snazzy couple, we'd say. . . . Also from Personnel . . . **Bea Berge** and **Stan Maresh** of Inspection . . . **Flossie Babecke** and her fiance . . . **Bob Brockway** . . . having their usual good time . . . when's the big event?????

Cute little **Marge Kangley,** dancing with her big brother Don while little brother Norm and his wife looked on.

Johnny Phelan and his heart-throb waltzing. . . . How does it feel to be back in the fold, Johnny? . . . Good thing she came home when she did. . . . No more Monday morning blues for you.

Captain De Young and **Mrs. De Young,** looking katosh . . . talking with **Lieutenant Kuether** and wife.

Clair Donaghue, Lieutenant Kuether's competent secretary, is a war widow . . . all her boy friends are either in the Army or Navy . . . looks like she'll have to join the WAAC in order to see them.

Cute blonde **Bernece Carlson** of Captain Tunstall's Intelligence Division, looking sweet and having a marvelous time at the dance with **Joseph Nicolletti,** former dancing instructor at the Aragon Ballroom in Chicago.

Naomi Apgar (Group 6) sure was brave when she took on **Bill Proudley** (Group 7), **Leo Seeburg** (Group 6), **Leonard Woods** (Group 1), and **Bud Evenson** (Group 1) at tennis. She didn't do so badly, either, beating Bill and Leonard.

Bernice Unwin spent the week-end at her home in DeKalb.

All signs indicate that a romance is budding between **Ruth Hassig** and **Melvin Hurwitz.**

Within a few weeks, wedding bells will ring for **Paul E. Barhoover,** inspector at Group 6, and **Mary Virginia Loy** of Chicago.

Catherine Fitzmaurice spent a very pleasant week-end at Twin Lakes, Wis.

Group 3-A

O. E. Long is wearing his hair up these days, and we mean straight up! He's got the crewiest looking crew haircut in the area. The other night four guards and a fireman followed him up and down the line for an hour, figuring maybe he was a Nazi corporal. They didn't recognize him till he headed for a change house.

When **Harold Stark,** government inspector at Group 3-A, requested five days of annual leave, Mr. Douville thought he might be planning a trip to China. **Roy Hallihan,** group inspector, explained to Mr. Douville that Harold wanted to leave the bachelor category and have **Margaret Finkelstein** of Chicago become Mrs. Harold Stark.

We wonder if **James Musso's** sick leave has anything to do with his smoking the cigars that Stark brought back.

We have it on good authority that the Inspectors would have won the ball game the other night if the grass had been cut in right field. It was a tense moment, the thousands of fans packing the stands and bleachers sat with bated breath. Two men out and the bases loaded. The batter, an aging carpenter, slammed a sizzling grounder out through the knee-high weeds just inside the first base line. **"Jake" Hlavajcik** started after it and ran all the way over to the group fence line before he discovered that the ball had rolled down a wood-chuck hole, and he'd been chasing a rabbit.

The G-inspectors of 3-A presented **Richard Allen Hallihan,** the new son and heir of the huge **Roy Hallihan** inspection fortunes, with a War Savings Bond. Little "Dickie" was interviewed immediately after his arrival by *The Bomb-Shell* reporter. Between naps he issued the following statement, quote: "Goo glub ga yow blubble" unquote.

These remarks were interpreted by Basil (the staff baby talk expert), as meaning: "I feel that this bond establishes a precedent which, if followed, will provide a vast new source of revenue to help finance the war effort. I am in a position to know that there are a great many more members of my clique on the way, and if any of them are left out of this Bond deal, they're going to be plenty tough. Now beat it, Buster. I want to brush up on my yelling technique—I intend to try out for the job of Official Air Raid Siren of Kankakee and I need a little practice."

Some of the clean-up men around here should have bells on, so when **Johnny Wald** looks for them he can hear the bells toll.

While going through one building to another, saw a man standing on his head. It happened to be **S. C. Bennett** looking for a lost lot number.

MOPPING HIS BROW didn't stop William A. Buck, superintendent of telephone communications, in his stride as the staff photographer called on him professionally.

ORDNANCE WORK RUSHES in this busy administrative office, showing (left to right) Catherine I. Stortz, Mary Louise Schwartz, Josephine Kush, Anne D. Kakara, Seymour Kurantman, Betty Wilhemi, Melvin D. Huston, Raymond Marquardt, Margaret Kangley, Robert Jahnke, Jerome Kren and Florence Babecke, civilian employees of the War Department.

TELLING BUDDIES GOOD-BY was the last act hereabouts of Ray Harper, supervising sergeant of the guard force, who left June 3 for the Army. Sergeant Owen McCarthy, EOP guard force, is shown wishing Ray good luck.

SALVAGE Department

This is not only our first contribution to *The Bomb-Shell* but also marks the inauguration of the Salvage Department under the management of Sanderson & Porter.

By way of introduction it is fitting to present **Hugh C. Robb,** superintendent.

This department is some distance from the other groups, but we enjoy a certain privilege that is denied to other departments. We have in our possession a very rare article, namely: automobile tires. Of course they show signs of wear and tear, but they still retain the magic name of rubber.

Handsome **Billy Gagg** has been snared by a young lady in Galesburg. June 20 is the day. Best wishes.

George Burger is feeling his spurs these days.

Mr. and Mrs. Sparrow, who are tenants of the paper house, glanced down as **Gus Vehrs** entered. One said, that is the foreman. The other said, well, what are we waiting for?

Bob Bertram is on a visit to Rhinelander, Wis.

Our department has finally availed itself of a 5½-foot bench to accommodate our genial timekeeper, **Ben Sloan.**

Bruno Sismondi has been transferred to the Transportation Department.

MEDICAL Department

A hearty welcome is extended to **Thelma Talbot,** R.N., and **Wallace W. Koepp,** insurance adjuster. They are the newest additions to our hospital family. Mr. Koepp replaces **W. T. Bryant,** who was called to the colors June 3. Mr. Bryant reported to his local draft board in Portland, Maine, and according to last word from him, was properly inducted into the ranks as a full-fledged buck private, but was granted a 10-day furlough and will report to Camp Devens June 13.

Aside from its veteran patient "Pidg," the hospital now has a few other patients, all of whom are making rapid recovery and enjoying the hospital hospitality! The patients in Ward West are particularly fond of **Nurses Ulrich** and **Gunnerson,** but it seems there is a hitch developing in that beautiful friendship. Wonder what it could be? Only the patients can tell!

Margaret Stalker, secretary to Dr. Schultz, began seeing spots before her eyes. By the time she reached home she was seeing them all over and became worried. It developed that she was about to entertain a light case of the measles, but she is happily over them now and back with us.

Miss Stalker acted as godmother to her brand-new nephew at the ceremony held May 24. What with all our godmothers and godfathers, the EOP hospital is full of good people and a good place for good people to be.

DOG IS LOST

Dr. H. L. Schultz, medical director, and Mrs. Schultz report the loss of their wire-haired fox-terrier, "Stormy," and ask that news of him be reported to them.

Memorial For Elwood Heroes Held at Plant

(*Continued from Page* 1)

act, no influence which interferes with it will be tolerated.

"This work calls for loyal patriots such as those who have already given their lives here.

"Our flag must fly on to victory and that victory must be won at the Elwood Ordnance Plant, by our workers, supported by their families, and friends at home.

" 'Keep 'Em Shooting,' let come what may."

SHOWING THEM HOW is the role of Frank J. Wehrle in the recreational program headed by "Tiny" Cahoon. The budding baseballers shown here are: Back row, Gordon Enger, Joe Wehrle and Frank Misischia; front row, Henry L. Hyde, George Price and Mr. Wehrle, who formerly played with the American Association.

Inspection Department

Andrew O. Fox, office manager of the Inspection Department, will relinquish his duties June 27.

"Andy," as he is known to his co-workers, has made a world of friends in his few short months here. He will begin his new duties with the Chicago Bridge & Iron Company July 1. We all wish him success, and hope that some time in the future our paths may cross again.

Verna Lazar has found the secret of how to prepare deviled eggs. The inspectors that work with her in Group 5 believe Verna can now reach any man's heart. I know many that dislike eggs.

The general feeling that **Jim Tyler**, head inspector in Group 5, is a swell fellow may be due to the recent arrival in the Tyler family. The department hopes that young Tyler will follow his poet-father's footsteps.

Sophie Wathorric received a beautiful cork purse from a boy in the armed forces. It is something new and may be illustrated in *Vogue*.

Alice Kingsley, stationed at Group 5, now working the 3 to 11 shift, would like to get a steady ride from Starved Rock. If anyone can help Alice, call Elwood, Extension 58.

L. Hoskins, the genial inspector from Chicago, recently joined the ranks of the married men and is modestly receiving congratulations.

Eddie Schroeder puts in his spare time at one of Chicago's leading night clubs, but don't get me wrong. Eddie is the orchestra leader there.

J. Madura and **M. Weber** have proved themselves to be the best handicappers in Group 3. They had Mr. Testa make a $5 investment and the horse finished fifth in a five-horse race. Mr. Testa is still wondering that if he had put an extra dollar on for the boy, if he wouldn't have tried harder.

Warren Hair is pleased that they put the new concrete road in on Chicago Road, as he is able to roller skate to work from Elwood. By the way, he's got the west 80 over there.

When **Earl Shipley** saw the name of **Inspector Meece** on the bulletin board he said, "That's the plural of mice, isn't it?" Earl, who entertained thousands of patrons at the circus in the Chicago Stadium, does his clowning in the right place, and advises employees of the plant to do likewise.

Andrew O. Fox, while working on his monthly report, shouted, "Who's that whistling out there?" He looked out of his office door and in a sweet tone said, "Good morning, Mr. MacLellan." **A. J. MacLellan** happens to be the Chief Inspector.

Eddie Wicks was host to several of the inspectors in Group 3. Refreshments were served, games followed and all left enjoying the profitable evening. Someone said that **Elmer Henning** profited most. Mr. Rouff, Mr. Hartman would like to know just how the scenery looked from under the table? Rouff is head inspector in Group 61. Mr. Hartman is in charge of inspecting on the fuse, booster, primer and detonator lines.

Lenard Bruno suffered two broken ribs in a collision with **Leroy Parsons** while trying out for the Inspectors' baseball team at Group 3A. **Moe Brennan** was indirectly the cause of this mishap when he attempted to stretch a single into a double with Bruno on second and the shortstop holding the ball. All Bruno could do was tear out for third base, where he crashed into **"Tarzan" Parsons.** Since Bruno has been crippled up, the Cubs have sent four scouts out to sign him up.

GROUP 62

There is considerable talk about our own ball team and in all probability we should take Groups 1 and 2 into camp some sunny afternoon. In fact, the boys are willing to book any games, but it is still in the talking stage.

Willie (will - he - or - won't - he) **Denver** quit drinking goat-milk, but . . . The flower garden at North Inert still has trouble in flowering forth after replanting . . . the poppies look promising, however.

Happy again are we—**Jim Whitley** and **Puffy Puffer** are back on the active rolls after accidents. Welcome back, boys.

It's too bad they left out the shower baths at Inert like they have in the groups—summer coming and everything, but then the creek is dammed and should make a good swimming hole . . . not far away, either—just up on Central Road.

Wonder how the office bunch like the new set-up . . . **Eddie Sheridan** at Group 27 and **Frank Zupancic** at North—two swell fellows. In less than a week of office work Frank Zupancic is talking to himself . . . with lot numbers, door numbers, phone numbers, order numbers, and clock numbers; we are afraid they will get our numbers. **Muck Arthurs** and **Willie Denver** claim they had the same design as the one selected for the plant paper, but it seems they did not keep the draft copy for proof . . . honorable mention anyhow.

We sure miss the smile and witty manner of **Bill Norris**, one of our timekeepers who entered the service of our country . . . all the luck in the world, Bill, and to all the others who have entered. **Old War Horse Newton** at South Inert got his new set of chinaware and is his wife pleased . . . he can now say night-shift.

Chief of Inert Components—North Inert, South Inert, Group 27—is **A. P. Balston**, and his able assistants are **C. H. Mann, John Wald, C. A. Kemper** and **James Whitley.** These men and all the members of the Inert organization have chosen as a slogan for the department . . . *We Store 'em and Supply 'em.*

Personnel Department

It is with regret that we report the loss of two of our interviewers. **Robert L. Hamlin** left June 13 for a brief vacation before being inducted into the U. S. Marine Corps June 30. **William H. Johnson** resigned June 13 to return to school after a vacation tour through Wisconsin. Bill's going to be a doctor—and a good one, is our bet.

John W. Hogan (known to basketball associates as "Ice-House"), has just returned to the Personnel fold after completing the current scholastic year at the University of Missouri. Jack's cheery smile is like a dash of ice water these tepid days.

Loren D. Ross, photographer, has recently moved from Morris, Ill., to a little country home near Herscher. Last week when Loren was performing his early morning chores he was amazed, when he entered the barn to feed his mare, to find a newly born colt. He decided to name her "Miss Victory" and he is much elated these days, as he has prospects of a Kentucky Derby entry. (There is a bit of humor connected with this announcement and answers to inquiries may be obtained by contacting Mr. Ross.)

Sometimes it pays to be popular and again it doesn't. **Jimmy Barrowman**, Fingerprint Division, is so popular that whenever cigars are distributed by proud fathers he is always a recipient. Last week Jimmy came down to Personnel by bus and the bus driver announced the arrival of a son, at the same time presenting Jimmy with a very fine cigar. He became dizzy after a few puffs, but this unpleasantness did not stop him and he continued smoking, as his motto is "Do or die." For a while it looked as though Jimmy had chosen the latter.

Elwood Hupke, formerly assistant phtographer, is now in the service of his country. As soon as we learn of his whereabouts we will supply his mailing address, as we are sure he will be glad to hear from his former co-workers.

We never knew that **Elwood Ayres** of the "Reference Room" was so fond of roses. Each day he wears one in his lapel.

Eileen Terlep's (nee Fitzgerald) troubles have ended. She and Mr. Terlep have finally succeeded in locating an apartment and they are very busy getting settled in their new home. We understand there will be a huge "welcome" sign on the door.

Virginia Nowak, Filing Division, has returned after a month's absence due to illness. We are glad to have you back, Virginia.

Timekeeping Department

Time on My Hand

In inaugurating this column I hope that the gentleman in Room 2 at the Administration Building does not take the title of this piece too literally. If you do, Mr. Cole, I'm only kidding. A bouquet of orchids to **Joe Petroska** for his splendid work at Group 2 the morning of June 5. Keep up the good work, Joe. The Timekeeping Department is proud of you.

Bob Renoldi of Richards Farm has gone Princeton on us. Girls, take notice of the crew haircut. **Jim McHugh** of Group 61 is once again in our ranks. It seems Uncle Sam thought he would be of more use here at Elwood than in the armed service.

Bud Ressler, Ken Mitchell and **Bill Morris** are now physically checking the boys at Camp Grant. Keep up the good work, boys, and give 'em all eight hours. **Frank Zupancic** of Group 8 is all a-flutter over a cute policewoman. Let's know when, Frankie.

Homer Smalt of our Proofreading Squad, better known as the Naperville Flash, is now devoting his spare time to raising chickens. Don't ever start a conversation with him regarding his chicks or you will wind up by being a shareholder in his enterprise. That dignified voice at the telephone in Group 4 belongs to **Grant Stitt**, a swell timekeeper and a regular guy.

Jerry Walsh of night-gown fame is a former state representative who may run once again in this coming election. **Barney McShane** is walking around with a long face these last few weeks. He could be his smiling self if **John Dolan** and **John Machias** would give him better service when he calls them on the telephone.

Ray Shepley of the Administration Building is puzzled why his boss, **John O'Connell**, always looks at him when he says "He used to work for us." Don't worry, Ray, you will be in the Army soon and if your superior should happen to use the same phrase, I know how mad that would get you. Oh yeah!

Notice how the boys at Richards Farm Time Office are dressing up since we have employed girls, and, as **Lee Reynolds** would put it, even the vocabularies of O'Connell, McShane and **Milton Treitel** have been dressed up since these girls invaded our sanctum.

Mr. and Mrs. Prindle, Mr. and Mrs. Ben Sloan, Mr. and Mrs. Milton Treitel announce the stork's delivery of sons at their homes, one each. I defy any department to beat this record of consistency. I hear that **Pvt. Joe Malloy** is in Iceland and **Pvt. Joe Bick** is in the country of "way down under." The Hitlers and Mikados had better watch out when these boys start to work on them.

T. V. Brennan must have something on the ball. The girls in the Personnel Department threw him a birthday party at the Administration Building Cafeteria. The head timekeepers at Groups 1, 2, 3 and 3-A are jealous of the Fuse and Booster groups since we have been hiring female "physical checkers."

Material Warehouse

The boys in the Material Warehouse Department are all wishing for the early recovery of **Larry B. Stofchick**, one of their fellow employees in the old warehouse at Richards Farm who was taken to the hospital last week for an appendix operation. They sent flowers and cigarettes and hope he has the right nurse, which means a whole lot on the road to recovery. His teammates, **Truman R. Rickert, Glen O. Turner, Harry Tilden** and **Al. Kravitz**, carry on in his absence.

By the way, **Al Kravitz** bought a "baseball pool" ticket for 30c, sold it to a friend of his for 35c, making a 5c profit. His friend opened the ticket to find he had a $40 winner. Kravitz's temperature rose to 106 degrees, he has not shaved since, and we fear he may go on a hunger strike.

Now that **Clinton Jones** and **Edgar Ashley**, both members of the New Material Warehouse crew, have had their teeth extracted, **Louis Piano**, one of our material checkers, wants to stage a steak-eating contest between them, the winner take all. It is too bad they did not leave one upper and one lower tooth, as **John Nugent**, the fellow that keeps the paint and lacquer drums moving in and out of the area, had them all set with extra work biting holes in Sweitzer cheese for a friend of his, a cheese manufacturer.

Lester Patterson, the fellow that's always busy with inventories and out-going materials, took time out last Sunday to cast flies, plugs, and everything but the tackle box at the fish in Duck Lake, in the Fox Lake chain, and was his face red when he not only hooked but landed a five-pound bass, and then had a perfect day ruined when he was told the bass season didn't open till June 15. Of course we had no camera to take the picture of Pat returning that fish to the drink.

Who was the guard on the north gate the night he heard a noise outside and drawing his gun, cried out: Halt, who goes there? The answer came back, It's me. O.K., said the guard, advance and give the countersign. The answer came back, I don't know the countersign. You'll not pass here till you say Bunker Hill—that's final, said the guard. Well, it was not **Burl Cleary**, because he was not on duty that night.

Here is one for "Believe It or Not" Ripley. **John Baldon**, assistant to **Charles Herbig**, talking to South Inert on one phone, talking to the Purchasing Department on another phone, and holding a conversation with one of the material checkers in the office, all at one time. How is that for fast thinking, and he is not paid triple time for doing it, just the ordinary war effort.

Murphy's Boys End Joliet's Win Record

Group 2, Murphy's Boys, K.O.'d the undefeated Brown Bombers, 6 to 1, at Powers Field. Otto Koch allows only one hit and helps things along by getting two for himself. The Brown Bombers, a strong team from Joliet, were undefeated until they met Murphy's Boys on June 3. **Shoppee, Gaglione, Marlette, Zobel** and **Keenan** got the other hits, including two triples and numerous doubles and singles.

Murphy's Boys "banged" New Lenox around for many hits and runs the same. Taking New Lenox for seven runs in the first inning, the Boys put in fellow workers whether or not they were ball players. After the seventh inning the score was Murphy's Boys 16 and New Lenox 11.

Another hard fought game was played at West Park between Roxy A. C. and Murphy's Boys. **Peterbok** hurled the entire game for the Boys and allowed only seven hits, while **Sartori**, pitching for Roxy A. C., was nicked for 15 hits. At the end of eleven innings the game was called because of darkness and the score was tied, 12 and 12.

The Boys are entered in the Gold Medal League at Joliet, but were rained out on their first game. More games are scheduled for next week and night games will be played at various parks in the future.

A BUYING RUSH is a common sight in the Purchasing Department, but this crowded scene resulted from moving three offices into one. Shown above are: Mary Clow. Rita Dwyer, Ruthe Myers, June Kaehlert, Ben Nell, Ben Pierson, Leo Gaffey, Kathryn Johnson, Veranice Quade, Jeanette Larson, Dean Robinson, Ed. Craik, E. C. Carlson (head of the department), Jimmy Forrest, Horace Clark, Gerald Wilcox, Clarence Malmsten, Geraldine Drechsel, Bob Bailey, Shirley Grassle, Rube Medin, Eleanor DuFrain, Emalie Mueller, Arlene Thorson, Howard Barclay and Anna Mae Thompson.

SANDERSON & PORTER
ENGINEERS AND CONTRACTORS

ELWOOD ORDNANCE PLANT
JOLIET, ILLINOIS

June 8, 1942

Lt. Colonel Don M. Hoffman
Commanding Officer
Elwood Ordnance Plant
Joliet, Illinois

Dear Colonel Hoffman:

It has been suggested by my associates that there is almost a universal desire among our Elwood people to be allowed to make a substantial contribution toward the welfare of the families of our recently deceased fellow workers.

Sanderson & Porter whole-heartedly endorse this worthy suggestion and if you, as Commanding officer of Elwood Ordnance Plant, will give your approval my firm will consider it a privilege to contribute $5,000.

The rules to govern the collection of this proposed fund and its distribution will of course be subject to your approval.

Yours very truly,

HARRISON SMITH.

HS:er

WAR DEPARTMENT
ELWOOD ORDNANCE PLANT
JOLIET, ILLINOIS

June 9, 1942

Sanderson & Porter
Joliet, Illinois

Attention: Mr. Harrison Smith

Gentlemen:

1. Your letter of June 8, 1942 in connection with the contributions of the people of this plant toward the welfare of the families of those who gave their lives in the recent disaster is received.

2. The idea is a most commendable one and has the full approval of the commanding officer.

Yours very truly,

DON M. HOFFMAN
Lt. Colonel, Ord. Dept.
Commanding

cc – Mr. Canniff

SPONTANEOUS REQUEST from employees to be permitted to raise a fund for the families of Elwood's heroes was met with official approval of Lt. Col. Don M. Hoffman and a gift of $5,000 from Sanderson & Porter to launch the wholly voluntary campaign which will be conducted individually in each group under the supervision of the superintendents.

MODERN to the minute is the EOP telephone exchange manned by efficient operators. Shown at the switchboard here are (left to right) Elaine Christman, Supervisor Martha Herrity, Mrs. Gertrude Crowley and Mrs. Margaret Weaver. ←

→ **UP THEY GO** describes the ladder technique of this group of EOP fire fighters. Shown from bottom to top are Warren Colby, inspector, Ralph Batty, Joseph Drazy, Dayle Pratt and George Learned.

The BOMB-SHELL

ELWOOD ORDNANCE PLANT

LETS GO! U·S·A! KEEP 'EM SHOOTING!

Vol. 1, No. 3 | JOLIET, ILLINOIS, JULY 3, 1942 | EVERY OTHER FRIDAY

Plan Outlined By Somervell Followed Here

Elwood's Record Credited to View Of Supply Head

By Harrison Smith

Lieutenant General Brehon Somervell, Commanding, War Department Headquarters, Services of Supply, assumed his present duties March 3, 1942. General Somervell is responsible for supplying war-making equipment and supplies to all our armed forces throughout the world. The scope of such a job is beyond the ken of most of us, and his failure, if such were possible, would mean defeat.

It was not by mere chance that **President Franklin D. Roosevelt** selected General Somervell for this all important post. It was not by mere chance that General Somervell arose, step by step, through all ranks, beginning as a Second Lieutenant of Engineers in 1910, to Lieutenant General in 1942. His record is that of a man who has accomplished each task set before him as no other man has done before.

We, at Elwood, know General Somervell best as Chief of Construction Division, Office of Quartermaster General. As such he administered successfully the carrying out of the largest program of construction ever undertaken in this country.

Statement Appreciated

General Somervell came to Elwood shortly after his appointment to the Inspector General's staff. His visit, with his associates, occurred on Sunday, December 1, 1940. General Somervell made a visit to the plant site, viewed our temporary construction headquarters, earth moving equipment in operation, and the initial work of construction on the Group II line. There was a full discussion of the plant layout, status of the job, and

(Turn to Page 8)

Weather Favors Road Completion

Great activity is in progress on the roads within and adjacent to the site of the Elwood Ordnance Plant. Two major projects are under way. Inside the area a number of roads are being "black-topped" with asphalt and, adjoining the area, the State of Illinois is widening Highway 66.

The road from the Main Entrance Gate to Highway 66, the Chicago road through the area and a number of other roads are being "black-topped" by the Rock Road Construction Company, operating under an old contract which was interrupted by winter weather.

A. M. Lockwood, superintendent of utilities, is supervising the work preparatory to the laying of the asphalt. His equipment is busy with grading and laying gravel courses.

Work on bridges and culverts is being pushed along with the grading required for the widening of Highway 66. Various contractors are operating under the supervision of the State's engineers.

"The Army is depending on you"

LT. GEN. BREHON SOMERVELL
New Chief of Services of Supply

"THE FIRST SIX MONTHS OF WAR our cry was: More, more, more! Our hands were empty, our cupboards were bare. We needed everything, large and small arms, tanks, jeeps, trucks, planes, shells and bombs, everything!

"That emergency is past. Thanks to you Elwood workers and your fellow workers in other ordnance plants, thanks to American industry and American labor from coast to coast, our troops now have the tools with which to fight. But our army is growing faster than any army ever grew before and production must keep step with that growth and keep ahead of it.

"Emphasis today, however, must be placed not on how much we make but on how good our product is. Quality is our greatest concern. We must not only have more munitions than our enemies; they must be better munitions.

"We must find the proper balance between quantity and quality, between speed and safety. This balance cannot be achieved by management alone or army command alone. It's a function of the individual workers.

"The Army is depending on each and every one of you at Elwood. We have seen you come through a disaster with your heads high, your eyes on our common goal and your courage unshaken. Like the soldier on the front, you face daily risk; like the soldier you can do much yourselves to reduce that risk.

"I congratulate **Harrison Smith, Lieut. Colonel Don M. Hoffman** and every man and woman in the plant on the splendid job you have done and the job I know you will do in the future."—**Brehon Somervell, Lieutenant General, Commanding Services of Supply.**

Fund for Kin Of EOP Heroes Now $16,600

Families to Get Voluntary Gifts In Lump Amounts

More than $11,600 had been contributed by employees of the Elwood Ordnance Plant to the fund for the families of the E. O. P. heroes who gave their lives in the service of their country June 5 as this issue of *The Bomb-Shell* went to press and receipt of additional contributions was expected momentarily.

With the $5,000 contributed by Sanderson & Porter, the fund now stands at $16,600. It is to be distributed on a basis similar to that used by the Illinois Industrial Commission in setting the compensation recently paid to the families of the heroes.

Unlike the Industrial Commission's method, however, the amount alloted to each family will be paid in a lump sum, according to **Comptroller John J. Cole.** Consideration is being given, he said, to the possibility of presenting part of each family's share in War Bonds.

The fund was started within a few days after the explosion when a number of employees said they wanted to express sympathy for the families of their former co-workers in a practical way. **Harrison Smith,** resident partner for Sanderson & Porter, offered to launch the fund with a $5,000 contribution from the company in a letter to **Lt. Col. Don M. Hoffman,** commanding officer, asking for official approval.

Approval was given and the voluntary contributions were received by the superintendents of all of the groups.

Moving of Offices Expected July 10

Completion of the extensions to the two wings of the Administration Building are expected by July 10, according to **A. E. Frosch,** chief engineer. This will be followed by a general moving day affecting several departments.

The major transfer will be the moving of the Army inspection forces from the Recreation Building to the additional space provided by the extension of the West Wing of the Administration Building. Since the Army now occupies most of the second floor of the West Wing, the move will locate practically all Army forces on the two floors of that wing.

Other details of the transfer, as outlined by **Comptroller John J. Cole,** include the removal of his office, those of his assistants, the Accounting Department, Tabulation Department and Traffic Audit Department to the first floor of the East Wing. To make room for this influx, Engineering Department offices will be moved to the second floor, where Mr. Frosch is now located.

The Paymaster's Office will be moved into the extension of the East Wing on the same floor it now occupies. There a separate entrance will be provided on the east side and employees who do not receive their checks on paydays will be asked to go to that entrance to obtain their "yard of green paper."

GOOD JOBS—IF YOU'VE GOT WHAT IT TAKES!

A person usually tries to select a job that he likes; one that he is trained for, one that pays well, one that has pleasant working conditions, and one that has a future.

Here in the Elwood Ordnance Plant most of the jobs are new to all of us. I think we can agree that the principle of fair wages exists. I believe it would be safe to say that 75 per cent of us are making more money than we ever made before. The working conditions are A-1. The future is—continued Democracy, and all that it stands for.

Releases and transfers to other plants don't help you or the plant. It merely means that wherever you go you'll have to start over, and work from the bottom up. If there's something about your job you find difficult keep trying—remember a constant drip of water can wear away the hardest stone.

Too many of us think that the superintendents and foremen wear long horns, and perhaps they've thought the same about us. But I'm convinced that if we get acquainted we can work out a lot of things that seemed unsurmountable before.

Any person that is constantly jumping from one job to another never seems to succeed. You'll always find them driving the same old circus wagons, even though different names may be painted on the sides.

So let's all get together in one long, steady, united drive to "keep 'em shooting"—to produce the "stuff" for the boys doing the fighting. Fighting—that *OUR* children might be sound of body, and strong in spirit. Fighting—for a world of free men, which—please God—will come, and soon, out of the future.

—**James Glade**, Group 61.

Letters to the Editor

To the Editor:

I am interested in Philately, and imagine there are quite a few other stamp collectors at EOP. I am wondering if it is possible to form an EOP Stamp Club? If you would have a notice in the paper suggesting a club, and ask all interested to write me, telling the shift they work, I would like to help form a club.

Harold A. Whitman, Group 3.

To the Editor:

We have met the enemy and we are theirs. We hit them and then we got up. I refer to the kittenball game that we of the Administration Building had with the Officers. We are going to be good losers as the game ended 8 to 4 in favor of the umpire, **W. F. Douville.** By good losers, I mean that we snarl and gnash our teeth. We have learned to like 7 inning ball games also. It leaves one so refreshed after the ball game is over. Some of my men wanted to wrestle they felt so good at the end of seven innings.

We think now that it should be the best two out of three. And if we still can't beat them, make it the best three out of five. We feel that if it is carried out far enough that we would have to catch them on an off night. Maybe some night when they haven't had any water the night before.

Seriously, we had a lot of fun and hope to play more games. Some of you older fellows, and the young ones too, get out there and get some of that fresh air. It smells sort of odd at first after being in an office all day but you get used to it. I hope I have made the dead line with this little epistle as it will be stale news by the time the next news is out. Try and squeeze part of it in at least. Thanks.

E. T. Bennington,
Administration Building.

"Boy—just what we need—What is it?"

PASSES AND REJECTS

By Vernon C. Bailey

Heart-warming indeed was the reaction to the policy of mailing *The Bomb-Shell* to all employees' homes. Many were provoked because they failed to receive their copy, but they didn't sulk or suffer in silence. They let their misfortune be known, and how, and for that we are grateful. Steps are being taken to prevent a recurrence of the calamity, but we recommend that each reader who didn't get his or her copy send a report of his or her address to the Payroll Department or telephone 4206.

★

New Editorial Office

Editorial offices (all one of them) of *The Bomb-Shell* are now comfortably though temporarily established in the kitchen of the Recreation Building. Visitors are welcome and we'll be glad to exhibit our pots and pans (etchings are passe) at a moment's notice. For reference, see **Billie Nicholson,** secretary to **W. E. Canniff.**

★

New Editorial Aide

After seeing the photo of **Catherine Noonan,** editorial assistant, in another column of this issue, you undoubtedly want to know more about her. For several months, she was an inspector at Group 8, but it was felt that her previous training in journalism (Northwestern University and a graduate in journalism from University of Iowa) was needed on the tabloid. Her experience among Elwood's production workers will enable her to interpret the feminine viewpoint well and all who know her avidly await her first column in *The Bomb-Shell* July 17. Miss Noonan, who lives with her parents in Peotone, has worked in Chicago and New York and has dramatic as well as journalistic aspirations.

★

Coming Event

Speaking of the July 17 issue, don't miss the pictorial presentation of EOP's road-building operations. We are indebted to **Helen Shimek,** secretary to **A. M. Lockwood,** for arranging and to **Irving (Red) Harbour,** road maintenance superintendent, for personally conducting a tour which made the picture-story possible. The shot-of-the-day is a construction huddle. It'll slay you.

★

Concerning a Photographer

Reference to pictures reminds us that we inadvertently referred to **Ray Gora,** top-flight pix man for the Joliet Herald-News, as Al Gora. Phlegmatic Ray merely said in response to our apology that he was glad it didn't appear as Ann Gora.

★

Excellent Reporters

All of the news you eagerly devour is gathered and written by a splendid staff of volunteer reporters representing each group. They are doing a grand job and their pictures are used in this issue so that you may get acquainted with them. That the interest of the reporters is no less than yours is illustrated by the fact that **Harrison Smith** takes time to write a piece for the paper. In addition to the story carrying his by-line on Page 1 of this issue, he wrote the article about **Maj. Gen. L. H. Campbell, Jr.,** in the last issue of *The Bomb-Shell.*

★

Pictures Welcomed

If you have photographs you would like to see in your paper, send them in. Every consideration will be given and as many of them as possible will be used. By "you," we mean readers, both those who work at EOP and those who belong to the families of EOP workers.

I have written . . . a poem!

The Victory Banner

Let the "V" become our emblem,
the "V" of Victory,
Let it stand for every one of us
employed at E. O. P.,
Let Victory be spelled in each and
every task we do
For both the big "Importants" and
the small "Importants" too;
Keeping munitions rolling, morning, noon and night,
Proves E. O. P.'s not shirking but
out to do things right;
We have an important part to play
and we must in willing manner
If we want to win this war and
claim our "Victory" banner.

We'll make old Adolf quickly
change his silly numb expression
That looks like—did you notice it?
—our '29 depression,
By co-operation over here we can
make him plenty sore,
For we're proud we are Americans
and we'll fight to the end for
our shore.
And when the last of the enemies
we have overcome
We can thank the brave Americans who fought behind the
gun.
So co-operate and Victory's flag
will once more surely wave
O'er America, let's keep it, our
home of the brave.

—**Kay Richardson,**
Radio Communications.

Conscientious Rejector

The Inspector leads a sorry life,
He's loved by none except his wife,
With rejects here and rejects
there,
He makes the foremen tear their
hair.
They say he's wrong when they
know he's right,
They'd like to catch him outside
some night,
But he's darn sure that the stuff
we make
Will make Japan and Germany
shake.
We know it's good by good inspection
And the Axis gets a *Permanent Rejection.*

—**Jim Tyler,**
Group 4 & 5.

Aim of the Fire Guards

No fires (we hope)! Get what we
mean?
To prevent them is our aim.
So please help us keep things
clean,
And we'll help you do the same.

We'll tell you when it's wrong,
And it's for your protection too.
We'll all try to go along
And get a smile as we come
thru.

And if the "Boys" do get a call,
Please don't get them in a jam,
Try not to get in the way at all,
Just give them all the room you
can.

For they are trained to do their
work
And they know just what to do.
Now I'm sure they will not shirk
In protecting property and you.

So let's all work together,
And live to pay our taxes,
For if we help one another
We'll soon knock out the Axis.

—**Ivan De Moss,**
Fire Guards.

Let's Go, America

Let's go, America,
Wipe them off the map.
The world was made for freedom—
Not Hitler and the Japs.
Our slogan is—"Keep 'Em
Flying,"
As it shall always be.
Let's go, America,
To keep our America free.

—**Grace Wolfe,**
Group 5.

Justified Pride

They're friendly and so jolly,
They're pleasant, every one.
They turn a job from drudgery
Into a lot of fun.

They're happy while they're
working,
Every test they will survive.
You cannot find a finer group
Than the girls in our Group
Five.

—**Bette Claudin,**
Group 5.

THE BURNING PIT

By Scorchy

Wild rumors were floating all over this vicinity regarding the sudden failure of my eyesight. It seems that I reported the other day that work had finally been started on the widening of that carnal thoroughfare, good old 66A. At the first report, my friend (the other friend was absent that day) was in a tolerant mood and told me that a Bromo-Seltzer would probably correct the ravages of the previous evening, which he said apparently had exerted its full force and fury on my optics.

I was stubborn that day. I persisted in the assertion that although the dirt was not flying, at least it was moving in the direction of a bigger and better 66A. All of the wiseacres implied by significant glances that I was in a bad way and should be humored to the extent of their patience.

A committee of experts was formed to visit the scene of my alleged hallucinations, and report back the actual condition of the turbulent strip of terra firma. The alertness of the committee inspired them to place me in the comfortable confines of a file drawer while they were engaged in their anti-corroboratory expedition.

The cause of my weariness has not yet been established, but shortly after I was ensconced in my A-to-Z chamber, I fell asleep. I dreamed. Of course no one would believe that 66A was being modernized, and on second thought, even I had a few doubts about it. But for this eminent scribe to be incarcerated in a file drawer that bore the ignominious label of "cancelled" was too great a blow to my journalistic prestige. Egad, I would have revenge.

From that moment on, I would deluge them with "it-won't-happen-here" facts, fancies, fabrications and fables. I would report that **Mr. Frosch** once wrote a short letter . . .

That **Mr. Singer** reported back to **Mr. Lockwood** that "the building looks just like new and doesn't need painting." . . . That **"Jersey" Klegman** (of Group 2) had nothing to say one day. . . . That **Mr. Buck,** the telephonic maestro, complained to his boss that he didn't have half enough to do and could he please be given a couple of other departments to relieve the daily humdrum. . . . That **Mr. Burns** of Fuze and Booster told the Purchasing Department that he didn't need anything. . . . That **St. Clair Smith** really has one orthodox hat. . . . That **Mr. Manchester** was found whispering last week (probably laryngitis) . . . That **Seymour Kurantman** came to work with baggy trousers. . . . That **Mr. Lockwood** was found with a pack of ready-made cigarettes. . . . That **Harrison Smith** complimented a sub-contractor. . . . That **John Cole** is responsible for the "gimme a nickel" attitude of some of his associates. . . . That **Mr. Prince** shook hands with **John O'Connell.** . . . That **Howard Henderson** sent a shop order back with the notation "it ought to be made of steel." . . . That **Lieutenant Durrenberger** didn't laugh. . . . That **Charley Coburn** did.

Then I woke up, but did I fix them—and the committee had not yet returned—it was watching the caterpillars build the new 66A.

Group 2

EDWARD KEENAN

WILBUR GALBRAITH

Correspondents

There has been much comment in this Group regarding the dormitory and trailer facilities for employees of both the Elwood Ordnance Plant and the Kankakee Ordnance Works which are being built two miles south of our Plant. Your correspondents visited the project recently and were very much impressed. Such things as linen service, maid service, hot and cold water, heat, electricity are comparable to the best hotel service in any city and interested employees should file applications promptly in order to be assured of first consideration.

"Boiler Maker" Joe Connors left Coal City to spend a few days with his folks and friends in good old South Amboy, N. J.

Bill Galbraith was a recent visitor to his home town of Kenosha, Wis.

One of the best softball diamonds in the entire reservation, we believe you will agree after you see for yourself, has just been completed at Group 2. No end of credit is due to **Assistant Superintendent Hunt, Georgie Zobel, Mac McGuire, Ken Peterbok, Joe Furlan, Andy Feeney, Ray Murray, Jerry Phelan** and all the other fellows who worked so diligently to provide us with this diamond. Too little cannot be said for the splendid assistance and cooperation of our superintendent, **James J. Murphy.** We appreciate, too, the help of **A. M. Lockwood, C. Sayre** and their men.

The Real Lowdown

Chuck Pierce is getting a mange cure; at least that's what **"Jersey" Klegman** told us.

Eugene Hunt is doctoring a badly sprained ankle. He has to do his coaching from the bench now.

Then there is the story about **"Angie" Pagnusat** and his automobile which brings a chuckle to **Mel Roach, "Grid" Wheeler, Maurice Goodspeed, Bert Folk, Joe Petrosko** Group 2 timekeepers. It seems this bunch, led by the notorious **Al "Hallock" Le Borence,** piled into "Angie's" car one night with the intention of taking off for Joliet, but alas when "Angie" shifted the gears nothing happened. After five minutes had passed and "Angie's" face was turning a very deep red, Le Borence and his men jumped out of the car and gave it a gentle shove.

Naturally, "Angie" was inquisitive as to what the trouble was and the boys recommended that he have his (get this) corner gears checked. Well, poor Angie had every garage mechanic in Joliet just about nuts trying to find out where the corner gears are located on an automobile. The answer, "Angie," as to why your car wouldn't run when you shifted gears will be found by questioning some of your fellow associates. Especially about jacking-up your rear wheels. Oh, well, all's well that ends well.

Because of his two recent victories, **Otto Koch,** our highly rated pitching ace, has been released from the "dog house" by his wife.

Sports

Murphy's Boys kayoed the Brown Bombers for the second time 6 to 4. The Boys deserve a lot of credit for outstanding performances such as this one against teams like the Brown Bombers.

Murphy's Boys looked like million dollar babies against the 5 and 10 cent Minooka team under the lights at Minooka's home diamond by decorating the score board with 21 runs and holding the home team to a 1 lonely run. **Ken Peterbok** turned in a fine game by allowing Minooka only 3 hits.

Ken Peterbok hurling for Murphy's Boys in their 6 to 2 Gold Medal League victory knocked at the door of the hall of fame until the seventh inning when **E. Hleberico** dumped out a single for the J. L. Garage. Credit for fine fielding goes to everyone of Murphy's Boys. Only one error was made. **Ed Keenan** again came through with a home run. Peterbok struck out 9 and walked 3.

Murphy's Boys also won another game in the Gold Medal League by setting down the Weber's Dairy team to the score of 10 to 6. **Otto Koch** pitched a fine game allowing only 5 hits. After scoring 3 runs in the first inning the Boys quieted down until the fifth inning when Golden drew a pass and **Ed Keenan** drove one over the right fielders head for a home run. The game was stopped momentarily so the fielder would have time to walk back into position after chasing the ball far out into the shrubbery. **Bob "Sun Tan" McGuire** played a stellar game getting two hits and a walk for himself and making 2 or 3 plays that before Mac's time were thought impossible.

Due to the formation of the EOP League Murphy's Boys will not be able to continue with their schedule in the Gold Medal League in Joliet. Their future plans are to play two nights a week in the EOP League and play independent ball two other nights a week. These independent games will probably all be played under the lights.

Salvage

ANDY VAIL

Correspondent

Things sure happened to **Billy Gagg** this week. He received a call from the draft board while on his honeymoon.

Roy Chasteen says he is willing to give a woman driver half of the road as soon as he finds out which half she wants.

We are hoping that **Jewel D. Mitchell,** who is ill in St. Joseph's Hospital, will soon recover and be back with us.

Alex Becker, who just bought a flivver for $10, says "it is very hard to drive a bargain."

Ben Sloan is planning to go to the International Clock Company to take a course in time clock adjustment.

Joe Green has returned from a fishing trip along the Illinois and Mississippi rivers.

William Zomboracy has been dipping his bill in quite a few sodas since a certain young lady has been employed in a store on Chicago Street.

Scott W. Soper says he has been to many parties in his time but has always remained *Soper.*

The squad car saw a station wagon pass and seeing no one in it thought at first it was operated by remote control. After catching up with it they found **Eddie Richert** and **Willie "Torchy" Pebbles,** timekeepers, on their way to the Salvage Department.

Henry O'Reilly, who attended the last dance at the Recreation Hall overheard a young lady remark "He was not much of a dancer, but how he could intermission."

Lester Devor's "Victory Garden" potatoes are growing so fast now that by the time a sackful is dug the last ones are about twice the size of the first.

Arthur Voss while eating in a Chicago restaurant complained about the steak. The owner put him out, said it was no place for weaklings.

Japan has a number of companies which furnish fireflies for social functions. It seems that no Japanese party is complete unless fireflies light up the garden. The competition that **General Doolittle** and his flyers gave them not only put those companies out of business, but evidently lit up a lot of gardens that night.

Guards

GENE RYAN

Correspondent

A new addition has been started on the Guard house. Personnel has reached such proportions that completion of this addition will be of great assistance.

On the Grape

Sergeant Maskel, instructor at pistol range: — "Hey, don't you know any better than to point an empty pistol at me." New guard: —"But it isn't empty, sir, it's loaded."

A squad was patrolling the other day and ran out of gas. The driver called Headquarters via radio stating "Car 17 out of gas, on black top at Group 2." "Well, don't sit there like a dope," bellowed **Bud Decker,** dispatcher, "drive back and get some."

She was only a Sergeant's daughter but she knew when to call a halt.

Sergeant Murphy, inspecting a guard: "You remind me a great deal of General Grant." New guard: "Really and truly, sir." Sergeant Murphy: "Yes, he didn't shave either."

Sergeant McLaughlin is sporting a small shiner. Dispatcher Decker suggests that to make his story more convincing he should carry the door tied to his back, with this sign on it. "This is the door I ran into."

Supervising Sergeant Walter L. Bayer is continuing his reducing exercises during the summer months by slicing a golf ball. Sergeant McCarthy advises that if he continues carrying those garden implements in his golf bag, they will sign him up as caretaker of the course. (Sergeant Bayer must believe in that sign "Replace all turf.")

Sergeant McClellan has been advised by his insurance company that as he is driving on the highway so much, his future rates will be increased.

Norman "Muggsy" Morgan, deluxe custodian of the Guard house, has been mentioned as a representative to the rodeo in Fairbury. In preparation for this event, he has been schooled in the ethics of the modern farmer.

Fire

STUART MOLONEY

FRANK J. SKOFF

Correspondents

If you were to ask the boys of the Fire Department where they were at 3 o'clock, June 19, they could truthfully swear that they were busy bouncing a solid one right on the wrist of **Chief R. W. Mortenson.** The occasion was the chief's birthday and the boys presented him with a solid gold wrist watch.

Captain Davis and his boys at the Central Fire Station want a soft ball game with the Administration Building boys. Is the challenge accepted?

Inspector Wilfong announces that the Fire Department will not worry about sugar rationing as long as there are bees swarming in the area. With the help of **Hydrant Maintainer Jensen,** one hive has already been set up at the Central Fire Station, while **Lieutenant Nolan** opines that the Administration Building has already solved the problem — what with all the boys going to the Army creating a "Sugar" surplus.

THE BLONDE BOMB-SHELL is what someone will say eventually, so here it is said first in presenting Catherine J. Noonan, newest member of the staff of the EOP tabloid. Her duties will be manifold, including presentation of the feminine viewpoint. Watch for her column which begins July 17.

Hospital

LUCY HARKNESS

Correspondent

The hospital has been a very busy spot these past three weeks. However, our original number of fourteen patients has dwindled to four, and they are doing nicely in spite of all the gadgets that adorn the beds of three of them.

Edward Robert Gordon, who suffered a fractured right leg and is all done up in a traction splint, was the recipient of a lovely radio for Father's day and keeps the rest of the boys well entertained and up on the latest news.

William Liming has been dressed up in a reasonable facsimile of a false front — in other words, a plaster cast that extends out to support his fractured left arm.

Franklin Wilkinson, with a fractured right arm, is doing all right, too, and always has a nice big smile for all the nurses.

Frank Yarborough, who suffered a fractured right forearm along with other serious lacerations and wounds, is now able to be up and about. He is a familiar sight in the halls and various offices as he goes about on his daily tour of the hospital, and we are all very glad to see him coming along so nicely.

Gene Hurley, laboratory technician, left June 27 for Pueblo, Col., where she will spend a week with her grandmother who has been ill for the past few weeks. Pleasant journey, Gene; hope you have a nice trip, and don't fall into any of those canyons or FOR any of those Indians—or are they cowboys?

Page Mr. Ripley—we have a Doctor who *needs* a Doctor! **Dr Geo. McClure** had several infected teeth removed just recently, but is progressing as well as can be expected at the present time. However, Doctors please stand by.

I am sure everyone will be interested to know the progress being made by the hospital's first full time "patient," **Pidg. Pidg** now has his wing out of the splint and has discovered that he can fly again! As a result, we have to watch him carefully. **Dr. H. L. Schultz** takes him out each day for a bit of exercise and contemplates releasing him soon for the homeward trek. He says **Pidg** belongs to a carrier pigeon fancier in Chicago and should have no difficulty reaching the home roost safely. Maybe we shall hear the final chapter on this later.

Dr. Harold W. Harrison, jovial plant physician, now boasts a family of five—and they really do take up a lot of his time! Just ask a couple of people who waited for him two hours the other evening while he administered first aid and medical relief to a couple of the "young-uns!" The family consists of the five tumbly cuddly puppies newly-born to "Putzie," **Dr. Harrison's** wistful-eyed Scotch collie.

Thanks to **Bob Ingar,** Carpenter Shop, we now have a trellis for the sweet peas at the hospital and, as a result, hope to have cut flowers for the patients soon.

Dr. George R. Luke, our doctor from Georgia, has been giving the hospital staff a bad case of nerves. He received notice of induction into the armed forces. Naturally, patients and the hospital staff were greatly disturbed. But at last word has come through that he has been deferred. Now we are all happy again.

It took **Edward Gordon's** fractured leg, and **Franklin Wilkinson's** fractured arm, patients at the hospital, to awaken the nurses' latent musical talent. Every morning Edward and Franklin are greeted by the singing nurses with the theme song: "Don't Sit Under the Traction Splint with Anyone Else But Me." So far no fractured larynxes have been reported.

Man With Hives Captures Bees

By Jack Barry

Volumes have been written about persons with bats in their belfries and we have heard a thing or two about certain folks with ants in their pants. Such things are for the most part legendary and matters of historical lore, but the night of May 28 every man in Group 1's Building 10 had a golden opportunity to have bees in his bonnet.

A huge swarm of bees numbering into the thousands had hived on the outside of the ramp between Buildings 10 and 13. Individually and collectively they were minding their own business. However, an intrepid fellow by the name of **Ernie Kinzer,** who was always in the B class at school on account of because he invariably had the hives, let down his hair and went into aviary aviation.

Ernie picked up an empty fuze or booster box (drat it, how may one distinguish?) and started to brush the bees gently into the box from their secure perch on the ramp. All went well for awhile and though Ernie had bees all over his face, in his ears, and even inside his coveralls, they all behaved like little gentlemen. Then he came to the queen, who had not had sufficient rest, and although she acquiesced and entered the box, she did linger a moment to issue certain orders.

As **Mid Slack** describes it, Ernie was stung only five times, which is like saying that he had only five warts on his nose or only five wives. Be that as it may, Mr. Kinzer was rewarded for his bravery by a pass to take the box of bees out of the area (Praise the Lord) after his work for the day was finished.

An American in London boasted about America's superiority until his friends tired of it. Loading him to the sleeping point with whiskey, they let him down into a newly dug grave. When he awoke in the morning, he climbed out and looked around.

"America's still ahead," he commented. "Resurrection morning and I'm the first man up."

JOLIET'S FIRST HERO, William Lawrence, 19 years old, told his proud mother, Mrs. Elvada Lincoln, who is also doing her bit as an inspector at Group 8, all about his escape from the burning Lexington, aircraft carrier sunk in the Pacific, when he came home last week. *(Photo courtesy Joliet Herald-News)*

Ordnance

HELEN McGINNIS
Correspondent

Burnham "Burnie" Lyons is back in town after a short vacation,—looks wonderful,—says he's been gardening . . . do ya believe it? He's about due for the Navy?

This writer has one on herself (or is it off herself?) . . . lost somethin'—the other day . . . and it wasn't my dignity. Just ask anyone in the War Department? They know!

Jennie Vernetti of Auditing is deserting our company to join the Chicago crowd . . . We'll miss you Jen?

Claire Donaghue is all smiles these days . . . her big brother got home from the Army for a few days furlough,—he's on his way to St. Louis for duty.

Is our face red? . . . faux pas No. 1 for this department . . . last copy of *The Bomb-Shell* showed **Ev Myers** as being top man with the Commission . . . my—oh—my he's Chief Project Auditor with the Zone Constructing Quartermaster of the Sixth Construction Zone, Chicago . . . wow, — that's a mouthful. Anyway, we hope this puts us in the driver's seat again.

Beatrice Perteson of Auditing sure was worried about the ride they had one morning . . . seemed as though the curves were coming at them faster than they could get 'round them . . . Anyhoo . . Bea appreciates the bus now . . .

Saw **Jo Anne Comerford**—Corps of Engineer cutie,—struttin' up the avenue t'other day. She was with **Mary Scahill,** — gal from Stores and Transportation.

Romie Kren of Mail and Record is a joke king. Just let him get started,—then sit back ready for anything. He and Marie Maren are forever at it.

Ask **Lee (Personal Problem Child) Sopher** what happened on her recent jaunt to the woods? The "chiggers" got her, and how! What with sunburn and all,—methinks her picnic days are numbered.

Saw **Carl Ankar** (Inspection Isodynamic) at the dance . . . He imported "her," fellas . . . so don't get out the Sherlock Holmes book —to find her on the reservation. Gobs of credit are due Carl for the beautiful decorating job he supervised for the dance.

Speaking of decorations . . . **Ole Olson** is now known as "Simon Legree" in the payroll section . . . with the threat of losing their job hanging over their heads—**Hazel Koller** and **Kay Cusick**—spent two nights helping with the decorations for the dance. They did a good job too . . . Jingle Jangle . . . can't you just see "Ole" threatening them?

Phil Keller, formerly with War Department Payroll Section here —and now learning to become a hoosier — has finally succumbed to the effervescent tingle of the lovebird's song—and is taking unto himself a wife . . . Evelyn Gleason, S. & P. Payroll Section. Phil called Evelyn the other day and wanted to know where in heck he could have the banns published . . . in the Court House? Always being ready to be of service, we take this opportunity to publish them and wish them the best of luck. The date is August 1.

Chuck Wachendorfer had a birthday June 25 . . . wonder if he got that radio wire fixed in his car yet,—or does he still have to hold it out the window—in order to play the radio.

Hear that **Lt. R. E. Pinnick** is a cynic (gosh—it rhymes)—doesn't like to dance, but reads Reader's Digest and Time Magazine from cover to cover . . . No wonder he looks so dignified . . . anyway *we* like 'em.

Anytime ya got da blues . . . just ask **Ray DuClos** for a ride in his station wagon . . . if a guy ain't nuts when he starts riding in that thing he sure will be when he stops . . . what with **Jimmie (Flash) Walker, Ed (Dark Threat) Webster, Norm Long** and his sis, **Marge Kangley, Josephine Kush, Helen (Whoops, I've lost something) McGinnis, Marge Connolly** and anyone else that needs a ride . . . It's no wonder he doesn't need a horn on the darn thing . . . you can hear 'em comin' for six blocks.

Emma (Doodlebug) Shea has been over at the Personnel Building taking **Monica Limacher's** place, while Monica has been replacing **Bernie Carlson** of **Capt. D. P. Tunstall's** office, who has gone to Washington . . . Smoley Hokes . . . sounds like a triple play in a ball game.

Ann Kulpa (Personnel Leave Queen) is preparing for her vacation and quite secretive about her plans . . . Could be she is learning the "Arkansas Traveler" . . . just in case she should take the choo choo down to Pine Bluffs.

Lt. Carl (Bright Eyes) Beilharz is freelancing again we hear . . . O. K. gals the line forms to the right . . . From good authority we hear that he is an eligible and charming person.

Evelyn Tecotzky (Mr. Zagade's sec . . .) looking pretty snazzy in a large merry widow hat . . . she was on her way somewhere and looked at tho' she thought it might be interesting.

Hazel Koller and **Dick Shelley,** both of Payroll,—really put one over on the guys and gals in there . . . they have been seein' the sights for quite sometime together and no one knew about it? . . . Boy, are you fellas slippin . . . takes this snooper to find out things!

The government inspectors in Group 4 extend sympathy to **Sol Jacobs,** whose mother passed away recently.

Geneva Landon of New Lennox has been added to the Inspection Department.

Clara Wehner was appointed Chief Clerk last week.

Time Inspection

The Government Time Inspection Department dusted the "welcome" mat to greet the first female member of the department . . . **Anita Lambur.** Welcome also to **Mrs. Loretta E. Franke, Martina Schomas, Betty Lou** and **H. Clark McKeehan** who joined the department a short time later. We like them all and hope they like us too.

This department has already contributed five members to the armed forces, namely: **Harry W. Funk, Clarence W. Bartlein, Ralph DiFebo, Robert W. Seelinger** and **Clyde E. Wells.**

Two former timekeepers are now engaged in defense work as personnel directors. **Thomas J. Bianciotti** is now personnel director of the Mintner Construction Company's project in San Lucia, British West Indies, and **Elmer (Pozy) Palmer** is personnel director of the Illiopolis Ordnace Plant, Springfield, Ill.

John Green, posting clerk, thinks the fates are against him . . . it has rained on his day off for the last five weeks! He says his front lawn looks like an oat field!

Since **Jake (Captain) Sands** was transferred from the Time Office to the field, there's been no one to play with the adding machine. You should stop in once in a while, Jake, 'cause it's so quiet we can't concentrate.

The gals of the Personnel Section had a picnic the other Sunday at Starved Rock as is attested by the picture above. Shown, left to right, are **Mary Christenson, Edna Millweard, Margaret Kangley, Lee Sopher, Catherine Stortz, Bea Berge, Bernece Carlson** and **Jane Finney.** Not shown are **Anne Kakara,** who took the picture, and **Emma Shea,** hiding under the table.

Willie Peebles, railroad time checker, is quite adept at the art of photography. I'll bet he wouldn't let us publish any of them in *The Bomb-Shell* though.

High Explosives

JACK GARNANT
Correspondent

Columbus, Ohio, is the garden spot of the world if you believe all you hear around the High Explosives Lab. Of the ten chemists there, nine call Columbus home and eight are alumni of **Dr. Herrick L. Johnston's** course in the chemistry of explosives at Ohio State University.

Someone coined the phrase "Happy Chemists" to describe the gang around here. Some of the wilder goings-on and certainly those early morning choral workouts are enough to make anybody happy—slap-happy.

Life can be, among other things, very trying. Consider the case of **Bobbie Bridwell,** our newest newlywed, who's been swing-shifting while her bridegroom of a few weeks works days at the "Fuzz and Buster" lab.

Life can also have its more pleasant aspects. **Dave Hill,** group government inspector, who was recently transferred to this lab. from Group 61, found out last week that he was tied (with how many others he doesn't know) for a substantial first prize in a contest sponsored by a Chicago newspaper. Dave, who never entered a contest before, says he's following the old adage about not counting chickens.

Incidentally, when the EOP band gets to tooting, among the tooters will be **Ray Hybarger,** our assistant chief, and **John Snyder** and **Ellis Steinberg.** The lab also has a candidate for drum majorette in blonde **Marcia Mitchell,** wife of WCLS's **Jim Mitchell,** who used to swing a mean baton for West High School at Madison, Wis.

Is this a gossip column? Anyway, the **Richard Orndorffs** should be getting a bundle from heaven sometime before Hallowe'en. The Orndorffs and the **Charles Clifford's,** along with **John Clark** of Group 9, and his wife, live as one happy family in one of Joliet's swankier sections.

Nelson Tippett and **Palmer Overholt** aren't being troubled by cigarette bummers since they've started using those handmade jobs. Opinion varies as to whether this economy measure is prompted by income tax apprehensions or matrimonial intentions.

Incidental intelligence — The currently popular "Cherokee Maiden" might have been written about **Verneille Holder.** Verneille, who gets her weekly pay check for being secretary to our chief chemist, **Herb E. Hafele** (final E silent), is several sixteenths Cherokee.

Ford Teeter, while bumping over one of the plant detours the other day, announced that, with a government subsidy of thirty million (dollars), he would agree to set up a synthetic rubber factory to supply tires for everybody. Ford is also looking for financial backing for his synthetic diamond process.

Title of handsomest couple at the lab has just been awarded by acclamation to **Ronald Beck,** glamour boy and physical culture enthusiast, and **"Rosemary Hafele,"** epitome of canine femininity. (The lab was saddened recently when it became necessary to discipline Rosemary, whose barking, growling, snarling and snapping at the air compressor became too much even for the Happy Chemists.)

Great was the surprise of **St. Clair Smith,** superintendent of high explosives, when Peter and Lucky Lady, his pet wire-haired terriers, won ribbons at the recent Skokie Valley dog show. Peter, the older, carried away the purple ribbon of the winners class and Lucky Lady was first in American bred and third in the puppy classes.

Frank Walsh, checker, was presented with a shock proof wrist watch by the men at 63 and 66 upon his induction into the Army June 24. Frank was a popular employee with both Groups and they all wish him the best of luck in the fighting forces.

Steve Lanczak, better known as "Rusky," was ordered to report to the Army July 3.

Anyone interested in buying a pop dispensing business (now dead), contact **Windy Stroh** or **Hagey Fraher** at Group 64. Any and all offers accepted.

For those interested, Group 64 has not only a good trap-shooter, **Rex Thomas,** but also a good man with the dice, whose name we are unable to determine.

Herbert Drummond has left to take up timekeeping duties at Group 3. His seven-month stay at 64 made him a popular favorite and we are sure his friendliness will be well received at Group 3.

Harry Roles and **Irving Simmons** were sworn in by the Navy June 27, making a total of nine of boys from Group 64 going to sea.

The men at 66A finally got the best of quip-man **James Smith.** When he left for the Army the boys presented him with a large sack of shoestrings, nails, pebbles and money. Jim had always had an answer until that one came along.

John Roussopulas is the proud father of an 8½-pound boy.

St. Elmo Stewart, General Foreman of Group 66, is the number one fan of the Group softball team. There is plenty of room on the bleachers for rooters with his enthusiasm. So come on out, fellows, and help the team with your moral support.

"Doc Simmons promised **Armand Squateri** a candy bar for every day that he was a good boy. So far "Doc" hasn't paid off once.

Government Inspector **George Dehm** left the ranks of bachelorhood and took the final step June 27. Best wishes to George and **Mrs. Dehm.**

Farmer Boy Goes to the Big City: **Dan Fortado,** known as "Sweet Potato" among the Group, tried to walk up an escalator in a big store in Chicago. Had it not been for his friend, he might have suffered serious injuries.

You're in the Army now: **William "Windy" Wingate** was inducted into the U. S. Army. "Windy" will be missed by his gang, and his many friends of Group 66.

Lee Widup was ordered to report July 3. The best of luck to two swell guys, "Windy" and Lee.

How did **"Chuck" Kozlowski** explain that black eye to his wife?

The birthday on June 12 of **Andy L. Perino,** general foreman of Group 68, occasioned a visit from the High Explosives' office force, **Marge Howerton, Bea Bovee** and **Jack Garnant.**

EOP Service Men Get Plant Paper

Former EOP employees now in the armed services of the United States are now receiving *The Bomb-Shell* by mail no matter in what part of the world they may be stationed.

This service was inaugurated at the suggestion of **Harrison Smith,** Sanderson & Porter resident partner, and is made possible by the co-operation of **Lt. Col. Don M. Hoffman,** commanding officer.

Addresses of the service men are being compiled by **George F. Bent,** personnel director, through letters to their families. These addresses are on file in the editorial office of *The Bomb-Shell* and will be furnished on request to employees who wish to write to their former co-workers.

Families who want to make certain their boys are receiving the paper are asked to call Extension 4206. If the address is not on file, it will be added to the list.

TWO BUSY MEN at Group 3 are Supt. H. D. Dougherty (right) and William Barringer, who recently added reporting for THE BOMB-SHELL to his many other duties.

Group 61

JOE MOTTA
Correspondent

Robert Langley and Hermenia Biscan were married June 13 in St. Louis.

Paul Burke, they say, went home suffering with a toothache—Paul has store teeth.

John Troutt entertained friends from Chicago June 13.

If Bob Walker would have had priority on a safety chute for his basement he wouldn't be wearing a black eye today.

Gone but not forgotten are Anton Stodolny, Charles Laux, Floyd Derby and William Claudnic who resigned in good standing.

Harvey Steffes, Charles Hinz, Seward Brown and Wayne Howard attended the Eagles' stag picnic at Rivals Park in Joliet. Lunch and soft drinks, they insist, were served.

Severn Gaefcke, Army Reserve, was notified to report for active service in the near future.

Recently Allen "Cap" Mayes attended the late session of a safety meeting—formerly only theatres ran double features.

Alex Malm participated in the Memorial Day parade in Chicago.

Eugene Balachowski moved back home to LaSalle from Joliet. The reason wasn't Ma's cooking, according to Nicholas Pagoria and Marvin Friedman.

Additional manpower for Group 61 are Cecil Douglas, Howard Feldman, Edward Brower, James Bunting, John Benson, Eugene Bichbichler, Victor Nelson and Jasper Middleton, Jr.

Donald Coldwater received an interesting letter from his brother, Franklin, who is in Camp Livingston, La.

Art Swinghamer recently visited his brother, Walter, in camp at Fort Sheridan, Ill.

Justin Corrigan enlisted in the Air Corps.

In "Boetto's Shack," along the Kankakee River at Wilmington, Robert Whalen attended a cottage party.

Ed Nelson and Albert Amstien, in their search for the source of ammonia in the condensate, should look in the first-aid cabinet.

It Would Be Nice If . . .

More could cartoon like Fred "Larry" Larhman . . . our candy machine suited Jessie Reniche . . . jokes were as funny as Eugene McAllister's . . . we enjoyed carnivals like James West and Wayne Howard . . . John Kelly only kept out of the dog house . . . anyone, from Braidwood, Ill., finding John Rising's badge, would return it . . . girls knew, Samuel Mount has a 1940 Buick Convertible . . . someone repaired John Spesia's surcingle so that he can ride his fiery steed . . . Chinamen laundered neatly as Henry "Toy Bong" Kiep, Walter "No Washee" Boughton and Hugh "Hew Pew" Pemberton . . . coveralls were sold with bibs for Clyde Townsend . . . employees used the Suggestion Boxes . . . Lawrence Holtz didn't adopt James McHugh's bad habits . . . workers could afford to oversleep on Sunday—Roland Reniche can . . . G-Man, Al Weinstock would introduce his friends to "Button Nose" . . . Edward Schellhorn, Americo "Mix" Berta, William "Snuffy" Stilwell tried out for our softball team . . . you saw George Ludtke's G. I. haircut . . . the boys didn't loose Arnet Dressler's thermometers . . . can openers were available to James Busch . . . Group 61 had more distillate, Carl "Ray" Carlson uses it in the truck . . . Cigar lighters didn't scare William Smith . . . William Johnston would turn in daily reports . . . H. O. Cadwell could defeat Col. P. L. Deylitz in just one game of golf . . . you knew, Melvin Dugan bowled 268 . . . Clifford Kidney, former Wisconsin farmer, would buy a house . . . Steve Juricic's rent were $4 cheaper . . . good English instead of slang were used by Lloyd Combs . . . "gals" went for me like they do for Raymond Stevens and Gene Hambleton . . . Louis Rosenberg would walk instead of swim to the change house . . . Robert Brumbach would tell us whom he escorted to the Ordnance dance . . . Stuart Anderson wasn't afraid to drive his coupe to work . . . James Decker didn't have flat tires before arriving home . . . gardens grew as fast as the one William Biggs planted.

Group 3-A

F. G. TAMBLYN
Correspondent

Now that Robert W. Griffin has recovered from his illness, we will probably be seeing him holding up the mahogany at the "Louie."

After 18 months of seeing her husband, Dan Johnson, on Sundays only, Mrs. Johnson is moving to Wilmington to care for Dan.

Did Fred Perri and his aggregation play ball in Joliet Monday and did they get beat by the score of 44 to 9?

We hear that Robert McEvoy is trying to make the Group ball team but at the present time the quota for rookies has been filled.

It is a rumor around Building 12 that Walter (Farmer Boy) Sipe is saving his money for a trip to the altar as well as for those War Savings Bonds.

Leo Hopkins, Building 6, says that Bass Fishing was good until the season opened.

All the boys wish to extend their sympathies to Arthur Gerlich, whose wife's mother was fatally injured in an accident in Chicago.

Clyde Hart had the misfortune of running into a Model A Ford on his way home from work last week. According to Clyde, the highways are no place for a blind man.

Walter Staneck resigned to enter the Army June 24.

After 45 years of blissful bachelorhood, John Wenshell, carpenter, is entering upon the stormy sea of matrimony.

KNUDSEN TELLS NELSON would be the caption for this picture if V. L. Knudson (right), supervisor of supplies, spelled his name with an "e." More accommodating is Donald M. Nelson (left), production progress clerk in Groups 4 through 9. Winston Churchill is missing because he left EOP several months ago.

Busy Joe Pastula of Building 10 became a man June 25. Happy birthday, Joe.

The brilliant mind of our machinist, Alonzo Buell, has clicked again. The stenciling machine "Red" made and maintains is just the thing for Crawford Kerr to "Keep 'em Rolling." Is your inspiration blonde or brunette, Red?

Did George Costello, Jr., really have a tooth extracted or did Mrs. Costello have something to do with his swollen jaw. Junior's troubles seem to be running from one end to the other.

Personnel

LEE R. REYNOLDS
Correspondent

A new face with a *high* forehead is seen in the reference room now since Donald W. Peters has taken charge.

William R. Wallin, interviewer, resigned June 19, finally succumbing to the tire situation.

Annabelle Hancock changed her name to Mrs. William Rick June 12 in St. Louis.

A rehearsal by the group which will present "H.M.S. Pinafore" was held June 25 in the Recreation Building. All were pleased with the success of the Choral group, which included some new voices. Anyone interested is invited to attend one of the next meetings, 1307 W. Jefferson st., Joliet, at the home of the director, Arthur Eneix.

C. M. Steed enjoyed a trip through all the departments where women are employed. She was an escort for a *Chicago Tribune* reporter. Both girls were escorted by J. T. Haigh of the War Department and the story in the "Trib" of Sunday, June 21, was a "dandy."

PITH HELMETS like that worn here by Guard Edmond Van Winkle as he checks the badge of Chauffeur Frank Kern are now available for all plant police.

Well, Rita Scahill Cooney is not yet among the host of daily letter writers, as her husband, since April, Kenneth Cooney, was granted a 10-day furlough immediately after being accepted into the Army June 23.

Latest of the expeditions attempted by the personnel girls en masse was the invading of the inner sanctum of the genial and ever smiling guard chief, M. C. Baughman, after a recent choral club rehearsal. Routing him from his well-earned restful reading, the girls decided they might improve their minds by following the "Chief's" example.

However, the subject of his attention proved rather technical in its nature, *Real Detective* just to keep up on the newest points in law enforcement of course.

Right from the lips of June Fors comes this tip to those longing for a short vacation from the office. She doesn't recommend three-day measles — there were too many remarks heard questioning her true age.

From the pages of nine weeks ago, Evelyn Connors walked into the office a few days ago to report that she will be ready to return to work shortly. Evelyn, you know, was the victim of a serious automobile accident enroute to work from Morris April 25.

ASSISTING EACH OTHER is a strong bond between these two assistants of Comptroller John J. Cole—Richard T. Bassett (right) and George B. Pumphrey (left).

GROUP 3

WILLIAM BARRINGER
Correspondent

We have just received word that Dan Warren, our Laundry Operator, is really a "Professional Business Man." A short time ago, Dan went to see a Mr. Brown about renting an apartment for his family. Mr. Brown, after showing Dan the apartment, asked the usual questions before having him sign the lease. After having questioned to his satisfaction, Mr. Brown said to Dan: "How many children do you have?" Dan replied, "Four daughters, all in the graveyard." Dan proceeded to sign the lease. When all signing of the necessary papers was completed, the four daughters came running and jumping into the house. The enraged Mr. Brown says, "I thought you said you had four daughters, all in the graveyard." Dan replied, "I told you very plainly that I had four daughters. They have been in the graveyard all afternoon, planting flowers on their uncle's grave.

With the recent appointment of Tony Gomora as supervisor over a certain crew of men, comes the "*grapevine*" that Harry Babb is now "Cleanup Foreman" under Tony. Supt. H. D. Dougherty appointed Tony supervisor of all change houses and clean-up men in our Group last week. Ask Tony to show the card that he has been so proudly displaying.

Pet Peeves

Dial a number on the inter-plant phone system. Someone in the building called answers the ring; you ask for a certain party; they answer with "one moment, please," and let the receiver hang down by the wire. They don't find the party you want and forget to come back and tell you. The phone stays off the hook and you can't dial back until someone finally realizes that the phone must not be in use, and places it back on the hook. This may be hours later.

Walking a half mile to the Group gate from the change house and discovering that you left your badge on your uniform.

Hearing about "things to come" via the "grapevine," on Tuesday and on Wednesday, reading a notice to the opposite effect.

Not being able to find your time card in the rack at Building 10 and having to walk a mile to the timekeeper's office to certify in.

Exploded Bombs

I was told on good authority that one of our nurses, Lucille Nahas, bought a book; contents unknown. However the title was "What Every Girl Should Know." The book was a modern cook book.

When Don Mancini was taken to the hospital for a physical check, they found that they had to give him a blood transfusion before they could take his blood test.

Recently, Mr. Hillinbrant, Government Inspector at Group 3, was showing off a picture of his twins to a pal of his. The pal looked at the picture for several minutes, very critically. The proud father asked, "Well, what do you think of them?" His pal replied, "I'd keep the one on the left."

There is a certain guard named Tallman who gave a pint of blood to a friend and had to be given back a quart the next day. Now, they call him "Transfusion."

What happened to Red Arbour; did he stick his chin out?

Willard Reed, assistant superintendent, got an O.P.A. order for a new tire for his bicycle. (He got it, too.)

Proved by Photo

Ed Konstanzer, Group 3 operator, hooked this 5-foot, 18-pound gar-fish in the Kankakee River near Wilmington.

It took Ed twenty minutes to land the fish after he hooked into him. Ed says, "At first, I didn't know if I had the fish, or if the fish had me."

The Group 3 soft ball team is quickly swinging into action. Practice sessions will be held in the near future. As yet, the team has no equipment, but arrangements are being completed.

We will boast a strong team in the person of Les "Horse" Tammen as pitcher and Gus Juricic as catcher. Both of these boys have had wide experience in softball.

Group 3 also has stars such as Bob Kubinski, Reno Sartori, John Svetlecich, Walter Sak, Carl Sosnoski, Dan Carlson and plenty of others that can be counted on to help in the softball wars now going on.

Superintendent Dougherty has pledged his wholehearted support for the team and is very anxious for them to meet Group 1 and Group 2. Our diamond is being completed and our team is "raring to go" against any Group in the area.

PRODUCTION LINE INTEREST in the EOP tabloid is illustrated by this Group 3 delegation photographed as they inspected the first issue. Shown (left to right) are: Sitting, Robert Peters, Bernard Ilg and Vernon Pilz; standing, George "Sea Biscuit" Nichols, Raymond Hoffman, Andy Furdeck and Henry Skoien.

W. A. Buck Authors Third Phone Book

Issuance of the third EOP telephone directory last week marked the flowering of brow-mopping **William A. Buck,** superintendent of telephone communications, as an author. Mr. Buck's two previous issues were buds compared with the current revision.

Alphabetically the names range from **J. E. A'Hearn** to **E. Zost** in the 1127 listings, which compare with 543 in the directory of February 17, 1942, and with 166 listings in the first issue of December 27, 1941.

Mr. Buck said he spent two weeks compiling the booklet, which probably explains the pose in which he was photographed for the last issue of *The Bomb-Shell.* He describes the cover as true blue as compared with the pale green and passionate red of the earlier issues.

Transmission tests in the reception of long distance calls in the EOP exchange disclosed a 100 per cent operating efficiency.

Inert Storage

CHARLES MANN

WILLIAM DENVER

Correspondents

Charles Gorham and **Dick Ashworth** are just recovering from the new arrival at the Gorham residence. It seems as though it all happened in a hurry and "Ash" worked through two shifts without lunch or intermission. He is feeling fine again, is much stronger, looks well, and hopes these blessed events are far apart. As for "Papa" Gorham, his arm is tired from passing out cigars. . . . Papa tells us mother and baby are doing fine and his name is **Frank Gorham.**

The office staff at 27 is trying to think of some spicy stuff for *The Bomb-Shell.* **Eddie Sheridan** says the boys are dull, including **Teddy Hintz** and **George Shaw** . . . maybe they'll make good truck farmers anyhow.

Michael Mauss, our janitor, is going to put "Willie or won't He" to shame with this garden stuff if he isn't careful. Assisted by a very able helper, **George (Farmer) Shaw,** the two of them have started a victory garden of tomato plants which were donated by **Walter Peterson.**

Under the supervision of **Albert Gierich** Group 27 is forming a terrific softball team. When they schedule a game with North Inert they plan to trounce **John Wald's** bunch.

Down around South Inert we hear that **George Harrop** keeps his wife busy sewing buttons on his shirt . . . seems that they just won't stay on when he "gets-a-telling" about the big potatoes he raises.

The baseball diamond which will be somewhere between North and South Inert will soon leave the talking stage.

A. M. Lockwood and **W. B. Manchester** are considering ways and means for leveling ground and building backstops.

We Wonder If You Know:

That **Clyde (Turk) Argyle** finds room enough to ride with all the passengers he picks up from fuze and booster each night?

That **Orville Johnson** knows what raw eggs mean in his lunch?

That working at Inert we have an **Air Cadet "Casey" Zola** who is waiting for a call to be sent into action . . . completed his preliminary course in flying at Denver, Colo. . . . expects to marry and leave in two weeks.

We are sorry we must attempt to replace the following who are entering the service of our country and to whom we extend best wishes: **Earl Storm, "Hank" Hankey, Ralph Lee, Tom Scott, Tom Buberle** and **Joe Bodrero.**

That **John Wald** is trying to organize a baseball team—we understand that Group 27 is waiting for the day.

That **Tuck Gilmour** is back on the job at South after a long siege with his appendix.

That our office help—not mentioning any names — sometimes feels a little disappointed that the Inert Groups are not co-educational but **Charlie Mann,** assistant superintendent, cheers them up by telling them how much better it is for the work and working conditions.

That **Fred Ford** will go fishing any night after work or on a Sunday. So call him for arrangements.

That the baseball clubs know that **"Wally" Fang** is a good ballplayer and that he draws the lady customers?

That **Fred Peterson** and **Ray McGrath** are talking picnic for some Sunday . . . it would be allright, sez we.

That **Ray Lee,** our timekeeper, has a hard time deciding to have or not to have, a mustache.

General Offices

MAE BELLE ANDERSON

Correspondent

Letters are being received that **Lt. Walter J. Seely,** formerly supervisor of audit clerks under Charles Coburn, is kept quite busy at his new post at the Portage Ordnance Depot, Revanna, Ohio.

B. J. "Bud" Lipsey underwent an operation recently at St. Joseph's Hospital, Joliet. Bud is now at home recuperating very nicely and will soon be back on the job.

Now that **Bill Hickey** is in the Armed Forces, a reasonable facsimile of him has been acquired by the Payroll Department. Welcome to Brother Jack.

An unexpected, and uninvited, guest made his appearance in **Harrison Smith's** office early one morning last week. After studying Mr. Smith's correspondence assiduously, and inspecting each article of furniture in the office with profound interest, the visitor, no doubt becoming weary from his heavy occupation, began to hop blithely about from table to desk to chair. In spite of the fact that this unusual and vernal performance lent a "light note" to the atmosphere, nevertheless our little feathered friend was "assisted" out into the ether.

Ed Dwyer, who was one of our chauffeurs, and **Guy Brunnacci** of the Accounting Department have both been added to the armed forces. Both of these boys did a swell job here.

Helen Baker, the little girl from Dwight, Ill., and secretary to **William A. Buck,** wire chief, succeeded in squirming a vacation from him as she was going traveling with her parents. Mr. Buck, acting as Sherlock Holmes, took it for granted she was going to be marmaried, because she is very heavily engaged ? ? ? ?

We are happy to see back on the job again, **W. T. Dronsfield,** assistant chief of the Traffic Audit Division. Here's hopin' you'll soon be tip top, but take it easy as four months is a long vacation.

The Tabulating Department now has a new supervisor — **Joseph J. Beuchema.**

Arlene Schloendorf, chief mimeographer and cartoonist, took a well-earned vacation last week.

Bob Bailey, buyer, is getting to be somewhat forgetful—can't be that he is getting too air minded. One morning not so long ago he parked his car in front of the Administration Building, leaving the engine running, to clock in. Instead of returning to park the car in the proper place he got right down to business at his desk. Of course, when no one came around to claim the car in a short time, the guards drove it off to some parking space west of the building. After work that night you should have seen Bob pacing up and down the parking lot wondering where he had put it. By and by he put out a call that it must have been taken. Naturally, the guards came to the rescue and ushered Bob to the car and when they told him where it had been left—ask Bob how he felt.

The employees of the Electrical Department and their friends gave a picnic Wednesday evening, June 24, at McKinley Park. Hamburgers were fried over an open fire and everyone ate to their heart's content. Those present were **Mr. and Mrs. J. V. Wall, Agnes McCarthy, Viola Leith, George Rummel, Mr. and Mrs. Don Lewison, Harry MacRae, Martha Herrity, W. A. Buck** and **Mr. and Mrs. Gus Peterson.** Don and Harry proved their vocal qualifications, making them sure hits in the Pinafore cast, along with the help of Vi and Agnes on many tunes appropriate for the beautiful moonlight night. Mr. Buck and Mr. Wall helped out on the entertainment with some 1910 vaudeville numbers. The high spot of the evening came when Mr. Peterson made a clean leap over the fireplace and landed on Mr. Buck's foot, the propellant charge being a well-aimed marshmallow fork. Minit-Rub flowed freely the next day, but the party was such a success that they've decided they will do it again.

I. Jackson's division of the Engineering Department had a steak fry Thursday evening, June 25, at McKinley Woods, Channahon. Those present were Mr. Jackson and son **Tex Jackson, Jr., Maxine McBride, Juanita Harter, Eleanor Goss, Evelyn Greenwood, Clara Cline, Howard Cox, Bob McKeon, Michael Chuck** and **Dick Russell.** Everyone piled into cars after work and headed for the woods. There were games — baseball, keep-away, tag — the players consisting of Maxine and Howard. Juanita and Dick came late, but that was only to be expected. The Boy Scouts of the crowd kept the home fires burning, and you should have seen the cooks! All in all a grand time was had by each and every one. By the way ask Evelyn if kicking over the tracings made that awful bump on her leg.

A recent letter from **Lt. Joseph J. Reedy,** formerly assistant chief, Division of Investigation, and now of the Army Air Force stationed at Spokane, Wash., tell of his pleased surprise in having seen some EOP products "around."

Vincent Cantarella, Payroll Department, had to go through the experience of an operation at St. Joseph's, Joliet, June 25.

Elanore DuFrain, Rita Dwyer, Veranice Quade and **June Kaehlert** of the Purchasing Department helped celebrate **Jeanette Larson's** birthday June 25. After work they had a little party at Stefanich's at Joliet. You know that good chicken they have, etc., etc.

W. B. Manchester, chief of grounds, is to be congratulated on the beautiful lawns around the Administration Building. Looks very nice, Mr. Manchester, all "dem" flowers, etc. Thank you for the boquet. Was it really the first?

Geraldine Drechsel, Expediting Division, is back in harness again after having a tonsillectomy.

Emalie Mueller, Purchasing Department and **Albert Voegtle,** Group 8, hope to take *that* step sometime in September.

Evelyn Reed, formerly of the Purchasing Department, has now taken over her duties as receptionist, etc., in the Executive Offices. **Mable Danduran** resigned as receptionist to accept another position elsewhere.

Mrs. Geraldine Alman, secretary to our executive secretary, Mr. Taylor, and her hubby have been vacationing in Alabama.

Dorothy Clover Reibert of the Traffic Audit Division has taken a leave of absence from her duties.

Mayors? Yip. Included in Traffic Audit Department personnel are two mayors. **Frank Folwell** is mayor of Forrest, Ill., and **George Sangemeister** holds that position at Frankfort, Ill.

The stork has been busy visiting homes of members of the Engineering Department. **Mr. and Mrs. Max Wolfson** were presented with a daughter on Mother's Day, May 10. She will be called Deena Israla. Also, **Mr. and Mrs. Herbert Burch** received a precious package, a daughter, on Wednesday, June 10. This little one is being given the name of Holly.

Charles Coburn, auditor, spent a few days at St. Joseph's Hospital for a check-up.

Material Warehouse

FRANK McCORMACK

Correspondent

Employees of the material warehouse are well pleased with the baseball field constructed just south of the machine shop in Group 70, which is very handy for this particular group. To show **"Tiny" Cahoon** their appreciation, they are organizing a ball team under the temporary management of **Kenneth Wehling** of the warehouse office force, who has promised a team that will give plenty of competition. More power to Kenneth and the players who will be mentioned from time to time as they produce sensational plays on the field of battle. But don't forget, three strikes and you're out.

By the way, Kenneth, if you can use a good southpaw pitcher, we understand your boss, **Charlie Herbig,** beat all the sand lot teams around New York—and that is where those powerful Yankees come from.

Last week **Edward Delaney** put a $5 bill in his shirt pocket and sent

STUDYING DOSSIERS is the day-to-day routine of Personnel Director George F. Bent, who takes a keen interest in the progress of every employee added to the EOP rolls.

it to the laundry. The shirt and bill were both returned cleaned and ironed. When we asked Eddie, "What's the idea?" he said, "No one could accuse him of having tainted money in his possession."

Mr. Herbig, the man in charge of the material warehouses, his able assistant, **John Baldon**, and the rest of this department appreciate the fine and loyal cooperation from the employees in the purchasing and expediting division in recording and distributing the materials received.

Perry Bruno, one of our co-workers, has a very important job here in the warehouse. It is his job to see that all tools and stock are stenciled EOP. Last Tuesday he stamped a box and before the paint was dry, sat down on the box. Well, there was no one here with an extra pair of pants that would fit Bruno, so he went home in a barrel.

As we have all purchased War Bonds and are willing and ready to do anything and everything in our power to help win this war, it is now suggested by **Joseph Horrell**, material checker, who served with the Marines in the last World War, that a blood bank be started in the Elwood Ordnance Plant. After looking over the healthy men and women employed here, we believe that there would be plenty of pure rich blood donated. How about it?

Inspection

RICHARD LOWERY
Correspondent

We send our best wishes to **Margaret Speight**, Group 5 inspector, who was married at St. Louis, Mo., July 1 to **Frank Prindle**.

Congratulations to **Josephine Causgrove**, inspector, and **Harold Johnson**, timekeeper, on their engagement June 25th.

Louis "Pop" Walsh, Sr., has a twofold distinction. He is the eldest member of the S & P inspection department, and at the same time considered one of the most efficient in his department. We understand Mr. Walsh's latest investment in a tire pump already has proved its worth. He loaned it out to one less fortunate the other evening.

John King has been breaking the buttons off of his vest. Why? Twin boys have blessed the home of Mr. and Mrs. King. Father and sons are doing fine.

Ben Slutsky has been passing out cigars over at Group 3. Ben has a good reason as it was a baby girl.

Don't be a bit surprised if **Godfrey Herscher**, head group inspector, happens to drop in on the boys some evening by plane. Godfrey has been an aviation enthusiast and it may be a forced landing.

Billy Lamping is missing his class ring and he is not advertising it as lost, as Billy has entrusted its safe keeping to a Joliet girl, **Edith Flanders**. Can we consider it serious, Billy?

Franklin Lewis, inspector in charge of Group 1, has been seen quite frequently on the golf course. Not that he's a great golfer, but Frank enjoys a short game in the morning to give him courage to bowl at night.

Robert Wilehlmi, assistant to the Chief Inspector, was a year older, June 12. He spent a quiet evening at home with his charming wife and three children. Earlier in the day several of the members of the office force attended a party in his honor. (They brought their own lunch.)

The Inspectors baseball team at 3A is composed of the following players: **Moe Brenna**, manager; **Doug Oram**, **"Shoeless" Paul Jackson**, **"Speedy" Carroll**, **"Slim" Hallihan**, **Taylor Parsons**, **"Dutch" Bruno**, **"Pewee" Pitt**, **Joe Conant**, **Stan Smigielski**, **"Sleepy" Hlavajcik**, **Seymour Stearns**, **Bob Manning**, **Orrin Long** and **Bob Walsh**.

Bob Walsh, inspector in charge of Group 3A and star first baseman, is trying to get a priority number for a couple of Army jeeps, or a few bloodhounds for his outfielders, as opposing batters are losing too many balls.

"Shoeless" Paul Jackson, formerly of the Indiana Indians, found it quite clumsy playing ball with his shoes on. He wore them to church Sunday and reports they feel better.

"Speedy" Carroll is improving his control. He only threw eight balls over the backstop at last practice. In a couple of years he'll be able to hit a bride with a handful of rice.

Manager Moe Brennan is seeking to book games, especially with Fuse and Booster groups, or any lightweight team more than 80 years old.

Before starting on a trip out West, **J. Beam's** daughter, now living in Mason City, Ill., accompanied by her mother stopped at Joliet to visit Mr. Beam. This brief get-together left him in a pretty good mood. We hope they return soon.

Harvey Watkins has been nominated for County Clerk in Will County. Your fellow inspectors are all with you, Harvey.

The inspectors in Group 3A want to know if **"Tiny" Cahoon's** typist committed an error when she put "Champion" after **Bob Walsh's** name. They believe that the golf crown was donated by the Walsh family.

E. F. Booth, former superintendent of schools in Will County, is a top inspector in Group 3A.

E. A. Korevac, inspector at Group 61 and First-Aid instructor, administered expert treatment to a fainting visitor at the Administration Building last week.

Columnist James Glade, shift inspector at Group 61, was ill for a week, but is back at work.

Elmer Nesius, head inspector at Group 7, has lost several pounds in the past week trying to locate the Guard House. The Department has decided to furnish Elmer with a scooter.

Harold Troupe said he would have me kicked to death by butterflies if I wrote anything about him. Troupe, gage technician, has been playing a little ball on the plant diamond. It seems that Harold is a second Babe Ruth.

BUDGETS, BONDS, BILLIONS are all in the domain of hard-working Comptroller John J. Cole, shown here with his secretary, Hazel Gleason, who has only a few million details in her domain.

Bud Brown has taken over the duties of **Andrew O. Fox** as office manager of this department. Mr. Brown is a former salesman for the Wilson Sporting Goods Company. He has installed a radio beam in the supply case. It seems that he is worried someone will borrow something.

Edward Jilek, former inspector at Group 2, has again started furnishing his department with inventions to increase production. Because of men like Jilek, we are sure that EOP will do better than its part in our battle for victory.

Bill Hammond, inspector at Group 61, will be a valuable man on the Inspection Department baseball team. Bill is a former professional player.

Jack Fay, Group 4, has decided to take up the fine art of self-defense. Jack might become a lightweight flash in the cream-puff meet at Podunk.

A. J. MacLellan, chief inspector, has won the love of our family of puppies at Richards' Farm. The other day he had their home sprayed with flit. The fireman at Building 4 said he would call one of the young ones after Mr. MacLellan.

Last Wednesday evening the head inspector and shift inspectors of Groups 4 through 9 had a dinner at Nortons' on the DuPage. The inspectors reported they all had a good time, including Mr. Rouff of Group 61 and **William Hartman**, senior inspector, who were found under the table.

Tony Lutkus, scale inspector for the area, has had a little trouble with his legs these past few days. It seems that he has indulged in the night baseball games on the new Administration diamond. Lutkus was a member of the C.Y.O. baseball team of Cicero.

Sammy Hoffman, scale inspector at Group 3, told Mr. Fox that he could shoot a 73 on any course in Ottawa. Mr. Fox bought several garden tools, maybe he intends to call Hoffman's claim.

Our assistant chief inspector, **Robert Wilhelmi**, has taken up cooking. His wife is planning on taking a vacation East in a few weeks. Bob said that he would have all his friends over when he succeeds in his new endeavor.

Mr. Rouff has been putting around the green lately—I wonder whether this information we gathered is applicable to his golf game?

Rube "Casanova" Derksen is weathering the next thing to conjugal felicity.—Yes, the long lad is in love!

Asst. Supt. H. O. Cadwell suggests a 500 yard tee, fairway and green, between buildings; especially since Number 6 has increased the distance of his meanderings—My advice is either do your driving in the yellow-cab, or get a caddy, Caddy!

They all laughed when he sat on the bench (not beside a piano, either!); so the pride of Washington U. (**Ed Rashid** to those who don't know him) ambles out of the EOP shindig, sans skirt, with the threat, "I'll go to fuse and booster."—"He who laughs last, laughs best," but when Ed?—or is it a military secret?

Amongst the long line of photogenic philosophers and platonic plutocrats, I am reminded that **John "Snuffy" Smith** (this character purely not fictional) has been indulging in oral-gymnastics on his fingernails—REASON: **Jimmy A. "Adonis" Glade** had tonsillitis and his absence gave "Snuffy" the D T's plus a lot of additional figures to work on. (No women in this group yet, so keep your minds on nitrate, folks!)

Ed Korevack still wonders whether the Brooklyn Dodgers are draft-evaders.

Timekeeping

MILTON TREITEL
Correspondent

Barney McShane recently received a card from **Pvt. Joe Malloy**, a former timekeeper. While Joe was with us he seemed to be entranced by Mac's accent, and in regards to that I quote "Here I am in N. Y. awaiting further orders, believe it or not, Mac, everyone here talks just like you."

For a long time this department wondered why **Ben (Tiny) Sloan** could always get his gangs to give him their numbers at the first asking. The reason is now obvious, Ben is a former professional "rassler." **Dick Bassett**, assistant comptroller, and I have a hand ball duel every Saturday afternoon. It's pretty tiresome taking a beating week after week, so as a compromise to myself he and I will take on any two players at the Y.M.C.A. in Joliet.

It has been rumored that **Carl Parker** of Group 1 is now married, but up until time of publication this has not been confirmed. Wanna talk, Carl?

Mr. and Mrs. Nicholas Eartly announce the arrival of a son. Good work Nick, our record is still intact.

Judy Smith of Richards' Farm is wearing U.S.A. Wings on her coat lapel. Sorry fellows they belong to her hubby.

Bob Hastings of Group 70 is leaving us this week to join Uncle Sam's armed forces. Loads of luck and best wishes from all of us.

Mayor George Sangmeister of Frankfort who is one of **J. C. Schmeh's** equipment checkers is a candidate for probate clerk in this coming election. With his host of friends here it ought to be a walk away for George.

"Chuck" Di Peso of Group 66 really missed his calling. Stop at his time office any day around noon and that aroma of spaghetti and meat balls will make your mouth water.

It's a pleasure to welcome back **Bob Griffin** of Group 3A. He just got through a long siege at the hospital.

The boys around town are a bit peeved at me for scheduling their girl friends to work on Sunday. (It's tough to bring them home early Saturday night.)

Jerry Walsh of Richards' Farm has resigned to accept a position with Chicago Bridge and Iron Company. We will all miss you, Jerry, but you have our best wishes. The boys at Richards' Farm are all sprouting mustaches (are you jealous of the boss?)

The school kids in town will be pleased to hear that we have hired six of their teachers. You never can tell, there may be a shortage this fall.

Carl (Ed) Swanson of Group 70 is one classy golfer. He shoots in the low 70's. (**"Tiny" Cahoon**, please take notice.)

What's in a Name

John O'Connell would raise **Kane** if his timekeepers were found reclining in a **Couch** or **Morris** chair during business hours, when they were supposed to be checking the **East** and **West** gates for the **Dames** that get to the plant before the **Rising** of the sun. You **Treitel** him that **Goodspeed** in making a physical check is not important, a **Sharpe** look will make your rosy cheeks turn **White**. But with all that, even a **Duke**, **Bishop**, **Baron** and a **Pope** all enjoy working for him. He has a big **Harte** for those that purchase a war **Bond**; but **Smalt** use for those who **Lien** against a **Barr** filled to the **Brimm** when they are scheduled to work on Sunday. Even the **Mayer** and the **Powers** that be would be **Stern** if you were found saying **Skole** all evening. Trying to kid **O'Connell** is like looking for **Needles** in a hay stack or **Spier** a fish with a pin. As **McShane** would say, **Aman**.

Group 1

JACK BARRY
Correspondent

John Buffo, Building 13, left June 13 to join the Army.

There is something about Building 14 that keeps the boys over there on their toes. You can tell them in a crowd by their neatly slicked hair and by the fact that they are always well-groomed. . . .

Add a fish story about our Miss Lundeen at the first-aid station. On a recent Sunday she was a member of a fishing party at Pistakee Bay in the Fox Lake region. The fish got away with hook, line and sinker, dragging the tackle through the rushes in a most surprising fashion. Finally it succeeded in tying the line to the roots of a large tree, took a running start and broke loose. Oh yes, Miss Lundeen got away.

And **Myron Kegebein** showed up at work with a colored or rather discolored eye, the rainbow tints of which rivaled Joseph's coat of many colors. There was nothing particularly original about how it happened. Just the same old bathroom door.

The boxing wars bid fair to wax hot and hotter. In all sincerity your reporter announced that **Bob Winchell** won the EOP boxing cup at the picnic last Fourth of July. Now comes one **"Pee Wee" Stukel** with the claim that he won the match from Winchell together with the official cup and that the cup which was awarded to Winchell was an extra one thrown in by way of consolation. At all events they are both fine lads with the spirit of competition strong within them and we would like to see them mix once more so that the winner could have both cups and undisputed claim to the EOP bantam-weight championship.

And then we give you **Jack Whittinghill**, Building 13, who challenges any 170-pounder at the plant to a game of fisticuffs for the honor of Group 1. . . .

(Turn to Next Page)

SCREWBALL SAY SOME, but delightful individuality say others. Anyway, here is Stewart Moloney, correspondent for the Fire Department, talking to himself in a frightening sort of way.

STEPPING ALONG back to the job after lunch was this aggregation of Group 3 workers when the photographer appeared on the scene in response to Supt. H. D. Dougherty's request for pictorial representation in THE BOMB-SHELL.

Group 1—*Continued*

to a game of fisticuffs for the honor of Group 1. . . .

Edward Inman, Building 13, is the proud father of a brand new seven-pound daughter. The name is Barbara and the line forms on the left. . . .

It has come to our attention that **"Skeets" Whiteman** is going to get married next week. The spirit of war is in the air; and youth must be forever taking chances.

And they say that **Merle Geves** will be a bride by the time this issue appears—more power to Merle and we hope she didn't let him get away.

Lo and behold, a testimonial. "We would like to thank the officials of the plant, the managing editor and staff of the paper for making it possible to have a paper. We think it's great and are glad to be able to be a part of the paper and of the Sanderson and Porter organization. We'll string along with you." So speak the girls in Building 14.

At Last We Lose

Group 1 lost a softball game to Group 8 June 19 by the close score of 9 to 3. That is, it would have been a close score if they would throw out the five runs they made in our bad inning. However the game had its compensations. We brought a glamor girl along with us to pitch the first two innings and believe men, boys and girls, she had everything. **Betty Ford,** Building 14, is a real ball player as well as being as cute a gal as you would care to meet. We took Betty out after the first two innings and maybe that's why we lost. Group 8 had something new in the way of a shoeless ball player and he was a whole team by himself. We did bring along an enthusiastic crowd of rooters and a good time was had by all.

Leo Hoffman, formerly inspector in Building 16, left to join the Army. Leo wants good ammunition and promises to deliver it where it will have the greatest effect.

Utilities

HELEN SHIMEK
Correspondent

Clyde Utley, superintendent of the Electric Department, has had more worries heaped upon him besides kilowatts. First, it was weeds in his garden. He overcame that worry by deciding to let them grow and then eat them as outlined in an article in *The Saturday Evening Post.* But now it's "Bees." "Bees" in the switches, "Bees" in the transformers, "Bees" wherever he goes! But now things have reached their limit — a family of "Bees" have taken up residence under his bedroom window! Now when Mr. Utley talks about "Sons-of-Bees," he's talking about insects!

J. W. Stark, superintendent, Water Department, attended the annual convention of the American Water Works Association at the Stevens Hotel, Chicago, June 23 and 24.

Tony Moss, roundhouse foreman, walks around with white oxfords. It must be a clean place to work, eh Tony?

Harvey Disney is leaving for a short visit with his family July 10. His son is to be married July 18.

The old standby, **Charlie Boyle,** has returned to work after a short vacation.

Speaking of golf, **Larry Jack,** Radio Department, wasn't kidding when he said "Oh, I've played a little." We're afraid that **Barney Johnson** and **Gus Hahn** were kidding, however, when they said that they just let him win to make him feel good. Larry came through with smiling colors and is he giving us the teeth?

John Milligan is back with us after a short honeymoon over the week end. John center-aisled it June 20.

To **Donald Lehndorf** vacationing somewhere in Wisconsin. Don't forget those big ones you promised the gang.

Congratulations to **David C. Kreider** on his marriage to **Mary Ruth Daley** June 27.

Ken Morgan and **Frank Camer** claim the horseshoe pitching championship of the roundhouse after beating **Connie Howard** and **Alex Dulcis.**

Flash! It has been reliably reported that **Chief W. R. Mortenson's** "dream girl" has finally left him for good. The happy couple apparently had a spat during the week and "Vixy" gave him one dirty look and departed for the north woods. A few days later she was found wandering around one of the magazine areas with a lost expression on her face and was induced to return to Mort's fireside. However, the reconciliation was of short duration as she left again and vowed never again to darken his doorstep. The moral of this, Mort, "Never have anything to do with anyone foxier than yourself."

It is generally known that dapper **Sergeant Red McLaughlin,** Guard Department, becomes noticeably agitated whenever "H.M.S. Pinafore" is mentioned.

I'm wondering if some members of the Radio Communications Department didn't miss their calling? That's really a sweet job of landscaping.

The welcome sign goes out to **Mrs. Alma Mattox, Mrs. Mary Frances Scully** and **Mrs. Helen Louise Sime** who recently joined the family of operators at the Telephone Building.

Mystery of the Pipe Shop! What has become of **Calvin Ashline's** uppers ? ?

The **I. C. Harbours** announce the arrival of **Frederick Celestin Harbour** June 3. Papa Harbour is doing well, we hope!

"Keep 'em rolling!" That's the motto adopted by the garage force and according to **C. I. Wilson,** garage manager, the boys certainly do try to adhere to it.

Production Record Permits Holiday

Progress in maintaining production schedules made it possible for most EOP employees to plan a holiday for the Fourth of July. Because of the excellent record made in meeting Government requirements all but the construction forces, those workers needed for preservation and protection of the plant and a skeleton maintenance crew were given the day.

Groups 4-9

Fuze-Booster-Primer and Detonator Lines

JUANITA HARTER
Correspondent

The month of June did all right by two former members of **Superintendent T. M. Burn's** office. "Ginny" Dempsey is now Mrs. Kenneth Cramer. The wedding date was June 18.

Another wedding of double interest to the Groups 4 through 9 took place June 20 when the former **Helen Hensel** exchanged marriage vows with **Charles "Chuck" Hickok, Jr.,** assistant superintendent of Detonator Group 9.

"Red" Pickett is sure a favorite with the inspectors.

Louise Grabin, inspector, who underwent a major operation in St. Joseph's Hospital, Joliet, is improving nicely.

Why is **Ikey Liker** so happy? Is it because he will soon have the bandages removed from his injured thumb? Or is it something else ? ? ? ? ?

Talk about a coincidence, at the Primer Inspection table there are seated two **Thelma Smiths.**

And do you know that **Nora Lee Smith** and **Thelma Smith** (no relation) have the cutest singing voices? They really are good.

We hear **Julia Chapla** has gained plenty of pounds since working here.

Dorothy Lehman of Fairbury, office girl in 8-8, is our personality girl. Isn't that right, boys?

Rita Rittoff finally bought the record "Twiddle-o-Twill."

The new "he" floor lady over the liner table is none other than the middle-aged and handsome **"Hoiman" McCormick.**

Sympathy is extended to **Lucille Wynn** in the recent loss of her husband.

The War Bond raffled by the soft ball team was won by **Mrs. Mae Johnson,** forelady, Bay T, Group 9. The other bond was won by **Ira Combs,** timekeeper.

Group 9's Soft Ball team is coming along, but not very well. We haven't won one game yet. Maybe we *should* let **John Neely** play.

Sports

The Group 8 Softball Team, "Walker Sports," opened their season June 16 with a victory over Group 7, winning by the score of 22 to 2. Liker, Steen, and Cheyne did the slugging and the latter hit a long home run, receiving a big hand from the crowd.

The Walker Sports trounced Group 1, 9 to 3, June 18, in a fast and thrilling game at **Walker Stadium,** one of the best softball diamonds in the area. **"Shoeless" Cheyne** of the Sports copped honors for the day while **Betty Ford,** girl chucker, made her debut by pitching the first inning for Group 1.

Group 8 defeated the strong Group 4 team, 3 to 1, June 23. The fast game was a pitchers duel, Plowman holding the edge. Sessi of Group 4 and Hinds and Petan of Group 8 shared the hitting honors.

The newly organized girls' softball team of Group 8 lost their first game June 22 to Group 7, on the Group 7 diamond. They will be challenging other girls' teams in the near future.

Leser Family Is All-Out for War

"Keep 'em shooting" is more than a phrase to **Mrs. Christine Leser,** an inspector at Group 8. For her it means doing all she can to keep her own sons shooting. Two sons are now in the Army and another registered for selective service this week.

One son, **Henry,** has been commissioned a second lieutenant in the Field Artillery, Camp Swift, Texas. He visited his mother recently. Henry is a former EOP employee, having worked on the first telephone communication installed in the area.

Another son, **George,** who has been in the Army but three months, is in an officers' training school at Fort Monmouth, New Jersey. A third son, **Leo,** 19 years old, registered for selective service this week.

Plan Outlined by Somervell Followed

(Continued from Page 1)

plans for construction. General Somervell made a clear statement of what was expected of the responsible executives of both the Army and Sanderson & Porter. This statement has been the guiding light for the conduct of the construction work at Elwood, and accounts for the proud record which was made.

General Somervell knows construction and construction men. He is a born engineer and a driver, but he combines with these attributes, the ability to select capable subordinates, to inspire confidence and to stimulate an intense desire in all with whom he comes in contact, to meet and even excel his expectations.

Elwood Ordnance Plant people are proud of General Somervell, proud that he should take time to send them a message, proud of their association with him, proud of his interest in this plant, and proud of the work which he is doing for our country. *We can and we will* respond to his inspiring message in the only way we know how to respond—production of large quantities of *the best ammunition* fighting men could wish!

Career Is Sketched

Lieutenant General Brehon Burke Somervell was born at Little Rock, Arkansas, May 9, 1892. Appointed to the Military Academy at West Point in 1910, he was graduated in 1914 and commissioned as a second lieutenant of Engineers.

Following his graduation, General Somervell saw service in Mexico, France and Germany. He was in France in 1914, served as Assistant Military Attache and helped in the exodus of Americans desiring to return home at the outbreak of the war.

On his return to the United States, he was assigned to the First Battalion, Engineers, at Washington, spent some time mapping parts of New England and was then ordered to Texas, where he was engaged in mapping the border when the raid of Pancho Villa sent **General Pershing** into Mexico on the punitive expedition. General Somervell accompanied him and was in charge of construction of a number of Army roads.

After a tour of duty as Assistant to the District Engineer at Pittsburgh, Pa., in 1917 he helped organize and recruit the 5th Reserve Engineers (later the 15th Engineers, U. S. Railway) with whom he went to France as Adjutant. This was the first Engineer regiment to land in France. General Somervell was in charge of a number of construction projects, including the great munitions dump at Mehunsur-Yevre and the advance depot at Is-sur-Tille.

Accompanied Hines

After serving as Assistant Chief of Staff, 89th Division, during which he participated in the Meuse - Argonne Offensive, he served with the Supply Division, Third Army in 1919, and was Assistant Chief of Staff, Supply Division, Army of Occupation, Germany, until September, 1920, when he returned to the United States.

In 1925 General Somervell was granted leave of absence in order to accompany **Walter D. Hines,** director of railways in the World War, to Europe, where he made a survey of navigation conditions in the Rhine and Danube Rivers for the League of Nations.

Assigned to duty as District Engineer at Ocala, Florida, in 1936, he was in charge of the Florida Ship Canal Construction. While engaged on this project, he directed salvage work and aid in the rebuilding of Gainesville, Ga., which was wrecked by a hurricane April 6, 1936.

On August 1, 1936, General Somervell was given leave of absence from the army to accept the appointment of Administrator of the W.P.A. in New York City and attracted nationwide attention for the manner in which he administered, to the satisfaction of all concerned, one of the most complicated and difficult assignments ever given an engineer. During his administration La Guardia airport was built and New York City's park system was expanded to its present gigantic size. General Somervell remained at that post until he was recalled to Washington late in 1940, assigned to the Inspector General's Office and then to that of the Quartermaster General where, on December 11, 1940, he was placed in charge of the Construction Division, which has charge of the construction program then being undertaken by the War Department. The post had been made vacant through the illness of **Brigadier General Charles D. Hartman.** On March 3, 1942, General Somervell was given command of the Services of Supply in President Roosevelt's Re-organized Army Unit.

General Somervell has been decorated twice, receiving the Distinguished Service Cross and the Distinguished Service Medal. He is a graduate of the Engineers School of Washington, D. C. (1922), The Command and General Staff School, Fort Leavenworth, Kansas (1923), and The Army War College, Washington, D. C. (1926).

REAL SMOKE-EATERS are the members of the Fire Department, shown here extinguishing the flames from a burning "jaloppy" used for training purposes. Chief R. W. Mortensen is shown in his shirt sleeves and Assistant Chief William Reichert may be seen at the far right.

HUDDLES ARE NECESSARY in sports, and softball is no exception as this picture of an early conference of EOP enthusiasts indicates. Shown (left to right) are: First row: Bob Kubinski, Group 3; Tiny Cahoon, recreation director; Louis Haake, Group 70; John Svetlecik, Group 3, and Fred Perri, Group 3A; second row: Bob Plese, Group 64; Gus Salmen, Group 66; Capt. George A. Grant, War Department; Wally Sacks, guard; Ray Matasvich, Group 64; Larry Peterson, Administration; Lt. F. G. Kuether, War Department, and Bill Green, Group 66.

Plant Nine Will Open Season Against Wilmington Team Sunday

Playing Field for Home Games Ready As Wehrle Works Squad of 50

Frank Wehrle, Group 64, coach and manager of the EOP baseball nine will select a team from his squad of 50 for the opening game in Wilmington Sunday. Date of the first home game will be announced later.

The playing field located just north of the cafeteria in the Administration area is ready. There are bleachers for the spectators and the squad of 50 men who have tried out for positions is rapidly rounding into shape under the watchful eye of Coach Wehrle.

Frank is a baseball enthusiast as well as a baseball library. If you know of anyone past the age of six who can hit the ball out of the infield you can talk to Frank because he more than likely knows him, too.

Frank's enthusiam and work with the baseball team warrants more than a mild interest in the team by EOP employees. Give him your moral support and he will develop a "barn burner."

The following are members of the baseball squad: Pitchers; **Harland Waller**, guard; **Bob Moren**, Group 1; **Don Cheyne**, timekeeper; **Bill Waller**, guard; **Reno Sartori**, Group 3; **Jim Vickery**, guard; **Joe Wehrle**, Elect. Farm; **Wallace Muelder**, Group 6A; **Henry Pombert**, Group 70 (Pipe shop); **Thomas Dunn**, Group 1; **Doug Yeates**, Group 6A; **Roy Hallihan**, Group 3; **Bob Merrit**, Group 1; **Oliver W. Brown**, Group 3; and **John Svetlecich**, Group 3.

Catchers: **Ted Steger**, Group 3; **Lorias Hart**, Central Fire Station; and **A. Shutten**, Engineers.

1st Base: **Lloyd Ogg**, guard; **Gordon Enger**, Engineers; and **Marvin Beeley**, Group 1. 2nd Base: **Tony Castignoli**, Group 64; and **Carl Hietschold**, Richards' Farm.

Infielders: **Harold Troupe**, Richards' Farm; **John Steagall**, Group 2; **Al Sommerfield**, Group 1; **Joe Harkins**, Group 70; **George Price**, Telephone Dept.; **Gus Olsen**, Richards' Farm; **Henry Hyde**, Group 64; **Don Bryant**, Group 1; and **Jack Horenberger**, Engineers.

Short Stop: **Ed Cussinger**, Group 1. Outfielders: **Bob White**, Elec. Farm; **George Macuk**, Group 64; **Edward Shepley**, Group 1; **John Brewer**; and **Ed. Mandat**, Group 60.

Playing position not assigned: **Aug Juricic**, Group 3; **Bob Plese**, **William Hammond** and **William Petan**, Group 61; **Hendy Galbraith**, Section Crew; **Steve Jeresic** and **John Leake**, Group 61; **Clifford Hare**, Group 1; **R. J. Partridge**, Group 6 and 7; **Russ Stevens**, Group 70; **Capt. G. A. Grant**, Army; and **Al Hessely**, Group 2.

"I've been framed!"

Inspectors Are Made That Way, Not Born

By Edward A. Schroeder

The Inspector is made, not born. He is an individual capable of good judgment and common sense. He must have the confidence of all employees, so that when a different situation arises, he can cope with it on a firm but friendly basis. He knows the importance of his duties. He carries out his instructions and orders with the utmost intelligence. He is an important cog on any production line.

The duties of the Inspector vary. He is placed in the various buildings along the line, generally for a short stay in each building. It is his job to see that a hundred per cent inspection is carried out on each piece of material used. By his foresight money, time and labor are saved. Helpful suggestions are given by the Inspectors in numerous instances, as to production methods and safety control. The Inspectors are working men—not little tin gods.

The Inspector should be well informed in the elements of good workmanship; understanding the problems of the production men and the engineers. It is his duty to help keep the production lines moving.

He must at all times be resourceful and diplomatic, earning and holding the respect of fellow workers, employers and customers. Sound principles, firmness in the face of opposition, especially where questions of safety are involved, and a willingness to work in co-operation with others, are the essential characters of a good Inspector.

FUN

You Can't Beat It!

By "TINY" CAHOON

People do not stop playing because they grow old; they grow old because they stop playing.

Here lies Failure,
He lost his health
Getting wealth,
Then lost his wealth
Seeking health.
He now lies dead
In a pauper's grave.

Now then, I'm looking for a piccolo player or two. We need them for the concert band. And where are all those band enthusiasts? I have had a lot of requests for a band and sent out a bulletin asking for players. What do I get? A few for a concert band and a lot of requests for a swing band (Guess I'll have to swing for that.) If you are interested in a concert band, let me know and we'll get started.

By the way, the grapevine carried the breezy bit of news that some guy said that the recreation director was being paid $10,000 a year. It's the first time I heard there was another recreation director out here. I want to meet him because it sounds good. Umum, that would buy lots of Bonds.

Your Recreation Department is already well underway. Fifteen softball fields laid out in close proximity to various departments of plant operations have already heard the battle cry of the victor and the "you can't do it again" of the loser.

Lou Haake, pitcher for Group 70-5, chalked up 18 strike-outs in a game against Group 6. **John Kubinski**, manager of the EOP softball team, is all smiles because Lou is one of his star pitchers. **T. M. Burns**, Superintendent of Groups 4 through 9, has his area completely organized with a league for both the boys and the girls.

Here's a tip for you singers. **George Bent**, yes the head of the Personnel Department and an enthusiastic singer, has been trying to get a group together for the presentation of Pinafore. You're right, it won't hurt your standing any to give it a try. Let's make this a surprise. You call in and I will tell you when and where the next practice will be held. It will be like a vacation for George or a tonic or a slug of . . . wait a minute. What am I saying?

Several people have asked how they can take part or how they may get into the inner circle. There is no such circle. Just head in and when you hear someone say "Howdy" I hope it's I. Of course, everyone in the Recreation Department says that. **Jim Grady**, genial Shamrock lover booms out "Howdy" with a smile that sets you for the day. By the way, Jim is doing a lot of leg work for me so be nice to him youse guys and youse gals.

Earl Carpenter, of the Guard Department, has "The Bomb-Shell Revue" rapidly taking shape. He would like to have you contact me if you can do anything at all in dramatics, sing, play an instrument or do any specialty act.

Lucy Harkness, in a "letter to the Editor," asked what might happen to **Helen McGinnis** if I dropped that shell and if I did throw it she hoped our "Andy" ducks. Well, at the moment that picture was taken my elbow had locked from holding the shell so long. Mr. Bailey thought I should practice the pose so as to assume a more composed stance. He will never get me to do that with a piano because I refuse to practice.

When you have a few minutes to spare and want to hear something funny, stop at the baseball field while **Frank Wehrle** is working the boys out, including such fellows as **Joe Salmon**, superintendent of Group 1, and **Ed Walsh**, superintendent of the loading lines.

Talent Try-Outs Are Being Held For "The Bomb-Shell Revue"

Galaxy of EOP Stars to Be Presented on Stage In Mammoth Vaudeville Show in August

"CAMERA," yells L. D. Ross, Personnel Department photographer, as he snaps June Morgan's picture in his office.

Approximately 100 men and women have already volunteered to take part in "The Bomb-Shell Revue," the entertainment highlight of the year to be staged in the Recreation Building early in August.

The complete cast will include nearly 300, participating in more than twenty acts of vaudeville as well as a mammoth minstrel, with a chorus of fifty. Try-outs are now being held and all are invited to participate.

The show will feature production numbers, beautiful girls, comedy teams, dance teams, variety acts and many others including a well rehearsed pit band of more than ten pieces and a melodic cocktail lounge combo for a night club scene. Also included will be a scene, "The Ol' Village Barn Loft," during which the audience will be treated to a fast sailing trip to the barn dance with all the trimmings made popular by radio.

Those interested in taking part are asked to call or visit the Recreation Department.

Earl Carpenter, ace director for seven years with John B. Rogers Producing Co., world's largest stagers of amateur theatricals and spectacles, will produce and direct the show. Mr. Carpenter is a member of the Guards Department.

Final Touches On Softball Field Rushed

John Kusinski Busy Selecting Company Team

The playing field located just North of the Recreation Building in the Administration Area will be completed within a few days. The back stop and suitable bleachers are in place, but some work still remains to be done on the diamond. An auxiliary field will also be ready for use just across the road and North of the regular field.

The softball team is under the direction and coaching of **John Kusinski**, an inspector from Group 3. Johnny has only recently taken over these duties, but he got away to a fast start and has the team definitely in a winning mood. They are on their toes and Johnny keeps them there.

Johnny is a graduate of the University of Illinois, starring in football and baseball. He has had a wide and varied experience as manager and coach, but above all he has personality.

Johnny reports that his material is the best he ever had to work with, even though he still does not know all their possibilities. However, reputations from past performances generally speak for themselves and these boys have proven themselves to be some of the best softball players in the State.

Last week **Lou Haake**, one of the pitchers on the squad, had 18 strikeouts in a game against Group 6, and Group 6 has a fine team.

Listed below are the men now practicing. Other prospects are invited to communicate with the Recreation Department.

Pitchers: **Ed Washburn**, **Les Tamman** and **Haake**, of Group 70.

Catchers: **Mario Zinani**, guard, and **Wally Peterson**, Group 60.

1st base, **Reno Sartori**, Group 3; 2nd base, **John Sevetlecich**, Group 3; Short Stop, **Wally Sack**, guard; 3rd base, **Bob Plese**, Group 61; S.C.F., **R. Matesevac**, Group 66; S.C.F., **A. Dunne**, Group 1; L.F., **Bob Kubinski**, Group 3; C.F., **Mike Dubetz**, Group 1; R.F., **Les Tamman**, guard; and R.F., **Fred Perri**, Group 3A.

Group 4-9 Leagues

Group leagues have swung into action now that the softball fields have been completed. Out in the Fuse and Booster Area eight teams are battling. Enthusiasm is rampant among the various groups and all of this enthusiasm is directly traceable to the General Superintendent of Groups 4 through 9, **T. M. Burns**, who, by the way, is very much interested in everything his people do.

Under the set-up there, Mr. Burns is the commissioner, the group superintendents are in direct charge of their various groups, with team managers running the teams. **Supt. John Lower** is in charge of Groups 4 and 5. **Jim Ross** is manager of Group 4 and **Elliott** is manager of Group 5. **Supt. James Truka** is in charge of Groups 6 and 7, with **Art Jenson** as manager of 6 and **Bob Partridge** of 7. **Johnny Walker** is superintendent of Group 8 and his managers are **Earl Olson** and **William Petain**. **William Whaley** is superintendent of Group 9 and he has two managers, **Bill Partridge** and **Del Millican**. Then there is **S. J. Jacobs**, a divisional head in the groups. His manager is **Joseph Ralston**. **Charles Harris**, bus dispatcher, and **Seveno "Sweeny" Leggro** head a team for the bus drivers.

Load Lines, Igloos

This league is made up for the most part of the Load Line groups. At Group 1, **Joseph Salmon** is superintendent and his managers are **Mid Slack** and **Fred Harris** both of the Inspection Department. **James J. Murphy**, superintendent Group 2, has a team called "Murphy's Boys" and his managers are **Asst. Supt. Jean Hunt** and **Bill Galbraith**. This group has already played a number of games and expects to be in the running for the Plant championship. **Henry D. Dougherty**, Group 3 superintendent, has the makings of another fine team, since three players from the representative EOP team work there, **Bob Kusinski**, **John Svetlecick** and **Rino Satori**. **Supt. J. J. Fitzpatrick**, Group 3A, has one of the best playing fields in the league. The team is managed by **Fred Perri**, who also plays on the EOP team.

The Road Crew has **Irving "Red" Harbour** in charge and he reports a fine aggregation ready to go. In Group 70, **Gen. Supt. A. M. Lockwood** has **Paul Becker** as manager and this group will without a doubt be hard to beat. They have the EOP battery out there, Haake and Washburn. **Supt. St. Elmo "Kansas" Stewart** has **Gustav Salmen** as manager and they have some fine talent to work with at 66. **Supt. Frank Wehrle** is at Group 64 and he has **Lawrence Papst** as manager. They all don't play baseball out there even if Frank is the horsehide coach.

ELWOOD ON PARADE

COATS FOR BOMBS are applied in the Paint Shop of Group 3 where this scene was taken. They have to be dressed up for where they are going. At least, the men who act as tailors to the packages of TNT hope they are preparing them for informal calls on certain royalty as well as an ex-painter. Shown here left to right are: L. A. Walsh, Steve Gonda, Harvey L. Watkins, Herman Winkler, Kenneth Fendrick, William Kautz, foreman, and Fred Dvorak.

BIRTHDAY IN HOSPITAL was made more interesting for Junius Keith Chapman of Group 2 when he was presented with a portable radio by W. E. Canniff, EOP manager of operations, in behalf of Sanderson & Porter. The gift commemorated Junius' 21st anniversary. Three attractive nurses, Marjorie Hartong, Marie Ulrich and Helen Mueller, are shown, left to right, with the principals.

PERSONAGES at the Ordnance Department dance June 13 are shown at the left. In the center are Lt. Col. Don M. Hoffman, Comptroller John J. Cole, the orchestra and Mr. and Mrs. J. E. Olson. Find yourself in the other scenes. The photos were made by Don Ennis, Utilities Department.

Patterson on KP Duty When Call Received

Under Secretary of War Praises Elwood Workers

By Harrison Smith

Judge Robert Porter Patterson, who occupies the all important position of Under Secretary of War, was recalled to the service of his country as Assistant Secretary of War to aid in defense preparations. At the time of his call Judge Patterson was Judge of the Circuit Court of Appeals, Second District, second only to the U. S. Supreme Court as the highest court in the land.

When called back into service Judge Patterson was on vacation from his judicial duties and was taking advantage of the opportunity afforded him, to enter the Business and Professional Men's training camp in Plattsburg, N. Y. Here, as a private, he was, at the moment of the call, doing kitchen police duty. Judge Patterson had no reason for entering this training camp other than—"In order that I might be useful in case of an emergency, and feeling I was out-of-date, wanted to get up-to-date information on army service." This characteristic of Judge Patterson, of wishing to be useful and up-to-date, was no doubt well known to **President Franklin D. Roosevelt,** not only when he appointed Judge Patterson to a high judicial position, but when he appointed him on this July day to the position of Assistant Secretary of War. The President's confidence has been entirely justified as proven by the Senate's approval of Judge Patterson's elevation to Under Secretary of War on December 19, 1940.

Judge Patterson has never seen Elwood Ordnance Plant and does not know its workers, except through reports of his able assistants who keep him advised of the War Department's staggering program and its "up-to-date" accomplishments. Elwood workers should be proud, and are proud, that our Under Secretary of War has appraised the results of our efforts, finds them good, and expresses his confidence that we will turn out *now* the ammunition which is needed to bring the Axis powers to their knees!

Judge Patterson was born and reared in Glen Falls, N. Y., the

(Turn to Page 8)

Checks Are Sent to Group 2 Kin

Checks are being mailed to the families of Elwood's heroes who gave their lives in the service of their country. The fund had reached a total of $16,849 at the last report, and on this basis each unit of the distribution will be in excess of $230.

The widow or parents of each man will receive one unit, and a half-unit will be allowed for each child under 17 years old.

EOP employees were praised by **Lt. Col. Don M. Hoffman,** commanding officer, who said the contributions indicated "the strong ties that bind us all in this war effort."

". . . you have the stuff that makes top soldiers . . ."

ROBERT PORTER PATTERSON
Under Secretary of War

"NOW — *THIS MOMENT* — is the time when you can best help win this war. Bombs and shells in production quotas do not win wars. Only that ammunition which actually reaches the firing line and is shot from our guns or dropped from our planes will crush the Axis.

Nor will past production records win the battles of the future. Modern armies use up enormous quantities in one day's fighting. A *single armored division* shoots 570 tons of *ammunition* in a *single day's combat*—1,140,000 pounds.

Because neither the performances of the past nor the promises of the future win wars, we must depend on the production of today. You, as Ordnance workers, can help to defeat the Nazis and the Japs by turning out all the shot and shells, all the bombs you can — *RIGHT NOW*.

You've proven you have the stuff that makes top soldiers of production. You showed it by the way you took the recent explosion at Elwood, in your stride. You showed it by your courage and determination.

The Army knows you will keep on producing more and more of the munitions we need. We have every faith that you and the other workers of America will provide the weapons by which our fighting men will win this war.

You who produce *NOW* will be the ones who will give us the stuff to crush the Axis."—**Robert Porter Patterson, Under Secretary of War.**

Group 1 Girls First Chosen for Line Jobs

Munitions Work Holds Interest for 4 Veterans

By Catherine Noonan

A long, long time ago a shout was heard all the way from Congress to the most obscure corner of the earth that the American woman had put on her bustle, arranged the rats in her pompadour, and marched into the business world.

In September, 1941, **Alice Busby** put on a tailored suit, ran a comb through her three-inch feather cut, and was the first woman to set foot inside the EOP area. Only this time there was no surprise or alarm because everyone knew that the American woman would arrive on the scene to take her place in the scheme of things and do a bang-up job.

Although Miss Busby has the distinction of being the "first lady of the area," her entrance was followed immediately by **Loretta Schall, Mary Taylor** and **Dorothy McCormack.** These were the first four women employed by EOP for munitions work. After a training period of two weeks, they, in turn, taught the other women who were subsequently employed for Group 1.

And so women in defense work made their debut at EOP. Today the 80 women employed in Group 1, under the supervision of Miss Taylor, are a harmonious, smooth-running unit.

Miss Taylor and Miss Busby both laughed when asked about the men's reaction to them when they first arrived. "Of course," Miss Taylor said, "Our entrance was accompanied with looks of masculine skepticism and the they-won't-last attitude. This was probably due to the fact that the area was nothing but a mud puddle at that time, and our training class was held in a women's change house which made no effort to give us the comforts of home."

"But after production got under way," Miss Busby added, "We certainly did appreciate their fine spirit of cooperation."

Miss Taylor's background of school teacher in Bonfield, Ill., her home, and later as a social worker in the Kankakee Township office, makes her particularly well-suited for her job as supervisor of the

10% War Bond Buying Is Goal

War Bond purchases by EOP employees have set an excellent record and stress now is being laid on urging as many as possible to become "ten per centers." Buttons indicating the wearers are investing 10 per cent of their earnings in bonds are being distributed and they will serve as a badge of honor.

Attention of all workers is directed to the notice on Page 9 of this paper. Those who have had changes in their rate of pay since making their payroll allotment are urged particularly to read the notice.

The BOMB-SHELL
ELWOOD ORDNANCE PLANT

Published every other Friday by and for employees of the
ELWOOD ORDNANCE PLANT
Joliet, Illinois

LIEUT. COL. DON M. HOFFMAN.....Commanding Officer
SANDERSON & PORTER.....Plant Builders and Operators

VERNON C. BAILEY.....Editor
Address all communications to Editorial Office, Recreation Building

GET YOUR VITAMIN F . . . FOR FUN

Picture a man playing ball, singing, playing with a swing band, or taking part in one of the many forms of recreation offered here on the plant reservation.

As a result, he'll help load more bombs or shells tomorrow. For tests show that the amount of work a man can do in a day—depends largely on the kind and amount of recreation he has enjoyed in his spare time. His keenness of perception, ability to think clearly, steadiness of hand, all are governed by his recreation.

Here in the Elwood Ordnance Plant, each and every one of us has a chance to take part in that type of relaxation which he or she prefers. The success of all our sports will depend entirely upon our willingness to cooperate. See your group leader about taking part in that form of recreation in which you are most interested. It's more than a man's basic right in this time of war. It is almost his duty.

Always shorten your idle time to the point where you crave a little more recreation. In the long run too much loafing may prove more dangerous than too much hard work—which seldom kills anybody. The invisible machinery of habits cannot stand idle for long without serious injury.

Join today the sports you most desire. Tonight get out and play—have fun—forget all about the plant and the machines. Tomorrow show them how to do some real work—for Uncle Sam.

James Glade, Group 61.

Letters to the Editor

To the Editor:

I am a new employee, and I enjoy the paper very much.

I live on Chicago's west side and drive back and forth every day, and would be interested in sharing my car with someone or riding with someone who lives on the west side or in one of the nearby west suburbs. I thought the paper would be the best way to contact anyone who might be interested.

I am in Group 3, Building 5. My clock number is 47084. I can be reached either at Nevada 9516 or through my clock number.

John Casaleggi, Group 3...

Dear Sir:

I want to thank you for the two issues of *The Bomb-Shell* that I received the first of the week.

At the time of my employment with the Elwood Ordnance plant I was connected with the Time Department. In reading through *The Bomb-Shell* I was surprised at the number of people that I knew either by their names or their pictures. Hope you will continue sending them. My address may change in a month or so but I will inform you of the change. So let's keep 'em flying.

Pvt. K. L. Frandsen,
Air Corps Technical School,
Fort Logan, Colorado.

Sirs:

I have been receiving *The Bomb-Shell* and am very happy to receive them. They are very interesting, and nice to know what is going on.

I am now at Will Rogers Field, Oklahoma, and not at Louisville, Ky.

Again thanking you.

Pvt. Edward L. Kurth,
Will Rogers Field,
Oklahoma City, Okla.

P. S.—I wish I could help make those shells and bombs again. But I guess I can do just as much where I am.

To the Editor:

Received *The Bomb-Shell* edition of June 5 and June 19 today, June

(Continued on Page 7)

"We're supposed to work here . . . but it's so crowded we can't get in!"

PASSES AND REJECTS

By Vernon C. Bailey

A great deal of credit is due to all of those who participated as EOP representatives in Joliet's Fourth of July parade. So successful was the endeavor, that an encore at 6:30 that same evening was requested at Coal City. **R. T. Bassett**, assistant comptroller, and **Victor Kindelberger**, superintendent of truck transportation, who supervised the floats, took them to Coal City at the request of **James Kriz**, commissioner of finance.

In addition to **Lt. Col. Don M. Hoffman** and the other Army officers stationed here, who are pictured in another column, the marching units included:

Police matrons, **Gladys Koerner, Mary Donohue, Nina Benson, Mrs. Marie Cline, Mrs. Lorraine Guenette, Mrs. Helen Weber, Mrs. Louella Lipschutz, Mrs. Pauline Marrow** and **Mrs. Villa Eggleston.**

Guards, **Sergt. Edwin O. Selle, Corp. Frank J. Pate, James A. Carey, Donald Casey, Hershell Clemons, Wilbur Cordes, Paul W. Elliott, Ellwood Goodsell, Normal L. Grimsley, Joseph T. Haley, Robert M. Hart, Herbert Jones, Harry Larson, Donald E. Mack, Anthony Mazutis, Harold E. Morine, Hugh D. Morrison, George Perkins, Ralph Sexton, Boyd Sorenson, W. Paul Stacel, V. E. Stevens, J. A. Grimes, Joseph Wolf** and **Kenneth V. Wheeler.**

Fire Department, **Walter Lueder, Charles T. Davis, Richard Doyle, Jr., Ralph C. Rausch, Charles R. Crain, Frank Scoma, Andrew P. Elias, Doyle Pratt, Louis Hildebrand, Donald F. Trainor, Gerard H. Hanlon, Leonard C. Anderson, Bert L. Benson, Marion S. Murawski, Norman C. Lubs, Edwin R. Walsh, Richard C. Franklin, Grover C. Alexander, William F. Hayes, Mark Settlemoir, Wiley G. Bell, Charles Jiskra, Edmund S. Dickens, John E. Davis, James E. Dillree, Thomas L. Billadeau, Clarence Horschler, Orval S. Riggs, George E. Bereolos, Frank M. Clark, George L. Collins, Robert E. Graham, Otto R. Mietz, Robert E. Connelly, Leonard F. Jessen, James C. Dickson, H. Neilson** and **L. Molck.**

Those who were on the floats included:

Groups 4 and 5: **Viola Novak, Gladys Druin, Betty Foster** and **Mary Thompson.**

Groups 6 and 7: **Joan Schouland, Rita Schwab, Marie Cartak** and **Frances Meditz.**

Group 8: **Helen Glagala, Mary Frenchik, Margaret Maxwell, Mildred Nordstrom, Eldora M. Erickson, Earl J. Olson** and **William Weese.**

Group 9: **Hannah Norgargt, Mary Stevens, Helen Shank** and **Lois Peterson.**

★

Report Your Address

Check your time card the next time you punch in or out after reading this. It bears the address credited to you in company records. If it isn't correct, fill out a change of address slip placed handily to your time clock and give it to your timekeeper. In this manner you will be assured of your copy of *The Bomb-Shell* at your home. In addition to this advantage, the company is required by law to have your correct address on file.

★

Letters from Soldiers

Your attention is directed to the letters from former EOP men now in the armed forces. Read them. You'll get a refreshing reaction. In the next issue of *The Bomb-Shell* there will be started a list of the former workers in the services. You'll be surprised at the number, nearly a thousand. A gigantic service flag is being discussed and we should have details soon.

THE BURNING PIT

By Scorchy

The local and national press is full of stories these days about sabotage, spies, and all sorts of subversive folks who ought to be dropped into the middle of the ocean with nothing less dainty than a five-ton truck tied to their ankles. None of us has any quarrel with the argument that they should be rounded up and dealt with severely. Neither do we question the necessity of keeping our collective mouths shut when it comes to those weighty discussions which usually reach their intellectual zenith in the vicinity of taverns, drug stores, pool rooms, and similar gathering places of that section of the human race better identified as wise guys.

Most of us have little opportunity to participate in this campaign to stamp out the enemies within our borders but there is little doubt that every one of us will do his part whenever called on. On the other hand, there is a contagious habit in some of us that needs attention and here is my chance to rant and rave a bit about it.

The issue, my friends, is the *Common Gossip*. He is a species that roams almost every part of the country but seems to have found particularly good forage in and around Will County in the State of Illinois. The subject matter of the fancy tales that he spreads indicates to this eminent anthropologist that he is endowed with a surprisingly small number of brain cells, and there is reason to question the physical condition of the few that may be rattling around in his cranium. The subject matter of his verbal hallucinations rarely, if ever, encroaches on the sphere of the more dangerous saboteur; and the confusion and misunderstandings caused by his silly fabrications will probably never be brought within the provisions of the espionage laws.

In short, he is a pest that rates classification in about the same stratum as the common house fly. But try and swat him. Just about the time you are sure the last one has been nicely interred, up bobs another with a wild tale that **E. O. Huey** has been entertaining doubts about the law of gravity, and just to prove there is no such thing, is going to jump off the top of the Group 60 flag pole next week at two o'clock. Silly, isn't it? But wait and see if a handful of our more gullible readers don't spend the better part of next week watching that gold ball on top of the staff "just in case." Now of course, there is nothing strange in a fellow jumping off a flag pole if he considers that feat an essential but final step of a carefully planned career, but what gets me is the colossal stupidity of a guy that thinks Mr. Huey could ever get up there in the first place. Well, you get the idea.

Then there is another strain of this group of biological nitwits that specializes on salaries and wages. He roams around the area with all the hot dope about the new Superintendent of Empty Pop Bottles who gets not less than a half-million a year with a one-cent bonus for every bottle he encounters. By the time the story goes through its usual embellishment as it is passed from one to another member of the Amalgamated Association of Grapevine Artists, it finally gets back to the main office where **Comptroller John J. Cole** starts looking up the provisions of 77-B and **Project Auditor Zagade** loudly protests that there isn't that much money in the world, and even if there were, salaries like that are paid only at other Ordnance plants.

Ho hum, how about a bottle of pop.

I have written . . . a poem!

The End of a Perfect Day!

Come, Kiddies, get ready—the picnic is over.
Pack up the things and someone find Rover.
Where's the thermos that's got the iced tea?
Bud, what are you doing behind that tree?
Go some place else—that's poison ivy!
Up with you, Jim, get the stuff in the car,
We've got to get moving—we've come too far.
Don't pick up the papers—you're not so neat
Around the house. Rover, get off my feet!
Shake out the blanket—not all over me!
The baby is wet and as cross as can be.
Now what's wrong—have we got a flat?
I told you so—don't swear like that
Before the kiddies. No! I haven't the jack.
I've enough to do without minding your tools.
May, drop those things—they're nasty toadstools!
Stop crying, Baby—I know your gum's sore.
Bud, don't bang your head against the door.
Wow, but it's hot—I know it will rain.
I said we should have come on the train.
Thank God you've fixed it—you're terribly slow,
Maw always said you lacked "get-up-and-go."
What about my mother?—I won't shut my head.
Go ahead and rave—I wish I were dead!
Washing and cooking and slaving all day,
No thanks from you and no time to play.
All right, skip it, and let's be off.
May, how long have you had that cough?
Watch that guy, Jim—he's all over the road.
Eeek—throw out that slimy toad.
Boy! how I wish we were home.
It'll take us hours in this old crate.
We can't get a new one—now it's too late.
Some day we'll be killed in this piece of junk,
Then you'll be sorry—I'm *not* talking bunk!
There's a bruise on my knee—don't scratch your head.
I'll take a good look before you go to bed.
I'm sorry you're hungry—there's nothing to eat.
Oh, stop your whining and *get off my feet!*
Jim, look at that trailer—isn't it cute?
Don't snap my head off—you great big brute!
I *don't* wan't one—I just said it was sweet;
You act like you'd eaten Rover's raw meat.
My girdle pinches and my feet sure ache,
Stop at the baker's and I'll pick up some cake.
We're almost home, children—what do you say:
Shall we go again a week from today?
What's that, Jim—this picnic's the last?
A fine Dad you are—so selfish—don't blast!
We're going next Sunday—no ands, ifs or buts.
Stop shouting so loud, you ugly . . . aw, nuts!

—**Dulcy.**

Guards

GENE RYAN
Correspondent

Chief Baughman wishes to announce that the new group car stickers may be obtained at the Guard Headquarters in Group 60. If you do not have one already, get one now, as it will be compulsory very soon.

Our Guard Department has shown proficiency in various fields of endeavor in recent weeks. Foremost in our achievements was our Drill Team in the Fourth of July Victory Parade in Joliet. Many compliments were received on the poise and training displayed by our men. We wish to compliment **Sergeant Ed Selle** and **Corporal Frank Pate** on their fine work in training these men. From all observers, the parade was the finest ever displayed in Joliet, and we know the Police Women Unit, the Fire Department Unit and the Guard Unit supporting our fine floats aided in this success on our great national holiday.

Turning to the field of sports, last week our guards were called upon to engage the Fire Department in a golf match. Before the match play began, the combatants discussed the rules and regulations and decided upon a pecuniary reward for the victors. The results showed that three out of four guards had defeated their opponents. **Sergeant McCarthy** defeated **Fire Guard Conley, Supervising Sergeant Bayer** defeated **Fire Guard Schrucker, Guard Matter** defeated **Fire Guard Mallie,** and **Fire Guard Johnson** defeated **Guard Bell.** The four guards are now displaying that green folding money.

Continuing on sports, we are also represented on the EOP baseball teams. **Guards Waller** and **Vickery** are pitchers on the hard ball team. **Guards Sack, Tammen** and **Zinanni** are performing on the kittenball team.

Uncle Sam has called two more of our fine men to the colors. **Corporal Ralph Harper** and **Guard Joseph Early** have been inducted into the armed forces.

On the Grape

This recent conversation was overheard between a new guard and **Sergeant Conners.**

New Guard: Sergeant, I would like to get ahead, what advice could you give me?

Sergeant Conners: (*In his familiar drawl*) The only advice I could give you is that you need one.

Since **Dispatcher Johnny Smith** has moved into his newly built home, the boys are all awaiting the announcement of the housewarming.

Sergeant Brunskill declares the reason he smokes those king-size cigarettes is to keep the half-pint men from borrowing from him. He states it takes a man to smoke one.

Sergeant Bonnie Baker admits he likes to sleep at the Guard House. Reason is, when he climbs atop the double-deck bed it reminds him of his dream yacht and he is soon fast asleep.

The Sergeants ball team was scheduled to play the Dispatchers team Tuesday night, but canceled the game. The reason they offered, was that the hemstitcher didn't have enough lace to finish the uniforms.

Guards **Sexton, Wolf** and crew, who are on the sticker detail at present, are the subject of much comment when they come into headquarters every day lugging their pails. The questions are: Where is the herd? How many do they milk a day?

We heard that **Joe Russell** is a proud daddy. The ony reason we know it is that we got inquisitive about all the other boys smoking cigars. Did you miss the office, Joe?

Guard Art Hansen declares that Group 63 is the best group to work in of all the area. If you run out of gas or your car gets stalled, all you have to do is leave it there. There are plenty of other cars to use.

Guard John Dolan has been appointed Acting Corporal at Group 3. Congratulations and the best of luck.

The Sergeants' meeting was held July 7, preceded by a dinner in the Cafeteria. From all indications, this was the best meeting held so far. This might have been due to the presence of our distinguished guest, **Lt. Col. Don M. Hoffman.**

Group 61

JOE MOTTA
Correspondent

Over the Fourth of July: **La Vern Rasmus** and the former **Betty Carlson** were married . . . **Earl Ruby** saw **Bob Caldwell** and **Zeno Munzebrock,** Group 61 alumni, in Jacksonville . . . dancing to **Falleti's** orchestra were **Mr. and Mrs. Ganz** and family . . . **Jack Alberts** and family visited friends . . . having a gay time in Aurora and Morris was **Ralph Walter** . . . **Howard Feldman** took a jaunt to St. Louis . . . our own **Stanley Slucki** participated in the parade at Joliet . . . Truck Driver **Hal Nosker** made a brief visit to his home town, Iroquois, Ill. . . . our good friends, **Barney Beoletto** and family, made a trip to Roanoke, Ill., to see their relatives.

Richard Schoulda is vacationing in Grand Junction, Mich.

Paul Burke wishes to state that he has no store teeth . . . both of them are his own.

After a brief spell of intestinal flu **Robert Leadingham** is back working.

Attention, **"Tiny" Cahoon!** We have a talented chap here named **Erny Decker.** He does many imitations as well as sing.

The bobolins, **Ray Carlson,** will get you (or your badge) if you don't watch out.

Henry McElroy, a former Group 61 employee, of Camp Shaffie, Arkansas, is home on furlough.

Dorothy Jane Buggeman became **Mrs. Charles O'Connor** June 26.

How about a toast to two swell personalities? Hats off to **Corporal Leonard Williams** and **Guard Clarence Scott** (better known as **Scotty**).

On July 14 **William Dooley** celebrated his birthday.

Willie Eneix walked into the shaker screen, bumping his eye. Result: three stitches. Keep 'em open, Willie.

The draft board notified **Jess Shelby** to report for his physical examination.

While on a trip to southern Illinois, **Elmer Henry** picked up some hilarious jokes to tell his employee pals.

Virginia Kepplinger and **Bob Brumbach** have been golfing lately.

It would be nice if: the bus would wait for **Marvin Rasmussen** . . . **Whitney Miller** and **Larry Lahrman** came to work instead of touring around on the plant roads . . . the **Millwrights** could get more to sit in the chair they wired . . . **Fred "Tiny" Kase** got a shock . . . everybody knew why **Pete Susemichl** drives from Oaklawn to Morris . . . someone like **Eugene Balchowski** would teach us to smoke cigars. . . . **Kay's** last name were made known to us by **Joe Sarti** . . . we knew why **Charlie Johnson** walks to work . . . our pal, **Nels Nelson,** would give us some "dope" on the Power House boys . . . a friend would "fix up" **Joe Silverstein** . . . you knew why **Bill "Sal-e" Dooley** calls **Charles Hinz** "Sugar" and **Seward Brown** "Sugar Pie" . . . more overtime could be had by **Joel Johnston** since his wife isn't working any more . . . "Silver Fox" were the name of **Arnold Fedderson's** bus everybody were as polite as **William Johnston** . . . esnecially to

laundry personnel . . . "Boss" were stenciled on more overalls other than **Bob Churchill's** . . . you knew that our staff of janitors consists of **Frank "Locker Foreman" Ariagno, George "Pushbroom" McSherry** and **Chester "Wash Basin" Reynolds** . . . we could tell the difference between **Pete Balma** and **Louis of Troy**. . . snuff wasn't chewed for lunch by **Ralph Walker** . . . the three Musketeers, **Paul Newey, Robert Derksen** and **Tony Berklacich** would let us in on what they did at Bass Lake, Ind. . . . the problem child, **Louis Dobovsky,** would come across and tell us why he doesn't ride the La Salle bus anymore. . . . The men from the crusher could relieve **George Roach** of his duties (eating eight hours a day and worrying about your building) . . . restless boys could settle down like **Wayne Howard** (his playing days are over) . . . **M. Brouillette, Glen Kelly** and **James Smith** would invite me along when they stop for refreshments in Wilmington. . . . **Lawrence Keely** were able to last long enough this week to get a "ringer" . . . all painters could afford high-priced hotels (**Roy Kline** can) . . . **Don Morsch** would quit chewing tobacco . . . **"Crystal Ball" James Glade** would tell me more about my future (lately he has been doing a lot of predicting . . . my mother, **Mrs. Frank Jirousek** and friends knew how much I appreciated the surprise birthday party they gave for me.

TEN PER CENT BUTTONS, like the one Irene Keenan, secretary to Harrison Smith, is pinning on Billye Nicholson, secretary to W. E. Canniff, are being awarded to all EOP employees who are investing 10 per cent of their earnings in War Bonds.

Inspection

RICHARD LOWERY
Correspondent

Joseph Leo Waldvogel, Group 1 inspector, entered training at the Marine Base in San Diego, Cal., on July 15. We wish you all the luck in the world as you further your effort to save democracy.

Florence Stoltz's husband, stationed at Jefferson Barracks, Mo., will be home this week-end on furlough. Florence, Group 8 inspector, has just finished buying a new summer outfit for the occasion.

If the talent in the Inspection Department is as good as they say. we may furnish *"The Bomb-Shell Revue"* with **Doris Patno.** Doris was accepted for an audition as a singer.

Bill Kirban, scale superintendent, spent the Fourth fishing on the Du Page River. Bill rose at 5 a. m. and fished until 5 in the evening. For the last few days he has spent most of his time in the "doghouse," not because he failed to catch any fish, but he failed to be home to celebrate his special anniversary.

Harold Rouff, our popular inspector in charge of Group 61, is quite a golfer. If he keeps up his record, he may be able to beat **Champ. Bob Walsh.** Walsh is inspector in charge of Group 3-A.

Moe Brennan, inspector at 3-A, has hit a snag in his effort to build up a good baseball team. Moe is looking for a wide-awake outfielder to take **"Sleepy" Heavajcik's** place.

Bill Kirban is offering a generous reward of 100 grains for information regarding the whereabouts of "Yehui." The little man who pushes the indicators of his scales to the correct spot. He is in desperate need of this important person, as his best alibis have gone with him.

Sign in Scale Department: "Work faithfully 8 hours a day and don't worry, for some day you may become the boss; work 16 hours a day and have all the worry."

"Shoeless" Paul Jackson knocked out three home runs in a practice session the other day. The rest of the inspectors of 3-A team may be seen any day now in their bare feet.

The excitement in the office this week was not caused by the increase of its members, but the receiving of two real electric fans. Maybe **Robert Wilhelmi** will have the South African wall fans removed.

Bud Brown's secretary, **Lorrayne Ostrem,** made a beautiful picnic lunch for the Fourth. We found out that she had the picnic at Inwood, but with whom we know not. Would one of our dear friends come to our rescue.

Eugene McAllister, inspector at Group 61, is a very happy fellow now that **Joan Hammel** has returned home. **Harold Rouff** reported that Eugene has increased his effort 100%. Maybe someone had better make an arrangement with Joan's father to keep her home next year.

Sammy Hoffman, scale inspector at Group 3, has a total of twelve nicknames. His latest one is **"Sandy."** It seems hard to believe that a dark-haired person would receive such a "handle."

Now that **Elmer Nesius,** inspector in charge of Group 7, has his scooter, he plans to leave **Jim Nolan** take it to Chicago after work. Maybe Jim will have a trailer made for it.

Ben Slutsky is planning to enter his baby in the local baby beauty contest. Ben's daughter is the picture of her mother with a touch of that Slutsky smile.

A. J. MacLellan, chief inspector, was ill two days last week with a bad summer cold. He hopes that **Harold Troupe** will shut off his new electric fan when he enters the gage office.

Willard Vail, head inspector at Group 6, can be seen on the Inwood Golf Course any time after five-thirty. His partner in crime, **Bill Hartman,** is going to buy a portable lighting unit in order to keep the ball rolling at night.

No one has heard from **Franklin Lewis,** inspector in charge of Group 1, for at least five days. Frank dropped his golf games to take up fishing. **Bill Kirban** told Frank that his average is five a day. Maybe Bill had better tell Frank where he buys them . . . or lower that average.

Tony Lutkus' wife plans to leave for the North Woods on a two weeks' vacation on July 15.

C. Robert Wilhelmi, our assistant chief inspector's son, is a second Tarzan. C. Robert jumps and climbs around the large Wilhelmi estate without any fear whatsoever of falling into the Kankakee river.

SAFETY SANDALS must be worn by all visitors to the EOP loading lines, to meet the safety requirements equalled by the wearing of safety shoes by employees. Here, Karl Ulrich, assistant safety supervisor, shows Al Hesley, Group 2 safety engineer, how the sandals are to be worn. They come in two sizes, 8 and 10, and are available at all groups.

Hospital

LUCY HARKNESS
Correspondent

Word has been received from **William T. Bryant,** former insurance adjuster. Bill was inducted into the armed forces June 3 but was given a ten-day furlough, which he spent enjoying the fine arts of fishing, eating and visiting with folks and friends. Then on June 13, he reported to Portland, Me., and was sent to Camp Meade, Maryland, with the Engineers Battalion. Bill seems to enjoy army life. His address is: Pvt. W. T. Bryant, 76th Division, Company B, 301 Engineer's Battalion, Camp Meade, Maryland.

"BULLDOZER" is the name of this heavy piece of road building equipment. Driving it is George Ford. Walking ahead are Francis Hudak and Benjamin Minor, Jr.

From **Tom Moore**, ambulance dispatcher:

For years the world went
around the Axis;
Now the world is against
the Axis.
So let's produce more
And help win the war!

Seen on the way to work. On route 66 near the Jackson Grange, there is a sign in front of the Trailer Camp which reads: "Worms for Sale." Some of those trailers do remind me of worms!

Frankie Yarborough "flew the coop" July 1. He was told the good news that he might go home if he were a good boy, and no patient was ever better! Even though we knew that we were going to miss him, we were all glad that he had made such an improvement. However, Frankie still returns to the hospital each day for medical treatment, and makes the rounds calling on patients and personnel. Everyone is interested in his progress and cheered by his appearance.

Joe Chizmark, ambulance driver, has a perfect bodyguard. On the Fourth, Joe brought along his pet fox terrier, Skippy, and no one could get within speaking distance of Joe.

July 4th was significant as a Day of Independence and freedom for more than the good U. S. A. This past Fourth was also a day of celebration for our prize patient, "Pidge." Having fully recovered from his broken wing and having regained his flying strength, "Pidge" was released by **Dr. H. L. Schultz** for the homeward trek. After circling above the hospital a few times, probably glorying in his new-found freedom and thanking the Doctor, he headed straight for Chicago and the "home roost." Dr. Schultz sent a message along to "Pidge's" owner, securely fastened to the leg of the carrier pigeon, and we hope to hear of our mascot's safe arrival home.

Salvage

ANDY VAIL
Correspondent

Bob Milus has found a use for old razor blades; he shaves with them.

Roy Chasteen bought a raffle ticket, and was the winner. A friend called his home, but was informed by his wife that Roy was out for the evening. "Well," said the friend, "when he comes in tell him he won a card table." "Won Clark Gable," his wife gasped. "Oh boy! Send him right over."

We wish to congratulate **Joseph J. Corrigan** on his enlistment in the service. The spirit he manifested with the other young men, is typical of America and assures us of ultimate victory.

George Sangmeister, Mayor of Frankfort, says if you think politics is easy, try standing on a fence while keeping an ear to the ground.

Alvin Rediger says that seeing all the shells here recalls the time a minister, attempting eulogy in a funeral sermon, said, "We have here only the shell; the nut is gone."

Jerry Cellenti repaired a couple of jacks we had here and was going to lend them to anyone going on a vacation, believing they would be useful in opening pullman windows. **Harlow Kadow** reminded him that science beat him to it, by inventing air conditioned trains.

J. Liles played one joke too many. He stuck his head into a room where the boys were playing poker and yelled, "Fire!" They did.

Presley Hankins believes that even with rubber at 1 cent a pound, a heel like Hitler would bring in quite a large sum.

Often we thought that the location of our department was a disadvantage but we are fortunate in being off the beaten path of **Frank (Slugger) McCarthy** of **E. G. McAloon's** department. So naturally it is a pleasant place to work.

I have been accused of brushing my teeth with gun powder because I shoot off my mouth so much.

D. Foutch and **Swan Sandahl** of our night crew can't see very well during the day, only on Thursday.

Hugh S. Robb, Superintendent: "God gave man two ends; one to think with and one to sit on. Success is determined by which end he uses most. Heads you win; tails you lose."

Utilities

HELEN SHIMEK
Correspondent

The story is told of **A. M. Lockwood** who, on a particularly disagreeable morning not long ago, offered a ride to a young lady going to the Fuze and Booster area. With his customary kindness, Mr. Lockwood delivered the girl at the doorstep. Imagine his chagrin, when upon alighting, the girl shoved something into his hand and murmered, "I think that was worth a dime."

EOP Radiophone made another national magazine this month with a photograph (taken early last fall) of one of the locomotive radiophones.

The Utilities Department extends a hearty welcome to **J. V. Wall**, superintendent of Electric Department, and his secretary, **Agnes McCarthy**, who have recently moved to Richards Farm from their former headquarters in the Administration Building.

The Transportation Department enjoyed a very pleasant surprise party July 2 at the home of **Mr. and Mrs. W. A. Walters** in Joliet. The occasion was Mr. Walters' birthday. Those present were **E. J. Egan, Robert Peterson, Mr. and Mrs. George O'Reilly, Dr. and Mrs. W. J. McCraley, Mr. and Mrs. E. V. Sperling, Margaret Hayden,** and **Ernest Raunser.**

It took some clever figuring to replace the large plate glass windows at the Radiophone Headquarters but the trusty firm of **Honson & Peterson** of the Carpenter Shop did an artistic job of it. The new windows are far nicer than the old. **Gust Lagerwall, Otto Svienson** and **Oscar Berge** did the carpentry work and did it well. Thanks, fellows.

The old Blacksmith Shop at Richards Farm, used during the period of construction, is silent. No more ringing of anvils, the dull thud of power hammers or any of the thousand and one sounds of a shop, for the Blacksmith division has been transferred to its new quarters in Group 70. All the boys soon became accustomed to the new shop and its equipment and are quite happy. They're all set to grind the ax that'll ax the Axis!

Construction of the new addition to the Service Garage is rapidly nearing completion. The new service station and parking lot are also well underway and will soon be in operation.

Merle Eberhart, usually the quiet type with nothing to say, noticed a field of cut oats the other day. Suddenly he piped up with, "I never knew it grew that way." "What a shock," was the answer, followed by several groans and silence.

We can all relax now—**Tommy Reardon** of the Machine Shop has finally found a house!

Millard L. Neher, painter foreman, left July 11 for the army. Neher's 248 pounds did a very good job at "slapping" on the paint and, as **Singer** says, wanted a chance to slap at the Japs instead.

In covering the night spots in Chicago recently, our roving reporter ran across **Mr. and Mrs. W. B. Manchester** in the Kungsholm. On inquiry, Manchester stated that it was the anniversary of the luckiest day of his life—his wedding anniversary!

The Sheet Metal Workers are planning their annual outing along the Kankakee river on July 18. Strictly stag! !

Quoting a statement of **W. M. Dale**, pipe fitter chief, "When Abraham Lincoln freed the slaves, he forgot the crew at the Pipe Shop."

J. A. Cocker can certainly be proud of the Machine Shop ball team. They have only lost one game out of four. **Manager Becker** is doing a fine job and has the cooperation of all of his team.

Zoom Bus News—

Hello everybody! This is our first appearance in *The Bomb-Shell*. Haven't you heard about the bus lines yet? Our activities are confined to the Fuze and Booster area. **Fred Aster**, one of the busiest men at EOP, is our superintendent. Many of you will remember Fred for the fine job that he did as foreman on the railroads during construction period. Through Fred's untiring efforts we now have thirteen major bus lines running into the plant. While Fred is busy making outside contacts for bus service to the plant, three dispatchers, **Johnny Hennessy, Charlie Harris** and **Eddie Koerner** are kept busy seeing that the men and women get to their respective groups on time for work and getting those who are through working back to their cars and busses. **Seveno "Sweeney" Leggero** is chief driver and maintenance man. "Sweeney" is really kept busy so that we have enough busses for the service we like to give.

Thanks to **Lee "Lucky" Davis** for her song "Zoom, Zoom, Zoom." "Lucky" wrote the song and had it published as a tribute to the 27 bus drivers who are busy doing such a fine job for our department. If you haven't got your copy yet, you better see "Lucky" as reports have it that they are going fast.

The **Bus Drivers** ball team, better known as **"Asters Angels,"** made their debut July 2 in **"Tiny" Cahoon's** great recreational program with a 9 to 8 victory over Group 8.

Johnny Bonas is expecting to become one of our fighting boys soon and we'll sure miss him because he does a fine job of bringing the boys and girls to and from the front gate to the shake-down house.

Gleen Hunter and **Jimmy O'Connor** passed out the cigars recently on the arrival of "blessed events" in their families. Both were boys.

Howard Cardwell is planning on leaving the "Bachelors' Club" and joining the "Benedict's" around July 19.

Announcement

The Mechanical Department wishes to announce the grand opening of the laundry at Group 70 on June 23.

This modern and fully equipped plant is now laundering all the uniforms for the girls in the Fuze and Booster groups and the men's coveralls from Group 61.

Francis (Ah Sing Lo) Walsh, superintendent of said laundry, has 24 bee-u-ti-ful girls working two shifts along with six mere males to keep all of our Fuze and Booster girls spick and span.

When the planned additions are completed, we expect to launder the linens of the hospital, guest house and Foreman's Quarters.

High Explosives

JACK GARNANT
Correspondent

Group 63 lost another employee to the army. **John Piazzo** reported July 9 and we understand there was a cash gift for him from the men at 63.

The High Explosives Department seems to be highly in favor of wire fox terriers. Group 63 has found a new mascot in "Pete," the name seemingly taken from that of a certain inspector at Group 63.

Private Frank J. Walsh, former checker at 63 and 66A, reports he is enjoying army life at Jefferson Barracks, St. Louis, Mo. Frank would enjoy a letter or two from his old friends here and just maybe he would like a half-dozen or so from that girl . . . or would he?

GROUP 66:

The boys in the lumber mill in Group 66 are all doing their bit for national defense. In addition to their regular duties, they have a large box in which they deposit all their scrap rubber and metal.

Ray Good's "shiner" is all healed and he's looking for another fight — just to watch this time.

St. Elmo Stewart took one of his week-end fishing trips and returned with only four fish and a good case of "chiggers."

Ray Matasevic returned to work last week after spending a day in the hospital having his tonsils removed.

Chester Tucker says that he would have been graduated from the eighth grade if they hadn't kicked him out of school just because he wouldn't shave.

"Chuck" DiPeso, timekeeper, Group 66, is spending two weeks in Travers City, Mich., taking life easy.

"Doc," "Mike," "Peanuts" and "Bell," the four kittens of Group 66 lumber mill, are old enough for adoption. Anyone wanting a good mouse catcher contact **Leo Warren**, godfather of the kittens, and take your pick.

George "Gunga Din" Pappas is back on the job after an enjoyable two weeks in California.

Johnny Roussopulos, 66A, is deeply perturbed about this reporter's mistake regarding the weight of Johnny's new born baby reported in *The Bomb-Shell*. Hear ye! Hear ye!—official weight is recorded as 8½ pounds ½ ounce.

Group Foreman McCray at 66A is doing his best to represent the group in the new EOP orchestra as trombonist.

Group 68 has a challenger in **Ford C. "Bim" June** for **Jack Whittinghill's** remark in *The Bomb-Shell* of July 3. Bim says he is willing to lose five pounds if Jack will gain the same amount to match weight. Bim is all set to meet him at the next EOP boxing show for the honor of Group 68.

The Cherokee maiden (**Verneille Holder**) has set up her wigwam on the Kankakee for the summer and there on July 19 a pow-wow of all the Happy Chemists, their squaws and chiefs will be held. There'll be lots of indigestible food, barrels of iced tea and plenty of fun. **Chief Brooks** and his warriors from the Fuze and Booster Lab will join in the conclave. **Supt. St. Clare Smith** and his staff of office workers may come, too, if the latter will behave.

Ellis Steinberg, hole-in-one artist, modestly announces he is prepared to meet any and all comers on any course within 50 miles of Chicago.

Everyone turned up for work with unimpaired efficiency on the sixth, notwithstanding a glorious Fourth. **John Snyder, Palmer Overholt** and **Nelson Tippett** trekked back to Ohio for the long week-end. Tippett, who a week or so ago was trying to find out how to get his tires recapped, has been reassured by a service station attendant that his tires are good for another 20,000 miles, at least. We've seen the tires and can only conclude that the service station fellow had been drinking. Anyway, the trip to Ohio was without mishap and all returned looking suitably starry-eyed.

"Rosemary Hafele," who has been living at the lab for the past several months, accompanied her master, **Chief Chemist Herb E. Hafele**, to their home in Kankakee for the Fourth of July week-end. Rosemary, incidentally, wishes to express her gratitude to all those nice waitresses at the Cafeteria who daily provide her with delicious bones and meat scraps, thereby keeping her slightly overweight, but happy.

Note to matrimonially inclined women: Eligible males employed at the lab include, as of today, **Ray Hybarger**, assistant chief chemist; **Abraham Agamy**, janitor; **Rayford "Speed" Winters**, beaker boy; Govt. Inspectors **Dave Hill, Ronald Beck** and **Steinberg**, and **Tippett** and **Snyder**, chemists.

First Aid Worker Added to Staff

The new addition to the First Aid instruction force is none other than I. W. Hawes who comes to us from the Red Cross Field Service. Mr. Hawes has had many years of teaching experience in First Aid work and will head up the new classes to be formed in the plant. When he starts the new classes, be sure and get in on them.

New Safety Booklets

The new Safety Regulation booklets for supervisors and foremen, as well as the new Safety Rule and Conduct booklets for all employees, are being distributed this week. The management advises that any employee who has not received his copy can obtain one from his foreman or the safety engineer in the area.

POWERFUL UPHEAVAL results when a grader, operated by Daniel Callahan, is put to work behind a Caterpillar tractor. The one shown here is driven by Erwin Range.

Janitor Agamy, who does a little Victory-gardening out in back of the lab in his spare time, wasn't nonplussed when someone sent him after some marshmallow plants. Agamy came back from his home town, Coal City, with some seeds, purportedly marshmallow. Now little watermellons are budding on the plants.

Group 1

JACK BARRY
Correspondent

Eddie Grant and **Bob "Zipper" Zintarski** are pledged to join the ranks of Benedicts in the near future. We do wish them well and hope that they will be happy in wedded bliss, but suggest that they talk the whole thing over with **Bill Lowrey**, who was recently married to **Myrtle Andrews**, or with **Russell Frangella**, who took unto himself a bride by the name of **Louise Garvin**. There is nothing quite so valuable as advice from experienced people.

Harold Schomis has been promoted from ramp foreman to shift foreman in Building 14, which in our humble opinion qualifies him for the nickname, "Lucky."

Peter Romano was presented June 23 with a new daughter, affectionately known as **Toni**. Both father and daughter are doing a little bit of all right.

Time was when there were a few girls employed in the fuze bay of Building 13. When the lads returned from the change house they were wont to bring back candy bars in an effort to curry favor with the winsome lassies. Of course the girls were unequal to the task of consuming all the candy which came their way and they shared it with the boys in the fuze bay. Now that the girls are there no longer the lads lament the fact that their source of sweets is gone. . . .

Group 1 is supplying some high class musical talent for the forthcoming "Bomb-Shell Revue."

Supt. **Joseph E. Salmon** has had some grading done on the group ball field and it is now in good shape.

"Shorty" Bowman, one of the mainsprings of Change-house 8, performed in the parade and Fourth of July celebration at Streator and according to all reports he is a clown par excellence and appears in the full regalia of his chosen profession.

Our carpenter department has built and installed a handsome "V for Victory" trellis at the first-aid station and with its aid our flowers will soon be blooming in all their morning glories. . . .

This reporter was in the locker-room one night and heard a young fellow complaining bitterly about *The Bomb-Shell*, saying, among other things, that "You can take the paper and go you-know-where with it." When asked why he felt that way he replied that perhaps the paper was okay but that they had a pretty dumb reporter at Group 1 because he never mentioned anyone but company inspectors and fellows from Building 13. We were so surprised by our own astonishment that we quite forgot to get the young fellow's name but anyway this is his story.

AN ARMY OF EQUIPMENT is the appearance of this one unit of road building machinery. Behind walking E. L. Schuyler, grading foreman, is a giant scoop tractored by Carl Gerdes. The sheep's foot roller is driven by Stephen Richard, a second scoop by Gerald Delaney and a road patrol by James Pfleger.

Ordnance

HELEN McGINNIS
Correspondent

The Fourth of July put everybody in a holiday mood. . . . **Sy Kurantman** was seen by the roving reporter cavorting at the Edgewater Beach Boardwalk . . . as usual, he was dressed fit to kill. . . .

Kay Rosenbaum hied herself off to Gary to visit **Marj Horning**, formerly of here.

Lee Sopher and **Anne Kakara** took off in different directions on their respective vacations. . . . Lee to Bay City, Mich., and Anne to Ohio. . . .

S'pose you heard about the picnic the War Department is going to have on the 19th. . . . Everyone and their brother will be there . . . so better get your picnic paraphernalia out and dust it off. . . . Mr. Kurantman is the chairman so you can bank on a good time. . . .

If you want to know what a gal gets when she is a good girl see **Joe Kush** of Mail and Record.

Kennie Holz, chauffeur, was on sick leave for a couple of days.

That reminds us . . . **Ray Marquardt** and **Lois Ressler**, operations and engineering; **Gerry (Personnel) Kestel**, **Pat Haley**, **Ken Holz** and **Vera Gussman** spent a Wednesday night at Riverview, and a good time was had by all . . . so we hear, via the grapevine. . . .

Francis McCarthy of Auditing spent his vacation gathering a good tan. Wonder what **Kay Rosenbaum** did while he was away? . . .

Miss Moore of Personnel chugged away on the choo choo the other day to gather some info' for the Inspection Department . . . she returned Thursday.

Ask **Marie Maren** of Mail and Record . . . Tiny to those who know her . . . what she hid her badge for the other day . . . almost kept everyone in the station wagon from getting to work on time. . .

Didja notice the picture of the **J. E. Olsons** in *The Bomb-Shell* last issue . . . if they didn't look the part of a happy married couple . . . spose they'd dish out some advice if we started a lovelorn column?? . . .

Helen Harmon of Payroll worked all day the Fourth . . . good thing she did . . . otherwise all of us would have been around floating a loan somewhere. . . .

Ann Kulpa informed us that she is definitely *not* going to Arkansas on her vacation . . . but is taking off for the East.

Mary Lou Schwartz of Mail and Record had a cold for a day or two . . . being a good sport she showed up for work every day . . . she's recovered now though and as vivacious as ever. . . . **Ralph Clutts**, the teletype typhoon, can make the funniest noises . . . just ask him sometime. . . .

The parade in Joliet was a huge success . . . the best they ever had . . . no wonder, what with our commanding officer leading the finest array of soldier boys there is . . . sure makes your heart take a leap up in your throat when you see 'em struttin' their stuff. . . .

Catherine Stortz took a journey to St. Louis a while ago to see her soldier boy friend . . . since then . . . she has been all ajitter. . . .

Casey (K.C.) Jones of Inspection took off for the Wisconsin lakes the other day to go afishin' . . . better practice up on the line, boys, 'cause Casey will have some tall ones to tell. . . .

Charles Gorman fell and broke his right leg just below the knee Friday night. Could be he was so excited about his wife presenting him with a nice baby boy last week, **Frank Gorham**, 8½ pounds.

Paul Barhoover, group inspector in Group 6, and **Mary Virginia Lay** of Chicago were married June 27. It was a very impressive ceremony and was held in the Albany Park Baptist Church, Chicago . . . those attending from the plant were **Naomi Apgar**, **Catherine Fitzmaurice**, **Helen Ballack**, **Mary Meaux** and **Ed Ritter**. . . . The newlyweds are living in Kankakee.

Margaret Carter gave her family a break last week and spent several days with them at their cottage on the Kankakee River. . . .

S. L. Eisler and the gang who ride with him . . . together with some of their friends . . . had a picnic supper June 30 at Hammel Woods. . . . If the Cubs only knew that Mr. Eisler was such a "good" baseball player. . . .

Lt. C. P. Bohannon is leaving the Inspection Department for the Operations and Engineering Department. **Lt. Frederick J. Weis** is taking his place. . . . Lieutenant Weis came here from Picatinny Arsenal.

Howie Johnson and **Emily McCormack** were hitched on June 27th . . . seems like there's an epidemic around here . . . guess this writer will have to get some lessons . . . or maybe a net. . . .

George Attaway got himself sick and is now in the hospital.

Let us all take a lead from **Bill Ryan** and his Tinners, who have as their slogan:

"Keep It Flying"

To keep it flying
Keep on buying,
There's no use lying,
We know many are dying;
So stop the crying,
And keep it flying
By steady buying.

HIGHWAY SEXTET might be applied to this group composed of equipment and operators. The first roller is driven by Emmett Riedy, road patrol by V. E. Kissee, second roller by D. E. Jones, third roller by Richard McInerney and the sprinklers by Richard Costable and Roy Malcolm.

Inert Storage

CHARLES MANN
WILLIAM DENVER
Correspondents

When **A. P. Balston**, superintendent, pitched the first ball at the North Inert vs. Group 27 game at the new EOP softball field, he started off the three teams mustered as a result of his enthusiasm for the plant athletic program.

The team at South Inert will be led by **Willy Fang**, with **"Cy" Cobb** as pitcher, **David Lardi**, catcher, and **Earl Ely**, **Elmer Hankey**, **Russell Knutz**, **"Alabam" Greenwood**, **Harold Wickstrom**, **George Mochoko**, **Vance Hamman**, **Lawrence Nelson**, **George Harrop** and **Matt Reay** taking care of the long and short gardening. Some of them are supposed to be ex-minor leaguers—we think it is M-I-N-E-R.

The North Inert team will be piloted by **Frank Zupancic**, with a roster consisting of **Clarence Rexroth**, **Jack French**, **"Senator" Duffy**, **Bill Willis**, **Jack Guadinger**, **Jim Hamilton**, **Clarence Sluiter**, **Joe Bordero**, **Lou Tomazic** and **George Beallis**. **Lloyd Gall**, the star baseball pitcher, is preparing to help the EOP team keep well up in the percentage column.

The team at Group 27 will be headed by **William Kokal** and the "Mudders" include **"Chitch" Mauro**, **Ed Spizio**, **Ed Sheridan** and **Glen Wagner** of ex-major and minor league fame. **Tony Cinotto** and **Joe Fazio** are showing keen competition in working up to the berth of water-boy. The boys are all steamed up to beat the North and South Inerts who work out in dryer territory. **Al Gierich** is praying for a wet field. A collection was taken up at each group for the team equipment and met with the usual dynamic Inert success. The Inert ball fields are now well under way. This might give North Inert a chance to practice, and how they need it!

Michael "Burbank" Mauss has apparently succeeded in accomplishing what his illustrious forebear failed in doing. He is growing tomatoes in solid rock. They are frequently watered by **Virgil Mooty**.

Last week a pitiful cry for help came from Building 27-30. The office crew rushed to the rescue and found our little **Eddie Sheridan** being whipped around by the brass knob. A request will be made in the future to move Eddie's office from Building 27-25 to 27-30 as most of his time is spent there.

A movement is on foot to purchase a scooter for **Otto Heap**. Last week while traveling at high speed around the corner of a building he got a pocket full of sand. **Big Ben (not alarm clock) Sloan** refused a phone extension last week. He claims by opening the window and talking he can reach any part of the area.

The North Office garden is showing just how hearty the plants grown at EOP can be. Last week those great big scrapers and tractors actually uprooted the flower bed . . . some plants and poppies were salvaged, however, and are blooming. Thanks to the boys in the road grading gang, **Jack Murphy** and **Richard Cassani**, who were so helpful in transplanting. We know the roads must go through . . . and they did . . . sure is nice.

South Inert is countering with a deluxe rock garden . . . has a "V for Victory."

The office force at Group 27 would like to know why **"Farmer" Shaw** doesn't keep his poor tomato plants out of the flood area. He and **Ted Hintz** are keeping them well watered.

The mud holes at 27 are disappearing and we extend our thanks to the road grading force. **Al Gierich** might use a horse anyway to get around . . . sure would be handy.

Laughing their heads off at the circus in Joliet were **Charles Mann**, **Bill Denver**, **Ed Sheridan**, **George Newton**, **Fred Ford** and **Frank Zupancic**. Sheridan liked the girls, Denver the elephants, Mann the acrobats, Newton the horses, Ford the dogs, and Frank Zupancic the clowns. No one won a tie pin in the boxes of salt water candy, but did enjoy a bottle of beer and a cigar in the box seats . . . all went first class and how. Too, they enjoyed their dinner before the show and the ride to the grounds. The party was a success and George is strong for a steak-fry on the Denver estate.

Wonder If You Know—

"Dick" Ashworth is having trouble in selecting and procuring the new car?

That **John Wald** has quite a time keeping track of men and trucks. More trouble coming with that ball team stuff . . . balls, bats, gloves, and *rides?*

That the office boys got quite a kick out of the little machine used for dictation . . . it looks like a baby accordian but really is a Stenotype. Dictation can't be too fast, but sometimes is too slow?

That we have an expert tailor working in our midst . . . if you need that top-coat let out just call on **Andrew Cherrie**, component checker . . . he has a shop in Coal City?

That **John Murray** feels right at home behind the batter in any ball game . . . the old Victorian!

That **Matt Reay** feels like getting a berth on the EOP baseball team?

That **George Ballis** was blessed with a son last week?

That our sympathies go to **Harold Armstrong** who suffered a broken jaw last week?

Production Planning

LORETTA RYAN
Correspondent

The lucky ones in the Data Card Department, Traffic Audit Department and Production Planning Department to begin vacations are **Dick Ebben**, **Ray Van Hook**, **Jim Wilson** and **George A. Sangmeister**.

Leo Thompson left July 13 on his vacation to attend the Elk's National Convention at Omaha, Neb. Leo is the Exalted Ruler of the Ottawa Lodge.

Bill Stanley is leaving our midst to return to Group 2.

We wonder why **Mary O'Connor** has been singing **"Danny Boy"** lately.

We are all wishing fond fare-

AUDIENCE INTEREST reached a high peak when this EOP float was driven by in Joliet's Fourth of July parade. The size of the bomb was not revealed.

wells to **Stuart Marlette**, and **Joseph Groesbeck.**

By the way, where did **Dottie Mihelic** get that fraternity pin she has been wearing?

Melvin Block has finally gained back the many pounds he lost. Reason!—He is now a proud "papa" of a baby girl.

After **Richard Naughtin** has his vacation he will then begin to conserve tires.

Martha Craig has been living up in the clouds lately, following her exciting adventure over the Fourth of July.

Elva Thomas and **Rowena Roberts** have carried on splendidly since the absence of **Mrs. Dorothy Reibert** from the Traffic Audit Department.

What is the reason **Myrtle Cooper** brings matches and tobacco to work? Is it because she thinks it is more becoming to a certain young man to smoke a pipe?

We are wishing success to our two new-comers, **Margaret Gall** and **Dorothy Maxwell.**

Have you heard **Bud Wright** humming "There'll Be Some Changes Made?"

Harry Brown is quite busy these days with the building of model airplanes. However, he isn't going to make it a hobby.

The Traffic Audit Department aids have one piece of equipment that they can't keep a record of, and that is the adding machine, which keeps **Jim Murphy** busy checking on it.

What is the interest that **Elva Thomas** seems to have at DuPont?

J. B. Dronsfield has picked up the loose threads remarkably. We hope he will remember orders, and not overdo it.

Groups 4-9

Fuze-Booster-Primer and Detonator Lines

JUANITA HARTER
Correspondent

Kitty Barwig became Mrs. Martin Favors at Cape Girardeau, Mo., June 26th.

It won't be the same without **Iggy Bellavin**, who joined the Navy.

Betty Palmer recently was in the news when she saved a man's life. She was one of the first persons to arrive on the scene of a serious automobile accident. Her knowledge of first aid proved valuable.

Who can hand out the neatest line . . . just look at **Eddie Leibelt.**

Most everybody answers to "Moe" in Tetryl Pelleting. **Marge Zugel** is called "Pink Cheeks" and **Mel Hurwitz** is the "Reject King." **"Freckles" Brunetto** is noted for her angel food cake and **"Blondie" Pillsbury** for her pies. **Mary Haroldson** fries a mean chicken for those pot-luck meals.

Thanks are due the person who advised that **John Neely** be put in the lineup . . . a very timely suggestion at that . . . Group 9 defeated Group 8, 13 to 5. Yes, you guessed it, John played.

William D. Whaley, Group 9 superintendent, is enjoying (if the fish are biting) a week's vacation in Ohio.

If ever anyone has a couple hours off, ask **Howard Schubert** to tell the story "A Night in Chicago," by H. Schubert.

The parade at Joliet on the Fourth featured none other than our own **Anna Nordgardt**, who was queen on the float; our "Tetryl Twins," **Lois Peterson** and **Helen Shank**, and **Mary Stevens.**

Being surrounded by beautiful women employees seems to agree heartily with **"Mac" McCormick** and **Mike Malnar**, the two genial and well-liked foremen in 8-11.

The girls can kid **Mary Richards** about the invisible Cadillac all they want to, but it gets them to work on time.

We wonder if **Rose Blazekovitch**, 8-11 liner table, really believes in fortune tellers, or just fortunes.

Congratulations go to **Dorothy Close** on her recent promotion to Floor Lady in 8-11 dipping operations.

Clarence Seabert was married July 4.

Dorothy Bravick, 8-11, changed her name to Mrs. Dowdle over the 4th of July holiday.

Alice Bravato, 8-11, is sure a whiz with an eye dropper.

Congratulations are in order for **Mrs. William Fleming** who was Steffie Brentz, 8-11.

Ralph Pratt, chief inspector of Group 8, is engaged to **Lucille Kosick** of Joliet. It all took place last week.

Harryette Werling and **Frank "Bud" Hulbert** were married June 21 at the home of **Mr. and Mrs. Fred A. Werling**, Fairbury.

Group 8 played the Fuze and Booster Bus Drivers in a close and thrilling softball game July 2. The Bus Drivers were victorious 9 to 8.

Group 8 played Group 9 on the Group 9 field July 7. Group 9 ran up a score of 13 which proved to be unlucky to Group 8, garnering only 5 runs.

Group 2

EDWARD KEENAN

WILBUR GALBRAITH
Correspondents

Production has been resumed on Group 2's loading line.

Now that **"Boiler Maker" Joe Connors** has returned to the group after a fine vacation spent at good old South Amboy, N. J., our daily mail has been depleted somewhat. However, we all appreciated Joe's swell post cards.

Rudy Larson, foreman of Building 16, recently spent a week's vacation in the northern woods.

Archie Le Borence, our highly regarded key timekeeper, will leave shortly for a two weeks' vacation in the northern woods.

Jack McCarthy, assistant to **Joe Pate**, foreman, is another one of our men taking a week's vacation.

Everyone was mighty pleased with a letter from **Hilbert "Half" Nelson**, formerly a chief progress clerk here, thanking his associates for the farewell party tendered him before he left for the Army. He is now a private at Camp Grant.

Things We May Never See

Frank "Zeke" Gaglione running the bases after the first inning.

"Jersey" Klegman and **Bob Ardaugh** bringing or eating their own lunch.

"Nate" Johnson without a big smile or some "cat ate the canary" grin on his face.

Hair on **Bert Folks'** head.

Joe Connors shaving two days in a row.

Ed Keenan making two trips home to Aurora in the same week.

Karl Ulrich talking to someone without shaking hands three or four times.

Did You Hear?

"Wild Bill" Stanley is back in Group 2.

John McDonald is going to leave his hair grow out again.

John Kelahan can't get used to working in the daylight—the sun bothers his eyes. The same applies to **Bob Burke.**

Bill Galbraith has been swamped with offers from Hollywood since some of the scouts saw his fine physique at Lake Geneva recently.

The wild fish story **Otto Koch** tells about a bass jumping into his motor boat is really a true story.

Gene Hunt is assistant fire chief in charge of fire plugs at his home town of New Lenox.

Most of the blonde nurses at the Plant Hospital are just crying their eyes out because **Ed "Blue Eyes" Egan** has been released.

The Real Low-down

If anyone has an old sock of any description please leave it at the Superintendent's Office marked for **"Zeke" Gaglione.** We understand that he is having a hard time trying to get a pair of socks to go with his new softball uniform.

RIBBONS were won by both of St. Clair Smith's wire-haired terriers shown here, "Peter," left, and "Lucky," right, at the recent Skokie Valley dog show.

They say **"Shorty" Kirkland** (the short of all shorts) has quit bragging about his wife's cooking since he carried a house brick to work in his lunch pail.

Now we hear that **Bill Malone's** theme song is "Breathless," the reason being that after taking swimming lessons from **"General" Johnson** he nearly stayed down for the count of three.

They say **Art McMahon** should thank his lucky stars that **Johnnie Ala** was handy the night of July 3 when Art had the misfortune to burn out a connecting rod in his "jalopy."

Softball Items

The Group 2 Softball Diamond was dedicated with elaborate ceremonies followed by a game between the Machine Shop (Group 70) and Murphy's Boys. **James J. Murphy**, superintendent of the Group, threw out the first ball and everyone settled down to a good ball game, which ended 6 to 3 in favor of Group 2.

The second game on the diamond at Group 2 was between Group 1 and Murphy's Boys, with the latter winning 8 to 2. We are sure that **Supt. Joseph F. Salmon's** boys would make a better showing for themselves if only Joe would leave them wear shoes. Joe tried to pull one on us but we were just one step ahead of him. He put in fair **Betty Ford** to pitch for his team, trying to divert our batters' attention, but your correspondent is sorry to say that it didn't work because our Boys can sure keep their eye on the ball.

Murphy's Boys also took the Army Officers at a game on our home diamond. The final score was 4 to 3.

After more consideration Murphy's Boys decided they would keep their place in the Gold Medal League in Joliet. Other games have been booked and they will be glad to meet any challengers.

GROUP 3

WILLIAM BERINGER
Correspondent

Those two "house cleaning boys," **Fred Dvorak** and **"Red" Wyciskalla**, are in the spotlight again. They came to work the other night with nice new coveralls; by special permission of **Charles Hansen**, assistant superintendent.

It was a great loss to Building 3, when **George "Seabiscuit" Nichols** was transferred to Building 5A. Every foreman in Group 3 has had his eye on George for a long time. **Eddie Copp**, foreman of Building 4, even offered four of his men and $100 for "Seabiscuit." He must be a good man.

Arthur "Prairie Farmer" Fritz, janitor at Change House 20A, bought the cutest white cap. You should see it. The boys are betting 10 to 1 that it will be just as white next Christmas as it is now.

It cost **Robert Peters** 25 cents to see **"Tiny" Kautz**, foreman, lift a chair. It was a scream to see "Big Tiny" (he weighs 340) lying on his little "tummy" trying to pick a chair up with one hand. Anyone wishing to learn this little trick, just ask Tiny or Peters and they will tell you how it is done, and how to make a little money on the side.

If you want some hot tips on the races, see **Harvey Reavis.** He is an ex-jockey and he knows all the ropes. **Frank Underwood** can also give you a few tips, but don't take them or you will end up over the hill at the poor house.

Warren "Woodpecker" Morrison finally decided to join the navy. He left Group 3 July 10.

William Kavanaugh, sub-foreman in Building 16, was inducted into the army last week.

If you want to know how to get well in a hurry, ask **Don Mancini** about the letter he received from **Doctor "Chuck" Hansen.** It really did wonders for him.

The following notice was found posted on the bulletin board in one of the change houses at Group 3:

Gune 26, 1942

"Please do not spit on the floor or onder the tabels, by the Ganitor."

A group from Building 10 held a picnic June 28 at Starved Rock. A small group, including Ted, Joe, Steve, Kenney, Flip, Bruce, Slim, Bob, Scotty and Dick, made a good showing. A large number couldn't make the trip because of the rubber shortage. The above mentioned were led by their wives. A ball game was held and horseshoe pitching was enjoyed by all. Later, the party went on a boat trip where they met that well known **Skipper Remley.** Some time later another fellow known as Sid, who happens to be Building 10's only musician, made his appearance. The next morning when the fellows showed up for work, they found just how old they really are, and as for the sunburn, use your own imagination.

Tim McCarthy was taking an examination for the duties of a policeman. "What are rabies and what do you do about it?" was one of the questions.

"Rabies are Jewish priests and you can't do anything about it," wrote Tim.

Group 3-A

F. G. TAMBLYN
Correspondent

Supt. J. J. Fitzpatrick left for his vacation in the East July 8.

Everyone is wondering when the little girl who works in Fuze and Booster is going to say yes, so **Frank Renchen, Jr.**, can remodel that school house he bought from the area some time ago.

After six weeks of fruitless search for a first baseman, we have discovered a protege of Charlie Grimm in **George Costello, Jr.**

Leo Hopkins has joined the Marines. He says, "I want to slap a Jap in the Yap."

The fellows of Building No. 4 would like advice from the Group's most eligible bachelor, **Joe Haley**, on how to stay single.

We would like to know how we can get **Alfred Munch** back on the beam since he has fallen in love.

Thomas Patton is contemplating negotiations for the oat crop in our areas. They will feed a lot of horses, Pat!

The boys in Group 3-A think they have the champion eater in **Eddie Arnold.** His breakfast consists of 12 eggs, 1 loaf of toasted bread, ½ pound butter, 1 quart of milk and 3 cups of coffee. Anyone on the reservation who thinks he can come close, see Eddie.

Francis Joho, commonly known as King Joho, the Plainfield flash, is once more his happy self. He is back in the good graces of his girl friend.

The boys would like to know what: **Julius Nawrot** sees in fishing—**Jack Wilhoit** sees in a big blonde—**Roger Johnson** sees in the White Sox and why **Paul Timm** moves after 3:30 p. m.

William L. Schultz is the proud father of a 9½-pound daughter, **Sharon Joyce**, born June 30.

Chiropractor — "One who is paid for what other men get slapped for."

Bachelor—"A man who never Mrs. anything."

Armature—"A fellow who sings for Major Bowes."

Equator—"A menagerie lion running around the center of the earth."

Etiquette—"The noise you don't make when you are eating soup."

BICYCLING up and down the long passage-ways at Group 3 enables W. G. Read, assistant superintendent, to cover a lot of territory.

Sanderson & Porter Constructing Huge Power Plant at Hot Springs

Aluminum Parts to Go Into Planes Which May Carry Elwood Bombs

By Carroll A. Duncan,
Project Manager for Sanderson & Porter at Hot Springs, Ark.

Sanderson & Porter, for years specialists in the field of electric utility construction, are rushing to completion under Government contract a 70,000 kilowatt steam-electric power station at Lake Catherine, near Hot Springs, Ark., to supply electric current to a Government-owned aluminum reduction plant. The aluminum to be produced will be used for planes that will probably carry the bombs turned out at Elwood.

When completed, the power station will be large enough to supply the requirements of six cities the size of Joliet.

The power station is one of three major units in the Government's project to produce urgently required aluminum in this area. The other two units are the Bauxite Plant and the Reduction Plant. At the Bauxite Plant the ore is mined and chemically treated to produce "alumina," which, in powder form, is then carried to the Reduction Plant where by an electro-chemical process it is transformed into "pig aluminum," suitable for fabrication. It is in this second reduction process that so much power is required and the full output of the power station will be utilized.

Production Set Soon

The entire project will cost approximately $60,000,000 and is under the sponsorship of Defense Plant Corporation, a subsidiary of Reconstruction Finance Corporation. The Aluminum Company of America will carry on operations.

Although the project was not started until the beginning of this year, production of aluminum will begin in a matter of days, as several temporary power lines from existing sources of power have been brought into the project, pending completion of the power plant.

Sanderson & Porter's design for the power station building calls for two 35,000 kilowatt turbo-generators and two 420,000 pounds-per-hour boilers, with provisions for a future generator and boiler. The building will be located on the shores of Lake Catherine, and the excavation for the intake and discharge condensing water tunnels was carried down to a rock foundation, 18 feet below lake level.

To assure cool circulating condensing water, two 7½ foot diameter steel tubes will be extended approximately 300 feet out into the lake to a maximum depth of 50 feet. These tubes will probably be put in place by divers. A diversion dam has already been thrown across the lake to prevent the return of heated water into the intake system.

Natural gas will be used for fuel and an alternate fuel oil system is being provided to cover temporary failures of the natural gas supply. Provisions have also been made in the design of the plant and boilers to enable the use of coal if the supply of natural gas should become depleted. Western Arkansas has extensive deposits of high grade coal which could readily be made available.

The contract for the design and construction of the power plant was awarded to Sanderson & Porter December 31, 1941.

PROOF that it takes all kinds to do the war job is furnished by this picture of two EOP timekeepers. Ben Sloan, left, weighs 278 pounds, and Norman Ahrens, right, is credited with 98 pounds.

Letters to The Editor

(Continued from Page 2)

29, addressed Pvt. Rudolph R. Weise, Co. D, 38th Sig. Tr. Bn.

Surely had a great entertainment by reading over the EOP items, and news of boys of which I got acquainted with as fellow workers, from Groups 61 and 27. I congratulate them all for efficiency and earning promotions. Hello to O'Connel, head timekeeper, McShane and all employees of The Richard Farm Stock.

Hello to old pal Sergeant Bent of Personnel. Surely would appreciate very much if I could receive *The Bomb-Shell* while in service.

I was inducted into the U. S. Army March 13, 1941, voluntarily at Peoria, Ill.

Sergeant Rudolph R. Weise,
Camp Crowder, Mo.

P. S.—Glad to hear from any employee wishing to write. "More the merrier."

Dear Sir:

I received *The Bomb-Shell* Monday and I think it is a very interesting paper. It makes a soldier feel better to think everyone is working together to get this war over with. I did work up there for Mr. McAloon driving a truck, then I was driving a bus but now I am down here in Missouri in the Engineers Corps, which is a good outfit to be in. When you leave here you are a full fledged engineer. I know quite a few of the fellows that work there because I worked there over a year until the Armed Forces called me to service. I just hope you still continue to send *The Bomb-Shell* out to your old employees.

Russell (Pinky) Eyerly,
29th Engineer Training Battalion,
Fort Leonard Wood, Mo.

Dear Sir:

I received the two issues of *The EOP Bomb-Shell.*

It is a most interesting paper, and having worked at the plant myself I am especially interested in the paper. It's like news from home.

Hoping you will continue to send me the paper during my stay here at Great Lakes.

Harold Conrod,
Great Lakes, Ill.

Dear Editor:

Just received a copy of *The Bomb-Shell* and was sure glad to read some news of the old plant, especially Group 2. The boys down here are all wishing you the best of luck from now on. Us soldiers think if we were up there we could win a few games of ball. So look out if we get up in that part of the country. Tell the boys that the Army is a pretty good place after all. Well, have no more to say, so keep 'em shooting.

Pvt. William C. Kennedy,
Fort Sill, Okla.

Dear Sir:

I have received the last two issues of *The Bomb-Shell* and enjoyed reading them immensely. I am hoping to still receive *The Bomb-Shell.* My new address is:

Pvt. Harlow F. Hanson,
Ohio Institute of Aeronautics,
Columbus, Ohio.

P. S.—Please get a reporter busy over in Group 4, Building 14, where I formerly worked.

To the Editor:

I want to thank you for your copies of *The Bomb-Shell.* I think it is a grand paper, and I enjoy reading it very much. I worked in the timekeeping department before I was selected for the Army.

Pvt. Frank J. Houser, Jr.
Atlanta Q. M. Motor Base,
Atlanta, Ga.

Hello Everyone:

I just received two issues of the new plant paper, *The Bomb-Shell,* and want to write and say thanks a lot. I think it is swell. All the fellows here in the Air Corps had to read it, and all think it is tops.

One thing in particular that interested me was the picture of the loading line in Group 1. I recognized several of the fellows and all look familiar.

I worked in Building 13 with most of those boys. I can't express my appreciation enough for the paper. It is wonderful. It takes a fellow's mind off the everyday drudgery of Army life and places him back in his old familiar setting.

So "keep them rolling" and all the fellows in the Air Corps will "keep them dropping" and when we run across an EOP bomb we will drop it right in Togo's lap. We promise you that.

So long, EOP.

Yours sincerely,
Pvt. Leland L. Wright,
Jefferson Barracks, Mo.

THUMBING a ride is seldom necessary for Vic M. Dagenais, section chief of supplies and office equipment, who is usually busy with obtaining transportation for visitors and employees.

Special Morning Shows

The Mode Theatre in Joliet announces an early morning show for EOP workers beginning Tuesday, July 21. The doors open at 10 o'clock, the show begins at 10:30 and is over at 1 p. m. This policy will be followed on Tuesdays, Thursdays and Saturdays to be extended six days a week if it proves popular.

Fire

STUART MOLONEY

FRANK J. SKOFF

Correspondents

Frank Scoma bragged the other day: "I learned to cook that southern way back home." Probably the southern part of Sicily!

Sergeant Alar should 10:08 in much faster time when at Group 8.

The boys have done a nice landscaping job at Central Station. Now everybody can tell right away that there is a fire station in the vicinity.

"Woe is me," says **Sergeant Hanson,** "no more snuff boxes allowed in the Groups."

Bob Connelly should tell us more about that golf match with the Guards (**Sergeant Bayer** informs us—and we believe him—it wasn't necessary for them to stoop to using a "short pencil").

Dinner at Central Station the other day produced a miracle. There was no "boarding house reach" after edibles by long-armed firemen—no raucous yells to "pass the ——— bread" — no stories about owls. Everybody was neatly and cleanly dressed, freshly shaven, and polite to the point of nausea. Each man tried to out-Brummel the other. . . . What was the reason for all the lads making themselves so pretty and refined?

Fire Inspector Collins will challenge anyone, Guards preferably, to a mile foot race. The outcome will be judged by **Stuart Moloney** and the Fox; in case of disagreement between the judges, only the Fox's vote will be counted, of course.

PARADE MARSHALS in Joliet's Fourth of July parade were Lt. Col. Don M. Hoffman (left), EOP commanding officer, and Lt. Col. H. L. Kalbach, KOW commandant. Behind them are shown, left to right, Lts. Volney Tullsen, W. R. Bowman, J. S. Gates, W. J. Durrenberger, P. D. Cooper, M. G. Brandon, C. R. Crandell and C. H. Beilharz.

Material Warehouse

FRANK McCORMACK
Correspondent

Every time that we get one of our young men broken into the correct precedure of handling and checking material, along comes Uncle Sam and away goes our employee. **LeVerne Lindstrom** has had his heart set on serving with the U. S. Marines. So instead of waiting for Uncle Sam's call, he has been accepted after many trips to the recruiting office. Lindy promised to send us an Italian for breakfast, a German for dinner and a Jap for supper.

When **Fred Wachendorfer** saw a crowd around the swimming pool the other day, he stopped to see what it was all about. Insted of a trained seal as he had expected, he saw our government checker, **Frederick Doubeck,** swimming around with his head up and his mouth open, catching peanuts tossed in by the on-lookers. Doubeck says that the proper way to keep fit is to swim every day and eat nothing but vegetables. He is so full of rabbit food now that instead of walking he hops around.

Cyril Lazier has been very successful in side-stepping the women. But now that the laundry is in operation across the road, it looks as though the girls are closing in on Cyril.

It has been suggested that a hitch hikers depot be installed on the Chicago Road, south of Joliet. The employees of the EOP could pick up any fellow-employee that they have room for in their cars.

General Offices

MAE BELLE ANDERSON
Correspondent

Ed Larkum, labor cost distributor, is in Silver Cross Hospital, Joliet, resting up from a rather serious heart attack.

Charles Connell, labor cost distributor, spent the holidays, plus another day, at London, Ontario, speedy trip, but delightful?

Ray Shepley, our genial timekeeper, left July 8 to don a uniform in the armed forces. He will be missed by all throughout the building.

Fred Oman and **Henry "Hank" Lockwood,** engineering, will soon be leaving to take positions with a firm doing work for the government at the defense base in Honolulu.

George Altstadt and **Larry Wohlweber** are stagging it together this week. Their wives are enjoying the country life, in other words, a vacation away from the city.

Polly Marston, mail and records, has returned from her vacation full of vim and vigor. Polly and hubby enjoyed (in spite of it being so cold that six thicknesses of clothing were necessary) that good old country air up near Eagle River, Wis.

Rosemary Kane, Jean Himes, Jean Tyrell, and **Wilhelmine Roeder** staged a weiner roast June 30 at the Troy Forest Preserve in honor of the birthdays of **Edith Lewis** and **Jackie Dailey.**

Jackie Dailey is back with the crew after spending a week's vacation touring around the southern part of Illinois.

Marge Brennan is taking a course on the key-punch in Chicago. She will be holding down the position now held by **Ruth Johnson,** who is leaving July 18.

Wedding bells tolled July 7 for **Evelyn Reed,** executive office receptionist, and **William Murphy,** Fuze and Booster. **Father Pishone** officiated at the high mass at St. Rose Catholic Church, Wilmington. **Virginia Cashen** was maid of honor. **Howard Cox** was best man. After the wedding a reception was held in the home of the groom's parents in Wilmington. Mr. and Mrs. Murphy will reside in Wilmington upon their return from a short honeymoon.

In the Sievert Tea Room on June 29 Miss Cashen and **Marjorie Howerton** entertained at a personal shower in honor of Miss Read. The guests included **Arlene Thorson, Anna Mae Thompson, Shirley Grassle, Eleanore DuFrain, Veranice Quade, Rita Dwyer, Geraldine Drechsel, June Kaehlert, Beatrice Bovee, Maxine McBride, MaeBelle Anderson, Katheryn Johnson, Mary Clow, Emalie Mueller, Mrs. Jeanette Larson, Mrs. Ruthe Myers** and **Mrs. W. D. Murphy.** Airplane Bunco was played and prizes were won by Miss Bovee and Miss Drechsel, who in turn presented them to the guest of honor.

SOFTBALL PROWESS and a mastery of foreign languages are accomplishments of Major A. C. Johnston, executive officer.

Women

By CATHERINE NOONAN

The other day we took a trip through some of the groups in the Fuze and Booster area in search of what girls put in ye old lunch box. We were in frantic search of "that something different" to pass on to other girls that would break the monotony of the bologna sandwich (on white, rye, or whole wheat, it's still bologna). Not any of the girls had any suggestions for a different kind of sandwich. So if you are in possession of some magic formula to make the lunch box a joy, won't you please send it to us at *The Bom'-Shell* office so that we can pass it on to the other girls.

When your son, brother or husband comes home on furlough, he probably brags about the Army bread to your utter consternation. The Army bakers have had many flattering requests for the recipe used in making bread for our soldiers. The formula for the Army loaf, developed by the Quartermaster Corps, ordinarily is based on a hundred man supply. The bakers at Camp Blanding, Florida, have broken down this famous bread recipe to a two-loaf quantity, suitable for home use. Here are the directions:

Materials include two pounds of flour, two cakes of yeast, six and a half teaspoons of salt, nine and a half teaspoons of sugar, one and a half cups of milk and 13 tablespoons of shortening. Dissolve the yeast in a half-cup of tempered water. Mix salt, sugar and milk, and add yeast slowly. Add slowly about half the flour to this mixture, meantime constantly stirring. Add the rest of the flour and mix with the hand. Cut the shortening into this dough and set the dough in some warm spot to let it rise. The first rise will be completed in about 50 minutes, after which the dough should be punched down and then let stand for 12 more minutes. Shape the dough into loaves and bake for 55 minutes in a 450 degree oven.

After having packed hundreds of lunches for the munition workers in your family as your contribution to the war effort, you, the lady of the house who is not engaged in active defense work, probably bemoan your fate and wonder what you can do to help. Moan not. Your Government has sent out an SOS to all housewives and there are many things that you can do.

Saving kitchen grease isn't the most exciting job in the world, but it really is an important one at this time. We have lost a good half of our imports of oils and fats just when we need them the most. We need them for food, paints, varnishes for planes, explosives, tanks and medications. Your Government is asking you to salvage all the greases that ordinarily are wasted in the kitchen.

Your first step is to get a pound size tin can with a wide mouth (the kind your vegetable shortening or your coffee comes in is perfect). Scrub it out so it's scrupulously clean, and put it on the back of the stove or where it is handy. Save every drop of grease from roast ham, beef, lamb and poultry; all the drippings from broiled steaks, chops, veal and bacon, every ounce of lard or vegetable shortening in which you've cooked doughnuts, French fries, fish or anything else you fry in deep fat. Strain these fats into your wide-mouthed tin can and keep in your refrigerator or some cool place until you've collected at least a pound of grease. Be sure that it doesn't grow rancid because then the glycerine content will be lessened. When you have a pound or more take it to your meat dealer. He will pay you for it and start it on its patriotic journey.

Antiques take the spot light, and that cherished dream of yours about being an antique hunter is about to become true. Especially, if you will confine your interest to hunting for rubber antiques.

Ninety-seven per cent of America's former rubber sources have been cut off by you-know-what. Therefore, you have the job of looking from the attic to the basement for every bit of rubber that you can contribute to your local salvage depot. No one in your household will be safe from your clutches in your search for the commodity that is more precious than gold at the present time. Get the men in your family to gather the old garden hose and old tires and tubes. In the meantime you can be looking for old hot water bottles, rubber gloves and aprons, galoshes and what have you. If you will carefully explain this crucial situation to that roly-poly baby of yours, he will gladly surrender his old rubber pants.

Don't overlook anything made of rubber—large or small—old or new. Even if the life has gone from it, don't think that it is valueless. Remember, most of it can be reclaimed.

Now you have a defense job right in your own home that makes you a major part of the war effort.

Personnel

LEE R. REYNOLDS
Correspondent

The cast and chorus of "H.M.S. Pinafore" met at the home of **George F. Bent**, personnel director, July 9, for a steak fry before rehearsal. Chorus work for the production is rapidly shaping up. The next meeting will be held at the First Presbyterian Church on Western and Raynor, July 17.

We heard from our old friend **Arthur Erickson**, a valiant fighter against the malicious and devastating disease. Art reported that he has to report to Naperville Sanatorium in two months and if passed by the doctors then he will be coming back to us.

Evelyn Connor, who has been out since April, returned to work July 13.

Charlotte Doxsee, one of the old timers in Personnel, is missed very much since her transfer to the Administration Building.

More for Cast of "Pinafore" Sought

If you want a fling at the footlights and the glamorous life of the theatre, **George F. Bent**, personnel director and originator of EOP's first operatic venture, "H.M.S. Pinafore," is looking for you.

Although rehearsals have been started and many of the parts have been cast, Mr. Bent is still talent scouting for a baritone, tenor and a bass. So wherever you are, whatever you are doing, don't continue to hide your light under that proverbial bushel, but see Mr. Bent at once.

In the cast and chorus are **Arthur Friedberg, Walter Peterson, Catherine Gorey, Harry MacRae, John V. Wall, Viola M. Leith, George Kellenbach, Warren Weithofer, Helen Bardi, Floyd C. Schauland, Marcella Burnham, J. Donald Kane, Norma Fratia, Bernadine Phelan, Mary V. Odenthal, Robert Wilhey, Leona Hagen, Ray McGuire, Eugene Staehling, Leonard A. Pease, Lee Reynolds, Dara Prew, Mary L. Grady, Hazel O'Connor, Jeanette Carlson, Edna Goldthwaite, David Graves** and Mr. Bent. The production is under the direction of **Arthur Eneix.**

SMILE GIRL of EOP should be the title of Arlene Schloendorf, mimeograph chief and menu cartoonist. Her winning personality, so vividly shown here, is evident in all her works.

Patterson on KP Duty When Call Received

(Continued from Page 1)

son of Charles R. and Lodice E. (Porter) Patterson. He received his education at Union College in Schenectady, N. Y., from which he received a B.A. degree in 1912, and at Harvard Law School, from which he received his Bachelor of Laws degree in 1915. He served as chairman of the "Harvard Law Review" and was Marshal of his class in his third year.

Immediately after graduation from Harvard, Mr. Patterson was admitted to the New York Bar and (except for service in the Army), practiced law in New York City for the next 15 years. He joined the law firm of Root, Clark, Buckner and Howland, remaining with this firm until 1916, when he resigned to go to the Mexican border with the 7th U. S. Infantry. On May 15, 1917, he received his Commission as Second Lieutenant, Infantry Section, Officers' Reserve Corps, and was placed on active duty at the Reserve Officers' Training Camp, Plattsburgh Barracks, New York. Three months later he was commissioned a Captain of Infantry and assigned to the 152nd Depot Brigade at Camp Upton, New York.

On April 13, 1918, Captain Patterson left the United States for service in France with the 306th Infantry, and served in the Baccarat, Vesle and Foret-d'Argonne defensive sectors and in the Oise-Aisne and Meuse-Argonne offensives. He was cited in General Orders: for "extraordinary heroism in action" and for gallant and meritorious action on the night of August 11, 1918. On August 14, 1918, he was awarded the Distinguished Service Cross. Two days later he was wounded in action, but was again cited in General Orders for gallantry on September 26. On March 26, 1919, Captain Patterson was promoted to Major of Infantry, and was assigned to command the 2nd Battalion, 306th Infantry. One month later he returned to the United States, and on May 27, 1919, was honorably discharged from the military service, shortly thereafter returning to the practice of law as a member of the firm of Murray, Aldrich and Webb. He continued with this association until 1930 when **President Herbert Hoover** appointed him Judge of the United States District Court, Southern New York District. His services were outstanding and he established a record for non-reversals in the higher courts.

In March, 1939, President Roosevelt elevated Judge Patterson to the position of Judge of the Circuit Court of Appeals, Second Circuit, as previously stated, the second highest court in the land. Here again, his services were outstanding, one of his most prominent decisions, perhaps, being the upholding of the conviction of **Earl Browder** for passport fraud.

One of Judge Patterson's first actions in 1940, after his nomination as Assistant Secretary of War, was to urge the adoption of a system of compulsory military training. He expressed the opinion that this was the only democratic way to raise an army for the United States. At the same time he urged that the Secretary of War be given authority "to vitalize the active list of the Army, removing therefrom those officers who are unable to stand up under the strain to which they must be subjected, if we are to build up a modern army capable of meeting the demands of modern combat."

Judge Patterson was married in 1920 to the former **Margaret T. Winchester.** Their four children are **Robert P., Aileen W., Susan H.,** and **Virginia.**

Group 1 Girls First Chosen for Line Jobs

(Continued from Page 1)

women in Group 1. She has the ability to understand problems and the knowledge to solve them. Since September, 1941, Miss Taylor has been absent only two days due to illness (*truants, please note*). "One of the factors that contributes to making my work pleasant is that the turn-over of employment in our group is so small that it is negligible. Another is that our girls adjust very easily to the work and have a splendid record of attendance." These factors, indeed, are a fine tribute to Miss Taylor's skillful management.

Miss Busby's home is Laurel, Miss. She was in Louisville, Ky., doing office work when she was called to EOP to be the first woman employed, and is now the forelady of 18 girls. "My present work is vastly different from the office work that I had been doing. But I like this new job very much. Here there never is a dull moment. I like the different associations and the new personalities." To prove her point, Miss Busby also has had a remarkable record of attendance.

Miss Taylor and Miss Busby admitted that the two most difficult problems confronting the women in their group are transportation and what to put in the lunchbox. They agreed that the women faced these problems with a sense-of-humor and that the problems were minimized by the important work that they were doing.

Without taking any risks whatsoever, it can be said that Miss Taylor and Miss Busby are two of the most charming women in the area.

They are far, far removed from our be-bustled and be-pompadoured sisters who first entered the "men's world." They are attractive, well-groomed women who perform their jobs with efficiency, tact, and ease. During their working hours, they wear tailored blue denim uniforms with contrasting dickeys (the dickeys are their own contribution). Although they hold responsible positions in a highly competitive world, they are still feminine enough to know what a good manicure and artful makeup can do for a woman's morale. Both of them have the respect and the loyalty of the women who work for them. In spite of questionnaires and all that, Miss Taylor and Miss Busby prove that it can be fun to work for a woman.

When Miss Taylor and Miss Busby were asked if they had had any unusual experiences since they have been at EOP, they both looked at each other and laughed, remembering an incident that happened many months ago. "When we first started the night shift," Miss Taylor said, "There weren't as many women in Group 1 as there are now. As a matter of fact, we were the only women in the entire area. Naturally, we felt a little strange due to the adjustment of new work. Well, everything was going fine and then something happened to the lights, and we sat in darkness for half an hour. I'm afraid that our reaction was purely feminine. But it was an eerie place without lights. So we sat in the dark consoling each other until the lights came on again."

Today, to the women in Group 1, that incident only invokes laughter. They have a big job to do and they're doing it.

PREDICTION OF JULY 10 date for general office moving made by Chief Engineer A. E. Frosch proved to be almost perfect prognostication. He is shown figuring it out.

EOP Nine Wins First Game on Home Diamond

Softball Games Now Scheduled Regularly in Area

The EOP baseball nine won its first game on its home grounds July 10 by defeating the Moran Crackers 6 to 5 in a 10-inning duel.

Jack Kusinski has the EOP softball team rolling along at a merry clip. Since Jack has taken over the team they have not lost a single game, and if Jack has anything to say about it they won't lose one.

The three moundsmen, **Les "Horse" Tammen, Ed Washburn** and **Lou Haake** take their turn at pitching and the rest of the boys just set out to wear the opposing pitcher out and it's demoralizing to play a gang like that.

The boys have been playing in the Joliet Industrial League, having won the round just completed, but because they also play on various group teams will be unable to compete in the Industrial League. The EOP League plays on the same nights.

A girl's softball league started play last week down in Fuze and Booster. **Helen Kammerman** is manager of Group 4. **Florence Keller** manages Group 5. **Gertrude Freeman** manages Group 6; **Martha Bintzler**, Group 7; **Dorothy Lehman**, Group 8, and **Mathilda Delrose**, government inspectors. There is also a girl's team in Group 1. Guess they ought to do fairly well, too, with **Betty Ford** on the mound.

"Red" Bentington and **Stewart Marlett** are trying hard to get a softball team out of the Administration area.

Tot Takes Scrap Plea to Heart

Joseph K. Szwaja, mechanic at the Service Garage, really has a patriotic youngster in his 8-year-old son. **Joe Junior** was asked by his school superior to collect scrap rubber for the current campaign. He promptly removed all rubber heels from shoes at home, cut off the garden hose (he couldn't loosen the connection) and even took his mother's hot water bottle as well as dad's overshoes, turning over a neat little pile of "scrap" rubber to Uncle Sam. Old Joe didn't have the heart to punish the boy and is in hopes that this will not happen again.

FUN

You Can't Beat It!

By "TINY" CAHOON

Guess it pays to cry out because I found a piccolo player and the concert band situation is much brighter with several new registrations.

The golf tournament news came in too late for last issue. **Ed Swanson**, timekeeper in Group 70, won the Banker's Handicap 85-18-67, and **Herman Stonitch** blasted out a neat 73. Four other players carded in the seventies.

Did you read about **Betty Ford**? She didn't do badly against Group 2 last week.

Frank Wehrle's baseball team is going along fine, winning as they go. You can see some all around good play watching the team. And can **Bob White** ride that apple? When a Wilmington outfielder panted up to a long one he picked it up and then dropped it yelling "it's still hot." When Bob has nothing to do but school work he negotiates the "pig skin" for **Bo McMillan** and the University of Indiana. He's captain-elect for 1942.

Group 3 held its own group dance last week. **Red Boucher** and **Bruce Fahrner** headed the committee. **Chuck Hanson**, Assistant Superintendent, was a guest and he says that **Ed Wicks** is the funniest person he has ever seen and if you don't believe it ask Sophie Tucker. Ed was master of ceremonies on Sophie Tucker's program for years.

Thanks, youse guys and gals, for trying out for "Pinafore." It's fun, isn't it? We nearly have a full cast now.

You trap shooters (I mean with guns) can rush the cause along by locating a good spot off the area.

The "Bomb-Shell Revue" is going along nicely but there is still plenty of room for that fine talent not yet reported.

In a softball game between the Army and the Administration boys **Maj. A. C. Johnston** retired the last three batters with something like black magic and sewed up the game.

With softball, baseball and golf teams doing so well I wonder just how much interest we would have in an EOP football team. If you would support a good football team, just drop me a post card.

By the way, **Rennie Ryan**, my secretary, made no mistake in typing about **Bob Walsh** being a champion. His family are all great golfers, it's true, as **Dick Lowery** said in his column last issue, but champions still must carve their own niche.

Helen Skumonich, Group 5, sent in the names of **Helen Cusick** and **Josephine Cosgrove** and her own as wanting a girl's golf tournament. How about it, girls, would you like to have an EOP tourney?

I am expecting the archery sets any day now, so call me "William" and "Tell" me that you will try them out. Where did I get that?

Bob Stewart is working with some fine swing band talent these days. I heard one rehearsal from a distance and complimented him on the group, then he told me it was only an accordion player. What can you do with a guy like that?

The people in the know say that **Karl Ulrich**, assistant safety supervisor, is an authority on birds. If the lady who told me about seeing Karl with a flock of sparrows will call again we will start a bird club.

MURPHY'S BOYS are shown here as they posed at the dedication of their Group 2 softball diamond. Standing left to right are: Eugene Hunt, manager; George Zobel, captain; Harold Spiers, Owen Golden, James J. Murphy, superintendent. Group 2: Lawrence McKeon, Kenneth Peterbok, Raymond Murray, Wilbur Galbraith, manager. Bottom row: Frank Gaglione, Andrew Feeney, Joseph Furlan, George Schoppe, Edward Keenan, Robert McGuire. Robert Murphy, Donald Bryant and Otto Koch were not present for the picture.

CHAMPIONS are included in this aggregation of golfers snapped at the first EOP tourney at the Crystal Lawns Country Club. Shown standing, left to right, are Bob Walsh, Group 3-A; Russ Stevens, Group 60, and Ed Swanson, Group 70. Squatting are Heinie Sick (left), Crystal Lawns pro, and Bob Burke, Group 2.

Bob Walsh Wins EOP Golf Tourney

The EOP Golf Tournament held at Crystal Lawn Course in Joliet July 12 was well attended and fine scores were posted in spite of a very strong wind that had many of the players in trouble.

The Banker's Handicap was won by **Bob Walsh** with a 75-2-73. He also came in with low gross for the eighteen holes. Following are the next nine men and their low gross score.

Armand Vicinni	39-37=76
Ed Swanson	40-37=77
Marvin Bell	41-37=78
H. H. Bowler	41-38=79
Roger Wheatland	41-38=79
R. H. Watt	43-37=80
Owen McCarthy	41-40=81
Tom French	42-40=82
Gene McAllister	42-42=84

Other prize winners were: **Bob Marlette**, Group 3, two high holes, a brace of nines; **Armand Vicinni**, Group 1, 2nd low gross, 39-37—76; **Swanson**, Group 70, 3rd low gross, 40-37—77; **Wheatland**, Group 66, three low holes, three threes; **Fred Vicinni**, guest prize, low gross, 40-40—80.

EOP Summer Carnival Scheduled for August 8 in Recreation Building

H. H. Bowler Is Named General Chairman to Plan Entertainment for Workers and Friends

The Elwood Ordnance Summer Carnival will be held in the Recreation Auditorium Saturday, August 8, with an admission fee of $1.25 a couple. This party will be run along the same lines as the last party in that outside partners of EOP employees may attend.

The Carnival idea should be very interesting and novel. On the ground floor of the Recreation Building, booths will be set up with their backs to the bowling alleys and the regular carnival program will take place in these booths.

There will be about twenty of these booths to be occupied by the first groups asking for them. There will be very desirable prizes given to the groups either for decoration or business transacted in the booths or both.

The Auditorium will be reserved for dancing and a splendid program is being arranged by a committee. The band that will furnish the music will be announced in the next issue of *The Bomb-Shell*.

The committee includes **H. H. "Red" Bowler**, general chairman and publicity; **H. E. Hafele**, music; **E. V. Sperling**, arrangements; **Carl Anker, Karl Ulrich** and **Ed Craik**, decorations; **Marion Hyland** and **Mildred Delaney Rub**, tickets; **Helen McGinnis**, program; **R. C. Wilhelmi** and **Annamarie Kinney**, refreshments, and **John Olson**, treasurer.

Dr. Schultz Receives Pedigreed Dog from Friends

Dr. H. L. Schultz, chief of the EOP Medical Department, was presented with a wire-haired terrier by a group of his friends July 11. Under the leadership of **St. Clair Smith**, superintendent of the High Explosives Department, a fund was raised with which to purchase a dog to replace the one which was lost by Dr. Schultz. In the presence of the contributors to the fund, appropriate presentation remarks were made by **James J. Murphy**, superintendent of Group 2.

After the dog, known as "Boots," but registered as "Actress of Anneswood," was contracted for, she was entered in her first show, July 5, at the St. Louis County Kennel Club and won first prize in the all breed puppy match.

Notice to Employees—

Payroll Allotment Authorization for Purchase of United States Series E Saving Bonds

- New employees may participate in the plan by executing a Payroll Allotment Authorization Form which should be carefully filled out in order to provide Sanderson & Porter with all essential and necessary information.
- Any employee desiring to increase his or her weekly payroll deductions may do so by giving written notice (by letter) to the Payroll Manager, Sanderson & Porter Payroll Dept., Administration Bldg. Such notice should be made at least (10) ten days before payroll deduction date.
- Any employee desiring to make a change in Co-Owner, Beneficiary or address may do so by giving written notice (by letter) to the Payroll Manager, Sanderson & Porter Payroll Dept., Administration Bldg. Such notice should be made at least (10) ten days in advance.
- No partial withdrawals may be made from the accumulated deductions, nor may they be assigned for loans or otherwise.

JOHN F. DOLAN, Manager,
Payroll Department

OUT AT HOME was Lloyd Widup when he was tagged by Catcher Andrew Feeney in this action shot taken during the Group 2-Machine Shop game.

ELWOOD ON PARADE

PLANT PROTECTION is the job of the units shown here marching in the Joliet Fourth of July parade. In the lead are the members of the Guard unit, followed by the Police Matrons and the Fire Department representatives.

LIFE IS GIVEN to the EOP floats in the Joliet Fourth of July Parade by the presence of girls from the Fuze and Booster groups as shown here in the front, followed by the trucks bearing various sizes of bombs.

INTERRUPTION TO WORK was kept at a minimum during the moving of offices resulting from the completion of the extensions to the two wings of the Administration Building. Shown at the typewriter is Virginia Krause, secretary to Assistant Comptroller George B. Pumphrey, while R. L. Voss, superintendent of the administration area, directs Harry H. Roberts, front, and John Perino, back.

RAPT ATTENTION is given John O'Connell, chief of the Timekeeping Department, when he addresses a meeting of his men. Pictured here are Bernard McShane, Milton Treitel, Robert Balma, Archie LaBorence, Harry Knarr, Grant Stilt, Arthur Couch, William Prindle, Elmer Dames, Frank Zupancic, Glenn Allen, Ben Sloan, Lawrence Holz, Paul Lauer, Charles Di Peso, George Barr, Clyde Mulligan, Paul Donahue, Thomas Ashton, James Murphy, James Hynds, Charles Swanberg, Joseph Bandino, Orville Bacon, Paul Zankowitz, Conrad Howard and Norman Ahrens.

A PREHISTORIC MONSTER is the impression created by this giant scoop used by EOP'S road building organization when four supervisors were photographed while studying a blueprint. Shown left to right are John H. Ryan, supervisor of grading; Charles Irving, supervising roads engineer; E. L. Schuyler, grading foreman, and Irving "Red" Harbour, superintendent of road and highway maintenance.

Harrison Plays Planning Role in Building EOP

Brigadier General On Scene Early As Plant Was Started

By Harrison Smith

Brig. Gen. William H. Harrison, until recently Director of Production, War Production Board, was appointed a Brigadier General, and Director of Procurement, Headquarters Services of Supply, June 27, 1942.

General Harrison was given leave of absence as vice president of the American Telephone and Telegraph Company in order that he might become associated with the defense program. He was appointed Director of the Construction Division of the National Defense Advisory Commission on July 9, 1940, for service with **Lieut. Gen. William S. Knudsen.** On January 18, 1941, he was appointed Chief of the Shipbuilding and Construction Branch of the Office of Production Management, where he served until September 8, 1941, when he was appointed Director of the Production Division of the War Production Board.

On December 1, 1942, eleven days after the beginning of permanent construction at Elwood, General Harrison made his first visit to the Elwood plant, in his capacity as Director of the Construction Division of the National Advisory Commission. On this first visit, with War Department officials, General Harrison joined in the discussion with representatives of Sanderson & Porter and the Army, of the proposed plans for carrying on the construction work. Subsequent to this visit, General Harrison made many other visits. On occasions he came unannounced, with a desire to observe for himself and unchaperoned, the progress of construction. On other occasions he held conferences with executives of Sanderson & Porter and the Army on various phases of the work, his comments and suggestions always being pertinent and directed along constructive lines.

Remains in Touch

General Harrison has never lost touch with the progress of Elwood. When the first loading line was placed in operation on July 12, 1941, he was one of the first to be advised of it. Since the beginning of operations General Harrison has shown, on numerous occasions, his interest in Elwood Ordnance Plant and the welfare of its people. By his friendly and helpful attitude he has done much to create in all of us a feeling of confidence and respect, and a desire to so conduct our business as to receive his commendation.

General Harrison was born in Brooklyn, N. Y., June 11, 1892, and received his early education in the Brooklyn elementary and high schools. He entered the services of the Bell Telephone System in 1909, at the age of seventeen years, as a repairman in New York City. Later he became a member of the Engineering Department of the Western Electric Company, a Bell System subsidiary. During his employment

(*Turn to Page 2*)

". . . troops need the munitions you are producing . . ."

BRIGADIER GENERAL WILLIAM H. HARRISON
Director of Procurement, Services of Supply

"WITH THE ENERGY, knowledge, and skills of this country devoted to the protection of our way of life you men and women of the Elwood Ordnance Plant have shown by results the recognition of your responsibilities.

"Your jobs require skill—discipline—devotion to the job—and the other requisites which make good soldiers.

"Our troops now at the various fronts need and will effectively use the munitions you are producing.

"The Elwood Ordnance Plant has proven its competence and ability—we are counting on continued results—for *NOW* is when the need is urgent.

—Brig. Gen. William H. Harrison.

Gerber Heads New Ordnance Division

Col. T. C. Gerber, former EOP commandant, has been named Field Director of Ammunition Plants for the Ordnance Department, with headquarters in St. Louis. Representatives of munition plants met here July 20 to hear details of the proposed operation of the new division under the Chief of Ordnance.

Munition Workers Served by USO

When the plea for funds for the United Service Organization is made to you, remember you, too, are eligible for USO services at their headquarters. EOP employees gave more than $4,200 last year. Superintendents of the various groups will handle the solicitation this year.

Leave Your Telephone Number with Family

Employees are requested to leave with their families their time clock number, group number, building number and telephone number where they can be reached so that incoming calls at the plant for them can be handled without complications.

First EOP Girl Leaves to Take WAAC Training

Alice Pichon One of 41 from 5500 to Be Accepted

Although definitely not a message of love, **Alice Pichon** regards the missive she received July 16 in a small post office at Braceville, Illinois, as the most thrilling letter of her life. The letter was an official acceptance from the WAAC for officers training at Fort Des Moines, Iowa.

"I had completely given up hope," said Miss Pichon, first EOP woman to join the "Wacks." "As a matter of fact I didn't open the letter right away because I thought that it was a formal thank you and the reason for my rejection. You see, I was supposed to be notified one way or the other immediately following my last interview on June 22, and here it was July 16. Well, you can imagine how I felt when I read that I was to report at Fort Des Moines on August 3 for the officers training course."

After two penetrating interviews, a mental alertness test and a physical examination, Miss Pichon was one of 41 women selected for the WAAC officers training course out of 5500 applicants in the Chicago area, Sixth Corps.

"The thing that I am getting the biggest kick out of right now," Miss Pichon said, "is that I am on a furlough just like the men in the army get."

Worked in Cafeteria

The first week in June Miss Pichon started her duties as supervisor of the private dining room at the EOP cafeteria, never realizing that she would have an interview a few days later that would lead to an army career. Prior to that week that will probably change the whole course of her life, Miss Pichon was a home economics teacher for three years at the Oakland Township High School at Muncie, Ill.

A mental alertness test, the same as taken by men recruits, is the first step in the preliminary routine of a WAAC candidate. Others fail when asked the square root of 3⅞ miles by pi when A is walking east in the rain and B isn't doing anything at all, but Miss Pichon isn't defeated by this kind of child's play.

After her mental alertness was established to everybody's satisfaction, she had her first interview with an army officer and two experienced personnel women at the recruiting station in Chicago. "My appointment was for 12:30 but I didn't have my interview until 4:30. I think that this was done on purpose to test our nerves. Not all of the women could stand the suspense."

Almost Missed Test

Miss Pichon not only stood the suspense but was completely at ease under a barrage of questions and microscopic scrutiny by experts in detecting undesirable mannerisms, emotion instability and any other qualities that would detract from being a good officer. "I was asked why I wanted to go

Employees Set Pace

We believe that the extravagance sometimes associated with war industries is missing in the operation of the Elwood Ordnance Plant. This most satisfactory state of affairs is due to the efficiency of our workers and their co-operation with the management in requiring strict observance of rules, and in setting a good example. Great credit is due to the large majority of employees who feel and know that their work at EOP is a definite contribution to winning the war. The inspiring messages which employees have received from men whose efforts in behalf of their country have been outstanding, attest to the importance of the work of this plant. This knowledge is responsible for the fact that many employees have set their own standards of conduct and insist that those of their associates who may not be so thoughtful do likewise.

When savings in material, money or time are effected, and when personal production is increased, the employees and the Nation are the sole beneficiaries. Sanderson & Porter were selected to operate the plant for the War Department, under the direction of the Ordnance Department of the United States Army. The firm's compensation for management services is a fixed fee for performing a certain part of the war program. If, as a result of the combined effort of all, this job is done more efficiently, more economically through savings and through stepped-up production, then you and every other citizen of the United States benefits . . . no one else.

THE BURNING PIT

By Scorchy

Since the last issue of your favorite newspaper, I had a vacation, an earned one . . . if you please, you who think it's a soft snap roaming around the area gathering up the weighty information that effervesces from these lines of type every other Friday? Try it awhile, brother, and I'll bet you will soon be back pushing those empty shells down the conveyor and raving about how easy they skim along.

Well, anyhow, I got the well-earned(?) vacation and in a mood of self-pity . . . "America needs us strong" and "save the body and you save all" and all that stuff, I found myself arguing with me.

"Scorchy," says I to me, "you need a good rest . . . get away up in Wisconsin and sit still for awhile."

By golly, that seemed like a great plan and, all of a sudden, I was agreeing with myself. I went. I sat. I thought. That thinking stuff is tough work for a guy like me who has trouble remembering his own clock number, but in true EOP style, I kept on thinking. Eureka, an idea!

After the war is over, I would start my own Income Tax Bureau and instead of paying taxes I would go around collecting them. All I would have to do would be to offer lower taxes than anyone else and a lot of fellows, and surely all my EOP pals, would line up to patronize their old crony who was giving them a break with nice low taxes.

Then I got to thinking about all these birds working steady for good wages and how they are spending it about as fast as it comes in. Sure, some of it goes into War Bonds. But how about that little extra for that rainy day? My money says it won't be there.

Someday this war is going to end and then the smart guys . . . "economists" I guess you call them, will start talking about "a period of adjustment," or "a restoration of our industrial economy," and all that kind of syrup they ladle out to ease the pain when you are looking for a job you can't find.

The more I dwelt on this angle the more I was convinced that pals with bulging pockets today might not be such good customers later on. And with the rapid-fire, direct action that marks my every move I rushed into Group 60 and upped the War Bond subscription and the following Saturday opened a savings account for a little each week against the day when. . . .

"He says he forgot his whistle, but don't worry about him getting lost."

3 Trips to Joliet Made by EOP Bus

Three round trips daily are now made by an EOP bus for the convenience of residents within the EOP area and those employees who are required to go to Joliet on business.

The bus leaves the Administration Building, passes all plant residences and makes stops along Route 66-A at Residences 74-1, 74-2, 74-3, 74-4A, Central Road, Road 2-N and Residence 74-8. The Joliet terminal is the parking lot adjoining the Elks Building at 155 Scott Street.

The bus leaves the Administration Building at 9:30 a. m., 12 noon and 2:45 p. m. It leaves Joliet at 10:30 a. m., 1:45 and 3:45 p. m.

Schedule changes may be made as experience dictates and the co-operation of employees and residents is requested during the initial operating period.

Letters to the Editor

To the Editor:

I wish to say that we Negro matrons of EOP want everyone to know we enjoy doing our work for defense.

Maybe it is only a minor part that we do, but we keep things spic and span for the ones who have major parts in defense so that they may be at all times fresh and clean in their surroundings which enables them to work harder and faster for our good old USA.

I am acquainted with all of the matrons at Fuze and Booster and they in return are glad to help in this onward course we are pursuing.

Please don't forget, even if we don't have a poster, we are 100 per cent in the War Bonds campaign.

Wilda Willis,
Matron, Guest House.

Harrison Plays Planning Role in Building EOP

(*Continued from Page 1*)

with the Western Electric Company he attended Pratt Institute, Brooklyn, and was graduated in the Industrial Electrical Engineering course in 1915. From the start of his employment with the Bell System, General Harrison served in practically every branch of the system, at different times occupying the position of engineer, an official of the New York Telephone Company, vice president of the Bell Telephone Company of Pennsylvania and vice president of the American Telephone and Telegraph Company, in which latter position he was in complete charge of the Department of Operation and Engineering.

General Harrison received the Honorary Degree of Doctor of Engineering from Brooklyn Polytechnic Institute in 1938. In the following year he was awarded the Honorary Degree of Doctor of Laws from the University of Notre Dame. He is past president of the American Institute of Electrical Engineers, former chairman of the Philadelphia Safety Council, former trustee of the Village of Garden City, Long Island, and its Commissioner of Public Works. He is a member of the New York Engineering Society and of the Newcomen Society, and a director of the Brooklyn Polytechnic Institute. He is also director of the Bell Telephone Laboratories, Inc., the Bell Telephone Company of Canada, and the 195 Broadway Corporation.

General Harrison's permanent home is Garden City, Long Island, N. Y. He is married and has two sons—**William H. Harrison, Jr.**, a selectee in the United States Army, and **J. Grant Harrison.**

Group 3-A

F. G. TAMBLYN
Correspondent

Supt. J. J. Fitzpatrick has returned from his vacation. All the boys were glad to see him and he was pleased to find everything in order. He spent his vacation in the east visiting many friends and taking in a few spots on Broadway, including the "Hot Tomato." He said all the bright lights are dimmed for the duration and Broadway isn't what it used to be.

Congratulations to **John T. Dillon** who is the proud father of a baby boy, **Richard James.**

Group 70 played our softball team according to schedule July 9. At the end of seven innings the score was tied at 2 all. Two extra innings were necessary to decide the winner. Group 70 managed to get 1 run across in the ninth inning making the score 3 to 2. **Lou Haake**, the star pitcher of the Joliet Rivals Club, did a commendable job of pitching for Group 70. Our Bombardier Team did a fine job considering the fact that we had very few regulars on the team. We have a good team in the making and should be able to win a lot of ball games.

Harry M. Knarr is on vacation visiting a friend stationed at an Army camp in North Dakota.

Claude Chapman, the congenial man from Wilmington, with the ever-ready smile, was raising a very nice mustache, but during his trip home over the holiday, lost it. Wonder if it could have been an order from the home front.

It seems strange lately that a young lad, **Russell Torkelson**, should be planning on building a home of his own.

The anxiety of **Viggo Frost**, custodian of change house 20A in Group 3-A, came to an end July 10. Upon his arrival home he found he was the proud owner of twin kids (speaking of his nanny goats, of course).

Howard Gueller, first baseman for the Bombadiers, knows how to use his head when he can't use his feet. Howard was pulled off the bag by a wild throw and being unable to untangle his feet quick enough, fell head-on the bag which easily made the out.

We congratulate **Fred Green** of Building 4 who is the proud father of a girl born July 10th, which accounts for him having a hard time to navigate Saturday, the occasion robbing him of his sleep.

It was heard that **Robert McAvoy** is taking lessons from "Charles Atlas," on how to get muscles, so he can take his shirt off on a warm day and not feel embarrassed when **Roland Oertel** clocks out. Until now he has had two lessons and expects to get the muscles in the next lesson.

George Duane Turner, known as the "Clark Gable of Building 10," took a trip to the dells over the Fourth.

Emil Galovich, Jr., is hoping that this coming week will bring to a close his pending deal for a partnership in a beauty parlor at Wilmington owned by a certain pretty blonde.

The Bombardiers will feel the loss of **Gordon Gabriel**, one of their best players, who suffered a broken ankle while scoring a run in a game with Group 66.

Asst. Supt. George Costello, Jr., left for a vacation July 26.

We understand that **Colby Erickson** is back under old management since his wife has returned from her vacation.

Material Warehouse

FRANK McCORMACK
Correspondent

Most of the material checkers at Group 23, known as "The Hub," are seasoned EOP veterans.

John Markley, our genial boss and assistant to **Supt. Charles Herbig**, expects his wife to move to Joliet soon.

Gerald Fitzgerald, alias Wrong Day Corrigan, is becoming more punctual each day. Now he never comes to work on his day off.

Checker **Robert Grady** seems to be in a highly nervous state. He has failed to account for some boxes he checked in some time ago.

Harold Culbertson, better known as Cub, has just returned from an enjoyable vacation in Wisconsin.

George Duren, our able G-man, has been transferred to the Material Warehouse.

G-man **Ernie Kastman** is still among us. Ernie also reports an enjoyable vacation in the far North, but says he is glad to be back for a much needed rest.

James Eib, a recent recruit to this department, has hitched his wagon to a star.

Congratulations to **Harold Ellis** on his fast sprints to catch the Morris bus.

Bob Gulso now spends all his leisure time on the beautiful Kankakee River.

Norman Hammerschmidt was overheard while telephoning to Mr. Herbig. Seems as though Norman was complaining because he couldn't crowd his name on the office receiving reports.

Charles "Chuck" Sterman has a queer feeling when anyone mentions going to the army. We wonder if it is because his prospective father-in-law is an officer?

Kenneth Pratt says that Mr. Herbig is really becoming an efficient driver and feels indebted to him for his transportation. The checkers get mighty lonesome and tired, to say the least, on some of their long hikes between assignments, especially in the wee hours of the morning.

Production Planning

LORETTA RYAN
Correspondent

Planted, grown, harvested and cooked by Agnes Freehauf while Loretta Ryan is vacationing.

The following Production Progress clerks have left for active service in the Army: **William Bedford, Jack McCarthy, Bud Thoern, Jack McCor, John Troutman** and **Bud Vogel.** These young men were from Group 1. We also have an enlistment in the Navy, that of **Tommy Burns**, who left July 29.

Everyone looks especially happy these days because they are either making plans for their vacation, or they have just returned after happy days of relaxation. Included are **Loretta Ryan, Martha Craig, David Gianuzzi** and **Jim Spurlin.**

Mrs. Catherine B. Ray is entertaining her sister, **Mrs. James B. McClavy**, Memphis, Tenn.

Mae Norem has exchanged her "pig tails" for a three inch cut.

Carl Clendenen and **Cliff Bryant**, the "peach and plum kids," are awaiting the tempting feast promised them by **Agnes Freehauf.**

Fred Mastin seems to be having the exasperating bother of handling a "problem child" with **"Master" Paul Pickens**, but with the aid of **Paul Leming** he may be able to accomplish the irksome task.

Gertrude Finnegan has joined the department.

Ray Van Hook makes a trip to Springfield every weekend. He says it's to see his mother, but we wonder.

It's remarkable how **Dorothy Mihelic** and **Marie Sanders** can look so spry the next day after coming home from dates at 3:45 a. m. and 4:45 a. m. respectively.

Mary O'Connor corresponds with 23 men in the armed forces. They ought to give her the Distinguished Service Cross.

Mel Block saw a sign in Chicago the other day which read, "Now that they are taking women in the armed forces, I regret that I have but one wife to give for my country."

Usually around 4:45 p. m. you find **Dick Ebben** with lots of work on his hands. Could the reason why he always finishes in time be because he has such splendid help from **Mary McGovern.**

Service Flag to Honor Former Employees Now in Armed Forces

Men Express Appreciation for Tabloid, Ask for Letters; Paper Furnishes Addresses

Delivery of a huge service flag to honor the more than 900 former EOP employees in the armed forces of the United States is expected within ten days, according to **R. T. Bassett**, assistant comptroller.

Mr. Bassett explained that even the extraordinary size of the flag will not permit the use of an individual star for each service man. Instead some 500 stars will be shown and a panel will be utilized to indicate the exact number. This number will be changed as more are called into service. Other large companies have been compelled to use such a plan.

Appropriate ceremonies will be held, Mr. Bassett said, when the flag is unfurled in the Recreation Building.

Under the supervision of **George F. Bent**, personnel director, families of men in the service are being asked to furnish their addresses so that copies of *The Bomb-Shell* can be mailed to them. Recent issues of the paper have carried letters from the service men expressing appreciation for news from home.

Letter Writing Urged

The men in the Army, Navy, Marine Corps and other forces welcome letters from their friends and former associates and EOP workers can do nothing more appreciated than to write these men a note regularly or, at least, now and then. Beginning with this issue of *The Bomb-Shell*, the names of EOP men in the services will be published. Two hundred names are carried in this issue. Others will be published in future issues until the list is complete.

If you wish to write to any man listed, telephone *The Bomb-Shell* office, Line 4206, and his address will be given to you. If you know the name and address of any man you think may not be listed in the office, telephone Line 4206 so that the paper may be sent to him.

Letters from former EOP workers continue to express interest in the paper and appreciation for receiving it. **Harry E. Kimmel**, Fort Francis E. Warren, Wyoming, writes, "I have finished my basic training and am now ready to be assigned to a definite job. I am willing to do my part as I know my many friends in the plant are willing to make their sacrifices. Thanks again for the paper. It surely helps me to keep up with the happenings back there."

"I received *The Bomb-Shell*, three issues," says **W. A. Barcus**, Great Lakes, Ill., "and enjoyed them very much. I would like to keep on receiving them. I think the name is very appropriate and the news is good. I would like news of Group 7. I don't have the addresses of any of the boys on my shift. I was on the shift of a fellow named Ted. I don't know his last name, but he is a new man on the job. I am looking forward to the next issue."

Reads Every Word

Sgt. Paul J. Roy, Camp Forrest, Tenn., writes, "I have enjoyed reading it and see much in it of interest to me." **Pvt. George P. Soteropoulos**, Lincoln Air Base, Lincoln, Neb., says, "I would greatly appreciate it if you would forward a copy of each edition of *The Bomb-Shell* to me here at camp. I am now permanently stationed here. I have been assigned to my job as stock clerk in the Mess. My job consists of taking care of the books, seeing that the cooks get the right amount of food and checking what is returned. I enjoy reading the paper, for I like to keep up with the news of the plant and of the people."

"Received three issues of *The Bomb-Shell* this week," pens **Pvt. A. E. Gresham**, U. S. Marine Corps, San Diego, Calif., "and I want to thank you for sending them as I read them from top to bottom, especially for news of Group 3, which was very well covered. Hope I can drop some of those bombs I used to help make very soon. Keep up the good work as we will drop some more soon."

"I have read every word in it and promise to do the same to every copy I receive," says **Corp. Lyman C. Bedwell**, Ft. Leonard Wood, Missouri. "I hope all former employees are receiving it and get as big a kick out of reading it as I do. As a former member of the Timekeeping Department, I'd like to see more items regarding **John O'Connell** and his gang. And I'd like to add that my training under O'Connell has not been in vain as now I'm still in payroll, having in my charge our Regiment's payrolls and some 50 officers."

Interested in Home

"Since your paper has become a frequent caller at my quarters," writes **Lt. Charles E. Campbell**, Camp Bowie, Tex., "I have been trying to find time to drop you a note and tell you how much I appreciate *The Bomb-Shell*. It makes me recall names and faces and feel at home.

"I think your efforts have been swell in getting the paper to us. You people at home have made us feel we aren't forgotten. No matter who the man is, he is always interested in his friends and home. Should I have any friends who might get to read this, I would like to thank you all for what you are sending us and I know you will do more than your share to hold up your end. Just keep that stuff coming, we'll drop those eggs. I do hope your paper follows me where I am going."

EMPIRE BUILDERS are the breed to which A. M. Lockwood, general superintendent of utilities, shown peering intently into the future, belongs.

Mother Says Mailing "Bomb-Shell" is Grand

Mrs. D. V. Peterson, Frances Road, Joliet, is the first mother of a former EOP employee in the armed services to express appreciation for the mailing of *The Bomb-Shell* to her son, **Pvt. Leroy L. Peterson**, Air Corps Technical School, Keesler Field, Miss.

Mrs. Peterson's letter said in part, "This is Leroy's new address. He writes he surely enjoys the paper. He formerly worked in Group 1. I think it is grand that you send the paper to the boys. Thanking you for it, I remain sincerely, (his Mother) Mrs. Peterson."

"Here's hoping that you will continue to send me *The Bomb-Shell*," declares **Albert E. Ray**, U. S. Navy, Boston, Mass. "I worked under **Henry Gormley** as a fireman in Groups 4 and 9. Being a young man, I joined the Navy to do my part at the front. I also have a brother working there, **G. D. Ray**."

Writer Reveals Stuff 'n' Things About OD Bunch

Civilian Personnel of War Department Have Many Interests

By Seymour Kurantman

It was a hot July day and I was feeling like a piece of damp toast. The telephone rang and the editor's voice came over from the Recreation Building.

S. Kurantman

"Mr. Kurantman," he piped briskly, "how about batting out an article for *The Bomb-Shell* on the War Department employees at the plant?"

"What?" said I, and he repeated. I had heard him the first time. Weakly I said that I would do it and asked what he wanted in it.

"Oh," was the reply, "you know, just stuff about the people you work with, where they're from, what they're like and stuff like that."

"OK," said I again, even more weakly this time. Boy, it was a hot day and the idea of sitting over a hot typewriter seemed very unattractive.

That was on a Friday and copy had to be in by the next Wednesday. Over the week-end I had the uneasy feeling that something had to be attended to. This feeling persisted until Tuesday night and then I faced the inevitable and a blank sheet of paper in the machine.

Well, it shouldn't be tough. There's plenty to write about the War Department civilian personnel at EOP. First, there is the scattering of cities and states represented. New England claims **"Red" Bowler, Bernie Lyons, Bob Cohen, Seymour Stearns** and **Melvin Herwitz**, all from Massachusetts. New York, heavily represented on the S & P roster, also has its native sons in your correspondent, **Dave Horwick** and **Bill Tynan** to name some. Then there's **Oley Olson** from out of this world, that is Brooklyn, the home of "dem bums."

From other points around the compass are people from Ohio, Indiana, Iowa, Michigan, Missouri, Minnesota, Wisconsin, North and South Dakota, Arkansas, Colorado and Texas, and a heavy representation from Illinois, of course. Finally, there is **J. P. Zagade** who will tell you, at the drop of a hint, of the places he's lived in from New York to Montano, from Illinois to Mexico.

Of interest too, is the literacy of this bunch, with a high percentage of college graduates. Represented are Harvard, Notre Dame, Columbia, College of the City of New York, New York University, Massachusetts Institute of Technology, Chicago and the state universities of Ohio, Minnesota, Illinois, Iowa, Michigan and many others. We have people with master's degrees and others who have studied for Ph. D's. There are engineers, lawyers, school teachers, chemists, draftsmen, psychologists, accountants and technicians of all kinds.

Of course, statistics are on the proscribed list, but it is enough to say that among the girls are plenty who are married or engaged with a number of plant romances included. Outside of the plant, the interests are varied and absorbing. Several are pilots and on any clear day around 6 or 7 p. m. you can spot **Art Koch** in his plane, if you know the markings. **Lewis Mines** writes and **Mary Tyler** listens to serious music. Others are stage-struck and haunt the Chicago theatre openings. One fellow, who shall be nameless, assiduously cultivates a social career in Chicago. And so it goes.

BLOCK BUSTERS is the term applied by war correspondents to the two-ton bombs dropped on Hamburg last week. Four-thousand-pound bombs shown here are loaded at EOP. Pictured also are Lt. Col. Don M. Hoffman, EOP commanding officer (right), and W. E. Canniff, manager of engineering and operations.

Nowell Park Day Sunday Will Be Free to Workers

Annual Celebration to Include Shows, Contests, Movies

The Recreation Department of the Joliet Park District will stage their annual Nowell Park Day celebration at Nowell Park Sunday, August 2, and a cordial invitation is extended to EOP employees to attend and enjoy the many entertaining features to be presented.

The Gala celebration will start at 11 o'clock in the morning and wind up some where around midnight with something doing every minute.

There will be free swimming in the pool all day. A water ballet with swimming, diving and comedy acts will be presented at 2 o'clock under the direction of **Fred Culmer.**

Later in the day an athletic show with boxing and wrestling exhibitions will be staged on the grounds. A boxing ring will be set in the center of the park where every one will have a clear view of the bouts. Early in the evening a vaudeville show will be presented with acrobats, dancers, singers and band music. In charge of the athletic show and the vaudeville numbers will be **Walter Shaughnessy,** Joliet boxing and wrestling promoter, who works in Group 1 with the midnight shift.

Along with these attractions will be baseball games, horseshoe pitching and shuffle board tournaments, races for the children and to wind up the day after dark there will be movies.

Recreational Director John *Clemens is the guiding hand of* this affair and as in the past expects a big turn-out. Clemens urges visitors to bring their lunch and spend the entire day enjoying the entertainment that his department is offering on this big free day at Nowell Park.

Ordnance Insignia 110 Years Old

Oldest current insignia in the Army is the bomb and flame of the Ordnance Department. It was adopted 110 years ago to be worn in gold embroidery on the skirts of long coats by Artillery and Ordnance officers.

When it was removed from Artillery uniforms in 1851, Ordnance became sole owner. It has identified the Ordnance Department ever since. More recently, the flame has been streamlined.

The device originally came from the British. Under the name of Grenade it had long been the badge of Royal Engineers, Royal Horse Artillery, and the Grenadier Guards.

Utilities

HELEN SHIMEK
Correspondent

Cut, basted, fitted and sewed by Nancy Sherwood in absence of Helen Shimek, on vacation.

The Transportation Department held a farewell picnic in honor of **Mrs. Philomena McCraley** at Inwood Picnic Grounds July 9. Mrs McCraley resigned her position in order to accompany here husband, **Dr. W. J. McCraley,** now a Lieutenant in the U. S. Army at Camp Grant. Those present included Dr. and Mrs. McCraley, **E. J. Egan, Mr. and Mrs. W. A. Walters, Jackie Deitz, Mr. and Mrs. Wm. Watkins, Mrs. Dale Zeigler, Mr. and Mrs. George O'Reilly** and daughter, **Coleen, Helen Carlberg, Margaret Hayden, John Arthur, Robert Peterson** and **Ernest Raunser.**

The next picnic will be held at the country home of **John Arthur,** chief car checker, Transportation Department, at Coal City.

George Redmon, roadmaster, Maintenance of Way Railroad Department, has moved into the EOP residence area.

Richard Carroll, night yard master at the Railroad Classification Yard, has left for the ARMY.

We are told that **E. J. Egan,** superintendent of the Transportation Department, while not the most successful poker player, has the best appetite for non-existent lunch.

Our genial trainmaster, **John E. Ryan,** has a new assignment—awakening the roadmaster at 3 a. m. daily.

E. G. McAloon, master mechanic, holds the pinochle title and is saving his winnings to donate to the USO.

Helen Shimek, secretary to **A. M. Lockwood,** journeyed home to Uniontown, Pa., for her vacation.

Mrs. Frank Jensen, 19 Stryker Avenue, Joliet, wishes to extend her thanks to the Truck Drivers and Carpenter Department of Group 64 for the flowers sent to her in her recent bereavement. **Frank Jensen** was associated with the Truck Department.

To quote **"Doc" Craig** of the Locksmith Shop: "After all our business is taking care of other people's troubles—and you have to admit that we are the *key* men of EOP."

We would say that the Locksmith Shop with its crew of four men, **"Tim" Thompson,** manager; **Ralph Heap, "Doc" Craig** and **"Scottie" Morris,** is really on the job. When they are around there is no need to worry about lost keys or getting locked out of your car. Their "service with a smile" department will solve your key problems. It seems, however, that these men have developed a problem of their own which they can not solve. Since the opening of the new laundry across the way, the men at the bench are beginning to complain of eye strain.

John Konetski, Water Department, took time out from filling salt dispensers July 3 to marry **Dorothy Bowers** of Pontiac.

Claude Sayre spent the week-end of July 17 in Silver Cross Hospital. We are glad Mr. Sayre is back again after his check-up. Did we hear rumors of a diet?

J. V. Wall had a very short stay at Richard Farm. We hear that he is now on the job in Chicago—one of those men who is going to help us out with synthetic rubber.

Tom Singer, superintendent of the Paint Shop, is in the hospital at Hot Springs, Ark.

They tell me that **Bill Ryan** of the Sheet Metal Shop had a lot of luck recently. It seems that he put a quarter in a slot machine and a considerable quantity of slugs flew out. Perhaps he could use a few of them to start a collection for a new hat for **Ed Briscoe.** Bill's hobby is buying war savings stamps.

Members of the Radio Communications Department and guests enjoyed a steak fry at **R. A. Brown's** cottage on the Kankakee River on July 14. **Lary Jack** and Mr. Brown cooked the steaks and were voted capable chefs. Swimming, fishing and boat riding furnished diversion. **Ed Soulon** is better known as "Popeye" ever since he has shown his (in)ability to handle a motor boat. We're wondering who will be the first to see the moving pictures that were taken at the steak fry and just how strict the censor will be? A certain young lady in Radio Communications likes to fish if somebody else "threads" the hook and if she can go out in the middle where there are no "ruffles" in the water. She caught one, too, and says she had a lot of bites (mosquito).

Ask **Don Sharp,** timekeeper at Group 23 Road Maintenance Building about the day his newly made out report blew out of the window and up on the roof, how he scurried up on the roof and the report blew down, how he scurried down and blew up.

The Radio Communications Department just received a phone call from Water Softening Building that "Amos" and "Andy" were over there. They sent after them and they are once again on guard at the Radio Shop. By the way—they are our prize pooches.

Donald Smith, Truck Department, stepped out of the bachelor class last week. He is now back at work and seems to think the benedict status is very satisfactory.

The Round House has acquired a new family, five babies to be exact. But, alas, poor **Dave Creider** is sad. They're all girls. Who's to carry on the family name? (Mother cat and kittens doing well).

Operating engineers are talking about the picnic they're going to have Sunday, Aug. 23, at the Joliet Gun Club. Engineers **Al Nelson,** Group 6; **Henry Gurley,** Group 9, and **George Weber,** Group 3, are the entertainment committee and all the power house engineers will have tickets. Everyone is invited.

GROUP 3

WILLIAM BERINGER
Correspondent

If you want to save yourself the price of a newspaper, just talk to **Johnny "Winchell" Hamilton.** He can tell you all the latest.

Did you know that **Tiny Kautz** is also known as "Bubbles"?

Fred Dvorak is selling shares in his chicken ranch in Coal City.

Edward "Red" Wyciskalla of Building 3 left to join the Army. Red was with us since the start of operations in Group 3.

Sammy Johnson is raising a turkey on his farm. He is going to give it to Tiny Kautz. That's one good way of keeping off the ramps.

Understand **Chuck Hansen** is breaking in a new Assistant.

Any Group desiring the services of a First Class umpire, please do not hesitate to call on us. We seem to have an over-abundance, and would be very happy to loan you **Eddie Copp** any time you feel the need.

Who is this guy in Building 10 that lost his cow and had to take three days off to find same? The next time this happens, he should let a few of us in on it. We will be very happy to help him look, as we understand he had a swell time.

Those of us who were fortunate enough to receive that great big box of fish from genial, bicycle-riding **Asst. Supt. Willard G. Reed,** want to take this opportunity to express our appreciation. The bass and muskies sure were swell.

A story is making the rounds to the effect that **Morris Dick,** the G-Man, in testing a bomb body, the other day, lost three molars. The fact that he lost the molars is very evident, but what we don't know is whether he was removing a tail plate or a nose plug.

What do you think of this? Our "hard working" engineer, **George Weber,** took a vacation.

Kenny Fendrick walked 42 miles to join the Army. When he got to the post, the Officer politely informed him that he had flat feet. When asked why he wanted to join the Army, Kenny replied, "Because I don't want to walk back over those 42 miles."

"Dougherty's Bombers" looked very good in their opening game with Group 1. The infield was fast and **Frenchy Cross** and **Delora Vallancourt** made a very neat looking battery. The score was 2 to 1, and believe it or not, we are tied for first place.

By chance have you heard about the frequent visits to the Woodruff Golf Club by **Kermit (Little Chief) Long?** About every third shot by the master, a strong wind is created, but the ball doesn't move. I'd suggest we get the little chief a box to stand on so his clubs will be at proper length, or shorten them. He did turn in an honest 46 for 9 holes.

There is a rumor around that **Donald Phelan** (alias Leo the Lion), is a prominent member of the new Club Hotel Louis, Joliet.

Did I ever mention before that **John F. (Porky Pig) Boget** is putting on so much weight that you can't tell which direction he is walking? They tell me since he has put on so much weight he has started a new dance craze called "The Pork Chop Polka." That's in ¾ time on the down beat in case you would like to learn it in six easy lessons.

Emil Odchodnicky decided to cash one of his many pay checks to buy a gallon of gas and a small sandwich. After doing so he spent a very extensive weekend in his room, reading how to be a hobby expert. If you want to have a hobby see Nicky at your earliest convenience. This is not an advertisement.

LARGEST CLASS ever to receive the U. S. Bureau of Mines diplomas for training with oxygen breathing apparatus is shown here being handed their certificates by Chief R. W. Mortensen, Fire Department. The course embraced a twenty-hour training period of rigorous study and tests. Receiving diplomas are G. H. Hanlon, Ralph Maloney, George Horn, William Klegman, J. O. Clement, W. C. Littrell, T. H. Kloeckner, A. N. Mathison, Lawrence Molck, R. Doyle, Jr., O. K. Olson, Lynn Boman, C. J. Weiss, D. F. Trainor, Harry Swartz, F. F. Scoma, M. F. Settlemoir, R. H. Shreffler, G. F. Zelke, M. S. Murawski, E. L. Fitzgerald, W. F. Hayes, L. C. Anderson, Joseph Drazy, R. E. Batty, G. C. Alexander, W. H. Lueder, R. C. Everhart, B. L. Benson, William Day, L. F. Lazar, R. E. DeBolt, C. F. Davis, Jr., W. H. Atwood, T. F. Downey, R. D. Blake, E. S. Dickens, G. C. Scherzer, A. P. Elias, E. L. Frame, L. F. Glodowski, H. A. Guderjan, L. D. Hildebrand, George Learned, Frank Marek, F. J. Pavlich, D. W. Pratt, Patrick Rogers, W. H. Reichert, F. J. Rutkowski, F. L. Ryan and Chief Mortenson.

Groups 4-9

Fuze-Booster-Primer and Detonator Lines

JUANITA HARTER
Correspondent

The booster lines of Groups 6 and 7 want you all to know **Mr. and Mrs. Elmer Utley.** They are a "100 per cent all-out for defense family." They have loaned Uncle Sam four sons.

Mr. Utley is a foreman of machinists in Group 7. Mrs. Utley is a forelady in Group 6 and a very proud mother. She received a pin with four silver stars, the American eagle and a chevron from the Emblem of Honor Association in New York.

The four sons are **Howard,** a sergeant in Fort Leonard Wood, Mo.; **Harold,** a corporal in San Francisco; **Gordon,** formerly of Group 4, is now a private in Camp Chaffee, Ark., and **Jack,** a private in San Francisco.

Group 6 girls' softball team played Group 1 at the Softball Diamond in the Administration Area July 17. At the end of four and one-half innings the game was called, leaving the score 29 to 6 in favor of Group 6.

C. F. Nanninga, Group 5, has three sons in service and the fourth is ready to go. Two are Marines and one is in the Army.

Mary Krawetz, a forelady in Group 5, has been given a beautiful diamond ring by **Ferdinand Begis,** Government inspector.

Congratulations are in order for the recent marriage of **Dolores Broadstreet** of Kankakee to **Corp. Howard Nelson** of Camp Polk, La.; **Dorothy Gagnor** of Kankakee to **Leonard Tibbie,** and **Ethel N. Chaudoin** of Fairbury to **Milton Mowey.**

Helen Senecker, Group 8, is a whiz at rolling liners. **Jeanette Carlson,** enjoyed a week at Saugatuck, Mich. **Lorraine Iverson** will try out as pitcher for the Group 8 girls' baseball team.

We heard that the reason **Eilleen Woodcock,** Group 8, makes such good time to and from work is because she has collapsible wheels on her Model "A."

We wonder wonder what **Mrs. Robert Otte** said when he spoke up about the *one* orange that was not peeled in his lunch. Don't get us wrong, this only happened once.

Dorothy Close, a Group 8 forelady, visited her husband who is way down there by New Orleans in the Army.

The girls softball team of Group 8 lost to the girls team of Group 1 14 to 7, July 15.

The boys softball team of Group 8 played Group 4 on the Group 8 diamond July 14. Group 4 put on a big rally in the 7th inning, but it was not quite big enough. The final score left Group 8 on top by 14 to 9.

The Group 8 "Walker Sports" played the Fuze and Booster bus drivers a close and exciting game July 16. The bus drivers won by the small score of 3 to 2.

The "Walker Sports" lost to Group 7 July 21 by a score of 22 to 17. The game was almost called on account of rain but it cleared enough to finish the seven innings.

Mrs. Florence Keller, forelady in Group 5 does a lot of vacationing at the lake where her cottage is situated.

We sometimes wonder if **Pete Spese,** fireman, does not have a bark that is worse than his bite. According to rumor, it is.

In a confidential conversation with **"Pop" Jeffries,** change house man for Group 5, he admitted the girls in our group were better looking than the girls in Madagascar. It seems he spent considerable time there in his youth as a member of His Majesty's Navy. Now "Pop" is just 70 years old and admits 40 of them.

Sol Jacobs, former division inspector in the Fuze and Booster lines, has left EOP and is a first lieutenant at Aberdeen Proving Grounds, Aberdeen, Md.

Grace Clark wonders what **Johnnie Neely** has "cold feet" about. She was horrified to see his "90—100% heavy wool socks" one day last week as he walked through Bay 6 unaware of her fascinated stare.

"I'll never smile again" is the wail of **Shephanie Bielec** of Building 15. She sneezed so hard last week that she blew one of her front teeth out.

Good news always comes in threes. So here it is. **Dorothy Donahue, Dorothy Magolan** and **Bernadette Menard** are now wearing engagement rings.

Bob Smith of the electrical division was recently married to **Freda Stine** of Morris.

FITTING MEMORIAL to the late C. J. Kemery of the EOP Utilities Department is Kemery Dam shown here. Formerly known as Prairie Creek Dam, the structure impounds a reservoir of some 22 million gallons of water for use in the event of the failure of wells in the area. It is located on Prairie Creek just north of Central Road.

Fire

STUART MOLONEY

FRANK J. SKOFF
Correspondents

Chief R. W. Mortenson is our chief collector, even to pencils and fountain pens. Any one who has either a pen or pencil that needs repairing just drop it off at the Central Fire Station. The Chief has a complete work shop.

Sgt. Martin Hanson is quite worried about the priority sheets in the daily papers. He breathes a sigh of relief when his search is completed—Snuss has yet to be listed.

Robert Connelly is now a Commando—He is Commando of our emergency truck. Connelly is quite satisfied with his new detail. All he wants now is a traveling trailer kitchen. Then he will have everything from soup to nuts—so he says.

Leo Ryan is looking forward to a new detail—being our butcher on fried chicken days at the Central Fire Station. He has passed his apprentice period.

Stuart Moloney, chief clerk, has decided to go on a diet. His alibi is "A leather belt is a priority!"

According to **Chief Mortenson,** our Pet Fox provides chickens for all chicken dinners at Central Fire Station. *Just ask the guests.*

Our garden detail has increased three-fold—about six to each shift. The members of this organization are quite active. Garden Captain **Glen Wilfong** is looking forward to an election of New Officers in the fall.

Anyone who wishes to challenge **F. J. Downey** and **V. Bell** to a game of horseshoes may contact either of the boys. The game can be held in the rear of No. 3 Fire Station at the most convenient time.

Stanley Kotarski, our Government time keeper, has gone into hiding—behind a Ronald Coleman mustachio (Pittsburgh style). **Thomas Tomashezski** runs a very poor second—we call him "Fuzzy."

Lenny (Bugle Boy) Jesson says: "The boys will really see a first class HOE-DOWN when I get into that garden; I know my ONIONS. I've BEAN practicing. Incidentally Mr. Jessen has been initiated into the Central Fire Station Family—after a long probationary period.

Fire Inspector Willie Davis is contemplating a great future for his 3-year-old son. He intends to develop him into a combination wrestler and boxer.

Hard-working **Charles A. Tyler,** fire inspector, finally got a chance to visit his wife and children in Granville, Ill., over the last week end.

Sgt. Everett Stricklin's wife and two children have been quarantined because of diphtheria.

The following men from the Fire Department are now serving in the armed forces: **Francis Burden, James M. Burns, Oral Cox, Norbert Egges, Doyle Good, Robert Hilliard, Gene Newton, Arlington Price, Wendell E. Sumner, Alexander Tihay, James Ward** and **Stanley M. Wedic.**

Tire Committee Meets Five Days a Week

EOP's labor-management committee, composed of **Russell R. Kuntz, Albert E. Kinson** and **R. T. Bassett,** named under the Tire Rationing Regulations of the Office of Price Administration, will meet Mondays through Fridays, 8:30 to 9:30 a. m. and 3:30 to 4:30 p. m., in the Administration Building to act on the requests of employees for tires. Only cars carrying full loads are eligible for certification and the names and clock numbers of riders are required. The number of cars owned by the family of the applicant must be furnished.

DIPLOMA CERTIFICATES issued by the U. S. Bureau of Mines for training for emergencies were presented to Ralph R. Maloney, Fire Department, and William "Jersey" Klegman, Group 2, by Safety Supervisor Rollin T. Read as shown here.

Ordnance

HELEN McGINNIS
Correspondent

Harold O'Keefe and **Walt Murphy** messed themselves up a bit the other night . . . had a wreck in their car. . . . The boys are on the mend tho' and we're all glad about it. . . . Also heard that **Norm Long** had a close shave the other night . . . seems as though a double header train didn't see him. . . . Newcomer **Mary Tyler** has created quite a furore 'round these here parts . . . she's cute as a bug in a rug . . . and just as nice too. . . . We have some other newcomers too. . . they're from Rock Island, **Don Hubbart, Aubrey Brockhouse, Charles Anderson** and **Clayton Craig**. . . . Mr. Hubbart is in line for congrats now . . . he's cuddling a cute 9 pound boy. . . . **Carmela Valentino**, that swell gal from auditing, was having quite a time manipulating a fan during the moving process. . . . Poor **Bill Perkins** looks like he's posing for holy pictures . . . he got himself poison ivy and can't shave. . . .

Gorgeous Gal **Jane Finney** gives everyone the idea that maybe if you do thisa or thata you will get to look like her. . . . Guess all she has to do is just be herself. . . . She's got everything . . . looks, personality and we could go on. . . . Wish **Marge Jesberger** would smile more often . . . it makes such a charming gal when she does. . . . Too bad "Brunette Beauty" **Ethel Dirker** missed the picnic . . . her aunt was ill. . . .

Wonder why everyone was trying to swipe **Art Kossack's** cokes at the picnic. . . . **Dentis Berry Jr.**, got all the gals gaga when he arrived the other day . . . they all wanted to "squeeze" him . . . he's that cute guy in Inspection. . . . **Rosemarie Lewis** of Stores and Transportation has the nicest smile. . . .

Mike Kelly, "the tango kid," is limbering up again . . . now that his wife will be able to do those fancy steps again after being laid up with a broken ankle. . . . The Administration Gang miss **Bob Engstrom** these days . . . he is now a Chauffeur. . . . **Eunice Russell** has had several weekends in Missouri . . . yes her heart belongs to Uncle Sam now.

Anne Kakara tried to argue with a truck the other day . . . result . . . two dented fenders. . . . **Monica Limacher** is now situated in her new office . . . she's **Lt. J. H. Lucas's** sec.

Lt. W. J. Durrenburger had himself a vacation. . . . Have you heard that **Anne Kulpa** isn't playing the "Arkansas Traveler" anymore? . . . Did that New York atmosphere get her? . . . **Ralph Clutts**, teletype operator, suffered serious injuries in an accident last week. . . . **Hazel O'Connor** of the Adjutant's office is undecided as to what branch of the service she should join . . . the Red Cross . . . or stick to the chorus work . . . seems as though she finds the nights long now that 'chubby' **Ray Jones** is on the night shift. . . .

William Rimbey, the lad with the slick convertible, lives in Hinsdale, works at Elwood and visits a young gal in Morris. Now that the tire rationing is comin' upon us . . . s'pose he'll be cruising around on the good old "God's Fords" . . . made from shoe leather. . . . Did you know that **"Whiffer" John Lortie, Ray "Duffer" Mahaffay, "Tarzan" Lee Parsons** and **"Hacker" Orrin Long** were being sought by a certain park board???? . . . Seems as though pullenty of turf was misplaced during a golf game participated in by the foursome?? . . . **Mrs. Betty Wallace**, the cutie pie from Safety Section, spent the week end with her folks in Galesburg, Ill. . . . Ask **Stan Eisler** of Inspection how he likes his new profession . . . he's the champeen mover . . . so they say. "Keep 'Em Flyin' " . . . that's the slogan of **Esther Noffke**. She can be seen flittin around the skies at Kankakee every Sunday. . . . Sure envy her. . . .

Geraldine Ward is the new addition in Inspection. . . . Can anyone tell us why **Earl Parker** always carries that card board around with him???? Maybe it's protection . . . could be. . . . Everyone is questioning the reason **Evan Lewis** is being called "Daddy." . . . Ever since the love bug got **Harold Stark** and he joined the benedicts . . . he has practically stopped using an eggbeater for a hairbrush and has settled down and uses a comb.

C. Robert Winchell, former assistant head of the Invoice Section, entered the Service as a private in April and is now a corporal stationed at the Aberdeen Proving Grounds, Maryland. "Bob" says he likes the Service but misses the gang around here. . . . How about you guys and gals dropping him a line or two? . . . Good pic, don't ya think? . . . His address: Co. C, 2nd Ba. ORTC, Aberdeen Proving Grounds, Maryland.

The Armed forces have **James J. Negro**, too. . . . He was a clerk in the Property Section.

Have you seen the picture that **Jimmy Musso** carries close to his heart???? We've heard she's a red head. **Bob Trueman**, ace data checker, has gone and enlisted in the Naval Reserve. Sure think it's wonderful . . . hope he sends this department his picture cause we intend to make an album out of all the service boys and publish it . . . so don't forget, you guys, send in them there pitchers. . . . Another U. S. Naval Reserver is **John C. Rankin**. . . . He's on inactive duty at present but expects that important call any day now. . . .

The sick list captured **Ernestine Thompson** and **Bernice Shroba**. . . . The new trailer camp at Wilmington is the new address of **Mrs. Geneva Landon** and **Mr. and Mrs. Vern Parry**. Guess that big baseball game the other night between KOW and EOP was a humdinger. **Lt. F. G. Kuether** pitched such a whiz of game he most threw his arm out of place.

The picnic the War Department gave the other Sunday was a huge success. Plenty to eat and everythin', dancin', boatin' . . . should have more of the same sez us! . . . **Marion Yeager**, that snazzy little number . . . looked awful cute in that swim suit. . . . The "Gang" shure had a time trying to throw her in the river? . . . Being a good sport about the whole thing . . . she jumped in. . . .

HAVE YOU EVER NOTICED . . .

Dan Considine of Payroll is about the friendliest guy around . . . always has a smile for ya? . . .

Josephine Vilt's glorious blonde hair? By the way . . . her sis is the new member in the Personnel Gang. . . . **Evelyn Vilt** by name.

MASKS were worn by Arlene Schloendorf and Alice Hess at EOP's July 19 picnic for no good reason. Who is who in this photo really makes no difference.

Don Butts' curly hair?

Mara Puett's little feet?

Kay Rosenbaum's lithe walk?

Evelyn Tecotzky's great big eyes?

Harold Bowler's "ruddy" complexion?

Burnham Lyon's accent?

Bill Kennedy's pleasant manner?

Harry Gunchin's ceegar?

Johnny Odchodnicky's spic and span look?

How do you think **Geneva Landon** felt when she got to her trailer home in Trailer Park, Wilmington, and found her soldier husband enjoying the daily paper? She's still quite on the "loose" from surprise. This is the first furlough he has had in a year and at that it was only 48 hours.

PICNICKERS attending the EOP affair of July 19 included this group. Pictured left to right are Ann Lepsar, Leo Parto, Josephine Kush, Harold Kapsch, Marian Shea, John Barr and William Weismann.

Miss Noffke likes blind dates, especially when they are for a party like she went to with **Ray Palmer** in Kankakee. **Helen Boula** also attended and from all reports they both had the "time of their lives."

Bob Cryder seems to be keeping cool with that prison haircut.

Roy Scherer of the Gage Section is now known as our "Sleeping Beauty boy." Sleeping is his hobby, especially on busses.

Mrs. Ray Thompson is on the sick list.

Inert Storage

CHARLES MANN

WILLIAM DENVER
Correspondents

Several games have been played by Inert Storage boys and all are hoping to ride the band wagon of the all-star Inert team.

In the first of two games played July 17 the South Nighters brought in 32 runs while the North Owls scored only 6 on the Inert diamond. Paired up for South were **"Dick" Ashworth** on the mound and **George Morris** of the checkers doing the catching. Under the coaching direction of **C. A. Kemper** the boys were all primed and really poured in runs. In turn they enjoyed a shower of cigars. A triple was made by **Ed Zarley** and a home run by **Leonard Schadole**. South bagged 13 of their runs in the third inning. **Gordon Venturo** ran into a little bad luck by spraining his ankle sliding into second. The scoring ended in the fourth . . . the game was called because of the night shift going to work.

The nightcap was played by **Jim Whitley's** South Side and **John Wald's** North Side. **Matt Reay** slugged a homer. The winning pitcher was **Clayton Parcher** while **Manager Wallie Fang** did the catching. The North Side showed great improvement, scoring two runs more than they ever did in any game. The final tally was South 11 and North 3.

The third game of the week brought together the Mudders of Group 27 and the Southerners. The Mudders rolled up 9 and the Southerners 5. **"Alabam" Greenwood** came to the front and relieved the starting pitcher, **"Cy" Cobb**, in the third inning. **"Alabam"** held the Mudders scoreless the remainder of the game. After your War Bond deduction is taken out put the rest on Greenwood . . . a good bet.

Group 27 has one of the most congenial personnel set-ups of all the Groups . . . we are very proud . . . everything and everybody is clicking 100 per cent or better. **John Abernathy** has asked for a transfer to the day shift as the stork is expected soon.

Henry Dixon and **Gilbert Gould** just closed another of their numerous deals by trading **"Sliding" Steward** for **"Battling" Albright**—cash settlement a dark secret. A certain gang at Group 27 is wondering how **Snuffy Pope** and **Curly** are getting along at South Inert. The fellows in **Fred Peterson's** gang have finally decided to chalk **Jack "Hammer" Smith's** injured leg, so he knows which leg to limp on when the foreman comes around (here's hoping he recovers from his injury very shortly). How come **"Fish Eye" Harris** does not eat his "weiners" anymore? **William Gibson** might as well know that "Chicken" is still buying Pepsi-Cola for lumbago.

What at the Wilmington Restaurant seems to be drawing **Larry "Always Flying Low" Holmes** there so often?

A choir composed of **Ralph Hoffman, Louis Mauro, Bill Kokal, Joe Fazio, Bill Moberly, James Davy, John Meditz**, and **Glen Wagner**. The music is furnished by the whistling of **Ed "Night In Gale" Spezio.**

We Wonder If You Know . . .

That **John Ney**, of Ordnance Inspection, tied the knot and is planning to build.

That our superintendent, **A. P. Balston**, takes a keen interest in the Inert teams . . . never misses a game?

That **Bob Sweetland** and **George Morris** are good umpires?

That our porter, **Charlie Wardell**, keeps the boys smiling with his art of story telling?

That our mail carrier, **Art Birsa**, is good material for the Post Office Department . . . really knows his A B C's?

That **Leonard Spooner** is going to doll up the garden at North Office with some fine evergreens—if and when?

Whether **Louis Molnar** used to ride a bicycle or a horse or both?

That **Al Gierich** would accept a donation of a bicycle and three tires . . . he abandoned the horse?

Why **Alex Ciarallitti** waited two weeks to have his picture taken after he got his raise—could it be on account of his haircut?

That the fellows in Building 3—Group 27 have decided to pitch in and buy **Frank Hudy** a pair of six-ply soles, so he can get more traction (could he be slipping that much)?

When **Lefty McGraw** will change the brand of pies . . . getting tired of blueberry.

That the fellows wish **Gilbert Korer** a speedy recovery from his leg injury.

The boys at South Inert were pretty broken up when they lost (?) their pet fox. Things are all right now though, since **John Gilmoure** has a kitten for them. It's quite an animal, too; cross-eyed, has a broken tail, and only three toes on its forepaws, according to **Milt Bremer.**

"Whitey" Hendry, tow-topped timekeeper from Group 62, is now at Jefferson Barracks, Mo., in the Army Air Forces. Before "Whitey" left, **Jim Whitley** and **"Arkie" Bates** filched one of his gleaming locks and now have it hanging in the clock house at South Inert.

The Inert Storage team defeated Group 70, 2-1 in a thrilling game July 23. This was the first league softball game between the two groups. The Inert Storage team garnered five hits off the sterling **Lou Haake**, pitcher for Group 70's Bolt Makers. **Chuck George** allowed only one hit. Outstanding blow was a triple by **Eddie Sheridan**, left fielder.

The Bomb-Shell PHOTOGRAPHS

50¢ Each

Glossy prints suitable for framing of the photographs used in The Bomb-Shell are available at 50 cents each. Mailing charges are additional. For detailed information and to place orders . . .

TELEPHONE LINE 4206

High Explosives

JACK GARNANT
Correspondent

Charlie Talty, Burning Pit foreman, and **Chris Ciluffo** were enjoying a week-end fishing trip on the Kankakee River — the nibbling was poor—no doubt due to the wrong kind of liquid bait. But what is a few fish between pals? Everything went well until the sea got rough and the boat began to rock. Charlie developed a serious case of seasickness and Chris was compelled to make an emergency landing to make the world stop spinning. If the Army ever drafts Charlie for overseas duty, they will have to fly him across. The old "Tar" just can't stand the water—and other things.

Just received a letter from **Joe Zauratsky** stating that he has been doing ordnance work in "Aviation Bombing Ordnance" at an Arizona Air base. At present Joe is taking a two months' course in ordnance at the Proving Grounds in Savanna, Ill. At one time Joe worked in Groups 66 and 68 and would appreciate seeing a few letters addressed to him as Pvt. Joe Zauratsky, 1st P.O.T.C. S.S.O.S. — T-15, Proving Grounds, Savanna, Ill.

We hear that **"Mac" McCray,** foreman at 66A is quite a fisherman. He recently caught a catfish by the tail on a nightline on the Kankakee River.

Group 66 Softball Team romped home to a 13 to 2 victory over the much publicized "Murphy's Boys" of Group 2. Group 2 gained eight scattered hits off the pitching of **Les Tammen,** while **Eugene Hunt,** twirling for "Murphy's Boys," walked seventeen men.

Another was chalked up for Group 66 over Group 63 in a 9 inning thriller, with Group 66 on the long end of a 1 to 0 score. **"Mickey" Mandella** pitched steady ball all the way for 63, allowing eight hits, while **Joe Craterfield** and **Bob Riegel** split twirling honors for 66 giving up only one hit.

Group 3A bowed to the fast stepping Group 66 Team by a score of 10 to 6. Riegal pitched good ball for 66 allowing seven hits, while **Colby Erickson** pitching for 3A gave up eight hits.

This gives Group 66 five wins and two losses. Any plant team wishing games, contact **St. Elmo Stewart** at Group 66 and make arrangements.

Another farewell party was held July 25 for several members of **"Farmer" Berenen's** gang, including **Johnny Bruno,** who enlisted July 27, **Ralph Seeley** who expects to leave in two weeks, **Bob Sullivan, Harvey Allain** and **Gene Tyree** who are on call. All members of the gang and their wives and sweethearts attended. Dinner, refreshments and dancing comprised the evening's entertainment.

Glenn Baker and **Betty Johnston,** both of Morris, were married July 24. After a short honeymoon they returned to Morris where they will reside.

Dan Fortado resigned in good standing and returned to his home in Jacksonville, Ill. "Sweet Potato" will be missed by his many friends of Group 66.

A farewell party was held in Kankakee for **Paul Wischnowsky** who was inducted into the Army July 20.

How does **"Chuck" Boyce** account for all the feminine wearing apparel found in his car every Monday?

George Foushie leaves for the Army August 1st.

On July 19 at the outpost along the Kankakee River of **Verneille Holder,** was held a picnic of the High Explosives and Fuze and Booster Laboratories and their guests. Main event of the afternoon was an indoor baseball game (we understand Fuze and Booster practiced for it) which ended in 3 innings with a score of 18-0 in favor of High Explosives. Most logical explanation of this one sided score is the fact that, **Ronald Beck,** Government inspector, formerly an athletic instructor, handled the pitching assignment for High Explosives and in addition the boys in the Fuze and Booster Laboratory are slowing down due to the combination of too much practice and old age.

Minor high lights of the afternoon included a marathon swim by **Chemists Sammy Kuhns** and **John Snyder;** the saving of "Rosemary Hafele's" life by **Nelson Tippett** and **Ronald Beck** under the supervision of **Palmer Overholt.** (Beck was nipped by the ungrateful Rosemary) and an exhibition of rough contour driving by **Ray Hybarger,** assistant chief chemist of High Explosives.

Awards: 1—Best dancing couple (polka) **Mrs. Herbert Hafele** and Mr. Overholt. 2—Most hits—Chemists Clifford, Snyder, Teeter and Chief Chemist Hafele. 3—Believe it or not — Miss Holder, Mr. Overholt and Mr. Tippett leaving Moonlight Gardens to drink milk at 1 A.M. Others tripping it at Moonlight were Mr. Hafele's sister, **Mrs. Mary O'Hara** of Cleveland, O.; **Mrs. Eleanor Hafele, Herbie Just** and wife, **Opal, Baron Rothchild,** Mr. Beck and Mr. Snyder.

The **Dick Orndorffs** were unable to attend on account of the illness of their perp "Nathaniel" who found the toys of **John Clark's** baby son too good to resist. The toys are quite evidently not too digestible. Now for the safety of dogs we expect one of the Chemists to do a bit of research on edible toys.

Mr. Overholt, our newest recruit to the ranks of those about to be married, announces that he and **Phyllis** will be married June 1, 1943. It seems neither one of them could decide on the date so Phyllis took herself to a fortune teller and the shrouded lady told the future Mrs. Overholt that June 1st was the day.

The **Bridewell's, Bobbie** of High Explosive and **Brid** from Fuze and Booster have a new addition to their family by the name of "Bomber," who has black hair with tan paws and was given to them by some kind fireman at the Central Fire Station.

IN JOVIAL MOOD is pictured EOP Executive Secretary C. Harold Taylor in his office in the Administration Building.

Early Purchase of Big Carnival Tickets Urged

Attendance at Dance August 8 Restricted to Hall's Capacity

By H. H. "Red" Bowler

An innovation in informal dancing is planned for Saturday night, August 8. A committee composed of employees representing all departments at EOP will stage a summer carnival dance in the Recreation Building of the Administration Area. Music will be furnished by **Keith Gale's** orchestra, all of whom are EOP employees, and dancing will be from 9 to 1.

Carl Anker, Government Inspection decorating genius, will be in charge of giving the auditorium plenty of that good old carnival flavor. Just what his plans may be are known to but an enthusiastic few, but we know that you'll heartily approve their taste. During the dance itself, several valuable prizes will be distributed to the lucky ticket holders.

In the basement of the Recreation Building, the real carnival atmosphere will prevail. It is expected that each group and storage area, as well as War Department administrative employees and Sanderson & Porter administrative employees, will preside at a booth. The various units will be allowed to decorate in any manner they desire, all costs to be borne by the central committee. It will also be up to the individual booths to devise some method of giving away the many attractive prizes and novelties that will be furnished them.

Prizes for Booths

In order to lend incentive to the decoration and operation of these booths, the committee in charge has set up three prizes of $10 each, one prize each for the best looking booth, the most novel booth, and the one doing the most business. Chances in every booth will be offered at 5 cents each.

The new refreshment bar will also be initiated, so that patrons can be sure of plenty of their favorite beverages.

Admission to the dance will be similar to the method used in attending the last War Department employees dance. One member of each car or party must be an EOP employee and must present his badge to admit the entire party. Cars having EOP automobile stickers will be admitted into the administration area, but those without such identification must be parked outside the gate, and the occupants will be transported from the gate to the Recreation Building in plant vehicles. In the interests of a good time for all concerned, all attending the dance are cautioned against unrestricted wandering about the administration area, as they will more than likely be apprehended by guards. The committee requests full cooperation in this matter.

Tickets are $1.10 a couple, and may be purchased from any member of the committee or departmental representatives. The committee for the dance include: **Harold H. Bowler,** general chairman; **John E. Olson,** treasurer; **H. E. Hafle,** music; **E. V. Sperling** and **Helen McGinnis,** arrangements; Mr. Anker, **Karl Ulrich, Shirley Grassle** and **Rube Medin,** decorations; **Marion Hyland** and **Mildred Rub,** tickets; **R. C. Wilhelmi** and **Annemarie Kinney,** refreshments; Miss McGinnis, program, and **Ivan "Tiny" Cahoon,** chief trouble shooter.

You are urged to get your tickets early, as when the present supply is exhausted, no further tickets will be sold. Attendance will be restricted to 2,000 persons, because of the hall's capacity.

THE BIG FIVE of EOP's groundskeeping crew are shown here before a background of power mowers. Pictured left to right are Vernard L. Rogers, service man; Albert F. Horn, shop foreman; John S. Leitzell, tractor foreman; Harlow W. Nicholson, assistant superintendent, and, talking as usual, the "farmer" himself, Supt. W. B. Manchester.

Group 2

EDWARD KEENAN

WILBUR GALBRAITH
Correspondents

A fine example of Group 2 spirit was shown recently by the men who donated their time and energy to the addition of three new rooms to the **Edward Gordon** residence.

Under the leadership of **Eugene Hunt,** assistant superintendent, and **William Kelsey,** carpenter sub-foreman, all Group 2 Carpenters visited the Gordon home to build the addition and to install imitation brick siding. The green paper roofing tile and numerous other improvements have really "dolled-up" the place and we believe every one has reason to be proud of the work done by our men. So to Mr. Hunt, Mr. Kelsey, **Dorsey Carter, Bob Gibson, Harry Taylor, Frank Zabor, Al Schorie, John Horvath** and all the others who helped, we say *"a big orchid to you."*

Ed Egan is back with us in the capacity of special guard and general office assistant.

The boys "muling" the skids on the ramp know how the mules feel in a mine—they are happy though —I mean the boys—not the mules.

Remarking about **Carl Ulrich's** and **Al Hesley's** picture in the last issue of *The Bomb-Shell,* Mr. Ulrich said, "I have seen better faces on elephants." Well maybe so, but we think the picture was OK.

Sammy Hoffman, scale maintenance man, claims a foul on his statement in the last issue of the paper. Dick misinterpreted my 73 as a golf score—I meant bowling.

They say **John Miller** has been released by the House of David, anyway Johnnie has shaved off his "goatee."

They have the story about **Inspector Frank Jilek** trying to teach **Murt Moriarty** another language—Bohemian.

Congratulations to **Lester "Whitey" Butler** on the addition to his family.

The truth comes out: **Irv Siemsen,** clerk, was a little late for work one fine sunny day. According to Irv he had car trouble, but we heard over **Nate Johnson's** short wave set that the attractive girl who rides with him is very fond of frying chickens. It so happens that the chicken wasn't brown when Irv called to pick her up and so they were both late for work but had fried chicken for lunch.

Flat tires are a bad things now that tires are rationed and it makes **Foreman "Johnnie" Ala** late for work. He's a good egg for helping out the ladies in distress.

When you see Jerry Phelan wearing his safety shoes to work you can be sure that he went home after work the night before. He tells us that they hurt his feet, but that is only his story.

Westchester Farms, owned and controlled by **Supt. Joseph E. Salmon,** has had the products of these gardens on display in Wilmington. One of the exhibits is a stalk of corn (which he said was sweet), measuring 6 feet 7 inches. Mr. Salmon was very reluctant to take credit for the success of the gardens and felt the credit should go to the store, a local concern, that sold him the seeds. The proprietor of the store, however, disclaims any credit and insists Mr. Salmon receive the honors. He added that while this is no particular achievement, it is still the record for this community.

Mr. Salmon does not intend challenging other farmers and is almost reluctant to mention his successes. Farming is a hobby with him and he has many products in his garden that he will gladly give to any one. (He used the phrase "get rid of"). We understand that Mr. Salmon has developed a new vegetable which he has not as yet named. It is a hybrid of some type.

Softball Items

Murphy's Boys showed the followers of the Mokena team some fine sportsmanship and after the game all enjoyed the little get-together in Mokena. Many of the boys took their wives and others their girl friends. During the course of the evening a fine program with **Edward Keenan** as the master of ceremonies was put on in the dance hall. **George Zobel** gave out with a tap and a demonstration jitter-bug dance. **Ode Golden** a motion picture of the affair while Mr. Schoppe sang several new hits. **Larry McKeon** played the trumpet while **Bob McGuire** danced with the little 6-foot-4 dream girl.

Murphy's boys whipped the strong Mokena team 13 to 8. **Otto Koch** hurled and got 2 of the 16 hits. Keenan registered two home runs, one with the bases loaded and the other with two on. Schoppe banged a long one in left field far over the fielder's head for a home run.

The Group 2 team trounced Blockson Chemical of Joliet in a Gold Medal game 14 to 7. **Ken Peterbok** allowed only three hits. Snerlich pitched for the Chemicals and was nicked for 15 hits. Home runs were hit by Schoppe and Speir.

Murphy's Boys defeated the Brown Bombers for the third time 13 to 7. In the sixth inning Keenan hit a home run with the bases loaded. McKeon, snapping out of a hitting slump, banged out four hits in the last two games.

Pool Now Effective For Plant Cars

New regulations became effective July 27 to insure the use of plant automobiles for necessary official business only. All vehicles have been placed in a motor pool operated from Group 70.

Employees are urged to ascertain details of the pool operation from their superintendents if and when they have need to use plant cars.

Stanley J. "Kelly" Kukulski of Army garage renown and **Frank Kern,** formerly a chauffeur, are doing the dispatching and working out details of operation. Headquarters are in Group 70 immediately east of the Service Garage.

EOP Dirty Linen Washed Publicly, But It's Done in Efficient Laundry

Modernly Equipped Institution Cleans Uniforms and Coveralls of Workers

When Monday comes for most, it is not only the day after Sunday but wash day to boot which is enough to throw anyone into the doldrums. But **Francis R. Walsh**, superintendent of the new EOP laundry, says that every day is wash day for him and it's a pleasure.

The EOP laundry, under the sponsorship of the Utilities Department, opened its doors June 23 and the guests of honor included 3,099 women's dirty uniforms and 546 men's dirtier coveralls. The uniforms and coveralls apparently spread a good word or two about the grand job that Mr. Walsh and his staff of 28 women and 6 men were doing because the third week of operations, 4,576 uniforms and 3,578 coveralls made their appearance at the laundry in addition to the hospital linen. When the laundry is in full swing, linens from the foremen's quarters, guest house and guards' house will be added to the schedule.

The latest type of equipment and scientific laundry methods make this new addition to EOP a highly specialized unit. Each operation has its special timing and treatment which enables the laundry staff to meet its high production quota with clock-like precision.

Doing Their Share

"Although we're not making bombs to send over there," Mr. Walsh said, "We do feel that we are making a definite contribution to defense by keeping the munitions workers' uniforms clean and eliminating any possibility of infection caused from wearing a soiled uniform."

The laundry operations at EOP are more complicated than in the home because of the volume of work and the precautions that are taken to safeguard the color and longevity of the materials and the health of the munitions workers. The modern equipment washes 125 uniforms in an hour and ten minutes to an hour and thirty-five minutes. The women's uniforms are thrown into a large cylinder machine at a water temperature of 140 degrees and the men's coveralls are thrown into a smaller machine of the same type at a water temperature of 160 degrees. Two different types of soap are used depending upon the water temperature and a softener is added because of the soap-eating iron in the water. Each load receives from 3 to 5 sudsings and 4 to 6 rinsings. Other treatments employed, depending upon the article, are neutralizing agent, household whitening and sterilizing agent, starch and bluing. From the washing process, the men's coveralls are thrown into a tumbler dryer and the women's uniforms get a starch bath. From the starch bath, they are thrown into an extractor which whirls the water from the clothes and in 15 minutes they are ready for the presses.

Result of Planning

Men have charge of the washing operations and the women operate the presses. The girls who washed their uniforms at home, prior to the opening of the laundry, probably remember with censored thoughts that it took an hour or more to iron one. The women in the EOP laundry press a hundred uniforms an hour with two types of presses. The collars, sleeves and top front and back are done on a mushroom or small press. The uniform is then passed to the next girl who does the skirt and culotte on a skirt press. The uniforms are folded and returned to their owners.

Mr. Walsh, backed by sixteen years of laundry experience, assisted by **Lynn L. Law** and **George E. Kinnard**, foremen, who also have past laundry experience to their credit, are responsible for accomplishing a big and necessary job with the minimum of fuss and confusion. **Jennie Naiden, Julia Fance, Claudia Polson** and **Bernadine Meister** were the first women employed and had had previous experience. They helped to train the girls who were employed later. Here there is a decided lack of the "boss attitude." Mr. Lynn and Mr. Kinnard work right with the girls, doing everything they can to maintain their high production schedule. Mr. Walsh smiled when he said that there had been no bickering among his 28 women employees and definitely believes that this establishes some sort of record.

"It took a great deal of planning before the laundry was opened," Mr. Walsh said, "But the kind of cooperation that we received from the Purchasing Department, the Expediting Department and all of Group 70 is what makes EOP one of our leading defense plants."

And he could have added that the EOP muntions workers will walk off with first place in the next best-dressed poll.

HOT BUT HAPPY are the girls who operate the mangles and pressers in the EOP Laundry. Pictured are Inez Runyon, Lucille Thurman, Arnoldine Ballard, Lucille Morrisette, Mae Ida Bobbit, Claudia Polson, Rita Link, Violet Parks, Betty Neuman, Ann Brouillette, Helen Pennington, Veronica Curry, Evelyn Speers, Eunice Stroh and June Million. Foreman George E. Kinnard is shown at the left.

Women

By CATHERINE NOONAN

The American woman can do almost anything from mixing the baby's formula to flying a plane, but it's a cinch that she won't do it without lipstick. Her Government isn't asking her to sacrifice her beauty aids, but there will be some restrictions on quantities and containers. From now on save all your jars, bottles and lipstick cases because sometime you will need them for refills. There is no danger of being without cosmetics due to the research of our chemists who have found substitutes for materials formerly imported and others that were taken over by the war industries. Although reliable cosmetics will be as good as ever, they will not be as plentiful. So our extravagance is a thing of the past. Today we use a thin layer of our favorite face cream which accomplishes the same purpose as the thick mask-like effect that we used to go in for. A thickened bottle of nail polish is no longer an object of scorn, but simply in need of a solvent to thin it. From now on we take the manufacturer's word for the quantity he prescribes in the use of his product. After all he has spent a good deal of time and money experimenting to find out how much and for what and when. So with a few simple precautions you and your beauty will be intact for the duration.

Hides Broken Nail

The other day we complained bitterly to **Anita Scott**, secretary to **R. T. Bassett**, about a broken finger nail. She was surprised to learn that our beauty education was so limited. She says that a piece of transparent mending tape cut to fit the nail and covered with polish will hide the ugly secret. Thanks, it does.

Canning Tips Available

By now you're surveying your first Victory garden in full bloom and you are as proud as a peacock. It looks wonderful. But you've never canned tomatoes in your life and what to do about it? This is no time to experiment with your own ideas on canning if you know nothing about it. Even if you do know something about it, you might pick up some new tricks in Farmers' Bulletin No. 1762, The Home Canning of Fruits, Vegetables and Meats, prepared by the United States Department of Agriculture. You can get a copy by sending 10 cents to the Superintendent of Documents, Washington, D. C.

First EOP Vignette

Something new has been added. We proudly present **Bertha Russell**, the first in the EOP vignette parade. Bertha Russell, inspector in the shipping room at Group 6 gets a terrific bang out of life . . . had charge of the mess hall at Ohio State University during the last war and fed 1632 soldiers just as mother would do it . . . can drive a car and change a tire with the best of them . . . was a traveling saleswoman in Ohio and Indiana . . . the men in Group 6 call her "Ma" and she thinks it's cute . . . was a nurse at the Soldiers' Widows Home at Wilmington . . . fishing is her favorite hobby . . . was a social service worker in Columbus, Ohio . . . native of Urbana, Ohio . . . is famous for co-operation among fellow-workers . . . once killed a black diamond snake with scalding water . . . has sparkling, alert brown eyes . . . cactus is her favorite flower . . . Bertha Russell knows her way around.

Sandwich Suggestion

In the lunchbox sandwich department this week we offer a bacon-celery spread. The following ingredients spread two sandwiches: Combine 4 slices of crumbled crisp bacon, ¼ cup minced celery, 2 tablespoons mayonnaise. By the way, what happened to the lunchbox suggestions that you were going to send to *The Bomb-Shell?*

Bare Facts on Bare Legs

Some time ago stocking manufacturers put a seamless stocking on the market in response to clamours for the "bare-legged-look." Now that bare legs are accepted, women have taken to leg make-up to give them the "stocking look." Here are a few tricks to use that will put Dietrich's underpinnings to shame. Having the skin of your legs moist in the application of liquid make-up helps it to spread more evenly. Be sure to blend the make-up carefully, otherwise you will have a patch-quilt effect that won't fool anybody. After the application on each leg has dried, take an old silk stocking and run over the made-up leg surfaces. This takes off any excess powder and gives you a silk stocking shine. If you are using the cream-type of make-up, use a skin softener on your legs first, as this will make it easier to apply and make your legs look plenty smooth. After you have applied the make-up, use the palms of your hands to smooth and blend the surface. Use a covering of dusting powder to check any stickiness. You can even go further by making a "seam" with an eyebrow pencil. One girl we know uses a piece of paper, the length of her leg, with a slit in it to make sure her "seams are straight." Even the experts won't know that you're not wearing stockings. But putting a bare foot in a shoe isn't the highest form of hygiene. It is best to use a deodorant powder in your shoes as well as between your toes.

WASHIN'S DONE cries Roy Frye as he pulls a batch of uniforms from one of the large washers in the EOP Laundry. Supt. F. R. Walsh is shown supervising the operation.

EOP Inspector's Son Sinks Jap Ship

Off Midway Island, a Jap destroyer was sunk June 5 due to the bravery and fighting skill of **Lieut. Daniel L. Cummings**, son of **S. Fred Cummings**, inspector in Group 2. Although Daniel was seriously wounded and his rear gunner was killed, he and the rest of his crew fought on until they had chalked up another victory for America.

Daniel, 26 years old, after graduating from Mazon high school, went to Purdue University for three years. He left Purdue to go to the Navy Air School at Pensacola, Fla., and was graduated in December, 1941. From there he went to the Marine Carrier School at Miami, Fla., where he received his wings.

Maj. S. Fred Cummings, Jr., an older son, is a graduate of West Point and is in the 11th Armored Division at Fort Riley, Kans. **Mary Cummings**, Daniel's twin sister, is a secretary at the Wright Army Air Field at Dayton, O.

After the Midway battle, Cummings received a letter from **Lieutenant General Holcomb**, Commandant of the Marines, commending him on his son's bravery. Daniel has recovered from his injuries and returned to duty.

Special Provisions of Safety Rules Listed

W. E. Canniff, manager of operations, has announced that on and after 6 a.m. August 1 the new Safety Regulations, as printed and issued recently go into full effect with these special provisions:

1. Mechanics and maintenance men regularly assigned to the group may carry a key for their tool chests.
2. Metals as integral part of clothing will be permitted. These include zippers, belt buckles and snaps.
3. Watches will not be permitted beyond the change houses after clocks are put in the buildings.
4. Regular non-sparking religious tokens suspended from the neck by suitable non-sparkling chains or cords, and worn directly against the body will be permitted.
5. Rings will not be worn beyond the change houses.
6. Persons regularly assigned to a group must wear the safety shoes issued, or shoes made safe to comply with the regulations. Persons not assigned to the group (casuals) whose shoes do not comply with the regulations, will wear the safety sandals provided.

Hospital

LUCY HARKNESS
Correspondent

William Liming staged a "coming-out party" the early part of last week, and no one was happier about it than he. In other words, he parted company with his plaster cast "straight-jacket" which he endured for two weeks as a support and protection for his healing arm. For a couple days he was real spry and up walking about the ward and sun porch, but must take it easy for a while yet before getting too frisky.

Franklin Wilkinson likes to play cards and does so with anyone who has time to spare when they come to visit with him. But it was a bit difficult for him to manage the cards, what with lying in bed with one arm in a traction splint. So, someone whispered a word in the kindly ear of a carpenter over at Group 70-8 and, presto, he now has a dandy little rack, all beveled and sanded, really a work of art, and just the right thing. And it is quickly becoming covered with a "design" of autographs. "Wilkie" was able to go home July 22.

Nurses are carefully watching their fingers these days for we have one patient who now might "bite the hand that feeds him." **Edward Gordon** has had his teeth fixed and it doesn't bother him anymore to "bear down," so he takes delight in enjoying a good solid meal again. No more of that soup for him, he says!

Frank Yarborough is still making his daily visits to the Hospital and is indeed a welcome sight to everyone as he pays regular calls at each office and in the ward.

Aren't the flowers around the grounds beautiful? But, particularly, aren't the sweet peas around the northwest corner of the Hospital doing their bit to "brighten the corner"? They are the special pride and joy of yours truly. I begged **W. B. Manchester** to plant them for me, then begged the Carpenter Shop for a trellis, and now I am right proud of the progress they have made.

Dr. George Luke says he has the best mother-in-law in the world! 'Tother day when Dr. Luke's brother had the misfortune to be in an accident with the doctor's car, she came to the rescue with her car, and, after a trip to the hospital to check up on and take home the brother, she brought Dr. Luke to work—a bit late but none-the-less welcome for we were all glad to have our fears allayed by the good news that, while the car was in a rather deplorable state, the tires were still in good shape and the doctor's brother was not seriously injured.

Gene Hurley has returned from her Colorado vacation, bringing with her a healthy, rested look, and a complexion that only the wide-open spaces can furnish.

Evelyn Richards, laboratory technician, and her doctor husband, took a short trip to Lake Delavan, Wisconsin, recently. They report having a lovely time. Evelyn is a native of the rugged state, but now is a gracious resident of the fair town of Wilmington, and loves it.

Dr. George B. Anderson, wife and baby daughter, **Susan**, paid us a visit July 10. He is now Medical Director at Green River Ordnance Plant, Amboy, Ill., and it seems to be agreeing with him.

There is a new member at the **Dr. H. L. Schultz** household—welcome and bound to become the most pampered pet of all time. To replace "Stormy," wire-haired terrier that strayed away from the Schultz home a couple months back, a group of EOP executives purchased and properly presented to Dr. Schultz another wire-haired terrier from a well-known kennel in Missouri. Dr. Schultz says he thinks he will call her "Dyna," short for dynamite!

This reporter, while on the phone at the reception desk last Monday, saw strange goings-on in the Emergency Room. All that could be seen from my vantage point was **Dr. I. M. Madura** going thru a weird routine of waving huge squares of gauze in front of him—something like the "Dance of the Seven Veils"! Upon investigation, it was discovered that **Lee Reynolds** of Personnel was the victim and object of all these gestures. It seems Lee spent a long, grueling six-hour stretch on the golf course Sunday and developed a beautifully blistered back as well as a gloriously bronze complexion. So ——— backslappers, beware! You won't see the welcome sign at Lee's door!

What ho! A-picknicking we did go! On July 15 the Hospital group held a steak fry at the **R. R. Sidell** home near Elwood. Congregating at 6 o'clock, the gang did themselves proud and the right thing by the excellent steaks done to a turn over the outdoor grill. Nurses, doctors, laboratory technicians, ambulance drivers, and other groups of the Hospital personnel were well-represented and a good time was had by all. Picnic chairmen were **Dr. H. W. Harrison** and **Gene Hurley**. Chefs of the day were **Thomas Moore** and **Dr. Harrison** and everyone pitched in on the entertainment committee. Dancing was the main diversion.

"Buzzards' Roost," or Foremen's Quarters, has a new member. **Dr. B. G. Giel** is now well established in Room 10.

Dr. and Mrs. J. M. Wechsler, Chicago, are the proud parents of a 7-pound-6-ounce daughter, whom they have named Judith Bonnie. "Judy" was born July 8. Dr. Wechsler is staff physician at the hospital on night duty.

Keith Chapman, Tonica; **Jewell Carlson**, LaRose, and **Robert Hanson**, Dwight, are patients on the recuperating list who have been making regular weekly visits to the Hospital.

Dr. Schultz spent July 17 and 18 in St. Louis, Mo., at the conference on war plant safety and health measures sponsored by the Army Ordnance Department. Dr. Schultz closed the two-day session with a talk on "Disaster Planning and Emergency Medical Services."

Sympathy is extended to **Dr. L. N. Cohlar**, whose mother died July 23.

Correspondent

Our box-car crew at the shipping end of the line is yelling for publicity. It's true enough that they have a hard job and the more they are rushed the more they cuss but they get the job done and that's the main thing. . . . And while on the subject of shipping we may as well mention the assembly crew on table one of the shipping bay. They hang their collective heads in abject shame if they make even the slightest of errors for theirs is the determination to fail not their buddies at the front. The current crew at this table includes **Crickett Varvel, George Ballock, Paul Arseneau, Thomas Jisa, Wilbur Testa, Ray Thorpe** and **Virgil Rigdon.**

And what would you think of a fellow who would pull a loaded skid the length of Building 13 *in the wrong direction?* Could be a football player. . . .

Lee Webster, an expediter, enlisted for pilot training in the Army Air Corps July 11 and we feel that he will keep 'em flying epeditiously. . . .

Bob Stewart has left Building 10 to become an assistant to **"Tiny" Cahoon** in the presentation of music a la EOP. . . . Now that we haven't got the place all cluttered up with watches the boys get some sort of a drive out of gazing soulfully at the gauges on some of the fire extinguishers. They look somewhat like clock faces and that is the height of something or other. . . .

Bernadini "Junior" Reo is leaving us on August 3 to take up training as a radio technician in the Army Air Corps so messages will come flying down to Reo. . . .

Rudy Mandat, our head janitor, is a most unhappy man and his chief plaint is who in blazes is this Smithy that **James Nash** is forever talking about. . . . We give you **Dan Pounovich** as a prince of obliging fellows. Dan drives our pick-up truck but manages to find time to do all sorts of favors for one and all. . . . An accolade and three pips and a tiger for the gang in Building 16 (especially those on the second and third floors), who labor so strenuously in the fierce heat and whose virtues have heretofore gone unsung. If opportunity presents itself we will look them up and herald their names to the world. . . . **Dudley "High" Dudgeon** has gone and went away. Dudley was always well up in the line when it came to clocking out time but now he has gone to Seneca to help send ships down to the sea. . . . **Inspector C. L. Harris** forgot his button one morning but he suavely explained to the guard at the outer gate that he would drive his riders over to their group and then go home after his button. The guard said, "That's pretty good, Charley, but that ain't the way I heerd it." . . . And here is a tip which all may take for what it is worth. Borrow money from **Dave Rosen** and he is reluctant to accept repayment. Methinks he figures that as long as you owe him you will refrain from putting the well known bite on again.

Johnnie McCarthy, who gained an envious reputation in the prize ring under the name of Kid Mack gave a squab dinner right after the Fourth of July at the American Legion Hall in Joliet. Thirteen guests were there and thirteen squabs. One fellow got one which was overdue at the rubber priorities commission. If a leg or wing were pulled in an effort to tear it loose it would fly back and scatter gravy over the table and the other guests in great abandon. Kid Mack kept referring to it as "Dewey" and when the leg band was removed with a pipe wrench it bore the date line 1898 which accounted for everything. At that it was a great dinner and the gravy was tender and delicious.

John Watson, former foreman at Building 13 has gone to war, having enlisted in the Naval Air Force July 16. A large number of his friends, including most of the foremen in the group and some other lucky fellows put on a going-away party for him that was a honey. It was held Saturday evening, July 11, at the Moose Hall in Lockport. There were songs and laughter, wild cow's milk and wassail, there was food in abundance and in the best of taste, there was five-card raise-you-up and seven-card peek and the cutest little game played with little square ivory balls with spots on them that you would ever care to witness. The party was a grand success thanks to the committee which worked so hard to put it over and its memory should linger long with John. Hail and farewell, John Watson, stout fellow!

Personnel

LEE R. REYNOLDS
Correspondent

We wish to welcome **Irene Krull, JoAnn Fehrenbacher** and **Eugene Earp**, 3 new messengers.

David Graves, our diving star, was showing his talent at Nowell Park swimming pool recently.

John Hogan has presided as em-cee on several occasions recently. He really can put across an introduction, especially where messenger girls are concerned.

Marge Forrest has returned to work after a two weeks' vacation with her husband at Lake Enterprise, Wisconsin.

We have just learned that **Selma Brown** has taken up the art of horseback riding.

Dolly Lundquist and **Florence Dunterman** had a very nice time over at the Machine Shop one Sunday morning. It seems they missed their usual ride and several men from the Machine Shop gave them a ride to work.

Stranger than fiction: **Dr. I. W. Madura**, Personnel Department, is the proud possessor of four brand new tires.

According to a recent letter from **Bob Hamlin**, "The Shores of Tripoli" are just a little overestimated (too few women).

Ask **Peg Collins**, reference room, what she answered when a friend asked her how everything was at EOP.

Don Peters will be missed by everyone in the Personnel Department, as he has left to accept another position.

We have just heard that the erstwhile **Lynn McCoskey** received his induction papers effective August 6, and we wish him the best of luck.

Inspection

RICHARD LOWERY
Correspondent

Paul Calligaris, Group 1, wore out the ramp between Buildings 13 and 14 . . . checking primers.

If **George Brummund** used an ounce more of energy he *might* move.

Robert Wilhelmi's son, **C. Robert**, suffered a broken right collar bone on July 17 while going through his daily tree climbing. Latest reports seems to put young C. Robert on the rapid road to recovery.

Jack "Blue Beard" Fay, Group 4, was married on July 27 to **Georgia Feeney**, also of Group 4. They are living in Morris.

Phil Luginbill, Group 6, is quite a handsome lad according to the reports from his home town. Phil is from Indiana. Maybe that is why **Bill Hartman** is spreading such stories.

Willard Vail, Group 6, reports that **Howard Hewlett** was entered in the Pontiac open golf tournament held this month.

Bill McGowan, a new member of the department stationed at Group 3, will be an added kick on the EOP golf team. Bill was a member of the Joliet Junior College golf team last year.

Congratulations to **Mr. and Mrs. James Glade** on their recent arrival. **James Junior** will have to do some fast stepping to keep up with his talented father. Mother and son are doing fine.

Inspector **Otis Meece**, Group 3, is the proud papa of a 9½ pound boy.

It looks as though **Godfrey Herscher** isn't the only aviation enthusiast at Group 3, as **Earl Greenstreet** is now receiving instructions and is about to learn to land.

Theodore Steger had been riding the bus in his daily commutation to and from Peotone, but it has been noticed by others that Ted has started driving his own car again. What's the matter, Ted, doesn't Annie work here any more.

Thomas French, the Group 3 golf pro, has been giving **Robert Marlette** instructions and someone ought to stop Mr. Marlette from throwing his score card in the waste basket.

Carl Bartlett, whose hobby is bees, sure knows what benefit can be gained from being a "bee" hobbyist during sugar rationing. **Henry Ford, S. S. Kresge, Wendell Wilkie** and other prominent men have the same hobby.

All the boys at Group 3 are wondering when **Jake Beam**, of World War I, Navy, and **Ray Pomeroy**, U. S. Army, are gaing to settle the argument as to whether the Army or the Navy won that war.

Mrs. Earl Shipley, wife of **Inspector Shipley**, underwent a major operation in a Chicago hospital.

Lidice, that little town in Czechoslovakia that was doomed forever by the Nazis, has been reborn in Illinois to prove that this Lidice and other Lidices all over the world shall never die as long as free men live. It is a pleasure to report that Inspectors Beam, Marlette, **Erland Sorrensen** and **George Wetterhahn** expect to be among the first residents of this community.

The recent promotion to shift inspector has made **Bob Lehnig** of Group 2 a very happy man.

Herman Sundberg and **Bill Walsh**, who were off for several days due to sickness are now back on the job. Bill is so full of shots and vitamins that he is likely to go alphabetical on us at any moment.

Waldo Kaiser took a couple of days off and went to the hospital for a tonsilectomy. (We've been wanting to use that word since the first time we heard of **Jimmie Fidler**).

Edward Kelley won the champion of something or other when he paid $21 for a can of lobster and didn't get ptomaine from it either.

Gilbert Maloney is an A1 bathing beauty at the Kankakee quarry every Sunday afternoon. Gilbert, inspector at Group 5, decided to trade in his 1905 bathing suit for a new pair of beautiful yellow trunks.

Elmer Nesius, Group 7, would like to know why he and **Harold Rouff**, Group 61, waited till 1 o'clock at one of Joliet's gay spots?

Bill Hartman, Senior, inspector in charge of Groups 4 through 9, may well be called the king of *steaks*. At a recent dinner Bill put away three giant T-Bones, or were there just three too many.

Milton Robinson, Group 2, forgot to shave under his nose—now we have something new—a mustache wearing a man.

Louis Huston, Group 2, is going around with his head up in the air, all because he sent a two dollar bill to determine his family tree, and found out one of his great, great uncles was **Sam Houston** of Texas—all for two dollars.

Bob "Killer" Kelly, formerly of the Scale Inspection Department. now working for that man with the high hat and long beard, is stationed somewhere in Georgia.

Tom Todd, shift inspector, is getting tired of living in Aurora. He is flat hunting in Joliet—. Please, will somebody tell him! ! !

Frank Lewis, Group 1, missed his profession—he should have been an actor—he works better with an audience.

Fred Harris, Group 1, has earned the name "Don Juan." Wonder why?

FLASH! ! **Leo "Dick Tracy" Hoffman**, Group 1, solved the mystery of broken gauges—the culprits use hammers. **Harold Troupe**, gage technician, rewarded Leo with a dozen roses—Leo wanted his heart inside it.

Ed "Mad Genius" Jilek's latest invention makes anything that **"Rube" Goldberg** invents seem simple. His latest is how to get the nitrate out of a can without opening the can. Very simple—throw away the can full of nitrate and get a bag of nitrate and just rip the bag.

Stella Jaworski, secretary to **A. J. MacLellan**, has been drinking her coffee at Poison Pete's every morning, but something is missing —her smile is gone.—Could it be because **Tony Lutkus** is on his vacation?

Guards

GENE RYAN
Correspondent

The familiar voice "Guards, McLaughlin" no longer rings out from Guard Headquarters. **Sergeant Harold "Red" McLaughlin** has enlisted in the Navy and is now stationed at Omaha, Neb., with the Navy Intelligence Department. Everyone realizing that it is our loss and the Navy's gain, wish him the best of luck in his new endeavors and know that in his proficient manner he will be a great asset to the Navy Department.

George Blackburn's cottage proved to be a fine spot for Sergeant McLaughlin's farewell party. All the boys wish to thank George for his hospitality, and to acknowledge **Clarence Carlson's** fish-frying prowess. Carlson, stationed at Post 8, had all the boys curious for a while. Instead of feeding the birds bread-crumbs as in the past he was feeding them angel food cake. The news finally broke out—he hit the jackpot on a baseball pool.

Anyone looking for a one-man show should contact **Coy Willis.** Coy can keep the crowd's attention with his mimicry and tall stories.

Dispatcher **(Carl) Kornmeyer** is considering adding razor blades, breath pellets, chewing gum and shoe laces to his stocks. He states there are calls for all of these and a lot more.

Leslie Carr (Flipper) would like some information on how to dispose of a swarm of bees that have made their home in a tree on his post. The bees have been there for two weeks and as yet haven't paid any rent.

George Bulliner says that **Gene Krupa** has nothing on the Mosquitoes. They can really play a tune on his Frank Buck hat.

Relative to the challenge of the Fire Department for a one-mile foot-race, **Sgt. Clarence White,** former track star, will accept the challenge providing his present training siege proves satisfactory. Early Joliet risers have mentioned seeing the Sergeant clad in heavy training clothing jogging along Wilcox street intent on re-gaining his former athletic physique.

The department of Women Guards is the "baby" of Plant Protection. It was organized last February, with a personnel of five girls and has grown, until at the present there are many times that number. Each girl has been trained as to her duties and is given definite instructions before being assigned a post of duty. Much of the credit is due to the charming and efficient supervisor, **Mrs. Bernadette McNamara.** The office is located in Building 4 at Richards' Farm. Women guards receive their instructions there and after dress inspection go to their various Posts.

They are women guards and *not* police matrons.

Many of you are familiar with the sight of "Brown Betty," the carry-all, which transports the women guards to their Posts. "Brown Betty" is very eccentric and with no warning at all will sound her horn, much to the embarrassment of the drivers. So, if she is heard approaching, be assured that all is well, but that she is determined to be seen. Also, she has been known to stop while on tour of duty and absolutely refuse to move, until the women guards have decided to walk in, and after giving them time to reach "home-base" she starts again and laughingly (blowingly) passes them by.

Group 61

JOE MOTTA
Correspondent

Sympathy is extended to **Whitney Miller,** assistant superintendent, whose Mother died July 17.

July 16 was a gala night for the fellows of Building 6. **C. "Duke" O'Connor** threw a party to celebrate his second week wedding anniversary. Seen at the party: **Elmer Henry** and **Gene Hambleton** spending dimes to no advantage. **Jess Shelby** attempting to figure out why **Olen Brucker's** hat wouldn't fit him. **John Benson** trying to console **Ed Brower** who kept saying: "In fifty-four years I have never been unduly excited —before!" **Earl Ruby** and **Glenn Marshall** winking at a Blonde and Brunette (wives please note, it was all in fun). **Gene McAllister** looking at himself in a mirror and saying "whata mess, whata mess!" **Jimmy Glade** crashing the party late—the penalty (bottoms up until catching up). **Bob Brumbach** and renegade **Al Anderson** attempting to break away. Not present at the party were the Gold Dust twins, **Tom Henderson** and **Howdy Feldman,** who had bigger things waiting for them in Kankakee.

Nature blitzkrieged **Col. P. L. Deylitz's** home using lightning as it's weapon. After the "all clear signal," he investigated and found five bolts in his chimney. No damage reported.

Donald Burke went to the Army.

Jack Auberry broke his $18 glasses.

Norman Johnston has been on the sick list.

Orchids to **Larry Lahrman** for his cartoon in *The Bomb-Shell* of the christening of Building 6.

LaVern Rasmus enlisted in the Air Corps.

Never realizing his dreams of winning the Preakness or Kentucky Derby, however, with a fighting spirit, "Bronc" John Spesia made a fine showing in his final appearance here. The ageing "Bronc," his trainer, "Sarge," decided, should be retired to the warmth and comfort of green pastures. He can be seen grazing peacefully among the posies of Group 66. We all miss our favorite horse enthusiast.

Aladdin carried a lantern to find an honest man. **Pete Balma** carries a flashlight to find nitrate, even on the day shift.

Bernard Williams is a raw recruit slated for the Army.

It Would Be Nice If . . .

Carl LaPaglia used salt on their tails, he would catch more gophers. . . . Electricians would rig us up a shower like the one for **Seward Brown.** . . . **Ed Westmeyer** wasn't affected by our water—painter friends of his told me it was some sort of liquid. . . . We could afford combination vest-pants—**Marion Carter** can. . . .We knew why **Ed "Camel" Rashid** was acting so youthful—could the reason be a "Miss." . . . **Nicholas "Doc" Warren** would tell us why he is so attractive especially on the bus. . . . He were 50 years old then **Olen Brucker** really would have some tales to relate. . . . **Glen Kelly** slept at home instead of on the lawn.

General Offices

MAE BELLE ANDERSON
Correspondent

Collected, assimilated, reported and edited by Billie Nicholson during Mae Belle Anderson's vacation.

Our one and only Cupid-ity: **Jean Mohr** (Payroll Dept.) and **Edward C. Bassett** were married at the home of **Dr. E. E. Hastings,** Joliet, June 26. Mr. and Mrs. Bassett are now residing in Morris.

Jean Tyrrell and **Billie Roeder** are still with us, in spite of their recent experience with a diver's helmet—and at thirty feet, too! Gad! What courage!

E. T. Bennington, of "Dear Editor" fame, is searching avidly for recruits for an Administration Area ball team. We anxiously urge you fellows to sign up before Red weeps promiscuously on our supplies.

From what we could gather when we brightly asked **Vic Dagenais** how he would occupy his time now that the Motor Pool has been established, it's a case of "if it isn't one thing, it's another."

As of July 23, it's *PRIVATE* **Ray McGuire.** How's about a Jap scalp for the lil' ole mantelpiece, **Ray.**

For you who have felt the strain of sugar rationing, the generous gentleman of Room 229A has a goodly supply of luscious yummies in his upper right-hand desk drawer.

Warning: **Betty Kane,** her what operates them fascinatin' mysterious machines in the Tabulating Department, will challenge anyone who calls her "Curly" to a duel of marshmallows at twenty paces. Hiya, Curly.

COMBATANT service with the Army has been assumed by Francis McCarthy, formerly employed by the Ordnance Department at EOP.

Welcomes to: **Marilyn Rhodes,** comely newcomer to the Comptroller's Department—**Tony Cemano** and **Arthur Witty,** vehicle manipulators — and **Mrs. Charlotte Hammond** and **Joe Catton,** fine additions to the Office Management Department.

Mrs. R. T. Read, wife of our safety supervisor and resident of the Administration Area, enjoyed a two weeks' visit with her daughter, **Mrs. John M. Gourgas,** Concord, Mass.

Dorothea Glaudell and **Dorothea Beverly,** ardent admirers of Izaak Walton, are collaborating on fantastic tales after a week together in Michigan.

Mr. and Mrs. James W. Forrest (Jim of the Expediting Department and Marjorie of Personnel) are recuperating from their trip to Wisconsin.

Dagmar Peterson, competent Chief of Filing and Mailing, reports a very satisfactory "Wartime" vacation — likewise **Jean Himes—and Ed Fitzer.**

Lola Early, secretary to E. O. Huey, has gone to Camp Swift, Texas, to visit her brother, **Edward J. Early,** who left an EOP job for the Army.

Russell H. Watt, assistant chief of Plant Protection, with "the million dollar personality," has been working pretty hard lately. He has a grand prescription for a Vitamin "B" diet.

PASSENGERS ALIGHT from the new streamlined EOP bus unaware a picture is being taken. The bus, driven by Milton Rueck, veteran EOP employee, is for the convenience of those residing within the EOP area and makes three round trips daily between the plant and Joliet.

Lucille Dillon, a former school teacher, has a deep interest in Stenography, but despite her career—she sounds very domestic, always talking about "a little stove."

Sharon (Sherry) Zamkovitz, daughter of **Mr.** and **Mrs. Paul Zamkovitz,** is a most attractive girl. Paul is the genial timekeeper at the Administration Building, having replaced **Ray Shepley,** who joined the armed forces.

Mary Kleeberger has probably caught up on her sleep, since her trip to Minnesota—or did she go to the Island? Have you noticed the flowers in her hair?

Molly Mahoney, the shy redhead, was trying to regain her school-girl figure, it seems, by bicycling, the other night. Bruising business!

Hank Schelling is wearing dark glasses.

P. Tamillo, past-master of terpsichore, made quite a hit with the orchestra leader at the Pal-O-Mar. His rug-cutting interfered with his dancing, however, and you know how "Tam" loves steaks!

Friends of **Arthur Bruer** will be glad to hear that he has had a speedy recovery from the hives—and it seems that since those three flat tires, he has deserted the land and taken to the water.

Wayne Sebby and **Arlene Thorson** spent a pleasant week with Wayne's parents in Wisconsin.

Joe Friedrich, jokester of the Accounting Department, can be coaxed to relate amusing anecdotes about his vacation.

John F. Dolan, paymaster, took his dapper self off to New York for a gala two weeks.

Rita Dwyer sped off to Jefferson Barracks one weekend — to visit her brother . . . it says here.

Benno F. Nell, Jr. caught one *That Long*—honest!

The inimitable **Frank Kern** explains wistfully that he visited only *one* of Milwaukee's breweries while on his trip to that city.

Dick Russell, Engineering Department's **Elmo Tanner,** will indubitiably have several new tunes to whistle after two weeks of research—we hope.

Field Engineers

C. O. FINNEGAN
Correspondent

E. A. Evans, chief field engineer, is proud of his victory garden, which he and **Mrs. Evans** tended this past spring and summer. None of the produce is allowed to go to waste; all surplus and much that isn't surplus they have given to their friends and neighbors.

G. E. "Grand Old Man" Mowitt gets most of the mailman's business in this office.

Al Schutten, Dave Chambers, Jack Horenberger, and **Jim Casey** of the "Island Athletic Club" now have their own recreational and keep fit program. Activity—badminton. Skinned knuckles, black eyes and brocken rackets indicate the interest and temper of the game. No place for a weakling.

O. A. Evans, chief engineering inspector, and his crew, namely **J. V. McCarthy, Euart Colby,** and **Ed Zlomie,** as well as **Road Engineer C. C. Irving,** have been coming early and staying late in order to aid the "Moonlight Construction Company" (rock roads) in building the plant roads.

Open letter to **Bud Davey**—reduce or wear your pants loose.

Last week many member of this department had the pleasure of talking by telephone with our good friend, **H. E. McCullouch,** formerly Mr. Evans' secretary. Mac is now with the Navy, and is stationed at the Naval Armory, Detroit, Mich.

George G. Golem, formerly a rodman in this department, returned last Saturday to say hello to the gang.

The July 21 fishing trip of **Mr. and Mrs. Marion Ring** and **Mr. and Mrs. Charles Wilkerson** netted the crew a mighty fine time—no fish.

R. S. Cole has returned to his duties after a brief illness.

First EOP Girl Leaves to Take WAAC Training

(*Continued from Page* 1)

into the WAAC; what I wanted to do if I were accepted; did I object to foreign service and what experience and success did I have in handling people. I noticed that they watched my posture and carriage very carefully as I entered the conference room and then I sat with them about four minutes before they started the interview."

Because Braceville does not have a wireless to receive telegrams, Miss Pichon's army career almost was curtailed before it was started. She was supposed to be in Rantoul taking a physical examination at the exact moment that the telegram arrived. This was the darkest hour before the dawn. Miss Pichon left for Rantoul but really believed that her chance to be a "Wack" had come and gone. But she was given another appointment and in spite of all obstacles, she was still a candidate.

"Then on June 22 I had my second and final interview. I really had a marvelous time. Their friendliness and warmth made me feel completely at home. They told me a great deal about the work, its discipline, opportunities and the responsibilities of an officer. They were keenly interested in EOP having heard of its splendid reputation. And that's all there was to it."

When a girl can go through all that and still come out smiling, the WAAC knows that it has first-rate officer material. Although Miss Pichon successfully matched wits with 5500 other women, she must now face competition in her own home. She has recently received word that **Allen Pichon,** her brother who has been with the army for the past three years in Puerto Rico, has passed an officers training examination and will return to the United States.

ALLEY OOP or rather alleys up says Veronica "Rennie" Ryan, Recreation Department, as she illustrates the fact that the bowling alleys have been completed, equipment has been received and play waits only the removal of offices now maintained in the Recreation Building.

Fort Sheridan, Kankakee, Others Fall Before EOP's Powerful Softball Team

Requests for Games on Foreign Fields Pour in; Soldiers Are Defeated 17 to 1; KOW Drops Two

EOP's softball team under the driving managership of **Johnny Kusinski** still maintains an undefeated record although they faltered a bit against a fine Kankakee Ordnance Works team at Morris Monday night, July 20. They shook off their lackadaisical performance from the sixth inning on and won the game 8 to 6.

The boys engaged the Fort Sheridan camp team Thursday night, July 23rd, but the early-to-bed, early-to-rise habits of Army camp life worked to a disadvantage for the soldiers as the lights caused them to commit several costly errors. **Ed Washburn**, on the slab for EOP, had the Fort team in the palm of his hand all the way, being tagged for only a few scratch hits. The lineup was altered behind **Lou Haake** in the seventh frame and EOP let down the bars long enough for the soldiers to score.

This EOP team is really a great ball team and it looks as if their reputation is stronger away from home as requests come in for appearances on foreign fields.

Results of the first nine games follow:

June 18—American Can, 4; EOP, 16.

June 25—Carnegie, Ill., 4; EOP, 8.

June 28—Danville, 2; EOP, 8.

July 1—Kankakee Boos., 3; EOP, 12.

July 2—Farrell Mfg., 3; EOP, 6.

July 9—KOW, 1; EOP, 9.

July 16—Joliet Moose; 4. EOP, 23.

July 20—KOW, 6; EOP, 8.

July 23—Fort Sheridan, 1; EOP, 17.

The schedule follows:

Bendix—Aug. 6 at South Bend.
Beecher—Aug. 9 there.
Kroehler's—Aug. 12 at Naperville.
Caterpillars—Aug. 14 at Peoria.
Kroehler's—Aug. 20 here.
Elgin Watch—Aug. 22 there.
Harvey—Aug. 23 there.

"Whadda ya mean, Celia . . . you can also hold down a job at Fuze an' Booster an' all this?"

Girls in Spotlight of Revue Rehearsals

Lovely feminine pulchritude, flashing eyes a-n-d . . . legs, a harmonious blending of voices. . . . That's the "Bomb-Shell Revue" in rehearsal and well on the way to complete production.

Among the bevy of beauties from Group 60 appearing in various acts and choruses of the show are **Annamarie Kinney, June Morgan, Edith Lewis, Dorothy Sonntag, Jean Tyrell, Catherine Gorey, Anne Mae Thompson, Jackie Dailey, Ruth Brunings, Dorothy Maxwell, June Shiek, Mary Lou Grady, June Schnepper, Mary Philbin, Virginia Cashen, Malfalda Proia, Marjorie Bush, Catherine Boyd, Doris Tatro.**

Glamor girls from Group 6 include **Mary Jane Barrowman, Winifred Robbins, Lorena Wilhelmi, Leona Krakar, June Randolph, Martha Reichardt, Barbara Greenwood, Marlene Kramer, Mary Pointer, Gwendolyn Flessner, Ruth Starkman, Maree Evans, Ardis Yarding, Lucille Hritz, Clementine Stonehouse, Helen Martin, Marge Martin, Gertrude Freeman, Shirley Hammes, Marie Kovacik, Florence Bute, Marie Romines, Ruth Tatro, Edyth Krzik, Landa Carraro, Betty Palmer, Juanita Thompson, Mary E. Swanson, Ruth Hassig, Patricia Poutre, Marie Partak** and many others.

A few of the cast participating in specialty acts and solo spots from the entire area are **Vernitta Ruddy, Mildred Lamport, Shirley Van Dyne, George Browell, Knut Axelson, Gertrude Freeman, Fred Furry** and **"Jersey" Klegman.**

Names of other performers and the groups in which they are employed as well as pictures will appear in future issues of *The Bomb-Shell*. More talent can be used, so if you would like to be a part of EOP's musical and dramatic contribution to America's Fighting Forces contact **Earl Carpenter** at the Recreation Building. Telephone 4109.

Husband: "I don't like your inviting that chap to dinner. He used to kiss you before we were married."

Wife: "Well, so did you!"

Husband: "Yes, but I've got over it and maybe he hasn't."

FUN

You Can't Beat It!

By "TINY" CAHOON

I received a letter asking why such and such wasn't this and that, but so and so didn't sign his name. The letter was not a nasty dig and I would like to know who the interested tennis enthusiast is.

By the way, I feel safe in saying that the EOP tennis tourney will be run off the last of August. The courts are now open. Come one, come all.

Word came over the vine that a certain black-eyed home run king was roaming Fuze & Booster and then I found out it wasn't a King, but a Queen of Swat; **Barbara Greenwood.** No, she is not a muscle factory, just an all around great gal. You'll see her in the chorus with the "Bomb-Shell Revue." And how!

Archery Now Under Way

The archery equipment is in and the feathered shafts are flying. I don't know what some of the archers could do from the back of a horse, but I wouldn't want them "arching" at me in an open wheat field. The only thing missing is the smell of gun powder and fast death.

The bowling alleys soon will be ready for active duty. By active duty, I mean open to employees. Everyone who can find the time is cordially invited to indulge in a line or two of the grand old game of kegling. Now, no hob nail boots on the alleys! A pool table will also be ready for your pleasure.

Haven't received any cards boosting a football team. Oh, well, it is a rough game and every man to his likes.

The best way to have fun is to do something you like to do. The next best way is to watch or listen to someone else do what they like to do. **Earl Carpenter** is coming along fine with the girls' dance group. Here's a chance to see what goes on before they turn on the footlights.

Teams Doing Well

Bob Stewart has some of the finest musical talent you will ever hear playing in regular practice, with jam sessions twice a week. Lay down your troubles and cares just about any afternoon now and have a look-see and listen at the Recreation Building. 'Taint bad, 'taint bad.

Well, the representative teams in baseball, softball and golf are still undefeated and all the boys are doing a swell job, but if you have talent along these lines you still have a chance to make any of the teams.

George Bechus' Group 70 softball team, built around **Lou Hoake,** finished the first round of play in the Load Line league in first place.

Get your date for Saturday, August 8. You can bring an outside date to the summer carnival dance. It's going to be a *wow*, which when interpreted means *FUN—You can't beat it.*

SOFTBALL team of the High Explosive Laboratory who downed the Fuze and Booster Laboratory team at the joint picnic July 19 is shown here. Back row, left to right, are: Asst. Chief Chemist Ray Hybarber, Nelson Tippett, Charles Clifford and Herb Just; front row: Chief Chemist H. E. Hafele, "Rosemary" (wearing mask), John Snyder, Opal Just, Baron Rothchild and Pitcher Ronald Beck. In the background is Sam Kunze of Fuze and Booster.

EOP's Baseball Nine Will Engage Camp Grant Soldiers Here Aug. 15

Frank Wehrle's Boys Maintain Undefeated Record in Ten First Games; Schedule Heavy

Frank Wehrle's hustling baseball team continues the march along victory row refusing to take no for an answer. It is a type of team that fans love with their bustle and determination to get the job done.

The first game with an outside team against the Moran Crackers of Joliet, was played here Friday, July 10, and was watched by a small but enthusiastic group, which saw the game go an extra inning before the EOP team won 6 to 5.

At Dwight eleven innings were required to win 3 to 2.

This hard working ball team took on three ball games in as many days last week with a game on Sunday to make it five in eight days. The work seems to agree with them as they batter their way along.

On August 15 the EOP team will tangle with the hard hitting Camp Grant team. The game will be called at 5:30. A large attendance is expected.

Results of the first ten games follow:

June 30—Joliet General Refractories, 1; EOP, 9.

July 5—Wilmington, 2; EOP, 13.

July 8—Kankakee Browns, 1; EOP, 10.

July 10—Moran Crackers, 5; EOP, 6.

July 15—State Hospital, 0; EOP, 3.

July 17—Moran Crackers, 3; EOP, 9.

July 19—Dwight, 2; EOP, 3.

July 21—Joliet General Refractories, 0; EOP, 6.

July 22—Joliet Wall Paper, 6; EOP, 9.

July 23—Berwyn, 1; EOP, 6.

Hot, Sweet Players Forming Swing Band

It's really going to be good! It's going to be sweet and rhythmic, hot and low-down. What's this all about? Why, the new EOP swing band, of course!

There are many good musicians about the plant and some of the cream of the crop are forming a band that is gradually assuming pleasant proportions.

Some of these well known men of notes are **E. L. McCrea,** Group 66A; **Francis Buhl,** Group 3A; **Gerald Riley,** Group 61; **Harold Bergeson** and **Ed. Stonitch,** guards; **Ted Steger,** Group 3; **Ralph Keck,** Group 1; **Frank Zupancic,** Group 8; **Ralph Maloney** and **George Zelke,** Fire Department; **Keith Gale** and **Bob Peterson,** Richards Farm.

There is still room for some more of "youse" guys. Come on and join them. You'll be hearing some more from them in a great big way.

Salvage

ANDY VAIL
Correspondent

For some time we had to listen to **Lester (Shorty) Devors** tell how large his potatoes are growing, **Art Voss** what enormous tomatoes he has, **Scott Soper,** what size his melons are, but they stopped boasting, when some one informed them, that they saw three of our guards on *one* beat.

We welcome **Bob Cohen** back from the Hospital where he was confined for a week. He told us that after the second day, he took a turn for the nurse.

Harold Groskreutz tells us of the experience his brother Ted had recently while helping their father on the farm. Ted was leading a cow into the barn, when upon opening the door, discovered the hired man had hung himself. Ted immediately took off. About five minutes later when he was ten miles away, he paused to take a breath, he was surprised to find the rope in his hand and the cow on the end of it. He then realized what had *been* holding him back.

Willie Peebles had a pair of the safety sandals they wear in the Fuze and Booster Groups. The fit was so good that he turned around three times before they moved.

Henry O'Reilly claims that his experiment is about finished. He crossed a homing pigeon with a woodpecker which will not only deliver the message, but will knock on the door.

Elva Thomas of **J. C. Schmeh's** office says we all know the saying that the way to a man's heart is thru his stomach but she believes the best way to hold a man is in your arms.

Tommy Skrinar, coming to work the other morning, was caught running a stop light. He explained to the traffic officer, that on account of having two young ladies with him in the front seat it was crowded and he was too modest to reach over and shift gears.

Harlow (Iron Man) Kadow causes us some anxious moments at times, especially when he dives into the iron pile, while we wait with abated breath until he emerges from the other side. Therefore we were not surprised when he came in near the end of one day for first-aid treatment, complaining that he had difficulty in straightening his back. Upon stripping off his shirt we found a railroad axle had slipped down his shirt collar early that morning.

When the new Engine 144 came by the other morning, we did not recognize **Jack Murry** on it because we were used to seeing him behind Engine 32 pushing it up the grade.

PICNICKERS at the recent Electrical Department affair at McKinley Park shown here are: Seated, William A. Buck, Mr. and Mrs. Gus Peterson, Mrs. J. V. Wall and Viola Leith; standing, Mr. Wall, Martha Herrity, Agnes McCarthy, George Rummel and Mr. and Mrs. Don Lewison. Harry MacRae was behind the camera.

Sorry ~

Girls and Boys . . .

but extra copies of The Bomb-Shell will be 5 cents each.

One copy is mailed without charge to each employee's home. If you do not receive yours, telephone Line 4206.

The demand has become so great that the charge for extra copies was made necessary. Proceeds will go to the Recreation Fund.

ELWOOD ON PARADE

FAR AFIELD go EOP's field engineers, under the direction of Edward A. Evans, and it takes more than a dinner bell to assemble the group shown here.
Pictured left to right are: Back row, Murray Jordan, Edward Zlomie, John V. McCarthy, Myron Benham, Euart Colby, David Chambers, Orville Evans, Charles Vedder, Albert Schutten, Everett Granville, Gordon Enger, Joe Panish, Jack Horenberger and Laverne Foran; Front row; Frank Misischia, Charles Irving, Richard Cole, Charles Wilkerson, Howard Davey, Cyril Finnegan, Mr. Evans, George E. Mowitt, William DuPerrieu, Richard Shambo, Marion Ring and James J. Casey.

GIANT GRASSHOPPERS and grass cutters are these twelve power mowers used in the EOP area. Supervised by "Farmer" W. B. Manchester, superintendent of grounds, operators of the mowers shown here left to right are: Joseph F. Breen, Glenn V. Palmer, James Powers, William I. Bault, Everett T. Henline, Fred Geissler, Arnold S. Vaughan, Marshall P. Oling, Oliver B. Spiller, Herbert W. Lavallier, Joseph W. Ross and Elmer L. Schramm.

BUSY AFTER MOVING their office into the extension of the Administration Building's west wing, workers in the Army's Stores and Transportation Department barely hesitated when this photo was made.
Shown are: Lt. C. R. Crandell, Nina Horrie, Robert Cohen, Frank Santry (asleep standing), C. Di Lorenzo, Helen Benson, J. P. Filips, chief clerk; Lois Dix, Frances Jursonivic, Franklyn Bevan, Mary Serdar, Bernadine Klausing, Florence Stassen, Si Faupel, Frances Haslett, Mary Scahill, James Walker, Lewis S. Miner, Clayton Craig, Nora Kelliher, William Wiseman, Agnes Hatting, Bruno Sismondi, G. B. Lyons, Dorothy Nemanich, and William Hillestad.

OFFICIAL ARMY FAMILY of EOP is shown here grouped around the commanding officer, Lt. Col. Don M. Hoffman. Pictured left to right are:
Standing, Lt. D. A. Yeoman, Lt. J. H. Lucas, Lt. A. G. Resch, Lt. C. E.. Beilharz, Jr., Lt. C. R. Crandell, Lt. W. J. Durrenberger, Lt. M. G. Brandon, Lt. R. E. Pinnick, Lt. F. G. Kuether and Lt. C. P. Bohannon; sitting, Capt. J. I. Bach, Capt. D. P. Tunstall, Colonel Hoffman, Maj. A. C. Johnston, Capt. K. D. De Young and Capt. G. A. Grant, Capt. J. A. Hardy and Lt. F. J. Weis, also members of the family, were not present.

Tire Control Board Warns Car Drivers

Points Out New Grade 2 Rubber Not Available

"It has been brought to our attention several times lately, that many persons eligible for recapping services are deliberately running their tires to destruction in the belief they will be able to secure new Grade 2 tires," said **Frank M. Bray**, chairman of the Will County Rationing Board, Joliet, in a letter to the EOP Tire Committee. "The quota of these tires is only a little greater than that of first grade tires, and most applicants will have to be denied. These new tires are largely made of reprocessed rubber and cannot be expected to give better service than can retreads.

"As the whole tire rationing program is based on the necessity of conserving rubber, new tires will not be granted if retreads can be used; and we would ask your organization to publicize the information that all eligibles apply for retreading service before their present treads are too far worn.

"The board has been requested to check on careless and reckless use of tires, many of which cases have been reported to us, and drivers guilty of such practices will have to be denied service."

Members of the EOP Tire Committee pledged full co-operation to Mr. Bray and said they would present the warning to all who ask for certification letters.

Wilmington Sets Up New USO Quarters

The huge supermarket planned for Wilmington is going to house ping-pong tables and easy chairs instead of meats and groceries. The double-store front building right in the heart of the business district will welcome EOP and other war workers instead of shoppers.

Before long the structure will be equipped much like one of the hundreds of USO centers outside the military camps, with facilities for games, reading, writing, music and other enjoyments. It is not generally known that the USO serves 35 of these war industry communities, of which this is one of the largest. Only 6 per cent of the total USO budget goes to industrial centers, but the need is apparent.

H. J. Sander is the director and he has arranged to put a traveling library in the dormitories housing single men and is having a baseball field and playground leveled.

St. Louis Ordnance Officials Visit EOP

Army and civilian officials from the new office of the Field Director of Ammunition Plants for the Ordnance Department in St. Louis were visitors at EOP August 6. Included in the party, which held conferences and inspection trips here, were **Lt. Col. O. W. Jank, Maj. August Busch, R. O. Hurly** and **E. S. Chapman.**

". . . 900 former employees are honored . . ."

DEDICATION CEREMONIES for the giant EOP service flag were the highlight of the Summer Carnival Dance Saturday night, August 8, at which about $500 was raised for the recreation fun. Shown here, before the flag, is Comptroller John J. Cole, who with Lt. Col. Don M. Hoffman, outlined the purpose of the flag as an honor to the 900 former EOP employees now in the armed services. The speakers were introduced to the enthusiastic audience by H. H. Bowler, general chairman for the affair.

First Aid Classes Now Being Formed

The Elwood Ordnance Plant in co-operation with the American Red Cross is initiating an extensive first aid training program to be offered to its employees.

These courses, both standard and advanced, will be offered at the plant and also in various surrounding home towns of the employees.

The primary purpose of first aid training is the prevention of accidents. Experience has amply proven the real value of this training in all industries where it has been established.

The vital present need in homes and communities of first aid training and knowledge is clearly recognized by a glance at the ever-mounting newspaper lists of unnecessary deaths, permanent disabilities, hours of lost time and enormous costs to the victims.

If you are interested, please contact the safety engineer in your group immediately. Give him your name, address and indicate your preference as to the place and hour you will attend these first aid classes. If your shifts rotate, other classes will take up and carry on the work to meet the requirements of your new hours. Five to six weeks are required for the course.

Getting trained in first aid is just another personal contribution you can make to your country at little cost to yourself.

USO Contributions Reach $5,612 Here

Preliminary reports, about 90 per cent complete, indicated that EOP workers have far surpassed their 1941 contributions to the United Service Organizations. At press time, the total for this campaign had reached $5,612.10, compared with approximately $4,200 last year.

Cahoon Resigns EOP Post to Enter Army

Ivan "Tiny" Cahoon resigned as recreation director at EOP, effective August 14, to accept a commission as captain in the Army. No successor had been selected at press time. Captain Cahoon will be stationed at Kansas City in the Officer Procurement Branch of the Adjutant General's Department.

Taylor Transferred to S & P New York Office

C. Harold Taylor, EOP executive secretary since October 21, 1940, has been named special counsel for Sanderson & Porter, builders and operators of the Elwood Ordnance Plant, in their main office at 52 William Street, New York. Mr. Taylor plans to report at New York August 17.

His EOP associates tendered Mr. Taylor a testimonial dinner at the EOP Cafeteria Wednesday night, August 12.

Before coming to Elwood, Mr. Taylor was for eight years associated with Sullivan & Cromwell, general counsel for S & P in New York. He was graduated from Yale University in 1929 and from the Yale Law School in 1932. At Yale, Mr. Taylor was active in debating and dramatics and had a short but thrilling career as coxswain in a racing shell crew. He went out for the post under protest and proceeded to sink the shell on his first trip.

Mr. Taylor is married and has two sons. He lived in Joliet during his work here. The activities of his office will be carried on by his assistant, **John Watson.**

Service Flag Is Unfurled at Plant Party

2,000 Attend Big Summer Carnival in Recreation Hall

Approximately 2,000 persons attended the Summer Carnival Dance held by the EOP Recreation Department in the Recreation Building of the Administration Area Saturday night, August 8. The dance was a huge success and a considerable sum is expected to be turned into the recreation fund as a result.

In the basement of the Recreation Building, sixteen chance booths operated by the various lines and departments vied with one another for three $10 prizes. After considerable difficulty the judges, **Lt. Col. Don M. Hoffman** and **John J. Cole** decided that the War Department booth was the most beautifully decorated of the sixteen and Group 1 with its barnyard scene was the most novel. Honorable mention went to Group 2 for its attractive and patriotic display and to the exhibit of the Inert Storage Department for their unusual bombing scheme. Considerable praise is due to the sponsors of this exhibit because of the paintings that adorned the booth.

The auditorium decorations were carried out in carnival theme with gaily striped awnings over the windows to lend an outdoor effect to the hall. Multi-colored balloons strung across the ceiling added to the outdoor flavor. Unusual decorative effects were attained for the stage through the use of glass bricks mounted on stands behind which were placed multi-colored lights.

As a high-light of the evening, the EOP service flag was unfurled for the first time, in commemmoration of the 900 former employees who have left this arsenal of democracy to take their place in the armed services. Following opening remarks by H. H. Bowler, general chairman, the service flag was unfurled by Colonel Hoffman as commanding officer, and Mr. Cole, as the representative of Sanderson & Porter. Short addresses were made by both and the dedicatory ceremonies ended with the entire assemblage singing the national anthem.

Considerable praise was voiced by the committee for the splendid cooperation given by the various groups who worked so hard and diligently to make the affair a real success. It is planned to hold similar affairs in the future.

Cantigny Post Makes EOP Veterans Welcome

Veterans employed at EOP are cordially invited to make use of the facilities of the beautiful home of Cantigny Post 367, Veterans of Foreign Wars, at Joliet, declared **Al Puhl**, post commander, who, by the way, puts in eight hours each day at Group 3. Meetings are held each Thursday night at 8 o'clock, and on the third Thursday of each month they have a social night when refreshments are free for members, their families and friends.

The Man Who Relaxes Is Helping the Axis!

Bullets, shells, bombs, tanks, anti-aircraft guns and marching feet are not the only weapons of war. Another very deadly weapon might be "words," the phraseology of which might undermine these United States. The human mind is very sensitive to words which, in formation, produce fear; fear of defeat, fear of the future, fear of losing, fear of seizure and more fear. These fears must never enter the minds of we Americans. This country could not be called "our country" if we are defeated. America would not seem "like home" under foreign leadership. But, if we are to lift our own minds, as well as those of our associates, from non-confident recesses, we must think in terms of what we can contribute not only in dollars and cents, but in the amount of effort we put forth to do our work every day.

There is more to work than the pay it brings when we have a war to win and our future happiness and security are at stake. Our work here, day after day, is not merely a "job" which we start at 8:30 and forget at 5 o'clock. Each and every one of us is a soldier in action. Our weapons are our innermost thoughts which produce our reactions to conversations, radio programs, propaganda of all types. If we faced the enemy on the battlefield, our first thought would be to destroy him and preserve our life. Since we are not, we owe a responsibility to those who are. Those assigned to destroy the enemy so as to protect us at home, even including those of us who may not be doing our share to win the battle. We are the "at home" Army competing against the "at home" army of the enemy. —**Geraldine Almon**, Group 60.

Preparedness on the Road

What would you do if seriously injured in an auto accident and there were no doctors or First Aid men present? If you were conscious could you direct anyone present on how to handle your injuries or would you have to leave it to them to bungle the treatment—maybe injure you for life—or worse.

Could you tell those present how to stop serious bleeding—or how to treat you for shock—the one thing sure to be present in a serious injury and the one thing a doctor must treat you for before he can administer corrective treatment to any extent. If you could be gotten to a doctor, well treated against shock and without further damage to yourself, he probably could save you—but not if shock gets too big a start. Could you tell those present how to strap up a badly fractured leg, arm or back in order to move you without causing more injury—how to move you with broken ribs and not puncture your lungs, causing death?

Could you help or tell anyone how to handle your wife, your child or your friend in case of serious injury? If not, don't you think you owe it to them and yourself to know how? Is it worth 20 hours of interesting relaxed study and demonstration to find out? Is it too much to ask of yourself for their sake?

Certainly it is not too late to learn how—if you don't start now, you probably never will. How much is your life worth to you or the life of a member of your family worth to you?

The chance is offered you by your Safety Department to study First Aid and be prepared for whatever lies ahead. Classes will be held evenings in nearby cities for your convenience. Classes will be held here at the plant—for you.

A convenient pad is supplied in your change house or lunch room for you to sign up for 20 hours of study and you can then be happy in knowing you are being prepared. You can't always lay down your life for your best friends, but you certainly can lay down a few hours of study for them. —**R. T. Read**, Safety Supervisor.

"EASY THERE, GUS—This is a 'G-Man' sleeper!"

Letters to the Editor

Editor:

Am receiving *The Bomb-Shell* regularly and would like to take this opportunity to thank you for remembering me as one of your former employees. I am reasonably sure that anyone receiving this paper, who is now in the service, will agree with me when I say that this is one of the best ways I know of to keep in contact with former friends and co-workers. If there is any way possible I wish you would give my best to **Johnny Wold, Rube,** and the rest of the boys at North Inert and tell them to keep the bombs rolling. **Corp. Herbert Lent,**
Fort Sill, Okla.

Editor:

I received my first issue of *The Bomb-Shell* today and enjoyed it nearly as much as my hometown newspaper. I am moving to primary school tomorrow as I finished my pre-flight training here. I shall send you my address as soon as possible. I worked in Group 1 and am especially interested in their column. I hope that particular correspondent covers everything, especially Building 4. In reading the honor roll, I discovered quite a number of names of people I know very well. Your paper is very thorough and interesting.

Cadet Earl G. Konrad,
Kelly Field, Texas.

Editor:

The pictures and articles remind me of many places that are familiar to me from my 16 months of employment with Sanderson and Porter. Would like to say "hello" to all the boys I know and have worked with on railroad maintenance and construction. I am taking the air mechanics course here and hope soon to take my place out on the line.

Pvt. Wayne E. Bezold,
Chanute Field, Ill.

Editor:

At the end of a hard day's work of drilling men, I get great enjoyment when I reach in my foot locker, and stretch out on my bunk with the latest issue of *The Bomb-Shell.* I was very surprised to see my name in the paper. Previously I was the Assistant Foreman in Bldg. 14 of Group 1. Now I am a private waiting for my warrant to go through as a corporal, which should be in a few weeks. I completed eight weeks in non-commissioned officers school. Perhaps if at some time you would like a column on Army life in general and the tricks and good times of a soldier, just drop me a line.

Pvt. Thomas C. Gresham,
Ordnance Training Center,
Aberdeen, Md.

Editor:

It was not only a surprise to receive an issue of *The Bomb-Shell* but a pleasure to read it. The paper was a swell substitute for a trip back to the plant and the old home town. Perhaps in the near future we can strike up an agreement, you fill 'em and I'll drop 'em.

Cadet Jack Dent McCoy,
Pensacola, Fla.

Editor:

I enjoy reading *The Bomb-Shell* and tonight read your honor roll. My son worked there almost from the breaking of ground. He was home on leave three weeks ago, and visited the plant. He always asks about its doings in almost every letter. He enlisted in the Air Corps January 21. He is now **Sgt. James (Jimmy) H. Brougham,** stationed at Harlingen, Tex.

Mrs. Ed Brougham,
1401 Brown Ave.,
Joliet, Ill.

P. S.

Jimmy thinks Army life is great and knows all his Buddies at the plant are pulling with the country.

THE BURNING PIT

By Scorchy

Where ya goin, lug? Got a pass? Don't you talk rough like that to me or I'll tell Chiefie Baughman on you. Oh, mercy me, don't tell Chiefie on me or he'll take the cream puff out of my lunch box. And what do you want out here? I want to see Mr. Salmon, and be quick about it. And who are you? Just tell him Scorchy wants to see him. O. K. bud. Hello, Mr. Salmon, this is the pedestrian gate—a guy out here says he is Scorchy and wants to see you—I know he's a faker but he says he's just got to see you. O. K. we'll send him in.

Hello, Mr. Salmon. How are you, Scorchy, have a chair—sit in that leather upholstered Dagenais special. What can I do for you? Mr. Salmon, I have been hearing a lot about the one best way of loading shells and I thought I would come out here and have you put me wise to all the latest wrinkles in this manly art so I can be up-to-date—you know a guy in this writing business has got to be wised up on everything around the place. There is a lot of talk around here about the superiority of the Murphy Method, the efficiency of the Fitzpatrick Method and the speed of the Dougherty Method but I decided to place my bet on the old reliable Salmon Method. Everyone admits your conception of the art is the model of the industry but there are a few differences that ought to be ironed out between you. What do you say about going up to Mr. Murphy and talking it over.

"Scorchy," that's a good idea. I know old Jim will probably be a little sure of himself but when I get through telling him a few of our latest innovations down here there is no doubt that he and "his boys" will be using the Salmon Method from then on.

(Reread above on approaching guard, telephone to Mr. Murphy, searching, passes, escort, etc.)

Hello, Joe, is that line of yours still operating? Who's your friend? Now, Mr. Murphy, that's enough of your compliments. Meet my friend Scorchy, you know, the writin' guy of the "Bomb-Shell." Pleased to meet you, Scorchy, some of "my boys" have told me about you, nothing good of course, but no offense intended. What's in the air?

Well, Jim—er er I mean Mr. Murphy, Scorchy and I have been discussing the latest tricks in shell loading and when I got through telling him all the latest improvements that we have developed down below, he was so impressed with our technical brilliance he suggested we come up and let you in on a few of the details of the Salmon Method with the idea that if we could make you understand it, you would adopt it pronto and throw that old Murphy Method out in the junk-heap, where I might say it has rightfully belonged for some time.

Joe, I appreciate more than I can say, all of the kind words you are showering upon me so indirectly and I fully realize that you have that kidding way of expressing yourself. Further, my boy, I can read between the lines and readily recognize your little visit as an entreaty to be schooled in the good old Murphy Method, and this being such a nice day, and you having been so polite about it, I shall break down a practice of many summers and really show you how far ahead of all others is the Murphy Method. In fact, I wondered how long I was going to have to wait for this little social call. And now while we are at it, how about calling on Fitzpatrick and giving him a little morsel of our industrial proficiency. Good idea, Mr. Method—I mean Murphy.

Hey, duck that pipe wrench. Murphy and Salmon are coming up from the gate and if they see it, we'll be shy one pipe wrench. Oh, hello, Jim—hya Joe, I was just telling this plumber to be a little neater with his tools. You know, according to the Fitzpatrick Method, everything must be neat and orderly. You fellows don't get much of it, but all the visitors come to this line when they want to learn the real McCoy on loading ammunition. I can't quite understand the way the Fitzpatrick Method has become so nationally famous. Who's the little squirt with you. Oh, so you're Scorchy? Well, you better steer clear of a few guys around this place that are after your scalp.

What's up, men? Fitz, Joe came over to learn something about the famous Murphy Method and as I got to telling him a few of the little tricks that have made me and "my boys" so famous around here, he stopped me in the middle of a four-syllable word and insisted that I come up and deal you in on the one and only Murphy Method.

Jim, that's nice of you and Joe, but what a waste of shoe leather. Now if you want to break down and admit that you both got a lot to learn about this mystic art, I'll pour forth for a few minutes on the merits of the Fitzpatrick Method and you'll leave here with a new lease on life wondering why it took you so long to come to headquarters for information. Now, of course, I can't tell you all the latest tricks we have developed because neither you or Joe would understand them but I'll go slow and you can probably keep up with me. (Telephone rings.) Hello, Fitzpatrick speaking—Oh, hello Dougherty — what's that? Sure, come on down. Dougherty arrives.) Hello, Fitz—well this is a coincidence, finding Mr. Murphy and Mr. Salmon here, it will save me trip down there way.

I got to thinking that even though I might be barging in on the select circle, there were a number of new ideas that I have invented up the line a bit and they are so remarkable that there seemed to be no alternative but to dignify them with a name and with a lot of thought, I came upon the name. "Dougherty Method." Listen a bit and you'll really learn a few things that will make your day's work a lot easier and bring fame and maybe fortune a little closer to your own back yard. Now, as I was saying . . .

Two Days Later

Keeper, be sure and keep him strapped to the bed. He's a newspaper man that's gone a little wacky—He keeps screeching a bunch of names that sound like Murphy, Salmon, Fitzpatrick, Dougherty and there is some stranger in the picture by the name of Method. Keep him there a few days and he'll snap out of it.

EOP-KOW Women's Red Cross Unit Meets Weekly in Guest House Here

Mrs. Hoffman Directs Busy Group Making Surgical Dressings, Sweaters

Making surgical dressings, knitting sweaters and sewing is the Red Cross work carried on by the women residents of the Elwood and Kankakee plants every Wednesday in the beautifully appointed reception room of the EOP guest house.

Mrs. Don M. Hoffman, chairman of the Elwood-Kankakee Red Cross which is a unit of the Joliet Chapter, is responsible for the organization in the EOP area. Before her activities at EOP, Mrs. Hoffman was active in the Red Cross and has been chairman of the Eldorado Chapter in California and at another time had charge of the roll call. In addition to her duties as chairman of the Elwood-Kankakee unit, Mrs. Hoffman has taught the Standard First Aid course and the Advanced First Aid course to the Red Cross workers and plans to give the courses again in September.

Other officers of the Elwood-Kankakee unit are: **Mrs. T. M. Burns**, secretary and treasurer, **Mrs. C. P. Bohannon**, production chairman; **Mrs. C. E. Campbell**, assistant production chairman; **Mrs. John J. Cole**, recorder for production workers and **Mrs. E. A. Evans**, chairman of surgical dressings.

The production workers who make surgical dressings wear white long-sleeved uniforms with white head-dresses with blue veils. These uniforms are required to insure sanitation for the sponges they are making. The production workers who have contributed their services to the Red Cross are: **Mrs. D. P. Tunstall, Mrs. W. D. Whaley, Mrs. C. Gates, Mrs. R. J. Bernard, Mrs. C. R. Crandell, Mrs. G. A. Grant, Mrs. F. M. Fischer, Mrs. J. J. Fitzpatrick, Mrs. R. T. Read, Mrs. J. E. Ryan, Mrs. J. A. Lower, Mrs. H. D. Dougherty, Mrs. H. L. Schultz, Mrs. M. H. Smith, Mrs. H. S. Bonnan, Mrs. C. J. Kohler, Mrs. S. N. Vanderhoff, Mrs. P. D. Cooper, Mrs. J. R. Taylor, Mrs. W. H. Hobbes, Mrs. W. B. Bowman, Mrs. A. C. Johnston, Mrs. P. L. Deylitz, Mrs. T. M. Burns, Mrs. J. J. Cole, Mrs. C. C. Sayre, Mrs. J. W. Stark, Mrs. M. C. Davis, Mrs. E. G. McAloon, Mrs. A. G. Resch, Mrs. C. W. Wade, Mrs. J. I. Bach, Mrs. J. H. Walker, Mrs. H. L. Kalbach, Mrs. C. E. Campbell, Mrs. C. Bachler, Mrs. R. V. Massey, Mrs. W. R. Huey, Mrs. J. Sinclair, Mrs. E. P. Dunham, Mrs. J. W. Kolletty and Mrs. V. Tullsen.**

In addition to the weekly meetings many of the women sew and knit at home and some have taken the nutrition course and the nurses' aid course since the organization of the meetings last winter. Mrs. Hoffman, who leaves no stone unturned, is taking a motor mechanics course.

Among other activities planned for this fall, a home nursing course will be given and a bridge party is planned to duplicate the success of the last one which made it possible to contribute 82 dollars to the Red Cross war fund.

Although these women are working for far more than personal recognition, many have earned their production pins since the meetings at EOP were started. They have also represented the Elwood-Kankakee Red Cross unit in parades in Wilmington and Joliet.

PRODUCTION LINE for surgical dressings is maintained by this group from the EOP-KOW Red Cross Unit. Shown left to right are: Sitting; Mrs. M. C. Davis, Mrs. J. I. Bach, Mrs. P. L. Deylitz, Mrs. J. W. Stark, Mrs. T. M. Burns, Mrs. E. G. McAloon; standing; Mrs. Claude Sayre, Mrs. H. L. Schultz, Mrs. A. G. Resch, Mrs. C. P. Bohannon, Mrs. G. A. Grant and Mrs. E. A. Evans

TRACTION SPLINT for a fractured arm is placed on Mrs. A. C. Johnston at a first-aid training session of the EOP-KOW Red Cross Unit. Shown standing, left to right, are Mrs. John H. Walker, Mrs. C. W. Wade, Mrs. Don M. Hoffman and Mrs. John J. Cole.

Group 3-A

F. G. TAMBLYN
Correspondent

The bright red glow seen in Bldg. 12 last week was not the fault of the lighting system, but just the result of **Lloyd Zenor's** boat trip last Sunday.

Who was that exponent of femininity that **Robert W. Griffin**, was seen with at the Mill last week?

We are all wondering what happened to **Robert McEvoy** last Friday. He won't even tell his bosom friend, **Roland Oertel.**

Roger Johnson, the former chef, can sure make one's mouth water when he tells how to fry a nice juicy steak.

Lew Headstrom, corporal of the guards in Group 3-A, left last week for Texas to visit his son who was commissioned in the Army Air Corps.

Ray Carhahan, Bldg 7-A, was married recently. Good luck, Ray.

Congratulations to **Clifford Miller** and also to Mrs. Miller. It was a big baby boy.

Donald Breen of Bldg. 4 has a dandy shiner. It all happened when a door knob hit him. Don almost broke his toe when he kicked back in self defense.

Harry Marvin Knarr and **Harold Kapach** have been seen together a good deal of late.

Frank Waters left for the army last week.

Gene Johnson, our sub-foreman in Bldg. 3, left last week to offer his services to Uncle Sam. Good Luck Gene.

Dean Harrison is now on his vacation. He is building a boat so he can go fishing on his vacation next year.

Production Planning

LORETTA RYAN
Correspondent

Vacation season has officially begun for **Mary O'Connor** and **Mary McGovern. Bud Wright** expects to take his leave soon.

Apologies are offered to **W. B. Dronsfield**, Traffic Audit Department, for abusing his initials.

Wallace Benson, better known as "Speed," has moved to his new offices where he will have a lovely view of the surrounding scenery.

James Wilson will be more than glad to receive any used desk or chair you may be able to contribute for it is his only wish to be able to unfold his manly form, to aid in the planning and production of EOP.

Norman Oakley has been transferred to **C. R. Reilly's** division.

The progress clerks at Group 1 are having difficulty in keeping their four-legged friends from making out production reports. Perhaps they have too much competition.

Ray Nelson and **William Stanley**, Group 2, progress clerks, returned from their vacations August 3. **Delmar Flesner** left August 10 for a short leave.

Field Engineers

C. O. FINNEGAN
Correspondent

Imagine:

Murray Jordan combing his hair.

J. V. McCarthy without a chew of tobacco.

Myron Benham buying the field party a dinner.

Willy "Jitter Bug" DuPerrieu, if you can.

Frank Misischia believing everything he tells.

Chuck Vedder doing anything right handed.

C. C. Irving being "easy" on the boys.

Chuck Wilkerson or **Marion Ring** catching a fish.

Dick Cole talking above a whisper.

Bud "Boots" Davey losing five pounds.

E. A. Evans excited.

Joe Panish running 100 yards in 9 seconds flat.

J. J. "Wait a Minute" Casey not saying a word.

George Mowitt without a good story to tell.

Dick "I Got Spurs" Shambo with long hair.

Bud "Horse Fly" Foran being kind to same.

Ed Zlomie finding all his keys.

Jack Horenberger and **Gordon Enger** playing checkers.

O. A. "Victory Drive" Evans in a bad humor.

E. B. "I Can Prove It" Colby arrested for speeding.

Dave "What Makes the Wheels Go Round" Chambers and **Al Schutten** in agreement.

Following is a list of former employees of Field Engineering who are now with the armed forces:

With the U. S. Army: **Edgar E. Webster, Earl J. Hutchison, James J. Jobst, Raymond C. Enger, Norman Humphrey, Francis J. Kelly, Paul H. Craddock, Norman H. Curtis, Lindo Corso, Robert P. Walsh, Harold E. Sandusky, Douglas C. Etling** and **Donald F. Murphy.**

With the U. S. Navy: **Paul T. Brozman, Lute Gorham, H. E. McCullouch** and **Paul C. Stadler.**

FIREPOWER Editor Charles Berry and Photographer Fred Toy spent three days last week at EOP. This is the last picture in which they participated and they posed by special request. On the ladder are Marie Evans (bottom), Gertrude Freeman (middle) and Leona Krakar, Group 6 representatives in the "Bomb-Shell Revue."

Pride In Work Taken By Crew In Pipe Shop

Steamfitters Use Building As Base of EOP Operations

The 141 Pied Pipers of EOP contribute much to the war program that is taken for granted. Although the pipe is an unromantic looking object, it serves the manifold purpose of bringing heat to the EOP workers in the winter and a cold drink of water in the summer besides conducting the pressure that is needed to operate many of the machines in the groups.

Walter M. Dale, supervisor of the Pipe Shop in Group 70, says that he has a grand bunch of fellows working for him and private investigation shows that the same bunch of fellows are equally enthusiastic about Mr. Dale. **Joseph Prisk** has charge of the plumbing and he and Mr. Dale work hand in hand to make all pipe dreams come true.

The pipes used at EOP range in size from ⅛ of an inch to 12 inches in diameter. Three machines are used to make the pipe meet the various size specifications. All the men operate the small machines, but **John Leahy** has charge of the big machine which resembles a cannon and requires specialized skill for its operation. The return bend coil is not a new type of dance but a tricky, many coiled pipe that is fabricated in the shop and then taken to its destination in the area.

The shop serves as the home base for the steamfitters. Men are stationed in all the groups to keep an eagle eye on all the pipes and to do the necessary repairs. There is a floating crew of 72 men to aid the men in the groups. When there is a new job or repairs to be done, specifications are taken and the pipe is fabricated in the shop to avoid any clutter in the groups.

Acetylene and electric welding are employed. **Clarence Regine** is the star of acetylene welding and the perfection of his work has the respect and admiration of all his fellow-workers. **Henry Stuky** and **Marian Faulkner** rival Regine's work with electric welding. Another star of the Pipe Shop is **Art Longtin,** who is famous for his ability to keep his head in any major or minor crisis that presents itself.

Mr. Dale was the third steamfitter to be employed at EOP in the fall of 1940. He has been a steamfitter since 1922 and when he talks about his craft it is self-evident why he is head of the Pipe Shop today. He has worked on many big jobs including the power house in Des Moines, Iowa, Illinois-Iowa Light and Power Company, Libby-Owens Glass and Stone and Webster.

"Although all the men are experienced steamfitters," Mr. Dale said, "we still learn something new about our jobs every day. Five years of apprenticeship and an examination are required to become a steamfitter and then a swift pace is set to keep modern because of new methods and new equipment." But Mr. Dale and his crew don't seem to have any trouble supplying EOP with the world's best looking pipes with exclusion of Lily Pons.

Group 2

EDWARD KEENAN

WILBUR GALBRAITH

Correspondents

It certainly was a real pleasure to have one of our former boys visit us recently, his name, **Pvt. Peter Dillon,** Army Air Corps, Fort Leavenworth, Kans. **"Pete"** had nothing but praise for the manner in which the Army handles the men, especially their efforts to make every one feel at home.

Congratulations and best wishes are extended to **Robert Murphy** and his bride who have returned to Lockport from a most enjoyable honeymoon.

Dorothy Gunnison has returned to her nursing duties at Group 2. Dorothy had been doing yeoman service at the Hospital.

Sympathy is extended to **William C. Bell** whose wife died July 27 in Joliet.

Scouts report that **Bob McGuire** isn't making his usual visits to the St. Joseph Nurses Home. He's working days and you know what time nurses have to be in.

Gene Hunt and **Chuck Pierce** said they had their hands full last Sunday evening. It seems some of the fellows had difficulty in keeping their eyes open which is perfectly natural when you consider they had been on days for quite awhile.

John Johnson, esteemed assistant superintendent, isn't wearing so many white shirts lately. It seems white records too easily the facts of life.

Most of the ball players are circulating rave notices about **Kenny Peterbok's** attractive girl friend. They say she's "hep-to-the-tip."

Now that **Leo "Glamor Boy" Bell** is on the night shift he is offering to rent out his little black notebook to the highest bidder. Take it from one who knows there are some nice numbers in that book.

During a recent broadcast over **Nate Johnson's** short wave radio we received the news that **Pete Kelder** will be passing out cigars in the near future. Not long ago Pete took a day off so he and **Evelyn Zimmerman,** of Cary, Ill., could get their marriage license. We heard the fatal step will be taken September 1.

Bill "Romance" Malone is taking ironized yeast, trying to build himself up to propose to his girl friend up in the vicinity of Crystal Lake. The hottest thing on the grape vine is that he has ideas on making it a double wedding September 1. As it stands now he is to stand up for **Pete Kelder,** but we agree with Malone it would be much nicer to have a double wedding.

Did You Know That . . .

"Shorty" Kirkland is a fruit salesman? He can be seen in front of a fruit stand in Wilmington every morning at the same time.

Tom Frew enjoys a little ride through Wilmington at night? **Tom** should take it a little easy with that big ice cream cone.

Paul Riely has a new nickname? Just call him "Texas."

Someone bought **"Boiler Maker" Joe Conners** a razor? Well, anyway he is shaving now. It could be a girl!

Softball Items

For the third time Murphy's Boys defeated the New Lenox A. C. **Otto Koch,** chucking for the Boys, allowed New Lenox but three hits, while the Boys picked off eight to lead with a score of 2 to 0. Hits were made by Schoppe, Keenan, Zobel, McGuire and Peterbok.

The strong Building 3 team, managed by **Foreman Art Jennings,** ran up a score of 7 to 5 against the Married Men of New Lenox. **Gene Hunt,** assistant superintendent of Group 2, pitched against Building 3 and they tamped his ears back for many hits. Ever since that game Gene has been carrying his arm in a sling. The boys are planning to pin back his ears again. As soon as the date is set, we will let all of you know so you can come out and watch the track meet.

Murphy's Boys defeated the fine team from Group 61 7 to 5 at Murphy's Stadium. **Ray Lovenger,** a timekeeper, did a fine job of umpiring.

Ordnance

HELEN McGINNIS

Correspondent

Helen "Winchell" McGinnis is resting her weary bones for a couple of days and **Dorothy "Girl Friday" Olson** found the following notes on her calendar. Here they are with a few descriptive adjectives and additions.

Here's some evidence—evidence of a good time at the War Department picnic several weeks ago.

WELL FED and happy are (left to right) Alex Graham, Villa Eggleston, Leo Porto, Agnes Hatting and Frank Santry.

Chiggers got awful fresh and personal with some of the lads and lassies. As a result, conversation in the Powder Room and Shaving Room (they tell me) has developed into swapping remedies. The best one heard was to soak a piece of cotton in bathtub gin and rub lightly over the afflicted areas. When the chigger comes up for the second drink, slip him a Mickey Finn and crush lightly with extended toe after he has fallen to the floor in a drunken stupor.

Those of you who aren't slaves to the transportation system should stay out here some night and watch the officers play ball. The uniforms aren't the snappiest in the world, but the conversation is. The cry "kill the umpire" is heard frequently, especially when the "umping" is being done by **Stan Eisler** or **Red Bowler.** There's no doubt left in your mind as to their powers of vision when the grandstand voices its opinion.

Have you heard the rumor about the gals getting decked out in uniforms? The returns were vastly in the majority, so one of these days it will probably come about. It is felt that in the long run they will be more economical, and if we can anticipate looking like the EOP escorts, we're *all* for it.

Perhaps this should come under the head of advertisement, but didn't you feel a little better about your job at Elwood Ordnance Plant after seeing "Mrs. Miniver?" And didn't it make the lack of nylon hose and sugar and tires seem a little less important?

Bernie Lyon has been rechristened "Washer Boy." You have to work hard these days to keep out of the stag line.

Do you know you are the proud possessors of an organization which is really out to do you some good? The War Department Employees Service Organization was set up to handle the first formal dance held at this plant and has continued active service at the request of the Commanding Officer. They have their finger in many pies and the pies have tasted a lot better for all of that. They are a bunch of hard working go-getters who are out to liven up anything and everything in the entertainment line. The organization is composed of:

President, **Harold H. Bowler;** Vice-President and Treasurer, **John E. Olson;** Directors: **Josephine Kush, Helen McGinnis, Evelyn Dix, Kay Rosenbaum, Carl Anker, Dave Horwich,** and recorder, **Seymour Kurantman.**

Get behind them and turn in some ideas on special dances or picnics or tournaments. Don't forget—you're the ones who win out in the end—you're the guys who have the fun!

Ordnance Inspection

GERALDINE M. WARD

Correspondent

Friday, August 7, was moving day for the Ordnance Inspection Office and while we were reluctant to leave our quarters in the Recreation Building, we were happy to join the employees located in the Administration Building.

Our Department was well represented at the dance given by EOP on Saturday, August 8. The booths were beautiful and our congratulations are extended to the winners.

Linetta Parry spent the weekend at her home in Champaign, Illinois.

Sympathy is extended to **Joseph Gasperich,** *Government Inspector in Group 27,* whose mother died August 8.

Congratulations to **William H. Peterson** recently appointed to the position of Divisional Inspector, Operations, Division 2, and **John Habes** has been appointed as Government Inspector in Group 4 to fill the vacancy created by the promotion of Mr. Peterson.

Bernice Shroba is the recipient of a beautiful ring on that "Tell-Tale" finger. The lucky man is **Raymond Carey.**

Group 3 has been informed that **Helen "Marlene" Bartik** finally convinced **Robert Steiskal,** inspector, that she is the *one and only.* They were married August 8?

George "Edgar" Tripp, alias "The Mole," Group 3 inspector, is endeavoring to get married or join the Army. Evidently he is of the opinion that he will be happy in either.

Paul Smith is exceedingly fond of tomatoes. There is always one in his daily lunch.

(Turn to Page 6)

BIG NOISES and destruction are in the province of St. Clair Smith, superintendent of high explosives, who gained experience in World War I.

Happy Birthday to You!

This is the inauguration of a regular feature in which the birthday anniversary of as many EOP workers as possible will be listed for 2 weeks in advance. The Bomb-Shell is indebted to Personnel Director George F. Bent, and his staff, for the compilation.

Guards

GENE RYAN
Correspondent

The monthly Sergeants' meeting was held August 4 at the Cafeteria. Guests were **Capt. J. A. Hardy** and **Capt. J. I. Bach.** Capt. Hardy, who is now Security Officer, gave a very interesting talk. As usual, the boys had many matters to discuss, keeping **E. O. Huey**, superintendent of plant protection, and **Chief M. C. Baughman**, who presided, busy ironing out their difficulties.

Reports are circulating that **Guard John Grissom** has an unusual draft rating.

Ralph Sexton comes up with this one: Do you know the favorite cry of a Scotchman's football team? Get that quarter-back!

Sgt. Edwin Selle tells the story of watching a new guard coming to work carrying a new pair of shoes. He took particular notice of this man and at roll call noticed he was not wearing his new shoes. He watched him for several days but he never wore his new shoes. Finally his curiosity aroused him, so he stopped the guard and asked "I saw you coming in here several days ago with a new pair of shoes. Why aren't you wearing them?" The guard quickly replied, "Sir! I'm in a tower, and if I put those new shoes on, I won't be able to turn around in that doggone tower."

Dispatcher Bud Decker has received many compliments on the recent picture of his charming 10-month-old daughter in the Bloomington newspaper. Not only did the picture receive wide attention but also the interesting news item connected with it. The baby was pictured with a little French doll sent to her by her uncle, **Pvt. Foster Decker**, stationed in New Caledonia. The doll came packed in a small box with rice straw used for protection instead of the paper strips or excelsior commonly used in this country. It will be a treasured article in the Decker home as it took considerable time to reach its destination. It was mailed in April and received only recently.

Former **Supervising Sgt. Ray Harper** paid the Guards a surprise visit last week. Ray is now stationed at Camp Grant with the Army MP division, and states he likes it very much. From all indications, that Army life is a great tonic. He looked fit and pert.

Guard George Laine, World War veteran, has been notified to report to his draft headquarters. If George is inducted he will be the first World War veteran to leave the force. That is what you call doing double duty for your country.

Joe Russell, a veteran guard, was called to service August 3. The department extends best wishes to Joe in his new duties.

I had a very interesting item hid away for this issue concerning **Chief Baughman's** former boxing days. It appeared in his hometown paper way back when and someone either took it home to show his family or else is using it under false pretense to bluff people. Anyway, the Chief was quite a boxer some time ago, and fought many top-ranking fighters, but don't take that some time ago too literally or you might get a surprise.

FOURTEEN SERVICE STARS for their former associates now in the armed forces are proudly pointed out by the group at the Material Warehouse. Shown are, left to right, top row, Paul Roy, Louis Piano, Dyer Vaillincourt, Louis Parys, Stephen Felix, Louis Kalina, Sr., Harley Harsha; second row, John Nugent, Edgar Ashley, Karl Neifing, Philip R. Park, Cyril Lazier, Perry Bruno, Clinton H. Jones; bottom row, Oscar Horn, John Bradecich, John Wharrie, John Baldon, Supt. Charles Herbig, Thomas Martin, Kenneth Wehling and John Purcell.

Group 61

JOE MOTTA
Correspondent

Mrs. Megideo Ganz and daughter, **Cora**, attended the funeral of their uncle, **Daniel Bray**, at Kansas City, Mo.

We hear **Carl "Ray" Carlson** is practicing safety to the ultimate degree. He has even gone as far as having wooden heels placed on his shoes. Anyone else who needs to be shod see **Seward "Curly" Brown.**

Charles Auberry, son of **Oiler Jack Auberry**, has enlisted in the Navy.

Charles Bright hitch-hiked to St. Louis to see *that* girl.

Carl LaPaglia and son celebrated their birthdays, then went to Centerville, Ia.

Leo Dordan spent an interesting week-end in Chicago. He claims it was a business trip.

Wonder if **George Roach** will accept the offer, made by the Navy, to teach flying.

With the introduction of softball to Group 61, **Charles "Duke" O'Connor** has found a new way to collect his bills. It seems that he and **Early Ruby** were playing and **John Benson** inadvertantly caught one of "Dukes" wild pitches squarely behind the ear. "Duke" took advantage of the occasion and said, "now dadgumit, John, will you pay me for those car rides?"

Al Weinstock announced that **Marion Carter, Francis Taylor** and **Marvin Freidman** will be Government inspection shift captains.

Manager Harvey "Butterball" Steffes has been searching high and low for chicken wire (for a backstop or for his own chickens?) **James Decker** thinks **"Butterball"** should be called **"Lippy"** after the manager of the Brooklyn "bums."

Clarence "Red" Anderson visited some of the Group 61 boys. He is leaving for parts unknown with the Air Corps.

New recruits to the army of machinists are **Lawrence Baudino** and **Robert "Feller" Hinz.**

It Would Be Nice If . . .

Santa Claus (due to priorities) would bring **Frank Kachelhoffer** a truck. . . . **Fred "Tiny" Kase** would dial the right number before asking for his */?"# softball. . . . everybody were as handsome as **Richard Lowery** . . . we could afford a week end in Peoria —**George Hornick, Jr.**, can. . . . **Frank Buck** knew that **Joe Sarti** also brings them back alive. . . . **Fred Gaussin** didn't get "stiff" playing softball. . . . **G-Man Marvin Friedman** remained awake long enough in the morning so that he wouldn't develop that far away look in his eyes. . . . **William Smith** knew that a winter hat is worn in the winter. . . . "Fox Man" or maybe "Wolf Man" **John Struffe** didn't try to put on an act in restaurants. . . . Weather would permit **Yvon "Farmer" Brais** to harvest his oats. . . . **Kennth Bailey** didn't need two pillows to see over the steering wheel of his new Packard . . . more had their heart in the ball team like **Phil Francois.** . . . **James Morey** didn't get angry when he is called "blondy" . . . why **Irvin "Stony" Shelby** is so quiet—could it be because his brother, **Jess "Shorty" Shelby**, talks enough for both. . . . Golddust twins **Howard Feldman** and **Thomas Henderson** chose another victim besides **Don Baldwin**, the good looking clerk, as a victim for their jokes . . . there was more water in the creek behind Building 5 so that **Elmer Henry** could finish his marathon swim . . . if **Art Swinghammer** gave up smoking—at least near the entrance gate. . . . **Al Amstien** and the power house crew got their coal on time. . . . **Al Pope** didn't slide on his wrist watch. . . . Time Inspector **Frank Johnson** would put in a full week at least once—it used to be Mondays now it is on Wednesday. . . . **Lawrence Holtz** could only hold on to supplies. . . .

KEEP 'EM SHOOTING drives Edward J. Walsh, general superintendent of the EOP loading lines, shown here comparing samples of tools.

YARDS OF GREEN PAPER are issued to EOP employees every Thursday by Paymaster J. F. Dolan, shown here with his secretary, Doris Mooney.

Ordnance Inspection

(Continued from Page 4)

Arthur Kossack has been transferred to Inert Storage. He was replaced by **Jerry Shirtino.**

Ralph Weiss has been added to the office staff.

Roy Scherer is vacationing in his home town, "the Windy City."

Warren Weithofer has recently returned from an enjoyable vacation at his home in Milwaukee. He did some fishing and had the boys bewildered with his "big fish tales."

Bernard Kapsch is now known as a super-salesman. "Bernie" was elected to serve on the ticket committee for the Ordnance Department picnic. He wanted the picnic to be a huge success so he promised the fair sex that if they purchased their tickets from him he would be glad to teach them the "Conga" when they arrived at the picnic grounds. Bernie, therefore, spent a very busy day with his dancing instructions.

Helen Boula has been voted the champion devils food cake baker. She brought everyone a piece of cake and is now kept busy writing out the recipe.

Geraldine Ward and friends from Wisconsin and Joliet motored to Starved Rock recently. They were joined at Ottawa by **Mr. and Mrs. Elwood E. Ayers** and the party proceeded to the park where they enjoyed a picnic luncheon.

Vernice Collette has returned from a vacation with her soldier husband, who is stationed at Aberdeen, Md.

Congratulations are in order for **Ruth Hassig** who changed her name July 24 to **Mrs. Frederick Thomas Smith.** Her husband is a first class petty officer with the Navy, expects to be transferred to Iceland soon.

Bridge Party Planned

A bridge party has been arranged for 2 o'clock Friday afternoon, August 28, in the Recreation Building for women residents of the EOP area and their friends with proceeds going to the USO. **John M. Joyce,** USO general chairman for Joliet, has appointed a committee composed of **Mrs. John J. Cole, Mrs. Paul Deylitz, Mrs. E. A. Evans and Mrs. Allan C. Johnston.** Tickets are 50 cents each.

Timekeeping

NICHOLAS BELLUSO
Correspondent

It was with a slight feeling of uneasiness that, upon entering the Time Office last week, I was immediately summoned before my superior. However, a pleasant surprise was in store when a hasty meeting of the office force was called and a new correspondent was elected. I wish to thank each of you for your "ayes" and I hope that I can do as good a job as **Milton Treitel** *has done. Unwilling to tackle this job alone, I have called upon* **Cele Harte** *for help and together we shall write this column. So, here's shooting the dirt to you, Mert. . . .* **Nicholas Belluso.**

Among those enjoying vacations are **Bernard J. McShane, Dwight Reitz, Bernard Smego, Robert Vollmer, Joseph Fitzgerald, James Hynds, William Spiers, Carl Swanson, George Diment, Lawrence Holz, Clyde Mulligan, Ernest Quale, Royce Quale, Joseph Smajd** and **Maurice Goodspeed.**

Who buys the drinks for **Archie LaBorence** and **Big Jim Murphy** now that **"Hippo" Nelson** is in the army?

The spirit of optimism. Every time **Robert Griffin** comes across a picture of a healthy looking individual he writes his name across it.

Hats off to **Paul Zamkovitz** who is doing a splendid job of timekeeping at the Administration Building since **Ray Shepley** left to clean up an unfinished job. His new assistant is **Margaret C. Fitzhugh.**

For a madcap of mirth, meander out Club 3A way during lunch hour and enjoy a few laughs. Each Tuesday and Friday you can listen to **Frankie Buhl** and his music as he gives out a few hot licks on his sax. *Accidentally,* Frankie is a member of the new EOP band. Rhumba lessons are given free by **"Tippecanoe" Tim Tyler** who has a specialty rating from **Arthur Murray,** who taught dancing in a hurry. The spotlight really falls on **Robert McEvoy** and **James Sperrin** when they reel off their corny jokes. The midget will slay you. By way of reconciliation with supercilious key man **Harry Knarr,** however, all this occurs while they are out to lunch.

Yes, you are in the Time Office although you wouldn't recognize it since a 16-foot addition was added. New floors, new lights and a few other odds and ends have all contributed to making it a new place to work.

Orchids to pretty **Mary Ryan** who became **Mary Keene** recently. However, she gave up her man to Uncle Sam soon after. She is a real patriot. **Carl Parker** and **Harold Johnson** also took that certain step. Harold was 1A though and now he belongs to Uncle Sam.

Well, even the most skeptical are believing now. The girls are definitely in in the Timekeeping Department and are doing a swell job. A radical change was brought about by the men in the office and now more than a few are sporting clean shirts, ties and daily shaves.

Things you didn't know till now. . . . **George Barr** is the Don Juan of the Timekeeping Department. **Kenneth Nelson** really has his "Harte" in his work. **Orville J. Baron** would like to have his picture taken over. **Eddie Reichert** has as good a vocabulary as **John O'Connell,** but John knows what the words mean. **Angeline Gunnerson** hates to be teased. **Ben Sloan** carries a lot of weight around the office. **Tommy Tomaszewski** sings "Carols" all day long. **Frank Zupancic, Jr.,** really plays a sweet accordion. **Bill Prindle** is a beautiful hunk of man. **T. V. Brennan** has a luncheon date with several girls from Personnel every Thursday. **Dale "Stubs" Aman** is the master of all women in the Time Office. **Judy Smith** has taken wings and hasn't been heard from since.

Are you hungry? **Chuck Depeso** had two 16-inch rainbow trout out at Group 66 recently. He and the boys had a big fish fry that day.

The pretty brunette, **Donald Sharp,** escorts to dinner occasionally is **Katie Richardson,** Radio Shop.

Mrs. Bessie East has two sons serving for Uncle Sam. One son, **Bob,** recently won his wings at Ryan Field, Calif. Her other son, **Bill,** is serving with the U. S. Coast Guard and is stationed in Honolulu. She received one of the biggest thrills of her life when Bill recently called her from Honolulu.

'Tis rumored that all is moonlights and roses between **Angeline Gunnerson** and **Robert Renoldi** and also **Frank Zupancic** and **Doris Tatro.**

Bernard McShane writes that New York just isn't what it used to be. What could he mean?

By the way, the timekeepers' next picnic will be August 20. You have all heard of the fun that was had at the last picnic and a lot of you said you heard nothing about a picnic. So here's calling you, boys and girls, be there, August 20, forget all about *Time* and see what real fun you have.

Explosive Mutterings of An Explosive Operator

By Larry McKeon
Group 2

What a dream . . . out with my lovely wife last night, then dream about Indians . . . don't get it . . . seems like I just got to bed. . . . Oh, well, better get going . . . wonder if it's hot out. . . . This coffee is okay, honey . . . my mouth tastes like the inside of a motorman's glove . . . shouldn't have taken that last one. . . . Hate this walk for my ride . . . wish I had a car . . . wonder how those guys do it . . . work a couple of months, then bust out with a new car. . . . Morning . . . yes, it is. . . . Gee! is that all he can say . . . every day the same thing. . . . I know it's hot before I meet him . . . wonder where he works. . . . There's the milkman . . . meet him same place every morning. . . . Blue Ribbon Beer. . . . Tables for ladies. . . . I'm a chump for euchre . . . come on, just one game . . . lost all six of them . . . gonna take the pledge . . . been gonna take it since I was twenty-one. . . . Boy! that's a long time ago; . . . Wonder if I'll have to get in the back seat of the car. . . . If I had a car I'd sure drive it . . . wouldn't be like some of these guys . . . they must be saving for a cloudburst . . . or maybe a trailer camp. . . . Oh! OH! front seat left. . . . Good old 66A crowded as ever. . . . Look out for that train, Ray . . . if we ever get hit, goodbye Murphy's Boys. . . . Well, here's the Group . . . didja forget your badge . . . get in line. . . . Take it easy . . . you got eight hours. . . . What daya mean I can't take the fork in? I aint no cannibal. . . . Change house. . . . Smoke, noise, jiving. . . . What the hell, am I on the sump again? I was just on it last week! . . . somebody's pushin' me around. . . . Hear Joe Blow got transferred to Group One. . . . They can't do that. . . . Look out you might be next . . . see my congressman. . . . Who was the old bat I saw you out with last night Bob? Your wife? . . . Ha, Ha, I was only kiddin'. . . . Yeah, try it. . . . Why don't you buy some . . . there's the machine. . . . Just because he's a subforeman. . . . I wouldn't take it for a gift. . . . Yeah. . . . That's what they all claim. . . . Oh, Oh, look at the eyes on Andy George and Bob . . . McKeon . . . **McKeon** . . . **McKEON** . . . *go upstairs and get some flake TNT.* . . . Quit hollerin; Jersey . . . don't that guy ever smile . . . good morning . . . good morning. . . . Shouldn't have taken that last one . . . gonna take the pledge . . .

High Explosives

MARJORIE HOWERTON
Correspondent

What "animal" is more popular in the High Explosives Department than **Irving Bovee's** and **Al Augustine's** little green *rabbit.* In case you don't follow, that is the name of their pick-up truck.

Anyone wishing roller skating instructions contact this reporter —not bragging—nor complaining.

"Peter" has done it again! Officially known as **St. Clair Smith's** "Ambassador of Anneswood," he was placed best of breed of the fox terriers and fourth in the terrier group at the Minneapolis Kennel Club Show August 2nd. This adds three more ribbons to the already abundant collection on the mantel of the Smith residence.

Joe Umphrey, carpenter foreman in Group 63, gets around more places and does more things than any fellow we know—Smiling Joe is never too busy to make a useful gadget for the office or clock house. From sidewalks to baseball backstop—just ask Joe—he can do it.

Group 63 softball team is off to a good season. Victories were won in the first two played. **Manager Charles Talty** is looking for more games.

Rex Thomas, Lewis Johnson and **Thomas Harrop** are new foremen in Group 63.

Paul E. Hall, young ambitious, hard-working general foreman in Group 63, is very much put out because of a statement made by a certain foreman in Group 65 who said his gang ranked tops over the reservation. Paul very firmly replied, "No, that distinction belongs to Group 63." You can't get ahead of Paul—anyway, not since he's been driving that new Dodge sedan.

Group 63 softball team has been unable to secure a return match with Group 66. They guarantee victory if "Kansas" will leave out his efficient scorekeeper. Group 63 supplies its own umpire which is only fair—even if **Umpire Claude Heap** does turn up smoking good cigars after each game.

Howard Cronen, ordnance inspector—Group 63, will enlist in the Army Air Corps soon. **Victor Skarupa** will replace Howard as assistant to **Group Inspector Homer Peters.**

Bob Matone is a new addition to the field office in Group 63.

Group 66 softball team defeated Group 1's nine 23 to 2. Group 66 collected 25 hits and allowed 12.

"Red" Boomsma and **Chester Tucker** journeyed to Fenimore, Wis., where **Tucker** is spending his well earned vacation. **"Tuck"** left his gang in charge of capable **"No-Jack" Jensen.**

Joe Craterfield, who was on the pitching staff of Group 66 softball team, was inducted into the Army August 3.

George "Possum" Dickenson is the proud father of a bouncing son born August 3.

Herman Coder, manager of **"Big Red" Davidson,** champion wrestler of Group 66, is looking for bouts for his man. Anyone interested may contact Mr. Coder at Group 66.

David Hill, music authority (he's also quite proficient at finding some of the better "spots") returned from a week's vacation looking like he needed a week's vacation.

A more enthusiastic bunch of picnic-givers than the High Explosives Department, you never saw. August 23, another pow-wow will be held at the Indian Maiden's summer home on the banks of the Kankakee. After the terriffic trouncing one Fuze and Booster Lab baseball team took it is suggested that perhaps they better issue a challenge for tiddle-de-winks—or some such he-man sport.

Herb Hafele, chief chemist, was called to Cleveland August 6 because of the death of his brother-in-law, **John O'Harra. Herb's** sister, **Mary O'Hara,** visited here the week of July 19 and attended the High Explosive-Fuze and Booster Laboratory picnic. Sympathy to Mrs. O'Harra is extended by all at the laboratory.

J. V. Wall Honored By EOP Associates

J. V. Wall, superintendent of the Electrical Department, left July 18 to assume a new position in Chicago. The night before, he and Mrs. Wall were entertained by the members of the department at a dinner in the Rose Room of the Louis Joliet Hotel.

The centerpiece was made up of yellow and white daisies and yellow gladioli and a corsage of yellow gladioli was presented to Mrs. Wall. The place cards represented miniature substations and inside the doors was a parody of the song "Smiles." Farewell gifts were presented to both Mr. and Mrs. Wall.

Those present beside the honored guests were **Agnes McCarthy, Kathleen Conway, George Rummel, Al Scheer, Mr. and Mrs. Donald Lewison** and **Mr. and Mrs. Harry Leith.**

Additional evidence of Mr. Wall's popularity was shown by the remembrance gifts presented to him by his many friends throughout the entire EOP organization.

DESERT EXPERIENCES are related by Sgt. William R. Hoffman, son of Lt. Col. Don M. Hoffman, EOP commanding officer, in letters to his parents here. Sergeant Hoffman, shown on the camel at the right, is stationed in Egypt with the American Ambulance Field Service, where this photograph was taken.

EOP Workers Have 60,000 Reasons to Strive for A No-Accident Record

Safety Organization Has Developed a Program Unsurpassed by Any Ordnance Plant in U. S.

By Rollin T. Read,
Safety Supervisor

One of the workers by the name of **Jack Sullivan**, serving on the Safety Committee in his group, was asked to name six of his best reasons why he was interested in Safety. He had thought of many reasons at other times but now none of these came to his mind until suddenly, letting his thoughts turn inward, he said: "My six reasons for wanting a live safety program here is Mrs. Sullivan, myself and the four little Sullivans."

A real cheer went up from the crowd around him and someone said, "Well how about the rest of us?" Then they figured that if there is an average of five in the average wage earner's family, this would mean with approximately 12,000 working here, that 60,000 people here and at home are definitely and intensely interested in the safety of the workers at this plant; or as Jack Sullivan would say, 60,000 of the very best reasons why safety should be "TOPS" with all of us.

The Safety Organization, which has a safety engineer on each shift in the various groups, checks up on the unsafe practices, follows up on injuries and their causes, reminds everyone about poor housekeeping, handling materials and unsafe conduct, the things that cause most of the accidents. The Safety Organization asks the entire staff, right down to the newest worker, to think ahead of his actions and not do things in a way that injures them or someone else —to get the right work habits and follow them.

Seek Lead Continuously

Our plant was one of the first new ordnance plants to start operating, getting "the jump" on most of the other plants during construction. *With that same spirit* of pride which built this wonderful plant, let us unite in a determination to operate the plant for Uncle Sam without accidents or unnecessary delays.

Every trained man and woman working here is needed to turn out the *quality* and *quantity* that our boys at the front need. Every injury, no matter how slight, is a delay. Every finger or toe injured handicaps a worker. Every absent worker is a definite delay. Our products have to go to all corners of the earth. Just one heavy raid by the Air Force requires many train loads of bombs. These bombs must be over there and ready, with every bomb in perfect condition to deliver the blows that will keep our enemies from breaking out of Europe and onto our shores. Every shell and mine is made for a definite purpose. These products must be dependable, safe to handle but sure to "go off" when they strike. This is the task given us by Uncle Sam. We can't let him or the fighting boys down by taking time off or by losing time through unnecessary injuries, or any other cause.

So far as we know from records reaching us, this is one of the safest plants—let's keep it so. This means every worker's shoulder to the wheel. Many departments have not had a lost time accident. What have they got on the ball that other departments haven't? Our guess is that *they just don't want accidents*, in fact they don't want them badly enough to exert all the necessary care and caution to prevent them. They get their working habits set right and follow them. We can all do this, and for the love of our Country, let's do it.

WHAT'S COOKIN'? said Pauline Vismara's expression as she peeked out from the construction switchboard at Richards' Farm to see what the photographer was doing.

Hospital

LUCY HARKNESS
Correspondent

The Hospital has been doing its share in contributing to the armed forces. Both **Bill Bryant** and **Dr. A. V. Stassi** are now in the service. Word was received from Dr. Stassi just recently. He is now a first lieutenant and is stationed at Camp Pickett, Va.

An interesting letter was received recently by **Maurice Bremmer**, ambulance driver, from his son, **Gordon Bremmer**, who is now a sergeant with the Air Force Ferrying Command "somewhere" in Africa. Gordon speaks of peddlers all over the street carrying wares on their heads; women tying their babies on their backs when transporting them, tom-toms which change their tone when you squeeze their sides, the varied costumes of the natives, and their peculiar living habits, and conditions. Gordon seems to be getting his geography lessons in a rather interesting fashion.

Ol' Dan Cupid seems to be doing a powerful lot of concentrating on the hospital staff lately. **Helen Hutchison** was the first victim. On July 24, she was married to **Thomas Robert Edwards**, assistant safety engineer for Stone & Webster. The simple and lovely ceremony was performed at the Elwood Methodist Church, Elwood, and attended by members of their immediate families. After a short wedding trip, the happy couple returned to their home at Elwood and both are now back on their jobs.

Next on the list was **Margaret Stalker**, secretary to **Dr. H. L. Schultz**. On August 6th, she and **Joseph Gergovich** were married at St. Patrick's Catholic Church in Joliet. The bride was lovely in a gold cloth suit, which harmonized beautifully with the uniform of her soldier bridegroom. After a short honeymoon, the couple will return to Joliet, where the bride will reside at her mother's home while the bridegroom returns to his post at Camp Wallace, Tex. Mrs. Gergovich will return to her duties at the EOP hospital soon after her husband's furlough ends.

August 5 was a glorious day for **William E. Liming**, who had been a patient at the hospital for several weeks. Dr. Schultz gave him the glad news that he would be able to go home. So when Mrs. Liming came to visit him that afternoon he surprised her by accompanying her on the return trip to Chenoa, Ill.

A great, big WELCOME BACK to **Nurse Marie Ulrich**, who has been away for several weeks taking care of her father but is now back with us at her regular hospital duties. Sure, and 'tis good to see her scurrying about bringing her own brand of cheer with her and the patients are glad to have one more blonde nurse to add to their little black book list!

Nurses Elizabeth Russell and **Bertha Perush** declare they are going to give **Maurice Bremmer**, ambulance driver, a bigger lunch bucket for Christmas so he can bring them *more* lunch—especially Kosher dill pickles, hot peppers, etc.! The reason for waiting until Christmas, say they, is to gather together enough pennies!

By the way, why only *12* stars in the circle in the masthead and on Page 2, editorial corner, instead of the usual 13? Or do I have some "flag ethics" mixed up?

Mrs. Evelyn Richards and **Miss Elsie Baer**, laboratory and X-ray technicians, respectively, journeyed to Kenosha, Wisconsin, for the week-end where they visited with Mrs. Richards' folks.

The most popular character in this hospital is **Peter Busanelli**, chief "cleaner-upper" in these here parts. Calls of "Oh, Pete!" echo through the hospital constantly, and he is in demand all the time to give a helping hand here and there. He is the handiest man you ever did see — can accomplish most anything you ask of him and is always willing to be of service—with a BIG smile.

The beautiful home of **Nurse Esther Anderson**, 618 Cornelia St., Joliet, Illinois, was the scene of festive goings-on the evening of Friday, August 7. Co-hostesses were **Nurses Marjorie Hartong** and **Ruth Matthews**, and the occasion was a kitchen shower in honor of **Nurse Helen Hutchinson Edwards**, recent bride. Assembling in the living-room at 7:30 p. m., for a bit of gab-festing, the party later progressed to the basement recreation room which was decorated in fitting manner with a miniature bridal party on the mantel, cut flowers on the tables, and wrappings, etc., all carrying out the idea. "Crash" bunco was the main diversion of the evening, with first prize going to **Elsie Baer**, X-ray technician, and **Nurse Louise Thompson** copping the consolation prize. A guest prize was presented to the new Mrs. Edwards. Refreshments were served buffet style from the playroom "bar," and then Mrs. Edwards opened the gifts to the tune of "OH," "UM-M," and a variety of delighted squeals of delight as a complete, matched kitchen-set shook itself free of the gay ribbons and wrappings. And I mean complete! There was everything there but the kitchen sink!

Among those present were: **Mrs. Edwards, Mrs. Dayton Hutchinson**, the bride's mother; **Dorothy Lundin, Genevieve Harper, Beatrice Merrick, Helen Mueller, Mary Amort, Lucille Nahas, Gene Hurley, Elsie Baer, Louis Thompson, Esther Anderson, Ruth Matthews, Marjorie Hartong** and **Lucy Harkness.**

NEW SAFETY BOOKLETS have been issued by Safety Supervisor R. T. Read, who smiles engagingly while he works as shown here.

General Offices

MAE BELLE ANDERSON
Correspondent

"Jerry" Almon, the whisper-voice heard on **C. Harold Taylor's** telephone, is pondering what if Johnny Doughboy found a dozen roses in Ireland and some one mistook **George F. Bent** for **Walter Pidgeon.**

It seems that **Wayne Heap**, Stores Department, no longer signs his name Wayne; from now on his signature is "Wayne and Eva," or **Mr. and Mrs. Wayne Heap.** They are now on that honeymoon up Minnesota way.

Margaret Fitzhugh has joined the ranks in the Administration Building as a timekeeper.

Herbert Rostron, Engineering Department, has returned after enjoying a ten-day vacation. He and his wife visited their son and family and also their daughter in Paoli, Penn.

Why has pretty and popular **Marge Connolly**, Engineering Department, got that far away look in her eyes? Could it be that someone has received his papers and is going to enlist in the Air Corps?

The girls of the Engineering Department held a farewell luncheon for **Olga Darin** at the Sievert Tea Room August 1. Olga has resigned to take full charge of "home duties."

Bob Forst, Engineering Department, is spending his leave at Eagle River, Wis.

Roy Wright has been transferred to Pine Bluff, Ark., to take over the Field Progress Report Department on the Sanderson & Porter project there. **William Simonds** has taken over those duties here.

Pvt. G. R. Shepley, former timekeeper, is now stationed at Camp Roberts, Calif.

Kathryn "Johnny" Johnson, fanfold operator, claims everything was lovely while at The Dells and at Devils Lake.

Extree, Extree!! **Tom Lamon** hopes to have a steak fry at his trailer home near Wilmington August 16 and does want his payroll department friends and their friends and their friends to come.

Understand **Vern Schoenberger's** pipe (that pipe) can't be fired with pencil shavings.

Jacqueline Binzen is quite excited over a western trip she is planning.

John A. Watson, assistant executive secretary, has quite a hobby—other than canning. He just goes out and chops up some big rocks, takes the little ones home to his grinder or polisher and really makes some pretty looking little rocks. He would be delighted to show them to you.

There was a pretty good softball game between the Ordnance Department and a select team of Administration Building employees August 4. The second baseman claims he could have scored more runs had he been wearing his own pants instead of a borrowed pair. If the Administration Building team had been allowed to bring its own umpire (as the Army did) it might have won the game. The third baseman must learn the rules—the first baseman is not glued to the base.

The Purchasing and Expediting Departments had one grand picnic at Rivals' Lodge on the Kankakee River July 25. Late dinner was served on the lodge porch. During the afternoon the gang tried to play baseball and some made a stab at horseshoe pitching and boat riding. **Ben Nell** will be glad to enumerate the various activities. **Ben** suffered a broken finger and a wrenched back from his ordeals. Things all will remember include **Stan Nyren's** baritone solo, **V. L. Knudson's** chic outfit, **Gerry Wilcox's** awful puns, **Bill Beyer's** and **Howard Barclay's** appetites, **Ed Craik's** acrobatics and **E. C. Carlson** almost in the river. **Shirley Grassle** and **Arlene Thorson**, with the help of mom and aunts, really did a swell job. **Maxine Quade** (Veranice's sister) of Spring Valley, Minn., was a guest. She is an A1 baseball player—they know how up that way.

Clarence Malmsten, Purchasing Department, and **Mrs. Malmsten** have just returned from a tour of the West. They visited Yellowstone National Park, Teton Mountains and the Black Hills.

Ed Fitzer, Cost Department, wonders when he is going to have a few moments to spend with his son, **Corp. John Fitzer**, and the latter's wife, **Ethel**, who are visiting around. John is stationed at Camp Roberts, Calif., and his wife is a nurse at the Community Hospital, Paso Robles, Calif.

Colonel: "Why didn't you salute me yesterday?"

Private: "I didn't see you, sir."

Colonel: "Good, I thought you were mad at me."

IN AND OUT schedules for the loading lines are set up and reported by J. C. Schmeh, supervisor of the Production Planning Department.

CONGRATULATIONS are extended to Supt. H. D. Dougherty of Group 3 by Harl Son, safety engineer (right), on that group's 25 per cent reduction in minor accidents for the week ending August 1.

Utilities

HELEN SHIMEK
Correspondent

Surprise signal at the Telephone Department on July 28 was flashed by **Jeanette "Cookie" Dolph**, who reported the news of her engagement to **Roy Heishman** of Joliet.

The Sheet Metal Shop is losing two more of its men to Uncle Sam. **Louis Luberacki**, whose home is in Minneapolis, Minn., was called to the colors last week. **Bob Downey**, shop foreman, who enlisted in the Naval Reserve March 26, was called to report August 21.

Also leaving to fight for Uncle Sam and the things for which he stands are **John Michaels** and **Charles Halper** of the Sewer Department and **Carl Hietschold**, truck driver.

Carl Adams, Richards Farm Garage, wishes to extend his thanks to the mechanics and truck drivers for the flowers they sent during his recent bereavement.

Flash! Flash! The Laundry Queens are no longer!

This poem, written by **Ann Brouillette**, will give you a vague idea of what it is all about.

The girls all wanted uniforms
To give them glamour plus,
But someone slipped up somewhere
Which caused an awful fuss.

The girls looked at those nightgowns
And did their morale sag!
Instead of being Laundry Queens,
They call them Laundry Bags.

Eunice Stroh of Joliet is recuperating in St. Joseph's Hospital, after suffering a heart attack.

Inez Runyon, better known as Pat, isn't here any more. Pat has gone back to her home town in Cedar Rapids, Ia.

Edna Hyatt, Peotone, and **Casemera Reichman**, Joliet, are filling vacancies at the laundry.

Helen "Penny" Pennington, Plainfield, is very interested in the Pipe Shop.

Violet Parks has moved to Kankakee for the duration.

Mr. Brown called Mr. Brown. Mr. Brown wasn't in, so Mr. Brown told Mr. Brown's secretary to have Mr. Brown call Mr. Brown when he came in. Mr. Brown then said, "My name is Mr. Brown, too." Mr. Brown's secretary said, "That's really a coincidence, Mr. Brown." Mr. Brown said, "That's no coincidence, that's a calamity. Anyway, will you have Mr. Brown call?" "Yes, I'll have Mr. Brown call just as soon as possible, Mr. Brown." (This was a person-to-person call, **S. Brown** calling **R. A. Brown.**) Send Brown the bill.

When I asked a member if anything funny happened on the night shift that could be put in *The Bomb-Shell* he said, "Aw, nuthin' funny ever happens on the night shift." For a minute I thought he was going to cry, so I want to take this means of conveying to him my sincere sympathy for mentioning anything that would hurt anyone's feelings that much. Honest —I'm sorry.

It was fun watching **Percy Miller** cutting ice cream with a hacksaw the other day.

Elmo Goorni has returned from his vacation in Wisconsin, with a fine lot of fish stories.

Helen Mondguk seems to be very fond of red.

Hank Schelling, Jr., besides being a very handy man around that second base, adds that certain spark to the team.

Andy Gripaus, known better as Ted Harris, once a singer with a popular orchestra, has changed and is now serenading the laundry girls at the presses.

Jenny Naiders is flashing a bright diamond.

Roy Benson's favorite pastime is hanging from the fitting bins.

Joe Crisp claims he caught a lot of fish while on his vacation.

Women

By
CATHERINE NOONAN

Many thanks to **Mrs. Mary Catherine Fitzgerald** for her letter and sandwich suggestions. Mrs. Fitzgerald writes, "We are 100 per cent for defense in this family." Seven of Mrs. Fitzgerald's children are in defense work here and in Washington, D. C., and a son is with the armed forces in Hawaii. Mrs. Fitzgerald, a cateress, gives you this sandwich recipe for a three-decker which sounds good enough for a party: Mix together until smooth, finely minced chicken, pimento, ripe olives, onion, salt, pepper and mayonnaise; spread on first slice of white bread. Cover with a slice of whole wheat. On this spread pineapple cream cheese and coarsely chopped salted almonds. Cover with a slice of white bread.

Bernice Shroba, mimeograph operator for the Ordnance Inspection Department, not only reads this column but follows some of its suggestions, and guess who's happy about that? Last week she gave us a sample of the bacon and celery sandwich and it was very good, too.

E. G. McAloon, EOP'S master mechanic, who can talk about a lot of things that other people never heard of, makes a guest appearance in the women's column because of his prowess in the kitchen as master baker of angel food cakes. Planning to scoop the culinary world for less talented women, we asked Mr. McAloon for the secret of his success. He admitted, however, that he has no secret and just uses the standard recipe of a dozen eggs "with a little of this and a little of that." Of course, the splendid reputation that the McAloon cakes has enjoyed throughout the area is only hearsay as far as this department is concerned. Do you get it, Mr. McAloon?

Second in our EOP vignette parade is **Martha Craig** of the Production Planning Department. Martha is a native of Elwood . . . went to the Vogue Dress Designing School in Chicago . . . American Beauty roses are her favorite flowers . . . worked for three years at Marshall Field's in Chicago, first as assistant buyer in the Pedigree Shop and later in adjustments . . . is of Scotch-Irish descent . . . likes people and makes friends easily . . . is Junior Past Worthy Matron of the Eastern Star . . . pearl is her favorite jewel . . . lavishes attention on Patsy and Butch, her Boston terriers . . . bow ties are her pet peeve . . . likes to play tennis and bowl . . . once walked off with two blue ribbons at the Aurora Fair for a white cake and cookies . . . designs and sews most of her clothes . . . has blue eyes and brown hair and "you're - the - nicest - person - I've-ever-met smile."

PROMISE of a newsy letter soon was given on a postcard received from Martha Alice Pichon, who gave up her EOP duties to study for a commission with the Women's Army Auxiliary Corps at Fort Des Moines, Iowa.

To date there are nine million munitions workers, and at the end of 1943 there will be some twenty million, perhaps a fifth of them women. It is a woman's task to see that her family gets a balanced diet. Surveys show that a defense worker's diet is a shambles which leads to decreased power on the assembly line.

Recently **Paul V. McNutt**, director of the Office of Defense Health and Welfare and chairman of the War Man-Power Commission, wrote, "Malnutrition—lack of simple, necessary foods is not the only cause of human waste, but it is the most widespread and the most unnecessary. Malnutrition is an insidious saboteur; it slows down the human machine long before it stops it. A mechanic would never let an engine run with half its cylinders missing, but he lets lack of proper food slow his body down to half speed."

Now is the time to enlist in nutrition mobilization. We have all heard what vitamins, calcium, carbohydrates and the like will do for us or what the lack of them will do to us. The United States Nutrition program has a slogan that goes, "Every day, eat this way," meaning that one of the foods listed in the eight basic food groups should be included in the diet every day. The eight basic groups are milk in any form, green or yellow vegetables—some cooked, some raw, oranges or tomatoes—grapefruit or raw cabbage or green salad, potatoes and another vegetable, whole grain cereal, eggs (3 or 4 a week your favorite style), meat or poultry or fish, butter, peanut butter or other similar vitamin rich spreads. Heed this program and you will avoid needless illness and keep the assembly lines at a 100 per cent production level.

Inert Storage

CHARLES MANN

WILLIAM DENVER
Correspondents

Rummage and auction sales couldn't draw a gang out to the woods as did the department picnic . . . they came on horseback, bicycles, and some even walked and were not sorry. The scene of all is at Troy at the intersection of Route 66 and Route 52 in the Forest Preserve and is suggested to other departments as an ideal place for outings. Leading the list of games was baseball. The Balston Buckaroos beat the Mann Maniacs 9 to 2. The outstanding feature of the afternoon was **A. P. Balston's** headlong safe slide to first. With all the sandwiches and good old lager the boys slowly lost interest in the game and hoped the next barrel was cold . . . and it was, **George Newton** will testify. Then over in the grove many aces were tossed out on the rug hoping to win enough to go on that vacation . . . they played till the cards wore out and the candles went out . . . some said vacations were out.

The Inert All-Stars gave the boys from Group 2 quite a surprise. . . . Inert had them beaten by a score of 10 to 3 in four innings before the rains came to rescue Group 2. Group 3 also ran into a stone wall walking off with no runs while Inert bagged 8. **Charles George**, hurling for Inert, allowed Group 3 five hits. . . . **Mose Williams** hit a home run to star for the Inerts. These games put the Inert All Stars on top of the League list . . . won all their games.

At Group 27 a recent investigation showed the tomato crop of **George Shaw** failed because the plants were planted upside down. He may find early potatoes when he digs them up.

The fine artistry on the Inert Storage booth at the Carnival Dance is the work of **Clyde Argyle**, philosopher, artist and sportsman. He was assisted by **Walter Peterson** and **John Wiermann**. These men deserve a lot of credit—they earned it.

Alva Minor had the stork bring a beautiful baby boy to his home.

Mr. and Mrs. John Wald were the guests of **Mr. and Mrs. Leonard Spooner** at Webster Park last week end. It seems John came down for a little fishing and relaxation and on attempting to cast for bass he time and time again got his line tangled in the foliage near the shore. He finally got his plug so tangled in the tree he spent the rest of the day untangling it.

Joe Monore is keeping the boys anxious at Group 27. He does not deny rumors going about that he is going to present an engagement ring soon.

Charles H. Mann, assistant superintendent, came out with a sparkler and the lucky lady is **Margaret Hayden**, Traffic Department. **Tom Dillon**, Ordnance man at South, is positive he saw Charles entering the area with a beautiful black-haired, blue-eyed colleen with a yellow collar on her dress. Mann denies the incident and asked why Dillon wears glasses if he can see that good.

A budding inventor has turned up in the form of South Inert's **William "Tailor" Schoudis**. It seems the "Tailor" has perfected a means of catching a mouse with a 2 by 6, a short stick, some mouse bait, a long piece of cord, and an infinite amount of patience. He has witnesses that it worked—once. A patent has not been applied for yet.

Wally Fang is still wondering if the trees waving back and forth make the wind blow. However he's almost figured out where the nothing in a hole goes when the hole is filled up.

George Harrop came to work a few days ago sporting a new pair of overalls, and now all the boys are wondering if he had to sell more than one of his giant potatoes to pay for them. **George Harrop, Jr.**, is on his way to the Army Air Force.

Jack "Arkie" Bates, the unpredictable Arkansan, is now in the Marines.

Tom Delockery is wishing trouble wouldn't seek him out. Apparently someone very near and dear has been laying down the law, and if Tom passes the 200 pound mark, there's going to be a walkout. Tom is talking about a sparkling gem to smooth things over . . . now that he's got his car and motor boat.

Winfield Arthurs, Calvin A. Kemper, James Whitley, George Newton, and John Wald are back in the saddle again after enjoying some of that good old vacation allotment.

The sick list claimed **Dick Ashworth** (tooth), **C. A. Kemper** (poison ivy), **Don McCauley** (stomach) . . . after the picnic it should have claimed more, but they plugged along.

Earl Parker, watchman, is well equipped with his clock and portable seat.

Inert Storage employees are urged to submit notes for *The Bomb-Shell* at the clock houses . . . use the orange colored boxes.

Those who had lunch at the Mess Hall August 6 heard some good music by the EOP orchestra. The warbler and trombone pusher was **"Bubbles" Wesley** who is in the habit of pushing shells at South Inert. When he gets in the groove the foundations shake and you should see the rugs cut.

CLOSE INSPECTION of component parts and finished ammunition at EOP is supervised by A. J. MacLellan, superintendent of the Inspection Department.

EOP Electrician Recalls Events of Stage Career

Frank Maher Worked Behind the Scenes With Many Stars

If the men in Group 3 look uncommonly handsome while they're working, they owe it to the lighting effects of **Frank Maher**, their electrician.

From 1908 until last year Maher has been lighting plays, operas and juggling amber lights to give some of the stars that "isn't she beautiful" look. When the voices of **Enrico Caruso, Galli Curci, Tito Ruffo, Grace Moore, Charley Marshall** and **Lily Pons** (only part of an imposing list) were thrilling you with their singing, Maher was behind the scenes lighting the show . . . one of the unsung arts of the theatre.

Maher has worked from coast to coast lighting plays, operas, ballets and orchestras. He has worked with all the leading personalities

SPOTLIGHTS at Joliet's Rialto Theatre were used for this action shot of Frank Maher.

from **Mary Garden** at the peak of her career to **Bob Hope** long before he was America's number one funny man.

"Mary Garden was the most marvelous person I ever worked with," Maher recalled. "She had a remarkable memory and even remembered me years afterwards."

Did Camouflage Work

During the last war Maher was in the front lines in France doing camouflage work for 14 months. He was a master engineer, junior grade, in Company A, 40th Engineers, camouflage section. He supervised the hiding of men and armaments in woods and the screening of thousands of miles of roads. Today he is a member of the Chipilly Post 310, American Legion, and the 33rd War Veterans Association.

Five years of Hollywood failed to impress Maher. Even though he worked at all the big name studios and was on the sets of such hits as "The Awful Truth" and "The Buccaneer," he still prefers electrical work in the theatre, which "is the most fascinating game of all." Maher found hectic Hollywood very mild in comparison with the California dew.

In the theatre Maher has worked with **John** and **Ethel Barrymore, Billie Burke, Gladys George, the Lunts, Cornelia Otis Skinner** and recently with **Dennis King** in "Blythe Spirit." "John Barrymore was probably the greatest and smartest of them all. In 'My Dear Children' he often kept the show going until 1:30 a. m., to everybody's delight. The others would be upset by his antics, but Barrymore was the master of every situation."

Maher knows all the thrills and headaches of the business, the road, one-night stands and the curtain going up before the crew has left the stage. On the opening night of the musical comedy, "The Merry-Go-Round," starring **Henry Dixie**, in 1909, Maher, dirty and unshaven, was taking care of a million last minute details. The curtain went up and Dixie made his trick entrance from the flies suspended by an invisible wire. He went to the wings to dispose of a prop umbrella and saw Maher standing there. Dixie pulled him on stage with him, and guess who was the hit of the show. And he's been going strong ever since.

Fire

STUART MOLONEY
Correspondent

Sgt. Johnny Alar, while infanticipating, made a book that it would be a boy. The bets were of various types and shapes of merchandise. Johnny will need a wagon for the haul, as the stork delivered a 9 pound boy August 4.

Richard Jensen, hydrant maintenance inspector, says that with all this bee killing, one can add a chorus to "Old MacDonald Had A Farm," "With a bee hive here and a bee hive there, etc." . . . Jensen, the bee killer, he is now called.

Rumor has it that **Inspector Walter Panian** is also an expectant father.

Where was **Sgt. Walter Bayer** and his three little "cubs," who claim to know the difference between a golf club and a baseball bat though they swing them the same way, July 31? Cousin **Hugh "Bobby Jones" Ardoyno** came back about that time.

Frank Skoff, genial correspondent and clerk of the Fire Inspection Department, left August 6 to "Slap-a-Jap-in-the-Yap."

Inspector Glen Wilfong says, "Gee whiz, Chief, about one-half of the stuff did not come up, wonder if I planted the seed upside down?"

Some are wondering when **Laurence Molck** will be able to get out without his son, while his wife is working on the night shift.

No one can fry chicken like **Ole Olson** does.

Frank Rutkowski, a fireman with at least 20 years' service as a member of Illinois Firemen's Executive Board, has promised to send the publishers of the Red Book a new picture. Some of the boys think Rutkowski is better looking now then he was 20 years ago.

Anyone wishing to sell a nice car with good tires and a one-arm steering wheel, please contact **Frank Scoma.** Frank says the modern conveniences of the city buses and taxies are not as they should be.

Loris D. Hart, fire inspector, is one of the star back-stops on the EOP baseball team. What he catches upon coming home from an overtime game, however, is not on the score board.

Dispatcher Homer Druin has the Indian sign on **Stu Moloney** when it comes to a friendly match for smokes. Moloney can't win—as Homer has nothing to do with Fatimas, being strictly a big cigar and red man partisan.

The boys at Central Fire Station have been giving matrimonial advice to their new clerk, **Wayne Barber.** Up until his second day with the Fire Department, **Wayne** had entertained roseate plans for a honeymoon.

All EOP employees are cordially invited to attend the Firemen's Annual Picnic at Oak Grove, Rockdale, Wednesday, September 2. Tickets may be obtained at the Central Fire Station and a swell time is guaranteed to all who attend.

Is it true that **Rick Watkins** is going to buy a portable radio so he can get the race results while he is filling fire barrels?

It is rumored around No. 3 Fire Station that **Angelo Amorose** is expecting a lieutenant's job in the near future. The boys all think that he will be very successful if given the opportunity.

The Fire Department has another Mascot, a pigeon, which has accepted **Robert Connelly** as its guardian.

Capt. Glen Wilfong of the Honor Farm Brigade is the father of some foot-long cucumbers. The boys are all waiting to see some of his 10-foot, milk-fed watermelons.

Ed Koren is a fast man when it comes to putting on a hoze nozzle. Says Ed "I owe my success to Wheaties and the night air."

Charles T. Davis must teach his V8 to climb out of small ditches, especially before 3 a.m. At this time all good cars should be in the garage (as well as Charlie).

According to **Thomas Billadeau, Sgt. Martin Hanson** can perform miracles with a snuffbox.

Edmund Dickens has a new car. Yes it's a 42.

GROUP 3

WILLIAM BERINGER
Correspondent

In their first game with the highly-touted Murphy's Boys of Group 2, Dougherty's Bombers of Group 3 came home with a 9 to 8 victory July 27.

"Bad Eye" Pekar was in the spotlight, playing a real game at shortstop and also collecting two hits and two runs for Group 3. **Roy Sosnoski** played a bang-up game at first.

"Handsome Bob" Fox and **Rudy "Valentino" Mahalik** are trying to get transferred to Fuze and Booster.

Wonder how long before **Harry "Woodpecker" Babb** again dons the outfit that won him the nickname—white wool muffler, red ear muffs, and the yellow cap with a top-knot?

Tony Gomora, janitor chief, challenges all comers to a ramp cleaning contest. Tony says his boys can shine 'em up so they hurt your eyes.

The prince of tall story tellers is **Leo Wagner.** The rest of the melt operators say they haven't seen a hot day yet, because of Leo "shooting the breeze."

Wonder why **Eddie Copp** has a new nickname? Now it's the "wandering boy."

Norbert "Mac" McLuckie is lending his musical talents to the EOP orchestra. Mac can handle anything from the bagpipe to a bass horn.

If you want to know why men like their boss—stop any time near the preheat room in Building 4, and you'll find **Ed Doyle,** foreman, right in there pitching with his boys. Eddie's idea is "don't tell 'em, show 'em." The spic and span appearance of his machines and the appearance of his floor show that he knows whereof he speaks.

Proud Moments in Group 3

Vernon Worden puts the final touch to a clutch repair job.

George Weber describes his biggest catch on his vacation fishing trip.

Kermit Long explains his "birdie" at Woodruff.

Godfrey Herscher adds another to his endless list of notices.

Harl Son tells **Supt. H. D. Dougherty** about the 25 per cent reduction in accidents.

It may interest fans of **Donald "Tiny Manchuko" Mancini** to hear that he has received a cablegram from the MGM Studios. It is alleged he has been chosen to play the part of King Kong in their newest production. He has had much experience as a bit player in Building No. 16.

If you don't know why there is so much steam in this Group now, it may be because **Clarence Becker** is back in the Boiler House again.

After several victories, the spirit of the softball team was somewhat lowered with the crushing defeat suffered at the hands of Inert Storage. The first loss was by a score of 7 to 1.

Bob Hankes played his first game for Group 3, turning in a fine showing at first base. **Roy Sosnoski** and **"School Boy" Brown** also are to be commended for playing a fine game.

"CLOCK IN at Building 14, chum . . . look for 65956 with the big mop . . . that's me!"

FEATURES of EOP are pointed out by Harrison Smith (right), resident partner for Sanderson & Porter to W. E. Hamilton (left) of New York, another S & P partner, when he visited here recently. They are shown in Mr. Smith's office in the Administration Building.

Inspection

RICHARD LOWERY
Correspondent

Robert C. Wilhelmi, assistant chief inspector, and his family spent two weeks touring the vast area of Illinois. The journey brought them to the homes of many of their close friends throughout the state.

With **Bill Hartman**, senior inspector at Fuze and Booster, living on the reservation, the cities both north and south of EOP will be blessed by his frequent visits.

Sonny Herker, inspector at Group 2, rides a mean steed at the Pilcher Riding Stable. Sonny is one of the best riders in the Joliet area.

Dandelions go to **Sammy Hoffman**, head of Scale Inspection at Group 2, for his contribution of brief items to the last issue of *The Bomb-Shell.*

Elmer Nesius, inspector in charge of Groups 6 and 7, would like to meet "Rosemary." It is true that she is beautiful, but "Rosemary" happens to be the little mascot of the High Explosive Softball team.

S. E. Rothschild, inspector at Group 1, known as "The Baron," is a bridge player of considerable fame, being known in contract bridge circles throughout the state of Ohio for his victories in duplicate games.

Jack Berry, inspector at Group 1, and *The Bomb-Shell* correspondent for that group, is trying hard to have his picture placed on the front page of the tabloid. Jack said that he is just as good looking as **Lt. Gen. Brehon Somervell.** The General Somervell thanked Jack personally in his statement, "The Army is depending on you," according to Jack.

Bob Conroy, scale inspector, is quite proud of **Bob Schmitz**, head inspector at Group 2. **Schmitz** happens to be **Bob's** brother-in-law.

Bill Kirban is quite happy now that **Tony Lutkus** is home again. Kirban, head of scale department, will spend his vacation in Connecticut.

Manager Moe Brennan, inspector at Group 3A, is trying to get a priority card that will enable him to give lumps of sugar to the successful hitters on his team.

Bob Walsh, golf champion and head inspector at Group 3A, is still having trouble with his sprained ankle.

Harold Rouff, head inspector at Group 61, may be seen any night following **A. J. MacLellan**, our chief inspector. Harold isn't the only one that knows Mr. MacLellan has found the best places to eat within twenty miles of the area.

"Shoeless" Paul Jackson, inspector at Group 3A, purchased a pair of brown and white shoes last week.

Bud Brown, office manager, has stopped trying to do two things at once. **Lorrayne Ostrem**, Bud's secretary, is back after a vacation in Chicago, Milwaukee and St. Louis.

Jack Fey, Fuze and Booster groups, will attempt a two-and-one-half off the Nowell Park Pool board in Joliet. Jack had better attempt a straight, plain little dive and pay **Elmer Nesius** two dollars.

The Group 6 picnic held at Oak Grove Park in Rockdale was quite an affair. It will take several days, maybe months, for the inspectors to return to normal.

Jim Tyler gave **Frank Lewis** his book, titled "How to Bet." Frank, head inspector at Group 7, is waiting for the Kentucky Derby to make his debut.

Every time someone mentions the Brooklyn Dodgers, **Ed Konevach** starts singing "What Ever Happened Youses?"

Ed Jilek, inspector at Group 2, has been asked to continue his inventions. As it is Ed has furnished the loading lines with many means to step up production.

EVIDENCE of additional fun at the Ordnance Department picnic is given by this trio in festive mood. They are, left to right, Mary Tyler, Edna Milliveard and Mary Lou Schwartz.

Groups 4-9

Fuze-Booster-Primer and Detonator Lines

JUANITA HARTER
Correspondent

Recently a visitor to Group 8 mispronounced the Superintendent's (**Johnny Walker**) name. He was told to think of Scotch Whiskey to remember the name. The visitor leaving sometime later extended his hand and said, "Glad to have met you, Mr. Haig." He had the brands mixed.

Our good friend, **Robert J. Otte**, who has taken a lot of kidding, is in for congratulations. He is now the proud father of a son born July 27.

Bradley Marine Vet, **Paul H. Miller** of Group 8, gets medal. He has been awarded the Marine Corps expeditionary medal, No. 2672, for his service in 1919 in the Dominican Republic. He served a total of 20 years with the Marines.

The new labor machine in 8-11 has **Bud Picknell** (Shift Inspector) going. As fast as he feeds the machine, the faster he chews his gum.

Eva Love, Group 8 Shipping Room, is absent as a result of a tonsilectomy.

"Positive" Bill Finn, Group 8, Shipping Department, was married to **Vivian Born** at Assumption Parish, 9:00 a. m., Saturday, August 1.

The Group 8 "Walker Sports" had a game scheduled with the Black Powder Crew of Group 8. There was much talk about the game but when it came right down to playing, the "Walker Sports" were the victors by the score of 5 to 3.

Tuesday, August 4, Group 8 "Walker Sports" played Group 9, at Walker's stadium. Group 8 won by a score of 17 to 1.

Zoom! Zoom! Zoom!

Over in Italy there's consternation,
Mussolini's filled with approbation.
It's all because that from our nation,
It's coming in waves, like all tarnation.
Zoom! Zoom! Zoom!
Der Fuhrer, he is losing a lot of sleep,
He's so blamed mad he could lie down and weep.
Still the very Heavens seem to repeat,
"Your doom is sealed and it won't keep."
Zoom! Zoom! Zoom!
The Japanese Generals are losing face,
They know now, they can't win the race.
It's America who now sets the pace,
And keeps 'em rolling into space.
Zoom! Zoom! Zoom!
All us folks here at EOP,
Smile and chuckle in our glee.
We are doing our job for liberty,
We'll make them and roll them,
"By Gee."
Zoom! Zoom! Zoom!

—**Bill Walters**, Group 5.

Group 1

JACK BARRY
Correspondent

Orchids and stuff to **Blair Boyd, Fred Fidler, Ernie Entwistle** and **John Essel.** For nearly eight months these men have been coming to work from La Salle and vacinity, approximately 158 miles for the daily round trip, and none has missed a single day.

And here's one for the book or wherever you want to put it and mark it down for posterity. . . . **George Bevering**, the genial red haired expediter, pays **Harold Friend**, newsboy proprietor of the stand at the corner of Jefferson and Chicago Streets in Joliet, the magnificent sum of 25 cents a week for the use of his chair. George occupies the chair in state while awaiting his car each day and Harry, who is a friend indeed, chases anyone who may be sitting there when George looms up.

Virgil Rigdon has just recovered from an appendectomy which he underwent at a Joliet hospital. Friends in his building took up a collection and sent him a check to help him recoup his former vigor.

And all is quiet on the thirteen front since **"Noisy" Oscar Williams** went away for the week of August 3 to take what is presumed to be a vacation.

And here you have "News Of the Week" as **Fred Allen** used to say. . . . **Emerson Sanders** is in the market for a hog; he pines for it in fact, which makes it a sort of a "porkypine." What he will do with it is a matter of conjecture. . . . **Clarence Horschler**, who was once so shy and bashful that he would not go within a stone's throw of Building 14, spends most of his time there now. . . . **John Valle Rugo**, the "Kokomo Kid," says he is the best jitterburg in the area and will cut a rug with any comer. . . . The ever-popular **George Mobus**, has been transferred to Building 14.

Ralph Ritter made a worthwhile suggestion which met with the hearty approval of the editor. A copy of *The Bomb-Shell* will be mailed to each American Legion or Veterans of Foreign Wars Post in the vicinity, which has a member working at EOP, for their reading rooms. So step up, comrades, and make known to this reporter the name and address of your post.

John Mazur (pronounced measure), who was a bay foreman, is now in the Navy and everyone is quite sure John will measure up. . . . Things are picking up in the fuze bay. Through some set of fortuitous circumstances several beauteous maidens, not the least attractive of whom are **Lucille (Red) Jordan, Florence Larrigan** and **Bertha (Boots) Sleezer**, have been added.

Personnel

LEE R. REYNOLDS
Correspondent

We hope that **Helen Bardi** is having a fine time on her little trip to Indiana and Ohio and we sincerely hope that those little boys in Kahki will not keep her away too long. Also we hear **Pat Carlos** is having a wonderful time on her vacation this week.

From complete and detailed reports of everyone present at **Lynn McCoskey** and **Larry McCann's** party we hear that a good time was had by *all.*

Good luck to **Carmen Steed** on her recent marriage which took place on August 5.

Greetings to **Anne Rick** who is back again in our midst having spent some weeks at the Age Certificate Office in the Administration Bldg.

Everyone missed the smiling face of **Jimmie Barrowman** for a few days and we were sorry to hear that he was ill.

Georgiana Flavan is back again in our midst after being home with an injured ankle. Will you never learn?

"Ike" Ayers, of the Reference Room, is one of the best talespinners we know, especially when he gives out with one of his travel talks. Just the other noon he bounced a great big beautiful doll on his knee while telling of his life in the army.

For real Southern Hospitality there is nothing like spending a lunch hour with **"Colonel" Blaydes** and his family in Wilmington.

Whoever said "There is nothing new in the world," never worked in a Personnel Department. A letter from a former employee was received recently addressed to THE ELMWOOD ORDERLY PLANT.

Dolly Lundquist and **Florence Dunterman** have been *heckled* since moving into another office in the Personnel Bldg. recently.

What Stage has a marriage reached when the couple become puzzle minded.

Fern Craig, well known Personnel Belle, from the Metropolis of Wilmington, believes in the old sayings, "The more the Merrier", and "What the other half doesn't know won't hurt him."

Catherine Smith needs only a hint of her own home town to talk about it. As you have already guessed it is Superior, Wisconsin.

The reason for the citizens of Joliet recently rating a curfew is **Henry (Wolf) Bales.**

We understand that **Jack Hogan** recently celebrated his birthday at the Commissary with his new lunch partner, Guess who?

We welcome **Jack Garnant** into our midst from the High Explosive Department.

FULL LENGTH POSES at work are taken by C. O. Finnegan (right) when he is engaged with Engineering Department drawings too large to handle from a sitting position. Donald Robertson is shown at left.

SMILING head of the EOP women guards is Mrs. Bernadette McNamara, pictured in her office at Richards Farm.

Material Warehouse

FRANK McCORMACK
Correspondent

George Shaw, Group 27, and **Edgar LeClair**, Group 62-1, attended the races the opening day at the Washington Park race track. They bet on Balloon in the first race and Balloon went up in the air at the quarter. They bet on Cabbage in the second race and Cabbage lost his head at the half. They finally bet on So Long in the last race and they waited so long for So Long to finish that when they arrived home all they had left in their pockets was their hands.

Edgar Coffey, Group 62-1, has gone vacationing and plans to spend some time in the old home town of Marion, Ohio.

The men who have left the Material Warehouse for the Armed Forces are **Foster W. Merker, James C. Powers, John E. Nemi-nich, Daniel H. Meyers, Hugh Corrigan, Joseph R. Ferguson, Ralph J. Neilson, Robert E. Jones, David B. Kendrick, Ben H. Miller, George Vercimak, John S. Ralph** and **Frank J. Walsh.**

Carl Adams, able and popular mechanic at the Richards Farm garage, wants to thank his many friends and fellow-workers for the beautiful flowers received at the time of his father's death. Carl's father, **Stephen Adams**, 73 years old, died Thursday, July 23, at Winchester, Ind., from a heart ailment.

Laverne Linstrom's last day of service as a material checker was July 27. From now on he serves with the U. S. Marines. And as the warehouse employees have always presented the fellows leaving our service to join the fighting forces with some token of friendship, Lindy was not forgotten. Here is the speech, word for word, by **Frederick Doubek** presenting Lindy with his remembrances:

"Friends, I am calling you friends because when our President addresses the nation he calls us friends. If we weren't friends we couldn't work together. We are the army behind our Army. Behind each soldier at the front there is a minimum of 25 workers at home. As long as we keep on working the soldiers keep on shooting. The reason for this gathering is to bid farewell to one of the youngest members of our organization who has enlisted with one of the greatest fighting forces, the Marines, and we all want to take this opportunity to wish him good luck and a victorious return to civilian life.

"Laverne Linstrom, always obey the law and respect your superior officers. Will you please come up and accept our good luck offering."

The Warehouse employees wish a speedy recovery to **Mrs. Stephen Felix**, wife of **Stephen Felix**, who was operated on July 27.

Herman Guard went up to Baraboo, Wis., on his vacation. After looking over a few of the rich dairy farms in that locality, he is not quite sure whether he wants to continue as a material checker or become a dairy farmer.

Harvey Ingersoll came back the other day after a week out in the sun all day at the Rock Road Construction Company. He was so well tanned that a little war paint and a feather headdress would have passed him into Gene Autry's rodeo as Big Chief Sitting Bull.

Ray Nicholson, Electric Shop, and **Ray Puffer**, 62-1, want to be matched in a thin man's two-legged race at the next picnic we have, with **John Markley**, the Hub, and **Uncle George Shaw**, Group 27.

Salvage

ANDY VAIL
Correspondent

Supt. H. S. Robb, upon hearing the pleasant voice over the phone of **Dagmar Peterson**, Mailing Department, quoted what Shakespeare long ago called "an excellent thing in woman—a voice that is soft, gentle and low."

Harold Groskreutz is spending his vacation on the old homestead.

Swan Sandahl is on a fishing trip in Minnesota. **Walter Britton** travelled from Joliet to Milwaukee.

Mike Doyle tells us how it started. Historians are now agreed that the Uncle Sam of the cartoonists was originally one **Samuel Wilson** of Troy, N. Y., who during the War of 1812 supplied meat to the troops. The soldiers began calling the meat "Uncle Sam's Beef." The name caught and soon everything belonging to the Government was referred to as Uncle Sam's. It is difficult to determine whether he resembled the cartoons, but the whiskers are known to have been added by the artists to personify the American government.

Joseph Green says he knows he is a pedestrian, because his wife is always out in his car.

Henry O'Reilly believes the best way to drive home an argument is to load her in the back seat.

Scott Soper knows a bargain is not a bargain, whenever he buys an automobile.

Presley Hankins remarked how the world does change. He read in the last issue of *The Bomb-Shell* in **Catherine Noonan's** column advice to the girls how to make liquid stockings, and the same day he read another article in which it said up to the year 1789 in England women were burned at the stake, because the Courts of the land felt that it was hardly chivalrous to swing a lady from the end of a rope and subject her to the indignity of exposing her limbs.

Donald Foutch says no one can accuse this department of not being in the scrap.

ATTENTION—SINGLE MEN

Dormitory rooms for single men are still available at the Wilmington Dormitory-Trailer Housing Project, just a few miles south of this plant.

Rental rates are $4.25 a week for a single room and $3 a week a person for a double room. Services include linens, maid service, hot and cold water, heat, electricity and the necessary room furnishings. Recreational facilities are receiving their due share of attention at the project.

Interested S & P employees are requested to contact their supervisors. War Department employees may call Seymour Kurantman, administrative assistant, Extension 3123.

CHORUS GIRLS, practicing for the "Bomb-Shell Revue", include this bevy of beauties from Group 6. Shown, left to right, are: Marie Evans, Barbara Greenwood, Lorena Wilhemi, Jane Barrowman, June Randolph, Gertrude Freeman, Shirley Hommes and Marian Hommes.

University of Illinois Offers Courses For War Workers Starting in Sept.

Wide Variety of Classes to Be Available; Superintendents and Safety Engineers Have Details

The University of Illinois, Division of University Extension, is planning to put on free courses of study this fall, running from September to Christmas, for all those who desire to train themselves along certain lines for the future. This is an opportunity to study while you are earning. Classes will be held in Joliet, evenings (2 years of high school or equivalent qualifies).

If you are going to be interested in any of the subjects posted below, please so indicate on a note to your superintendent or safety engineer stating in which course you are most interested. If enough men are interested in certain subjects, we will endeavor to have morning classes to take care of rotation of shifts.

The courses follow:

Elements of Electrical Engineering, Electrical Circuits, A.C. and D.C. Machines, Electrical Measuring, Instruments (Theory and Practice).

Fundamentals of Radio No. 1, Fundaments of Radio No. 2, Foundations of Engineering "A," Foundation of Engineering "B," Industrial Accounting "A," Industrial Accounting "B," Industrial Cost Accounting, Cost Standards for Industrial Control.

Office Management, Engineering Mathematics (In Service), Theory and Applied Mechanics, Industrial Strength of Materials, Foundry Sand Control, Elementary Tool Design, Elementary Machine Design.

Ordnance Material Inspection & Handling, Operations Inspection, Ordnance Inspection, Production Engineering, Time & Motion Study.

Pre-Foreman Training for Production Supervision, Supervisory Training, Safety Engineering, Aircraft Production Processes.

Personnel Management, Industrial Relations, Labor Relations, Internal Combustion Engines, Industrial Fuel Combustion.

Heat Treatment of Alloy Steels, Heat Treatment of Plain Carbon Steels, Metallurgy of Iron and Steel, Engineering Drafting, No. 1; Engineering Drafting, No. 4; Engineering Chemistry, Inorganic; Engineering Chemistry, Organic; Engineering Chemistry, Analytical; Chemistry of Powder and Explosives.

Sanitary Engineering for Emergencies, Aerial Bombardment Protection, Plane Surveying, No. 1; Map Drafting, Theory and Practice of Reinforced Concrete Design, Stress Analysis (Elementary), Indeterminate Structures, Structural Steel Design (Theory & Practice), Principles of Highway Engineering.

Haake Pitches No-Hit, No-Run Game Here

The softball league, made up of teams from the loading lines and the igloo groups, has been reorganized and enlarged to a nine-team league that is going along fine. **Lou Haake**, Group 70, set Group 3A down 6 to 0 with a no-hit, no-run game.

Group 61, a new entry in the league, handed Group 70 a 4 to 1 lacing at Group 70's diamond. Group 63, another newcomer, is blasting along at a fast pace.

The teams' standings are:

	Won	Lost
Group 62	3	1
Group 63	2	0
Group 66	3	1
Group 70	2	2
Group 2	2	1
Group 3	2	1
Group 3A	1	2
Group 61	1	3
Group 1	0	3

Do You Belong?

For July, 1942

"NO LOST TIME ACCIDENT CLUB"

Group 2
Group 3-A*
Group 7
Group 8
Plant Protection Dept.
High Explosives Dept.
Inert Storage Dept.
Sewer Dept.
Water Dept.
Inspection Dept.
Group 60
Group 61

*Athletic injury not chargeable to operations.

The foregoing groups had no "lost time" accidents during the month of July, 1942.

More Power to You

FUN

You Can't Beat It!

By "TINY" CAHOON

Guess we all had plenty of fun at the Summer Carnival Dance. Well that's the way it was planned by the committee, so if you liked the affair tell the committee members: **H. H. Red Bowler**, general chairman; **Carl Anker, H. E. Hafele, Marion Hyland, Annamarie Kinney, Karl Ulrich, Rube Medin, E. V. Sperling, R. C. Wilhelmi, John Olsen, Helen McGinnis** and **Mildred Delaney Rub.**

The baseball team went into reverse lately but it's nothing to get worried about and you can rest assured **Frank Wehrli** will have them in there fighting when the boys meet the Camp Grant Warriors in Morris September 15.

The tennis situation was run off one issue ahead of time so if you didn't read this column last issue get it out and take a gander.

EOP's softball team still rolls along and, believe me, the loyal fellows who are giving everything they have, deserve your wholehearted support any time you can cheer them on. They had *Rival* troubles.

The "Bomb-Shell Revue" is picking up momentum every day and the announcement of the date will be made very soon. I like the spirit of co-operation the various girl dance groups are showing and so does **Earl Carpenter.**

The bowling alleys are completed and will be opened for employees' use shortly. Can hardly keep **Rennie Ryan** off them. Why does a little girl pick out a cannon ball to play with? She doesn't do bad at archery though so youse guys better watch out.

Now, I want to thank you, every one of you fine people, who have been so kind to me and so cooperative with the EOP recreation program. Any compliment or glory it has received is directly responsible to your efforts. It's been a revelation to meet and know so many of you and if my Uncle Sam had not issued the call I would have been content to remain here as long as I had another laugh or smile left, but this war is serious business and we all must lay down our civilian activities when called to protect those activities.

I will follow your doings through *The Bomb-Shell* and your joys and sorrows will be mine wherever I may be, so I'll be seeing you. Remember, have *Fun—you can't beat it.*

Proposed Nursery as Service to Mothers in War Work to Be Discussed

USO Director Will Hold Conferences at Recreation Building August 19 and 20

Do you have children at home about whom you worry while you are at work? Do you know women in your community who are able to do war work, but have not been able to find a place to leave their children or to obtain "help" to look after their children while they are away from home? Would you be interested in having an organized, well planned nursery where your children could be cared for and given capable attention while you are organizations as the WPA, Civilian working at the plant?

Throughout our country such Defense, State Child Welfare Departments, USO, and other organizations are working out plans for just such nurseries where working mothers can leave their children in good care, while they are working on the production lines.

Mrs. Anne W. Lindsay, Joliet USO director, is interested in determining whether there are mothers at EOP who would like this service.

If you want to know more about it, Mrs. Lindsay will be here Wednesday, August 19, and Thursday, August 20, between 2 o'clock and 4:30 o'clock.

You are invited to the Recreation Building on those days to discuss your needs and learn about possible services.

EOP Golfers Defeat Ottawa Country Club

The EOP golf team turned in its share of honors when it defeated a crack Ottawa Country Club team at Ottawa July 26.

R. Stevens had low gross for the Plant team.

Bob Walsh, one of the star golfers of EOP, was unable to play due to an injured knee. The team is scheduled to meet the golfers of Fort Sheridan August 30.

These scores were turned in:

Name	Score	Points
Elwood		
A. Vicini	82	0
O. McCarthy	83	0
H. Vicini	89	2
R. H. Watt	84	3
R. Whipple	79	2
D. Nemanich	84	2
Red Bowler	89	2
R. Stevens	77	3
E. Swanson	84	3
T. Kowalski	88	1
Ottawa		
Caruso	74	3
Pierson	78	3
Claus	94	0
Moore	84	0
Hilliard	84	0
Kenyon	87	1
Rogers	85	2
Scannell	91	0
Silagy	89	0
Comstock	88	1

EOP Baseball Nine Hits Losing Streak

The EOP baseball team has hit a streak of bad luck, losing the last three games played. They bowed 4 to 0 to Manhattan, 12 to 9 to the strong Chanute Field Plainsmen and to the Kankakee State Hospital team, 9 to 0. These teams will play return games. **Manager Frank Wehrli** promises a little different story when they meet again.

Girl Sports Writer Has Hectic Moments

The EOP softball (*no, I'm sorry Mr. Cahoon isn't here*) went on its way (*Group 61? yes, you have booth 6 for the dance*) winning each game in (*Mr. Bailey's number is 4206*) which it (*Mr. Sperling is down stairs, I'll try and find him*) participated. Thursday night (*yes, madam, ladies' tickets for the dance are 55 cents*) the Fort Sheridan B. & C. School met their (*no, the bowling alleys aren't ready for actual playing as yet*) Waterloo at the hands of (*Oh, yes, this is the place to sign up for the boxing team*) the stalwart EOP All-Stars (*But, Mr. Bowler, we are working on the decorations for the Gym*). The Fort team was on a short end (*all right, Stuart Moloney, you may leave those drums in this office*) of a 14 to 1 score (*I'm sorry, Catherine Gorey, there won't be any tap dance rehearsals tonight*). But the boys of the Army Camp have (*you did hear right, Mr. Huey, he is now Captain Cahoon*) invited the EOP lads back to the Fort. (*Pinnafore meetings are held every Thursday evening, you're welcome, Miss Odenthal*). The next game will be played at Beecher (*Red Cross Office? I'd be delighted to join the Auxiliary Medical Corps*), Illinois. The battery for the game will be Washburn and Zaninni (*and if I have this many interruptions another day I will be NUTS*).

EDITOR'S NOTE. — The foregoing was written by Rennie Ryan, Recreation Department, in response to a request for information concerning softball.

REHEARSALS for the "Bomb-Shell Revue," planned for early fall, are increasing in number and frequency under the guidance of Director Earl Carpenter. The Administration Area girls shown here with Mr. Carpenter are, left to right: Dorothy Maxwell, Ruth Bruning, Mary Philbin, Virginia Cashen, June Schiek, Annemarie Kinney, Anna Mae Thompson and, seated, Veranice Quade and Edith Lewis.

ELWOOD ON PARADE

FREQUENT REHEARSALS are held by the budding EOP orchestra under the baton of Director Robert D. Stewart. Shown here are Mr. Stewart, Ed Stonich, guard, guitar; Joe Gutierrez, Group 70, violin; George Zelke, Fire Department, piano; Francis Buehl, timekeeper, alto sax; Geroad Riley, Richards Farm, alto sax; Norwood McLuckie, Group 3, tenor sax; Bob Peterson, Richards Farm, tenor sax; Stuart Moloney, Fire Department, drums; Ted Steger, inspector, trumpet; Joe Chismark, Richards Farm, trumpet; Frank Wesley, Group 62, trombone; Woody Cagwin, trombone, and Ralph Keck, Group 1, bass viol.

A GUN CREW is simulated by this group of workmen at the Pipe Shop in Group 70. They are posed around a pipe threading machine which has the appearance of a cannon when pipe extends from the front. Included, left to right, are Wilson Thomas, William Fisher, Carl Reardanz, Clarence Abbott, Clarence Regnier, W. M. Dale, superintendent; Robert Stack and John Leahy. The Pipe Shop is a busy place, but the workers smilingly complied with the photographer's request for an action shot.

COMPLETELY EQUIPPED with everything which might be needed is the Fire Department's emergency truck. Thomas Brown (left) and Louis Hildebrand are shown handling the oxygen tanks.

MEN FROM MARS might be the appellation of these two welders photographed at work in the Pipe Shop. They are William Fisher (left) and Marion Faulkner using electric welding equipment.

Man Who Picked EOP Site Heads Ordnance Safety

Colonel Miles Last Here August 12 Is in Chicago Office

By Harrison Smith

Col. Francis H. Miles, Jr., recently appointed by Maj. Gen. L. H. Campbell, Jr., Chief of Ordnance, to the position of Director of the Safety Branch of the Ordnance Department, with headquarters in Chicago, is considered one of the most experienced Ordnance officers and explosive experts in the War Department.

Colonel Miles has served in many branches of the Ordnance Department, but none of his activities has been more important than those while he was assigned to the Ammunition Division by the Chief of Ordnance. In July, 1940, after being relieved as Commandant of the Army Industrial College, he assumed the position of Chief of the Ammunition Division and the responsibility of nominating contractor-operators for ammunition loading plants to be built on sites selected by him in many sections of the entire United States. Colonel Miles was responsible for and approved major design features for all new ammunition loading plants, and, in the interest of safety of both personnel and facilities, gave particular attention to the acquisition of plant sites of adequate acreage to allow spacing of explosive areas.

In September, 1940, Colonel Miles, with a number of his associates and members of the staff of Sanderson & Porter, visited the extensive farming area, later to become the site of Elwood Ordnance Plant, and with remarkable acumen, he pointed out locations which he thought most appropriate for the various operating and storage facilities. Colonel Miles' conception of what the general plant layout should be was remarkable, and very little deviation

(Please Turn to Page 11)

Durrenberger Is First Called for Troop Duty

Lt. William J. Durrenberger, chief of Stores and Transportation for the Ordnance Department at EOP, has received orders to report for troop duty August 30, it was announced by Lt. Col. Don M. Hoffman, commanding officer.

Other officers of troop age now assigned to EOP are expected to receive orders to report for troop duty within the near future as the result of War Department policies announced in Washington.

Lieutenant Durrenberger, stationed here since November 25, 1940, is a popular member of the EOP staff and has made many friends here and in Joliet. Born in Wadena, Minn., March 15, 1917, he was graduated from the University of Minnesota in business administration and mechanical engineering. Unmarried, his present home is Perham, Minn.

After completing a course in loading plant operation at the Picatinny Arsenal in 1940, Lieutenant Durrenberger came to EOP. He was promoted to first lieutenant May 9, 1942, and July 1 of this year was transferred from the Reserves to the Regular Army.

"... troops can not succeed without your support..."

COLONEL F. H. MILES, JR.
Director of Safety, Ordnance Department

SAFETY AND SECURITY at the Elwood Ordnance Plant cannot be acquired except through the co-operative effort of all concerned. All employes, the management, Sanderson & Porter, and the Government as represented by the Commanding Officer and his Staff, must all work together for the common end of production through safety.

Acting for the Chief of Ordnance, **Maj. Gen. L. H. Campbell, Jr.**, the Explosives Safety Branch of his office hopes to help in making your plant a better, safer place in which to work, but the efforts of this branch will avail nothing without the co-operation of all of you at Elwood.

Be proud of your membership in the "Great Ordnance Production Family" and remember—"Our Troops cannot succeed without your unfailing support."

SAFETY is only another way of saying PRODUCTION.

—Col. F. H. Miles, Jr.

Riding Club Is Planned at EOP

Hear ye! Hear ye! All you cavalry men and equestriennes, take note. The Recreation Department has plans under way for a Riding Club. The club will ride at the Woodruff Stables in Joliet either on Sundays or evenings during the week. Those interested call Recreation Building, 4109.

Steps Up Hits Each Time at Bat

Frank Sharkey, catcher on the Group 1 softball team, gets the mythical EOP silver cup of the week. In a game with Group 66, Frankie did the almost unbelievable. The first time at bat he hit a single; the second time a double, the third time a triple and the fourth time a *home run*. The fifth time at bat Frankie took a base on balls.

Caution in Note Making Is Urged

Employees are asked by the Safety Department to use care in making notes. The workers are cautioned not to make notes which (1) could be carried out of the plant by mistake, (2) which could be lost or fall into wrong hands, (3) where making or possessing them might give wrong ideas to other employees.

Vacation Trips on Tire Board Rubber Banned

War Workers Told of Stiff Penalties as Public Watches

War workers who have received new or recapped automobile tires from rationing boards and use those tires for vacation travel are subject to a $300 fine, a year in prison or both, according to **Frank M. Bray**, Joliet, chairman of the Will County War Price and Rationing Board.

The penalties are provided in Section 35 (A) of the United States Criminal Code which makes it a criminal offense to make a false statement or representation to any department or agency of the United States as to any matter within the jurisdiction of those departments and agencies, it was explained by **Mrs. Mildred Rose**, clerk of the board.

Mrs. Rose said that when war workers apply for tires they are required to say "I will drive my car exclusively for transportation to and from work and to carry passengers." It was pointed out that this statement precludes taking any trips.

"We are receiving complaints from the public," said Mr. Bray, "that employees of munition plants, who have received recapped or new tires on their affidavit that they are to be used exclusively for necessary travel to and from work, are using these tires for long vacation trips. As the board has no police powers, our only recourse will be to file complaints in such cases and deny further service to those who so use their tires.

"While the complaints so far received have been general in character, the board has received promises of reports of specific cases with names and license numbers and will have to take the action outlined. Those not eligible for tires or recaps are keeping close watch on those who do and we are continually receiving complaints of over-speeding, reckless driving and abuse of tires."

Mr. Bray and Mrs. Rose expressed appreciation to the EOP Tire Committee for the co-operation given them and were joined in this attitude by **R. F. Knott**, Ottawa, chairman of LaSalle County Board No. 50-1, and **Ben R. Hall**, Streator, chairman of LaSalle County Board No. 50-2.

Articles in *The Bomb-Shell* describing the effort to save rubber and the activities of the tire rationing boards also were praised as contributions to the war program by the board executives.

Firemen Set Annual Picnic for Sept. 2

Call a halt to all worries and join the fun at the annual EOP Firemen's Picnic at Oak Grove, Rockdale, Wednesday, September 2. The firemen promise that this picnic will be "bigger, greater, grander and more glorious" than any picnic to date. Headliners in entertainment will be games, prizes and dancing.

The picnic will start at 8 o'clock in the morning and last through the evening to accommodate employees on all shifts. The 25 cent admission ticket also includes a chance to win a War Bond.

No Duds from EOP

Importance of the war job being done at EOP was emphasized forcefully and dramatically for those employees and members of their families who read the series of articles beginning August 16 in *The Chicago Sun* by **Benjamin Proulx**, Canadian Naval Reserve officer, who fought through the siege of Hong Kong, was taken prisoner by the Japs and finally escaped to Canada.

Can any one question that loading line workers are soldiers after reading these words of the escaped prisoner, "The Japs had been shelling us from every angle for days, but *30 per cent of the shells had been duds* and they had been using three-inch shells which made a lot of noise but hadn't been able to do more than nick and splinter the concrete walls."

Read these excerpts from Proulx's gripping story and you'll realize why EOP workers are sure shell and bombs they load *will not be duds.*

"I knew that when you try to escape from a Japanese military prison and fail you are not merely captured and put back in prison. You are put to death.

"There are a variety of ways in which the Japanese can put you to death. In the 18 days of the hopeless fighting at Hong Kong I had seen what the short, squat men with the long, dangling arms and blank faces could do to the human body with a bayonet. I knew what they did to women what they did to men who tried to protect these women.

"It was all the same. It was death. But it wasn't a clean death. It was dirty. You died with a stench in your nose or your eyes filled with nightmares or your eardrums taut and bursting with sound. Or when you were captured as a prisoner of war you were lined up and machine gunned in the back.

"That was the way the fighting was at Hong Kong. That was the way the fighting was, too, at the Repulse Bay Hotel and I will tell you about that also—of the 200 women, children and infants who were captured there by the Japanese—of the men who went out to meet what they thought was certain death that these prisoners might live.

"But I think first I should tell what the inside of a Japanese military prison is like. I suppose the best way to tell this is to start with the surrender of our forces to the Japanese at Hong Kong. Then it can be seen exactly how Japanese act toward people they conquer.

"I do not think it makes any difference whether the people they have conquered are British, Canadians, Eurasians or Americans. They do not have a little gauge by which they measure their amount of hatred. It is all the same with them.

"So I think the treatment I received would be the same as that given to an American boy from Illinois or New York or anywhere. And it would not make much difference either if you were a colonel or a private. The Japanese are great levelers."

Bombs and shells loaded at EOP will *not* be duds!

THE BURNING PIT

By Scorchy

The fresh air and good clean living of many of our fellow workers here at the world's greatest ordnance plant have certainly had an expansive effect on the haebus corpi that are seen daily waddling their energetic way from one chore to another. There is too much evidence of good hard work to permit the thought of inactivity, but, nonetheless, as each page is torn off the calendar, there seems to be another circumferential inch added in many places, which, if you permit this editorial indignity, were nothing but paunches to begin with.

It is not your correspondent's province to resolve the metabolic processes involved here, but it is too much of a temptation to stifle a bit of imaginative roving as he passes these two-legged globular beings in his daily stint. The present condition of this mundane sphere induces the mirage of the world itself every time a spheroid, ovoid, or even elliptical torso is seen puffing itself up the stairs.

To carry the vision a bit further, the summer weather forced the shedding of coats and then came the vision of great circles, arcs, parabolas and the like.

Now take the belt lines. Many of them still maintain a pure equatorial path, but my friends, cast an eye on our good friend **George Morrison** down Fuze and Booster way—follow his belt around from tip to buckle, and you will envision a trip through the Antipodes. The buckle seems to stand there as a monument to Sydney, Australia, while that stout piece of leather serenely traces a path through Valparaiso, Chile, and on across lonesome oceans for a stopover at Capetown, South Africa, and finally the home stretch o'er the Indian Ocean, a doff of the hat at Adelaide (a town, if you please) and then back to dear old Sydney.

The **Honorable Gernald R. Kintzel** doesn't go in for those "down-under" affectations; cast an eye on that hawser that prevents a kintzellian explosion and you will find a trace of good old native loyalty directing the belt through such hamlets as El Paso, New Orleans, Savannah, and all good eating places in between.

Another member of our little, but ever growing, coterie is **Claude Sayre**, the master of things concrete. Nothing abstract about his belt line. He probably doesn't realize it, but he gives himself away completely. Look at his belt and what do you find. Right the first time. Claude leads that girdling cable with nostalgic gentleness right back through his old haunts—watch carefully, and there you have it . . . Lima, Peru, and then a bee-line on to La Paz, Bolivia, thence through mountain, jungle and plain to Rio De Janiero . . . just a carefully disguised record of past events.

E. O. Huey of the Plant "Predilection" Department is also a stalwart member of the Clan. He goes in for more native routes and without much effort you can follow that chrome tanned binding of his and see his every thought as it cuts swath from Denver through St. Louis and then with a devotion that only a born Kentuckian can lavish, straight through the good old Blue Grass country with a slight pause at Louisville and then on to the hills with their billies.

It's a great study, folks—by their belt lines you shall know them, and the bigger they get, the more accurately do they portray the paths they have trod. But, of course, it must be the fresh air.

PASSES AND REJECTS

By Vernon C. Bailey

Many changes are evident in *The Bomb-Shell's* reportorial family as the photographs in the departmental column headings are changed. In this issue, the smiling countenance of **Lucy Harkness** is missing from the Hospital column. Lucy did a swell job and the staff wish her good fortune in her new position with the War Department in the Joliet Post Office. Replacing her as Hospital correspondent is winsome **Evelyn Richards**, a laboratory technician, who has artistic as well as journalistic talents.

Other changes include the substitution of **Nicholas Belluso** for **Milton Treitel** as Timekeeping correspondent. The editor's thanks are extended to Milton for his splendid help in getting *The Bomb-Shell* underway. Nicholas shows considerable promise as a reporter and has a style refreshing and invigorating. **Marjorie Howerton** has replaced **Jack Garnant** in the High Explosives column and is doing grand work. Jack was transferred to Personnel Department where **Lee Reynolds** should be able to make good use of his ability.

Frank J. Skoff disappeared from the Fire Department heading following his call to the armed forces. If Frank works as hard with the Army as he did for *The Bomb-Shell* promotions should come rapidly. **Geraldine M. Ward** joined the family as the representative of the Ordnance Inspection Department and is already considered a valuable ally.

The effervescent column of **"Tiny" Cahoon**, under the provocative heading, "Fun," also is missing from this issue, since "Tiny" left to be a captain in the Army.

★

Watch the Shoulders

W. B. "Farmer" Manchester has placed whitewashed stones along the sides of the black top roads in the Administration Area. They add attractiveness to the area's appearance, but they are more important, according to **A. M. Lockwood**, superintendent of utilities, in reminding motorists to guard against driving on the shoulders of these and all other roads. Shoulder-driving not only wears away the roads, but tires as well.

★

Office Is Moved

Well, we're right back where we started. Editorial offices (all one of them) of *The Bomb-Shell* have been moved from the kitchen of the Recreation Department to where the tabloid was launched, in the office until recently occupied by the Recreation Department, just off the dance floor. Visitors are cordially welcomed.

★

Club Is Planned

Fellowship in evidence at the farewell dinner tendered **C. Harold Taylor**, former EOP executive secretary, led to a decision to seek repetition of meetings of department heads at regular intervals. **A. E. Frosch**, superintendent of the Engineering Department, has been charged with working out details and is busy with the task.

★

Faces Red, Maybe?

Capt. David P. Tunstall, EOP public relations officer, received a letter from **Charles Berry**, editor of *Firepower*, thanking him for his missive concerning the official business of Mr. Berry and **Fred Toy**, *Firepower* pix man, on their recent visit here. Charles said copies of the last issue of *The Bomb-Shell* had just been received in Washington and that if it hadn't been for the Captain's letter, he and Fred would have had a hard time convincing the editorial board they really made some ordnance pictures here. (Remember the ladder photo?) Seriously, however, *Firepower* carried an excellent picture of EOP "block busters" in its last issue, and will have more EOP photographs in coming issues. Watch for them.

Thrilling Army War Show Set for Soldier Field in Chicago Sept. 2-12

EOP Employees May Obtain Tickets for Spectacle at Superintendents' Offices; Many Plan to Go

America's answer to the Axis will be vividly portrayed by the Army War Show at Soldier Field, Chicago, September 2, through September 12.

Every branch of Army service will be shown in the huge Battle Depot adjacent to Soldier Field and open from 2 to 10 p. m. daily, while the story of how U. S. soldiers live, work, train and fight, climaxed with a realistic battle action, will be staged each of the 11 nights, rain or shine, in the great amphitheatre starting at 8:30 o'clock. EOP employees may obtain tickets for 55 cents each at their superintendent's office.

More than 30 war planes from the Sixth Service Command will zoom overhead at the start of each performance. Led by **Capt. Samuel Cutler**, these fighting planes will be sent through an intricate routine of maneuvers, and Captain Cutler will communicate with the audiences through his short wave radio. Following will be demonstrations by the infantry, machine gunners, engineers who will erect a pontoon bridge and the signal corps who will install and operate a field telephone system.

The motorized artillery will demonstrate its speed and effectiveness and the 12-ton tanks will pulverize ancient automobiles. Tank-destroyers, with 75 mm. guns, will rumble around the arena and the leaping jeeps will whirl through dizzy space. Medical men will show how they perform under fire and the flame throwers of the chemical warfare service will heat the remote corners of the stands with their devastating streams of fire. Colored cavalrymen from Fort Riley, Kansas, many of whom had never ridden before January 1, will show the results of carefui training by their superb horsemanship.

All of the units of this provisional task force, under the command of **Col. Wilson T. Bals**, will take part in the battle action, and the ground will shake under the rumbling tanks, the roar of the 105 mm. guns, the bark of the Garand rifles and the machine guns.

Maj. Charles S. Hart, War Department representative with the Army War Show, has set the Chicago attendance goal at more than 800,000 persons, which means that around $400,000 should be raised for the Army Emergency Relief Fund. Philadelphia, Baltimore, Pittsburgh, Akron, Detroit, Milwaukee, Des Moines and Omaha have given this spectacle great throngs at almost every performance.

Fire

STUART MOLONEY
Correspondent

James Dillree won the door prize at the recent EOP carnival dance. It is rumored that James was permitted to take the $25 War Bond home—to **Mrs. D.**

"Fresh fish for you 'eels' " is the promise of all the boys going on their vacations. Another pun like that, together with the expected sea food, will make up a dainty dish of fish and "corn" fritters.

For the benefit of the long neglected — the next issue of *The Bomb-Shell* will contain a "who's who" of the lads at Stations 2 and 3.

Indian Chief Grover Alexander and his tribe of medicine men will make their debut during the coming black-out. Music will be furnished by **Drummer Boy Bert Benson** and **Squeeze Box Stanley Murawski** with the Plainfield flash. **Ralph Rausch**, at the mouth organ. **Scoutmaster Len Jessen**, of Troop 1, will give an exhibition of knot tying.

Clarence Horschler has enlisted in the Air Force.

Francis Keeley of Station 3 must have been a drummer in his day, every once in a while tee-dummy-dumming to himself.

The Fire Department has hired a nationally known detective agency to discover just why **Frank Scoma** is being paged as "Sugar Plum," and on the eve of his wedding too.

The breezy note from **Alex Tihay**, now stationed in Miami at the Air Force Officers' Training School, was as welcome as a bubble dance by **Lana Turner.**

Guys in disguise . . . **Wayne Barber** without his chewing gum. **Chief Roy W. Mortenson** without his pencil collection. **Frank Nolan** without **Glen Wilfong. Homer Druin** without his Red Man. **Robert Connelly** without a gas mask. **William Davis** without Group 8. **Len Jessen** without 10 cigars. **Cliff Weiss** without hay fever. **Al DeBolt** without Pontiac. **Tom Billadeau** without four short changes in five days. **Pat Rodgers** without Scotland. **Lou Hildebrand** without Group 3-A. **Andy Elias** without his flower gardens. **Glynn Seale** without a Buick. **Bill Day** without his egg crate. **William Reichert** without his Jinx.

"He says his friends all call him 'Butterfingers'!"

First Letters from Across the Seas Received from ex-EOP Employees

Microfilm Missive, Message from India, Pleas for News from Home Included in Service Men's Mail

Mail from former EOP employees now in the armed forces received in the last two weeks was marked by the first microfilm letter from across the seas, a letter from the Indian Desert and a card saying that the picture of the two-ton "block busters" in the last issue of *The Bomb-Shell* was a hit with the boys in camp at Dowling, Mich.

Reproduced elsewhere on this page, the letter from **John Hudek** aboard the U. S. S. Fulton somewhere in the Pacific was the first of the new microfilm messages received. The service man's letter is photographed on a small film along with other letters and the film is sent to America where it is developed, and photostatic copies are made for delivery to the addressees through regular mail channels.

Pvt. L. C. Hartong, who is on desert maneuvers and whose letter was forwarded from Los Angeles, wrote that he is "now in the India Desert, where it gets 135 degrees and better, although the nights are cooler, around 110 degrees."

From the U. S. Coast Guards Training School at Dowling, Mich., **Edward Golgin** wrote that he was glad to receive *The Bomb-Shell* and reads it "from the first page to last."

COMMISSIONED as an officer, Lt. Edward Mack's former associates at EOP are proud of his rise, according to Edward Copp, foreman Building 4, Group 3. Lieutenant Mack was a timekeeper here before joining the armed forces.

Bomb Pictures Liked

"I would like to see more news in it about the men in Group 2," Mr. Golgin continued. "I am in my third camp since I enlisted. I was at Grand Haven, Mich., and St. Mary Lake, outside of Battle Creek. That was a good picture of those block buster bombs. Many men here had no idea of what a bomb looked like."

Sgt. Clarence V. Emhouser, stationed at Camp Polk, La., enclosed a photograph in his letter which he said was intended for the bulletin board in the Guards House. It will go there, but first it is reproduced elsewhere on this page.

"Civilians will never be able to understand," wrote Sergeant Emhouser, "just how much it means to the soldier to get news from home. While in the employ of Sanderson & Porter, I was Guard No. 94. I have been appointed First Sergeant of Co. C, 56th Engineers Battalion, Armored Division."

Pvt. Robert Walsh, Lowry Field, Denver, Colo., said he had been passing *The Bomb-Shell* around to several other men from Joliet at his camp and urged that the mailing be continued, "as we would be lost without it."

"I am at Lincoln, Neb., taking an airplane mechanics course," said **Pvt. Ivan C. Nelson.** "I like it fine here. I worked in Group 1, Building 10, on the 11:30 to 7:30 shift. My foreman was **Matthew Wycoff.**"

Would Welcome Letters

"During my employment at Elwood," wrote **Pvt. Earl W. Burkhart,** Ft. Knox, Ky., "I worked under **E. G. McAloon** on a dump truck, and so had a hand in construction of all groups. Some of the faces in your pictures are new, others are of old friends with whom I worked. I would enjoy hearing from anyone at all who would care to write."

"I used to work in Group 1," said **Pvt. Joseph J. Kopczick,** Camp Forrest, Tenn., "and here is hoping that you keep the shells rolling because I know that the boys across need them and I hope to be there using them myself pretty soon."

Pvt. Sam Holtzman, Ft. Warren, Wyo., said *The Bomb-Shell* "takes me back closer to home and where I met so many new friends." He added that "this is a good way to say hello to all the boys in Group 3."

"I am still stationed at San Bernardino Air Depot in California," penned Pvt. Louis Fritz. "At present I am camp librarian and I also sell War Bonds to the soldiers. I am connected with the Chemical Unit and find air life very interesting. Keep up the good work of making bombs that are used on the enemies."

Values Paper Highly

"You could never realize," said **Cadet Richard Oldani,** Naval Air Station, Jacksonville, Fla., "what a treat it is to read about all my old friends at EOP and especially my old friends at Group 2. **James J. Murphy** was very swell to me the six months I worked for him and it's swell to hear about him, **Ed Keenan, Georgie Zobel** and all the other swell fellows from Group 2."

"Outside of personal letters there is nothing more appreciated than the news from EOP," wrote **H. Emmett McCullouch,** Naval Training School, Chicago, former secretary to **E. A. Evans.** *The Bomb-Shell* "really is something to look forward to in more ways than one."

"The last issue received," continued Yeoman McCullouch, "sure was filled with plenty of news for me, also, to my surprise, about me. Almost got a lump in my throat when I saw the picture of the Field Engineers. They sure looked good to me. **'Jersey' Klegman** was a sight for sore eyes; with that same look that makes us wonder if he really means it.

"One article which was of interest to me was where employees were urged to write to men in the armed forces. Couldn't you stress that point in almost every issue? Everyone knows some boy that is far away from home . . . help keep up their spirits so they can help put EOP bombs where they belong. If you could see some of the lonely faces waiting for mail, you would write every day to someone."

Hudak Address Changed

Pvt. Wendell E. Sumner, Air Corps Training Detachment, Kansas City, Mo., said he wishes "to thank the people who make it possible for the boys in the service to read about the folks who are keeping things rolling back home. Best of luck and keep those shells and bombs coming."

Pvt. Thomas W. Birkey, Eglin Field, Valpariso, Fla., declared it is "very interesting to read about a lot of fellows I used to work with and it makes me feel as though I am right at home . . . keep 'em loaded."

DOUBLE war responsibilities are borne by this couple. Mrs. Bette Claudin is employed in Group 5, while her husband, Pvt. John M. Claudin, who formerly was in Group 1, Building 6, is stationed at Chanute Field, Rantoul, Ill.

"I like the paper very much," said **Pvt. Harold H. Hudak,** who was formerly stationed in California, but apparently has left the country, as his address is now in care of the Postmaster at New York. "I have noticed in it pictures of fellows with whom I've worked, very interesting."

Is Weapon Instructor

"We have moved from Camp Haan, Calif., to Camp Polk, La.," related **Pvt. LaVerne Voss.** "We had a very nice trip across country and we passed through the entire state of Texas. California was a much better state than this, but I believe the weather here is better. I like Army life very well and I like the outfit I am in. We are a field depot, but we have a lot of work to do and we supply quite a few companies for being so small."

Earl Fredricksen wrote from the Aberdeen Proving Grounds in Maryland that he resigned from Group 7 to enlist for the duration. "I have completed a course here in machine gun and airplane cannon," said Mr. Fredericksen, "followed by a course in public speaking, and I am now teaching these various weapons."

Letters and cards also were received from the following: **Pvt. William E. Wingate,** Washington, D. C.; **John Mazur,** Great Lakes Naval Training Station, Great Lakes, Ill.; **Pvt. Elvin Skinner,** Willow Run, Ypsilanti, Mich.; **Pvt. Hilbert Nelson,** Athens, Ga.; **Pvt. A. E. Gresham,** Logan, Utah; **Pvt. Joseph R. Ferguson,** Downey, Calif.; **Pvt. L. L. Peterson,** Keesler Field, Miss.; **Pvt. Donald L. Phillips,** Camp Beauregard, La.; **Pvt. Albert A. Eilers,** Ft. Knox, Ky.; **Lt. A. W. Price,** Godman Field, Ft. Knox, Ky.; **Sgt. Rudolph R. Weise,** Camp Crowder, Mo.; **Pvt. Frank A. Cholewa,** Camp Shelby Miss.; **Pvt. Robert C. Vignocchi,** Camp Swift, Texas; **Pvt. G. F. Brunacci,** Camp Lee, Va.; **Pvt. Clinton P. Connelly,** Camp Swift, Texas.

PRODUCTION RECORDS are being examined by Harrison Smith, resident partner of Sanderson & Porter, and Seton Porter (left), another S & P partner, whose office is in New York. Mr. Porter, who also is president of National Distillers Products Corporation, visited EOP August 21.

V-MAIL is the name given to the microfilm letters now being received from those in the armed forces across the seas. This letter from John Hudek, aboard the U. S. S. Fulton, is the first of this type received from a former EOP employee.

TOP-KICK or first sergeant is now the rating of Clarence V. Emhouser, formerly Guard 94 at EOP, who sent this photograph from Camp Polk, La., for the bulletin board in the Guards House here.

—Courtesy Chicago Tribune Syndicate.

CONSTRUCTION RECORDS of great value to the Nation's war program were achieved by the various divisions under the supervision of A. M. Lockwood, superintendent of utilities, in getting Building 12 prepared for resumption of complete loading operations in Group 2. Mr. Lockwood assembled the group shown here when he was asked to get those responsible for the feat together. Pictured in the composite photo, left to right, are: First row, Leo Warren, George Shiner, John DePratt, W. M. Dale, Cliff Morris, T. M. Singer, W. M. Ryan, L. Beverly, J. W. Stark, John Gaffney, D. Dwyer, R. Reardon, M. Bitterman, E. Berry, H. Wilder, J. H. Ryan, J. H. Henderson and Mr. Lockwood; second row, R. Walker, E. Dupree, W. Wolford, S. A. Brown, C. J. Taylor, Claude Sayre, I. C. Harbour, V. Kindelberger, George Pancake, Milford Green, Donald Watchorne, John V. Kinsey, E. H. Morphey, J. Redman, J. Johnson, Carl Adams, H. Diekman, C. Rynearson, J. Prisk, F. Gebhardt and George Abel; third row, H. Chayer, M. Glade, Thomas French, C. L. Utley, W. H. White, S. Griffith, C. Fuller, M. Lamphere, L. Wilhelmi, J. A. Cocker, E. Kocielko, Thomas Scott, O. K. Campbell, R. Harder, F. Knop, J. Boggetto, E. J. Egan, Tom Hayes, A. Strasser, H. Hapeman, D. Turner, A. McCarthy, F. Malfotti, H. Forsburry and J. Keene.

Utilities

HELEN SHIMEK
Correspondent

"Contributors are very few
And very far between.
It just seems people don't come through
With news they've heard and seen."
So said Shimek, as she strove to meet,
With outlook that was dour,
A most tremendous sort of feat—
The Bomb-Shell deadline hour.
"I'm happy now," quoth she one day
"That there are quite a few
Who loyally send their news this way
Whenever it is due."
And 'tis these few who've staked their claim,
By helping every way,
In *The Bomb-Shell* Hall of Fame
And bring you news today.

—Nancy Sherwood.

Bus Billets
—from **Eddie Koerner**

Uncle Sam is beginning to take heavy toll among the bus drivers. **John Bonas** reported for active duty August 20 and **Bob Kelly, Charles Wright** and **Lester DeBolt** are scheduled to leave later this month.

The Bus Drivers' ball team has embarked on a series of night games after defeating all teams in the Fuze & Booster area with the exception of the All Stars, a team composed of the cream from all groups, who defeated the drivers 9 to 5. The first night game was played at Herscher, Ill., against the Standard Oil team of that town and ended in a victory for the drivers 11 to 9.

The next night game will be played at Herscher, August 30, against Reddick, Ill. You are urged to attend and root for the drivers, as they're trying to spread EOP fame far and wide.

Robert Hayes was injured in a collision with another ball player in a game at Joliet last week and was confined to the hospital for two days. He is expected back on the job within a couple of weeks.

The carpenters have been kept busy the last several days enclosing the busses to protect patrons from the inclement weather and the winter winds soon to come. Addition of several new units is expected shortly.

Louis "Peter" Peterson is now bus dispatcher at Fuze & Booster, having replaced **Eddie Koerner**, who has returned to driving.

Ray Pratt, mechanic, has been assigned to service busses and he is keeping them in A-1 running order.

Radio Communications
—from **Kathryn Richardson**

For what office is **Barney Johnson** campaigning? The other day at the Radio Department he was overheard setting forth the following platform: "And, my dear people, if I am elected I shall see that you get a bigger 5-cent cigar, a fuller lunch pail and an extra squirt of jelly in every bismarck." Could he possibly have been appealing to **Gus Hahn**, who has trained his wife to pack a five-sandwich lunch bucket?

Merle Eberhart was seen stamping up and down, later taking off in a zigzag direction across the lawn. It seemed he was cutting a rug, but he says that it was all because of a gopher and Merle doesn't go for gophers.

All would like to know who the person from the Radio Department is who had the nerve to bring that fishhead out to work. The rest of the fish baked and on a platter would have been much more interesting.

Machine Shop Messages
—from **Marie Studer**

Helen Mandzuk, of **J. A. Cocker's** office, is one of those lucky persons who enjoyed a vacation last week.

The sense of humor and disposition of **Edward Bick**, draftsman, is one to be envied.

Ervin Schweizer has returned to work after a week's vacation.

Sheet Metal Sentences
—from **Jess Thomas**

The employees of the Sheet Metal Shop gave a party in Joliet August 18, honoring **Bob Downey** and **Earl Emerick**, who are leaving to enter the armed forces. Each was given a parting gift by which to remember his co-workers when he is out there handing it to Adolf-Hirohito, Inc. Everyone had a great time.

BARREL of a .38 caliber pistol is shown in the expert hand of Supervising Sergeant William Maskel, shooting instructor for the EOP guards. Sergeant Maskel was formerly with several small arms manufacturers.

Will the person who found the lunch kit containing two pairs of glasses please return it to the Sheet Metal Shop at Group 70, as the glasses are badly needed by the owner.

Laundry Letters
—from **Rita Link** and **Bernadine Meister**

Evelyn Speers of Odell brought two of her little puppies to give away and the pups really did make themselves at home. Evelyn and **June Million** are returning to school in September.

Betty Neuman put one over on the girls last week by returning to work as **Mrs. Urben Frazier.**

Mrs. Francis Walsh and **Mrs. George Kinnard** were recent visitors to the Laundry.

Lucille Thurman of Streator is all smiles again since she has her Pontiac back in circulation.

The "Laundry Bags" are singing "Miss You" since **Claudia Palson, Mac Ida Bobbit** and **Cassie Reichman** have been transferred to the second shift.

Welcome is extended to **Clara** and **Clarice Lieb**, better known as "Dickie" and "Billie." They are the first twins employed in the Laundry.

Shift Number 2 had a pot-luck supper August 15 as a farewell party for several girls. Those who left are **Ann Sexton, Roberta Henn, Doris Brian** and **Jean Kinsella.**

Rita Link is leaving to continue her nursing training. Rita has done fine work as a reporter for *The Bomb-Shell.*

Helen Murphy, a sweet *little* girl, has joined the staff as just another "Laundry Bag."

Locksmiths Hold Picnic
—from **Harry "Doc" Craig**

The Locksmith Shop had a picnic August 16 at Aux Sable Creek. The boys showed they are expert badminton players and will accept challenges. **Tim Thompson** claims the title as badminton champion of this group. He also says he is a good fisherman, but since the picnic his co-workers are convinced that he was bragging in true fisherman style.

Telephone Tid-bits
—from **Elaine Christman**

W. A. Buck has completed his dot and dash vacation—by the looks of him he is all *dash.*

Gertrude Crowley, telephone operator, has returned from a trip to Sault Ste. Marie. **Edna Beach** is now vacationing.

Frank Kuechenmeister is spending his vacation at Loon Lake, Antioch, Ill.

Helen Baker is resigning to return to the University of Colorado at Boulder.

Here and There

E. G. McAloon, master mechanic, spent Tuesday, August 18, in Detroit on business.

William Bambula has declared war on the mice in the Electric Shop. After hearing several reports of mice-nibbled lunches, Bill got a new mouse trap to aid in stopping the theft. He caught four mice the first night and said, "I think I got them all." But he saw one the next night. Back went the trap until finally 45 mice had been caught. Bill thought this was quite an accomplishment. What he didn't know was that the boys would watch him clean out the trap and immediately after he left would replace the same dead mouse in the trap!

T. Costello, pipefitter, left for the Navy August 14.

Lyle Sweetland, Paint Shop, has returned from a fishing trip in the woods of Northern Wisconsin. His friends in the Paint Shop are still waiting for all the fish promised them.

Another fisherman, **Vic Kindleberger**, spent his vacation fishing and visiting his old friends in his former home, Pontiac.

"Brown Bomber" Louis Ledletter pitched the Sewer Gang to a 12-2 victory over the Labor Pool, August 18, at Sewer Maintenance headquarters.

Service Garage

Stan J. Kukulski, better known to all as just plain "Kelly," still has that cigar coming from **William Booker**, who recently had another addition to his family.

"Clyde" Sheridan and **Ralph Groll** are heaving a sigh of relief since the acquisition of **Elias Sans** in the parts department. Auto parts and keeping books are his specialty.

It has been suggested that **Chief M. C. Baughman** and **Supt. T. M. Burns** have special telephones installed at the garage for **Corp. Earl Goodknecht** and **Elmer Markgraf.** The way these two gents (very polite this time) keep bringing in the guard cars and semi-trailers respectively, is no joke but serious business with them. For that reason this place is like their second homes. If you can't reach them anytime, call the garage.

With two car washers on the day shift, **Leroy Hutchinson** and **Franklin Cunningham**, most of the plant vehicles are always clean.

We wonder if the timekeepers ever get mixed-up on the Wood boys. With three of them in the department, **June** and **"Bud" Wood**, brothers, and **William "Scotty" Wood**, it doesn't pay to just ask for "Mr." Wood. You must be more specific.

Flat tires are an epidemic now that the rubber situation has tightened-up here at Elwood. With all old tires and tubes that can hold air being constantly in use, **"Joe" Szwaja** had to get an assistant to handle the volume of "flats" on the day shift. **Allen Bohn** is the man and we welcome him to our ranks.

Dave Barnes and **Don Harding** are also new members, their duties being that of gas service men.

USO Contribution High

The final figure reported by **R. T. Bassett**, assistant comptroller, as EOP's contribution to the 1942 USO campaign, was $6,295, representing approximately a 50 per cent increase over the 1941 total.

ANTI-TANK MINES are boxed and made ready for shipment in Building 12 of Group 2. Among those pictured are Sylvester Slusarek, Clyde Duncan, Pete Tabor, Jim Waelan, Bill Rogers, Roy Nordine, Dick Fitzgerald and Phil Grove.

DISTANT BATTLEGROUNDS are the destination of the EOP land mines shown here being prepared for shipment in Group 2. Those shown include Tom Ford, Roger Baker, Joe Grunstad, Pete Tucker, John Beaver, Leslie Broker and Pat McGrath.

Past of EOP Manager of Operations Revealed in Intimate Word Picture

Two Wars, 170 Degree Heat, Construction Jobs, World Travel Make W. E. Canniff Man He Is Today

By E. O. Plant

So you would like to know some of the persons at EOP a bit better, a little more intimately. Well, come with me on a journey of words and I'll introduce you to some of them. Not an introduction as it is usually meant, but an insight gained from observation and interrogation (mine) and conversation (their's).

Are you with me? Fine, let's call first on Bill . . . I mean W. E. Canniff, EOP's manager of operations and engineering. Aw, I was right in the beginning. He's called Bill by his friends and he certainly considers everyone here his friend, so it's Bill.

Your first reaction when you meet him in his office as he appears in the accompanying photograph is that he never got that rugged, ruddy face, that piercing eye, that powerful-looking torso behind any desk. And you're right. He didn't. He got them in two wars, in 170 degree heat, in construction camps, in Russia and Turkestan.

Of course, there's a little stoop to the shoulders now. But that isn't due as much to maturity (ahem) as it is to peering at hole cards. You don't notice it much, though, after he tells you that he learned the hard way not to try to fill a straight open in the middle. And when he tells you that, he chuckles, heart-warmingly and contagiously, and you know you're talking with a man. You're convinced when you discover he shoots golf in the low 80's.

Missed Army Role

Ably fitted for his present important place in the Nation's war effort by the experience he gained as manager of not one but three shell loading plants during World War I, Bill works hard at his job. He's had only one vacation since he's been here and that was mandatory to recover from the stress and strain of construction and initial operations.

Bill worked for T. A. Gillespie & Company in World War I, running munitions plants at Parlin, Runyon and Oliver, all in New Jersey within a few miles of each other. Like most other youngsters of that day, Bill wanted a more active war role and was pleased no end when he was offered a major's commission and a chance to go to France. The powers-that-be, however, persuaded both Bill and the War Department he was needed most at his shell loading job.

It was important work, but it did seem rather tame to a young man who had traveled around the world from Turkestan when war interrupted his construction job for the Russian Government. In the spring of 1914, Bill, then 24 years old, had gone to Russia to build two railroad tunnels at Bokhara in the southern part of Turkestan, near the Afghanistan border, for the War Ministry of the Czar. He worked there in 170 degree heat until the outbreak of war in August and the job was stopped.

Long Journey Home

Bill began his homeward trek through mud, then ice and snow, across land and water. He traversed Siberia, crossed Japan, sailed to the Philippines, then to California and home to New York, requiring almost a year for the journey.

It was on this journey that Bill added to the store of poker knowledge he acquired on construction jobs like the Queensborough subway under the East River in New York, the Pennsylvania Railroad's Sunnyside Yards on Long Island and the New York Aqueduct at High Falls, N. Y.

Bill was born in Berea, Ohio, just outside of Cleveland, the son of William Lester Canniff, a well known mechanical engineer. He attended Woodward High School in Cincinnati, where the family had moved, but his education was cut short by a long attack of typhoid. Bill never went back to school. He liked building and engineering and after working with his father for awhile struck out for himself, with results you can readily see.

Yeah, Bill's a family man. His wife is the former Merrie Short of Cincinnati, who maintains the home at Englewood, N. J., while Bill is on war work. His son, William Engle Canniff, now 22, was graduated from Dartmouth last year. His daughter, Sue, 20, attends Stoneleigh College, Rye, N. H., and visited EOP this summer. Bill's mother, now 82, has also visited EOP.

Regrets Missing Derby

During World War I, Bill met and worked with **Harrison Smith**, now resident partner at EOP for Sanderson & Porter, but then a T. A. Gillespie & Company man also. When the Elwood plant was launched, Mr. Smith sought out Bill, who was then president of the Empire Ornamental Glass Company of New York, and persuaded him to take over the EOP operating and engineering reins.

Bill will tell you he was tickled pink with the offer, but he had been sunk in boredom with staid manufacturing and that although he had plenty of time for poker, golf and the races, the job wasn't anything he could sink his teeth in. Well, he got one he could, but there hasn't been time for the aforesaid pastimes. And he claims he can't pick winners, but still comes out ahead.

Bill confided that his only frustration has been his failure to see the Kentucky Derby, despite annual attempts for 20 years. Isn't that a guy for you?

Now, do you feel you're better acquainted? Well, just wait until we call on **Harrison Smith**, that tartar from Texas, and **Colonel Hoffman**, who says he was a newspaperman all his life until he was 8 years old.

TWO WORLD WARS have seen W. E. Canniff, EOP manager of operations and engineering, performing as an ammunition expert. In World War I he was manager of three shell loading plants in the East.

EXPERT MARKSMANSHIP is rapidly being learned by EOP's blue uniformed guards, now directly affiliated with the United States Army, at the pistol range shown here. It is located south of Group 3-A and is the scene of pistol practice several times each week. Coaching by Instructor William Maskel, supervising sergeant, and firing signals are given to the guards by loud-speaker from a radio car.

HOT SHOT is Guard J. A. Grimes, shown here pointing out the 89 he scored in rapid fire pistol shooting.

Ordnance

HELEN McGINNIS
Correspondent

To my girl Friday.—Thanks, **Dottie Olson,** *for doing such a swell job while I was trying to kill myself having a good time on my vacation . . . never could figure out why they call 'em vacations . . . all ya do is beat it out every day trying to do everything possible and end up by wearing yourself out . . . oh, well . . . anyway, it was a change and I'm glad to be back.*

Jimmy Walker, Stores & Transportation, was called to the Army last week . . . the gang from Stores & Transportation and the "goons" that rode the station wagon with him threw a party for him. . . . It was a great success and everyone had a good time . . . it was complete even to floor shows. . . . **Lois Dix** and **Art Kock** proved that they were about the best dancers there. . . . Jim is going to Camp Lee in Virginia and will report when he is permanently situated some place . . . then he'll be heckled for a pitcher to show you guys and gals.

Speaking of Stores & Transportation, a new threat has arrived . . . the titian-haired **Esther Johnson** has caused a tremendous uproar in that department. . . . Understand that Seymour Kurantman, administrative assistant, has been telling her his jokes.

Hazel O'Connor of the Adjutant's Office took her vacation last week . . . went home to Kansas City to see the folks . . . by grapevine it was learned that **Art Kossack** went with her. How long has this been going on?

Gerry Kestel, Ray Marquardt, Dick Dean and **Kennie Holz** went to Wisconsin on their vacation . . . from cards received . . . looks like "wolfing" is on in Wisconsin.

Ed Webster, Operation & Engineering, likes classical music and blondes.

Ray DuClos put a new door on the station wagon and surprised everyone.

John E. Olson is a champion dart thrower . . . it's evident he'd make good as some other kind of a thrower.

Tommy Haigh is going to become a benedict before long, seems as though the Dakotas got him.

Betty Wilhelmi isn't going to take her vacation until **Bob Kennedy** gets definite notice from the draft board.

Viola Donlan, Auditing Section, has been telling things to **Roy Eckberg** of the same department . . . he just got back from the wild west.

Ann Gubbins, the cute blonde comptometer operator, is "resting" in Wisconsin.

Bess Moore of the Personnel Gang returned from vacation looking fit as a fiddle.

Harold "Red" Bowler will desert the Whitney Avenue Hotel along about Thanksgiving.

Burnie Lyons has sailed away to the Navy . . . he'll be an ensign some day.

Claire Donoghue doesn't like horses that eat weeds . . . especially when she's ridin' on 'em.

Ann Lipsar likes to go on vacations . . . you meet such interesting people . . . so she says.

The new messenger in Mail & Record, **Ann Melovic** by name . . . cute trick, huh? . . . is taking **"Romie" Kren's** place . . . he's go-in' back to school.

Kathleen Dugan, Melvin Dugan's daughter, has joined Mail & Record, too.

Helen Harmon has moved into a new office . . . she's on the main floor of the Administration building . . . with her are **Anne Kulpa, Marion Yeager** and a newcomer . . . **Bernie Jones** . . . she's **Anne Kakara's** sister and just as good a scout, too.

Hear that **Flossie Babecke's** boy friend is going to Indianapolis to join the Army. Don't you think that **Charlotte Matheny, Mr. Pavel's** Sec. . . . is a cutie pie?

With the Timekeepers

James Strong, "Mayor" of Richard's Farm; **Stan Kotarski,** who always kept the guards under control, and Ernst Aeschbacher (he of the $1.03 steaks) have joined the armed forces.

Geraldine Parthun, timekeeper, Group 6, was injured in an auto accident the other day . . . minus a few teeth . . . and with several bones broken . . . is trying to smile through it all . . . she's out of the hospital and on the mend now.

Lyle Ingraham, who thinks timekeepers have the best looking daughters, is carrying the torch for **"Torchy" Peebles'** daughter. Incidentally Lyle is vacationing with the Peebles family in the North Woods.

Rita O'Reilly, the Irish beauty, has the Timekeeping Section agog . . . she's the type Johnnie Doughboy would go all the way to Ireland to find.

Harold Kapsch, the guy with the cute walk, is enjoying a trip to sunny California and "down Mexico Way."

Did You Know . . .

That **Eddie Reichert** can sing bars of any song you mention?

That **George Stevens** now removes his hat when in the office?

That **Otto Zenke** is a beautiful writer . . . even has Palmer Method?

That **Dave Horwich** anxiously awaits the return of the "one-armed bandits" in an eatery?

Victory Revue to Be Presented Sept. 12

"The Bomb-Shell Revue" has been renamed and will be presented at 8:15 o'clock Saturday night, September 12, in the auditorium of the Recreation Building under the banner of the Victory Revue, it was announced by **Earl Carpenter.**

The program, although not entirely completed, will include the following:

I Grand Opening and Prologue
II Hitting the High Spots
III Musical Moments
IV The Farmerettes
V The Trials and Tribulations of Little Nell
VI The Brown Bombers of Note
VII Interlude Musicale
VIII Feats of Legerdemain
IX It's the Life
X Dance Time
XI Rattlin' the Bones
XII Ballet Moderne
XIII The High Steppers
XIV The Grand Finale

Following the show the EOP Bombardiers under the direction of **Bob Stewart** will play for dancing.

WATCH MY SMOKE, said M. C. Baughman, chief of guards, as he performed at the pistol range under the watchful eyes of Capt. John A. Hardy, U.S.A., security officer, and E. O. Huey, superintendent of the EOP plant protection department. (The result of the Chief's shooting was censored as a military secret liable to give aid and comfort to the enemy.—Editor.)

LOOKIN' 'EM OVER with a sort of "wotinell" expression, Umpire John D. Neely, assistant superintendent of Group 9, is shown watching the effect of the unique delivery of Rosemary Maase, Group 9's softball mound ace.

Group 2

EDWARD KEENAN

WILBUR GALBRAITH

Correspondents

John Knezevic, assistant foreman, left to join the Army August 4. John's smiling face and jovial personality will be sadly missed.

Bill "Atlas" Rogers, who is considered one of the best developed men in this group, recently passed the U. S. Army Aviation Cadet examination in Chicago and expects to be called soon to active service.

"Dick" Oldani wrote a swell letter last month telling all about the wonderful training the men receive at the Glenview Naval Cadet Training Station. "Dick" formerly worked in this Group on the day shift and was one of the most popular and well-liked boys in the entire Group.

Everyone is commenting about the "natty" outfits the Safety Engineers are sporting these days.

The Real Lowdown

The latest on **"Pete" Kelder** is that he has the ring and everything all set for the big day, September 1.

"Shorty" Kirkland is a bit peeved at **Bill Malone** and his "green hornet" these days. It seems Bill passed up "Shorty" on the hi-way and to add insult to injury told "Shorty" that because of his deficiency in stature he couldn't be spotted.

They say **Bill "Short Stroke" Stanley** is giving a certain girl who works in the High Explosives office the grand rush!

Irv Siemsen, a component clerk in Group 2, has been accepted for officer's training and expects to leave shortly after Labor Day.

Malone, a man of many rackets, started a little "numbers game" while driving home to Crystal Lake, Ill., one Saturday night during a very bad rainstorm. It seems as though the distributor and the wires around it got wet on the Chevrolet and someone would have to get out and wipe them off. Malone looking around for a sucker said to "Cactus," "Take a number from one to ten," and "Cactus" said, "Seven." Malone answered with a bit of quick thinking, "Sorry fella, but you lose and will have to get out and wipe off the wires and such." "Cactus" was out in the rain and had the hood up before he knew that he was roped into the job.

Bob Ardaugh enjoyed a couple of days in Wisconsin. He tells us that the scenery is beautiful (that which is on two legs). He informs us that there is a small Indian reservation in that part of the country. Well, anyway, he saw two.

Frank "Zeke" Gaglione is back to work after a few days illness.

Chuck Pierce is back after enjoying two pleasant weeks of vacation.

William "Jersey" Klegman, the *"wit"* of the Group, is on vacation.

Congratulations to **Frank "Smiles" Malone**, the proud father who is passing out cigars in this group.

Some of the boys are asking **Ray "Beau" Bell** about his latest torch who goes by the name of "Ev." They say this is the real thing.

Art Jennings, foreman of Building 3 and **Everett Bradley**, foreman of Building 12, have returned to Group 2 after their vacations.

Bob Schmitz, inspector, is on vacation, and **Tom Todd** has taken over the reins while Bob is away.

Congratulations are extended to **Louis Walsh**, safety engineer, who is a proud father.

Les "Horse" Tammen and **Mario "Motts" Zinnani**, now at this group as guards, are welcome additions to Murphy's Boys' softball team. Their presence should bolster the team considerably.

Softball Items

Murphy's Boys' copped the elimination tournament at Sunbury, Ill., August 9, first by defeating the Melvin Truckers from Streator 2 to 1 and then by defeating the strong Sunbury Stars 8 to 0.

A few of Murphy's Boys now play with the EOP team and after changing suits went to Beecher, Ill., and defeated the Blue Ribbons 3 to 1.

Murphy's Boys again defeated the fine team from Group 61 by a score of 9 to 0. This game was played at Group 61's home diamond, and resulted in a walk away for the Boys from the very start of the game.

Murphy's Boys are scheduled to play for the Annual Home Coming at Elwood August 29. This game will be played on the new diamond just north of Elwood's Trailer camp against a strong Joliet team. The game will start about 5 or 5:30 p. m.

Ken Peterbok shut out the strong team of Bloxton Chemical Co. 4 to 0. Kenny allowed only two hits while the Boys taged Bloxton for four hits. Murphy's Boys have only to win one more game in Joliet to win the Gold Medal League title and then will move to other parks to play off the Garnsey and Powers division.

FOND MEMORIES of their co-workers will be retained by Ray Schultheis and Andy L. Berta, Jr., as the result of Group 68's get-together to give them going-away presents on the eve of their departure for the Army. Pictured here, left to right, are: First row: Russell Anderson, Frank Perino, Jr., Edward Hodina, Albert Augustine, Jack Needles, William Petty, Leroy Mathew, Louis Gregorich, Jr., Claude Johnson, Erwin Welsand, Ancel Qualls; second row: George Larmer, C. B. Isaacson, George McLaughlin, Robey Johnson, Mr. Schultheis, Irving Bovee, Mr. Berta, Andy L. Perino, Robert Swinford, George Lerrace, Francis Monroe, Frank Perino, Sr., Edgar Hanson, Bernard Cavanaugh; last row: Ellsworth McKnight.

Read Cautions Close Margins Too Dangerous

Safety Supervisor Advises Striving for Wider Factor

By Rollin T. Read, Safety Supervisor

The first law of nature is "Self dividuals go too far before applying the law and then—no preservation, or rather what's left to preserve is done up in cotton batting—or bandages.

Did you ever stop to think that the difference between injury and safety is often only a tiny fraction of an inch or a tiny part of a second. The distance away from the edge of a tool, a saw, a press die, where one doesn't get hurt, is too small to measure, but a movement the thickness of a hair and your finger is cut, a half inch farther and the end of the finger is off.

The last time you cut in ahead of another auto and barely made it was a matter of the smallest measure of time. The missing margin on these very small measurements is usually more luck than good management. So we have minor injuries, small cuts, small bruises but often we have "lost time" accidents where calculations were faulty.

Why not a little more of a factor of safety, a little more distance from the ragged edge of danger. You wouldn't want a car that was just strong enough to carry you, or cross a bridge just firm enough to stand up or even use a ladder with rings just able to bear your weight. In your better sense, you want a big factor of safety in all things. It costs too much to miss not only in lost time but if a thumb or an eye is lost it will cost you over and over every day of your life. Don't separate yourself from a true earning position to the broom job and pull your family down with you.

Let's get wise to this situation before we lose in this gamble of "close margins." Do it for Uncle Sam, as well as for yourself and family.

Inspection

RICHARD LOWERY

Correspondent

Frank Lewis, senior inspector in Group 1, has sent his thanks to **Mid Slack** for taking care of the inspectors in Group 1. Frank spent most of his vacation on Joliet's many beautiful golf courses.

Marvin Beeley, scale inspector in charge of Group 1, has a hobby of carving little wooden puzzles. If anyone doubts his ability, **Bud Brown**, office manager, will verify this statement.

In response to the request for all to learn a useful trade, **Harold Troupe**, gage technician, has taken up designing air-conditioning units in addition to his other talents.

Bob Wilhelmi, assistant to the chief inspector, has asked if **Fred Gabel**, inspector at Group 1, is a relative of the famous cigar manufacturer, **Charles Gabel**. Bob prefers the "C. B. Snider."

Stella Jaworski, A. J. MacLellan's secretary, has just placed the 10,000th patch on her best tire tube. The other three tires have solid patches with seven winds of twine around them. Stella is now singing "My Devotion," instead of "In My Merry Old-mobile."

Gaylon Ford, senior inspector at Group 5, is still trying to figure out how the report supplies reach him so fast.

From out of nowhere a report came that **Agnes Ecimovich, Dorothy Davis, Doris Callaway** and **Helen Brown**, inspectors at Group 5, have a picnic planned for August 30. It will be held most likely in Inwood Park.

Ed Vanni, inspector in charge of Group 9, obtained office space and a new desk the other day. Ed sent his thanks to **Bill Hartman** for putting through this improvement.

In the Will County golf meet, the senior inspector at Group 3-A, **Bob Walsh**, won second place. Bob lost to a smooth player with a stroke unmatched, **Bill Stuhlen**. Stuhlen is 18 and an all-star athlete at Joliet Catholic High.

Gene McAllister, inspector at Group 61, may be called upon at any time of the day to dash off a chicken dinner.

EOP could have its own air patrol with two of its members coming from the Inspection Department. **Godfrey Herscher**, senior inspector in Group 3, and **Sonny Herkert**, inspector at Group 2, would be the dare-devils.

Flash!!! Another steak dinner will be held this month. Inspectors in Fuze & Booster area can give their names to **Jim Tyler**, inspector in charge of Groups 4 and 5. **Harold Rouff** has planned to do the cooking.

"Tiny" Stieghling, equipment checker, is taking orders for Parker House rolls. Stieghling plans to bake them on top of his desk or try again to obtain a fan.

Harold Bell recently joined the Inspection Department. Harold, before he moved to Chicago, worked in the State Tax Department at Springfield. He is an inspector at Group 61.

Now that **James Glade** is a grandfather, readers of *The Bomb-Shell* will have to wait a few more weeks to enjoy his famed editorials again.

Manager Moe Brennan drafted the former professional ball player, **Bill Hammond**, in an effort to improve his club.

THE SUPER SIX (minus one) of the Fuze & Booster Groups are shown here as interested spectators at their girl operators' softball game. Assistant General Superintendent George Morrison is missing, on vacation in New York. Shown left to right are William D. Whaley, Jr., superintendent of Group 9; Thomas M. Burns, general superintendent of the Fuze, Booster, Primer and Detonator Groups 4 through 9; J. E. Truka, superintendent of Groups 6 and 7; John A. Lower, superintendent of 4 and 5; and John H. Walker, superintendent of Group 8.

High Explosives

MARJORIE HOWERTON

Correspondent

Your correspondent returned Wednesday in time to clock in at the regular period of 8:29½, after a short (but, oh, so nice) vacation. Chicagoland Music Festival, Great Lakes Naval Training Station, Ft. Sheridan, Municipal Airport and other items of interest were viewed and visited.

Andy Perino, general foreman of Group 68, will leave Monday on his vacation.

The boys at Group 63 were very glad to see **Edward La Rocque** return from his vacation. For awhile they all thought Ed had gone out to check a car and had become lost in the weeds.

All wonder what **Paul Hall** will do for amusement this winter when Riverview Park closes and all the carnivals go into their winter quarters.

A tomato a day keeps something or other away—so says **Homer Peters**, government inspector, Group 63. How sand can come out of **Bob Matone's** salt shaker is still a mystery. Not too good for seasoning said tomato. P.S.—From now on Homer will bring his own salt.

Johnny Zopf, material checker, came through with a swell cake for the boys in 63 and 66-A in celebration of his 21st birthday anniversary.

Merle Alberts left August 24 to join the Army.

Eugene Schmidt has enlisted in the Coast Guard.

Ed Dite, Harold Downey, Ed Young and **Tom Hall**, all former employees of Group 63, are now riding High Explosives trucks as drivers and helpers.

Group 63's softball team played its first game on the new ball diamond August 18. Too bad for the boys, but Group 70 went home with the big end of the score.

Mr. and Mrs. Dick Orndorff are parents of a son, **Richard Henry**, born at Grant Hospital in Columbus, Ohio. Young Richard weighed 4½ pounds and has been spending his time in an incubator.

Jim Mitchell of Station WCLS, husband of **Marcia Mitchell**, is soon to be inducted into military service.

Alfred L. Lampman of Cleveland, Ohio, nephew of **Chief Chemist Herb Hafele**, visited the Lab last week.

AMONG THE FIRST softball teams organized at EOP is the one shown here representing Group 1. Pictured, left to right, are: Sitting, Ralph Sassenger, John Leake, Samuel Africano, John Phegan, Kelly Arseneau, John Oblack, Al Dunne and Wilber Werner; standing, Joseph E. Salmon, superintendent of Group 1; James Lyons, Vernon Hilt, John Burdette, manager; George Gibson, assistant superintendent; Michael Kelly, Francis Sharkey, Mike Dubetz and Edward J. Walsh, general superintendent of loading lines.

UNIFORMED PLAYERS of Group 6 are ready for a softball game after their daily stint in the production lines. Pictured, left to right, are: Front row, Rosemary Maass (pitcher), Edythe Krzich (catcher), Barbara Greenwood and Mary Nosse; back row, Gertrude Freeman (captain), Gladys Allie, Marcella Novak, Grace Knowles, Elsie Elich and Julia Jackson.

Ordnance Girls Don Uniforms September 15

"Flying Blue" Color Selected for Jacket, Gored Skirt, Cap

The women of the Ordnance Department will take a lion's share of the glamour from the officers' uniforms by wearing uniforms themselves, starting September 15. But no serious objection is expected from the officers, since the plan has the whole-hearted approval of **Lt. Colonel Don M. Hoffman,** commanding officer.

A unanimous vote for the uniforms was cast by the women after their first glimpse of the "flying blue," color and the tailored perfection of the fitted jacket, gored skirt and overseas cap. The "flying bomb," insignia of the Ordnance Department, made in bronze pins will be worn on each lapel.

A committee headed by **Bess Moore** with **Margaret Jesberger, Dorothy Olson** and **Helen McGinnis** formally presented the idea. submitted designs and placed the orders.

"Even though we are paying for the uniforms ourselves," said Miss McGinnis of the Ordnance Personnel Department, "we definitely feel that they will help us save money on clothes and also put us in our proper category as war workers."

The uniforms will bear a note of distinction insofar as they are limited to women who have been employed at least three months in the Ordnance Department.

FUZE AND BOOSTER workers are proud of their girls' softball teams, of which this is one, representing Group 9. Shown, left to right, are: Front row, Mary McKaig, Elizabeth Banko, Olga Pribish, Josephine Sedlock and Lois Kreiger; back row, Helen Briske, Rose Gegliette (pitcher) Dorothy Bates, Lillian Reis (catcher), Marguerite Goodendorf, Dorothy Murphy (captain) and Marian Stamp.

Groups 4-9

Fuze-Booster-Primer and Detonator Lines

JUANITA HARTER
Correspondent

Despite the fact that **Harvey Sessi** "threw a shoe" when racing around the bases, the All Stars succeeded in trouncing the undefeated Bus Drivers August 13 at Zoom Stadium with a score of 9 to 5. **Raymond Ruder** from Group 9 did a real job of pitching. **John Woods,** Group 4, and **Leonard Branchow,** Group 5, hit home runs. The All Stars played a winning game over the FBPD Chemistry Laboratory boys August 18 with a score of 18 to 11.

Hazel Howen, superintendent's office, is now wearing a diamond on that certain finger, placed there by a sailor boy now on the high seas.

George Morrison, assistant general superintendent, is now vacationing in New York. From all reports received it seems that good old B'way looks the same at day, but not at night.

Another vacationer from **Supt. T.M. Burns'** office is **Frank Hauser,** who is lolling around near a lake "somewhere up North." **Bill Jarvis** is pinch hitting on the busiest phone in Group 4.

The Walkerettes, girls softball team of Group 8, broke into the winning column by defeating the strong Group 6 team by a score of 18-10. **Mary Suffner,** the Group 6 first-sacker, and **Manager Dorothy Lehman** of Group 8, shared hitting honors.

The Walkerettes scored another victory August 18 over Group 4, at Group 8. **Gertrude Jostak, La Verne Gomora** and **Margaret Kormelink** shared hitting honors, with three hits each, while "Joiy" starred at bat and played first base for Group 4.

The shipping department of Group 8-9 was honored Saturday afternoon by a visitor who was so privileged that he wore neither badge nor safety shoes. **Nora Timoney,** inspector, was so excited that she jumped up on the table. The visitor was none other than "Mr. Gopher," who had found his way into the room when **Gordon Schroeder** had unwrapped a box outside the shipping department.

Bill Birtwistle, personality boy from the office, is vacationing in Wisconsin.

Helen Princko, from 8-11, has changed her name to **Mrs. Lloyd Smith.** Helen and Lloyd were married August 17.

Are **Helen Davin** and **Florence Robertson** really sisters?

Can you imagine **Betty Wasik** paying $2 for a green apple?

Georgia Lund, 8-11, underwent a major operation at St. Mary's Hospital, Kankakee.

The liner girls in 8-11 all miss **Clarence Seabert,** service man, who has been called to the colors. **Gabe Werden** is the new service man.

Rose Blazekowich has solemnly promised always to be on time hereafter.

The day shifts of Buildings 2 and 4 of Group 6 and their friends had a get-together Aug. 19 at Norton's Grove. A baseball game and dancing featured the evening. **Elmer Pilcher** was the one-man committee.

John J. Murphy, 4-14, enjoyed a two-week vacation at Yellowstone National Park.

It was a rough beating **Johnny Wood,** 4-9, had to take when **Gene Fahrner** of the chemistry lab. came tearing into third base at Zoom Stadium.

Congratulations are in order for **Jack Fey** and **Georgia Feeney** on their recent marriage.

Ordnance Inspection

GERALDINE M. WARD
Correspondent

Lt. Col. Don M. Hoffman and **Lt. A. G. Resch** visited the Jefferson Proving Ground, Madison, Ind., August 18.

A group of nineteen employees of the Ordnance Inspection Department each contribute $1 semi-monthly toward the purchase of a bond. The bond is awarded to the individual holding the best poker hand according to the numbers on their pay check. **Stanley Eisler** and **Robert Irwin** tied for the first bond so they compromised by dividing the funds and each purchased $9.50 in War Stamps. A name for the club hasn't been selected, but "Purchase a Bond for Victory Club" has been suggested.

Jerry Shirtino's hobby is baseball and he is an ardent Cub fan. He recently attended the Cubs-Pittsburgh game in Chicago.

During **Mrs. Clara Brennan's** vacation, she and **Mr. Brennan** attended the performance, "Good Night Ladies," at the Blackstone Theatre in Chicago.

Mr. and Mrs. Stanley Eisler spent an enjoyable vacation at "The Dells of Wisconsin."

Ethel Dirker makes quite an impression on our visiting lieutenants. Special interest was displayed by the visitor from the Nebraska Ordnance Plant.

Catherine Tomlianovich spent August 17 in Peoria, where she attended the ceremonies in which her sister took vows in the sisterhood of the Teachers of St. Francis.

Bernice Shroba recently spent the night with her co-worker, **Helen Boula,** at their farm home in the vicinity of Lemont, Ill. The girls talked until the wee hours when Bernice decided she wanted to repay the hostess for her hospitality so she offered her assistance in milking the cows. Helen said she was inexperienced so they compromised and Bernice was given the task of collecting the eggs. When she completed her chores she was quite hungry and didn't see any reason for having too many eggs on hand so she ate a very hearty breakfast: Five fried eggs and goodness knows how much ham, toast and coffee. Oh yes, Bernice has agreed that farm life is *the thing.*

'Tis reported little **Millie Stutz** spend all her spare time buying skirts and sweaters.

The G-men and G-gals at Group 7 extend best wishes to all their former colleagues now working throughout the Fuze and Booster groups; and particularly to those who are working Group 6 under the able leadership of **Paul "Barney" Barhoover,** another Group 7 alumnus. Much of the credit for their success belongs to the splendid training they received while in residence here.

Women

By
CATHERINE NOONAN

All awards for EOP'S "perfect wife of the week" go to **Rita Washburne,** Personnel Department. **Ed Washburne,** Rita's husband, who works in Group 70, is the all star, super-super pitcher for EOP'S softball team. Rita and Ed were very happy that the beginning of her vacation coincided with his two-day holiday. So plans were made to-get-away-from-it-all in beautiful Wisconsin. Life was beautiful for the Washburnes. That is it was beautiful until Ed remembered something about two softball games that were booked by **Jack Kusinski,** manager of the team, on the very week-end that they were going to have that wonderful time in Wisconsin. So Ed explained to Jack and Jack explained to Ed and Ed explained to Rita and Rita explained to Ed and Jack explained to Rita and Rita explained to Jack and then Ed and Jack explained to Rita. Rita finally said, "What price glory?" and fanned herself at South Bend and Chanute Field instead of sunning herself in Wisconsin.

Another EOP Vignette

Third in the EOP vignette parade and the first with her picture is **Harriet Gassensmith** of Group 4. Harriet is a native of Odell . . .

John Payne is her favorite movie actor . . . she has brown hair, blue eyes and a nose that crinkles when she smiles . . . her major pet peeve is bossy people . . . blue is her favorite color . . . is the petite junior miss type . . . her present job is her first . . . still mourns the death of her pet canary, Jerry . . . doesn't like hobbies . . . she loves to dance . . . consideres her cooking talent on the amateur side . . . red roses are her favorite flower . . . is even tempered and has lots of vitality . . . likes the day shift best except for getting up in the morning.

More About Nurseries

If you are worried about the welfare of your baby while you are working, **Mrs. Ann Lindsay,** Joliet USO director, is making plans to solve your problem. As you read in the last issue of *The Bomb-Shell,* nurseries for children of mothers at EOP are being planned. If you were unable to meet and discuss your problem with Mrs. Lindsay during her visit here, fill out a questionnaire which you will find at your superintendent's office. The plan, which is part of the County Civilian Defense Program, is not restricted to Joliet. Nurseries will be started in any community where there is a need for this service.

Recipe of Week

Geraldine Ward, Ordnance Inspection Department, gives you the following Yum Yum Pineapple Salad recipe which she guarantees will make you the most popular hostess of your bridge club, especially if you serve it with nut bread. The ingredients are: 2 cups crushed pineapple, juice of 1 lemon, ¾ cup of granulated sugar, 2 tablespoons Knox Gelatin, ½ cup cold water, ¾ cup American cheese, ½ pint whipping cream. The directions are: heat pineapple, including juice. Add juice of lemon and sugar, stirring until dissolved. Soak gelatin in cold water ten minutes. Add to hot mixture. When cool and commencing to set, add shredded American cheese and whipping cream beaten stiff. Mix thoroughly and place in refrigerator until firm (do not place in freezing compartment). When ready to serve cut in thick slices, place on lettuce leaf and garnish with mayonnaise and small strip of pimiento. Serves six.

FAREWELL WISHES were expressed to John Prince, retiring head of the Ordnance Department's Timekeeping Division when the group presented him with a portable radio. Loretta Franke is shown giving the present to Mr. Prince. Others pictured are: Front row: Anita Lambur, Louise Ardelius, Janet Burzawa, Betty Lou Page, Mary Kay Lohman, Rita O'Riley, Mary Gliha, Martina Schomas and Betty Jane Carlson; back row: George Stevens, Charles Gaby, Frank Johnson, Otto Zenke, Louis Schuck, Ray Levenger, Frank Bravato, Kenneth Chapman, James Strong, Roy Schubert, John Flynn, Joe Peters, Clark McKeehan, Bert Folk, Tom Wharrie, Lyle Ingraham, Eddie Reichert, Frank Levanduski, Alex Dulcis, William Henderson, Verne Perry, Harold Kapsch and David Horwich.

SPIC AND SPAN uniforms identify these workers as belonging to Group 61, the nitrate of ammonia plant. They are unloading a new blower from a railroad car. Pictured, left to right, are: Bob Paulsen, Les Eicholser, Bernard Williams, Rene Richards, Ed LaPierre, Ed Rush, Kenny Bailey, Charles Bright, Yvon Brais, George Hammond, Foreman George Roach, Ted Francois, Wilford Eneix, John Hill, Carl LaPaglia, Kochelhoffer and Paul Burk, building foreman.

HEADS UP, CHESTS OUT (you know the rest of the command), this group of trim, blue uniformed women guards lends additional color and charm to the many-sided war job EOP is doing. Pictured left to right are: Front row, Alice Drassler, Marie Cline, Zelma Kinnard, Edna Lytle, Rose Mae Hunter, Nima Benson and Rachel Morehead; back row, Mary Bennewitz, Luella Lipschutz, Irene Thomas, Helen Weber, Maybelle Seaver, Grace Taff and Margaret Egan. At the extreme left (left to right) are Helen Harbison, shift leader; Mrs. Bernadette McNamara, supervisor, and Gladys Armstrong, shift leader.

Recreation Calendar

Aug. 30	Golf Match.....EOP vs. Fort Sheridan
	Softball.....Benefit Game at Oak Grove
	Softball.....DeKalb at DeKalb
	Baseball.....Peru Merchants at EOP—2:00
Sept. 6	Softball.....EOP at Beecher for USO
Sept. 9	Luncheon Music.....Cafeteria Program—12 to1 by small combo under the direction of Earl Carpenter
Sept. 12	Victory Revue.....Formerly the "Bomb-Shell Revue" Presented at the Recreation Building at 8:15 Dancing follows

Sept. 16	Morris, Ill. Street Carnival.....EOP will be represented
Sept. 23	Men's Archery Meet.....Recreation Building
Sept. 24	Men's Horseshoe Pitching Contest Call 4109 to enter names
Sept. 29	Women's Horseshoe Contest Send names to Recreation Building

Personnel

LEE R. REYNOLDS
Correspondent

Three cheers for **Claude Sayre!** It won't be long before the Personnel Department will be able to get an extra breath of air. The long-hoped for addition to the Personnel Building has begun.

Rita Cooney and **Gin Odenthal** have been busy entertaining their brothers home on furlough.

Jimmy "Barney Oldfield" Barrowman has his eye on a '36 nine-passenger Buick.

Man loves dog, girl loves horse, or is that why **June Morgan** looks at that picture of her horse with such loving eyes.

Bets are being taken on how long it will be before **Donald "Killer" Kane**, guard, applies for a transfer to the construction force. He is getting competent with a hammer and nails. He is responsible for all the signs that the applicants never read.

Alpha Engelhardt is enjoying a vaction. **Harry Dean** has returned from a week of loafing.

Merna Wenstrom, for the second time in three weeks, has locked a certain someone's keys in the car.

All the girls in the Transfer Department are calling a certain **David Graves** "Chief Can of Flit" because of his constant spraying about the place.

Bing Phelan has been attending all of EOP baseball games lately. Has it anything to do with the flashy shortstop, **Ed Keenan?**

We are going to welcome **Byron Mills,** while on a visit recently said he was returning to work about September 1.

Ralph Potter sat down the other day to what he thought was going to be a delicious chicken dinner at Wilmington. After eating the very dainty portion brought him he had the waitress bring him a ham sandwich.

GROUP 3

WILLIAM BERINGER
Correspondent

Again there is good news for the fans of Dougherty's Bombers. Although, since the last report, but one defeat was suffered, three games were won to offset any drop in morale. Group 1 was again defeated, making two games and two victories over that team. The score was 2 to 1.

Group 66 was met August 10. This game had previously been postponed because of a wet field. The Bombers again came home with a victory, 5 to 3.

Group 61 will remember August 13, the day they took an 8 to 1 beating on the Group 3 field.

Group 70 was responsible for the one defeat.

Thanks are extended to everyone who contributed so generously to the softball fund. Although, up to this writing, returns are not complete, purchase of all necessary equipment has been made possible.

Congratulations are due **Manager Dan Warren** and all his players for the fine showing and excellent sportsmanship they are displaying. The best way to show appreciation is for all to do their part in increasing the attendance at the games.

S. J. Colfer, assistant superintendent, is enjoying a two weeks' leave from his duties. **Charles Hansen,** assistant superintendent, who was inducted into the Army August 15, is home on a 14-day furlough before going into active service. **"Willie" Kautz** and **John "Red" Boucher,** foremen, are also enjoying a few days of rest.

Ever since **Ray Hoffman** treated the fellows in Building 3 to one of his wife's swell home-made cakes, he has been swamped with orders for room and board.

DeWayne Gish is wondering what he will do with the two cows he bought, now that he is expecting a call to the Army.

Joe Zelinko, Building 3, is reported to have 37½ acres of onions for sale.

Steve Gonda is wondering how the girls at the skating rink in Joliet will get along without him for the next four weeks that he is on the 3:30 to 11:30 shift.

Fireman Charles Robbins is going to show the engineers the correct way to fish. They are going up to Three Rivers, Mich.

Clarence Becker is a full fledged fireman now. He had a young fellow 59 years old break him in for a couple of weeks. If you want to know how to run a threshing machine, cure the seven-year-itch in one week, or most anything, call Becker at 4284.

Bob Hankes, star first baseman, played a double-header the last game the team played. He got home at midnight and his wife umpired from there on. You know the rest.

William "Tiger" Brennan, the new steamfitter, doesn't know his own strength. He had a 24-inch pipe wrench on quarter-inch pipe—what happened? He broke the wrench.

Harl Son has some "hot ones" on fishing.

George Pilcher has been promoted to engineer. He is now trying to convince the OPA that he needs material for floors, walls, etc., for the new house he is building.

Woody Koerner, while going around doing his work, is also practicing singing "Rock-a-Bye Baby."

Dutch Ahrens is now eating home-cooked meals again.

Race horse owners need not worry about their horses getting anything to eat; these boys will see to that: Carter, Kohn, Combs, Koerner, Tiger Brennan and Happy Pilot Ed.

Big News! **H. D. Dougherty's** personal secretary, **Raymond Rivard,** received a letter from **Cecil B. DeMille** to report for a screen test. He left for California August 23.

Congratulations are extended to **Donald Mancini,** who was appointed acting assistant superintendent, after Mr. Hansen left for the Army.

Inert Storage

CHARLES MANN

WILLIAM DENVER
Correspondents

It seems quite a task to climb back in the saddle after spending a much longed for vacation, but work is work and play is play, so here goes. The phones are ringing and papers are flying, but this all must be if we are to remain a free people. What the boys did on their vacations, where they went, will remain a secret . . . the fact is they did vacate. If they don't return, the particulars will be related . . . maybe.

The outings in the woods are sure going over at Inert Storage. The boys had another—bigger and better—August 24 at the same place—Troy Forest Preserve. A professional chef was engaged to perform with steak and charcoal . . . who else performed is a secret. From the way the woods were populated at the last outing arrangements were made to open an acre of farm land surrounding to care for additional followers. The menu was much different, leaving out the turkey in the tube, but the liquid refreshment was the same popular variety.

Some of the boys at South Inert have earned nicknames and here they are—**Frank "Bubbles" Wesley, Joseph "Moon" Domaliga, George "Potatoes" Harrop, Bob "Professor" Gjessing, Wally "Woman Killer" Fang, Elwood "Heavy" Anderson, Lawrence "Dreamy Eye" Larivcka, John "Super" Alexander,** and **David "Hattie" Lardi.** Some have not as yet earned their nickname, but they may come in time.

William "Big Stoop" Hufford doesn't like variety and would sooner have routine business.

Sympathy is extended to **Al Gierich** and **Booker Bates** in their respective bereavements.

George "Farmer" Shaw is back from his vacation and won't talk.

Group 27 sends out a welcome for all to come and see the beautiful garden . . . flowers and vegetables—you can't tell which is which.

The sick list has claimed one—**Charles Berro**—summer cold.

John Nye tells fabulous stories of what he is going to catch in Northern Wisconsin . . . muskies, so he says.

Winfield Arthurs enjoyed sending the boys some special lake trout while on vacation . . . must had the wrong lot numbers . . . not received yet.

Fred Ford is anxiously waiting for **George Newton** to return to his post at South Inert.

The pictures taken at the picnic showing **A. P. Balston** sliding headlong into first base have been lost in the mail . . . a check at the post office and drug store revealed nothing and a tracer has been sent — they might have been blurred anyway with all the excitement at the game on picnic day. Better luck next time.

Barnyard golf is now being played daiiy at 62-19 . . . why not start a league?

The boys at North have completed a preliminary course in landscaping and built a picket fence around the culverts . . . you ought to see how pretty the North Office is now.

The clock houses look like the little country schools every morning . . . everybody with their lunch box waiting to punch in.

Charles H. Mann, assistant superintendent, keeps looking at the calendar . . . the middle of September will bring him a vacation and a bride.

George Harrop, Jr., will leave for the Army late in August.

Jim Whitley, at South Inert, has a fighting rooster and hen . . . they have big long spurs . . . you ought to see . . . want a fight?

On the vacation list are—**Sidney Bennet** and **Matt Reay** . . . where they are going we don't know . . . when they will be back . . . we don't know . . . are they coming back . . . we don't know.

Willie Denver had a grand vacation and left his Boston Bull (dog) with his neighbors . . . tells us it was a lake cruise with all the trimmings, and oodles of visits with friends.

Inert Storage is leading the Softball League with six wins and one loss . . . watch them go . . .

Group 61

JOE MOTTA
Correspondent

Eugene Balachowski has passed the mental examination required for the Army Air Force and has his fingers crossed while waiting for the results of the rigid physical.

Jack Auberry is looking better with new glasses.

Francis Taylor was meeting trains for a week before he found one which carried his wife back to him. Yes, she had left him—but only to visit relatives down south.

Art Swinghammer and **Bernard Williams** have been called by Uncle Sam. **Bill Meyers** is next in line, he was examined recently.

Percy Boulware, known as "Hamburger," has joined the crew of oilers.

Bill Bixby went to Rockford (his home) for a week-end feeling down cast and glum, but returned singing like a bird and smiling from 'ere to there.

Capt. Perry W. Beal and **Mrs. Beal** spent a few days with their **Uncle Jack Trout.**

James Sinkular has been added to the office force. His nickname is "Shooter."

Mgr. Harvey Steffes is rather proud of his softball team for its victory over Group 70 and **Lou Haake,** who recently pitched a no-hit game against Group 3A. Harvey himself touched Lou for a long hit.

Ray Whalen left to continue his schooling.

Clifford Kidney and **William Dooley** took in the races at Washington Park. Kidney sure knows how to pick the winners.

George Diment is back to work after a week of vacationing in Minnesota while his boss and keyman timekeeper, **Lawrence Holtz,** is just beginning his.

Gerald Riley is the proud father of a new son.

The accident, in which **Allen "Cap" Mayes** was reported to have been, turned out to be of minor consequence, just a broken distributor on the car.

Norman Johnston is away ill.

Nick Pagoria returned from his week of annual leave, looking and feeling hale and hearty.

Ralph Walter has moved to Wilmington. He formerly lived in Yorkville.

Clarence Wells received a variety of gifts on his 35th birthday anniversary. There is some sort of mystery concerning one of the gifts. Clarence won't say what it was.

James Decker had a hard time explaining to his wife that he and **Harvey Steffes** were going to an important meeting.

It would be nice if . . . you knew that **"Coal Pile" John Kelly** learned that weasels swing a wicked blow. . . . **Mike Enich** shaved oftener than once every three weeks. . . . **Ed Rashid** made up his mind where he lost his fountain pen (he lost it at Building 6 and it was found in the Change House) . . . You took dancing lessons from **Ray Hill.** . . . **Charles "Mick" Hinz** found the three bucks he lost in the "Bobolin." . . . To know why people call **Frank Kachelhoffer** "Banjo Eyes." . . . **H. O. Cadwell** would say why he likes to work nights. . . . **James Halpin** and **Loren Horrie** didn't address girls on the Dwight bus by their nicknames.

TABOO SIGNS prevent the carrying of mechanical pencils into any of EOP's loading lines, but Fire Chief R. W. Mortenson makes collecting them a hobby. He is shown here with a portion of his collection.

Group 1

JACK BARRY
Correspondent

Just to show that Group 1 has a well-rounded organization, your attention is called to the **Rev. Herbert Chapman**, who has been working on the production line for some time. He will spend about three weeks of the month of September at Cleveland, Tenn., as a delegate to the General Assembly of the Church of God . . . and **John Corcoran**, the bad man from Montana, who regales his comrades with tall stories after the "John Bunyan" fashion . . . and **Fred Bagnell**, old-time ball player, who played semi-pro around Joliet and Chicago even before "you and I were young, Maggie." He is a walking dictionary of information regarding the feats of the stars of yesteryear on the diamond, in the ring, and in most any other sport you care to mention . . . and **Jack Whittinghill**, the threat to any 170-pound fighter at EOP, who indulged in a warm-up fight at Appleton, Wis., on the night of August 11. In a six-round contest against **Art Wilson**, Jack gave Art such a shellacking that Art did not come up for the fifth round and forfeited the fight by a technical K.O. . . . and two nights later **Gene Revels** and **Harry Stukel** took on a couple of ambitious opponents at Bowman's Lodge in La Grange. It was just another case of too much Group 1, for both Gene and Harry won in a canter. . . . This could go on and on.

The Howitzerettes from Building 14, arrayed in their swanky new uniforms, won a softball game from the girls of Group 8 on the Isle at Wilmington August 9. **Betty Ford** and **Lola Harnack** were battery mates and the final score was 6 to 1 . . . and then on August 14, the men's softball team, also complete in new uniforms, won from a team composed of the bus drivers and the men of Group 8 by the score of 1 to 0 in eight innings.

Take **Gladys Chinski**. On a recent Sunday she played 54 holes of golf against **Sherman Butler** and almost won his brand new molars. . . . So much for sports, but here is a "man bites dog" item. **Roland Kelley** actually begged to be transferred from an assembly table to loading in the box cars, which is news in any man's group.

Alexander Rossi comes to work with his arms full of flowers for the nurses, the girls in Building 14 and anyone else who appreciates the finer things of life.

Wedding bells rang for **Mary Seeley** and **William C. Palmer** August 15. Mary is a fine girl and if Bill brings home as much money as did a race horse by the same name, the bad old wolf will never, never come around.

The Group 1 booth at the summer carnival won the first prize of $10 for being the most novel. It was just duck soup . . . no foolin'.

Comes now **Jack Larsen**, who has won fame of a sort. According to the girls in Building 14, he attended a stork shower recently and was quite taken by all that went on and from here on it gets worse. The next morning after breakfast Jack was not feeling so well so the girls took up a collection and had a stork shower for him; presenting him with a package containing stork pants, booties, other infantile accessories, and an appropriate poem on rationing.

Group 3-A

F. G. TAMBLYN
Correspondent

All the employees of Group 3-A assembled in one building to hear a talk by **Supt. John J. Fitzpatrick**. He cautioned them about talking. while away from the area, about their work and what is going on in this plant. He also mentioned several rules concerning the safety and order of this line that must be observed. He explained to the employees that their work is just as essential as that of the soldiers in the field. He said, "Be cautious in your work and report immediately any incident that doesn't seem right to you."

Arthur Clary and family are enjoying a vacation visiting friends and relatives.

Milton Harris, mayor pro-tem of Peotone, said his feud with a wrecking bar is over.

Harry Traynor has finally confessed why his nickname is "Rags."

Building 3 employees were sorry to hear of the death of their former buddy, **Russell Bull**. Sympathy is extended to **Mrs. Bull** and family.

Hyman M. Hoffman is the proud father of a son.

Ask **Guard Michael Donley** to tell you how he takes a treatment for his sore lip.

Gerald "Whitey" Hall (the Bob Burns and lunchroom cut-up of Group 3-A) has located a new barber college and is a willing victim to an ambitious tonsorial student.

Michael Cavanaugh left Group 3-A to give his services to Uncle Sam.

Sympathy is extended to **Joseph Haley**, whose mother died last week.

Richard Hayes once had an offer to play baseball with the House of David, but had to turn it down because he couldn't raise a beard.

Frank Ketz, Glenn Metz, Chris Dreiling and **Sydney Reeve** all showed up with new haircuts—it seems fall housecleaning has started already.

Guards

GENE RYAN
Correspondent

The radiant smiles seen on faces about the Guardhouse were the result of the vacation announcement. Particularly noticeable were the grins of **Corporals John Alberts, DeWitt Davis** and **Phillip Oberg**, who happened to be among the veterans who received notice of being in the first vacation quota. According to reports there will be no fish in the country when all the boys get back.

Remodeling and enlarging of the stockroom at the Guardhouse has just been completed. Also near the stage of completion is the new showerroom. Adding a bit of humor, the construction men building the showerroom were so deluged with questions as to what they were building that they hung a large sign, which read, "This is the new showerroom."

John Tucker would like someone to explain the term "your half of the road." He met someone the other night who took his half on the wrong side and as a result Officer Tucker is recuperating from injuries and his car is a total wreck.

George Hazer has been given a new nick-name "Safety-Razor." He is always saying "Gillette" me have this or "Gillette" me have that.

William Maskel, supervising sergeant, has started pistol practice on the new range. So far the results have been very encouraging, and in a short time Sergeant Maskel will have all the boys trained as qualified shots.

The Feminine Side

Harriet Knight, guard, when dressing in the early dawn, had put on one brown shoe and one black; one with a high heel, the other low. Realizing her mistake, just before inspection, she quickly dashed to the Paint Shop—was back in line with both shoes black—one especially a nice shiny black. This is real cooperation, and proves a willingness of women guards to be *trim* from foot to head.

Mrs. Pearl R. Barceloux, Kankakee, and **Treva Hall**, Ottumwa, Ia., have joined the Women Guards.

Mrs. Margaret Cavolt, Lockport, was called to Oklahoma on account of the serious illness of her mother.

Salvage

ANDY VAIL
Correspondent

John "Seneca Jack" Milus has not quite mastered the art of making his "put-put" scooter hop over the Alton tracks.

After noting the raise on haircuts, **Lester "Shorty" Devore** has decided to go back to his old trade. He admits that most of his experience comes from shearing sheep.

Arthur Voss says that God made women without a sense of humor, so that they could love men instead of laughing at them.

William "Torchy" Peebles has returned from his fishing trip. He brought back a fish that he and **Eddie Reichert** trained to follow them around the area. They were near the Kemery Dam when the fish slipped and fell into the water and was drowned before they could reach it.

Art Brisa always comes through with the mail no matter what the weather conditions are.

Henry O'Reilly's definition of a gentleman is a guy who wouldn't hit a woman with his hat on.

They wondered what made **Harlan Kadow's** tongue so black until they learned he dropped his coffee bottle on the new road which had just been oiled.

Scott W. Soper was very happy when he won a $25 prize on a radio quiz program, until they deducted the gift tax, income tax, sales tax, separation tax, county franchise tax and city tax. He had to pay the sponsor $1.41.

If that little stranger does not arrive very soon at **Donald Foutch's** home all will be as jittery as he.

Sympathy is extended to the family of **Swan Sandakl's** brother. Four members were fatally injured when their automobile was struck by a train at Legioneer, Ind.

Material Warehouse

FRANK McCORMACK
Correspondent

Charles Herbig, superintendent of the Material Warehouse Department, is back on the job after a restful vacation spent in New York. Charlie looks as though he is fit and ready to speed things along for another year without rest. Old reliable **Johnnie Baldon**, Mr. Herbig's able assistant kept the material moving right along while Charlie was away.

Last Wednesday evening an automobile was seen to bounce in and out of the ditch in front of the clock house in Group 70, and when the curious sight was investigated **Johnnie Bradecich** was found seated behind the wheel all smiles. He said not to get excited as he was going to practice a bit . . . just in case he has to drive one of those Army "jeeps" some day.

Edward Giles is back again after spending his vacation on the Kankakee River. Ed said he was fishing one day when he hooked a 42-pound catfish and was just about to haul it into the boat when his wife woke up and told him to dress and get ready for breakfast.

Harry Tilden spent his vacation in the North Side baseball park in Chicago, watching the Cubs toss away one game after another. Harry was so mad at the Cubs and the sun was so hot that he came back with scales on his forehead as big as a half dollar. Maybe Harry should stay on the job where his blood count would remain regular.

Deane E. Erickson is the sixteenth member of the department who has signed and been accepted by Uncle Sam as a Naval Aviation Cadet and is now waiting to be called into active service. Our hearts miss a beat or two every time one of these youngsters bids us good-bye, but we recover quickly and we are proud to have been associated with that kind of company. They are all determined America shall not lose this war.

Happy Birthday to You!

This is a regular feature in which the birthday anniversary of as many EOP workers as possible will be listed for 2 weeks in advance. Watch for your own.

Field Engineers

C. O. FINNEGAN
Correspondent

Well, after last week's column I can truthfully say the day it was written was "My Day" and since then every day has been someone else's. The column this week could be rightly entitled "Reverberations." But it isn't. The reverberations might reverberate.

Congratulations to **Mr. and Mrs. R. S. Cole** on the birth of a son.

To be considered every day (as soon as the a. m. fog has cleared) —What more can I do to help the war effort? I'll give the best I've got to my job and Buy Bonds.

What can I do to beat the Japs —Buy Bonds.

What can I do to beat Hitler—Buy Bonds.

What can I do to help stop inflation and high prices — Buy Bonds.

Yes! Buy Bonds! "Work, fight, give, make Democracy live." (Drew Pearson and Bob Allen.)

EOP Badge Is Sign of Trust In Its Wearer

Seal of Approval Reminder of Pledge About Safety, Talk

By Emory M. Akeman, Safety Engineer, Group 3-A

Everyone working at EOP has the very definite responsibility of doing his share in keeping this ordnance plant *safe*. It is a part of your job—a very important part of your job. Personal accidents must be avoided by all of us, and the possibility of such accidents replaced by a keen regard for safety.

The Personnel Department checked your references and your personal history before you were given a badge and assigned a number. In many instances, even the references themselves have been evaluated to determine their fitness to pass judgment on you and your past. Investigators have or will tap other sources of information to supply further evidences of your fitness to work in this Plant. You have been photographed and finger-printed as a further protection to you and this Plant.

You were given a number and a badge as an identification. But did it ever occur to you that that badge is a valuable adornment? What is it? A bit of metal? Yes! A rather homely picture? Likely! Some sort of color background as a group identification? Yes! But to you personally your badge is a seal of approval—a mark of distinction—a symbol of the confidence that has been placed in you—an emblem signifying that you are and have been a good American citizen. It is the key that opens the gates of Elwood Ordnance Plant to you—a privilege not granted to other persons.

Wear your badge with confidence and merited pride that you have been thus honored. Wear it with the fullest sense of responsibility for doing your full share to maintain safe working conditions at all times. Wear it with a sincere determination that your lips are sealed when you leave this Plant—it must be a constant reminder to you of your pledge *not to talk*.

EOP Swimmers Invited To Joliet Tourney

Employees of the Elwood Ordnance Plant and members of their families are invited to enter the annual Will County swimming meet at the Nowell Park pool at 2 o'clock Sunday, August 30.

Swimming events in four age classes will bring together Will County's leading swimming and diving enthusiasts in the annual classic.

Continuing the procedure adopted last year, the Recreation Department of the Joliet Park District under **John J. Clemens, Jr.**, has decided that swimmers in the younger age groups should be given every chance to prove their aquatic ability. Consequently, a special midget class, including youngsters of 11 and 12 years and younger, has been established.

The three other classes are: Junior, 13 and 14 years old; intermediates, 15 and 16 years old; and seniors, 17 years of age and over.

Gold medals will be presented to champions in each event with ribbons going to swimmers and divers placing second and third. Special gold medals will be awarded to the best boy and girl sportsman in the meet.

Entry blanks will be available at the Nowell Park pool. Entrants may enter at the meet Sunday afternoon. Free style, backstroke, breast stroke and fancy diving will make up the various events open to competitors.

Assisting the Recreation Department will be **Ian Crabb, Ed Daniel, Tom Crabb, Bob Semitokel** and several other swimming authorities throughout the county.

Hospital

EVELYN RICHARDS
Correspondent

What's poppin' at the hospital! It seems the past two weeks have been quite eventful.

Lucy Harkness, who has been the capable and efficient correspondent until this issue, has departed for another position. Her new adventure is a Civil Service job as secretary in the District Engineering Department at the Joliet Post Office. She had returned Saturday, August 15, and from her report as to her work, she seems to be quite enthusiastic about it; liking her fellow workers but still missing the EOP personnel. "Over hill and dale she will go, to see what she must know." Her work will not be all chicken scratches (shorthand), and finger exercises (typewriting), for she now has a chance to get more runners in her nylon hose and turned ankles from high heels. Knowing Lucy as the practical girl she is, her intention is to conform her dress to fit the field inspection trips on which she will accompany her boss.

Smiles and more smiles came from a patient up at the hospital. Guess who? Here is a hint, his leg was in a splint for a number of weeks. Won't keep you guessing. It was **Edward Gordon**, New Lennox. The reason was that **Dr. H. L. Schultz** discharged him from the hospital. The staff is still tempted to go past the room to bid him the time of day.

Another to leave August 15 was **Sylvia Hamper**, pretty brunette nurse from Group 1. She will continue her work as a Red Cross nurse. **Esther Anderson**, who has been part of the hospital personnel, has become her successor. **Lucille Nahas** has been transferred to Group 9.

And now for a bit of humor at the expense of the Laboratory girls. The hospital hall was lined with patients and out from the door came dashing three girls, followed closely by **Gordon Hunt** from the Water Disposal Plant. What happened? Why the rush? Oh, look! Mr. Hunt was caught in the gush of water. Exciting talk flew around until all four came down to the ground. When **R. R. Sidell**, the supervisor of the laboratory returned, there were four bewildered looking persons outside the door. He went on. Following at his heels were the four. Here was his comment, "Why it's only the two corks and rubber connection from the distiling apparatus." "You folks blew further than the corks." Girls answered: "All we heard was pop . . . zummmmmmm . . . puff! And we didn't wait to look back!" Would you?

Who is superstitious of the number 13? If you are, put your fears away as we have. On August 13 two crisp white bits of cheery starch started their services with EOP. We want to share the pleasure of knowing our two new nurses. The first is **Doris Petersen**, who is a graduate of the People's Hospital, Peru, Ill. Coming to Joliet, Doris was the assistant superintendent at the Tuberculosis Sanitorium. And just before coming to EOP she was doing both general and private duty.

"They say all good things come by three's." The second new nurse is **Mrs. Theodore Busse**, formerly **Dorothy Kenney**. Graduating from St. Joseph's hospital in Joliet, she did general and private duty for a year and a half. She left St. Joseph's for a position as obstetrical supervisor at the Little Company of Mary, a hospital on the southwest side of Chicago, staying there eight years. Both nurses reside in Joliet and commute back and forth each day.

"Why pick on me? . . . I picked the three flat tires to fix that one flat tire last time."

Production Planning

LORETTA RYAN
Correspondent

Don Nelson left for a two-week vacation August 14. **James Wilson** is away on the second week of a vacation.

James Murphy is enjoying himself fishing, swimming and boating at Devil's Lake, Wis. According to a postcard message. **Frank Fawell, Roy Chasteen** and **Bud Zombore** also are among the vacationists.

John Schmeh has been more than welcomed on his return from a recent illness, and **Harry Brown** was heard to have uttered the phrase "Please, let Mr. Schmeh come back soon."

Marge Gall is recuperating from her two-day upset brought about by her mother's absence from home and finding that cooking for oneself isn't so easy.

William Dronsfield has been adorning the department with beautiful bouquets of flowers, and shows no partiality among the feminine members.

Certain persons of the Planning Division of the Ordnance Department have been making frequent visits and obtaining impressions of this group. However, **Fred Mastin** is doing a little Production Planning of his own. He has several members in his "Lonely Hearts Club," consisting of **Wallace Benson, Martha Craig, Gertrude Finnegan, Mrs. Catherine Ray** and **Dorothy Maxwell**, his newest member. If anyone is interested you may obtain a card by getting in touch with "Dan Cupid" Mastin.

Mac Noren entertained her fiance, **Pvt. Bob Hodgdon**, for several days. He is stationed at Pine Camp, New York, and is a former employee of Group 1.

We all like to read the paper of the company, but few like to cut out pictures.

Mary O'Connell is reported to have cut the picture of the correspondent from each issue of *The Bomb-Shell*.

George Mayernick of Group 1 was given one day's vacation on which he managed to catch up on his sleep. The progress clerks at this Group have reported that they are now working independently of their companions, the four-legged friends. . . thanks to a well known exterminator.

"Your floors appear very tidy today, Grandma Kerzasechky!"

"Sister, the last war it was medals for plinking submarines . . . this one, it's this."

Timekeeping

NICHOLAS BELLUSO
Correspondent

In the draft? No, don't shut the window because you're in the Army. Those who have been classified and waiting induction are **Arthur Howard, Robert Renoldi, Edwin Benson, Joseph Petroske, Thomas Tomaszewski, Robert Walling, Bertel Norling** and **Bernard Smego. Carl Swanson** and **Kenneth Nelson** left recently for Army service.

Milton Treitel, assistant chief timekeeper, has left for New York on his vacation. He was accompanied by **Benjamin Sloan, Elmer Dames** and **Arthur Couch.** Others on their vacations are **John Rydman, Edward Hackbarth, Ray Lee, Orville Baron, Bruce Southcombe** and **Samuel Holzman.**

Mrs. Chuck Swanberg, wife of the timekeeper, underwent an appendectomy recently.

Vearl Heinis has received a second class petty officer's rating in the Navy and will be leaving soon.

Angeline Gunnerson, curator of **John O'Connell's** desk, will be leaving on a vacation soon. 'Tis reported she and **Robert Renoldi** are still going strong. Could be!

Edward Hackbarth almost flew with the U. S. Army. Before the war started Eddie tried to enlist. At the time, however, Randolph Field was used chiefly for training mechanics. Training of pilots was still in its infancy, so Eddie was placed on a waiting list. He got tired of waiting and got married instead. Now he expects to be called soon and with his experience in the air, may be flying for Uncle Sam after all.

Recently **Clifford Northrup** and **Homer Smalt**, accompanied by their wives and a light touch of the devil, went on a weiner roast, traveling by canoe. When they touched shore, they found they were on a golf course. Continuing down the stream, they again touched shore and found they were still on the same course. This occurred several times until "Hiawatha" Smalt got disgusted. They landed on the course and built a fire. Running out of firewood, Smalt went to look for some. He found some golf markers and came back triumphantly. Breaking the markers into small pieces, the foursome finished roasting the weiners and continued on their way.

Things you didn't know till now. . . . **Helen Kelly** used to be a school teacher. **Mary Keene** received a dozen letters from her husband the first week he was in the Army. **Mary Burnett's** husband is with the U. S. Army in England. **Lester Castongue** is the proud father of a 7½-pound boy. **Bill Dwyer** has a cute nickname. They call him "Numb." **Bill Prindle** is running around acting like a villian. He's trying to get *that* part in "Pinafore." **Robert Waddell**, of Gardner, practically lives in Joliet. **Edith Cuno** does not know whether or "weather" to accept. Her boy is a meteorologist. **John Olstrem** is returning to the University of Illinois to graduate. **Orville J. Baron** was very lucky recently when he won a small fortune playing filmo in Manteno. **Dwight Reitz** has a few muskies he could show you from his recent trip to Eagle River, Wis. **Athiel Powers** and **John Rydman** are veterans of the first World War. **Robert Renoldi, Leonard Bottomly** and **Ray Bryant** are the smoothest trio in Timekeeping. **Joseph Fitzpatrick** is the only timekeeper who wears socks to match the rest of his clothes. Very fussy about them. **Harry Knarr** is still trying to figure out what supercillious means. **Joe Baudino** has recovered from his recent illness. **George Diment** is carrying on for **Lawrence Holz** who is on vacation. **Paul Lauer** will be glad when vacations are over. He is replacing the key men while they are away.

Bernard J. McShane, assistant chief timekeeper, celebrated his birthday recently. However, he wouldn't tell us just how old he is, but 'tis said he is past the half-century mark.

Memories of a fun-filled picnic . . . **Robert Renoldi**, chairman . . . arrangement committee, **Leonard Bottomly** and **Ray Bryant** . . . entertainment committee, **Cele Harte** and **Eva Swede.** Introduction of guests . . . **Bill Prindle's** pretty wife, **Camille** . . . **Whitey Reitz's** fun-loving wife, **Betty** . . . **Clarence Pete's** wife, who works at Fuze & Booster . . . **Mary Butler's** brother, **Ivan** . . . attractive **Mrs. John O'Connell** . . . southern personality, **Mrs. Leonard Bottomly** . . . **Bernard McShane** frying onions . . . early rush for drinks . . . arrival of late members . . . softball teams formed, **John O'Connell's** team vs. **Milton Treitel's** . . . **Angeline Gunnerson** sliding . . . **Nick Earthly** losing a few pounds . . . arguments left and right . . . the Duke, in person of **Connie Howard** arrives on field . . . early massacre of O'Connell's team . . . "Dusty" O'Connell's pitching . . . Milton Treitel's hitting . . . Bernard McShane frying hamburgers . . . **Arch LaBorence** catching . . . scorekeeper **Mary Butler** . . . umpire **Frank Zupancic** . . . decisive victory by Treitel's team . . . O'Connell still arguing his side won . . . rush for eats . . . Bernard McShane still frying hamburgers . . . Nick Earthly first to food . . . pass the beans . . . everyone filled . . . introduction of all present . . . snobirds run rampant . . . egg race—Angeline Gunnerson . . . John O'Connell's egg shampoo . . . everyone singing . . . **Geraldine Graham** looking cute . . . Mrs. O'Connell playing horseshoes . . . Bernard McShane still frying hamburgers . . . more singing . . . drinking and dancing . . . show me the way to go home.

It's Different When It's for A Pal at Front

EOP Employee Sees Importance to War Job of Work Here

That much more than meets the eye, comes to the man in charge, is shown by this little anecdote related by one of them.

"Down the line, in one of our buildings," said this supervisor, "was an inseparable pair of young fellows who, I believe, represented our average worker except that we had, on several occasions found it necessary to reprimand them for not putting enough effort into their work. Wasting time was an art with them. They kidded a lot, let the work slide, and frequently took a day off to enjoy life. Quite often, the next day found them incapable of much production.

"You can imagine my surprise when the foreman of that building came to me one day with the suggestion that one of these boys be promoted to be his assistant. Because of his enthusiasm, interest and attention to safety and production, I decided to see the young man and ascertain what brought about his change of heart.

"Sure enough he was on the job and busy as a beaver. When I told him of his foreman's recommendation, he smiled proudly.

" 'Yes,' he said, 'I've been hitting the ball hard, and enjoying it.' We chatted for a while about our work until I noticed that the other lad, his best friend, was not in the building, and mentioned this to him.

" 'No sir,' he said, 'Jimmy's been in the Army almost two months now. You know, it makes things seem different with him out there needing this stuff. I mean to put *everything I have into this job*—safety, to keep up unbroken output and cut down loss of time; quality, to make sure we don't let him down in a pinch, and production that will outdo anything our enemies have ever seen. After all, that's the least you can do for a pal, isn't it?' "

Army Officers Once Stationed Here Go Far and Wide; Some Overseas

Survey Shows Present Location of Transferred EOP Staff Members; Some Now Commandants

By Seymour Kurantman

Our text for today, brethren of the EOP, is the question, "Where do they go from here?" And this thesis, sistern, will concern itself with the officers who, at one time or another in Elwood's history, were stationed here on regular duty.

It's almost two years now since this plant rose from paper plans to take tangible shape as one of the foremost ammunition plants in the country. During that period, an impressive number of officers have served their tour of duty here and have gone on to further distinction on assignments elsewhere. We all like to think, justly, that we've been more than fortunate in having had our Army staff officers and gentlemen who served with honor and distinction and who gained the affection and respect of all who knew them. Adhering strictly as they did to military regulations, forms and procedures, they nevertheless were friendly and congenial men.

The first Commanding Officer was **Maj. Robert K. Haskell,** who also doubled as Constructing Quartermaster and helped get the plant off on the right foot. It's Lieutenant Colonel Haskell now and, after a period of service in the Office of the Chief of Ordnance in Washington, after leaving EOP, he is now on field duty at Temple, Texas.

Lt. Col. T. C. Gerber (now Colonel) followed as C. O. and served brilliantly as head of both Kankakee Ordnance Works and EOP. It will please those who were unaware of the fact to learn that Colonel Gerber now holds the vitally important position of Field Director of Ammunition Plants with headquarters at St. Louis, Mo., in which capacity he directs the field activity of ammunition plants throughout the country.

Three former EOP officers are now C. O's. at other plants. **Maj. Charles G. Tolson** (captain here) heads the Green River Ordnance Plant; **Maj. Percy S. Irvine** (captain here) is C. O. at Pantex Ordnance Plant; and **Capt. Gilbert R. Griswold** (first lieutenant here—remember his big smile?) is top man at Coosa River Ordnance Plant. **Maj. John B. Watkins,** who served ably as Intelligence Officer here, is now reported to be on foreign duty. **Maj. Curtis A. Nelson** (captain here), is Area Engineer at Pine Bluff Arsenal in Arkansas; **Capt. Thomas G. Watkins** (first lieutenant here) is Executive Officer at the Gary Armor Plate Plant; **Maj. John C. Hendrie** (captain here) is now at Oak Ordnance Plant as Executive Officer; **Capt. George A. Bate** (first lieutenant here) now holds an executive post at Virginia Ordnance Works.

Other Promotions Listed

Other promotions include **Lt. Ben H. Pelton** (from second to first lieutenant), now serving under **Maj. C. G. Tolson** at Green River Ordnance Plant; **Lt. Darrell E. Hornbeck** (from second to first lieutenant) at the same plant; **Lt. Woodrow T. Trotter** (from second to first lieutenant), now at the Gary Armor Plate Plant; and **Lt. Knight S. Carson** (from second to first lieutenant), now in the office of the Chief of Ordnance, Tank and Combat Vehicle Division.

Capt. A. M. Niems, formerly on the Quartermaster staff here, is now Area Engineer at the Japanese concentration camp (so-called) in Arizona and has been promoted to Major. **Capt. F. E. Doane,** former Executive Officer, C.Q.M., here, is now Area Engineer at Parsons, Kans., **Maj. E. R. Gates,** former C.Q.M., was Area Engineer at Flora, Miss., and is now in Georgia.

Within the time available for research, a complete list was not possible. Omissions, and there likely are some, are regretted. However, the conclusion is inescapable that those who knew these men were right in their appraisal. They are swell guys who will go high in the service, men whom it was a privilege to know. And we've got more officers like them here right now.

General Offices

MAE BELLE ANDERSON
Correspondent

Ronny "Andy" Anderson, chauffeur, and **Howard Cox,** Engineering Department, seemed to have had a s-w-e-l-l time on their trip. They hopped around up north, hitting Rhinelander, Wis., Grand Rapids, Mich., and spots like that.

Alice Dressler, escort, has just had the thrill of winning a $150 War Bond. She was *much* concerned when **Mrs. Bernadette MacNamara** called and awakened her to tell the good news—just went back to bed again and slept sounder than ever.

John Schmeh, supervisor of production planning, has returned to the wheel again after being away because of illness.

George Alstadt, Labor Distribution Department, and **Mrs. Alstadt** are spending their vacation in Connecticut.

Betty Kane, Tabulating Department, is spending a week in Michigan.

Ruth Brunnings, Auditing Department, is quite busy getting ready to go to college. She plans to attend the University of Colorado.

Bob Forst, Engineering Department, has returned to his post after two weeks at Eagle River, Wis. He does enjoy telling the honest (?) story of the fish he just about had.

C. Harold Taylor, former EOP executive secretary, is vacationing in Michigan before taking on his new duties as special counsel for Sanderson & Porter in New York.

Lloyd Smith (Smitty), former chauffeur, besides having been taken into the Army has joined the ranks of the "two can live as cheap as one" club. He and **Helen Princko** joined hands forever at SS. Cyril & Methodius Church August 17.

Kathleen Conway, Engineering Department, is out seeing the country, taking in Kentucky, Ohio and neighboring territory.

Don't be surprised if **Jim Cortright** comes around with a new style hair-do. He has changed his residence from Eastern Avenue, Joliet, to quarters that also house a Beauty Salon.

Clara Cline, Engineering Department, had a real vacation . . . out all nights, sleeping all days.

Arthur C. Andrews, former Engineering Department employee, now at Charlotte, N. C., and **Bess Whitaker,** Durham, N. C., will center-aisle it August 29.

Helen McGann has resigned from the Payroll Department.

Rowena Roberts, chief of Traffic Audit Department, is spending a few days in Silver Cross Hospital, Joliet, where she underwent surgery.

Marion Shelley, Purchasing Department, has had some tough luck with her foot that made it necessary for her to be hospitalized for a while.

Ev Blade and **Audrey Mossberger** are alleged to have enjoyed the races one Friday.

"Jerry" Almon, former secretary to **C. Harold Taylor,** is now in the offices of **Harrison Smith.**

Gerald "Gerry" Wilcox, buyer, has returned after visiting in southern Indiana with his family.

Virginia Krause, Comptroller's Department, has left for Greenville, Miss., to spend her vacation at the 74th Air Base.

Mel Block, Multilith Department, has resigned to accept a position in Detroit, Mich.

Jeanette O'Toole, Payroll Department, has resigned to go to Milwaukee, Wis.

Dorothea Cheney, Payroll Department, gave up her work here to move to Grand Rapids, Mich.

Sympathy is extended to the family and friends of **Russell Bull,** investigator, who died recently.

Russell H. Watt, assistant chief, Division of Investigation, has returned from a fishing trip in Michigan. **Paul P. Tamillo** enjoyed a vacation in Canada. Wedding bells chimed for **William Palmer,** August 15.

Man Who Picked EOP Site Heads Safety

(Continued from Page 1)

was found to be necessary as surveys were completed and as design and construction progressed.

Visited Elwood Often

During the development of detailed plans for Elwood Ordnance Plant numerous conferences were held with Colonel Miles and his staff, both at Elwood and in Washington. He continued to follow closely the progress made during construction, and frequently visited the site and advised with executives of both the Army and Sanderson & Porter.

Because of Colonel Miles' selection of the site for Elwood Ordnance Plant, and his close association with the design, construction and putting into operation of the first loading lines, Elwood Ordnance Plant executives have a feeling of great admiration and respect for him and his ability. As Director of the Safety Branch of the Ordnance Department, Colonel Miles visited the plant last August 12, and it is hoped that he will make frequent visits in order that we may have the benefit of his advice and counsel.

After performing outstanding services in the Ammunition Division over a period of a year, Colonel Miles was relieved of this duty in July, 1941, and for a time was stationed at headquarters of the Fifth Corps Area, Fort Hayes, Ohio, later returning to Washington for duty in the Office of Chief of Staff. In line of duty he was in Honolulu, H. I., December 7, 1941, when the Japanese attacked the Islands. Shortly thereafter he returned to Washington, and January 15, 1942, was given a mission to Egypt from which he returned March 20, 1942. For a short period thereafter he was assigned to Headquarters of the First Army at Governors Island, after which he assumed his present duty.

Has Eventful Career

Colonel Miles was born in Cambridge, Massachusetts, December 20, 1887, and following graduation from the United States Military Academy was appointed a second lieutenant, Coast Artillery Corps, June 15, 1910.

Colonel Miles was promoted to first lieutenant June 20, 1912, and passed through all of the ranks to that of lieutenant colonel (temporary), to which he was promoted January 21, 1918, and to that of colonel March 1, 1939.

Colonel Miles' first field service was at Fort Monroe, Virginia, with the 6th Coast Artillery Company. During the period, January, 1911-May, 1917, Colonel Miles served successively at Fort Hancock, New Jersey; Benicia Arsenal, Benicia, Calif., Picatinny Arsenal and Sandy Hook Proving Grounds.

In May, 1917, Colonel Miles was appointed Chief of the Explosives Section, Inspection Division, Ordnance Department, and was stationed at Washington, D. C. On September 16, 1918, he sailed for England and served in England and France until December, 1918, as Liaison Officer for the Ordnance Department. Upon completion of this duty he resumed his office as Chief of the Explosives Section of the Ordnance Department, later being assigned as Commanding Officer of the Amatol, New Jersey, Arsenal, and then as Commanding Officer of Picatinny Arsenal, probably the most important Government arsenal.

In the period 1922-1933 Colonel Miles served as Post Ordnance Officer at Fort Sill, Oklahoma; Chief of the Explosives Department and Chief of Operations at Picatinny Arsenal; Chief of War Plans Section of the Ammunition Division, Washington, D. C., and was graduated from the Army Industrial College and from the School of Business Administration, Harvard University. Later he was executive assistant in the Hartford District Ordnance Office, Springfield Armory, Massachusetts, and July 1, 1937, became senior instructor and director of the Army Industrial College, Washington, D. C., being chosen Commandant July 1, 1939.

Colonel and Mrs. Miles make their home in Washington, D. C. They have three children: **Capt. Edmund W. Miles,** Fort George Wright, Washington, D. C.; **Lt. Richard C. Miles,** Fort Benning, Georgia, and **Mary Elizabeth Miles,** Washington, D. C.

CANDID SHOTS were taken by Robert T. McEvoy, Government timekeeper in Group 3-A, at the Summer Carnival Dance in the Recreation Building August 8, and these photographs were the result. Some of the persons shown knew they were being photographed, others didn't. See if you can find yourself in the pictures. *(Photo by Bob McEvoy, Group 3A)*

The EOP Guide Post

Classified ads will be published without charge in this department of The Bomb-Shell for EOP employees and their families. If you can offer transportation, want transportation; want to trade, buy or sell something; have a house or apartment to rent; have lost or found something, you are invited to make use of this service. All ads, space permitting, which are deemed of service to employees and their families, will be published. The deadline is Wednesday, ten days preceding publication.

RIDERS WANTED—Can furnish transportation to and from far South Side of Chicago for 3 riders working same shift as mine. On 3:30 to 11:30 shift from August 29 through September 5. Call **C. R. Carlson,** Line 4223.

ATTENTION ELGIN DRIVERS—Let's get together and help each other and our riders. I have a plan which may be helpful. If interested, call **Elmer Pilcher** at Elgin 1984-M.

LOST—Lunch Kit containing 2 pairs of glasses. Please return to Sheet Metal Shop, Group 70, or call Line 3180.

FOR SWAP—Will trade a 1937 Taylorcraft airplane, 40 h.p., Continental motor, value $500, for late model used car, outboard motorboat, speedboat, or what have you. **Ray Nemanich,** guard, Manhattan, Ill.

ELWOOD ON PARADE

TWO-TON BOMBS are filled with amatol in one of the loading operations required to prepare "block busters" for their war mission. Shown here, left to right, are Walker Findlay, Clifford Miller, Richard Dolczyk, Donald Breen and William Fulton.

AMATOL FILLING must be broken down before loading of the two-ton bombs can be completed. Michael Hoffman (left) and Charles Hubert are shown here doing the breaking down task in one of the bays of loading line buildings in Group 3A.

T N T TOPPING is used and a cavity for the booster charge is formed as loading of the 4,000 pound "block busters" progresses along the line. Shown at work here, left to right, are George Turner, Robert Glade, Lowell Hansen, Claude Chapman, Robert Potter, Joseph Relrick, Albert Agnich and Louis Paul.

ON THEIR WAY go the two-ton "block busters" after the loading process has been finished. Shown here, left to right, are Robert McNett, Robert Berton, Glenn Van Deventer, Lester Brandner, Andrew DiPietra, Luis Walker, John Larman, Jake Burns, Leo Gentile and Richard Longloy.

Vol. I, No. 8 | JOLIET, ILLINOIS, SEPTEMBER 11, 1942 | EVERY OTHER FRIDAY

Walkup Named EOP Director Of Recreation

Plans Activities In Nearby Towns As Well As Here

Edward L. Walkup assumed his duties as EOP's new director of recreation September 8, succeeding **Ivan "Tiny" Cahoon** who resigned several weeks ago to become a captain in the Army.

Mr. Walkup, who has lived in Wilmington for the last year and who has been organizing recreation centers and projects in war work areas, said his first steps would be conferences with his staff with a view toward setting up a plant-wide recreation council composed of representatives from the various groups and departments.

The new director is well acquainted with recreation leaders throughout northern and central Illinois and plans to co-operate with these leaders in providing recreational activities for EOP workers in the communities in which they live. These projects will be in addition to those which will be centered in the EOP Recreation Building.

Organization of bowling facilities probably will be Mr. Walkup's first undertaking, so that devotees of this sport will be assured of an opportunity to bowl with the beginning of the season.

Mr. Walkup is married and has one son, **Edward, Jr.**, 14 years old. He is a graduate of North Central College, Naperville, Ill., and of Akron (Ohio) University. He spent three years on the stage in stock, dramatic presentations and musical comedies.

For several years, Mr. Walkup was director of recreation for the Goodyear Tire & Rubber Company in Akron. During that period he supervised baseball, basketball, softball, football and tennis activities, as well as dramatic, musical and choral groups. Bowling, boxing and wrestling also were features of his program for the 40,000 employees.

Following his work for Goodyear, Mr. Walkup attended the National Recreation School in New York and then entered municipal recreation work. Assignments included executive director of the War Camp Community Service, Highland Park, Ill.; recreation director at Centralia, Ill.; industrial recreation director at Waukegan, Ill.; assistant state director of leisure time activities for the State of Iowa, and supervisor of Portage Park, Chicago Park District.

Employees May Still Enter Classes

Although registration for the classes for war workers conducted this fall and winter by the University of Illinois in Joliet and other communities was scheduled for last week, those who failed to enroll may be able to make provision for study by communicating with EOP's Safety Department in the Administration Building.

The original number of classes contemplated was reduced to those in which there seemed to be greatest interest and any one interested is requested to call Line 4227 for complete details.

MECHANICAL MASSIVENESS of the steam boilers in EOP's nitrate of ammonia plant is shown in this photo by the contrast between the silhouetted figures of John T. Williams (left) and Willis Donovan and the furnace fronts.

Groups 4-5 Picnic Proceeds Go to USO

Net proceeds from the picnic of Fuze Groups 4 and 5 at Rockdale August 23, amounting to $159.43, have been turned over to the United Service Organization, it was announced by **T. M. Burns**, general superintendent of Groups 4 through 9.

In a letter to **Harrison Smith**, resident partner for Sanderson & Porter, asking that the check for that amount be sent to the USO. Mr. Burns said that operators in the two groups had requested such a presentation be made.

"We are very proud," said Mr. Smith in acknowledging Mr. Burns' letter, "of the spirit of co-operation uniformly shown by Elwood Ordnance Plant people and the part they play in all worthy causes. This spirit is demonstrated by Groups 4 and 5 in making this additional contribution, which less thoughtful people might have diverted to some less worthy cause. Congratulations and sincere thanks to you all."

John M. Joyce, Joliet USO chairman, said in acknowledging the contribution, "The boys who are fighting for your liberty and mine do appreciate the splendid work being done back home by such good citizens as yourselves."

Heads Women Guards

Mrs. Gladys Armstrong was appointed head of the women guards August 29. She is a former record librarian at Manteno State Hospital and came to EOP in March. She succeeds **Bernadette McNamera**, who left EOP for the west coast muttering something about romance and marriage and that wonderful man in Seattle.

1,300 Plant Workers to Learn First-Aid

Nearly 1,300 EOP employees began first-aid training in Red Cross classes conducted in adjacent communities last week.

Rollin T. Read, EOP safety supervisor, said this total was one of, if not the largest groups of industrial workers ever to enroll for Red Cross first-aid training.

Most of the classes will continue for five or six weeks. The largest single group was the 700 enrolled in Joliet. In those communities where less than 15 employees have applied for training, Mr. Read is co-operating with the respective local Red Cross leaders in obtaining a sufficient number of other citizens to make classes possible.

EOP Scenes Pictured In Firepower Magazine

Elwood Ordnance Plant received national publicity in the current issue of *Firepower*, official publication of the Ordnance Department, published in Washington, D. C., for the employees of all ordnance plants throughout the country.

Charles F. Berry, editor, and **Fred Toy**, photographer, spent three days at EOP last month and the results of their work are represented by a series of pictures in the current issue of their magazine.

Pages 4 and 5 of the publication carry photographs made in Group 3-A and in the Fuze and Booster Area. A photo on Page 7 shows an EOP woman guard "frisking" girl operators on their way to work in a primer line.

Persons pictured in the photographs may obtain additional copies of *Firepower* if they telephone the editorial offices of *The Bomb-Shell*, Line 4206.

Many complimentary comments have been made on *Firepower's* new dress, two colors and bleed pages. Mr. Berry said that other EOP photographs may be expected in an early issue.

Anniversaries Of EOP Begin In September

Contract for Plant Awarded to S & P Two Years Ago

September of 1942 marks the beginning of a series of second anniversaries of important events in the history of the Elwood Ordnance Plant.

Sanderson & Porter, designers, builders and operators of the plant for the War Department, received a communication, termed a "speed-up" letter, September 13, 1940, from the War Department asking that initial steps in getting EOP underway be rushed.

According to the New York *Herald-Tribune* of that date, the "speed-up" letters, which were approved by the National Defense Commission, were for the purpose of enabling the project operators to proceed with preliminary activities without delay while the unsettled details of the contracts were worked out.

Twelve days later, a contract for the Elwood plant was awarded to Sanderson & Porter and the New York *Times* of September 25 announced the news in this fashion:

"A $14,000,000 War Department contract went to the New York firm of Sanderson & Porter for construction of an ammunition loading plant near Wilmington, Ill., to supplement the TNT and DNT plant which will be built in the same area."

Sanderson & Porter representatives arrived at the site in October, 1940, and ground was broken a month later.

Service Committee Resumes Weekly Meets

Weekly meetings of the EOP Employees Service Committee have been resumed, following a summer adjournment. The meetings are held each Thursday at 12:30 at the cafeteria and problems affecting the employees as the result of new conditions developing from the war are considered.

Members of the committee are **John J. Cole**, comptroller, chairman; **E. A. Evans**, chief field engineer, vice chairman; **Rollin T. Read**, safety supervisor, secretary; **Vernon C. Bailey**, editor of *The Bomb-Shell*; **George F. Bent**, personnel director, and **Dr. H. L. Schultz**, medical director. By authority of his position as director of recreation, **Edward L. Walkup** will assume membership on the committee at the next meeting September 17.

Executives to Meet at Cafeteria Sept. 17

Department executives are scheduled to hold their first informal get-together at the cafeteria at 6 o'clock Thursday evening, September 17, it was announced by **A. E. Frosch** and **E. A. Evans**, the committee named to launch a series of meetings of this type for the fall and winter.

Victor M. Dagenais has been named chairman for the first meeting, with **R. T. Bassett** serving as steward. Other members of the arrangements committee for this initial session include **E. K. Cortright, John Walker, A. J. Balston, C. O. Finnegan** and **V. L. Knudson.**

Killed in Action

Earl Morris, Utilities Department employee at the EOP Round House, was informed officially September 3 by the United States Marine Corps that his son, **Pvt. George Knox Morris,** 24 years old, had keen killed in action. It is believed that the gallant young Marine gave his life for his country in the attack which wrested the Solomon Islands from the Japs.

Others at EOP have felt the sting of death of loved ones, it is true, but Mr. Morris is the first in the EOP family to suffer the death of kin in the Nation's armed forces. He will not be the last.

Former EOP employees now in the armed forces number more than a thousand. Husbands, fathers, sons and brothers of those who work here increase this number ten-fold.

War is grim. War work is no less so. The strain is severe. Transportation, housing conditions, changes of shift, unfamiliar tasks . . . all are perplexities not conducive to ease of mind nor satisfaction. But, aren't they rather petty in the light of those words . . . *killed in action?*

Isn't it our natural reaction that with the help of God and our fellow-men we'll do a grim job as it was never done before. We can't all be soldiers, sailors or marines, but we can vow to do our particular war task better than even we ever thought it could be done.

Killed in action . . . an epitaph, yes, but likewise a challenge to you, to me, to all of us.

THE BURNING PIT

By Scorchy

To you and you and you this may sound like a commercial advertisement but at the risk of my standing in the noble clan of the Fourth Estate, I wish to announce I am going to form a club. This is going to be a real club . . . in fact it is going to be spelled with a capital "C" . . . *Club* it shall be.

For many years through the heady hypodermic of boom times and even down through the depressive but lovely 30's, that inner urge to bring together fellow men of common bent and instinct has been raging within. But alas, the vigilant eyes of Better Business Bureaus, blue sky law prosecutors, deputy sheriffs and other protectors of the common good have drawn a bead on your aspiring scribe and kept him confined to the doubtfully lucrative sphere of the written word. But now I have them where I want them.

Our new club, with a capital "C," shall be known as the "Ten Minutes To Joliet Club," still with a capital "C," comprised entirely of unapprehended outlaws whom these civil authorities would like to bag in one fell swoop.

The principal qualifications for membership is the proven ability to start at any given point at EOP and drive to the center of Joliet in an automobile in ten minutes, with the reservation, of course, that the tour shall be conducted at a time when a shift is going off or coming on duty. Adequate penalties will be provided for those who chisel their way into this lofty organization by attempting to qualify in the middle of a shift when the road is encumbered by only a handful of gravel trucks, a half dozen or so large freight vans, and two transient combination reapers moving on to the next spot of harvest.

The ultimate accomplishment of this organization will be in diametric opposition to the Life Extension Institute. This will not constitute news to that large group who are already eligible because they have for many months been doing their best to extinguish the spark of muscular activity that flickers beneath their apparently empty crania.

There is good and sound reason to believe that this numerous, but as yet unorganized group, bears a collective grudge against the guy who ventured the assertion that life begins at 40. Either that, or they think that the 40 refers to speedometers instead of birthdays.

The as yet unelected Finance Committee of our Club has very wisely promulgated the by-laws on initiation fees. They have arrived at a sliding scale expressed in terms of life insurance varying inversely as the time required for the prospective member (or should I say victim) to cover the route set forth earlier in this announcement.

The Membership Committee is well prepared to cope with that handful of specialists who will clamor for class privileges because of their ability to cover the whole route on the left hand side of the road without once ducking back into their own lane to let an innocent autoist pass in the opposite direction; it is expected that others will ask for special ratings based on suicidal but successful passing of oncoming vehicles on the extreme left shoulder of 66A without as much as scaring the nearby tethered cow or removing either hub cap from the poor victim, who in this case is most literally "in the middle." They, too, will be covered . . . with sod some day soon.

There will no doubt be many arguments against the encouragement or even the open acknowledgment of these gasoline driven nit-wits, but there are hidden advantages, my friends, which defy the naked eye of you saner forty-minute travelers. The life insurance features of our initiation fee will at least soothe the survivors of our more energetic members and will tend to materially improve the solvency of local undertakers. Also, the inevitable agitation for a club house will break out after the second or third meeting and ultimately the branch insane asylum will take form in brick and mortar. As long as they live, the members will be lavish in their support of their newly found group. The very nature of the organization will behoove each member to enjoy life to the fullest while he can. Social affairs will follow and some nice evening all the members will be gathered together to celebrate the fact that they can still celebrate. That's where I come in. I'm going to sneak up and lock all the doors and throw the d - - - - keys away.

PASSES AND REJECTS

By Vernon C. Bailey

Additional changes in *The Bomb-Shell's* reportorial family are regretfully announced this week. Yes, regret for the departure of some, but compensating pleasure with the spirit prompting successors to carry on.

One of the originals, **Lee Reynolds,** who has been correspondent for the Personnel Department since the paper was launched, was compelled to give up his assignment when he was transferred to the Administration Building to assist in the office of the Executive Secretary. Mr. Reynolds, a graduate attorney, has the best wishes of his newspaper associates in the larger field which he has entered.

Loyal, dependable **Jack Garnant,** who used to represent the High Explosives Department before his transfer to Personnel, pinch hitted for Mr. Reynolds in this issue.

Robert Pierson succeeds friendly **Dick Lowery** for the Inspection Department. Dick's plans to leave so as to return to school were speeded up by hay fever.

Comely **Cele Harte** is a welcome addition to the family, substituting for **Nicholas Belluso** in the Timekeeping Department while he is on vacation.

★

Writing Club Contemplated

The Bomb-Shell is considering the organization of an EOP Club of Service Correspondents as a fall and winter activity. It may be possible to have a weekly meeting, at which a light lunch would be served on a pay-as-you-go basis, to write letters to former EOP employees now in the armed forces. Addresses would be obtained from the large list now in the files of *The Bomb-Shell.* If you are interested and would like to participate in the meeting to formulate plans, telephone Line 4206.

★

Credit Where It's Due

A doff of the hat, perhaps even a low bow, is due to the loyal members of the staff of the Recreation Department who have carried on for several weeks pending the appointment of a successor to **"Tiny" Cahoon.** Any welcome to the new director, **Edward L. Walkup,** would be incomplete without calling attention to the splendid staff ready and willing to help him. Such a situation, in poker language, is like having an ace in the hole.

★

Stormy Weather

Reference to recreation recalls the USO benefit bridge party of August 28 in the Recreation Building. At times, it appeared the affair was a bathing beauty contest or, at least, a wading competition. One attractive player, marooned at the telephone while calling her residence to ask that windows be lowered, calmly discarded shoes and hose and waded to a dry spot to don them again. Two others, wives of officers it is assumed because of the direction of their journey, nonchalantly strode through mud and mire barefooted. When they emerged, it seemed as though they wore the high-topped shoes of another day. When the next call for Commandoes is issued, we know a few feminine prospects to nominate.

★

Correspondents Seek Help

Departmental correspondents of *The Bomb-Shell* would appreciate hearing from their group associates in the way of proposed items of news. After all, these correspondents are merely your representatives, your spokesmen, if you please. They can't know all of the interesting things you are doing unless you tell them. *Obey that impulse.* Call your reporter now.

Safe Practices Are Contributions Of Importance to U. S. War Effort

Humanitarian Reasons for Safety Now Augmented by Hard, Cold Facts of Reality

By Rollin T. Read,
Safety Supervisor

We have undertaken to assure the military victory of the Allied nations over the Axis countries, and there are matters we must everlastingly keep in mind.

First, let us review in part a recent proclamation of the President of the United States of America:

"The nation is confronted with a rapidly rising accident toll. At the present rate, the total number of deaths from accidents this year will again exceed a hundred thousand.

"By taking a heavy toll in life and property, accidents definitely hinder our National Defense effort. To insure maximum efficiency we must have maximum safety 24 hours a day—not only at work, but also on the highway, at home, everywhere.

"The troubled times in which we live must not make us callous or indifferent to human suffering. These unusual times require unusual safety efforts.

"Now, therefore, I, **Franklin D. Roosevelt,** do call upon every citizen, in public or private capacity, to enlist in this campaign and do his part in preventing the wastage of the human and material resources of the Nation through accidents."

Probably less than one-sixth of our carelessness is of an occupational nature; there is twice as much carelessness in our homes and certainly twice as much on our streets and highways. The loss of time due to a severe injury to an employee is as keenly felt, whether it happens at home, in traffic or at work.

During the next 30 minutes, somewhere in our country at least six persons will meet violent deaths—600 others will be accidently injured, 20 of whom will suffer permanent disability. The direct cost of these accidents will reach nearly a quarter of a million dollars and this occurs every half hour.

We all realize that the accidents occuring thus far have underlying causes which are rooted mostly in bad habits. We can't do anything about the accidents that have happened—but there is plently we can do about the accidents that are likely to happen today, tomorrow and next week. We are thankful that the safety efforts on the part of so many employees and supervisors have already prevented many unnecessary accidents and we call upon all of our people to think seriously about any careless habits that they may have formed in the past. These must be controlled, in fact, they must be rooted out of our daily routine as our personal contribution to the war effort.

Although in the past our safety motives have been chiefly humanitarian, today we find ourselves in a situation where we must face hard and cold facts. Yes, we want to save human life and suffering; we want to save legs, arms and eyes. But in addition to that, we want to save "our way of life,"

(*Turn to Page 12*)

RECREATIONAL activities at EOP will be supervised by Edward L. Walkup, appointed director this week.

Chuckle in War-Time Is Worth Something

An Associated Press dispatch from Pine Bluff, Ark., August 29, which appeared in many daily newspapers throughout the country, brought a chuckle to EOP employees when it was read here. Under the headline of "Here's What Happened When Company's Name Was Misinterpreted," the AP story said:

"Sanderson and Porter, a construction company building a war plant here, has this application on its pending personnel file:

" 'Understand you is in need some Sandersons and Porters at the plant. I am a porter and like know how much you pays. Also what is a sanderson and how much does it pay?' "

"He wants to know why they don't drop chunks of Nitrate instead of bombs!"

Former EOP Employees Write from Hawaii, Alaska, South America

Soldiers Express Pleasure with News from Home; Tell How Tabloid Helps Find Friends in Camps

Letters from Hawaii, Alaska, South America and ships at sea indicate that *The Bomb-Shell* is getting world-wide distribution as the result of the policy of mailing it to all former EOP employees now in the armed forces.

The letters tell of the recipients' pleasure in getting news from home and how the paper has helped some of the service men to find former EOP associates now stationed at the same camp.

Excerpts from as many letters as possible are used in each issue of *The Bomb-Shell* and readers are invited to visit the office of the paper in the Recreation Building to see any letter in which they may be interested.

"As you probably know," wrote **Pvt. Robert L. Fitzgerald** from Hawaii, "we men who are stationed 'in the field' get very little news of our friends at home and when we do it is sometimes quite late. Now instead of writing home (how I'd love to be there) to inquire about my pals, all I have to do is read *The Bomb-Shell*. I am enclosing a snapshot taken of your's truly enjoying himself on a lazy Sunday afternoon. It's a rugged life we lead, but the experience is well worth it. Hope you continue to send your paper to me and your product to Japan."

LAZY Sunday afternoon in Hawaii with *The Bomb-Shell* is being enjoyed by Pvt. Bob Fitzgerald, according to this snapshot enclosed with his letter from the islands.

Writing from the Naval Air Base at Sitka, Alaska, **John F. Heenan** of the U. S. Marines said he receives *The Bomb-Shell* there regularly and that it is "sure good to see the pictures of guys and girls there. Sure wish we had some of those good looking girls up here."

Comments on Guards

"I was employed at the plant until January 22," added the marine. "Worked in the Electrical Department with good old **Charlie Evans, Whitey Kennington** and **John Wagner.** Also over at Building 7, Group 1. My Dad, **Emmet Heenan,** and brother, **Bun Heenan,** are employed there now. **Chief M. C. Baughman** and his boys sure have a time, don't they?"

Pvt. William P. Slattery, whose official address is in care of the Postmaster at New York, wrote that he was "proud to have made the acquaintance of many whose pictures were in one of the issues." A letter from his father, **William Slattery,** Kinsman, Ill., said that Private Slattery has been transferred from Panama to British Guiana in South America.

"I began work at the Elwood plant," said **Seaman Andrew E. Humenik,** U. S. Coast Guard Base, Charleston, S. C., "a little after the ground was first broken. I was employed as a carpenter at Group 3, Group 61 and Group 9.

"After all the form work was completed, I received steady employment in Group 1 as a first class maintenance carpenter. My foreman all the while was **Kenneth Chandler.** Then came the call to arms and I enlisted in the U. S. Coast Guard and am now on observation, rescue and patrol duty on Coast Guard Cutter 70005 on our Atlantic shores off the coast of Charleston and Georgetown, South Carolina.

Sure of EOP Bombs

"Sometimes its tough sailing, but we don't mind anything for that man with a big white beard and an American flag in his hand. Just keep on making the soup and we will dish it out to the enemy. Am keeping a diary of our actions while on duty. Maybe I will be able to furnish some hair-raising stories for your wonderful paper."

"Right now," wrote **Cadet Burton C. English,** Lubbock, Tex., "I'm in my advanced training and hope to get my wings in about six weeks. At the end of that time I have hopes of getting into a bombardment squadron and maybe carry a few EOP bombs to the proper place and maybe do my small bit to help you get rid of some people whom we mutually dislike. Anyway, if I ever do carry any bombs labelled EOP I can be very sure that they will be OK and they will probably make a bigger hole than the next one. Tell the boys in Group 1 hello for me."

"I was associated with **Charles Herbig,**" related **Corp. Glenn G. Wheeler,** Camp Gruber, Oklahoma, "working under **Pat Patterson** in the Accounting Department in the tin shop. It was a pleasure to have worked for and with such a grand group of men. I shall always remember my employment there.

"I came into the service last May 13 and like Army life very well. I was sent from Chicago to Camp Grant and from there to Fort Sam Houston, Texas. I have been in the Finance Department all the time."

Referring to *The Bomb-Shell,* Corporal Wheeler said he regarded it as "a credit to the employees, as well as to Sanderson & Porter."

Paper Finds Friends

"I wish you would give my best regards to **Eddie Copp** and **Harry Mosely** and the rest of the gang I used to work with in the loading plant of Group 3," asked **Pvt. Patrick Benoit,** Camp Gordon, Augusta, Ga.

"Please accept this delayed letter of thanks and appreciation, said **Pvt. LaVerne A. Smalt,** Fort Riley, Kansas, "for your kindness in sending me each issue of *The Bomb-Shell* which gives me, as an ex-employee of your organization, many happy memories and thoughts of dear old EOP. It gives me so many hours of pleasure. Having once been a member of **Chief M. C. Baughman's** department of plant protection I selected as my branch of service the Military Police."

"The boys read the paper and get quite a kick out of it," wrote **Sgt. James W. Milus,** Aberdeen Proving Grounds, Maryland. "Another thing that is helpful is that by the paper I have met fellows here in camp that I used to work with and might not have met them if it weren't for the paper. I'm glad to hear that everyone is doing his or her part to win the war and I want them to know that I'll try to do my best to aid my country."

SERVICE overseas is now the assignment of Pvt. Raymond P. Button. His mother's letter is published on this page.

First in Air Force

From aboard the U. S. S. Thomas Stone, somewhere in the Atlantic, **Seaman William C. Walters** wrote that "it sure makes a fellow feel good to hear what's happening back home and also to know that everyone there is working hard to beat the Axis. To everyone in Group 66-A and also throughout the plant, let's keep 'em flying."

"I was proud to see my son's name on your honor roll for men in service," said **Mrs. Raymond P. Button, Sr.,** Joliet, who added that her son, **Pvt. Raymond P. Button,** is now in foreign lands, having written that he had landed safely but without revealing his whereabouts. "Thank you for sending my son the news and hope that victory will be ours soon."

"I was the first to enlist in the Air Force from EOP," related **Corp. Louis L. Silazy,** Pendleton Field, Oregon. "I was employed in Group 1, Building 4, up to seven months ago. I know the men in that group are doing their part to help blast the Japs and Nazis to Kingdom Come. Give my regards to all the boys at EOP and also to the two dearest friends I have there, **Rose Rosynich,** Payroll Department, and **John Daley,** Building 10 or 16. I am in Motor Maintenance Aviation, attached to a Heavy Bombardment Squad."

Prepares Big Bombers

"We are fixing the big planes to carry your product that I am sure will do the trick," said **Pvt. John Dalman,** Duncan Field, San Antonio, Texas, who added that he had seen the photograph of the EOP service flag in the Joliet *Herald-News.*

Pvt. Otto R. Heiden, Camp Crowder, Missouri, said he would like to see some of the old gang he worked with at Richards' Farm. "I was employed there 17½ months," he added, "working under the orders of **E. G. McAloon.** I was inducted into the Army June 3, and am in the Signal Corps."

Pvt. George Mason, Scott Field, Illinois, said he would like to hear from his former colleagues in Group 1.

"Just by looking over *The Bomb-Shell,* there must be a big improvement made at the plant since I left," declared **Crop. Peter Dinelli,** Camp Edwards, Massachusetts. "Our outfit is all packed and ready to leave at a minute's notice, where to no one knows. Our outfit has been formed into a Boat Regiment. You people are doing a fine job, so just keep it up. I'll also say as much for the employees; you make 'em and we'll shoot 'em."

Passes Tabloid Around

"I have moved from Jefferson Barracks, Missouri," said **Pvt. George B. Rockett,** "to Buckley Field, Colorado. I am going to Armorer's School here and have studied a lot about bombs and bomb fuzes, which is where you fellows come in, so please keep pushing them our way."

MARKING instead of keeping time is now the occupation of Pvt. Edward Thomas Henry, former EOP timekeeper, at Jefferson Barracks, Missouri.

Others from whom letters and cards were received include **Pvt. Robert O. Olson,** Aberdeen Proving Ground, Maryland; **Pvt. Fred M. Padley,** Paterson, N. J.; **Cadet Earl G. Konrad,** Cimarron Field, Oklahoma; **Pvt. Louis Fritz,** San Bernardino, Calif.; **Sgt. E. W. Cockbill,** Indiantown Gap, Pennsylvania; **Pvt. Stanley Curran,** Camp Polk, Louisiana; **Pvt. Louis W. Kirkham,** Camp Forrest, Tennessee; **Pvt. William E. Case,** Jefferson Barracks, Missouri; **Pvt. Ervin F. Born,** Scott Field, Illinois; **Pvt. Lawrence E. Ross,** Camp Callan, San Diego, Calif.; and **Corp. Walter W. Plumb,** Fort Benning, Georgia.

TABLOID DISTRIBUTION is the bi-weekly task of J. C. Catton, shown here classifying copies of the last issue of *The Bomb-Shell* by the towns to which they are mailed. After the papers are addressed to the homes of employees in the Payroll Department, segregation of all those directed toward each of more than 300 communities is required.

IN NEW QUARTERS in the west wing of the Administration Building, the office staff of the Army Inspection Department is shown here. Pictured are Bernard Kapsch, Helen Boula, Dale Lorentzen, Ralph Weiss, Kermitt Long, Carl Anker, Geraldine Ward, Paul Smith, Bernice Shroba, Stanley Eisler, Clara Wehner, chief clerk; Ethel Dirker, Roy Scherer, Delores Dagon, Linnetta Parry, Catherine Tomlianovich, Warren Weithofer and Esther Noffke. Not present were Clara Brennan, Ernestine Thompson, Herry Shirtino, Max Krup and Robert Cryder. Laboratories and testing quarters are in adjoining rooms.

Ordnance

HELEN McGINNIS
Correspondent

Hear ye! Hear ye! All fashion editors—the latest apparel for men while playing baseball is brown shorts and blue shirts. **J. P. Filips** of Stores & Transportation modeled it at the last game . . . right pert, too. All the gals in the bleachers were envious of his good looking legs . . . too bad Ziegfeld is gone.

Ask **Lois Dix** where she was the night of the blackout . . . everyone else talks about it . . . but it sure is a dark secret with her.

Clayton Craig, the poor guy, was so enthusiastic during the baseball game with Sanderson & Porter that he broke his right hand . . . so sorry.

When duty calls, the Stores & Transportation gang really pitches in . . . they all had dark circles under their eyes during the night shift . . . yeah . . . no foolin' . . . the report for Washington went out on time though.

Good-byes will soon be in order for **Rosemarie Lewis** . . . she leaves to join Cook County Hospital pill dispensers September 20. Bet there'll be a lot get sick when they get a gander at Rosemarie in starched linen . . . she'll make a good looking Florence Nightingale.

Evelyn Dix's second lieutenant was home on furlough from Oklahoma for five days . . . no wonder she went around the office singing.

Lt. W. J. Durrengurger's smile is surely missed now that he has gone to Aberdeen, Md. . . . troop duty in store for him.

Calling all detectives . . . Find out why **Lt. M. G. Brandon** came to work the other a. m. with a gal's hat in his hand . . . with a little help maybe the code could be deciphered.

That good looking messenger boy, **Donald Butts,** seems to think that the gals in Braidwood are the "fairer" sex. . . . Who's photo were you displaying?

Geneive Nemanich *is* the new gal in Personnel . . . she is taking **Kay Deering's** place.

Why does **Gerry Kestel** get so red about the ears when three knocks are tapped out on a desk? It has been a puzzle in these here parts for quite awhile . . . Gerry should give out.

Rumors have it that the beautecus gals in Payroll are practicing for their baseball game with the officers. With that gang at bat . . . lots of bets on 'em . . . what chance would the officers have?

Maj. A. C. Johnston was missed while he was away for a rest . . . glad he's back in harness again.

Tommy Machetti sure has a good time in that Ford of his . . . always laughing and carrying on.

From the Timekeepers

Back from their vacations and looking in the "pink" are **Frank Bravato, Chester Tomes** and **Ed Reichert.** Frank and Chester spent time in Farmer City, Ill., eating fried chicken and watermelon . . . Ed says he spent considerable time at the Brookfield Zoo studying rare species of animals. . . . (Could it have been wolves?). . . . **Bob McEvoy** and **Bill Henderson** have gone fishing in Wisconsin . . . get your ears ready for some big ones? . . . Hope they have better luck than **Lyle Ingraham** and **"Torchy" Peebles** did.

Flash . . . **Bert Folk,** Group 2, and **Tom Wharrie,** Group 3, are preparing for their duel . . . time and place will be announced later. **Louie Schuck's** new title . . . "chief expeditor of missing numbers." . . . Did you know that **George Margetts,** Group 1, and **Dave Horwich** have sons in the armed forces? Good news . . . **John "Hugo" Green's** wife is on the mend after spending some time in the hospital.

Have you ever noticed **Mary Christensen** . . . how can she be so thin and eat so much?

Hot Flash Items

The Personnel Office has been invaded by that cute guy, Cupid, again. . . . **Edna Millweard** is now **Mrs. Robert Eaton** . . . since Sunday, August 30.

Also heard is the jingle jangle of wedding bells along the Adjutant's Office. . . . **Hazel O'Connor** and **Art Kossack** have decided to try double harness . . . **Sy Kurantman** has returned from a western trip . . . looks chipper and reports having a good time . . . took in all the sights including some of the better known nite spots of the glamour town of Hollywood.

Who Has the Flit?

Emma Shea spent a week touring the suburbs . . . Aurora, Joliet and all points West. . . . Personnel welcomes her back . . . also **Flossie Babecke** of the same department . . . she had a few days off before her boy friend took off with the Army. . . . **Lorraine Hilling** has been absent for quite a while . . . seems as though that demon hay fever has her down.

Helen Harmon of Payroll spent some time with her "Mom" in the southern part of the state. . . . **Marge Jesberger** had a short vacation, but claims she enjoyed all of it. . . . Most of the guys on vacation have gone sightseein', therefore not much of that "oh, hear ye, of the big one that got away" stuff.

The following guys have donned the uniform of Uncle Sam: **Bill Poole** from Ole's Gang . . . **John Hlavajcik** from Inspection . . . also **Edward Mitchell** and **William Watson, Jr.** . . . Good luck, kids, and don't forget them there pitchers.

Ann Gubbins of the Auditing Aristocrats returned from her vacation with a peach of a sunburn. . . . Don't tell how much trouble it is trying to get a Florida tan in seven days . . . didn't I almost kill myself?

We wonder why . . . **Betty Jane Jensen** frowns when the song "Three Little Sisters" is played . . . **Frank Levanduski** can always pick the winners of the "bangtails" . . . **Ken Chapman** is so vague about where he spends his evenings . . . **Betty Lou Page** is always "dog gonned"?

Inert Storage

CHARLES MANN
WILLIAM DENVER
Correspondents

Noon-day chatter out in the buildings has brought little to write about. Nicknames of the pushers at North Inert were learned however. They are: **Chester "Slim" Moberly, Milton "Milt" Korach, Harvey "Muscle Bound" Mall, Ray "Ra" Hess, John "Jolly" French, Leonard "The Goon" Spooner, Winfield "Muck" Arthur, William "Willie" Denver, Frank "Zup" Zupancic, George "War Horse" Newton, Charles "The Man" Mann, Richard "Dick" Ashworth, Charles "Taxes" Wardell** and **Charles "Horses" Gorham.**

The steak-fry club is anxious for another outing . . . in all probability there will be many before the season is over.

The Department is proud of these men who have entered the service of Uncle Sam . . . **Richard "Tennessee" Stanley, Lawrence Purkiser, Clarence Rexroth** and **Thomas L. Gineris.**

Thomas Thomaszewski, timekeeper, who has a pet saying something like this, "Of late you are early . . . you used to be behind before . . . but now you are first at last." Thomas is leaving to be with Uncle Sam in the Air Corps . . . rather thinks he will be a bombardier.

Phil Anderson has his knapsack all packed and is ready to go to serve (his country) . . . he is 50 years of age and the only draft for him is beer.

Charles Wardell broke his suspenders while putting up a picket fence at North . . . he looked around and said, "Why isn't this a high board fence?"

When **Supt. A. P. Balston** welcomed **Richard Ashworth** back to his desk and all was about to run smoothly, **Charles Gorham** upset the happy family by declaring he was vacationing next . . . he really needs it . . . tells the flies to get off the phone.

What happened to the Garden Club at South . . . the weeds are getting higher and not a bloom in sight.

Third Baseman William Kokal will be absent for a few weeks . . . the sick list claimed him with appendicitis.

Charles Mann, the groom to be, is about to appoint a personal secretary to care for all the questions popped at him about the September wedding — the official date is the 19th—the happy girl is **Margaret Hayden** of the Traffic Department.

Edward Zarley is welcomed backed to his duties . . . sick list claimed him for a few days.

Group 2 fell victims to the Inert Storage ball club. The inerts rolled up 11 runs while Group 2 scored only 4. They claim their better players were absent. That's the best excuse they could offer and they are stickin' to it.

Group 1 also ran into a surprise when Inert Storage piled up 9 runs and allowed them only 1. The game with Group 66, scheduled for September 1st, was cancelled. Inert Storage is now tied with Group 70 for first place in the Second Round . . . each having won 3 games and no losses.

Ordnance Inspection

GERALDINE M. WARD
Correspondent

Lt. A. G. Resch and **W. F. Douville** returned recently from a business trip to Washington, D. C.

While stationed at EOP, **Lt. F. J. Weis** made many friends and many regretted to bid him farewell when he left for his new assignment at the Sun Flower Ordnance Works, Lawrence, Kan.

Dolores Dagon has joined the office staff.

From all indications, **Robert Irwin,** inspector in Groups 64-66, is the possessor of a four-leaf clover. On August 15 he shared the War Bond by tying with **Stanley Eisler.** This pay period he was again fortunate in holding the pay check containing the highest poker numerals and was therefore awarded the bond.

Clara Wehner, chief clerk, celebrated her birthday anniversary August 29. Her co-workers remembered her with flowers, candy and gifts.

Paul Smith, divisional inspector, Operations, Division 1, is remaining close to the telephone in his office these days awaiting to hear information concerning a *future* President of the U. S. A.

Arthur Kossak, a former employee in **L. E. Meyers'** office and a recent transfer as clerk to South Inert Storage, has joined the ranks of benedicts. **Hazel O'Conner** of the Adjutant's Office and Mr. Kossak exchanged marriage vows at the residence of Miss O'Connor, Kansas City, Mo., September 3. Their honeymoon was spent in St. Louis and enroute to their residence in Joliet, the newly-weds visited in Mr. Kossak's home at Sesser, Ill.

On Friday, August 28 (during their lunch period), **Geraldine Ward** and **Bernice Shroba** entertained in the Recreation Building at a pot-luck dinner for **Veronica "Rennie" Ryan,** secretary of the Recreational Department, who resigned to resume her teaching in the Joliet schools. In addition to the hostesses the following girls were present: **Ethel Dirker, Jane McVay, Lois Ressler, Helen Bowling, Janet Chapman, Linetta Parry, Betty Wallace** and **Catherine Noonan.** Miss Ryan was presented with a gift from the group.

Iva Wellman, Helen Onderisin, Lorraine Luttrell and **Bernice Ksiazak,** Group 5 staff, have formed a quartet specializing in the singing of "I GOT THOSE LONESOME BLUES." Their fiancees were all inducted into the Army at the same time.

Elinor "Naturalist" Gudath collects all species of animal life. Last week Elinor left for home with two frogs and one toad captured in the wilds of Group 5. Enroute home, she stopped in with a friend at a neighborhood greenhouse and was quite impressed by the coolness and beauty of her surroundings. While her friend kept the proprietor occupied, Miss Gudath, a staunch believer in kindness to animals, calmly released the frogs and the toad near the florist's special attraction, a lily pond. Now Elinor avoids a cerstreet near her home.

Bob Cretcher, assistant chief at Group 7, has always shown some indications of being a Beau Brummel, but no one suspected that beneath that sleek exterior there beat the heart of a Lothario until recently when he grabbed hold of a "Love Capacity Tester" in Chicago. In practically no time at all, he generated enough steam to take the Queen Mary to Europe and back, cook enough toast for a six-course breakfast, and if the overworked machine hadn't finally blown a fuse, you might now be reading of the second great Chicago fire with Cretcher in the role of the asinine arsonist. Bob, however, wasn't the only one who had his attitude revealed; previous to this, **Audrey Waldvogel** registered such a low capacity that other guests donned overcoats, and she was promptly offered a job by the management as an auxiliary refrigerating plant.

The engagement of **Georgia Bayrd** to **Park D. Paxton,** Group 8 inspector, was announced August 16 by **Mr. and Mrs. George O. Bayrd.** The announcement came as a climax to a delightful weekend house party at the Bayrd's summer home at Lake Catherine, Ill. **Ronald Sachs, Carl Anker** and **Mr. and Mrs. Howard Johnson** were among the guests.

Ronald Sachs, former assistant leader at Group 8, flew to St. Louis to begin training in radio communications at Scott Field. After preliminary training he will be rated as an aviation cadet. On August 26, the Government inspectors of Group 8, shift 3, attended a farewell dinner given in his honor. His fellow workers presented him with a gift.

ARMY INSPECTION chiefs are shown here in conference. Left to right are pictured W. F. Douville, head of the Ordnance Department's civilian staff of inspectors; Lt. D. A. Yeoman, assistant to Army inspector of ordnance, and Lt. A. G. Resch, Army inspector of ordnance.

Group 1 Picnic Called Success By Thousands

Boxing, Wrestling, Ball Games, Rides Feature Big Affair

By Jack Barry

August 30 has come and gone but, to paraphrase the song, the memory lingers on and will for long. It all comes about because on that date Group 1 put on its first annual picnic and you may take the word of any one of the several thousand persons who were there that it was not only stupendous, but even colossal. It was held at Sunset Park, just six miles north of Lockport, and the facilities there were found to be all that could be desired. No expense was spared to provide the means required to make the day an enjoyable one.

There were a ferris wheel, merry-go-round, and a roller ride and not even the oldest inhabitant remembers having seen such as these at a private picnic heretofore. There were games of skill, bingo, and even a game or two involving a small element of chance. There was a safety station in charge of **George Long**, Safety Department, which handled that angle of the situation admirably. Free balloons were passed out at this station for all the little boys and girls. For their further edification, there was a real live clown in the person of **"Shorty" Bowman.**

The first-aid station, sponsored by the EOP chapter of the Red Cross, directed by **Mrs. D. M. Hoffman**, had a very busy afternoon. There were cut hands and numerous bruises as well as many a little tummy which ached and ached on account of too much stuffing with hot dogs, ice cream and pop.

Several of the children failed to qualify for the Air Corps. They just couldn't take it when the ferris wheel took them to the top and they required emergency treatment so they could fill up all over again. Mrs. Hoffman's aides at the booth were **Mrs. John J. Cole, Mrs. John Walker, Mrs. C. W. Wade** and **Mrs. C. P. Bohannon.**

There was a dance with big-time music provided by the group's own "Bursting Howitzers." There was a pop and ice cream stand which did a land-office business There was a bar complete with bartenders who knew their way around and a kitchen that was a delight to the eye and a source of genuine satisfaction to the inner man.

We could go on and on with "there was" and still not tell the whole story, but there was fun. Group 1 triumphed in both of the softball games. The Howitzerettes, eye-filling in new red uniforms, trampled the Fuze and Booster girls into the dust, 10 to 2 in seven stanzas. Batteries for our side were **Betty Ford** and **Lola Harnack.** Our men's team, the Howitzer Boys, defeated a really fine team representing Group 3 by the count of 7 to 3 in seven innings. Batteries for we folks were **James Hilt** and **Mike Kelly.**

The high point of the whole show was in the afternoon when a first-class athletic show was presented. This consisted of four good boxing matches and a hair-pulling wrestling match, arranged by **Davey Rosen.** However, before the bouts were put on, **Dr. F. Binzer,** as able an announcer as you would care to hear, introduced the various dignitaries, functionaries and brass hats.

These included **Edward J. Walsh,** honorary chairman of the picnic committee and general superintendent of EOP loading lines; **John J. Cole,** comptroller; **Joseph E. Salmon,** general chairman of the picnic committee and superintendent of Group 1; **George Gibson,** chairman of the grounds committee and assistant superintendent of the group; **Mark Davis,** chairman of the advertising and ticket committee and assistant superintendent of the group; **Robert Kelly,** chairman of the entertainment committee and also an assistant superintendent of the group; and **Henry D. Dougherty,** superintendent of Group 3.

Each of the boxing bouts was for three rounds and in accordance with the requirements of the amateur rules, each was declared a draw. The first bout was between **Harry Stukel** and **Bobby Winchell** at 126 pounds. The referee was **Maurice Flynn** and timekeeper, **Emmett McGuire.** This turned out, as most exhibitions do, to be a real fight as there had been some difference of opinion between the two boys as to which was the 126 pound champ of EOP. It was as good a fight as any one ever paid real money to see and in our opinion the nod goes to Harry. Then came two little fellows, **Donald Aussec** and **Albert Delrose.** They were introduced as paperweights, but one must have been tissue or the other one cardboard for there was considerable difference in size. The little feller made up for lack of size by his willingness to mix it up and it turned out to be a good draw.

The next bout, between **Jack Whittinghill** of the group and **Charley Persisity** of Joliet at 165 pounds was the best of the afternoon. These fellows were sluggers and they knew their way around inside of a squared circle. It was a rough fight but a clean one and we hand the duke to Jack, although the margin was not great. Toward the end of the third round they put their heads together in a clinch and when Referee Rosen attempted to separate them they joined forces and the two of them chased Davey around the ring. However, he was quite a boxer himself in former days, and managed to ward off their good-natured blows.

The final bout was between **Gene Eevels** of Building 10 and, believe it or not, the same **Jack Whittinghill,** who is a glutton for Sunday work. It was a good, fast fight and Jack won again because of his expert ring knowledge and because of the fact that he floored Gene for a short count with a solar-plexus punch that is ordinarily good for a knockout.

The wrestling match between **Frederick Phelps** of Joliet and **Wally Mayo** of the group was much better than the usual grunt and groan affair. It was a combination of assault and battery, mayhem, sabotage, and attempt to kill. Mayo was badly outweighed, but he stayed right in there throwing everything but the kitchen stove and **Marty Gleason,** the referee, was forced to declare the match a draw since neither man won a fall within the time limit.

Among the guests invited were: **Harrison Smith, W. E. Canniff, R. T. Bassett, W. A. Buck, E. C. Carlson, H. H. Clark, A. M. Lockwood, C. J. Coburn, Mr. Cole, E. K. Cortright, E. S. Craik, Vic Dagenais, J. F. Dolan, A. E. Frosch, Roy Healey, E. O. Huey, I. E. Jackson, G. R. Kintzel, V. L. Knudson, W. F. Luehrs, Dagmar Peterson, G. B. Pumphrey, R. T. Read, Charles Reilly, J. C. Schmeh, J. F. Smid, St. Clair Smith, Mr. Walsh, John Ryan, William Riordan, Thomas Singer, Roy Wilhelmi, William Ryan, George Mowitt, E. A. Evans, Dr. H. L. Schultz, Joseph L. James, Claude Sayre, Elmore McAloon, Joseph H. Henderson, Clarence J. Taylor, Orville Evans, Clyde L. Utley, A. J. MacLellan, James J. Murphy, John J. Fitzpatrick, Thomas M. Burns, Charles Herbig, Joseph Stark, George F. Bent, Chief R. W. Mortenson, Chief M. C. Baughman, Robert A. Brown, J. A. Cocker, G. M. Morrison, John Walker, P. L. Deylitz, Irving Harbour, William D. Whaley, Jr., Robert J. Partridge, E. J. Egan, Frank Werhli, Mr. Dougherty, A. P. Lombardi, Joseph P. Zagade, Seymour Kurantman, W. F. Douville, Harold Bowler, John Olson, J. P. Filips, Cecil D. Wheeler, Bess Moore, Josephine Kush** and **Helen Harmon.**

Army officers at EOP and their wives were also on the invitation list, including, **Lt. Col. Don M. Hoffman, Maj. A. C. Johnston, Capt. D. P. Tunstall, Capt. G. A. Grant, Capt. J. I. Bach, Capt. J. A. Hardy, Lt. A. G. Resch, Lt. C. E. Beilharz, Jr., Lt. R. E. Pinnick, Lt. F. G. Kuether, Lt. W. J. Durrenberger, Lt. M. G. Brandon, Lt. Sol Jacobs, Lt. C. P. Bohannon, Lt. C. R. Crandell, Lt. D. A. Yeoman, Lt. F. J. Weiss, Lt. R. T. Johnson** and **Lt. John H. Lucas.**

A $25 War Bond was given away as a gate prize. The lucky winner was **Cynthia Camp** of Building 14 and the presentation was made by Mr. Salmon September 2.

At about 8 o'clock the main transformer at the park went haywire and from then until about 10:30 it was as dark out there as the axis prospects. A good part of the crowd remained to enjoy themselves during the black-out and after the lights came on again they carried on from there.

Great credit is due to every member of the committee and to every willing worker who gave of his or her time to help out at the various booths and concessions. It was a red letter day for the plant itself and for Group 1 particularly and a grand time was had by all.

The following committees did all of the planning and most of the work:

Advertising and tickets: **Mr. Davis,** chairman; **Ralph Emerson, Howard Fread, George Galvin, Robert Bryant, Walter Sorley, Clarence Beck, Midland Slack, Snap Ahrens, Jack Barry** and **Fred Harris;** grounds: **Mr. Gibson,** chairman; **Edward Kien, Joseph D'Andrea, Arthur Salvatore, Bernard Fornango, Dominic Pastori, Harold Mannell, Ken Chandler, Rudolph Mandat, Owen Gaddey, Russell Girot, John Kinsella, Robert Nielson, Albert Ehringer, Wm. McRoberts, Charles Connors, Robert Hartley, Joseph Smadj, John Mackender** and **Robert T. Kelly;** entertainment: **Mr. Kelly,** chairman; **Joseph Shepley, Franklin Lewis, A. P. Lombardi, Mary Taylor, Manley Brayton, Jack Burdette, Michael Kelly, Charles Anders, David Gianuzzi, Matthew Wykoff, Lee Redell, Thomas Shay** and **Mr. Rosen.**

GLEEFUL AFTERMATH to the Group 1 picnic was observed when Supt. Joseph E. Salmon presented Cynthia Camp, Building 14, with a $25 War Bond awarded as a gate prize at the picnic. The presentation shown here was observed by a majority of Group 1 employees assembled at shift change time just after a fire drill had cleared the buildings.

HOWITZERETTES is the appropriate name of the Group 1 girls' softball team shown here. Pictured left to right are: Back row, Lola Harnack, June Kemp, John Burdette, manager, Helen Jubera and Jo Anbach; middle row, Helen Maher, Mary Klen, Frances Kren, Eilene Fettz and Cecelia Beby; front row, Jeanette Salzman, Betty Ford, Mary Gerka and Mary Dresser.

Field Engineers

C. O. FINNEGAN
Correspondent

This department's most prolific teller of tall tales, **Murray Jordan,** wins all with the following fish story:

"We were fishing in the St. Lawrence River and after a fair catch were ready to drag in the nets. Some time elapsed, however, before we started the haul. The difficulty encountered in pulling up the nets indicated the presence of something other than wet nets. When the haul was nearly complete the *"big one"* could be seen entangled in the net. Landing him was a fight, but when he was ready for the tape and scale we found him to be 11 feet, head to tail, and to weigh 600 pounds."

This may sound fishy but it's a fact. Your reporter has seen the picture and the foregoing is authentic. The fish, oh yes, it was a Sturgeon.

After several successful seasons as coach and teacher at the Wilmington High School, and working the past summer in this department, during which time he played with the EOP baseball team, **Jack Horenberger** has taken up his new position as basketball and baseball coach at Illinois Wesleyan University.

The Field Engineering Department has received a vacation postal from **George E. Mowitt.** Mr. and Mrs. Mowitt are enjoying a trip to their home in upper New York state, where they will visit daughter, **Barbara,** and their many friends.

Euart B. "Lucky" Colby surely *nose* his business.

Marion Ring didn't give up fishing after his many threats and as a result was finally rewarded. Last week-end he caught a 36-pound catfish. Wow! Sure, his story is believed.

Richard Shambo returns to the University of Indiana this month to resume his studies. **Laverne Foran** and **Myron Benham** are returning to the University of Illinois.

EOP'S FINEST are exemplified by those guards stationed at the Administration Building. Shown here at the main entrance, left to right, are Corp. Clare J. Cosgrove, Charles S. Griffin, Harry A. Larsen, Elmer G. Martinson, Edmond H. VanWinkle and Benjamin R. Buchar. Guards Griffin and VanWinkle preside at the pass desk.

High Explosives

MARJORIE HOWERTON
Correspondent

Andy Perino, Group 68 foreman, has returned from his whirlwind vacation of seeing baseball games, waiting for that certain horse to come in at the races, golfing and other interesting sports.

Frank Perino really takes his baseball seriously—he was so engrossed in that well known sport that he became entangled with himself—probably after a fly—result—he's recuperating from injuries suffered.

Jim Orr, Group 68, was the recipient of a farewell gift from his co-workers—he leaves soon for the Navy.

Word has been received from **Charles Talty,** who is honoring the state of Wisconsin with his presence, that he's having the time of his life.

Williams Bay, Wis., was the main "resting place" during **Bea Bovee's** much needed and well earned vacation.

Fishing was the main diversion during **Joe Studyvin's** (Group 65 foreman) recent vacation.

"Petey" the mascot in Group 63 just loves to roam the reservation — even a good part of **Johnny Zopf's** lunch wouldn't induce him to stay home. But "Petey" is a changed pup now—some fellows do have a way with dogs—just as **Ed Dites,** the old dog tamer; he really knows how.

Roby Johnson resigned as material checker to resume his former duties as teacher of commercial art in one of Chicago's public schools.

Leigh Tarbell, Material Department, is vacationing for two weeks with his parents in Spokane, Wash.

Russell Keys, truck driver, is doing a swell job "subbing" for the burning pit foreman.

Tommy Hall, helper on an explosive truck, will have to wear glasses (probably colored) or Group 1 will have to build wider doorways.) Certain attractions in that group cause Tommy to mistake the walls for doors.

Robert Crow has left Group 63 to join the armed forces.

Hugh Connolly returns soon to the University of Illinois where he will enter his sophomore year in civil engineering.

Joseph J. "Whitey" Znidarsic is leaving 63 to enter Joliet Township High School.

High Explosives Laboratory

It's a hot, sultry September, and it doesn't seem possible that it's less than a hundred shopping days till Christmas, but blue **Marcia Mitchell** is already counting the minutes till that gala day because hubby, **Pvt. Jim Mitchell,** has promised to be home at that time to help her move the furniture around so they will have room for their Christmas tree.

Papa Dick Orndorff and **Mama Mary Orndorff** and **Richard Jr.,** are about to make Kankakee their home, sweet home. Dick is already lounging around in his palace, and Mary and baby will be there soon to add the homey touch.

Marjorie Kinser is her name—and she's one alright gal — and she's also the Lab's newest acquisition.

Ronald "Clark Gable" Beck is in a harried state trying to decide which air service he'll enter. There are going to be some happy angels if Ronald gets in those clouds!

Versatility is definitely *not* a virtue when it comes to **Herb Hafele's** "ability" to render sweet notes on his violin — (ask the neighbors). They (the neighbors, and **Eleanor,** his wife) will bear up under the strain till Herb tries to out-Crosby Crosby.

For a young fellow, **Rayford Winters,** the beaker boy, has a lot of "ambish." He is attending NYA school and rumor has it he is one expert welder.

New government chemist at the Lab is **Alexander Bernard Becker,** who commutes all the way from Berwyn in one or the other of his trusty cars.

Nelson Tippett and **Palmer Overholt** are going to move to Kankakee, maybe. Their departure from Joliet would probably bring profound relief to their landlady, who is bewildered by their behavior and is frightened of that 250-pound bar bell that Tippett has tucked under his bed.

Charles Clifford is involved in litigation over an inheritance, the lucky fellow.

GROUP 3

WILLIAM BERINGER
Correspondent

All are rather proud of the fact that the Group 3 booth took first prize (for the amount of tickets taken in) at the recent carnival dance. Just goes to prove the old adage "class will tell." The prize money came in handy, too, as it will augment the athletic fund, and be used to buy additional equipment for that prize-winning Group 3 ball team. Pardon is asked while all take another bow.

Donald Mancini, formerly foreman of Building 16, is the new assistant superintendent. He takes over the midnight shift and the well wishes of the entire group.

Assistant Superintendent Steve Colfer, who has had the graveyard shift for many months, is now becoming accustomed to daylight. He now rides his bike on the afternoon trick.

Henry (Brisk) Risk, electrician foreman, has some versatile material. **Tom Maher,** the Hollywood technician, is one. The other is **Donald Riley** who recently returned from building airports in Africa. Riley tells this story of the natives who helped on construction:

"One day we had some cement to haul. I showed the natives how to fill the wheelbarrow, then wheeled it to the forms, unloaded it and brought it back. Think you can do it now, I asked them. They nodded vigorously, loaded the wheelbarrow again, picked it up, and set it upon the head of one of the men who walked to the forms with it!"

Riley added, in spite of the few cents a day paid to natives, the cost of concrete construction was higher than that done by white laborers making a dollar an hour.

Bill Sheets, Building 4, says he's really come up in the world—he made it from first to third floor in a hurry.

Al Holhich, mechanic, is an old duck hunter—perhaps orders for fall delivery are timely.

What electrician had *daily trouble* and a taxi cab ride to work?

One worry is, when will smiling **Henry "Little Boy Blue" Risk** have his house painting job finished?

The Gun and Rod Clan are busy again, **Vernon Worden, Al Pohl, Harl Son** and **Willard Reed,** assistant superintendent, ironed out the whys and wherefores, so . . . there will be food this winter.

Thanks are due Mr. Son for those dandy walks through the ramps, though they did take a week longer than his estimate.

Group 1

JACK BARRY
Correspondent

Harry Leclaire of the box car gang was married August 29. . . . **"Losing" Louie Peters** lost a small brace on the job one day and worried himself sick; he was that anxious to get back to work. . . . **Frank Gray** of Building 16 is authority for the statement that 16 had 100 per cent attendance at the Group 1 picnic but that 10 was far short of that mark . . . and **Harry Bierman,** just to make it unanimous, asservates that the pourers of the same building were there in toto. . . . Harry also says that although **Harry Lieth** boasted that he would attend, he was far, far away and, *here's your reporter's nickel's worth,* this Lieth guy is the young fellow who told a chap by the name of Barry what a dumb reporter Group 1 has.

Mary Taylor, assistant to the foreman in Building 14, worked hard to put the picnic over successfully, just as did **Al Lisy,** the chef, who worked hard and long to feed the hungry throng. . . . What kind of a gag was **Joe Stock** from Morris pulling by walking around all day with an empty beer can. . . . When **Mrs. John Thill** was asked what sort of a home fellow John was she said, "He's been swell for many years but today he's swelled with too many beers."

Jerry Knowles, who suffered a broken ankle while returning from work on June 6, will be back on the job ere this item reaches the public. . . . Just to add a spectacular finishing touch to the picnic, **Walter Leichert,** maintenance man in Building 10, tangled with an automobile on the highway and came off second best, suffering bruised legs.

Davey Gianuzzi, formerly chief clerk in the Production Planning Department, has went and done it. He went away to the army and all his friends wish him well. . . . **Larry Reedy** of the warehouse gang was married August 29 and brought around a box of 15-cent cigars so the lads could help him celebrate. . . . **William McRoberts** reports that he and the Mrs. were presented with a fine daughter August 9. . . . **Alice Busby** underwent an operation August 29, which is one of the odd ways to start a week-end.

Leonard Maynard Standley of Building 14 left August 30 to join the Coast Guard. . . . Young **Joe Shepley,** nephew of **Joe Shepley,** general foreman of the group, has gone away to resume his studies at University of Illinois and **Inspector William Floyd** has left for University of Kentucky to take up a course along military lines.

Inspection

ROBERT PIERSON
Correspondent

Auspicious by their absence from this column are the beaming countenance and by-line of the former correspondent, **Richard Lowery.** Dick, it seems, was obliged to leave weeks in advance of the day he had set, a severe touch of hay fever being the determining factor. Dick is now enjoying a vacation in the more favorable clime of northern Wisconsin, following which he will enroll in Joliet Junior College.

Miracle of miracles happened just last week here in the office . . . believe it or not, but **Harold Troupe,** gage technician, finally "popped for cokes."

Back from a ten-day vacation and looking "fit as a fiddle" is the scale superintendent, **William Kirban.** Bridgeport, Conn. (his old home town) was "Bill's" port of call, and he reports things pretty much the same as when last he left, the only exception being the predominance of black-outs, dim-outs, air raid precautions, etc.

Also back from a week's "furlough" is **Stella Jaworski,** secretary to **Superintendent A. J. MacLellan.** Stella reports the rest helpful . . . and, oh yes . . . her tires, patches and all, are doing fine, thank you.

And have you seen **Robert C. Wilhelmi,** assistant chief inspector, of late? Bob's a mere shadow of his former self, having been limited to a diet of canned vegetables, canned fruit, canned meat, canned . . . yes, you've guessed it . . . "the little woman" took herself a bit of a vacation, visiting parents and relatives in New York, and as a result, Bob's become most proficient in the wielding of that handy gadget called a can opener. All's well now, however, as Bob's wife has once again resumed her duties as chief cook and bottle washer of the Wilhelmi residence. It goes without saying, however, that she has a job ahead of her if she is to get Bob's waistline back to the point where he can discard those two big horse-pins he's been sportin' of late.

Congratulations to **Ralph Pratt,** senior inspector of Group 8, on his marriage to **Lucille Kosick** of Joliet August 8.

Congratulations are also in order for **Nora Lee Smith,** Group 8 inspector, and **Jerry Manning,** also of Group 8. Yes, that's right, the knot has been tied.

Heard a good one on **Florence Stoltz,** Group 8 inspector the other day. Seems as though the little lady was in such a big hurry to get home from work last week that in the excitement she boarded the wrong bus. Why the rush, you ask? **Pvt. Sterling Stoltz,** "the boss man," was home on a furlough from Jefferson Barracks, Missouri.

Lorraine Ostrem, secretary to **Bud Brown,** has quite a system when it comes to judging prospective "dates." Her selection, it is rumored, is based largely upon the number of courses in the dinner that goes with the date. Lorraine can be found most any night of the week dining at any one of the better spots in Joliet.

The steak fry planned by the Fuze and Booster inspectors has been temporarily postponed, but *not* because of inclement weather. Seems as though **Jim Tyler's** (senior inspector, Groups 4 and 5), uppers and lowers are on the fritz, and who wants to sip soup on a steak fry.

Seems as though **Bryant Brown,** office manager, ran into nothing but bad luck on his recent visit to the Windy City. "Bud" was a full hour late in keeping a dinner date with the little woman, was almost run down trying to hail one of the few cabs available for the All-Star football game, sat through three quarters of the same game and saw absolutely nothing (due to the heavy fog that settled over Soldiers' Field at game time, *so he says,* and to top it all off, was denied admittance to a few of Chicago's brighter spots because he *"left his draft card at home."*

Harold Rouff, Group 61 senior inspector, has acquired a nickname since moving into his new place of abode, the Foreman's Quarters. "Babe" is the affectionate handle tendered him by the boys . . . "Babe" Rouff . . . get it?

Believe it or not, but **William Hartman,** Fuze and Booster senior inspector, is one of those real dyed in the wool hep cats. Bill's collection of recordings made by name bands is one of the largest your correspondent has ever seen. And what's more, Bill can give you the name of the ride man on each and every recording.

SOS Call Issued by EOP Singers

The SOS flag . . . *meaning step out singers* . . . is waving frantically over the Recreation Building.

For several weeks, a very enthusiastic group of young musicians has been working faithfully on the score of a popular comic opera, but the group is too few in numbers to make a complete cast for the show. Undaunted by numerical strength, the members of the group have displayed unusual pep and enthusiasm at their Thursday night rehearsals.

However, it takes a required number of voices to present a comic opera and a plea has been issued for twenty more singers, ten men and ten women, who can read music fairly well and who have good voices. Participants are promised a lot of genuine fun and association with an enthusiastic group.

Those who consider themselves eligible and are inclined to heed the call for help are asked to call the Recreation Department, Line 4109, at once.

TENSE MOMENTS were frequent in the softball game between the girls of Groups 4 and 5 and Group 8. The photographer caught the girls shown here during one of them. Pictured left to right are Barbara Vilt, Group 4; Marilouise Lambert, Group 4; Julie Polich, Group 4; Helen Fritz, Group 4; Virginia Hientz, Group 4; Laverne Halverson and Georgia M. Hulse, Group 5.

Group 3-A

F. G. TAMBLYN
Correspondent

Don't forget to sign up for the intra-Group bowling league. Games are to be played at the Recreation Building. It is hoped that each building will have a team for each shift. Sign up so you can take part in some real competition.

It's been heard that **Orbie Lauderdale**, engineer, hails from the mountainous South and, while enroute to this section of the country, stopped in Peoria and traded a squirrel gun for his first pair of shoes. This, of course, explains why Orbie's shoes look like sandals when he gets them shaped to fit.

The boys from building 10 are wondering what Lee Holland has under the hood of his Ford. Every morning he is seen pouring half a gallon of oil into it. Could it be a Diesel?

Mr. and Mrs. Gerald W. Hall celebrated their 16th wedding anniversary September 5.

Everyone is looking forward to that big "Bocci Ball" contest near Wilmington. **Joe Serena** has been advised to look out for those women umpires.

Why is a certain guard in this Group called **butterfly?**

Howard Gueller is back on the job after spending a vacation with his family visiting his folks in Wisconsin.

Kenneth DeBehnke and **John E. Rossi** have resigned to give their services to Uncle Sam.

It has been heard that a second "Thurston" is working in the 3-A lines. **Richard Martin** and **Cecil Heck** are supposed to be in the know.

Otis Wasson is enjoying a vacation eating fried chicken and watermelon.

Phillip Bedore, George Hausser and **William McCall** left by plane for a hunting trip in Wisconsin.

Officer Olson, the boy with the shiney shoes, left September 6 for a two-weeks' vacation in Colorado.

Cecil Sticklund is the proud father of a daughter, **Darlene.**

Francis Rathje left for the Army and entertained several friends at a farewell party, August 28.

Guards

GENE RYAN
Correspondent

Latest contributions to the armed forces from the Guards are **John Krogstad** and **Arthur Metz.**

A very interesting letter was received recently from former **Dispatcher Louis Dante.** Lou has just completed his training course at the Radio School at Scott Field and has been told how EOP is working diligently to keep the boys supplied with ammunition.

The Guard Department received six new squad cars to replace those old veteran cars that blazed the dirt trail when the plant was in its infancy. **Corp. Earl Goodknecht,** who has charge of the squad cars, was so attached to those old ones that he personally kissed each one good-bye.

Great interest is manifested in the Pistol Range. As soon as each qualifying list is posted, the boys are crowded around it. This is a good incentive for the rest of the boys as there are some very good scores posted.

Norman "Muggsy" Morgan, Guardhouse custodian, who recently returned from his vacation, had some very interesting stories to relate. However, what attracted him most were the large dime pies they serve in Peoria.

Some very famous names are represented on the Guards' roster. For fistic lovers, there are **Sgt. John L. Sullivan** and **Gunnar "Battling" Nelson.** For baseball fans, there are **Dispatcher David "Home Run" Baker; Roy "Single X" Fox; Floyd "Flash" Gordon; Donald "At the Bat" Casey; Donald "Connie" Mack; Philip "Goose" Goslin; Arthur "Ted" Lyons; George "Buck" Ewing; Roy "Dizzy" Dean** and **Joseph "Eddie" Collins.**

Also there are: **Joseph "Rip" VanWinkle; George "Ma" Perkins; Walter "Ralph Waldo" Emmerson; Wayne "Nancy" Garner; Harlan "Fats" Waller; Robert "Ben" Franklin; Byron "Soup" Campbell; Eugene "Moon" Mullins; George "Frank" Buck; Clifford "Bing" Crosby; Rushen "Saint" Nicholas; Samuel "Wayne" King; Patrick "Wrong Way" Corrigan** and **Raymond "Walter" O'Keefe.**

It is understood, via the grapevine, that there is a quartet of Guards who sound like they are direct from Old Heidelburg. Namely: **Krueger, Mueller, Eickelkraut,** and **Wetterhahn.** Personally known as **Sergeant Matt, Sergeant William, Kenneth** and **Jack** respectively.

Not to be over-shadowed by the foregoing, the Swedish trio is controlled by **Martinson, Hansen** and **Christofferson** . . . correctly known as **Elmer, Arthur** and **Hilmer,** respectively.

Dispatcher Casimir "Spike" Klafta spent a very successful afternoon at the races recently. The bang-tails evidently were running true to form.

With the Women

Sympathy is extended to **Helen Harbison** whose mother died August 29, at Harrodsburg, Ky.

All were sorry to see charming **Chief Bernadette McNamara** leave to accept another position out West.

Congratulations are extended to the new **Chief, Gladys Armstrong,** who has an equally charming personality.

The Police Women have added four more new members to their force . . . **Beatrice Bodah, Eileen Harris, Fay Melville** and **Marion Hubert.**

Group 61

JOE MOTTA
Correspondent

Paul D. Newey, shift inspector captain, has moved to Detroit where he accepted a position with the Treasury Department's Bureau of Narcotics. His friendly personality and capable leadership are exceeded only by his prowess in feminine relationships.

Frank Webber and **Robert Brumbach** have been ill.

Attention, Wilmington! **Tony Ganz's** farm was flooded with nine feet of water—and it isn't polluted.

Gene Hambleton and the former **Gwendolyn Flessner** were married in St. Louis August 18.

Don Godich has joined the Marines.

William Dooley won the fat man race in Rockdale, beating **Clifford Kidney** by a belt buckle. The prize was $10.

Mr. and Mrs. Robert Leadingham are proud parents of a new daughter.

Willis Lee is back working after four days' leave.

Gene Eichbichler really believes in crashing the gates. Nothing like using a box car to do the job!

William Johnston suffered an injury to his leg.

Lee Dordan is settling affairs before enlisting.

It seems as though **Melvin "Blondie" Moore** is having motor trouble on Pay Day—something about a "miss."

Oiler James West will be examined any day now. You know the rest.

Ed Rashid enjoyed his trip to Michigan last week. Ed likes to be taken for a ride.

This is news! **Bob Karges** squeezed two tires out of the rationing board.

Dick "Clumsy" Unmisig fell out of a boat while fishing at Flint Lake, Ind.

Bob Plese has been called to join Uncle Sam's boys.

It would be nice if: **Marion Carter** drove cautiously through Joliet . . . we could hold 800 kings, like **Henry Kiep,** in a pinochle game. . . . **Ed Hasse** went boat riding over the week-ends instead of Thursdays . . . more could enjoy floor shows at the Hob Nob — **Loren Horrie** can. . . . **Lorraine Nelson** took to modeling . . . we had a hat like **Harvey Steffes.** . . . "thin man" **William Brown** would tell us how he gained twelve pounds . . . when driving the bus. . . . **John Strufe** wouldn't hit the only bump in the road . . . you knew that **James Halpin** is fishing in Wisconsin. . . . **LeRoy Abell** didn't eat so much . . . we knew why **Edgar "Pretty Boy" Bartlett** doesn't visit "Mikes" anymore. . . . **Ed Schellhorn** would dial the telephone instead of the cigar lighter. . . . I could sell my canary for thirteen bucks—hoping **John Smith** might be interested . . . more knew why **John McElvain** is studying pathology . . . you heard that **Ed Agnich** is cornering the pork market by purchasing two squealers. . . . **John Giacomi** could clock in and out of the hospital . . . you knew that **Steve Juricic** enjoys his days off at Oswald's Grove and **Hugh "Hopalong" Pemberton** is walking without crutches. . . . **Walt Boughton** had more riders and **Don Coldwater** could whistle with his new teeth . . . we knew why **Ed Schellhorn** has to have a stooge. . . . **William Smith** enjoys his transfer to Fuze and Booster.

CONCENTRATED OBLIVION to the downpour outside marked the play of the more than 300 women who attended the USO benefit bridge party at the Recreation Building August 28. A section of the 80 tables which filled the auditorium floor is shown here.

SUCCESS SMILED on the efforts of this committee which arranged the USO benefit bridge party for the women residing in the EOP area and their friends at the Recreation Building August 28. More than $250 was raised for the United Service Organization of Will County. Pictured left to right are Mrs. A. C. Johnston, Mrs. E. A. Evans, Mrs. John J. Cole, chairman, and Mrs. Paul L. Deylitz.

Material Warehouse

FRANK McCORMACK
Correspondent

Mr. and Mrs. Karl Neifing are back from a vacation well spent. Karl says Niagara Falls is worth seeing any time of the year. He promised his wife before they were married that he would take her to the Falls in the Spring and he would take her to the Springs in the Fall.

Thomas Costello spent his vacation signing up with Uncle Sam. He is now listed as a Naval Aviation Cadet and is waiting a call to active service. The Material Warehouse employees wish him good luck and ask him not to forget to write and let them know how he is getting along.

Donald De-Witt left for the Army last week.

The boys in the warehouse have all promised to help elect **Louis Piano** who is a candidate for public office in his home district. Piano said he is having a little trouble collecting votes and here are some of the reasons why: One old woman said she wouldn't vote for a Piano because she couldn't play one anyway. Another old fellow said he wouldn't vote for a Piano because he didn't like music. Another one said Piano was out of tune. One woman said she would vote for Piano providing he promised to be *upright.* Another one said she would vote for Piano if he promised to be *grand.*

Piano promised if elected that he would not touch one penny of the taxpayers' money, as long as the taxpayer kept the money in his own pocket. He also promised an Old Deal for some, a Square Deal for none, and a Raw Deal for all. "Let's all get in the orchestra with Piano," was the concensus.

When **"Pop" Chester Melville** was on the police force, he spotted a motorist one night speeding through Peotone and immediately gave chase in his squad car. He finally caught the speeder and commanded him to pull over to the road side. "Pop" got out of the squad car and was about to give him an arrest slip when the speeder said, "I'll bet you $5 I'm pinched." "Pop" thought a moment and said, "I'll bet you $5 you're not." "You win," said the speeder, paid the bet and drove away, or so it is alleged by "Pops" co-workers.

Salvage

ANDY VAIL
Correspondent

That little stranger who had **Donald Foutch** and every one jittery finally arrived, an 8¾ pound boy. Don has fully recovered. Mother and baby are doing well.

Bob Milus is in Baltimore, Md., visiting his brother, who is in the service.

Presley Hankins has just returned from a visit to Altamont, Ill.

Henry O'Reilly says a pedestrian should be seen and not hit.

Albin Smrekar believes one thing America has more than the rest of the world is future.

Art Voss says he went into a Joliet restaurant and saw a sign which read, "use less sugar and stir like h—— . . . we don't mind the noise."

Harlan Kadow is becoming the Beau Brummel of the department. If **Scotty Soper** ever succeeds in getting a tie on him, the job will be complete.

Hugh S. Robb, Superintendent, remarked that engineers are prone to talk of the efficiency of modern machines. But no machine has ever been constructed that is so efficient as man himself. If the boss treats the human heart right it stays on the job for more than 600,000 hours, pumping 15 gallons an hour. No radio so efficient as the voice and the ear, no camera as perfect as the human eye. The nose, lungs and skin are a perfect ventilating plant. Such a marvelous mechanism is worthy of the highest respect and the best care.

Elmer Glenn likes engine 144 much better than engine 37 because he can blow its whistle much louder.

Production Planning

LORETTA RYAN
Correspondent

David Gianuzzi left for the Army Air Corps August 27. Until then he was in charge of the progress clerks at Group 1. His successor has not been appointed.

Rowena Roberts and **Irene Blotnick** are taxing **Paul Pickens** and **Argyle Dalziel** for the pencils which have been disappearing nightly.

A letter from **Tommy Burns,** formerly of the department, tells he is still enjoying his training period at Great Lakes Naval Training Station very much. He expects to be back on a visit again soon.

Frank Falwell and Hearse Inc. was caught filling the radiator with bottles and cans and what nots, one night this week, and it sure was quite a bucket brigade.

Through error it was reported in the last issue that **Rowena Roberts** had undergone surgery. It was Rowena's mother, who is recovering rapidly. Rowena left for a vacation September 7.

Mrs. Irene Blotnick is very happy to learn the destination of her husband, who is in the army.

Leonard Gilmore is leaving for the armed service.

Gertrude Finnegan was entertained at a farewell luncheon given by the members of the Planning Department. Miss Finnegan left to resume teaching in a nearby town. Farewells also are extended to **Mrs. Catherine Ray** who left August 22.

Agnes Freuhauf is vacationing and the office misses her friendly spirits.

Elva Thomas has created a mystery as the result of her receipt of daily bouquets.

Group 62 Leads Softball League

Group 62 leads the Load Line and Igloos Softball League at the end of the second round of games. Spectators reported fast and exciting contests. Due to bad weather a few games were postponed and will be played later.

ANTI-TANK MINES are halted momentarily as they reach the end of the loading line in Group 2 before they are prepared for shipment. Roy Barker is shown at the conveyor control.

Girls Must Know Numbers as Well as Dates to Be Efficient Timekeepers

25 Women Now Employed on EOP Time Staff Replacing Men Called to Armed Forces

Girls have to add acquired domination of time and mixed numbers to their instinctive mastery of fates and dates to be successful timekeepers, according to **John O'Connell**, chief EOP timekeeper.

And they are the ones who can do it, Mr. O'Connell testifies after six months experimenting with feminine replacements for male timekeepers called to the armed forces.

Mr. O'Connell says his experience shows that the old sayings about the woman is always late, the sweet young thing can't tell the difference between a 3 triple A and an 8 C, and the wife never knows what size shirt her husband wears must be forgotten.

Time cards, master time sheets, cost accounting records and long rows of fractions passed into feminine hands last March for the first time in EOP's history when **Veronica McHugh** and **Agnes Crownover** were the first women timekeepers employed. Now there are 25 women timekeepers and nine women clerks filling jobs formerly held by men.

A high school education is the minimum educational requirement and each applicant is submitted to a mixed numbers test. Although Mr. O'Connell tries to make the applicant feel at ease during the interview and eliminates any time element from the test, four out of ten girls fail when faced with a practical timekeeping problem.

The fundamental purpose of a timekeeper is to prepare an accurate determination of an employee's wages for the Payroll Department. Accuracy is their highest law and they all agree that it is the most difficult quality to maintain while figuring overtime.

Besides the detailed process of figuring time cards and other duties, the twice daily field trips are another major factor of the timekeepers' jobs. The field trips are to make a physical check of the employee and to make a cost accounting record so that the actual cost of output can be computed.

Although the women work nine hours a day, five days a week and alternate as part of a time card proofreading crew on Sundays, they lead lives of varied interests. The fractions on the EOP time cards are no mystery to Mrs. McHugh, Group 4, because of her experience in the payroll department of the Rock Island Railroad and 16 years in the assessor's office in Joliet. Single-handedly she is an efficient timekeeper, manages a home and is rearing a family of six children.

Eva Lien, also of Group 4, has been a successful business woman for years and even now finds time to be a silver counselor in addition to her timekeeping job. One of her five children is serving with the armed forces and Mrs. Lien feels that because of her background timekeeping is the best way she can contribute to the war effort.

Miss Crownover of Group 8 has trained eight women since her employment and admits that she was terribly nervous her first day. She is a former Northwestern University music student and dashes to Chicago on her day off to play a Hammond electric organ at a loop music shop and expects shortly, priorities permitting, to be the owner of one.

Zona Bond, also of Group 8, is a graduate of Normal University and was an outstanding timekeeping trainee and **Doris Tatro** of Group 9, which houses the largest number of employees in the Fuze and Booster area, can fly a plane as well as she can add fractions. **Peggy Ward** of Group 5 is the all American outdoor girl and can play football.

Weekly meetings are held to instruct the women in the various methods of timekeeping and cost accounting, ways to improve their own methods and the relationship of timekeeping to the organization.

Utilities

HELEN SHIMEK
Correspondent

Radio Communications

Lt. Ed Matteson of the Air Corps was home on furlough for a short time and didn't forget to visit the Radio Communications Department where he was employed prior to his enlistment. Ed took up radio communications at Scott Field where he has finished training and will now be stationed with the 4th Air Force at San Francisco, Calif.

Another welcome visitor was **Johnny Handel**, petty officer of the Navy who is stationed at Oakland, Calif. Everyone was happy to see both boys and wish them the best.

Kenneth Storch came to work last week with a big patch over his eye. He still says he walked into a door.

Transportation Department

Margaret Hayden, secretary, and **Charles H. Mann**, assistant superintendent, Inert Storage Department, will be united in marriage Saturday morning, September 19, at St. Rose's Church in Wilmington. EOP chalks up another romance! Their many friends wish them lots of luck.

Ernest Raunser has returned from a week's vacation with his parents, **Com. E. V. Raunser** and **Mrs. Raunser**, Woodmere, Long Island, N. Y.

Robert Peterson has been golfing his vacation away, rumor says.

Alberta Delaney of Joliet has recently started to work here. She replaced **Mrs. Philomena McCraley.**

E. J. Egan, superintendent of transportation, and **W. A. Walters** are still in a fog after witnessing the All Stars-Bears football game August 28.

Despite heavy rain Sunday, August 30, the Railroad Maintenance Department did a fine job installing new track switches.

"Bunny" Arthur, the Coal City boy, is making elaborate plans for a two days' vacation.

M. M. Dugan, Army Inspectors' Office, was a welcome visitor last week.

Telephone Tid-Bits

Leata Williams, telephone operator from the Personnel Building, is welcomed as pinch hitter for the regular construction board operators now vacationing. **Pauline Vismara**, operator at the construction board, has returned from a vacation.

The Illinois Bell Telephone Company and **W. A. Buck**, superintendent of EOP telephone communications, are continually checking all long distance calls for perfect transmission.

The National Construction Engineering Company has started to install the new 200-line extension. **Foreman M. J. Abt** is collaborating with Mr. Buck.

Laundry Letters

Among those soon to be missing will be **Evelyn Spars** and **June Million** who are leaving to resume their studies at Normal; **Lucille Thruman** who is to be married to her soldier fiancee in Mississippi; **Doris Taylor**, who is to join her school teacher husband in Arizona, and **Mae Ida Babbitt.** The Laundry Department gave a farewell party August 29 for them.

The Laundry "Bags" welcome to their group **Eleanor Brouilette, Irma McCormick, Kathryn Pierce** and **Ruby Pinkstaff.**

Violet Parks is sporting a diamond on that third finger left hand.

Pipe Shop

You would hardly recognize the Pipe Shop these days since **Pop Leahy** took over the job as safety man and tidied things up.

W. M. "Buck" Dale is still considered the coolest man and also the busiest.

Eddie Paulsen has earned quite a reputation as a second-hand car dealer and **Red Abbott** is running a close second.

Sympathy is extended to **Charles Shlander** and family in the death of his father after an illness of nearly five years.

Ed Kilbride claims they had a perfect blackout in his home town of Essex—population about six!

Service Garage

Bill Barr is now soundly entrenched in the parts room since **E. P. Sans** enlisted in the Army.

It is rumored that several of the Service Garage boys were in attendance at the All-Stars - Bears football game, but due to the heavy fog they could not be identified.

Bill Briddick often wonders where all the pick-ups are coming from. Says that by the looks of the vehicles coming in for repairs, there must be more pick-ups than sedans. Well, that's almost right —the "score" is 110 to 93.

The body men never seem to run out of work. **Glen Bitterman, Bud Wood** and **Buck Rogers** are the boys that try to keep up with all body and fender *deficiencies.*

Here and There

George Gowns, Roundhouse, has left for a fishing trip in Northern Michigan. He says he will bring back some of the fish he is always bragging about. It is hoped he brings back more than did the assistant Roundhouse foreman, **Don Lehndorf.**

Special thanks are sent to **James F. Moore** who planted the flowers at Richards' Farm. He really did a good job.

Hospital

EVELYN RICHARDS
Correspondent

Early in August the Hospital was paid a visit by **Col. Louis Schwartz**, from the United States Public Health Service, National Institute of Health, Bethesda, Md. He came to pave the way for one of his assistants, **Dr. Norman R. Goldsmith**, who arrived and stayed from August 17 to 22. He was not a patient, but he saw a good number of them; perhaps some of EOP employees from the groups recall him. If not, perhaps the dainty adhesive patches which he put on only to pull off in 24 hours will remind you of him. Dr. Goldsmith, who represented the dermatosis investigating division, conducted a series of six patch tests, using six different ointments, five of which were advertised products supposedly effective against tetryl, and one which his department had compounded.

Dr. Goldsmith was very pleased with the results of the tests and perhaps a new cream formula will follow completion of his experiments.

Dr. C. L. Garris, medical director at the Sangamon Ordnance Plant, also visited the Hospital in August. His mission was to observe hospital management and equipment for his plant.

Talking about adding up the years, getting old and chalking down another number—in simple words three members of the hospital staff had birthdays last month. August 18 saw **John Fisher** adding to his score a year; but his fiancee added a lovely maroon and gold fountain pen and pencil set to his pocket. No fooling, it was nice. **Margaret Gregovich** and **Evelyn Richards** celebrated their birthday August 21 and August 10 respectively. All three indulged in a box of candy (old fashioned chocolates given to Margaret).

New badge number 22082 has been acquired by the hospital staff in the person of cute, dark-haired, dark-eyed **Lorene Motta.** Leaving the First National Bank in Joliet, she started her services for EOP August 24, as secretary to **Dr. H. L. Schultz.** She resides at 400 Cornelia St., Joliet, and is a graduate of Joliet Township High School. She also attended Southern Seminary, a girls' boarding school in Buena Vista, Va. Before coming to EOP she spent two weeks in Tucson, Ariz., where oil wells are spurting and cactus grows and the temperature climbs to 122°. While there she made acquaintances with two good-looking sergeants and is corresponding with them now.

Most have heard of the House of Magic and have seen the magic carpet in the movies, but those were things that were pleasant and entertaining. Polished and waxed floors will give you the same floating feeling as did the magic carpet; however, **Lucille M. Nahas**, nurse at Group 3, doesn't think they are entertaining. Her carpet slipped from underfoot and now she is nursing a broken leg.

Sweet peas and poppies grown at the hospital furnished lovely bouquets for **Dr. George Luke's** convalescing wife, who is home in Morris.

John Fisher, ambulance driver, left EOP to drive a bus from Plainfield to the plant here. The bus line started August 30 from Electric Park over Route 66 to EOP, and goes to Fuze & Booster and Loading groups each eight-hour shift.

Surprise! Surprise! **Mrs. Joseph Gergovich**, recent bride, was honored at a surprise party Friday evening, August 28, at the home of her youngest sister, **Mrs. Alfred Kinzler**, 813 Woods Street, Joliet. **Elsie Baer** and **Mrs. Dorothy Schoop** were the hostesses. Mixed bouquets of garden flowers were used for decorations throughout the house. Table appointments included a lovely bouquet of mixed flowers, flanked by pink and blue tapers in crystal holders. Crash bunco was the entertainment, with first prize going to **Evelyn Richards. Gene Hurley** walked away with the consolation prize. Mrs. Gregovich was presented a guest prize. A gift was presented to her by her co-workers at the hospital. Among those present were Mrs. Gregovich, **Mrs. Harry Bolan** (the bride's mother), Mrs. Kinzler, **Evelyn Doran, Lucy Harkness, Thelma Talbott**, Miss Hurley, **Esther Anderson**, Miss Baer, Miss Schoop, Mrs. Richards, **Dr. B. G Geil, Joe Chizmark** and **Roy Healy.**

Cecil Cullick, Paint Shop, is recuperating from an operation.

E. G. McAloon is back at his duties at EOP after a business trip to Washington, D. C., and Newburn, N. C.

Luscious chicken in the McAloon fashion was enjoyed by members of the Utilities Department August 31, at the Group 1 picnic. Taking advantage of the invitation extended by **Joseph E. Salmon**, superintendent of Group 1, **Mr.** and **Mrs. A. M. Lockwood, E. J. Walsh, Mr.** and **Mrs. Claude Sayre, Mr.** and **Mrs. McAloon, Mr.** and **Mrs. C. W. Wade, Mrs. J. H. Walker, Mrs. Celia Kretz** and daughter, **Jeanie, Nancy Eherwood** and **Helen Shimek** journied to Sunset Park for the occasion.

C. L. Utley, electrical superintendent, has in his office a sample of a new type of cable lately developed to be used during blackouts. Instead of colored insulations, each conductor has different flavors, such as strawberry, chocolate, etc. He hesitates to use this cable, however, because Mr. Buck, wire chief, long ago lost his sense of taste.

Albert Nelson, engineer at the powerhouse of Group 6, thanks his friends for flowers and cards received during his recent illness.

Sheet Metal Shop

The Sheet Metal Shop has lost another of its men to Uncle Sam. **Joe Macconi**, who enlisted in the Naval Reserve some time ago, was called last week.

Charles Boudreau is at Mayo Brothers Clinic for a check-up.

Charles Lytle and **Jess Thomas** are anxiously awaiting a frost to relieve them from hay fever.

STUDYING HARD are the girls shown here who make up a class in timekeeping procedures taught by John O'Connell, chief timekeeper. Pictured left to right they are: First row, Alma Salzman, Eva Lien, Helen Kelly and Helen Buck; second row, Helen Otis, Gladys Schofield, Marian Stewart, Ethel Lawrence and Mr. O'Connell; third row, Shirley Van Duyne, Agnes Rivard and Ruth Stites; rear, Doris Tatro.

General Offices

MAE BELLE ANDERSON
Correspondent

You see some odd things when you stay around the administration area after 5 p.m. some evenings. One such was Tuesday, August 25. If by chance you walked by the softball playing field that evening you would have seen some very queer activity. On looking a little closer you would have discovered that it was supposed to be a softball game between the Elwood Officers' Club and a picked team of civilian All-Stars from the War Department.

The outstanding star for the War Department was an unheralded young man named **J. F. Welch.** He clouted a home run the first time at bat and for a while the manager, **"Cy" Faupel,** thought that he would have to use a substitute to play his position. But after they let him stretch out on the bleachers for ten minutes he came around in time.

The umpiring was really bad, as they had **William "Smoked Glasses" Dronsfield** calling them and it was through his cooperation that saved the All-Stars from receiving a sound beating. The final score was very close: Officers' Club 14—All-Stars 3.

Girls of the Purchasing and Expediting Divisions had a miscellaneous shower Thursday evening, September 3, for **Emalie Mueller** who is to take that big step. The McCulloch Tea Room was the gathering place and **Ruthe Myers, Veranice Quade, June Kaehlert** and **Rita Dwyer** were the sponsors of the affair. Games of various kinds were played and delicious eats served to the gang. Emalie was showered with many beautiful gifts.

Now it's "Katie Coed," but it was **Katie Gorey,** Mailing Department, until September 4, when she left to start studies at Miami University in Oxford, O. She will be a Junior in the School of Liberai Arts. The Sunday before she left, her aunt, **Mae Gorey,** entertained at a tea. Many girls from the Administration Building were present, along with a large number of Katie's other friends.

John J. Cole, comptroller, has made the necessary arrangements to have bonds delivered directly from this office so as to speed up delivery of the bonds to each and every one.

Isabelle Plummer is a newcomer. Her hangout is at the Tabulating Department as a key punch operator.

Angeline Mancuso has been transferred to the Tabulating Department.

Lucilie Ambrose, comptroller's office, had better stick to the bicycle or give up, none of this falling off stuff permitted any more.

Corp. Clare Cosgrove must have put somebody to work—his Sam Brown belt is all polished up.

Harry MacRae went to New York to visit his parents.

Audie Allison believes in thrift. He reads the newspapers on the stand and puts the money saved into War Bonds.

Herbert Burch is giving a lot of attention to his tomato plants in Coal City. He is also designing a streamlined outdoor storage bin for storing his victory garden products.

Mr. and Mrs. Don Lewison went to visit Don's folks in Des Moines to present her to them.

E. Washburn went to Wisconsin on a fishing trip with an elaborate assortment of artificial bait.

The Engineering Department has been watching **Jim Cortright** to see how the beauty treatments react.

Leroy Anderson is the only unattached young man who is girl-proof.

John Nicholson and **Mary Hidlebrauch** are going to be one in the next few weeks.

Walter Krohn takes a walk completely around the oval road in the Administration Area every day.

Bill Lanterman has a lot of colored jars on the shelf above his desk. Looks like he has canned jelly.

George Karas has been made an air raid warden.

Veranice Quade, Purchasing Department, spent Labor Day at her home in Spring Valley, Minn.

Mildred Rub, secretary to **G. R. Kintzel,** equipment manager, did a little traveling on her "two weeks." Took in the Smoky Mountains and that region. Mildred was just about taken off her seat while riding around the N. C. mountains to see a bus coming along with its destination marker showing Joliet, Route 4A.

Some folks would like to know where **R. L. Voss** has his dugout.

Vic Dagenais and **Mrs. Dagenais** are enjoying a vacation back home, New York they call it.

Al Scheer, Electrical Department, came down to work last week well scarred up on hands, face and chest. He says he fell off a bicycle.

Fred Poplausky and **Joe Luzbetak** went to Starved Rock August 23. The bus driver got lost and it took three and one-half hours instead of one and one-half. They took pictures of scenes and each other and when developed Joe had no head.

O. K. Madsen had a visit from his nephew, **Viels Visnek,** whose home is in Denmark. His ship was interned in Canada. He joined up at once in the Canadian Army. He is attached to the Canadian Royal Rifles Commandos. Mr. Madsen also went up to Pike Lake, Wis., and caught a 32-pound muskie.

What are those pink capsules **Joe Fredricks** seems to choke down every so many hours. Are they keeper-uppers?

Mary Downs, labor distribution, has been transferred to Timekeeping Department.

Ira E. Jackson, chief clerk, Engineering Department, and **Mrs. Jackson** are vacationing around New York, Canada, etc.

The East coast beckoned to **Marion Hyland,** secretary to **E. J. Walsh,** and she weakened. Marion claims she had a wonderful trip in the New England states.

E. V. Sperling, Engineering Department, and family had quite a trip on his time off. Managed to get into Canada and, of all things, out again.

Charles Coburn, auditor, is very happy these days. He says he is losing a few pounds.

Ralph Piper, Auditing Department, and **Mrs. Piper** started out for a grand vacation down South. However, they got as far as St. Louis and decided it best to return north. There was only standing room left on the train to take them further along.

Irene Keenan, secretary to **Harrison Smith,** was going shopping one day (while on her vacation) but decided to take in a race or so first. She got taken—so the story goes—so just figure out if there was any shopping done. It is said there wasn't.

"Tiny" Walter Peterson lost a pound in weight the other week, and is he gloating!

Ralph Turner has proposed to **Theresa Rager,** forelady in Group 8, every Sunday for 3 months, so he says.

Anna Mae Thompson has just added another year—don't get so worried over it, Tommy — lots more to come.

Dorothea Beverly, Accounting Department, keeps a certain party in the Air Corps flying with mail.

Bruno Sismondi is thinking of leaving to join the Canadian Air Force so that he might be able to make a hit with a certain little blond in Stores and Transportation Department, who has just returned from a trip through Canada.

It is understood that **J. F. Dolan,** paymaster, must have what it takes. In spite of all kinds of priorities on adding machines it seems he is able to obtain such a machine of the very latest design. How is it done? (Hey, folks—ask to see it.) It's very compact, four by eight inches, painted a very brilliant red and has figures of the clearest type. What's the hammer for?

The Purchasing Department's softball team, under the management of **E. C. Carlson,** lost to the Officers' Club 16 to 4.

FIRST WORKMAN employed under E. A. Evans for construction of the EOP plant was Roy Anderson, shown here at a time clock. He was given badge No. 51, the badges of the office staff being numbered from 1 to 50. Mr. Anderson is now employed in the Water Department under Supt. J. W. Stark.

Group 2

EDWARD KEENAN
WILBUR GALBRAITH
Correspondents

It was with regret that the boys said good-bye to one of the most capable men ever to work in Group 2, **"Jimmie" Clennon.** Jim first set foot in the Group August 22, 1941, and, like every one else, started as a fourth class laborer. It wasn't long before his fine spirit of leadership and versatile ability was recognized and he was made an assistant foreman. He still maintained his all-round efficiency and was progressing so rapidly that he was being seriously considered for a building foreman's job when he received an urgent call to return to his home town at once. Three days after this call Jim returned to notify **Supt. James J. Murphy** and **John Johnson, Jr.,** that he would be unable to remain here and would have to leave as soon as possible. All wish him the best of luck and hope he hurries back.

After talking to **Bob Schmitz,** group inspector, and **Tom Todd,** his right-hand man, it was learned that Group 2 has been assigned the following inspectors: **Julius Blanke, William Dwyer, Robert Mobus, Vassar Smith, August Deckness, James McCollum, Lester Green, Robert Bailey, Hans Christesen, Andrew Veronda, Wayne Pegau, Herbert Gluth, Michael Moran** and **Oliver Ehrsam.**

Congratulation to **"Ode" Golden** who has been placed in charge of one of the shifts of inspectors.

The Real Lowdown

John Johnson, Jr. is telling the boys that as a shampoo those liquid amber hops is unparallelled.

"Pete" Kelder, native of Crystal Lake, Ill., was the guest of honor at a stag party held at the American Legion Hall in Braidwood August 28. By the time this copy reaches the editorial desk Pete will be a married man. Congratulations and wishes for lots of good luck and happiness are extended.

"Tiny" Conroy, inspector, has shown remarkable improvement in his hairline since using a special hair tonic recommended by Sam **"Barbasol Man" Hoffman.**

Charles Pierce accused his wife of slipping a paving brick in his lunch bucket last week. Anyway, "Chuck" said she called it cake.

William "Jersey" Klegman has returned from a very pleasant vacation.

They say **Joe "Yockie" Connors** has a new girl friend in Elwood. Anyway, he and Bill visited the Elwood homecoming last Saturday and enjoyed themselves immensely.

Rumor has it that **Gene Hunt** is in line for the Fire Chief's job in New Lenox.

Things Heard Here

That **Morris Banks** is the owner of a thriving fish business in Chicago. . . .

Archie Le Borence is thinking of going on the water wagon. . . .

Joe Petrosko will probably middle-aisle it with his blonde girl friend real soon. . . .

George Zobel, Larry McKeon, and **Mickey McGuire** are becoming Seven-up fans. . . .

George Harms is putting away his straw "katie" until next season. . . .

"Ziggy" Zier is thinking of buying a tailor-made suit of clothes. . . .

Bob Burke is very proud of his curly hair. . . .

John Kelahan has a very good singing voice. . . .

"Horse" Tammen will accept nothing but quart containers or better from now on. This habit was developed after a softball game at South Bend, Ind., recently. . . .

Angelo Pagnusat has received an offer to play with **Glen Miller's** "Moonlight Serenade" orchestra. . . .

Harold Spier, star left-fielder, who has been sick for about a month, is back again. . . .

Bill Fiene, sub-foreman, sure takes advantage of his month of days by making regular trips to the nurses home in Joliet. . . .

Don Zier is having a hard time to figure out if he should keep on giving the girls a break or to start pitching ball like the old Don Zier. . . .

It seems **Ken Peterbock** came to work on a certain Monday morning all smiles. It wasn't necessary to ask if he had been out with his best girl or not. . . .

Loren Blazer is also all smiles these days. Rumor says he is now an engaged man. . . .

Fire

STUART MOLONEY
Correspondent

Twenty-eight men have been added to the Fire Department. A hearty welcome is extended to the following: **Tom Ness, Wayne Barber, Frank Goldenstein, John Arnold, Edward Powell, Doyle Good, Walter O. Murphy, Harry Moran, Charles Thompson, Herman Guyot, Ira Schick, Mathew Froncek, Archie James, Verne McKimson, Edward Kamper, Meyer Horowitz, Alonzo Noland, Walter Hilgert, Virgil Thompson, Delbert Leeper, Hopper Combs, Wesley Peebles, Orville Milton, Charles Jacobson, Fred Johnson, Dale Cornelius, James Livengood** and **Robert Roth.**

These boys are showing an eagerness to learn fire-fighting tactics and although only here a few days are showing that cooperative spirit so noticeable throughout EOP.

The answer to the long search for a suitable successor to **Rudolph Valentino** is **John Arnold.**

Virgil Fear and **Joseph Vacarro** will take any two men at horseshoes—sez they.

Bob Schreffler will supplant **Bill Powell** as the "Thin Man" if the boys at Station 3 don't quit eating his dinners.

Earl Fitzgerald is fast becoming an international banker. He is busy now consumating a big "socks and coffee" deal.

Nominations for the Firemen's Daisy Chain include: **Norm Heath, John Davis, Ed Powell, Larry Molck, Angelo Amorose, Frank Keeley, Virgil Bell, Charlie Hendrickson, Calvin Gordon, Charles Jiskra, Bill Dust, Vern Martin, Lonnie Seaton, Franklin DuPuis, Frank Goldenstein, John Hinds, Lafe Martin, Lawrence Heath, Carl Richards, Ira Schick, Bill Hayes, Frank Pavlich, Ed Carter, Herman Guyot, George Hayes, Walt Williamson** and **Jake Schuck.**

The hourly drawing on War Bonds, a feature of the Firemens' picnic, proved to be a great success . . . 10 bonds—10 bombs.

Guys in Disguise . . . **Leonard Anderson** as a tobacco autioneer . . . **Ralph Batty** as a fan dancer . . . **Bert Benson** with four wives . . . **Stan Murawski** with three accordions . . . **Ted Kloeckner** in **Stephen McSweeney's** helmet . . . **Norman Lubs** at a taffy-pull . . . **Wiley Bell** in a leather harness . . . **Francis Downey** in a bow tie . . . **Harry Carlson** in a Conga line . . .**John Watkins** in a shag contest . . . **Bill Hayes** and **Frank Pavlich** on a tandem bike . . . **Don Trainor** at a carnival—alone.

Seeing is believing . . . **Scotty Rodgers** making **Meyer Horowitz** for two-bits. This is one for the book.

John Alar received several beautiful, but slightly delayed letters of congratulation on the arrival of his new son.

Frank Nolan has the entire department guessing where he is going on his vacation and above all what he will do after he gets there. **Stuart Moloney** is also taking off a few days, but there is no guessing as to where he is going and what he will do.

Ed. Stricklin will report to his draft board in Texas when he gets his examination notice for the Army.

Charles Davis is starting a course of study in the art of checker playing. His star pupil is Selectee **Frank Scoma.**

Chief Roy W. Mortenson was host to a party of friends from Rockford . . . names withheld till the picnic funds are tabulated.

The boys have added interior decorating to their many chores. The chief's room was completely done over.

SLAMMING A HIT for extra bases, Dorothy Lehman of Group 8 is shown as she provided a thrill in the softball game with Groups 4 and 5. Catching is Helen Fritz of Group 4. The umpire is Joseph Catalani, Fire Department.

LINE FINDING equipment is being tested by Mathias Horn, technician, at the main distributing frame to outside toll cables of the EOP telephone system.

Groups 4-9

Fuze-Booster-Primer and Detonator Lines

JUANITA HARTER
Correspondent

Groups 4-5

A successful picnic was held August 23 by Groups 4 and 5. Attendance was estimated at 1,000 persons. Activities, which started at noon and lasted until midnight, included a girls' softball game, horseshoe pitching and dancing. Music was furnished by Gene Victor's orchestra. A $50 War Bond was won by **Jeannette Gunnerson** of Group 4.

The picnic Committee presented **T. M. Burns**, general superintendent, of Fuze and Booster Area, with a check for $159.43 to be contributed to the USO. This represented the balance after all bills had been paid.

Everyone's doing it — **Helen White** will walk the aisle soon.

Kay Podden's line was well represented at the picnic. In fact, nearly 100 per cent . . . that's pulling together.

May Stroball is convalescing at home from injuries suffered in an automobile accident August 15.

Stella Marma of 4-14 is going to do a little aisle stepping very soon.

Jean Stahler said that she had a very nice time coming home on the blackout train from El Paso, Tex., where she visited a friend in Ft. Bliss for three weeks.

It was discovered at the Group 5 picnic that **Gill Maloney**, an inspector, is a smooth dancer.

Charles Kaplan, assistant superintendent of Group 5, was married recently to a very pretty Ohio girl.

Martha Gibbons said that the part of the picnic that she liked best was the last dance.

Did you hear about the two fellows who traveled from Kankakee to the Lockport picnic grounds and found the shortest way there was not through Coal City? Maybe they need a road map.

Have you met **Johnnie Dole**, one of the pineapple brothers?

Florence "Shorty" Mahalick and her twin sister celebrated their birthday last week.

Group 6-7

Florence Connour was married August 9 in St. Louis, Mo., to **Pvt. Richard J. Harvey**, stationed at Ft. Leonard Wood, Mo.

Birthday congratulations were sent to **Harold Starr, Juanita Thompson** and **Joseph Jackovich** August 26, also **Bill Saffell** August 27.

John McGurty, assistant foreman, left August 29 to enter the Army.

Mary Butler, timekeeper; **Ann Wolfe** and **Grace Watson**, from the Assembly Room, left August 29 to resume their careers as teachers. Cheers are right for girls like these who gave up their well earned vacations to help us in the effort to win this war.

By the way, **Rose O'Day** and **Edith Krzich** would like to keep posted on any picnics held by EOP groups. They haven't missed any yet and are looking forward to attending many more.

Mrs. Harold Starr is back home again after undergoing an appendectomy.

Bill Blonske, assistant superintendent, 6-4, hands in the news of being married while on vacation. The lucky girl is **Ora Reha** from Group 4.

Pauline Gammell is leaving to relax in the sunshine of California.

Art Jensen, foreman, spent his vacation at home in Minneapolis, Minn.

James Truka, superintendent, Groups 6 and 7, has returned from a vacation down by the Ohio.

George Morrison, assistant general superintendent of the Fuze and Booster Groups, is said to have done some deep sea fishing while on vacation in the East. He was very careful of submarines.

Marjorie Love, Group 6, was married to **Marvin Salmi** August 29.

Have you seen the gorgeous tan **"Bunny" Partridge** has been sporting around all summer? It is a honey!

Missing—One 1932 Chevrolet, missing from in front of **Jimmy Tait's** house one day last week. Any information leading to the discovery of the car, or the riders therein (who incidentally held up a few stores in the bargain), would be appreciated by the Chicago Police Department, but mostly by Tait, who is positively lost without that car of his.

A welcome goes to **Keith Smith**, a new foreman in Group 9. Believe it or not, he is *not* from Ohio.

Group 9

Everyone in Group 9 is getting steamed up about the forthcoming picnic.

Friends have said good-bye to **Augie Rubentz** for a few weeks. Augie has a hubby at Camp Edwards, Mass., and left recently to visit him.

Eve Grahovac, nee Kovacevich, has a husband somewhere in California who is doing his bit for Uncle Sam, and she is going to see him. Her friends in Group 9 will miss her.

"Doc" Daugherty's twins, **Billy** and **Betty**, are now eight weeks old. "Doc" does his darndest to be modest but he will admit they're nice looking youngsters. Betty can outdo her brother already in the family arguments, but then that's a woman for you.

Phone Building Completed Year Ago This Month

600 Main Lines May Be Expanded to 800 As Needs Increase

New employees coming into contact with the efficient EOP telephone system find it hard to realize that the neat brick building housing the exchange is but a year old this month.

Construction of the telephone building was started July 10 of last year and it was completed and ready for installation of automatic dial equipment September 26. The system now employs 24 persons, has three switchboard positions, approximately 109 miles of underground and aerial cable, 800 telephones including extensions with 600 main lines and facilities for 200 more when needed.

Previous to the construction of the telephone building, the exchange was located in a small room just east of the reception room in the Administration Building, now used as a photostat room. There were two manual positions at the switchboard, with six operators serving three shifts. The system was owned and controlled by the Illinois Bell Telephone Company.

The old exchange was cut over into the new automatic system in two minutes and 32 seconds at 2:10 p. m., December 27, without difficulty or interference with service.

William A. Buck, superintendent of telephone communications, has been highly commended for the quality of service maintained by the system, both on local and long distance calls. **Col. Samuel Todd** and **J. J. Koch**, telephone engineers of the Sixth Corps Area, who inspected the system, praised the efficiency of the installation.

Happy Birthday to You!

This is a regular feature in which the birthday anniversary of as many EOP workers as possible will be listed for 2 weeks in advance. Watch for your own.

September 12

Esther Barker, Group 9; **George Blake**, Group 7; **Wayne Boyd**, Guards; **Francis Briel**, Group 1; **Bernis Brown**, Utilities; **Betty Jane Brown**, Group 6; **Kenneth Brown**, Group 1; **Carl Callmer**, Utilities: **John Crowe**, Group 3-A; **Perry Danforth**, Utilities; **Ivan DeMoss**, Fire; **John Fabrycki**, Group 4; **Cornelia Frasca**, Group 8; **David Grossman**, Group 1; **Joseph Gurka**, Group 3; **Mary Gurka**, Group 1; **Joseph Hnetkovsky**, Group 3: **Owen Jewell**, Group 2; **Thomas Jisa, Jr.**, Group 1; **Ronald Jordan**, Guards; **Ernest Kinzer**, Group 1: **Matthew Kovoch**, Group 1; **Walter Lueder**, Guards; **Eunice Mantia**, Group 5; **Theodore McAlear**, Group 9; **Charles McCue**, Group 3; **Arnold Moede**, Group 3; **William O'Connor**, Utilities; **Daniel Phillips**, Group 1; **Edna Pitt**, Group 9; **Anna Sherman**, Group 5; **Ray Sternisha**, Group 1; **Bertha St. John**, Group 9; **Lucille Suski**, Group 7; **James Turner**, Group 1; **Edna Voight**, Group 7; **Delmar Voirol**, Finished Rounds; **Ralph White**, Group 2; **Harold Wickstrom**, Inert Storage.

September 13

Louise Ballard, Utilities; **Ray Ballard**, Group 3; **Cleo Bell**, Group 4; **Josephine Cain**, Group 9; **Dorothy Carlson**, Group 1; **Burris Carr**, Utilities; **Phyllis Chaffee**, Group 5; **Evelyn Darm**, Group 5; **Margaret Davis**, Group 7; **Helen Deamer**, Group 5; **Cecil Elliott**, Group 1; **Peter Golgin**, Group 3; **Morris Hannan**, Group 2; **Glenn Hart**, Group 8; **Marie Herbst**, Group 4; **Edward Jesonowski**, Group 1; **Manda Kovacevich**, Group 9; **Kenneth Mack**, Group 1: **Adelbert Millican**, Group 9; **Myrtle Montgomery**, Group 9; **Erma Palmer**, Group 4; **Roy Pulaski**, Utilities; **Willie Range**, Group 9; **Guy Ray**, Utilities; **Ruby Reed**, Group 9; **Wallace Reed**, Plant Protection; **George Rickner**, Group 3-A; **David Rosen**, Inspection; **G. Schloetzer**, Inspection; **Ruth Stiefbold**, Group 9; **Fred Strope**, Guards; **Mildred Templeman**, Group 9; **Harry Tilden**, Accounting; **Clyde Townsend**, Fire; **Harlan Waller**, Guards; **Lester Weikum**, Group 2; **Ursula Williams**, Personnel.

September 14

Ruby Allen, Group 7; **George Ashenbramer**, Inert Storage; **Vernon C. Bailey**, editor; **Leroy Baker**, Group 1; **Frank Baracani**, Group 7; **Mildred Boliaid**, Group 4; **Delores Braux**, Group 4; **Velta Bruce**, Group 9; **Addison Crawford**, Group 3; **Albert Cummings**, Plant Protection; **Victor M. Dagenais**, Office Management; **Michael Donohue**, Plant Protection; **James Forrest**, Purchasing; **Louis Glim**, Utilities; **John Godfrey**, Inert Storage; **Jesse Griffith**, Utilities; **Vance Hamann**, Inert Storage; **John Hohisel**, Timekeeping; **Alva Jones**, Group 1; **Clarence LaCount**, Group 3; **Ival Lampman**, High Explosives; **Walter Levitt**, Group 3; **Leonard Lindblom**, Group 1; **Clovie Longest**, Group 4; **Louis Marchioni**, Utilities; **Mary Oelschlager**, Group 6; **William Orr**, Group 61; **Myrtle Potchebski**, Group 9; **Katie Priess**, Group 6; **Harold Radzom**, Group 2; **Alden Stolzenbach**, Group 3-A; **Marian Trovero**, Group 8; **Dennis Vannoy**, Utilities; **Ralph Walter**, Group 61; **Erwin Welsand**, Utilities.

September 15

Timekeeping

NICHOLAS BELLUSO
Correspondent

Physically checked, reported, annotated and charged by Celia Harte during vacation of Nicholas Belluso.

How about a neck? Hasty conclusions are definitely out of order. Just refresh the old gray matter and remember the wonderful chicken dinner Little Jack served to the timekeepers last Thursday night at their farewell party in honor of the timekeepers leaving for the armed forces.

Master of Ceremonies, **John O'Connell**, gave a royal send-off speech for **Eddy Swanson, Burt Norling, Tom Tomazewski** and **Art Howard.** Mr. O'Connell then presented each guest of honor with a gift from all the timekeepers.

Richard T. Bassett and **John Olson**, guests of Mr. O'Connell, unveiled the timekeepers' new service flag.

Those big lumps that rise unexpectedly in one's throat disappeared, when **Frank Zupancic** gave out on "Nellie," his accordion.

Mr. and Mrs. Frank Buhl, who, by the way, are very new newlyweds, displayed musical talents.

Leata Williams, the girl who says, "number please" when you lift the telephone receiver, played several piano selections and very beautifully, too.

Dancers, lured by **Ernie Osmoson's** swingy tunes, crowded the dance floor, while the more fragile and less brave kept the bartender busy.

Eva Sweda divided her attention between **Bernie Smego** and **Harry Knarr.**

Highlights of the dinner dance: **Nick Eartly** shaking his slender shoulders . . . Mr. and Mrs. O'Connell dancing like Astaire and Rogers . . . **T. V. Brennan** looking interested . . . **Paul Zamkovitz** being the life of the party . . . "The Lady in Red" **Doris Tatro** . . . **Glenn Allen** in the dog house . . . **Jack Needles** making speeches . . . **Barney McShane** looking tolerant . . . the orchestra dragging out . . . rugs rolling up . . . clocking out time (reluctantly).

Thanks are extended to Mr. O'Connell and Chairman Zupancic, along with Mr. Allen, **Archie LaBorence, Bob Balma,** Mr. Knarr, **Angelina Gunnerson,** Mr. Eartly, and **Nick Belluso** for their time and effort in making a grand party for everyone.

For the second time, **Ray Bryant** is passing out cigars. **Ronnie Bryant** made his appearance in the Bryant household August 22, and once again all is peaceful.

Angie Gunnerson is back in circulation, due to the fact that **Bob Renaldi** will leave for the Marines soon. Example—Miss Gunnerson was escorted home from the recent dinner dance by Mr. Howard.

"Little Nick" Belluso, vacationing correspondent, is sorely missed around the time office. His partner in the Station Wagon Express, "Big Nick" Eartly, arrives from the field an hour or two late, wearing a bewildered and lost expression on his face. Sympathies for "Big Nick" and prayers for "Little Nick's" return are universal.

Maurice Goodspeed's son, who is a cadet in the Naval Air Corps, was home on leave recently.

Mr. Howard, who leaves for the service soon, was guest of honor at a dinner party in the **Lester Nelson** home. Says Les, "We even drank our dinner."

The Timekeeping Department has just received a letter from Eddy Swanson, expressing thanks to all for the farewell party and also expressing his regrets at having to leave this department.

Things to wonder about: where **Milt Treitel** got the postcards he sent from New York . . . why **Joe Fitzgerald's** hair isn't red anymore . . . why **Tom De Lockery** is so bashful when he visits the time office . . . why the stained glass windows in Group One's new clock house?

Last minute flash—timekeepers are donating 25 a week to set up a fund with which to buy gifts for the boys leaving the department for the armed services.

The EOP Guide Post

SALE · FOUND · LOST · RENT · BUY · SERVICE · TRADE · RIDES

Classified ads will be published without charge for EOP employees and their families. If you can offer transportation, want transportation; want to trade, buy or sell something; have a house or apartment to rent; have lost or found something, you are invited to make use of this service. Deadline is Wednesday, ten days preceding publication.

Lost—Maroon tricycle by Gregory Resch, son of Lieut. A. G. Resch. Please return to EOP residence 60-55 or call Line 4113.

For Rent—Two large rooms, completely furnished, in modern home near EOP. Call Gardner 3681.

Women

By CATHERINE NOONAN

When **Ann Gubbins** of Ordnance auditing was interviewed for an EOP vignette, she had the ambition to be the first femme fatale of this feature by stating that she likes orchids and champagne because they went with her sultry, blonde beauty. Then she laughed and gave us the real dope about herself. Ann, before taking charge of the Ordnance comptometer department, figured inventories for every big business company in Chicago . . . chop suey is her favorite food . . . suddenly realized that **Clark Gable** is her favorite movie actor now that she can't see any more of his movies . . . she is a native of Chicago . . . thinks her sense-of-humor is her outstanding quality and is the first to laugh at herself in the middle of what she thinks is a dramatic "mad" scene . . . black is her favorite color . . . has traveled all over but will settle for Florida as the place to get away from it all . . . diamond is her favorite jewel . . . will never win a cup for golf and doesn't care . . . has been at EOP for two years . . . is an avid reader and her favorite books are about foreign countries . . . likes to bowl and dance . . . men are her pet peeve(?) . . . really does like orchids and not because they're expensive . . . not a soul said that she wasn't a femme fatale.

Gooseberry Jam, What!

Capitola Ricketts of Group 8, the fascinating lady with the lovely name, says that a sandwich is a sandwich and by any other name still would be a sandwich. However, the sandwich recipe she submits for your approval has her guarantee to make life more interesting. Right off the bat you have to have a jar of gooseberry jam. Since it's a hundred to one that you don't have a jar of gooseberry jam, you have to search for one, which will keep you busy for days to come. After you find it, the rest is easy. All you do is mix it with Philadelphia cream cheese in any proportion that you like and serve it on Boston brown bread. If this recipe is responsible for Capitola's vitality and ability to work without the "I'm so tired of it all" attitude, we all should follow her suggestion.

"The Rains Came"

It can now go down in the history of the world that **Queen Elizabeth** had something that the women of today don't have . . . or that you don't find a **Sir Walter Raleigh** every century. On August 28, about 400 women ventured from the security of their homes to play bridge for the USO at the EOP Recreation Building. The bridge party was one of those successes that you write home about until the elements scoffed and the scoffs resulted in a superproduction of "The Rains Came." The rains came and came and flooded the first floor of the Recreation Building, which left the ladies high and dry on the second floor bidding for a bridge. Frantic calls for rescue to busy husbands in the Administration Building brought the annoying "you got yourself in and now you get yourself out" response. Braver women, realizing the washability of mud, took off their shoes and stockings and waded home. Outside visitors whose husbands were not close at hand, waited patiently for **Chief Roy W. Mortensen** and his crew of firemen to pump the water out. Now what was it that Queen Bess had . . . or is it the wool shortage?

EOP Softball Team Continues Victories

The EOP softball team kept on their winning ways by defeating Beecher 3 to 1, for their twelfth straight win. **George Zobel, Ed Washburne** and **Mario Zinanni** were the offensive guns for EOP, Zobel hitting a home run, Zinanni a double and triple, and Washburne a double and single.

For their thirteenth straight win, the team defeated the strong Naperville Kroehlers team, by a 4 to 3 score. The defensive play of the whole EOP team sparkled brightly. Zobel and Washburn stared offensively.

Seeking their fourteenth straight win, EOP met with their first defeat at the hands of the Bendix Brakes, the World's Champions last year, by the score of 3 to 1.

Since that time, they have started a new win streak, defeating such teams as the Medics Corps of Chanute Field, 7 to 3, and the West Side Boosters of Kankakee, 7 to 4, in ten thrilling innings, and for the sixteenth win of the season the EOP team defeated the Arlington Furniture Company of DeKalb 1 to 0. **Ed Keenan's** triple resulted in the only run made. **Les Tammen** was the pitching star of this game.

Safe Practices Are Contributions to War

(*Continued from Page 2*)

our liberty, our ideals. Just how much value do we individually attach to "our way of life"? That same value must also be attached to safety for this is a definite factor in preserving those very things which we love so dearly. We cannot afford to lose a hundred thousand lives as we did last year, and the year before, for so many of our people are contributing very materially to the preservation of "our way of life." If this war lasts for some time, and we do no better as a nation than we have in the past, we will continue to lose a hundred thousand lives a year, and it is easy to estimate the number of workmen included in such a number. This will necessarily hamper materially our national efforts on the big job ahead.

While whole nations are unleashing their might to destroy life and happiness, it may seem ironic that we are so earnestly devoting ourselves to their conservation. But *that* is America. That is our life, the very foundation of our living. There never will come a time when we will hold life less dearly. This nation of ours is relying upon you to become experienced in working safely, to help your fellow worker in observing the first law of human nature, "self preservation." This is the time to act—with all the energy, all the intelligence, all the determination at our command.

Here are three traits of human nature:

1. Many of us are naturally optimistic. We have faith in our good luck and feel that what happens to others couldn't happen to us. This fallacy in human thinking is perhaps one of the most difficult to overcome.

2. Men are creatures of habit. If we have been doing something one way, we tend to resist any efforts to have us do it another way. It takes a lot of convincing to show us that the other way is better and safer.

3. Men are primarily emotional. Most of us do our thinking with our hearts rather than our heads. No argument, therefore, is as effective as an emotional one.

These three traits of human nature give us one key to our safety program. No matter how far we have advanced in safety, no matter how much we may have already accomplished, we must still keep those three fundamentals continually before us, if we expect to steer our safety thinking in the right direction.

There is another thought which might well be emphasized. Carelessness about reporting daily to our work places can be just as vital a blow to our war efforts in time lost. There are days during normal peace-time periods, when one does not feel quite up to the job, and many have formed a habit of staying away from work on such days. The days that we are now facing are different. Our soldiers at the front cannot stay in camp because they do not feel well. They cannot join their ranks late in the morning because they did not feel like getting up. These boys are kept healthy. They have daily routine of exercise and eat good food. They are unconsciously taught the secret of maintaining good health. It would seem, therefore, that we could do no less as soldiers of industry. That is perhaps a duty that we owe to this war effort—keeping healthy and on the job in order that we can "keep 'em shooting."

There is another very important consideration that we must think about individually and collectively. This is carelessness in workmanship. This type of carelessness may be just as harmful as carelessness in the manner of doing the work. If a man is careless in his movements, he may be seriously injured—that's one man—that's to be regretted. But if he works in a manner such as to protect his own well being, but turns out faulty workmanship, it can be and often is worse. If we stopped to realize that a tiny fault in workmanship or inspection of a critical operation could cause a half-million dollar bomber to drop from the skies, or a many-million dollar battleship to fail in its critical moments, a shell or a bomb to land as a dud, or even explode prematurely in the handling, thus destroying valuable lives, equipment and armament, representing serious failure in this one item of the war.

In addition to this there would be many thousands of man hours of work expended on the preparation of such equipment, many thousands of pounds of desperately needed materials all lost and we get some idea of what carelessness in workmanship can mean. We get a still further idea of what it means if we consider that the killing of the very men who have been trained to the very highest degree of skill in handling this equipment is not only a very serious set-back to the whole effort, but a very regrettable and unnecessary loss from the humanitarian standpoint as well.

Personnel

JACK GARNANT
Correspondent

The Personnel Department lost one of its most popular and attractive members when **Gladys Creek** of the Reference Room died September 3.

Gladys came to EOP in January of this year. She was a very thorough and efficient worker and while here made many friends all of whom will always remember her sweet disposition and sunny personality.

It is a long road from a typist working on case histories in a hospital to a position on the staff of the executive secretary of EOP, especially when both positions are with the same company. But nobody in this Department has the slightest doubt that **Lee Reynolds** can travel even a longer and more difficult road than that.

Of interest to all the folks in Personnel, and maybe you too, are **Bing Phalen's** and **June Fors'** engagement rings.

Cigars and candy were passed out to celebrate the arrival of **Mr. George Barford's** baby daughter this week. Mother and Baby are doing well. P. S. So is Dad!

Job Manuals Available to EOP Employees

Manuals for war workers are available for purchase from the University of the State of New York and sample copies may be seen by interested EOP employees at the Recreation Building.

The manuals cover machine shop, blue print reading, inspection of machined parts, precision measurement, sheet metalwork, electricity, carpentry and training of women.

The monographs are prepared primarily for beginners, those who have little or no knowledge of the job in which they are interested. However, the inspection series manuals are available in the beginners, intermediate and advanced stages, with a teacher's manual embracing the three courses.

Cost of the manuals ranges from 60 cents to $1.60.

INTENSE HEAT is the problem facing the men who must repair the 92,000 gallon storage tanks into which the liquid nitrate of ammonia is poured from tank cars. Chemical reaction requires frequent repairs and the four men shown here were photographed inside one of the tanks. They are, left to right, Sam Bretto, John Giacomi, Henry Tiontkowski and John Hanson. Temperature inside the tank is 135 degrees, and the photographer agreed.

EOP Lauded by New Ordnance Service Chief

General Hayes Now Supervises Plant Operations in U. S.

By P. L. Deylitz
Superintendent, Group 61

Maj. Gen. Thomas J. Hayes, recently appointed by **Maj. Gen. Levin H. Campbell,** Chief of Ordnance, to be Chief of Industrial Service, has a long record of training and experience which makes him particularly well fitted for this extremely important post.

General Hayes has more than 34 years of service in the Army, four of which were as a cadet at the U. S. Military Academy at West Point. His greetings to EOP employees are in an adjoining column.

In the Ordnance Department, Industrial Service has the responsibilities of (a) Research and Development, (b) Procurement and (c) Procurement Planning. The activities of each of these divisions, particularly in time of war, are extensive, and especially that of Procurement. The term "procurement" comprises manufacturing by all Government arsenals, including both government-owned-operated and contractor-operated ones, such as Elwood Ordnance Plant; the negotiation of contracts for all types of Ordnance materials, the placing of orders, administration of contracts, inspection of finished material, and payment therefor. In order that this work may be facilitated, procuring agencies are located convenient to all of the principal industrial production centers of the country.

General Hayes was born at Ironton, O., September 18, 1888. He was appointed to West Point from Ohio in 1908 and was graduated with the degree of Bachelor of Science in 1912 and was commissioned in the Infantry. General Hayes' first assignment was to the 4th Infantry and he served with

Confiscated Articles May Be Claimed

Orders have been issued by **Lt. Col. Don M. Hoffman,** commanding officer, that restricted articles, such as cameras and guns, confiscated by the Guards during the past year, can be returned to the owners on proper identification and proof of ownership, it was announced by **Chief M. C. Baughman.**

Chief Baughman asked that owners of all such articles communicate with Guard Headquarters as soon as possible. He added that he has quite a supply on hand.

All restricted articles will be picked up at the outer gates and a claim check will be given to the owner, who may pick up the article on his way out, Chief Baughman said.

Ammunition and liquor will be confiscated and turned into Guard Headquarters if not surrendered voluntarily. If surrendered voluntarily a claim check will be given and these can be picked up on way out.

Any restricted article taken from an employee leaving the area will be sent to Guard Headquarters with a full report. The owner will be instructed to stop at the Guard House for disposition of his case.

". . . we must not sacrifice quality for quantity . . ."

MAJOR GENERAL THOMAS J. HAYES
Chief of Industrial Division, Ordnance Department

"TO THE WORKERS of the Elwood Ordnance Plant—members of our Production Army—Greetings. It is gratifying to know that the Elwood Ordnance Plant is maintaining that upward trend to the goal, a goal to which we are all striving—to deliver the goods to our forces on the front lines so that they can 'deliver the goods to the enemy.' However, in striving toward that goal we must not sacrifice quality for quantity. Remember—the boys at the front cannot finish off the enemy with 'unfinished' material."

—Maj. Gen. T. J. Hayes.

Traffic Rerouted During Road Work

During repairs on Road 2-South and the connection of the concrete sections where Route 66-A crosses this road, vehicle traffic entering the EOP area is being rerouted. South-bound traffic is being permitted to enter at the North Gate on Chicago Road and north-bound traffic is allowed to enter the Administration gate and the Richards Farm gate.

Women Invited to Recreation Building

Women from throughout the area are invited to visit the Recreation Building and join the fun. For your enjoyment and entertainment are table tennis, bowling, pool, shuffleboard, archery and badminton. **Edward Walkup,** recreation director, plans bowling leagues and basketball and volleyball games for the winter. The building is open from 8:30 a.m. to 10:00 p.m. So come to the building and get acquainted.

Round EOP Metal Badges Are Taboo

EOP's well known round metal badges for employees will no longer gain entry into the area for any wearer who may still have one. They went out of official existence at 12:01 a. m., Monday, September 21, after having been in use for nearly two years. Now all employees wear the colored badges designed to identify the employee's group.

Group to Guide Activities of Employees Here

Committee Will Plan Plant-Wide Recreation Program

By Edward L. Walkup
Director of Recreation

The EOP Recreation Program is not necessarily a *play* program; it should be considered as a recreation program. Every man and woman working at EOP is interested in one thing only and that is, more and better production . . . *keep 'em shooting.*

The human mind and body must have a change of action to make that mind and body have a well rounded life and it is to that end the Recreation Department is dedicating itself. For years it has been acknowledged that a man or woman who has a hobby — and rides it—will have a well rounded, happy and longer life.

So that the Recreation Department can be of greater service to all employees, an Employees' Activity Committee is being organized. Every superintendent is being asked to name a man and woman representative from their respective groups. This representative committee will direct the program offered by the Recreation Department. There will be, of course, the usual basketball and bowling leagues. Badminton players also will have opportunity for practice and tournament play, as will enthusiasts of table tennis, shuffleboard and other sports. Volleyball should be another popular major activity this winter.

Specify Your Interests

If you do not know who your representatives on the Employees' Activity Committee are find out and let them know what you would like to do, and we will try to find out how many others have the same interest, and if there is enough interest shown, classes or groups will be organized, whether it's ball room or tap classes, choral clubs, square dancing, musical groups, or dramatics.

The facilities in the Recreation Building in the Administration Area are ready for use and available to any EOP employee, regardless of group or shift. Already the Bowling Alleys are having a heavy play before and after shifts. If you want to beat the gun and give your teams a workout before any of the leagues are organized, call the Recreation Department, Line 4109, and make reservations so that you are sure to have the alleys. Pocket billiard players say the table at the Center is one of the finest, and we are looking forward to a tournament in this sport this winter.

Table tennis players are loud in the praise of the tables, made by the Carpenter Shop. There is not a dead spot in them. They are set far enough apart so that players who want to get back from the tables can pull all of their fast and fancy shots.

Shuffleboard enthusiasts will find the two courts almost equal to the Florida courts. This game should become really popular, and every one should try a few games.

Horseshoe players are going to have their chance for stiff competition as "barnyard golf" is the next sport to take the spotlight.

Let's Not Let His Confidence Fade

Seeing that Anniversaries of EOP begin this month recalls a story of a certain young man who may have lived on one of the many fertile farms on which EOP is built. His ancestors lived on this land when Dobbin was transportation and tires fictitious. They say he is employed by one of his relatives named Uncle Sam. His name escapes memory but they call him "Sarge."

Not much more than two years ago Sarge sat in these pastures, after chores, dreaming of how he would run the farm when it someday would be his. Then, Pearl Harbor was just a name that he could never remember when writing an examination in school. However, he did know that those Islands were beautiful and that some day, after harvest time, he and his childhood sweetheart would go there on their honeymoon.

"After the calm comes the storm." This happened to Sarge. He got word that his homestead would be bought for a shell loading line. He, the boy who ate, slept, and thought farm, would have to move. Where? He didn't know or care. It was hard to understand. Oh! It couldn't happen to him. It did. "Shells, what did they need them for?" he thought. "Why, heck, Europe was an ocean away."

Even though he was a good kid, faithful, willing, and trustworthy. Home. "There is no place like home." However, trust in his government finally led him to co-operate.

Then came that day when Uncle Sam needed help. Again he didn't quite understand, there was Ma, Pa, Sis, the Collie, which sat and dreamt with him. Oh yes, the neighbor girl, who cried so much when she had to leave the farm, her new home. Oh, everything. She looked so pretty when she cried. Of course a year wasn't long, Uncle Sam would take care of him. He had faith in his Government, still has.

"Pa is sitting here smoking his pipe and Ma is sewing. They want me to tell you that they are looking forward to your homecoming," wrote Sis. And then came that letter from his sweetheart. He had faith in them, still does. He also knew that Uncle Sam would allow him to go home in twelve months if possible. The time went by slowly, sometimes he sat in a daze thinking of the times he used to sit under the tree at home, now a loading line. It was hard but he would stick it out for Pa, Ma, Sis and his Sweetheart. Uncle Sam knew best.

It happened suddenly, on that day, no one will ever forget. The earth shook, barracks went to bits, bombs fell. "Remember Pearl Harbor." Now there was no question in his mind why his farm was made into an ammunition plant. No doubt now, Uncle Sam knew what he was doing and still does.

Sarge may be your son, my brother, he may have lived in Elwood, Indiana or in California, but he has a lot of faith in us. He needs us as much as we need him. Let us not let his confidence fade.

We of EOP now in our second anniversary have to work hard. It will be a tough grind but we can do it. Let our motto be "keep producin' so that Sarge can keep shootin'."

—Joe Motta, Group 61.

"They won't let him in 'til he looks as funny as the picture on his badge!"

THE BURNING PIT

By Scorchy

This time, folks, I am going to talk about the weather. Don't leave now because I have a little news for you that should make you stay and see it through a second time. I mean the weather and *production*. Soon things will be humming around dear old EOP at a pace for which even the most violent patriot could never hope. Now here's the secret—not long before the presses sped this issue of the world's greatest bed-time stories to the completion of its graphic excellence (save $2 and subscribe for two years) there was a Frost. Of course you still don't know the secret, but stay with us and—correct; you guessed it—there was a Frost and thus came the welcome and stimulating end of those two great menaces to your fellow workers' general efficiency, hay fever and chiggers.

This will come as particularly good news to **George F. Bent**, the man who much prefers to say "yes" in the Personnel Department, and **Paul Deylitz**, the maestro of that recalcitrant chemical, which for reasons of wartime secrecy will go unnamed. They wore their long underwear all summer, and of course didn't feel the cold spell when it arrived.

Imagine for a moment the great impetus that will go forth in the war effort when all the chiggers victims can add to their previous productivity the efforts of that other hand that has heretofore been diligently scratching the path of the wily little borer of the epidermis, much the same as a bulldozer follows along and backfills the ditch after the pipe has been laid. Of course, the chiggers didn't mind the scratching—it merely helped them along in their search for some really tender meat that hadn't yet been combed over by an earlier explorer of the same genus, which among us literary folks is almost always referred to as *Trombicula irritans*, and how *irritans!*

Nevertheless, it's no laughing matter and if you don't stop giggling at us poor honeycombed sufferers, you will receive a package of specially trained chiggers, each one with your initials on his back. They are trained to travel in echelon formation and thus appeal to your vanity when you are about to undertake their annihilation. The idea is that you start after them and when you see the dim outlines of your initials, in their proper order, such as "J J F" for **John J. Fitzpatrick**, one of our better patronized chigger hosts, slowly receding into one of the few untouched square inches of your tender outer skin, there comes a glow of personal satisfaction and final submission to that lifelong urge to let the tattooing go on, because down through the years you really wanted a bit of tattoo about you but could never decide on the proper design, and of course there was always the problem of location tearing you from the bulging biceps, now somewhat limp, to that manly chest which has in recent years taken on a resemblance to the bottom of Death Valley.

Well, to get on with our story. It will be a pleasure to see the fellow who not long ago was trying to synchronize the reciprocating action of the break-down tool with the horizontal scratching of the back of his neck and not doing too well at either endeavor. Then, too, the masked marvels that have been driving trucks along the sluice-like shoulders of **A. M. Lockwood's** nice new highways, will once again show their naked faces to the world without the exposed squint that usually accompanies one of those nasal explosions deriving from the ever active pollen and all that sort of ragweed. They were not masks — just handkerchiefs struggling bravely to prevent the victim from losing his upper plate every time he burst forth with a series of those nostralgic (now, my friends, there's a *word*) upheavals. Yes, verily, the summer annoyances are gone, but Scorchy is always with you.

Delivery of War Bonds to Employees Speeded By Adoption of Agency Plan

Cash Purchases Now Available at EOP; 10 Per Cent Schedule Published

War Bonds purchased by employees on the payroll allotment plan will be delivered by registered mail in one week after the final salary deduction is made, it was announced by **Comptroller John J. Cole.**

This faster delivery is made possible by anticipating the number of bonds needed and purchasing them ahead of time. Delays heretofore were due to the fact that purchases had to be made from the Federal Reserve Bank after deductions had been completed. EOP has been made a bond agency, making it possible to keep a supply on hand.

Employees may now purchase War Bonds for cash and receive immediate delivery, Mr. Cole said. He asked that anyone interested in this plan visit his office in the Administration Building.

EOP's record of putting 10 per cent of earnings into War Bonds is high and has been praised by numerous Governmental officials. A chart showing the weekly deduction which should be made to entitle an employee to membership in the honorary Ten Per Cent Club is published elsewhere on this page.

Post Offices in a number of communities, particularly Wilmington, have said they have a number of War Bonds which have not been called for by the addressees. If you think the bond you have purchased has been unduly delayed, check with your Postmaster.

Women

By
CATHERINE NOONAN

That attractive and vital woman in the immaculate white uniform you see at the cafeteria is **Mabel Albrecht**, the new manager. Planning menus, buying food, supervising 35 employees and making private luncheons and dinners a success are part of her job plus any unclassified headache that comes along. The good food and well-balanced meals served at the cafeteria are no hit or miss affair. Mrs. Albrecht was graduated from Washington University with a B.S. degree and did graduate work at Purdue and Wisconsin universities. She was manager of the industrial cafeteria for the International Shoe Company in St. Louis and then went to University City, a suburb of St. Louis, to be manager and food supervisor of eight public schools. Also on her career list are dietetic work at Barnes Hospital in Washington and six years of nutrition work in the extension division at the University of Illinois. Mrs. Albrecht is a widow and has two sons, 9 and 10 years old.

***Norma Fratia**, file clerk in the* Personnel Department, recently celebrated the eighth month mark on her very first job. Norma loves flowers and wears them in her hair for evening occasions . . . likes all sports, especially ice skating and roller skating. . . . **Ronald Reagan** is her favorite movie actor . . . her favorite dish is fried chicken . . . studies voice and plays the piano . . . has brown eyes that inspired the saying "the eyes are the window of the soul" . . . is addicted to sweaters and skirts . . . she is in the cast of EOP's Pinafore . . . getting up in the morning is her pet peeve . . . she has had several poems published . . . likes coffee in the morning . . . has sung in The Red Mill, The Mascot and Sweethearts at Joliet Township high school . . . yellow is her favorite color . . . doesn't think she could work in a quiet place after the Personnel building . . . Faust and Martha are her favorite operas . . . likes being a white collar girl.

Personnel

JACK GARNANT
Correspondent

Jack Hogan said good-bye a few days ago to return to his studies in Industrial Relations at the University of Missouri. Jack leaves a lot of good friends behind and they will all miss him.

Another serious loss to the Personnel Department is the departure of **"Ginnie" Odenthal Gallagher.** Mrs. Gallagher returned from her vacation with a new name and found herself in a new job in the Legal Department.

Harry Dean returned from a brief and pleasant trip into the Ozark Mountains and managed to arrive just one lap ahead of the post card he had sent his fellow workers.

The school bell summoned two messenger girls, but a tiny redhead is efficiently taking their places. Her name is **Rita Cushing,** alias "Rusty."

Both **Mrs. Selma Brown** and **Mary Cunningham** were welcomed back in the yoke again after enjoyable vacations.

Announcement that the addition to the Personnel Building will soon be completed was received here with relief after several hectic weeks of trying to hear and be heard over the din of a horde of hammers. What price glory!!!

V-Mail Letters Now Available At Post Offices

Soldiers, Sailors, Write from Camps And from England

Receipt of a V-Mail letter from **Pvt. Oral Cox**, formerly an EOP fireman, from somewhere in England, serves as a reminder that V-Mail facilities are now available to those in this country who wish to write to someone in the armed forces overseas.

Letters written on the V-Mail forms are photographed on a long, narrow film which reduces weight and speeds delivery. The films are printed and a photostatic copy is delivered to the addressee. V-Mail forms are available at most Post Offices without charge and soon may be obtainable at stationery stores at small cost.

Private Cox's letter said, "I have been receiving the paper from the Elwood Ordnance Plant and I enjoy it, too. I worked in the Fire Department at the Central Station up until April 21, 1942. I saw in the July 31 issue a picture of some of the boys of the Central Fire Station. I am somewhere in England. I can't tell you where. I am feeling fine. Keep the good work up at the plant."

Master of Understatement

Letters from overseas were received also from **Sgt. John R. Burke**, a former guard, and **Pvt. Glenn E. Gordon**, formerly in Group 1. Sergeant Burke, a master of understatement, said his "address had been slightly altered" and referred writers to his new address in care of the New York Postmaster. He asked that his regards be given to **Chief M. C. Baughman** and his other friends here.

Private Gordon said he was going on foreign duty soon when he wrote on September 7 and enclosed his new address in care of the New York Postmaster. He said further, "Tell the boys to keep up the good work and the boys in service will do the best for our country." He sent greetings to **Supt. J. E. Salmon** and the employees of Group 1.

"Last week I thought about all of you down there in Elwood," wrote **Pvt. Fred M. Padley**, Paterson, N. J., a former inspector. "I happened to be over on Bedloe's Island and up in the Statue of Liberty (and if you have ever had this experience) you can well understand how one feels, for while you are up there, you become devoured with an overwhelming amount of pride and esteem for the U.S.A.

Inspired by Statue

"It is while you are up there and looking out, relishing man's accomplishments in a great nation, that you find your pride starts to swell and you see your country as the greatest on earth and it is while you are up there that it seems most invincible. And you don't only feel the meaning of the word invincible in terms of a word or a phrase, you feel it in the spirit of every red-blooded American today.

"Yes, you feel that it has been won and paid for dearly in terms of blood, sweat, and tears, and that it is to be preserved, that is our liberty, democracy and invincibility.

"Yes, the old lady stands there as a warning to those who would threaten these, our ideals. I'm sure that when those eight Nazi spies were drawing close to our shores, that she must have slowly shook her head and said: 'I'm sorry, but you are stepping too close to our flowers.'

"Now who is it that protects our homeland and our cherished ideals? Our President, the armed forces and the war workers and every other loyal citizen. Now while I was up in the statue I thought of all this and I was carried back to Joliet and Elwood, where I was once employed, and I thought of what a wonderful job you are all doing and I also realized the great effort you are all making and the strain and toll that it must be exacting from you, but don't ease up, keep them rolling. Keep up the good work, hold up your end and we will hold ours up.

"I would like to say hello to all my friends and fellow workers, particularly **Ted R. Stegar** of the Inspectors."

Sailor Wants Letters

Pvt. Stephen J. Rusina, Hill Field, Ogden, Utah, who used to work in Building 6 of Group 3, said he missed "the old gang of Fitz, Bob, Jim and Tiger" and wished "the boys would drop a line."

F. R. Lippner, seaman second class, Pensacola, Fla., said he appreciated *The Bomb-Shell* and added, "ever since I received the first copy I keep looking for the next. It seems good to read about and see pictures of friends back at the plant.

TELEPHONING her son, Pvt. Fred Furry at Shepherd's Field, Texas, recently, his mother, Mrs. Leata Williams, EOP phone operator, shown here, said he asked his former buddies here to write to him. He worked in Group 5.

"Most persons don't realize how much that means to a fellow in the service. It sort of makes a fellow feel as if he was closer to home . . . or something. It's a feeling that's hard to explain unless one experiences it. By the way, if there is anyone who would like to write to a sailor, make it known . . . I would answer all I get." *(Editor's note—Call Line 4206 for address.)*

Pvt. John Brannich, Fort Bliss, Texas, sent regards to the boys in Group 2. **Pvt. John R. Vilmar** wrote that he had been transferred from Camp Cooke, California, to the Parachute School at Fort Benning, Georgia.

Army Life Fast

Sgt. L. M. Rice, Pine Camp, New York, said he hoped "good old Group 1 is going as smooth as ever. I am with a medium tank company and like the Army fine. We work long hours, have good eats and good beds . . . what more could a guy ask for. Just keep the shells rolling off the lines like you have in the past and we will try to put them where they will do the most good."

Things are moving fast in the Army, two letters from **Corp. L. L. Ruphard** indicated. In one dated September 1 from Keesler Field, Mississippi, he signed himself as a private and said he would like to hear from all his old buddies on the Guard force. He wrote again on September 9, this time as a corporal at an aviation mechanics' school in Baltimore, Md., saying he would be there for 30 days.

Pvt. Harold Santacroce sent greetings to **E. G. McAloon** and his staff from Duncan Field, San Antonio, Tex. **Pvt. Charles E. Hanson**, Camp Rucker, Alabama, former assistant superintendent at Group 3, said "keep loading and keep them good, for good soldiers need good ammunition. Our soldiers are a fine lot, getting fine training and with your wholehearted effort victory will be assured."

Wife, Sister Write

"Please convey my regards to everyone in Group 3 and tell them I am anxious to hear from them," wrote **J. F. O'Neil**, U. S. Navy, Ward Island, Corpus Christi, Tex. "It's gratifying to know that the men are all doing such a good job and I will always consider it a privilege to have been part of such an organization."

Mrs. Donald F. Phillips, Joliet, wrote that her husband's address had been changed to in care of the Postmaster, San Francisco.

"I was a foreman in Group 4," wrote **Pvt. Harold D. Thompson**, Aberdeen, Md., "and I enjoy reading the paper very much. After I finish reading the paper, it goes all around my barracks. The other men get great pleasure from reading it and join me in saying thanks for sending it."

"I have been receiving *The Bomb-Shell* ever since I've been in the service," said **Pvt. Richard Krallman**, Stockton, Calif. "I wish I could be back there working with the boys in Group 2. I am taking a two-months course in motor maintenance in the Quartermaster Corps and then I will be shipped to another camp."

Vilda G. Holm, Reddick, Ill., an EOP employee, said the name of her brother, **Pvt. Wayne F. Michaels**, Fort Bragg, North Carolina, had been omitted from the EOP Honor Roll. Others who have noticed such omissions are requested to write to *The Bomb-Shell*.

Letters or cards were received also from **Pvt. William C. Kennedy**, Camp Gruber, Oklahoma; **Pvt. Oliver Soucie**, c/o Postmaster, Seattle, Wash.; **Pvt. Frank J. Houser**, c/o Postmaster, New York; **Pvt. Arthur Metz**, Fort Knox, Kentucky; **Pvt. John Minerich**, Fort Worden, Washington; **Seaman William Allen Barcus**, Norfolk, Va. (formerly of Group 7-4); **Pvt. S. Holtzman**, Pine Camp, New York; **Pvt. Ray C. Hardwick**, Ford Ord, California; **Pvt. Lester DeBolt**, Fort Sill, Oklahoma, and **Anna Bartz** of Group 1, who wrote in behalf of **Pvt. John F. Egan**, Fort Sill, Oklahoma.

High Explosives

MARJORIE HOWERTON
Correspondent

St. Clair Smith announced his purchase finally of an "Orthodox" hat and hopes it meets with everyone's approval (including Scorchy's).

The High Explosives office force is overjoyed with its new office which overlooks the front entrance—really seems like a palace after saying "Pardon, may I have my foot?" for the past year.

Irving Bovee, assistant superintendent, is vacationing for several days. He left neither address nor telephone number—it's a hunch that "he wants to be alone." **Al Augustine** has double duties now.

Group 68

Group 68 really has a system. Every week each of the nineteen 68'ers extract a dollar from their jeans and deposit it in a kitty—the $19 buys a Defense Bond and at the end of the week the guard (with his eyes closed) pulls a number from the hat. The fortunate winner last week was **Andy Perino**, general foreman.

Every time Davenport, Ia., is mentioned, it rings a certain little musical note in **Elmer Zost's** ear—could it be Dan Cupid playing his harp?

Frank Perino is almost, but not quite, recovered. He's back on the job with the able assistance of a pair of crutches.

Elect Jubera and **Frank Ciancelli** have answered their calls from Uncle Sam and are in the Navy. **Robert Wysock** left September 25 for the Army.

Group 66

E. L. McCray, who says the blackbirds are going South and the fish aren't biting, is the new general foreman at Group 66.

Ralph Seeley, former clerk at 66, left September 11 for the Navy Air Corps.

A coin was tossed between Mr. McCray and Uncle Sam for **Earl Hunt**, right hand man in 66—Uncle Sam won and Earl will leave soon for the Navy Air Corps.

Group 65

Congratulations are in order for **John J. "Sparky" Adams**. "Sparky" was married September 6 to his o and o (one and only).

Group 64

If gorgeous flowers take your eye, you shouldn't miss Group 64's beautiful spectacle of Mother Nature—credit is due **Stanley Washkowiak**.

Group 66-A

Little **Art "Dick Tracy Jr." Skorupa**, Government inspector in 66-A, has been handed the title of "baby of the Igloos." Why?

"Pop" Redmond is sporting a bandaged hand.

"Bunky" Binkowski practically knocks himself out running back and forth in 66-A.

St. Elmo "Kansas" Stewart is the new general foreman at 66-A.

Gilbert Withrow, High Explosives truck driver, left September 17 for the Army. He was given a cash gift by the gang.

Bob Matone, Group 63's man Friday, has entered his junior year at Illinois State Normal, where he is preparing himself for a teacher's career.

Chris Orbeson, carpenter, can do more with tenpenny nails than drive them through 2x4's. Believe it or not, but he can induce a nail to travel from the corner of the left to the right eye and out—no damage to either eye or nail—could be that the eye is quicker than the hand.

New material checker in 63 is **Wendel Overocker**.

Walter Beaudoin has joined the "Sea Bees" and will leave soon for foreign duty.

Laboratory

The athletes of history will have to make room in the annals of fame for the bowlers who added so much to the reputation of the High Explosives Laboratory one night last week. Among the *high* scorers were **Nelson Tippett** with 76, **Herb Hafele** with 85, **Charles Clifford** with a minus 10 (he insisted on using the other alley!). Clifford has since decided that he'd better go to night school on Wednesday nights (bowling night) because as a bowler he'd make a good electrical engineer!

Verneille Holder is slowly recuperating from lack of sleep—said lack due to her extensive entertaining of her sister and brother-in-law from Texas. Any innovations that will prove helpful in holding her eyes open will be more than greatly appreciated.

For your information the Happy Chemists consist of six gentlemen and three gals. But now they will have to be reclassified into five gentlemen and one *brute*. **Palmer Overholt** just cannot resist hitting gals where it really hurts, and it usually takes hours of apologizing on his part, and lectures on the lost art of chivalry by Mr. Tippett before victim and victimizer are again on speaking terms.

All extend sympathy to **Ellis Steinberg** because of the death of his mother.

Marcia Mitchell doesn't know whether it's night or day, and she doesn't seem to care. Her special part of Uncle Sam's Army is at Camp Roberts, California, and the first day she heard from him she got five letters—and she hasn't come down from the clouds yet. She doesn't mind telling you in the least that her hubby is an "exceptional specimen of brilliant humanity."

Is it only rumor, or is it the truth, that the Kankakee City Council is desirous of passing an ordinance prohibiting Herbie from serenading his wife and daughter in so corny a style?

Marge Kinser moved to Joliet last week, and nowhere was there to be found a woman to care for year-and-a-half-old **"Kit" Kinser**. So, undaunted, Marge and her husband, **Jess Kinser**, headed for Kankakee to meet the train for Memphis on which Marge's dad was a passenger. The three-minute stopover in Kankakee gave her just time enough to rush the baby on the train into abashed grandpa's arms—and to rush off again. Latest reports tell us that young "Kit" had vanilla wafers and milk for breakfast, and that grandpa gladly relinquished the changing of diapers to another man who had more recent experience.

The last of the eastward voyagers, **Ford Teeter**, started his vacation to God's Country (Columbus, Ohio) on a payday, and he's expected back on a payday—which is plenty nice going.

Sewage Superintendent Named

Donald Watchorn was appointed superintendent of sewage disposal August 22, it was announced by **A. M. Lockwood**, general superintendent of utilities.

SUMMER PICNICKERS added this group of Inert Storage Department employees to their roster recently. Charles Herbig, superintendent of the Material Warehouse, is the man with the bat.

SHUFFLE BOARD attracted this group of enthusiastic employees who attended the first of a series of bi-weekly fellowship meetings in the Recreation Building September 17.

Group 1

JACK BARRY
Correspondent

Bill "Red" Corcoran is back on the job after a very enjoyable six weeks spent in convalescing from an operation. . . . **Armand Vicini** dropped around at his house at 6 a.m. only to find that he was locked out and now there are no hinges on his screen door. . . . The Gold Dust twins, **Ida Lippold** and **Garnetta Golding**, have recovered from the picnic and are learning how to make bullets along with a lot of other fair ones. . . . **Joe Greenwood** and **John Machino** spend their lunch periods practising "holts" since **George Gibson** promised that he would match them for the rassling championship of the group. . . . **Fritz Meyers** claims a record because he had ten flat tires in four days. Seems as though Meyers' tires are on the fritz.

John F. Weakman, Jr., wrote to his former pals in the group from his army camp saying, "Wish you were here," and so on. . . . **Bob "Zipper" Zintarski** is back on the job after two weeks of sickness which streamlined him to some extent. . . . **Dick Thonasse** and **"On The Belt" Dan Phillips** are at it again. Each claims to be the better shipping foreman.

Wedding bells rang for **Don Ferero** and Miss Golding September 19.

Eddie Grant is all smiles again. He has a slightly used torch to give away for he and the little lady have kissed and made up. . . . Congrats to **Henry Novak** who used to punch a time clock around here. Recently he was made general superintendent in the painting department at the new ship yards over Seneca way.

Mabel Ward says that it is remarkable how well the lads keep their hair groomed and find time to shave every day. Maybe when this world war is over the fellows can hunt and fish as the Indians used to do and let the little woman go out after the pay-check. . . . **Mr. and Mrs. Bill McRoberts** are up in arms for their new arrival of August was described as being a girl whereas the little rascal is a bouncing boy. . . . However **Carl Larson** of Morris announces the arrival of an 8½-pound girl September 7 and no one could be more proud than Carl.

Bill Sugarman and **Charlie Woodbury** put on an Abbott and Costello act which is a scream when they cry into their beverage. . . . **George Palmer**, so it's said, left the picnic 15 minutes after the lights went out but it is asked, "Which lights?" . . . **Bill Connors** was celebrating his 19th wedding anniversary September 8 when his daughter presented him with a lusty grand-daughter and Bill thinks that at 37 he is perhaps the youngest grandfather at EOP. . . . So to the end of the line with **Mid Slack** taking the stand. He had a birthday this month which was inadvertently left off the "Happy Birthday" list.

MASCOT of the Inert Storage Department is this goat with patriotic horns, painted red, white and blue.

Wilmington Dormitory Rooms Available

George A. Fairhead, supervisor of the trailer camp at Wilmington, announced that shortage of bed sheets in the Wilmington dormitories had been solved and asked that EOP employees be reminded that rooms are available.

There are eight dormitories, with facilities for 61 persons in each. Double rooms are $3 a week a person. Single rooms are $4.25 a week, but the number is limited. Each dormitory has a lounge and there is a recreation room in one for all dormitory occupants. Any one interested can call Mr. Fairhead at Wilmington 5921.

Second Meeting for Fellowship Set for Oct. 1

Success of First Session Attested By Big Attendance

Fast on the heels of the first, the second EOP Fellowship Meeting has been scheduled for Thursday evening, October 1, in the Recreation Building, it was announced by **A. E. Frosch**, chief engineer, and **E. A. Evans**, chief field engineer, co-chairmen of the steering committee. All those desiring to attend are asked to make their reservations with **V. L. Knudson**, Administration Building, by 5 p.m. September 30.

The committee in charge of the second meeting is composed of **A. P. Balston**, chairman; Mr. Knudson, steward; **T. M. Burns, E. S. Craik, C. J. Coburn, M. C. Baughman, J. J. Murphy** and **W. M. Dale.**

Success of the first meeting September 17 was attested by the more than 100 employees who attended. Dinner at the Cafeteria was followed by a program at the Recreation Building. Features included an outline of the purposes of the bi-weekly sessions by Mr. Frosch, reading of a letter of greetings from **Harrison Smith**, resident partner for Sanderson & Porter, and an exhibition of bowling by **Paul Krumske**, Chicago's individual match game champion for '41-'42.

Mr. Smith's letter said in part:

"It has been my experience that acquaintanceship makes for more sympathetic understanding and settlement of mutual problems, of which so many arise daily on this project. Problems solved between good acquaintances and friends are rarely difficult. Elwood has always been a friendly place and I am sure it will continue to be such a place.

"I hope very much that these meetings will be held as long as we are at Elwood and as frequently as you gentlemen may deem desirable. They will be interesting in proportion to the contribution which each of you makes to them, and from what I know you are all capable of contributing much."

A prospective country school teacher and her girl friend hired a livery rig to visit the members of the school board.

"You won't have any trouble with this horse," the liveryman explained. "He's perfectly gentle. But be careful not to get the rein under his tail."

When they returned he asked whether the horse proved entirely satisfactory.

"Oh, perfectly," the prospective school teacher responded. "We did have a couple of showers, but my friend held her umbrella over his tail."

More Power to You

EOP Lauded by New Service Chief

(Continued from Page 1)

them for three years at Ft. Crook, Neb.; Galveston, Tex.; Vera Cruz, Mex., and Brownsville, Tex. This was a period when active duty on the Texas-Mexico border was really active.

Taught at West Point

His next assignment was a very much sought after detail, namely, as instructor in Ordnance and Gunnery at West Point. During his tour at West Point, General Hayes received two promotions, that to 1st Lieutenant and in less than one year to Captain. His detail at West Point was followed by six months' tour of duty at San Antonio Arsenal, Tex., beginning in the latter part of 1917.

On January 5, 1918, General Hayes was promoted to Major, National Army, assigned as Ordnance Officer of the 5th Division, and went to France with this organization. While in France he attended and was graduated from the Army General Staff College at Langres. Following the Armistice, General Hayes served in the Army of Occupation in Germany as Assistant Chief of Staff, G-2, of the 4th Division.

Upon his return to the United States, General Hayes was promoted to Lieutenant Colonel, National Army, and was assigned as Executive Officer and Assistant Commandant of the Ordnance School of Application, Aberdeen Proving Ground, Maryland. The Ordnance School then being established supplanted the one which, before the first World War, was located at Sandy Hook Proving Grounds, New Jersey. The new Ordnance School was a very important project, designed to train officers from all the other branches of the Army who were detailed in the Ordnance Department for a four-year period. The school consisted of two courses, the first consisting of three months at Massachusetts Institute of Technology, and nine months at Watertown Arsenal, where the student officers studied metallurgy and testing, and also worked through all of the shops; the second, held at Aberdeen Proving Grounds, provided courses in administration, ballistics, a study of all Ordnance material and ammunition and the testing thereof. It was General Hayes' task to organize and operate this school, which has since developed into one of the most important projects in the Ordnance Department. At this time, General Hayes was permanently transferred to the Ordnance Department with the rank of Major, July 1, 1920.

Heads Corps Area

In November, 1920, General Hayes was appointed Corps Area Ordnance Officer of the Seventh Corps Area with Headquarters at Ft. Crook, Nebraska, where he first saw service as a commissioned officer in 1912. This detail was another task of organizing. His duties were to supply, inspect and maintain all ordnance material in the hands of all regular Army troops, National Guard and schools in the Corps Area, which consisted of Arkansas, Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota and South Dakota. He remained on this duty until January, 1922, when he was transferred to the Office of the Chief of Ordnance as Chief of the Military Personnel Division.

In August, 1925, General Hayes returned to Corps Area duty, this time as Corps Area Ordnance Office of the Ninth Corps Area with Headquarters at Presidio of San Francisco. This Corps Area takes in all of the Pacific Coast with its multitude of fortifications and military establishments, and also includes Idaho, Montana, Wyoming, Utah and Nevada. He remained on this duty three years when in June, 1928, he was transferred as Corps Area Ordnance Officer of the Eighth Corps Area, with Headquarters at Ft. Sam Houston, Texas. This Corps Area includes Texas, Oklahoma, Colorado, New Mexico and Arizona. General Hayes, at one time or another, was on duty in every state west of the Mississippi. He remained on this duty two years.

General Hayes was graduated from the Army Industrial College, June, 1931, and from the Army War College, June, 1932. Following the latter graduation, General Hayes acted as Executive Officer to the Chief of Ordnance for one year.

Rewrites Text Book

In July, 1933, General Hayes returned to West Point as Professor of Ordnance and Gunnery. During this four-year tour of duty, General Hayes extended and improved that portion of the course devoted to the study of automotive equipment and shop work, and, at the same time, brought the general course of instruction in Ordnance to a higher standard than was ever before attained. He was also responsible for the design of the modern Ordnance and Engineering laboratory and machine shop, which were constructed after he left and which are now in operation. He also accomplished another task which usually falls to each professor of Ordnance, namely, that of rewriting and bringing up-to-date the textbook "Ordnance and the Science of Gunnery." This is a task which involves a tremendous amount of work, as changes and improvements are constantly being made in Ordnance material and methods. The professor of Ordnance and Gunnery, in addition to his other duties, is a member of the Academic Board, Post Ordnance Officer and the Curator of the extensive Ordnance Museum. General Hayes received his promotion to Lieutenant Colonel on August 1, 1935.

In July, 1938, General Hayes was transferred to Springfield Armory, Massachusetts, and became Works Manager in 1940. In his capacity as Works Manager, he had charge of the layout and operation of all shops, and it was during this period that the Armory was tooled-up and quantity production of the new Garand rifles was attained. He was promoted to Colonel, Army of the United States, November 16, 1940, and in December, 1940, was assigned to duty as Assistant Chief of Industrial Service, Production, Office of the Chief of Ordnance. This was followed by his assignment to the office of the Under Secretary of War, as Director, Production Branch, July, 1941, and Director of Procurement Branch to March, 1942.

General Hayes was promoted to Brigadier General, Army of the United States, September 29, 1941, and to Major General, February 28, 1942. In May, 1942, he returned to the Office of the Chief of Ordnance as Chief of the Production Branch, Headquarters, Services of Supply. On June 1, 1942, he was appointed Chief of Industrial Service.

The EOP Guide Post

Classified ads will be published without charge for EOP employees and their families. If you can offer transportation, want transportation; want to trade, buy or sell something; have a house or apartment to rent; have lost or found something, you are invited to make use of this service. Deadline is Wednesday, ten days preceding publication.

For Sale—1937 Ford, 4-door sedan, radio, heater, 5 good tires, $175 cash. **Carl Anker**, Line 4280.

For Trade — Newly overhauled '37 Packard (120) 7-passenger sedan, six-ply tires, will trade on small sedan. See Guard 643 at Gate 6, Group 3-A.

For Sale or Trade—35 vari-colored large size paper lanterns suitable for garden parties. Address **John Alar**, Braidwood, Ill.

Riders Wanted—For Chicago or intermediate points either by Route 6 or 7. 1940 Oldsmobile. See **J. E. Ryan**, Room 39, Administration Bldg., or call Line 2263.

Riders Wanted—Leaving Braceville at 10:15; Braidwood at 10:20 and Wilmington at 10:30 nightly except Saturday, passing Fuze & Booster Gate and through Richards Farm gate to Central Fire Station and returning same route. Call **Stephen McSweeney**, Line 4259.

Riders Wanted — For 4 to 12 shift between west side of Chicago and EOP. Call **Harry Tilden** after 4 p.m., Line 4291, or address him at 3123 West 15th St., Chicago.

For Rent—Room with private bath for gentleman, $5 a week. **Mrs. Wilson Burnham**, 605 Grant Ave., Joliet, Phone 22711.

BOWLING ALLEYS, renovated after their recent drenching, were popular with the largest group at the employees' fellowship meeting in the Recreation Building September 17.

Happy Birthday to You!

This is a regular feature in which the birthday anniversary of as many EOP workers as possible will be listed for 2 weeks in advance. Watch for your own. Call your friends.

Frances Arnold, Group 3; Agnes Becker, Group 7; Edward Born, Group 3; John Brown, Utilities; Anna Calacci, Group 5; Thomas Collins, Utilities; Marion Crocker, Group 4; George Ewing, Group 3-A; Murland Foster, Group 1; Hubert Frosh, Utilities; Frank Goldenstein, Fire Dept.; Charles Gorman, Group 3; Anna Havran, Group 6; General Hedrick, Materials & Stores; Charles Hill, Inspection; Robert Holman, Group 3; Clarence Johnson, Safety; Arthur Koch, Ordnance; Charles Miller, Ordnance; Hollis McKnight, Group 3; Paul Miller, Fire Dept.; Milton Nelson, Group 1; William Proudley, Ordnance; Dorothy Richards, Group 9; William Rockrohr, Accounting; Thomas Scott, Utilities; John Smith, Fire Dept.; Arthur Thompson, Group 3-A; Frank Tur, Group 3-A; Melvin Umphenour, Group 2; Frank Wehrli, High Explosives; John Willhoit, Group 3-A; Orton Wilson, Group 2; Sigmund Wysocki, Ordnance; Albina Znidarsic, Inspection.

October 10

Carl Anderson, Guards; Henry Baerlocher, Utilities; Nelson Barker, Guards; Emma Bertram, Group 4; Stanley Bielawicz, Group 3; Leo Boyle, Guards; Gladys Bravick, Group 9; Helen Brown, Group 4; Walter Bull, Group 3; Stephanie Burzawa, Group 8; Jacob DeBok, Utilities; Herm Geiken, Group 1; Joseph Goodrich, Utilities; John Gorski, Group 1; Harvey Harding, Group 1; Everett Harris, Group 3; Ruth Hart, Group 9; Ruth Henry, Group 5; Frank Janousek, Group 3; Ralph Johnson, Guards; Clarence Lindsay, Guards; Walter Lupke, Group 1; Harry Mahoney, Utilities; Hugh McElroy, Materials & Stores; Anna Mellinger, Group 5; Abrathar Miller, Utilities; Warren Panghorn, Utilities; E. Poolvirgil, Utilities; James Preston, Jr., High Explosives; Raymond Reardon, Utilities; Fred Reitz, Group 3; James Riordan, Utilities; Donna Rose, Group 9; Harold Stern, Group 8; Helen Stonitsch, Group 9; Dwight Warren, Group 3; Ann Wofton, Group 5.

October 11

Andrew Ballock, Group 1; Jacqueline Binzen, General Offices; Edith Cerre, Group 7; Edmund Dickens, Guards; Arthur Diedrich, Group 1; Edward Dowell, Group 4; Anthony Frericks, Group 1; Frances Hakey, Group 1; John Henderson, Group 5; Lillie Henderson, Group 8; Garland Int-Hout, Utilities; Anthony Jankowski, Utilities; Margaret Jesberger, Ordnance; Louis Kalina, Sr., Accounting; Anna Kelch, Group 9; Joseph Klemick, Utilities; Dorothy Lehman, Group 8; Olive Lewis, Group 1; Clifford Lord, Group 1; Selma Malone, Group 5; Frank Miller, Group 3; Florence Mock, Group 9; James Moore, Utilities; Franklin Mulligan, Group 3-A; Beatrice Newcomb, Group 6; William Palmer, Plant Protection; Anna Princko, Group 8; Jackie Spencer, Group 1; Thora Stoner, Group 7; Donald Sutton, Ordnance; Elmer Utley, Group 7; Geraldine Ward, Ordnance; James Ward, Utilities; Samuel Wilfong, Group 3; Viola Winterstein, Group 9.

MILITARY PRECISION is being taught to EOP guards by Capt. John A. Hardy, security officer. This class, shown with Captain Hardy at the left and E. O. Huey and Chief M. C. Baughman at the right, is being trained to drill other guards.

PIONEER BUILDER is a title appropriate for E. A. Evans, chief field engineer, who arrived here September 27, 1940, to supervise construction of EOP. He was with the Morgan Shell Loading Plant, Morgan, N. J., during World War I.

Groups 4-9

Fuze-Booster-Primer and Detonator Lines

JUANITA HARTER
Correspondent

Group 4

Mr. and Mrs. John A. Lower recently enjoyed a week's vacation at Twin Lakes, Wis., and reported that the weather was fine. Imagine a week without rain! It can't happen here!

Congratulations are in order for **Mary Jean Schmitz**, ever-smiling inspector, on her marriage September 5. Lucky man? **Elmer Falk** of Peru, Ill.

Lucille Alwine left September 23 to join her soldier husband in California.

Claude Bailey, foreman in Building 14, was married September 5 to **Delores Kauffman**, inspector in Group 5. Claude, not being satisfied in acquiring a new wife, is also acquiring a new car!

John J. Murphy and his secretary, **Doris Cox**, have left Building 14 in favor of Building 25. Their component room friends say it just isn't the same without them.

"Red" Ross has left for San Diego, Cal., where he is in training with the U. S. Marines.

Group 5

Tillie Watson is looking very attractive with her new hair-do.

Congratulations to **Danny Kerns** and **Doris Ivansik** on their recent marriage.

"Pop" Jeffry and **Lillian Malinske** did the Veloz and Yolanda fling at the Group 9 picnic. Incidentally, "Pop" admits to about 45 of his 70 years.

Jim McCauly seldom takes a rest period any more. There are girls working in his section now.

Sophie Mathovic just returned from her vacation with the "Cadets."

Take a good look at **Verna Lazor's** eyelashes. Pretty, eh?

Jane Snapp, who is now at Group 4, is missed by her former "side kicks."

Group 7

Something new has been added in "7" . . . B-19 Mosquitoes . . . **Joe Smith's** baby girl, **Carolyn** . . . Thursday sessions with the Coal City Club. . . . **Polly** (pardon my southern accent) **Evans'** new straw hat. . . . Diamonds for **Madelyn Carlson** and **Mary Jane Clennan**. . . . And those new "Tetryl-jeep" coveralls the 7-4 girls are sporting. Toujours, glamour!

Maybe the girls weren't in lace, but the lads were in khaki! **Shirley Hoeller** and **Joe Horvat**—**Jennie Kompanek** and **Orville Scott**—**Geneva Killian** and **Robert Driscoll**—**"Bz" Gabel** and **John L. Crane, Jr.**—pinned a "V" for Victory on Cupid.

Patriotism is flourishing among the boys here. **Russ Sineni** left for the Marines last week. **Ted Morgan** is waiting call to report to Naval Construction. **Dick Gullixon** has already left to sprout wings for the Naval Air Corps.

Dorothy Buldak, formerly Dorothy Kamerick, inspector, is the happiest girl in Group 7. She was recently married and has just returned from a honeymoon trip spent in Detroit, Michigan.

The Paint Shop gang, Chuck, Al (the personality kid), and Bud, look like they have joined the House of David. Seems like the boys have a bet on as to who will shave first. Wonder how long it will be before they have to wear hair nets on those beards?

The Powder girls in 7-4 look pretty cute in their new coveralls and will be the envy of all them this winter when it gets cold.

Hilda Stokes appreciated the gift given her by the girls.

Irene Shroba, Government inspector, turned her vacation into a honeymoon.

Dorothy (Bravick) Dowdle, Group 8, formerly of Group 7, is spending two weeks with that Sergeant husband in Fort Wayne.

Margaret Worby, inspector, who recently resigned because of ill health, will be missed by her many friends.

Dorothy Donahue from 7-4 is center aisling it September 26.

Group 8

Jim Nevin, assistant superintendent, spent Labor Day visiting at Matoon, Ill.

Did the girl say "yes" to **George Elum**, assistant superintendent, on his week-end holiday trip to Youngstown, O.?

Robert Otte and **Robert Breen**, foremen, are adding a little to the holiday toward a vacation.

Congratulations to **Dolores Getson** and **Rudy Getson**, fire guard, who celebrated their 12th wedding anniversary recently.

The girls in Building 11 are wondering if **Bill Wilhelmi** and **Herby** really had a blow-out to account for the black eye.

Foreman George Durham, Building 11, complains of trains keeping him awake at night. Gee, hasn't anyone ever told him that there is another side of the track.

Dorothy Linnard spent Labor Day in DeSelm, Ill., at the Shuffler family reunion.

Margaret Forbin, Phyllis Fillette, Catherine Rumpf and **Mary French** were photographed recently for the *Chicago Herald-American*.

A surprise birthday party was held for **Teresa Seno**.

Art Swanson, Mary French, Dorothy Linnard and **Ann Runyon** gave a chicken supper for **Nurse Sarah** of Group 8.

Girls of the Waterproofing Department had a chop suey supper for **Nora Lee Smith** who was married. She received a lovely gift from the Group.

There was a frog eating contest September 10 in Building 8. **Wayne Rosiland** bet **Jack Darkins** $5 he could not eat a frog. The frog was swallowed. Wayne paid the $5 and Jack suffered the consequences.

Group 9

Congratulations are extended to **Charles Smith** and **Dorothy Allen**, who were married September 13. Charles is a machinist and Dorothy is getting valuable experience pushing one of the powder buggies.

More marriage congratulations go to **Bernice Schubert**, who married **Pvt. Leslie Guard**, stationed at Camp Shelby, Miss., also to **LaVon Stevenson** and **Pvt. Charles Sanford** of Camp Sutton, Monroe, N. C.

The recent festive occasion at Oak Grove in Rockdale, attended by approximately 700 employees and friends, was a stupendous success and, from all reports, everyone had a wonderful time.

Bill Lawrence was voted the most popular male.

Ed Nemanich missed his calling. He should be a crooner.

What happened to **Ben Homberg** on the dance floor that was so funny the next day.

John Neely acted as dispenser.

T. M. Burns, general superintendent, and **George M. Morrison**, assistant general superintendent, were photographed every time they turned around.

Mr. and Mrs. W. E. Whaley were hounded by camera fiends. **Bill Lawrence** was a willing subject for candid camera fans.

Ray Ruder, Group 9 baseball star, went around knocking people out with his elbow.

Kenneth "Bud" Weber did alright for himself with a plentiful supply of dancing partners.

Chuck Hickok, proudly escorted his new wife around, as did **Del Millican** and **"Little Boy" Jordan**.

Maryjane Barrowman from Group 6 won the War Bond.

Billie Burrill did a tap dance with her mouth for the entertainment of all.

John Clark went around playing "Superman." And **Ed Vannie** was his natural romantic self.

Grace Short did better than **Ginny Simms** on those songs.

"Farmer" Schmeh Busy With Melons, Pumpkins

By Loretta Ryan

Well, here we are again trying to meet another deadline. We have a column in *The Bomb-Shell* called "Production Planning." Every other week we try to tell you about the people in the department and how they spend their idle time. That sort of thing gets monotonous, dont you think? So do I. So this time we have decided to tell you what production planning really means.

J. C. Schmeh is an agriculturist, believe me. He is the department head, but he farms on a large scale. Prove it, you say! Alright, let's go back about two years.

Did you ever drive out this way? There were rolling hills and attractive farms. People were engaged in raising products to sustain life. There was the "Bell" farm, the "Hayden's" and the "Forsythe" farms; for military reasons we will forget the names, let's say two years ago farm (A) was raising melons, the delicious kind. About this time the advance guard of "Farmer" Schmeh arrived on the scene. Sheds and barns were demolished, new buildings took shape, large greenhouses, *hot-beds*, if you like, sprang up, and now "Farmer" Schmeh is raising *melons*, small but effective *melons*, anti-tank mines, they call them, I think.

Over at farm (B) two years ago there were pumpkins and watermelons growing, large melons, and now they put in more hot beds, run in a few railroad spurs and we find demolition *pumpkins* growing, one and two-ton *pumpkins*, if you please. So you see the farmer of two years ago raised crops to sustain life itself, today Farmer Schmeh is raising crops to sustain a principle, a standard of Life.

But where does "Farmer" Schmeh fit into this picture you ask. His is a busy task. He has to know his *seed*, make sure it has good *germination*, and it has to be fresh, you know. He also has to know which soil grows the best land mines, where demolition *pumpkins* will thrive. If he plants so many seeds he must know what ratio of products he will harvest. He has to know his market, who wants how many, and what. He is a busy man, he is raising demolition *pumpkins* today to meet a deadline at two o'clock next Tuesday in a little shop off Walla Walla Square in Tahiti.

If "Farmer" Schmeh passes you and fails to acknowledge your greeting, don't bother him, because he's probably trying to get a load of *pumpkins* and *melons* off to Guatemala Canal to be used on a menu there some Tuesday next week.

Hospital

EVELYN RICHARDS
Correspondent

After many months of service at EOP **Dr. H. W. Harrison** left to take over a private practice on the west side of Chicago. Pioneer construction workers will recall him if they had to visit the first aid station at Richards Farm. He then was employed by Corbett and Corbett. Early this year he was transferred to the EOP Hospital which was completed at that time. On September 4 a farewell party was given in his honor at Trojan Hall in Joliet. A committee consisting of **Margaret Gregovich, Joe Chizmark** and **Tom Moore** made all the arrangements for a successful evening. Guests participated in dancing throughout the evening and refreshments were served buffet style. A gift was presented to Dr. Harrison. Among the guests were **Mrs. H. W. Harrison, Dr. Jacob Wechsler, Dr. George Luke, Dr. B. G. Giel, Dr. L. N. Cohler, Marjorie Hartong, Gene Hurley, Elizabeth Russell, Bertha Perush, Louise Thompson, Dorothy Busse, Miss Gregovich, Dorothy Schoop, Gertrude Blair, Lucille H. Nahas, Mary Kulpa, Elsie Baer, Evelyn Doran, Louise Ambrose, Thelma Talbott, Evelyn Moore, Esther Anderson, Lucy Harkness, Mr. and Mrs. Roscoe Sidell, Mrs. Thomas Moore** and **Mr. Moore, Mr.** and **Mrs. Edward Robinson, Mr. Chizmark, Roy Healy, Tom Singer, Ray Langlois, Lester Johnson, Feldon Luke** and **Roy Pick.**

The rainy days have made grasshoppers, walking sticks, moths and butterflies go into hiding. But not all have disappeared, as lovers of nature at the hospital have made quite a large and varied collection of petrified bugs and butterflies in the first aid room. In the laboratory a four-inch caterpillar is hibernating in his self-spun cocoon; it is expected to shed the shell next month.

With the rainy days came a host of mosquitoes; the largest one ever seen was brought in from Group 70 to be examined by the laboratory to see if it were a carrier of malaria. By the size of it, Group 70 is raising extra large ones this year, so they can transport bombs to the Japs. Its body length was one-half inch, wings were one-half inch each with the four legs measuring a little over one inch. The malaria carrying mosquito is the female from the Anopheles Maculipennis species. The mosquito in question upon dissection was found to be a female mosquito from the Culex Pipiens species. This type does not transmit malaria; it can be transmitted only by the female of the Anopheles Maculipennis species. As Kipling said, "The female of a species is more deadly than the male." This is true because a female mosquito only is equipped for biting and the male is not. So remember, when you swat a mosquito you are striking a lady.

A trick of fate saved **Russel L. Voss** from being banged and bruised up one Thursday night when he rode home with **Elsie Baer**, X-ray technician. He wanted to get home a little sooner so Miss Baer offered to drive him into Joliet when she finished work and he accepted. It was a good thing he did as the car of **Jim Grady**, with whom he rode regularly, was struck by a bus and all occupants suffered bruises and shock. Upon careful questioning, Mr. Voss said he wouldn't have been in the car for $10 and Elsie said, she'd settle for $5. So far she is still waiting for the settlement.

Safety Engineer Is Just Good Neighbor

By James Macon
Safety Engineer

If you were driving along the road and a car should catch up to you to tell you one of *your tires* was going flat, you'd appreciate it, wouldn't you? The timely warning might mean the difference between life and death. At least it would mean you would be able to save that priceless tire before it was damaged. Not one of us would hesitate to do what we could to prevent an accident, especially to someone we knew. That's just being a good neighbor. Maybe it seems silly, at times, to be so extra careful all the time, but isn't it pleasant to be healthy and all in one piece? At work, you don't get paid any extra for taking chances, and at home, it is no harder to do things the safe way and, especially, to be a good neighbor and show your friends that safety pays.

Can you imagine a professional good neighbor? Seems kind of "too good to be true," doesn't it? Well, *safety engineer*, is just a 25 cent word for a guy who spends all of his time going around being a good neighbor to all the employees in his group. In fact, lots of times he sits up nights and worries about how he can make sure that no one gets hurt.

That Safety Man hears about every case of bruises, bumps, cuts, headaches, rash, or anything else that happens to any of the people in his group. He knows from bitter experience that *eternal vigilance is the price of safety*. He's got a big job on his hands and a lot of things on his mind. No one can know everything, or be everywhere. There's a lot of things the Safety Man doesn't know about each particular worker and his or her work which may involve hazards. But remember, he's the best friend you've got working for you all the time. What is more, he'll go to bat for you if you have an idea or can suggest any way of eliminating hazards.

And the payoff is something really to think about . . . *the safer we keep EOP, the more dangerous it's going to be for the three* ——! ——! ——! . . . and are they going to know it?

CLOSELY ALLIED with E. A. Evans since 1912 has been his assistant, George Mowatt, shown here. Jobs at the Morgan Shell Loading Plant during the last war, on bridges, canals, elevated lines and subways in New York City, were worked together.

Ordnance Inspection

GERALDINE M. WARD
Correspondent

Maj. Charles G. Tolson, former Army inspector of ordnance at the Elwood Ordnance Plant and now commanding officer of the Green River Ordnance Plant at Dixon, Ill., was here on official business recently.

Wayne Ross, Alfred Barnes and **Clarke Burke** have been assigned as Government inspectors in Groups 1, 3 and 3-A respectively. **Forrest Sloan** has been named a clerk in Group 1.

Lawrence Myers, divisional inspector, Group 4, was called to Indianapolis, Ind., September 12, where his son underwent an operation.

William F. Douville is very much occupied evenings reading a book entitled "The Finer Points of Umpiring." From all reports, he has been accused of showing a bit of partiality while umpiring the game between the Army Officers and the Inspection Department and a few of the spectators were not hesitant in voicing their opinion. In fact they became so boisterous that Mr. Douville overheard a few of the remarks and requested two husky officers to escort him off the field. Hence his interest in the book.

Blackstone the magician is reported to have consulted his physician regarding a cure for insomnia. It seems he has been worrying considerably since he discovered he has keen competition. Do you know that there is a magician at EOP? He excels in the *forty-dime trick.* Business duties keep him so busy he does not find time to display his remarkable magic ability, so his name won't be disclosed, at least for the present.

Robert Cryder has resigned to attend Law School at the University of Illinois.

Esther Noffke is a member of the Civil Aeronautic Patrol and has practically completed the required number of hours of solo flying. She will then have an opportunity to join the Women's Auxiliary Ferrying Squadron.

Melvin Dugan has never been known to lose his temper. However, the morning he was seen repairing a flat tire in the area he didn't appear to be in a very congenial mood. It might have been because it was rather early and he had not had his cup of coffee. Well, one excuse is as good as another.

The War Bond for the pay period September 15 was awarded to **Geraldine M. Ward,** whose pay check number disclosed a "full house."

Fuze & Booster Lab

Secretary Marie Plankar celebrated her birthday over the Labor Day week-end at Lake Lawn, Wis.

Joe Ralston really plays a vigorous game of golf. His partners are never the same again. Ask some of them! One set of golf clubs for sale—cheap!

At last **Mel Hurwitz** has found another Bostonian, **William Peterson,** divisional inspector, who, incidentally, has recently moved to Wilmington, Ill.

Since his marriage, **Howard Johnson** hasn't objected to having no tires, and complaints about lettuce-less sandwiches have ceased.

Group 3

James Mee, Sr., father of **Jim Mee,** died last week and the sympathy of the group is extended to Jim.

Olan B. Schwartz, Government inspector in Group 3, took the fatal step of matrimony September 13. Evidently he is not superstitious. The bride is the former **Margaret Blair** of Paris, Ill. Olan has been boasting of his wife's delicious biscuits, so he may expect callers one of these evenings.

All of the G-staff at Group 7 and her scores of friends among EOP personnel extend their very best wishes to a lovely new bride, the former **Irene Shroba,** popular G-gal of this group, who is now **Mrs. Stephen Bazzarone.**

Sylvia Nielsen has returned as lovely as ever after a long illness.

Katherine Etchison joined the staff recently.

Sympathy is extended to **Alice Steinberg,** Group 71, whose mother died a few days ago.

Group 5

Bernice Ksaiyek is glad Camp Grant is no farther away. It makes her week-ends more interesting.

Signs of fall include **Helen Bienot's** stunning black outfit and **Phil Horwitz** bringing hot coffee.

Does everyone wonder why **Elinor "Lea" Gudath** was so exuberant after Labor Day week-end. Could it have been receipt of a proposal?

It has finally come to light what **Milt Krissman,** group inspector, does with his spare time when he returns home from the plant. He has been selling newspapers on the downtown street corners in Joliet at midnight.

Wedding bells may chime for **Helen Skumanth,** assistant group inspector, when **Joe Bennett** comes home on furlough from Australia during the Christmas season.

Fire

STUART MOLONEY
Correspondent

Now that the picnic is over and the monotony of paying the bills is at hand, pause is taken to recall fond memories of that happy day.

Ladies and Gentlemen: The War Bond winnahs! ! ! ! **Leonard Zeigler, Homer Druin, Carl Richards, David Drabon, Frank Grey, Carl Guardia, Richard Rothlisberger, Joseph Notta** and **George F. Nelson.**

An advance detail of good-will ambassadors from the EOP Guards was right there to offer any possible assistance. They were stationed at the *"Drinking"* fountain. Although they didn't chuck-a-luck, what bingo boys they turned out to be! Their names—oh, yes—**C. A. Carlson,** Post 18, **J. E. Tucker,** Post 8, **S. B. Spayer,** Post 17, **Earl Jarvis,** Group 2, **Sgt. Clarence Baker,** and others who moved too fast to be recognized.

Capt. Frank Nolan was on hand looking for fire hazards. He found two overheated jitterbugs.

That 4 to 3 ball game really was a thriller. Those fellows from Group 70 certainly gave the Fire boys a hectic battle. They were also victorious. Therefore, they are congratulated and thanked for participating in the program. Helmets are doffed to the hard working umpire, **E. O. Huey.**

Wonder if **Joe "Mr. Brown" Catalini** didn't do some practicing before he came to the outing. When introduced to the fair sex he would greet them with such dignity — just like they were Queens of a royal family. He was right, they were all somebody's First lady.

Some people do enjoy working hard. Especially **Sgt. Edward Stricklin,** who spent most of the evening promoting the bingo game, as well as hustling and bustling around looking after other concessions and activities.

It was nice to have the law enforcing bodies of the vicinity so well represented at the picnic. Joliet **Policeman George Legan, Al Hoffman** and **Frank Skul** were present as well as Rockdale **Patrolmen Gus Panian** and **Deputy Sheriff Ray Doerfler. Corp. Earl Jarvis,** EOP guard, also was seen enjoying the fun.

George Scherzer took over the drums on numerous occasions, and then included the entire picnic in his repertoire.

The luck of the House of **Dillree** continues, as **Jimmie** and his wife solved the blanket game.

The **John Connelleys** attended, lending an air of continental charm to the festivities.

A fine exhibition of baton twirling was put on by **Walter Lueder, Jr.,** and the little nephew of Andrew Elias distinguished himself along the same lines.

Ralph Rausch, the Plainfield flash, was spotted with an ice cream stick in hand headed toward the hamburger stand.

William Hayes was in evidence with his mosquito bite. (What large mosquitoes there are this year.)

Joseph Vaccaro enjoyed the dancing.

Laurence Molck and son attended the morning and afternoon session and were joined in the evening by **Mrs. Molck.**

Charles Henderickson was trying to make up for lost time.

John Arnold did a fine job of dispensing.

Francis "Drummer Boy" Keeley was all tired out.

Francis Downey tried to figure out how he got so many red marks on his face.

Terpsichorean **"Pat" Rodgers** was really doing his stuff.

Sgt. Johnny Alar was among the missing, due to the children being down with the measles.

With a blanket draped around his shoulders and a piercing war whoop **W. G. Bell,** plus an extra passenger, made his exit.

John R. Watkins did a fine interpretation of the Statue of Liberty, ably assisted by **Calvin Gordon.**

A liberal reward is offered and no questions asked for the return of one tenor bugle, one pair of cymbals (aluminum handles), two pair of Scotch drum sticks and one pair of field drum sticks. These were reported missing during the Firemen's Picnic at Oak Grove September 2. Any information concerning these articles will be welcomed at the Elwood Ordnance Plant Fire Department.

Your correspondent, blinded by the glamor of the gala gathering, found himself in the same predicament as the famous Chinese detective, who fell out of the tree, missing most of the show. He therefore extends his most heartfelt thanks to **John Jevitz,** the mystery man of Station 3, and all others who compiled these copious notes on the first annual picnic.

TYPICAL CREW of an EOP Diesel locomotive is shown here. Members are, Hal Brown, oiler; Ellis J. Wainscott, engineer; E. A. Wendt, engine foreman, and Daniel Bravine, switchman.

EOP'S ONLY WAAC, Martha Alice Pichon, is shown here second from left as she appeared when she was given her Army commission at Des Moines. Pictured with the former cafeteria employee are three other comely WAACS, Inez Quigley, Mary Jo Norton and Ruth Fowler, left to right.

Timekeeping

NICHOLAS BELLUSO
Correspondent

With the farewell dinner given for four of the boys at Little Jack's recently, the Timekeeping Department started the ball rolling in its honoring of timekeepers who leave for the armed forces. A fund, contributed by fellow timekeepers each week, is now being set up. This fund is used to buy gifts for the boys when they leave. It is a wonderful idea because it makes the boys feel that the *time* they had put in at EOP was not in vain. These small presents are proof that they are leaving a number of friends behind who will miss them and who realize the big job they have to do. Fifty-four fellows left before it was realized that they were gone. To those who have gone a pledge to do their part is made by those remaining.

With rather impressive ceremonies, **Robert Renoldi, Edwin Benson** and **Joseph Fitzgerald** were highly honored at the main Time office. Each was presented with a gift and numbers sixty, sixty-one and sixty-two were respectively added to the service flag. It was a simple and beautiful ceremony and the sudden emotions that arose were held back with difficulty. Joseph, however, got more than he had hoped for when each of the girls kissed him goodby.

John O'Connell is now vacationing in New York. It is hoped he forgets about "give him eight hours" and has a nice rest.

Cele Harte is leaving to return to school. Her attractive smile and personality will be missed by all. In the few short months she has been here, she made a host of friends. Friendships made here will last throughout the years.

The most picturesque clockhouse in the area is at Group 64. A variety of flowers surrounds and adorns the clockhouse, planted and cultivated by the caring hands of **Stanley Waskiwiak.**

John Hearn and **Marge Downs** are now working in the Proof Department. They formerly worked in **George Alstadt's** office in the Administration Building.

Ben Sloan does not lack initiative. When he couldn't get a car to take him to his station he hitchhiked a ride aboard a locomotive.

Bernard Smego and **Harry Knarr** are now fighting for the hand of **Eva Sweda.**

Gene Schuck, bashful timekeeper at Group 8, has never worked a day since he took up time. He has always worked nights. **Zona Bond** is known as the "Bond-Shell." It *bonds* her up. **Marian Stewart,** wife of band leader **Bob Stewart,** is keeping time with her husband. **Agnes Crownover** is waiting patiently for her new organ. **Agnes Rivard,** the Spring Valley cutie, believes that her hat is her home. **Bob Balma** is glad to park his feet permanently at Group 1.

A card received from **Carl Swanson,** who is now at Fort McLellan, Alabama, says, "How is that little proof-reader, **Geraldine Graham,** doing?"

Best crack of the week. When Joe Fitzgerald hung his number on the new service flag, Harry Knarr quipped, "Even when you leave, we give you a number."

Since Mr. O'Connell left town, **Angeline Gunnerson** has assumed the full responsibility of Chief Timekeeper. Her able assistants are **Bernard McShane** and **Milton Treitel. Elmer Dames** was certainly welcomed home by a brunette in **A. M. Lockwood's** office.

Inspection

ROBERT PIERSON
Correspondent

Lillian Fumagalli is still going around with that dreamy look in her eyes. The boy friend was home from the Navy over Labor Day week-end.

Speaking of dreamy looks, could that ring and bracelet **Norma Castle** received from that very, very special "he," stationed at a camp in Virginia, be responsible for the light in her eyes lately?

Look at **Lee "Lucky" Davis** thoroughly enjoying herself—and it's always been understood that she was a man-hater—so she is, but he isn't with her now.

A cold kept **Helen "Kentucky" Curry** from making her long-planned trip to the Blue Grass for Labor Day. Mint juleps might have helped her cold.

Norma Castle is thinking about joining the Women's Army Auxiliary Corps, not because they're so "Waacky" but because she read in the papers that they are going to send them to Virginia!

Purcell Sprimont has been watching the sports pages closely lately. Could he be watching for comments on his son's football playing?

Harold Rouff spent Labor Day week-end up in Northern Minnesota. He claims that the fishing was great.

Harold Bell lost his direction in the rain the other night. He learned that Building 6 is not the clock house.

When asked what he did over Labor Day, **Elmer Tolf** just said "it's none of our business what he did." Nice week-end, eh?

Raymond Johnson, one of the Inspection Department's better ball players, has returned to Wheaton College.

Herb Just, Group 3A, is going around in circles trying to catch his wife working on the same shift so they can eat together.

BLACK OF NIGHT does not stop activities in EOP's railroad classification yard. Yardmaster David Morris is shown making up his reports in his homey office shanty.

General Offices

MAE BELLE ANDERSON
Correspondent

Corp. Joseph Kovalick, Architectual Department, is located at Camp Hood, Texas. Joe was one of the first to enter the Army. **Robert Esbensen**, same department, is an ensign in the Navy.

Harry MacRae, Structural Engineering Department, took his physical exam for the Army September 17.

Marge Connelly is depressed. Her fiancee, **Donn Wright**, of the Pipe Shop, left September 14 for Camp Grant as a radio technician.

"Tex" Jackson, engineering files, is going to provide **Howard Cox** with roller skates so he can travel between the files and **E. K. Cortright's** office. His heavy romance is **Maxine McBride**, secretary to Mr. Cortright.

William Simonds, progress engineer, is water boy at his home in Elwood. The electric water pump will not respond.

Walter "Tiny" Peterson, heating engineer, is captain of the bowling team from the department. They lost three games in the first set played. "Tiny" has a swell booming bass voice and is a member of the YMCA Glee Club. With a voice like that singing out orders, the team should at least win one game.

Robert "Wimpy" Forst, estimating engineer, decided to take his Saturday night swim in the tub. He lifted one foot up to give it a cleansing and while working on it reached down and lifted up the other foot. He had quite a bouncing fall.

A softball team was organized in the Administration Building. At each game they had to look for players. Losing three games, in despair they elected **A. E. Frosch**, chief engineer, as manager. Deciding he had a bunch of super athletes, he challenged everybody. He took on a game with the Army. The evening the game was to be played it rained. The next night they sent **Connie Carlson** and **Bill Lanterman** out to see whether the field was dry—they went down to their knees in the swampy ground. The next night the Army did not have their full team. Mr. Frosch is looking for someone to take the managership off his hands.

Mr. Lanterman, Requisitioning Department, won a blue ribbon at the Elwood Homecoming Horse Show last week.

Adolph Kuehlmar, Heating Department, has a hobby in studying the war news—he can answer all the questions.

J. C. Quade's (Estimating Department) automobile, called the "Quade Express," carries five extra passengers. The members of this group debate all questions from sugar to law making. **H. Rostron** acts as arbiter. He has to, to prevent violence.

During these times be practical. **Ralph Turner**, Mechanical Engineering Department, instead of giving **Theresa Rager**, his fiancee, flowers, gives stockings, etc.; instead of candy he gives her the things she likes, such as shrimp, potato salad, baked ham, etc. Try it boys—it works!

E. F. Washburn, architect, has returned from a vacation. Instead of casting for fish, he casts his eyes out the window.

Mr. and Mrs. George E. Altstadt, Jr., spent an enjoyable week-end at the home of **Mr. and Mrs. L. Wollweber** in Chicago. Mr. Wollweber, a former employee in the timekeeping department, is now employed at the Buick Plant in Chicago. He sent regards to all his friends at EOP.

Marjorie Connolly and **Kathleen Conway**, Engineering Department, were hostesses September 8 at a personal shower at the Sievert Tea Room, Joliet, honoring **Margaret Hayden**, who became the bride of **Charles Mann** September 19. Crash bunco and a guessing game were the diversions of the evening. Prizes were won by **Elizabeth Noonan, Lucy Harkness** and **Agnes McCarthy**, who presented them to the bride-elect.

The table scheme was carried out in blue and white, the favorite colors of Miss Hayden.

Those present besides the bride-elect were **Mrs. Michael Hayden, Mrs. William Franke, Mary Elizabeth Hess, Misses Harkness, Noonan** and **McCarthy.**

J. A. Watson, former assistant executive secretary, is now a captain in the Army Air Corps. Captain Watson reported September 16 at Miami Beach, Fla., and expects to be sent from there to Louisville, Ky.

Annemarie Kinney, Auditing Department, had a very enjoyable vacation down around Miami Beach, Fort Lauderdale and other Florida towns.

Gene Hedrick, Auditing Department, reports he just went home (Merodesia, Miss.) on his time off.

June Schick had a lovely Sunday last week — spent the day swimming, sunning, etc., at the Indiana State Dunes Park. (A super DuPont man for a date, too, June said.)

John J. Nicholson, Engineering Department, and **Marcella Hidlebaugh** had rice and old shoes thrown at them September 18. They recited nuptial vows at the First M. E. Church at Dwight.

The Mail and Records Department has again added to its personnel: **Betty Feddersen** is one of the new messengers and **Jacqueline Binzen** (formerly in Mr. Watson's office) has taken over as assistant teletypewriter and mail clerk.

Harold Chapman, photostat operator from 4 to 12, worked till two bells the other morning then hiked to Joliet, arriving in town at 5 a.m. That hike sure must have got him the hiking merit award.

Virginia Krause, secretary to **G. B. Pumphrey**, assistant comptroller, has been having a tough time at St. Joseph's Hospital, Joliet.

Hazel Gleason, secretary to **Comptroller John J. Cole**, and her sister, **Helen**, are busy touring about Toronto, Montreal and Quebec.

Of interest to many is that **Mary Jane Nicholson Delander**, former secretary to **Harrison Smith**, is back in Joliet again. Her husband, **Dick**, is leaving for the Navy.

Virginia Cashen, secretary to **V. L. Knudson**, had a marvelous time out in California. Ginny visited **Ray Shepley**, former EOP timekeeper, who is stationed at Camp Roberts.

Emalie Mueller, Purchasing Department, and **Al Voegtle**, Fuze and Booster Area, had the wedding bells ring out for them September 19. The ceremony was performed at the St. Rose Church, Kankakee.

Maxine McBride, Engineering Department, received an Irish setter (dog, you know) September 16. Maxine offered a 25c War Stamp for a name for the pooch. In case you're interested, the following names were submitted by **Clara Cline, I. F. Jackson, O. K. Madsen, Kathleen Conway, Max Wolfson, Don Lewison, Francis Gourley, Bill Lanterman, Chris Neff, Michael Chuck, Eleanor Goss, Howard Cox, R. W. Turner, F. A. Leslie, LeRoy Anderson, Doris Skinner, Robert Forst, Evelyn Tolf, Fred Poplausky, Helen Grutka, Alton Allison, Bob Holmes, Walter Krohn** and **Nels Gronholm.**

"Sheebah," suggested by Mr. Madsen, was chosen by the owner. Maxine thanks all for helping her.

GROUP 3

NORBERT McLUCKIE
Correspondent

The main ideas in every person's mind during these critical times are "keep 'em rolling" and "be prepared." Well, **William "Tiny" Kautz** is following through on each idea. As foreman of Building 3, he "keeps 'em rolling" and, as for "being prepared," he has already placed his order for Thanksgiving turkey. He was overheard telling **Ronald Hall**, of Coal City, to fatten up at least two nice ones for him.

Al Pugh, mechanic, tied for high honors in the Evanston trapshoot. This boy really can shoot. If his supply of shells is exhausted, he may try to get **"Red" Boucher**, foreman of Building 4, to make him up some more.

Herschel "Kankakee" Laughlin has discarded his "Hollywood slacks" because of chilly weather. Some thought they were cute; but there also were other ideas on the subject.

Walter Jones, electrician, has some comments to make concerning the mosquitoes found around the plant. He says, "They are dive bombers carrying blockbusters."

Ernest Hoffman, carpenter foreman, has returned from a vacation. He had a very good time, but Group 3 still looks "rosy" to him.

J. "Smoky" Moore sure looks keen in his new uniform. Wait until he gets in the Army!

Danny Mahoney has enlisted in the Navy and is to enter the service soon.

Your correspondent often wonders where **William "Whitey" Hawkinson** is. He was one of the many men in Group 3 who promised to write. He has been in the armed forces for quite some time now.

Morris Peterson, one of "Dougherty's Bombers," speaks for every member of the team when he expresses their thanks to Group 3 for their loyal support in the purchase of equipment.

Junior Wills, four-months-old son of **Mr. and Mrs. Elmer Wills**, is trying to coax his daddy to bring home an application so he can become an explosive operator in Group 3. He would prefer working in Building 16; his daddy is sub-foreman there.

Ray Rivard has just returned from a 5,000 mile trip through thirteen of the Western States. Having accomplished this in twelve days he was very happy to leave the deserts, mountains, and what have you, to return to his regular duties at the superintendent's office.

It is hoped **Lou Liberty**, janitor at Change House 8, has caught enough fish to last him all winter. He claims to be an expert, but his work has compelled him to forego the sport for some time.

Group 2

EDWARD KEENAN

WILBUR GALBRAITH
Correspondents

A party was given at Little Jacks west of Joliet September 15 for the bride and groom-to-be, **"Bing" Phelan** and **Ed "T-Bone" Keenan. Supt. James J. Murphy** was the toastmaster and made the party a huge success. A fine dinner was served and later there was dancing to the music of a fine orchestra. Ed and Bing were presented with a cash purse with which they are going to buy some furniture. Miss Phelan is to the Personnel Department what Eddie is to Group 2, they are both liked by everyone who knows them.

Observations at the party included **Bill "Bones" Fiene** walking on some real expensive grass and telling **Barney "Battler" O'Conner** to get off that cheap grass on the other side of the sidewalk and come over and walk with him because quote, "This expensive stuff is much easier on the feet"; **Ode Golden** with a new suit (he also had on both pairs of pants); **John "General" Johnson** sporting a new toupe (someone told him it looked like a heifer's tail on a butcher's block); the fellow who waited until everything was quiet and then yelled out "where's Bill?" (**Irv Siemsen** is blamed because he was very hoarse the next morning).

Bob Schmitz should refrain from practicing folding diapers when he is out in company.

Bob "Snake Hips" Burke brought up the rear of a Conga line and did a nice job, too.

George "Bo-Jangles" Zobel added his bit by tap dancing and **Larry "Bing" McKeon** by vocalizing on the song "My Gal Sal."

Bill Malone has acquired himself a new name, "Shoe Shine" Bill. Please read the next issue and you will learn how it came about.

Things We Would Like to Know:

How this name would look on a billboard outside a theatre, **"Angello Muraro Pagnusat Frimgalli"?**

Whether **Bert Folk** will have a mustache or not this Christmas?

When **Kenney Peterbok** is going to introduce his girl friend?

If **Don Zier** is ever going to stop growing, and play a game without clowning?

Just how long **"Horse" Tammen** will hold out on that new diet? (Your correspondents will hold all bets, but the odds are 10 to 1 that he doesn't last a week.)

Just what the attraction is at the plant hospital? (**Ed Egan** won't say, so maybe the correspondent from there can explain or possibly get a few pictures.)

Murphy's Boys announce three new players, **Ed Washburn**, a pitcher, but an all around good man; **"Horse" Tammen**, a pitcher and a first baseman, and **Mario Zinnani**, a catcher. At one time Mario caught in the Three-I League.

Murphy's Boys won the Gold Medal League of Joliet, and now enter the tournament with five other teams to determine the champs of Joliet. The Boys are entering with a very good team and expect to win the championship. The team would appreciate a few followers to give them support.

Washburn and Tammen led the Boys to victory in the last four games. Now that **Ode Golden** is on the early morning shift, he will be in right field.

It is rumored that **Terry McGovern** and **Bob Reid**, the group's foremost Lochinvars, are feuding over the same *white* uniform. The boys don't know it but the real competition is **"Rackets" Brophy.**

Group 3-A

F. G. TAMBLYN
Correspondent

The bowling team opened the season by accepting a challenge from **Howard Henderson's** team. The game was played on the Rival's alleys and resulted in a victory for Group 3-A. This was the first match the team played together and, under the management of **Colby Erickson**, a very good season is anticipated.

Since **Howard Gueller** returned from a vacation in Northern Wisconsin he has been hiding in back of a bush. *Is this a style taken* from the lumberjacks or is he saving for a new mattress?

Ned Belisco attended the Steamfitters' and Plumbers' convention in Cleveland, as a delegate from the Joliet local.

Claude Spargur, Robert Glade and **Frank Turk** have joined the armed forces of Uncle Sam.

After spending a few days visiting relatives and breathing that good Iowa air, **Roy Hallihan**, group inspector, is back on the job full of pep and vigor.

It was heard that **Lowell "Paul Revere" Hansen** of Morris called for his riders of the 7:30 shift at 2:00 a. m. Was this a nightmare?

After much interrogation it's been learned that **Emory Knowles** and **Otto Stahl** received their discolored eyes by trying to walk through the same door.

DEFINITE DENIAL of the charge that purchasing agents are hardboiled sourpusses is furnished by the genial personality of E. C. Carlson, who supervises the buying for EOP, as illustrated by this photograph made at his desk.

Ordnance

HELEN McGINNIS
Correspondent

The call to arms has summoned **Frank Branger** of the Stock Room and in his place is **Ray Marquardt**, formerly of Mail and Record. This sort of makes the Mail and Record strictly on the feminine side. . . . They even keep the male teletype operators on the night shift.

The new messenger in this section is none other than **Claire Shols**. . . . The escorts sure get a work-out ushering people to and from the Personnel Section . . . they carry on with a smile, though, and tha's sumpin' in these here days.

Betty Wilhelmi and **Lee Sopher** had quite an experience at the hospital the other day. . . . It cured their colds tho'. . . . Poor **Anne Kakara** . . . gets a new tire and "bang" blow outs all over the place. . . . Anne says she thinks she'll try riding on the rims.

Lois Dugan has a certain way of working her dad for a meal every day. . . . Wonder if she'll pass the good word on. . . . This department could use a spare meal once awhile . . . and "spare" isn't misspelled. If you want to get someone mad just call **Catherine Stortz** "Katy". Boy, does she burn? . . . By the way . . . she sure is burning up the mail these days to Hawaii . . . three guesses why? . . . yep right the first time . . . her soldier boy is there. . . . **Joe Kush** has been spending a few days at home in Rockford while her Mom recuperates from an operation. . . . Sure glad she is on the mend. . . . Didja know that they had a big shindig for **Rosemarie Lewis** who left Stores and Transportation to become a nurse. . . . The old Polka Kings, **Harold and Bernie Kapsch** were sure 'nuff hep and little **Marian Yeager** (Payroll) danced and danced until the wee small hours of the morning. . . . **Harold O'Keefe, Don Butts** and **Bill Zelko** showed they could do that there dancin', too. . . . **John Maynerich** was whoopin' it up too along with the rest . . . seems as though the theme song was "Brother, can you spare a dime."

If you want to see some gorgeous flowers . . . take a squint at the dahlias that **Joe Vilt** and her sister, **Ev**, brought the other day . . . man, oh man. . . . Ev claims her father didn't enter them in the Fair this year as they were too small or something. . . .

Seems as though someone in the Administration Building is worrying a lot about the fellow that keeps calling up Marion Yeager.

Could it be **Cecil Wheeler's** jokes or **Sy Kurantman's** puns that give the gals in the Administrative Section such sunny dispositions?

Everyone in her office is calling **Kay Reubart**, "Stinky" . . . don't worry, there won't be a slander suit . . . it was her birthday and everyone gave her either cologne or perfume.

Hazel and **Art Kossack** are about the laughinest and happiest kids around . . . every thing they do they giggle about . . . which is a darn good foundation for a happy marriage. . . . If a guy's got a keen sense of humor they have a head start on the rocky road of life. . . . My, My, ain't I the philosopher ? ? ? ? . . . Move over **Dorothy Dix**. . . . I'm movin' in. . . .

Wonder why **Kenny Holz** (the C.O.'s Chauffeur) is so mean to his women? . . . could be that **Vera Gussman** has somethin' to say about that?. . . .

Harry Denney and **Walter Murphy**, engineers, have moved into the civilized world again. . . yep . . . they're in the Administration Building. From all reports—**Loretta Franke's** husband, **Bill**, sure made a hit while he was home on furlough.

From the Timekeepers: On vacation: **Charles Downes, Raymond Levenger** and **William Beeman. Shirley Campbell** (Group 5) became **Mrs. Russell Carens** September 5. Read in the papers the other day where Uncle Sam clipped **Clark Gable's** mustache . . . wonder if they would do the same with **Ed Reichert's** hair. . . .

Imagine if you can: **John "T. I." Green** not sticking up for the Irish; **Frank Bravato** without his Beech-Nut (This is not a plug); **Betty Lou Page** and **Harold Kapsch** quarreling; **Dave Horwich** not looking up a reclassification.

Who is the lucky gal who has lunch with **Charles Gaby** daily?

Robert McEvoy, camera artist of Group 3A, has returned from a vacation trip to Sage County in the North Woods. He has first hand dope on **Dick Tracy's** capture of **Tiger Lilly**. . . . If you want to see the best take a gander at the one of **Bill Henderson** and **Frizzletop**.

What is the Indian sign that **Ole Olson** uses on **George Stevens** . . . the poor guy trembles whenever Ole appears on the scene.

Pop Offs from the Pogo Stick

Lyle Ingraham has gone and put a sparkler on the right finger of the right gal. . . . Lyle can't make up his mind what those strange noises are . . . the beat of his heart or the beat of the Army drum?. . . . **Mary Kay Lohman** has acquired the title "Sweater Girl." . . . Petite **Anita Lambur** has returned from a sojourn in St. Louis. . . . The new gal in Personnel is **Virginia Harrod.**

William J. Leeland, the jovial guy from the Personnel Building, has a swell time with his harem every night.

"Barefoot Babe" Haley was caught bowling Tuesday night in her bare feet. . . . Is that why she was limping all over the place.

"Dr." J. P. Zagade has returned to work following a siege of hayfever . . . and he's the guy what says hayfever is all in the head.

RETAINING SMILES seems to be typical of EOP executives. Further proof of this statement is shown by Paul L. Deylitz, pictured here in his office where he presides as superintendent of the Ammonium Nitrate Plant, better known to most workers as Group 61.

Mail Your Gift to Service Men Overseas Early

Disappointment May Follow Tardiness; Suggestions Given

"Do your Christmas shopping early" is no idle slogan this year, especially if you have a son, husband or sweetheart in the armed forces overseas. Christmas mail to boys abroad should be on its way by October 1.

To aid persons on the home front and in answer to thousands of requests, the Army, Navy and Marine Corps have provided information as to what, where and how to send Christmas packages to service men.

Don't disappoint your service man on Christmas Day by sending prohibited articles and disregarding mailing regulations.

Each package you send, and you shouldn't send more than one a week, must not weigh more than six pounds and should be about the size of a shoebox. It should be wrapped in strong cardboard or corrugated board. Do not seal the package because each will be opened for inspection. Standard sealed articles in their merchandisable form, such as cigars and cigarettes, may be enclosed. Intoxicants, inflammables, explosives and poisons are restricted and will not pass inspection.

Postage to Port

You pay postage only to one of the two ports of shipment, New York City or San Francisco, whichever is nearer your boy's station.

Perishables are barred from the mails. Foods and candies are permissible but should be sent in small units and in a form that can take long distance shipping and extreme temperatures. On the suggestion list are tinned nuts and cheeses, peanut butter, sandwich spreads, cold canned meats, pickles, olives and fruits in jars if well packed, tinned cookies and fruit or pound cakes.

The gift that will delight him and bring cheer to a man in a distant land, and one that will pass all inspection points, is a money order. Remember, cash must not be sent through the mail because many countries forbid the importation of foreign money. But a service man can cash a money order or bank draft wherever he is stationed.

This year the traditional shirt and tie are out. But there are many personal gifts that you can send him. If he is a sailor or coast guardsman he will probably appreciate a waterproof money belt since they don't have pants pockets. Men in any branch of service will like a zipper type toilet kit (you can send refills of razor blades and shaving cream later), sewing kit with fittings, blitz cloth (trade name for processed cloth for polishing buttons and buckles), shoe cleaning kit with brown polish for soldiers and marines and black for sailors and coast guardsmen, small magazines and pocket size books, pencil type flashlight with pocket clip. For entertainment there are playing cards and small games such as cribbage and checkers.

Presents Require Thought

If a budget doesn't bother you, you can shop from the luxury list and buy a military wrist watch with luminous dial and sweep second hand or a navigator's watch for sailors, coast guardsmen and air force personnel. A signet ring or one with the insignia for his branch of service is something he will be proud of. There are glass or chain cords for identification tags, identification bracelets and a "curling iron" which is not a gift for a WAAC, but a presser for trousers.

Even the reliable "three pairs of sox" cannot be given to a service man without forethought. Hosiery is restricted to the United States unless specifically requested by men in foreign service. His branch of service governs the color. It should be plain brown for the Army, plain black for the Navy and Coast Guard and white or gray-white for the Marine Corps. Undershirts and shorts must be white. Handkerchiefs also must be white and no rolled edges.

The men report that they would rather have two or three packages of cigarettes at a time instead of a carton, then they don't have to supply their neglected pals. If you send a cigarette lighter be sure to include plenty of wicks and flints. Fluid cannot be sent through the mails overseas.

SENDING 'EM OUT is the job of the Mailing Department, which also doubles as keeper of the central files. Pictured in the mail room shown here, left to right, are Mary Williams, Catherine Gorey, Wayne Sebby, Maurice Doyle, Polly Marston and Dagmar E. Peterson, supervisor. Two other members, Margaret Ott and Robert H. Stewart, were absent when the photograph was made.

Inert Storage

CHARLES MANN

WILLIAM DENVER
Correspondents

The man in the limelight is **Charles Mann**, assistant superintendent. He was married to **Margaret Hayden** of the Traffic Department September 19th. The ceremony took place in Wilmington at St. Rose's Church. Vows were spoken before a beautifully decorated altar with **Mrs. William Franke**, Margaret's sister, as maid of honor. **Aloysius Mann**, Charles' brother, served as best man. A reception was held at the Louis Joliet Hotel in Joliet from 2 to 4 p. m. The boys of Inert presented the couple with a beautiful radio and other gifts. Charles will be away from his duties for two weeks and will return October 1st. He and Margaret have been associated with the company since ground was broken at EOP. They will reside temporarily in Aurora.

The steak-fry club has cancelled all outings . . . waiting for those fall days when the woods bring forth beautiful colors.

LaVerne Lyons is still wearing a white summer cap even though Labor Day is long past. He might not know it, but the boys say he won't have it long.

Leonard Spooner grows victory potatoes with a perfect "V" shape.

Vacation proved a success for **Inspector J. Ney.** He for one did catch fish.

Inspector Joe Birsa just can't forget the grand time he had at the Fuze and Booster picnic.

Ed Zarley has returned after enjoying one week of rest.

In **A. P. Balston's** office hangs one of **Turk Argyle's** oil paintings used in the Carnival booth — a beautiful color scheme.

George Harrop has been appointed Mine Inspector for the State of Illinois. However, he will not leave his duties at EOP.

Three have joined the U. S. Marines, **Joseph Turk, Lawrence Holmes** and **George Orlovich.** Two have left to further their education, **James Osborne** and **LeRoy Johnson.**

The sick list claimed **Frank Zupancic** (just a good cold).

C. A. Kemper not only knows warehousing, but is quite a column critic and lover of literature, taking great pains to quote exactly. He is willing at all times to discuss world affairs, social and business problems, and give vocational guidance.

New employees are welcomed and it is hoped they will enjoy their associations at Inert Storage. They are **Angelo Ferio, Everett Attaway, William Cross, James Sexton** and **James Morrisey.** They will receive their nicknames soon.

Beat this if you can—**Frank Zupancic** borrowed his neighbor's morning paper and read it on the way to work. During the journey he sold it to one in his riding club for 5 cents. When they reached the plant Frank claimed he was not paid and collected another 5 cents. He did, however, have to give up the paper.

A surprise visit was paid by **E. G. McAloon**, superintendent of mechanics, to the office last week. Mr. Mann offered thanks for the lovely wedding gift and then proceeded to discuss world affairs.

Everyone is happy the speed limit by the Fire Station has been increased to 20 miles an hour and the parking lot stalls have been enlarged.

"Dick" Ashworth and his family enjoyed the circus at Soldier Field in Chicago. He knows the general manager and what grand seats they had!

Expeditors will miss the ever obliging service of Miss Hayden in the Traffic Department, but will welcome **Alberta Delaney.**

Inert Storage still leads the softball league—won 7 and lost 1. The game with Group 70 played September 16 ended in a scoreless tie. Weather and a technicality brought a halt after one and one-half innings of play.

One of the truck drivers parked in the Administration Area to see the *slow children.* See the signs.

Salvage

ANDY VAIL
Correspondent

Ted Groskreutz was examined by the draft board last week and was found to be O.K.

George "Mayor" Sangmeister can be seen every day practicing his speeches with gestures for his coming campaign.

Robert Milus is still making those regular trips to Ottawa.

William "Torchy" Peebles was observed flitting through the cow pasture with a butterfly net after studying his lesson on botany from his correspondence school course.

Ben Sloan is very silent on what occurred in that hotel in Harlem during his vacation in New York.

Art Voss celebrated homecoming week at Manhattan, September 18, 19 and 20. The following week they celebrated the coming home of Art.

Kankakee was a little too large for **Henry O'Reilly** so he moved to Godley, Ill.

Don Foutch is wondering how many nights he will have to walk the floor before he can get accustomed to free squealing.

No one has been able to find out if the painting was done at EOP or KOW, but when **Mrs. Jack Milus** opened a box containing two chickens, she found they were painted red, white and blue. Some wonder if Jack stopped at Dingy's on the way home.

MANY CHANGES are recalled by Richard G. Richards, pictured as he views the EOP Time Office housed in what used to be the corn crib of his spacious farm. Mr. Richards is now an employee of the Utilities Department.

Group 61

JOE MOTTA
Correspondent

Seward Brown wishes to thank fellow-workers for flowers sent in memory of his brother.

Group 61 was sorry to hear about the death of **Mrs. Irene Townsend,** mother of **Clyde Townsend.**

Megideo "Tony" Ganz surely must raise good vegetables. It is reported that his star salesmen, **Clifford Kidney,** Bill Jiriska and Seward Brown received the highest grade brand of bottled delight at the Waterfront in trade for Tony's carrots and onions.

Howard Cadwell is back after a two weeks' vacation. **Ray Carlson** is beginning his.

New man power for **Jesse Reniche's** pipe crew are **Carl Puswaskis, Chester Monik** and **Glen Larrigan.**

Mr. and Mrs. William Dooley will celebrate their 25th wedding anniversary September 29.

If **Joseph Silverstein** passes all required tests he sure will be a "lady killer" whistling in the Signal Corps.

Sam Mount would like to have his name mentioned in *The Bomb-Shell.* O.K., it's been mentioned. By the way, farm life seems to agree with "Sambo."

Ray Conway, government inspector, is attempting to enlist in the Navy. Many a gal in Joliet will be pining away for Ray.

Question to loading lines from Group 61 is, we can make it, but can you take it?

It isn't necessary to mention in detail to you who have read in all the newspapers that **W. A. Karges,** serving with an Army Hospital Unit in Egypt, helped save pals trapped by fire and bursting ammunition. All at Group 61 can boast to friends that they work with his brother, **Bob Karges.**

Someone in the Fuze and Booster area has **Walter Boughton** all agog answering phone calls.

All of you read how hero **Ronald Blackburn** fearlessly jumped into the DesPlaines River at Joliet and saved a drowning woman's life. Ronald is a guard stationed at Group 61.

John Kelly and **Ed Agnich** are back after a brief illness.

It would be nice if . . . **Allen "Cap" Mayes** would receive his $10 . . . the weather would remain nice during **Ray Carlson's** vacation . . . **Harvey Steffes** could be persuaded to keep his shirt-tail in when walking the streets of Peoria . . . more knew that **William "Mail Man" Brown** is receiving congratulations on his new job as messenger boy for **Al Pope** . . . you heard according to **Robert Plese** "now that the rain (or is it **James Halpin?**) has taken over his corn field **Joe Motta** is advised to raise oats to feed **Henry Kiep's** and Mr. Dooley's horses that never come in" . . . more could afford new cushions in their car like **Roy Kline** . . . **Fred Byers,** painter, didn't drive all the way to Kankakee for paint thinner and other liquids . . . there was a swimming pool near **Ed Westmeyer's** residence so that he could use it instead of the ditch (Ed accidently fell in) . . . you saw **P. L. Deylitz's** victory garden, he gave **F. Robinson** a squash who claimed it will last him a week (that is a lot of squash) . . . you knew that **Steve Juricic** took three mosquitoes home to show his wife (he claims the other night in the dark he put forty gallons of gas in one before he realized it wasn't a motor).

You Ought to Meet—

Frank Ariagno, janitor and one of the best known employees of Group 61. He was one of the first men hired in the department.

"Frankie" or "King" is his nickname. Some of his hobbies are working his little garden, going to movies, and making new friends.

"Frankie" has worked other than riding a broom around the Change House. During World War I he worked with machines in the wire mills. Since then he has been a bricklayer and a cement finisher.

If you are in the neighborhood of 609 South Ottawa Street, Joliet, drop in and see "Frankie." He'll be glad to meet you.

Softball Team Ends Play With 18 Wins

Manager John Kusinski's softball team defeated Naperville's Kroehlers September 3 for the second time and for the 17th victory of the season by a 7 to 1 score, **Lou Haake** allowing the visitors only four hits.

On September 11 the team met with their second setback of the year when they were defeated by the Arlington Furniture Company of DeKalb, 5 to 2. **"Slim" Challand,** pitching for the visitors, struck out 17 of the EOP batters and was very effective in the pinches, using his strikeout ball whenever the EOP team threatened.

For their 18th win the EOP team defeated the Beecher Blue Ribbons 9 to 3 in a game played for the benefit of the USO.

In winding up the season the team suffered their third setback when the Merseills All-Stars defeated EOP 2 to 1 in a thrilling contest that was not decided until the last inning when the All-Stars scored their two runs after two men were out.

The season as a whole was a very successful one. The record for the year was 18 wins and 3 losses against some of the leading softball teams in Illinois, Indiana and Wisconsin.

Riding Club Started

The EOP Riding Club had its first ride Sunday, September 13, leaving the Woodruff Stables at 9 a.m. After a pleasant ride over the bridle path, the riders had a light luncheon of coffee and doughnuts. The ride will be a weekly event. Those interested are asked to call the Recreation Department, Line 4109.

Richards' Aid Saves 2 Weeks on EOP Project

Owners of Farm on Plant Site Praised for Helpful Spirit

By Helen Shimek

Early in October, 1940, Richards' Farm on the proposed Elwood Ordnance Plant site was selected for construction headquarters. Since no contracts for sale of land had been accepted by the Government, Sanderson & Porter had no right to enter any farm in the area.

As time passed the contractors became increasingly anxious to start, so on October 17, **A. W. Malone** and **A. M. Lockwood** called on **Richard G. Richards** and asked permission to use his corncrib, sheds and pasture. This he readily granted saying, "It is my duty as an American to help out. I am not worried about my contract."

Ordering of material was started immediately. The first truck load arrived November 3 and work began on the construction buildings November 6. It was not until November 18 that the contractors were allowed to enter other areas to start permanent construction. However, by this time warehouse facilities had already been established and tools, equipment material and a construction nucleus had been set up at Richards' Farm. Thus the permanent construction got underway with a flying start.

Mr. Richards' co-operation was directly responsible for cutting the time period of construction by two weeks for the Elwood Ordnance Plant. For this simple, clear-cut act of patriotism all Americans owe him a debt of gratitude.

COLLEENS both are these two daughters of George O'Reilly, Transportation Department, although but one bears that name. The other is Maureen.

KOW Commanding Officer Transferred

Lt. Col. Herbert L. Kalbach, commanding officer of the Kankakee Ordnance Works, has been transferred to the Mississippi Ordnance Works, Miss., where he will be commanding officer.

The Mississippi Ordnance Works is a training center for maintenance and repairmen for the army.

Colonel Kalbach was commanding officer at KOW since April 6, 1942. From December 19, 1941, to April 6 he was the KOW executive officer. His promotion from major to lieutenant colonel came on May 3, 1942.

Capt. Wallace G. Anderson, public relations officer at the Kankakee Ordnance Works and formerly EOP public relations officer, has been promoted to major. He received the news of his promotion at Billings General Hospital, Fort Benjamin Harrison, Ind., where he is recovering from a fracture of the ankle suffered in an automobile accident near Joliet. Development of a blood clot, which lodged in a lung, further complicated his case.

FIRST OFFICE at EOP was this Richards Farm barn, razed but a few weeks ago. It housed the first time-clock and first telephone used by EOP employees.

Richards Farm, Headquarters During Construction Days, Now Inside Fence

Barn, Tool Shed, Corn Crib, Hog House, All Converted Long Ago to Busy Tasks

By C. O. Finnegan

"Richards Farm" has now become an integral part of the Elwood Ordnance Plant. Richards Farm, now Group 73, has, in fact, been a part of EOP since October, 1940, but has been outside the plant fence. It is now inside and the Field Engineers say "Amen."

The first carpenters on the job removed the old barn and tool shed, and then remodeled the corn crib and the farm house to accommodate the Timekeeping Department and the Army Construction Engineers, respectively. At present the farm house is used by the Area Engineer as a Field Office and the Timekeeping Department still occupies the corn crib, to which an addition and improvements have been made.

One long, low building, the hog house, was converted and for construction purposes became the Tin and Blacksmith Shops. This building served as a base of operations for repairs and sheet metal work during construction; recently the shops were moved to Group 70 and the old building dismantled.

Other Structures Built

Among the first buildings to be built in the area known as Construction Headquarters was the Warehouse where materials for construction were received and stored. This building is now used as a Storage Warehouse since the Receiving Department has moved to the Materials Warehouse in Group 70.

To house the Construction Forces and the Personnel Department two long frame buildings, sheet metal covered, were erected. The Utilities Department now occupies the Construction Offices. Some time ago the Personnel Department moved to its building in Group 60, and their Richards Farm building has been occupied for some time past by the Inspection Department and the Policewomen.

The Field Engineering Office, built west of the foregoing buildings, has been occupied by this department since early in December, 1940, when it was moved from "two by four" quarters in the Commercial National Bank Building in Wilmington.

In addition to these buildings, a First Aid building, a large Service Garage and a Machine Shop were constructed. The Machine Shop is now the Paint Shop and the First Aid structure has become the Paint Shop Annex. The Service Garage, to a large extent, serves its original purpose but it is now known as the Heavy Equipment Repair Garage.

Without question, every available foot of space has been put to its very best possible use, including the old chicken house which is now a Repair Shop.

Guards

GENE RYAN
Correspondent

Within the last week, the department lost two veteran guards who started at Elwood Ordnance Plant shortly after construction was begun. Both of these men, **John Grissom** and **Michael Gorman,** have entered the armed forces.

Capt. John A. Hardy, security officer, is showing the boys how to start out on the right foot. Within the last week the sergeants and corporals have been drilling along the roads and on the tennis courts.

Guard William L. Crosman started on the guard force at 12:00 o'clock, September 6, 1941. His vacation started at 12:00 o'clock, September 6, 1942, one year to the hour.

Rudolph Sandine, guardian of gate 19A and friend of the "woiking goil," has been hiding something from all the rest of the force. It came to light recently when a young girl from Rudy's home town came to the gate, and coyly said "Hello Sweet Pea." She was immediately contacted by secret operator 204 and she stated that Rudy has been known by that name for years—ain't that brutal?

From an interested observer this query was received: The boys on the Guard force want to know who the guard is they call "Hoop." It seems that he has another nickname in Manteno. The boys want "Mr. Hoop" to unmask.

Guard Chuck Newman expects to be a proud daddy in the very near future. This fact has kept the future daddy pondering on what he will name the baby. Some of the guards will probably come up with some good suggestions.

The guards approve the spirit illustrated by this story. All those questions on the selective service questionnaire didn't mean much to a young Southern youth, who couldn't read well anyhow.

So, in uneven red pencil strokes he wrote across the front of the questionnaire:

"Ise ready when youse ready."

EOP policewomen welcomed as new members **Agnes Lucille McCabe,** Joliet; **Hazel Goodrich,** Chicago, and **Jeanette Anderson,** Paxton, Illinois.

Mrs. Beatrice Bodah has returned to Wisconsin because of the illness of her husband.

Spencer Payne has returned from a visit to Kentucky.

Rosemary Hebert, Plant Protection Department, left September 19 for Santa Monica, Calif., where she will visit **Pvt. Walter Rainford.**

Esther Heaven's patience with **Stephen McGann's** case of "schiefus" (a morbid curiosity) is something to marvel at.

"Y" Offers Free Trial Memberships

Employees of EOP may obtain without charge a ten-day trial membership good for all recreational facilities at the Joliet Y. M. C. A. upon presentation of their badge to **H. R. Seamans,** "Y" executive secretary, 215 N. Ottawa Street, Joliet. The offer is available until November 1 and the ten days need not run consecutively.

Facilities available include two gymnasiums, swimming pool, billiards, handball court, special exercise room and social rooms.

Mr. Seamans also invited all EOP workers to use the "Y" as a meeting place for group riders in inclement weather.

S & P Design and Construct W. Va. Project

EOP Operators Push Completion of Power Plant

By A. W. Malone

Deep in the hills of West Virginia, Sanderson & Porter are adding another contribution to their growing list of war projects; this time it is additional electric power generating capacity for the Rivesville Power Station owned by the Monongahela West Penn Public Service Company of Fairmont, West Virginia. This company serves a large section of the surrounding country with electric power. Its transmission system is interconnected with those of other power companies operating in adjacent states, thereby assuring continuity of electric service not only to its own communities but to all neighboring power companies. The result of these interconnections is a leveling of indivdual peak loads, which conserves fuel to the Nation at a time it is most needed.

Several war industries are located in the West Virginia territory served by the Monongahela West Penn Public Service Company, among them being the Morgantown Ordnance Works, at Morgantown, and the new Westinghouse Plant, now being built at Fairmont. Additional electric power will be required to operate these plants, which represents a load superimposed upon a system geared to peace time pursuits. To meet this condition, Sanderson & Porter were called upon to engineer and construct the required facilities as an addition to the existing Rivesville Power Station.

The location of this power plant is unique. It is located on the bank of the Upper Monongahela River, which river supplies the water requirements of the plant, and is within a few feet of the mouth of a coal mine which supplies fuel. The plant is also near the load center of the Monongahela West Penn Public Service system. This favorable combination of fundamental factors is seldom encountered in the location of power plants.

The new addition to the Rivesville Power Station comprises generating capacity of 35,000 kilowatts, together with boilers, pumps, coal and ash handling systems, pulverizers, transformers, electric control apparatus and all other auxiliary equipment.

Pulverized fuel will be used to fire a high pressure boiler, which will deliver superheated steam at a pressure of 1,250 pounds a square inch to the electric generator. It may be said that this plant represents the latest engineering thought as to economy, dependability and safe operation, and the combustion and electric control features are especially noteworthy.

A large extension to the existing power house structure is being erected to house the additional mechanical and electrical equipment; also an additional intake tunnel to the river is being built.

A new concrete tunnel extending from the power house to an outdoor substation will house the electric cables which carry the power output, at generating voltage, from the new power station to the transformers. The current is stepped up to transmission voltage at this substation and sent on its way to work for Uncle Sam.

UTILITIES DEPARTMENT picnic at Oak Grove, September 6, was the occasion for this conglomeration of photographs. Those who attended, and you, too, can have a picnic identifying the persons and scenes pictured.

Joliet High Football Schedule Announced

Two games are played on each date of the Joliet High School football schedule. Freshman-sophomore games begin at 6:15 p. m. Varsity games begin at 8 p. m. The schedule follows:

Sept. 25—Joliet at East Aurora
Oct. 2—Elgin at Joliet
Oct. 9—Joliet at West Rockford
Oct. 16—Freeport at Joliet
Oct. 23—Joliet at East Rockford
Oct. 30—Joliet at LaSalle-Peru
Nov. 6—West Aurora at Joliet

BEST WISHES for continuation of his excellent safety record are extended to Supt. John H. Walker, Group 8 (right), by P. H. Embich, safety engineer for that group. Mr. Walker's group has gone two months without a lost-time accident and has had only one lost-time accident since it was put in operation in January.

Utilities

HELEN SHIMEK
Correspondent

Radio Communications

The fame of **R. A. Brown** as a steak broiler is spreading. His would-be imitators can't understand his technique as he changes methods at will. Open fire, charcoal burner, electric range or kerosene stove are all the same to Mr. Brown. **Herb Sentes** watched him operate over a kerosene stove, using the traditional hot pan and salt method in which the bottom of the pan is covered with salt before the steaks are placed in the pan. Now Herb can't figure out how to get the salt off the meat as he admits that the steaks he broiled turned out very salty. Nor can the wives who watch Brown cook understand how he gets by without grease in the pan. Sh! it's a military secret.

Kathryn Richardson is spending her vacation at Rock Island, Ill. She promised to look up **Lt. Glenn Johnson**, formerly of the Radio Department at EOP, who has been stationed at that arsenal since leaving here.

Barney Johnson caught his finger between two heavy storage batteries and was a patient at the hospital for all of twenty minutes. He claims they x-rayed the digit, but we're still waiting for the proofs to run in *The Bomb-Shell*.

A fishing marathon has been running all summer with **Larry Jack**, Mr. Johnson and Mr. Brown the principal contestants. Fly rods are preferred tackle, but it has been hinted around that blackjacks may have been used to swell the catch. Score is kept with fish heads and the pay-off came when, in front of a goodly assembly, Larry opened Brown's refrigerator to take out a tray of ice cubes. Instead of ice cubes, the tray contained the severed heads of seven beautiful black bass. Larry still insists it was a "plant."

Laundry Letters

Francis Walsh, superintendent, has returned from an enjoyable vacation.

Shift 2 gave a pot-luck supper September 12 in honor of **George Kinnard's** birthday.

Billie and Dickie Leip have been transferred from Shift 1 to Shift 2, while **Edna Butenis, Claudia Polson** and **Cassie Reichman** have started back to work on Shift 1. Miss Polson has been promoted to floor-lady, replacing **June Million**, returned to Normal.

It has just been discovered the reason why **George Griffith** wears such a shining smile. She said "yes" and they middle-aisled it September 4.

Pipe Shop

Can anyone explain why the boys of the Pipe Shop are calling **A. L. Chissamore** "Stupor Man."

Proud papas of the Pipe Shop—**Jimmy Jenkins** and **Bob Pombert**.

"Uncle Junior" Stratton and **"Stupor Man" Chissamore** are having the argument of the century—you know, it goes on continuously.

The Pipe Shop welcomes **Raymond Kral**, new employee in the stock room.

Where or how will **Bill Sexton** ever get enough to eat—always eating?

Carpenter Shop

The Carpenter Shop had a visitor the other day, **Sgt. Henry W. Kwasniewski**, a former employee, who is now a gunner with a bomber squadron.

Speaking of bus man's holiday, **Harry J. Dietz** recently journeyed to his home at Round Lake, Ill., for a "restful" vacation. When he arrived he discovered that the roof had been partially blown off during a heavy storm. Harry spent his holiday fixing the roof. Some fun, some vacation.

The Carpenter Shop has assumed the atmosphere of a hospital as the boys are all walking around on crutches. Sympathy is not in order, however—they are just testing out the ones they are making for **Dr. H. L. Schultz**, EOP medical director.

Machine Shop

J. A. Cocker, superintendent, is enjoying a well earned vacation.

Since **Joe Louis** and **Billy Conn** are in Uncle Sam's forces, the next big bout will feature **"One Punch" Rohder** and **"One Round" Fassio.**

Del Govoni is all adither about his bowling team. No cooperation, he wails.

Here and There

Mrs. Velma Whitmore and **Mrs. Marjorie Shreeve**, telephone operators, have returned from their respective vacations which were spent in Northern Wisconsin.

The Sheet Metal Shop lost one of its most popular and capable members when **John Thompson** was killed in a hunting accident near Sycamore, Ill., September 7.

Paul Ryan entered the Army last week.

Ezra "Dad" Ross, grounds attendant at Richards Farm, spent his vacation at his birthplace in Michigan and attended a family reunion. This was his first visit to the old home in 20 years, and he enjoyed many visits with relatives and old friends.

Leonteen Loodeen of the Electrical Department took her vacation last week—went home to Upper Michigan to see the folks.

Stories of a gala time followed the attendance of **Tim Thompson, Ralph Heap** and **"Doc" Craig** at the Army War Show September 5.

John Wagner, Electrical Department, enlisted in the "Sea Bees" of the U. S. Navy. He received the rating of chief petty officer on construction.

Material Warehouse

FRANK McCORMACK
Correspondent

Clap hands, everybody, for **Ray Puffer** who has just written from deep in the heart of Texas. Ray is bringing a Texas steer back home with him to ride to and from work. He said that is one way to beat the tire shortage, gas rationing and the 35-mile-an-hour speed law.

Mr. and Mrs. Oscar Horn are back safe and sound from a vacation spent in Paris. Naturally, all were anxious to hear just how things are going there now, and Oscar said there were only two radical changes in the place since he was there during the last World War. The pump handles have all been greased, eliminating all squeaks and noises, and they now have mittens on the town clock's hands to keep them from freezing this winter. Of course, this all happened in Paris, Ill.

"Tom Cat" John Higgins, confirmed bachelor, is losing weight and sleep and really worried about being unable to pick a peach from the girls he knew, the girls he knows now and the girls he'd like to know. Johnnie said it would be his luck to pick a lemon in the garden of love where they say only peaches grow.

"Billy Goat" Fred Nelson spent the first seven days of his vacation trying to figure out where he would spend the rest of it. So after adding, subtracting and dividing the answer was all ciphers. So he gave it up and came back to work.

Sherman Hedrick sent a post card from Columbus, O., to say he is feeling fine and having a real good time. His fellow workers were pleased to hear from him, but they warn him against bowling while on his vacation as he is signed up to bowl at Lockport when he gets back.

ELWOOD ON PARADE

NITRATE OF AMMONIA for EOP's bombs and shells is received in liquid form in tank cars. Shown here, left to right, unloading a tank car, are W. G. Dooley, supervisor; William C. Brown, Loren Horrie and James Halpin.

GREAT STEAM POWER is required in dehydrating and crystaling the nitrate of ammonia after receipt in liquid form at EOP. Here, John T. Williams, is shown in front of the fire box of one of the huge boilers generating steam.

INITIAL EVAPORATION of the liquid nitrate of ammonia is accomplished in "high pans," pictured here, as Joe Lucas (left) takes the temperature of the solution under the supervision of Harold Gehner.

FINAL CRYSTALLIZATION of the ammonium nitrate is achieved in the kettles shown here. In appearance almost like giant mixing bowls, they are manned by Kenneth Cox, Alvin Gansch and Virgil Jordan, shown from left to right.

Shell Loading Plant for Navy Built by S & P

Project Manager Tells of Progress In North Carolina

By R. R. Day
Project Manager

Land ho!

The "Navy Division" of Sanderson & Porter has struck "soil" in the Carolinas. . . .

Well embarked on the "journey" of design and construction of the Nation's largest plant for the loading of a specific shell, Sanderson & Porter have the boilers fired, and it is full steam ahead.

The prime contractor, U. S. Rubber Company, who will operate the plant, stands by like a thoroughbred at the starting gate, champing at the bit as structures mushroom from virgin soil.

And with much deploying and planning, the Sanderson & Porter "Navy Division" is employing tactics tried and true, and even new, for the rapid completion of structures and facilities of the Charlotte Ordnance Plant at Charlotte, N. C. Daily progress is noticeable in the molding of exterior and intra-plant railroads, roadways, telephone, fire-alarm, and other protective systems, incoming and interior water systems, steam and compressed airlines, and electrical facilities, which on completion will be an added sinew of strength to the Navy "arm" of Uncle Sam's warring forces. It is no mean task to transpose with the urgency required, a large tract of peaceable farm lands into a specific wartime effort.

Started in March

Starting in March, Sanderson & Porter conducted reconnaissance surveys to select the most logical site for a project, whose characteristics entertain many features foreign to ordinary plant construction and operation.

In undertaking this project, Sanderson & Porter was confronted not only with design and con-

(*Turn to Page 5*)

LOADING 105 MM. SHELLS is being successfully done by girls at EOP as the needs of the Nation's armed forces continue to deplete the supply of male workers. All of the assembly operations in this bay of Group 1 are done by girls. Pictured left to right are: First row, Billy Gibbs, Marie Heintz, Ruth Welch and Martha Mings; second row, Dorothy Oelrich; third row, Opal Just, Eleanor Lind and Mary Gurka; fourth row, Rose Kellner; fifth row, Lillian Simpson and Edith Gansert, inspector; sixth row, Gen Irwin and Pearl Thompson.

First Aid Is Added Punch in War Effort

Classes Available for Workers and Families at Home

First aid training now available to employees and their families at EOP and in their home communities gives them an unusual opportunity to convert part of their spare time into an extra punch in helping to win the war as well as enabling them to help themselves and others in emergencies.

The training is made possible by the efforts of the EOP Safety Department, headed by **Rollin T. Read**, safety engineer, with the co-operation of the American Red Cross, represented here by **J. W. Hawes.**

Standard, advanced and instructor courses are available. The standard course consists of 20 hours, either 10 two-hour or 7 three-hour sessions, and must be passed successfully before the advanced course can be taken. The advanced lessons are for 10 hours, 3 three-hour lessons with 1 hour devoted to an examination at the end. The instructor course consists of 5 three-hour lessons. Certificates are awarded at the end of each course.

Knowledge acquired from a first aid course will save many lives. It may enable you to save your own life or that of a member of your family should catastrophe strike. A life cannot be saved by studying first aid after the accident. In severe injuries, the proper

(*Turn to Page 7*)

Trade Stamps for War Bonds Here

Employees who wish to convert their War Savings Stamps into War Bonds may now do so at the office of **Comptroller John J. Cole**, he announced today. This convenience was made possible by the fact that EOP is recognized as a direct agency of the Treasury Department. All services rendered by banks relative to War Bonds can be obtained at EOP.

Funeral Services Held for Mrs. Harrison Smith

Funeral services for **Mrs. Harrison Smith**, wife of Sanderson & Porter's resident partner at EOP, were held at Troy, N. Y., September 30, three days after her death in St. Joseph's Hospital, Joliet, following a long illness.

Expressions of sympathy for **Mr. Smith** were universal throughout the EOP area and in the adjoining communities where EOP employees live. These expressions took the form of verbal and written messages and floral tributes.

Mrs. Smith had been confined to their home at Dresden Heights Farm in Channahon Township by a heart ailment for nearly two years. She was born in Troy, the former **Edith Crowley**, and she and Mr. Smith were married in Troy June 20, 1920. She is survived by her husband, one son by a previous marriage, **Robert See Smith**; one sister, **Mrs. W. J. Close**, and three brothers, **Charles F., Fred C.** and **John J. Crowley**, all of Troy.

Notices Sent to Slacker Drivers

Check-ups of the number of passengers in the cars of EOP workers entering and leaving the plant have been in progress for several days. Those drivers who did not have full loads of passengers received from the EOP Tire Committee a cartoon notice informing them they were not eligible for tires unless they obtained additional riders. This notice is reproduced on Page 2 of this issue.

The tire situation is becoming more serious each day as rubber needs for the war effort increase. Doubling up of riders and reduction of speed are vital requisites for complete co-operation with the war program.

A large company made a thorough study of the effects of various speeds and learned that on the basis of 100 per cent life expectancy at 40 miles an hour, a tire's life can be extended to 140 per cent of expectancy at 30 miles an hour. On the other hand, a speed of 60 miles reduces expectancy to 50 per cent and 80 miles to 20 per cent.

Hallowe'en Dance Set for Oct. 31

A Hallowe'en dance for all EOP employees and their wives is planned by the Employees Activities Committee in the Recreation Building Saturday night, October 31, it was announced by **Edward L. Walkup**, director of recreation.

Special features, including harvest decorations and a chamber of horrors, are being arranged. Music will be furnished by the EOP orchestra. Couples will be admitted to the plant if one is an employee and has his or her badge.

The committee also arranged an open house at the Recreation Building for the afternoon and evening of October 10. From 2 o'clock on throughout the afternoon, demonstrations of basketball, volley ball, badminton, bowling, billiards, table tennis and shuffleboard were scheduled. Card games were planned and the soda fountain was available for refreshments.

For those who planned to stay for the dance in the evening, dinner was made available at the Cafeteria. Admission was set at 25 cents each, which permitted attendance at both afternoon and evening activities.

Artists and slogan writers among employees are asked to submit "Keep 'em Shooting" slogans to the Recreation Department. Winners will receive letters of merit from Washington officials.

Mr. Walkup also announced that bowling and basketball leagues are now being organized and urged all interested workers to get in touch with him.

Old Metal Badges Now Filed Away

All of the round metal badges, which formerly identified EOP employees but which were called in and are no longer recognized as a means of entrance to the plant, have been filed for record purposes. Holes were drilled to deface the badges without destroying picture or clock number and the badges were bolted together for convenient and less cumbersome filing.

Rentals Set for Wilmington Houses

Although the date when they will be available has not been set, rental rates on the dwelling units of the Federal Public Housing Authority at Wilmington have been fixed and prospective tenants are requested to obtain and fill in application forms for the houses, according to **E. C. Fortman**, housing manager, Wilmington.

Rentals established are $27.50 for a one bedroom unit, $31.50 for two bedrooms and $35 for three bedrooms. Charges for utilities such as electricity, water and fuel are additional. Each unit will contain a coal fired heating stove, kerosene cooking range, icebox and hot water heater.

Mr. Fortman emphasized that applications be obtained, filled in completely and returned to his office. Blanks may be obtained from **R. T. Bassett**, assistant comptroller, or **Seymour Kurantman**, administrative assistant, both in the EOP Administration Building.

Women's Recreation Director Named

(*Picture on Page 4*)

She's here, she's terrific and she wants to meet you.

She is **Myrna Faris**, newly appointed director of women's recreational activities at EOP. If you want to play shuffle board, bat out a game of table tennis, get into a basketball league or form a knitting club, Myrna Faris is the woman to see.

Miss Faris is a native of McAllen, Tex., and took a B.S. degree in physical education at Baylor College, Belton, Tex., plus graduate work at Louisiana State University. She was head of the girls' department and taught physical education for five and a half years at Pharr high school at Pharr, Tex. During the summers she did counselor work at a girls' camp in Houston, Tex.

If you have a yearning to go dramatic and want to form a drama club, Myrna Faris is the woman to see. She was active in college dramatics and walked off with state honors in Texas for the best individual actress in interstate competition.

Miss Faris' other achievements include membership in Delta Psi Kappa, national honorary physical education fraternity, and Alpha Psi Omega, honorary dramatic fraternity.

So the next time you get an inspiration about your place in EOP's recreation program, call Myrna Faris, line 4109, or stop off at the Recreation Building and get acquainted with her.

Nearly Right Won't Do

Our soldiers are trained to perfection in their shooting. Nearly right won't do. The soldier knows it; he finds it out in battle. Promiscuous shooting doesn't win battles. It's the correct, accurate aim that gets results.

His shells and his bombs must be made to perfection. His guns, his tanks, his planes, his ships—all must be true to perfection. Nearly right won't do. To what advantage is all his training if his guns jam or if his shells and bombs should be duds. Quality every inch of the way is what counts.

"You've heard men say, "Aw! that's good enough!" Perhaps you've heard this in a garage and you wondered if it was the repair to your car or your tires they were talking about. Then out on the road a squeak or noise was heard in the car and you were sure then that it was your car they were speaking of and that "just good enough" wasn't fair, honest or acceptable. Remember? Remember how you felt towards the garage and those men? How you worried about what might happen to your car from then on; how you lost faith in repair men and garages in general about that time. No, "good enough" won't do. The soldier places his life with confidence in his weapons. Certainly "good enough" won't do. It must be right; *it must be perfect.*

"Safe enough" won't do. There must be no uncertainty about the safety in the handling of the fuzes, boosters, shells or bombs. There must be no question about the safety of our products, to our soldiers, sailors, marines, airmen or workmen. *Just safe enough will not do.*

What then? The products must be made safely, handled safely and be safe to ship, store, fire, drop—and still carry all the punch necessary to do the job.

If we're going to accept and cheer heroism on the part of our soldiers, then we must be worthy of it in our work. This is no time for guesswork, approximations, or just "good enough" performances. Our work, our methods, our products must be right—made so by our best efforts. Let's make them safely and make them right all the time.

A People's War

We are all inspired by the Army's, the Navy's and the Marines' offensives on all fronts. The dastardly foes of every decent, human principle are now feeling the pent-up wrath of the United States' armed forces.

The ever-increasing, record-breaking offensive on the labor and production front at the Elwood Ordnance Plant is heartening too. We know that vengeance will be wreaked, and the world will know that our brave heroes will not have died in vain.

We know that we shall lift from our lives the crushing threat of new barbarians, out for world conquest. These barbarians have raised the indignation of a hundred million citizens to the boiling point by the reports of their fiendish torture methods. We know what we are fighting for! We are fighting for a world in which there will be no place for new Hitlers or new Tojos to tread upon.

We are fighting for a world of three squares a day for anyone who will work for them; a world of factories running full blast. We are fighting and buying bonds not to make, but to keep, a world in which every man will know the thrill of being intelligent and humane.

Who do I mean by "We"? I mean you and me—the farmer, the banker, the business man, the lawyer—in short, the army of all the people of the United States. This is no caste army. In the United States we have no place for a "caste" army. We have no place for slackers—whether they are on the fighting front, the production line, or on the bond-buying line. They should not have the privilege of being called part of our army.

That's the kind of a war this is—a people's war, all engaged and joined in a common cause and a common objective which can be achieved to the fullest degree only by whole-hearted co-operation. Think it over—*Are you doing your part?*

—James A. Glade, Group 61

NOTICE

YOU ARE NOT ELIGIBLE FOR TIRES, RECAPS, OR TUBES.

WHY? BECAUSE YOU ARE NOT CARRYING THE REQUIRED NUMBER OF PASSENGERS. YOUR NAME, CLOCK NUMBER, AND CAR LICENSE NUMBER ARE BEING RECORDED.

CARRY PASSENGERS OR RIDE WITH SOMEONE ELSE. HELP WIN THE WAR BY CONSERVING THAT "CRITICAL MATERIAL" CALLED RUBBER.

When you have replaced these ghost riders with EOP passengers, send this notice to the Labor-Management Committee with the names, addresses and clock numbers of the riders written on it.

THE BURNING PIT

By Scorchy

The current campaign for bigger and better scrap piles sent me wandering up to yon Salvage Yard where the genial, and sometimes puffing, **Hugh Robb** holds forth as the Maestro of the Bent and Broken.

Us work-a-day folks are usually denied entry through the portals of such Havens of Rescue as the good old Salvage Department way up North. We look upon scrap iron, tin cans, paper cartons, really worn out tires (and I mean really), down-at-the-heel shoes with the big toe sticking out and that kind of Trivia of the Trash Can as just so much junk and let it go at that.

But not Mr. Robb. After you enter his Den of Dilapidation and he becomes satisfied that you are not going to secrete a piece of broken-down six-inch pipe in your coat sleeve, then he really lets go into the Rhapsodies of Reclaim.

You soon begin to wonder why your living room is not decorated with broken bottles, old shoes, leaking coffee pots, and torn fenders instead of the costly bric-a-brac that kept you broke in your earlier years of collecting what you thought was really "What the Well Dressed Living Room Will Wear."

As he fondly leads you through the mountains of just plain "stuff," he'll stop, fondly pick up what you are sure is just an ordinary and well-battered tin can and exclaim, "Ah, isn't it a masterful work, a bit knocked in at its lower rim, but man, what a tin can—must have come from **Paul Deylitz'** Dream House down below. He must be a rough customer the way he kicks these nice cans around. I've even heard his place has a wooden mallet secreted somewhere so he can express his real opinion of some of that nitrate that gets a bit cakey now and then."

A bit further on, a bale of paper cartons catches his loving eye and he stops and meditates. "Every one of those cartons nestled together under the crushing pressure of those hard cutting wires really came from a good family. It's going to hurt when the truck draws up to take them away. They don't stay with us long but you sort of get attached to the little rascals." Most of those spent their active lives with **Joe Salmon** but when he gets through with them they are almost flat broke, at any rate, they are flat and broken.

"Look out," says Mr. Robb as he grabs you from the path of one of **John Egan's** locomotives bringing another trainload of Welcome Waste to its temporary resting place. "Ah," sighs the King Culler of EOP, "what a lovely mess of flotsam and jetsam. John Egan seems to have no respect for the dormant but nontheless sensitive personalities of these Outcast Oddities; look at it . . . lumber, pipe, sheet metal scraps fresh from the tender caress of none other than **Bill Ryan**, the original Indian (Chief Bender) of the Tin Shop, all mixed in together with no thought of the privacy the dignity of their station really deserves."

"You got to treat all these little scraplets right, or the junk man cuts the daylights out of his bid because it's to be on a 'where-is-as-is' basis, instead of 'sorted and classified.' "

"Scorchy, you ought to start rounding up a little scrap and see how it grows on you." After a few odd trinkets are collected from the less frequented parts of your basement it begins to get you and before long you find yourself disconnecting the faucets while the little woman is in the midst of drawing the liquid steam in which she washes the dishes.

"To be true, the hot water drenches her new house dress, fades the color out of it and you then have some more old rags to route toward the junk man."

Maybe Hugh Robb's got something there . . . anyway try it a while and see how easy it is, and here's a tip . . . *it's good for the country.*

I have written . . . a poem!

No Use Complaining

It rained and snowed and got awful cold—
Boy! did I complain.
My shoes got wet, my hair wouldn't set; and
My feet they nearly froze.
Then the sun came out making it very warm;
Sure! I complained and said it was too hot.
It seems all I do is gripe.
Today I sat down and looked in the mirror.
To myself I said, "listen sister why don't
You use your head? You're one of the
Luckiest girls that ever lived. You're free
From day to day, you eat when you like; you
Sleep when you like; you do what you're
Heart desires. What of the boys out there
At war and that one you said you simply adore.
He's out there, he can't complain; snow or rain—
He fights just the same.
You know he's out there protecting you.
So hold up your chin in any weather and think of
Him out there.
He loves you; so you love him, too.
You have no reason to complain—till he comes
Back, be brave and strong, it won't be for very long.

—Mitzie Kovacik,
Forelady, Group 6.

Co-operation

I'd love to see that great day come,
I hope 'twill not be late
When everyone in the U. S. A.
Will all co-operate.

Just like a stone wall firmly stands
Linked and pressed together
Without the slightest regard
For any kind of weather.

Oh! would that joyful hour soon come
Wherein every woman and man
Would put 10 per cent in War Bonds
'Twould be the safest plan.

Then mounting upward we would rise,
Our onward course pursuing,
We'd open everybody's eyes
To what the U. S. A. is doing.

I wish that everyone would see—
Stop awhile and think—
The strongest part of any chain
Is in its weakest link.

Stand side by side so firmly tied
That naught can our efforts sever,
Thus our U. S. A. will always be
A monument forever.

—Wilda Willis
Matron—Guest House.

"Bicycle Built for Two"

Elwood, Elwood,
That's where we work each day.
We wipe primers,
Just for our U. S. A.
We don't care how long it takes us,
We're going to break the Axis;
We'll set a trap,
To get that Jap,
So let's do our best each day.

—Vivian Gift,
Group 8.

Soldiers Here and There

Employees at the Elwood Plant,
Unselfishly they give.
Their time and talents—yes—their all,
For the land in which they live.

A piece from here—a piece from there,
Assembled form a shell.
Just get them to our soldier boys,
And they'll blast the Japs to . . .

So work at home—they'll fight o'er there,
To keep our country free.
It's really not too much to ask,
For a "Land of Liberty."

—Ruth Hiatt,
Group 8.

One Dozen Roses (Bombs)?

Give us one dozen fuzes,
Put some shells on behind them
And we'll send them to the boys we love
For we know if they use them
On the Japs we'll excuse them
If their aim is what it ought to be.
The day is coming shortly
When our boys will strike hard,
Dropping those heavy Bombs
In the Japs own back yard.
Give them one dozen roses
And I'm sure they will use them
When we finish what we've started now.

—Alexander Frank,
Fuze and Booster Area.

The Spirit of Building Fourteen

We come to Elwood to work each day,
To do our bit for the U. S. A.
At times the task makes our muscles throb,
And we feel like saying, "To heck with the job,"
But then we think of the boys across,
Who would rather be dead than see freedom's loss.
So, come on girls, let's work today,
And in the end we all can say,
"We did our bit and we liked it, too,
We're especially proud, we girls in blue."

—Evelyn Cahill,
Building 14, Group 1.

Let's Remember

When the going is tough
And we want to complain,
Let's remember
The Soldier, the Sailor and the Marine.

(*Turn to Page 7*)

PROUD RELATIVES of Corp. William Karges of Joliet are shown here reading a press story of his decoration for bravery with the American forces in Egypt. Seated is the hero's father, William H. Karges, who is an inspector in Group 1, and standing is the soldier's brother, Charles R. Karges, an inspector in Group 61.

Yank Overseas Urges Work Be Kept at Peak

Predicts Early Victory If All Do Their Share

"After reading *The Bomb-Shell*, I am certain that if everyone in the plant keeps up their good work the Axis won't last long and our boys will soon be home," said **Corp. Paul W. Bone**, formerly of Group 64, now attached to a fighter squadron in England, in a letter addressed to the EOP tabloid.

"Just received two issues of the paper, which I thought I would never see again after leaving the States," wrote Corporal Bone. "I am now stationed in 'Merry old England' and those papers are just like money from home. How about some news from Group 64? Would sure like to hear how and what the boys are doing."

Pvt. Victor M. Chiovatero, in his letter from Iceland, said "keep things rolling and I'll do my best on this end of things."

In a letter from an unidentified foreign field, **Corp. Edward M. Zarlengo**, who formerly worked at Group 1, said *The Bomb-Shell* makes a soldier feel right at home.

"I started on the Guard Force in April, 1941," wrote **Pvt. Edward J. Early**, Camp Swift, Tex., "and resigned in July, 1942, to go into the Army. I am in the Engineers Division and attend Radio Communications School. Expect to be finished in six more weeks. Lots of hard work, but well worth it. Give my best regards to **Frank Porterfield, Leo Boyle, Harry Larson, Carl Kornmeyer, Frank Green** and the rest of the guards I worked with."

Pvt. John E. Hlavajcik, Patterson Field, Fairfield, O., wrote to **Bess Moore**, Ordnance Department, asking that his greetings be given to his former associates in Group 3-A. He was in the Ordnance Inspection Department from February 14 to September 1, 1942, when he enlisted in the Army Air Corps.

Pvt. Clarence E. Trierweiler, formerly an EOP inspector, said he had been transferred from San Diego to the Marine Aviation Detachment at the U. S. Naval Air Station at Jacksonville, Fla.

Through **Naomi R. Apgar, Pvt. Larence E. Ross**, Camp Callan, California, sent thanks for receiving *The Bomb-Shell* regularly. **Pvt. Ivan C. Nelson**, Army Air Base, Lincoln, Neb., said he had come in contact with a number of men who formerly worked at EOP. He reported he was about half way through a 110-day course in air mechanics.

In a letter to **Supt. J. J. Fitzpatrick**, Group 3-A, **Pvt. F. B. Waters**, Amarillo, Tex., asked that his regards be given to his former associates in that group and reported that his wife, **Vancell Waters**, is now working for EOP. He said his company was living in tents 1,606 feet above sea level.

Letters and cards were received also from **Pvt. Irving Katz**, Camp McCoy, Wisconsin; **Pvt. Leo Walters**, San Diego, Calif.; **Corp. Walter W. Plumb**, Fort Bragg, North Carolina, and **Pvt. John Rolando**, Army Air Base, Florence, S. C.

GROUP 3

NORBERT McLUCKIE
Correspondent

Eddie Copp, foreman of Building 4, recently became a proud papa of a son. Incidentally the father has fully recuperated.

Won't someone please volunteer to tell **Elmer Emanuelson** when the duck hunting season starts? He needs a lot of practice and he would like to know what to do about it.

Dutch Ahrens, steamfitter, is going to try a new cold remedy. The old one doesn't work, so maybe **Bob Hankes**, his partner, can give him a new recipe.

The cold September weather killed all of **George Weber's** beautiful flowers.

Edward "Shack" Bray, guard at Group 3, has returned from a vacation. Points of interest he visited included Starved Rock State Park, which is a mile and a half from Utica, his home town.

Rudy Mahalik of Building 10 had to use a row boat to get home Labor Day.

Jess Darling played quite a joke on some of the boys with his trick radio voice thrower. Jess has performed as a comedian in several minstrel shows. He has quite a display of tricks.

The Group softball team, Dougherty's Bombers, made good in a revenge game with the strong Inert Storage (Group 62) team September 17 at the Group 3 stadium. **George Cunningham** pitched the Bombers team to a close victory, the final count being 4 to 3. Only one error was committed.

The Bombers traveled to Pontiac September 18 and under the lights, before a very large crowd, defeated the champions of the Livingston County Owego Club 1 to 0.

Pitched by Cunningham, the game was a perfect thriller throughout; each team bagging only four hits. George not only pitched a perfect game, but was responsible for one of his team's hits, a triple. The real thrill was a homer in the last inning by **Carl Sosnoski**, the only run of the game.

Nettled by the defeat of their league champions, the Pontiac All-Stars issued a challenge for September 24. This team is composed of players selected by the City League managers as "the cream of the crop." Pontiac made great preparations for the game, only to have winter make an early debut and force a cancellation.

Unless winter decides to leave and return on schedule, it seems as though a very successful softball schedule has been wound up for this year. Although the Bombers are not champions of the plant league, they did not lose a single game to any of the loading line teams.

Dan Warren, manager, is to be congratulated for the fine work he has done. This is equally true of all the members of the team and the others who helped in having a successful season.

HEROISM of Corp. William Karges, Joliet, stationed in Egypt, was rewarded with the soldier's medal for bravery behind the lines. Photos of the corporal's father and brother, both EOP employees, are published elsewhere on this page.

EDWARD KEENAN
WILBUR GALBRAITH
Correspondents

Congratulations go to **Mr. and Mrs. Kenny Kucera** who are the proud parents of a son weighing 7 pounds and 11 ounces. *(7 - 11 sounds like a crap game.)* The last reports are that the baby and father are both doing well.

Congratulations are extended to **Mr. and Mrs. Dorrence LaRoche** who are added to the mounting list of new parents. Both mother and baby are doing fine and as for the father . . . there hasn't been one lost yet.

Congratulations are also in order for the newlyweds, **Mr. and Mrs. Eddie Keenan.** Mrs. Keenan, who before the vows were taken was **"Bing" Phelan**, is from the Personnel Department of EOP. Many can smell the sweet aroma of those cigars already.

The Real Lowdown

Wonder if **Melvin Roach**, timekeeper, is going to ask Santa Claus for a heating pad this year.

The timekeepers at Group 2 have started to wear hip-boots since **Bert Folk** got a new cuspidor. Bert hasn't got the exact range yet.

How did **Bill "Shoe Shine" Malone** get his new name? It seems as though **Nate Johnson** was waiting for a shoeshine in Wilmington one fine afternoon. Bill came along and said, "shine, sir," and Johnson replied, without looking up from his newspaper, "get on 'em, kid!" Malone got busy and did a pretty good job before he was interrupted by the young fellow who runs the stand asking for Bill's union button.

George Zobel, Larry McKeon and **Pig Zier** started for the Wisconsin-Notre Dame game, but decided it was too cold and ended up in a warm theater on South State Street in Chicago. Zier says that it was the best show he has seen in a long time.

A daughter weighing 6 pounds and 9 ounces was born to **Mr. and Mrs. Frank Gaglione.** Frank showed up with a box of cigars, and is one of the proudest fathers in the group.

Things we would like to know . . .

Why **Leo "Glamor Boy" Bell** is spending so much time in Coal City. . . .

If **William "Jersey" Klegman** does as much hunting as he tells he does. . . .

What **Oscar Kelsey** will do for men now that the softball season is over. . . .

If **Dave Richards** has three jackets on now, what will he do when winter comes. . . .

Sam Hoffman is shaving now that he is on the day shift. **Bill Stanley** is riding to work in a De Sota.

THREE former EOP bus drivers are together at the Field Artillery Replacement Training Center at Fort Sill, Oklahoma. Pictured here left to right are Pvt. John J. Bonas, who sent the snapshot; Pvt. Lester DeBolt and Pvt. Charles Wright.

Inspection

ROBERT PIERSON
Correspondent

Bryant "Bud" Brown, inspection office manager, is back on the job after a short illness. Bud expects to be inducted into the Army October 10.

The inspectors in Groups 4 and 5 have a new pastime—listening to **Jim Tyler** chewing gum.

Jack Fey, inspector at Group 4, has been on the sick list.

Julia Sullinger left September 26 for California to visit her husband, **Pvt. Robert Sullinger**, who is stationed at Fort Ord.

Milton "Bud" Picknell has been commissioned a captain in an Army tank unit. Certain little mice and frogs have been leading a more peaceful life in the ramps since he left, as Bud was the big game hunter of Group 8.

Sam Hoffman, new sealing inspector, asked his boss, **Frank Lewis**, for some sealing wax so he could seal a can. He didn't know you sealed a can with marking tape.

Stella Jaworski finally got a permit for some recapped tires. Now she has no tires to get recapped.

An unbelievable sight—**Myron (Dreen) Champeau** of Group 1 without a chew in his mouth.

Larry Schwartz has put in a requisition for a pair of oars—since he received a pair of company shoes—size 13.

Bill Kirban, superintendent of scales, is contemplating a new paint job on his orange truck. His men out in the groups can see him coming.

WAR WORKERS come from every age group and the older are doing their part along with the younger as is illustrated by these two employees of the Personnel Department. Myron Mills (left), 67 years old, and Elmon Armstrong, 76. Others who returned from retirement to help with the war effort will be shown in future issues.

RECREATIONAL ACTIVITIES at EOP will be guided by an Employees' Committee, some of the members of which are shown here attending the first meeting in the Recreation Building arranged by Edward L. Walkup, recreational director, shown at the extreme left. Semi-monthly meetings are planned and officers will be elected near the end of October. Representatives appointed by their respective superintendents shown here left to right are: First row, Lucia J. Pearson, Guards; Mary Jane Clennon, Group 7, and Sgt. H. E. Dowden, Guards. Second row, E. G. McAloon, Utilities Department; Helen Shimek, Utilities; C. O. Finnegan, Engineering Department; J. E. Hendershott, Group 3-A; Colby Eriksen, Group 3-A, and Myrna Faris, women's recreational director. Third row, Charles P. Harris, Group 6; Walter H. White, assistant electrical superintendent; Harvey Steffes, Group 61; Dorothy Murphy, Group 9; Rita O'Connor, Group 5, and John J. Neely, Jr., Group 9. Fourth row, Wilbur P. Galbraith, Group 2; Frank J. Wehrli, High Explosives Department; Robert C. Wilhemi, Inspection Department, and John H. Walker, Fuze and Booster Area.

Utilities

Motor Pool Memos
By C. I. Wilson

Genial **Frank Kern**, chief dispatcher, buys his cigarettes wholesale. Wonder why he buys them at all with so much business being carried on at the pool and most of the chauffeurs in the habit?

Raymond McCoy, Joseph "Melody" Elledge and **Alfred Scheuber** handle the dispatching chores on all three shifts. They are assisted by **Delmar Jensen, Anthony "Victor Mature" Cemeno** and **Alfred Block.**

The boys hung a new title on **Edward Silc**, and who knows but that he may open up a new department. He is generally addressed as "superintendent of complaints."

Art Doty, the ladies man, is the champion eater (chow hound), but where it goes nobody knows. However, he will make a good soldier, as the saying goes that an army marches on its stomach, and Art can certainly "punish" food.

Dancing seems to be a specialty with **Leroy VanDuyne.**

Anthony Cemeno holds the checker title among the boys but will have to give it up soon as Uncle Sam is calling. Some say that he may "center-aisle" it before going.

Another Romeo in the crowd is **John "Sugar" Kane.**

Wonder why Jim Lovell is asking for the 3:30 shift? Another feminine angle?

Edward "Baldy" Suffern just went through the tortures of his "annual" haircut. He does look different!

William Hatting, "the OK kid," has additional duties to perform, one of which is approving suggestions. They say that his "1001 file" (waste paper basket) is doing plenty of business.

Can anybody figure out how **Harry Wollgast** manages to get back and forth to work in that old relic of his?

Leo Austin is now working the "graveyard" shift so that he can make all of his classes in school. Very studious! Who knows but that he may be a professor some day!

Tom East figures on taking a winter trip to his home state of Arkansas around the holidays. Does he know that gas rationing will be in effect then, or will hitch-hiking be the mode of travel?

William Handlon and **Ford June** are trying to figure out how horses can be used in lieu of autos from a chauffeur's standpoint. Give them two weeks more and they may get the answer.

Electric Shop Epitomes
By Dan Webster

Richard B. Stegath's pet peeve —the fifth copy of purchase requisitions.

Why is it that **Norman Keck** and **Lewis Unsbee** have so much testing to do in the Fuze and Booster area? It is hoped they don't get their circuits crossed.

Charles Beverly, a former employee, is home on leave from Norfolk, Va.

C. L. Utley is still wondering what happened to the big fish supposedly caught by his boys while on vacation.

It is commonly known that **John Woodard** uses a black cat for a paper weight. Superstitious, no!

A sore finger is good for only so many trips to the hospital. What's the attraction — ask **Charles Jansen!**

Clarence Mascal has had trouble keeping **"Short Circuit" Sipple** from crossing circuits in the new EOP busses.

A little more patriotism from **Bill Souligne** would be appreciated. He should turn in that rubber tie he's been sporting daily.

Transportation Tales
By George O'Reilly

Mrs. Charles Mann, secretary to **E. J. Egan**, has returned from a honeymoon trip through the Smokies.

The employees of the Railroad Maintenance of Way Department have completed their part of a construction program with a spirit of hearty co-operation.

Lt. Joseph Ryan of the Navy Pre-Flight Base at Iowa City was a recent guest of his brother, **Trainmaster John Ryan.**

Yardmaster James Fitzgerald reports the boys at the Classification Yard are happy in their new office.

Mrs. A. W. Walters is recovering from a recent operation.

Fred Stroble, train dispatcher, has returned from his vacation.

Telephone Tid-bits
By Elaine Christman

Mrs. Gertrude Gierich has just returned from a very enjoyable vacation spent at home.

Have you seen the new Studebaker **"Chick" Manthey** is driving? Some class! "Chick" is cable splicer at the Telephone Building.

The National Construction & Engineering Company has completed the installation of the new 200-line extension.

The Richards Farm switchboard is now in progress of being cut from the Illinois Bell Telephone system to the Government-owned automatic system.

Earl Van Wie of the Kellogg Switchboard & Supply Company is completing the installation of the fire reporting telephone system.

Radio Ramblings
By Kathryn Richardson

Gus Hahn had a sleepy look in his eye one day (the eye that's open). He won't commit himself however and all he says is "darn that Ovaltine."

"When you get all you want, just say so and then I'll take a sup, huh?" This was a little idle chatter from **Merle Eberhart** who was talking to a fly which was perched on his coffee cup. The fly probably will be under observation before long.

R. A. Brown is always willing to help the radio men out when they are confronted with problems but this is too much. He spent a good 15 minutes explaining a problem the other day and then asked, "Now what does 3A mean?" "You're deferred" was the answer. That was really a $64 answer.

George Knarr, janitor at the Radio Building, is a nice fellow, a good worker, but his pipe is terrific. **Larry Jack** promised faithfully he'd bury it if it could be snitched somehow. The trouble is that the stem can't be found because of the smoke around it. It really puts in its eight hours.

An uninvited guest showed up in the Radio Department in the form of a snake. It was ushered in by Larry and caused a little confusion in the front office. Just ask **Katie Richardson.**

WOMEN will play a bigger part in EOP's recreation program now that Myrna Faris, pictured here, has assumed her duties as women's recreational director.

Pay checks were delivered last week by **Tom Ashton**, new timekeeper who is taking **Don Sharp's** place.

Machine Shop Messages
By Marie Studer

Congratulations are in order for **Paul Becker**, manager of Group 70's championship softball team, also to each and every one of his players for their loyalty and co-operation which made this victory possible. A very magnificent trophy was awarded for their efforts. Paul also wishes to thank the followers of his team for their moral support.

One fellow not concerned with gas rationing is **"Burly" Jones.** He can make it from Symerton to 70-7 in about fifty paces (his paces) if necessary.

Congratulations go to **Adelord Menard** and **Mario Zinanni.** They are the proud fathers of baby daughters.

John DeMarco is considering shaving off his cute mustache. He is afraid it won't look good with brown.

The boys in 70-7 say they have two of the nicest girls in the area working in their office.

The Machine Shop has a unique way of purchasing an extra War Bond. All employees contribute 30 cents weekly into a "pot." Each payday a bond is purchased with the funds. The best poker hand showing up on the weekly paycheck wins the bond. Nice, eh?

Here and There

Frank Cracraft, locomotive engineer, is planning a Dakota hunting trip. For those who anticipate pheasant dinner invitations, the line forms on the right.

Engineer Stanley Stinson is back after having had an appendix removed.

Dave Kreider is all set for another tour of inspection in the jeep, but this time will take along his lunch.

Clarence Abbott of the Pipe Shop recently underwent an appendectomy. The boys at the shop wish him a speedy recovery.

In these war-mad days you should remember that—"You can lose your money and make more, you can lose your love and find another, but if you lose your sense of humor you are ruined forever."

Loren Trimby left September 23 to join the Air Corps.

George Wilson and **Claude Watkins** of the Pipe Shop have joined the sick list.

Tim Thompson's co-workers in the Locksmith Shop, **"Doc" Craig, Ralph Heap** and **Landis Morris**, engineered a surprise get-together for the Thompson's eighth wedding anniversary. A lovely gift was presented by the boys.

Mr. and Mrs. W. B. Manchester report a very enjoyable vacation motor trip. Their first stop was in the beautiful hill country of Brown County of Southern Indiana. From there to the famous Blue Grass country of Kentucky. "Farmer" Manchester confesses to having been "horsey" all his life, so spent a day visiting the world famous breeding farms around Lexington, thence on to Gatlinburg, Tenn., for an extended visit in the Smokies.

Thomas Ryan, Roads, reports the arrival of an eight pound son at his home.

Virgil Kinsey, Sewer Department, has returned from a trip to his home in Texas. He was accompanied on his return trip by six Texas Bullfrogs. (*Ask the correspondent!*)

With the great shortage of rubber, **Bill Sexton** is suspected of using a rubber rule at the Pipe Shop. Quoting **W. M. Dale**, Bill's been stretching things too far.

Resch Promoted to Captain by Army

First Lt. Alois Resch, Army inspector of Ordnance at EOP, was promoted to captain September 24. Captain Resch is a native of Chicago and a graduate of Chaminade college, Clayton, Mo. He was commissioned in the Ordnance Department in June, 1941, and received his training at Aberdeen Proving Grounds, Maryland. He was assigned to EOP September 11, 1941.

Fire

STUART MOLONEY
Correspondent

Walter Lueder, assistant chief, reports that **Mrs. Lueder's** arm is in fine shape again. No signs of rabies as a result of her unfortunate encounter with a wolfhound.

Clifford Weiss and **William Reichert** are collaborating on a new tune, destined to sweep the country by storm. It has been christened "The Chicago Heights Hop" and can be played to the accompaniment of a tire pump.

Len Jessen has returned from his vacation. He didn't lose any sleep—or weight.

Francis Ryan is wow-ing the boys at Central Station with his interpretation of **Tom Ness'** egg dance. The last performance had the following boys rolling under the pumpers: **Louis Hildebrand, Frank Marek, Doyle Pratt, Fred Johnson, Andy Elias** and **Wiley Bell.**

Robert DeBolt says he won and lost on the War Bond drawings at the picnic.

Joe Drazy and **George Learned** are spending their vacations at White Castle Lodge on the banks of the Chicago River.

Love's labor lost . . . that pen and pencil set recently given to **Theodore Ehman** . . . two will get you ten that it winds up in **Chief R. W. Mortenson's** collection.

Bill Day recently turned down a fine offer to go with the Spencer Garment Company. His reasoning was thus . . . "This is war—and no time for preening!"

After five months of intent observation, **Bob Tures, Ed Koren** and **Tony Schnelton** have decided that **Dale Cornelius** is not a blushing rose—he is more the sun-kissed peach type.

Another fireman has turned down a lucrative offer with a non-defense industry. **William Atwood**, who refused an offer to go with a finance company said to the president of the firm: "I have no interest in this kind of a deal—it's against my principles." All firemen under a lieutenant's rating should laugh at this one.

Frank Scoma recently applied for an audition on "Mr. Anthony's" radio program, but was refused when it was discovered that his problem had been solved in the August (1914) issue of *True Romances.*

From a bouquet of memories is plucked and presented that daisy of a ride home from Rockford on a certain night last summer in the company of **Mr. and Mrs Charles Davis** and **Frank Nolan** — those pauses were most refreshing.

Delbert Leeper is using a 1912 Atlas as the basis of his geographical survey.

Larry Dailey and **Edmund Dickens** are taking a corrospondence course in horseshoe pitching.

Roy Wright is now serving tea and crumpets to **Paul Mulvain**, and Paul supplies the smokes.

Charles Thompson's lectures on the evils of crime have been greatly appreciated.

William Littrell is looking for 15 riders.

Percy Miller of the Radio Department found himself in a perturbing predicament. He needed a snuff box in which to keep some white lead and spent many an anxious hour seeking a member of the Swedish Snuff Society, who would obligingly donate his snuff box. His search was rewarded when **Sgt. Martin Hanson**, of the Norwegian Hansons, came to the front and offered Mr. Miller three freight cars of empties.

Chief Mortenson had been planning a short vacation, but conditions being what they are throughout the world, he was prevailed upon to seek the advice of a fortune teller. After a short seance with the seeress the chief emerged with his right cheek a rosy red hue—and shortly thereafter, "Madame La Future" came out, tore down her shingle and replaced it with a large placard bearing this admission of defeat: "Out of Business!"

RUNNERS-UP for the championship of the EOP Loading Line Softball League are these members of the Inert Storage, Group 62, team. They had beaten the champions twice in regular season games. Shown left to right are: Front row, Mat Ray, W. R. Kokal, Mose Williams, Joe Gasperich, H. G. Clark, E. L. Spiezio (captain), Louis Mauro, W. A. Fang and Samuel Jefferies; back row, E. J. Sheridan (manager), M. M. Moberly, W. B. Moberly, Frank Zupancik, A. P. Balston (superintendent of the group), Joe Fazio and C. C. Rowoldt.

Group 61

JOE MOTTA
Correspondent

Many were surprised, but far from displeased, when **Betty Ross**, mail girl, drove into bachelor group. She wrote another page in history by being the first girl to set foot on this area.

Lonnie, weighing 7½ pounds, was born to **Sam O'Large**, power house, and **Mrs. O'Large**.

Congratulations are in order for **Erny Decker's** wife, **Irene**, who celebrated her birthday September 26.

Harold Rouff is back after his trip to New York.

Foreman "Bill" Dooley is killing two birds with one stone. He is taking his vacation and celebrating his 25th wedding anniversary at the same time and in the same place. Congratulations!

George McSherry is home ailing. Talk about living up to naval traditions, **Carl LaPaglia**, after enlisting and while waiting for orders to report, has been transferred to be with the girls in Group 9.

Donald Baldwin, at home for one day with a severe cold, is now back to work feeling fine.

Gone but not forgotten are **Marines Donald Godich** and **LeRoy Abell**. Friends saw to that by taking a sheet of legal size paper and each writing a few lines of encouragement to the boys.

Vacationing in Pennsylvania is **Mrs. Harry Willis**.

Have you ever seen a rationing board in good humor? **Louis Dobovsky** did. In fact, they proved it by allowing him four new tires.

Welcomed to the group is **George Kushner**. George will operate a caterpillar tractor.

Ray Ruffner is planning on a trip home to Mason, Ill. He recently returned to work after a construction accident in January.

Did you see **Norman Crocker's** picture in the *Chicago Tribune* September 27? He joined the Air Corps.

To be examined by Uncle Sam is **James Halpin**. His pal, **Loren Horrie**, is going through the procedure of enlisting.

Congratulations to **Mr. and Mrs. Willard D. McDowell** on their sixth wedding anniversary.

Herman Stricklin went to Southern Illinois on September 26 for a few days' visit.

From electrician to farmer is true of **Axel Malm** who purchased a 240-acre farm near Rhinelander, Wis. However, Axel says, he will keep on at EOP.

Elmer P. Henry has moved from Braidwood to Wilmington.

It would be nice if . . . someone could arrange it so that **Hal Nosker** and **Bill Powers** could visit the Group 70 Laundry after the one here is in operation. . . . **Howard Cadwell** didn't sew up **Wayne Howard's** clothes . . . you knew that fewer 61 boys will be in the "Dog House" now that the picnic season is over—ask **Harvey Steffes**, **Charles Hinz**, **Seward Brown**, **Lawrence Baudino**, and **Robert Hinz** . . . another vacation could be arranged for **Dick Schoulda** . . . the dentist would hurry up and send **John Hosler** his new teeth . . . more knew that **Barney Beoletto** averaged 190 bowling a few match games in LaSalle . . . **Ruben Derksen** and **Paul Newey** would write to **"Tony" Berklacich** . . . you saw **Dick Unmisig's** new hat . . . **Bill Biggs** would wait until spring to plant another Victory Garden.

Group 1

JACK BARRY
Correspondent

Bob Bryant, foreman of Building 10, left for the armed forces October 8 with good prospects of being glad that a good job of shell loading is done around here.

Beverley Garing has been nominated together with yours truly to represent this group on the EOP Employees Activities Committee.

Phil Allison, former Government inspector here, visited the group one evening and he looked swell, tight pants and all.

Scotty Stephens, **Harm Gerken**, **Tuffer Yates**, **Robert Penn** and **Alex Melland**, trusty box car carpenters, threw a lobster party in farewell to **Clarence Jorgenson**, their helper, who left for the Army.

Mrs. Theresa Doyle and **Mrs. Agnes Boucher**, fair widows at 13 change-house, have their eyes on **Sandy Rossi** and he keeps his on the flowers.

Chalk up a romantic interlude between **Arthur Anderson** and **Lillie Thompson**, which should be okay as long as Andy's tires hold out.

Kid Mack, or **John McCarthy** to you, brought an apple for the teacher. It was a stuffed and roasted squab and no relation to *Dewey*.

Eleanor Malsky and **Glen Meyers** joined hands in wedlock September 27, and were cheered on their way by **Eileen Feltz** as bridesmaid. Guess there was no *gloomsman*. . . . The boy friends threw a party October 1 for **John Novak**, who was married September 23, to **Dolly Novak** the belle of Hennepin.

Pet peeve . . . the guy who slips into the front of the line at clock-out time—a sly fellow no doubt but not thoughtful. This little squib probably will earn the wrath of a dozen of the lads but the applause of a thousand and no crusader ever had better odds.

Mildred Styck presented **David Green** with a purse on behalf of his pals in the shipping line. Dave left for the Army Air Force September 26 and the little lady made a nice speech wishing him well in his great adventure and thanking him for the willing hand he had always extended to his fellow workers.

Paul Caligaris turned out to be quite a handicapper. He picked one winner in four months and that horse was disqualified. . . **Jim Scagnelli**, erstwhile foreman of 16, has been home on a furlough from the Coast Guard. . . . According to **Bunny Fornango** the straight and narrow path beckons to expeditor **Edward Farrell** on account of a certain girl who works in the Government office. . . . and **Joe Phillips** has got that faraway look which is hard for his buddies to account for.

We old fossils of Group 1 are somewhat jealous of the young lads in the present armed forces for they rate all the publicity and most of the fair charmers. However we intend to get together along about Armistice Day to fight once more the Battle of Vin Blanc and tell lies to our heart's content. Some of us have sons in the present struggle and all of us wish the boys happy landings and effective bullets. Here is a partial list of veterans of World War I now working in Group 1; **Supt. Joseph E. Salmon**, **Asst. Supt. Mark Davis**, **John Kinsella**, **C. L. Beck**, **E. King**, **Vern L. Brown**, **Fred Malakowsky**, **H. H. Kent**, **Richard Mangold**, **I. M. Ternes**, **Lewis J. Nickel** (Purple Heart Medal), **Fred E. Borggren**, **Guy E. Tremper**, **Reo Cunningham**, **William C. Spence**, **John Loughran**, **N. Johnson**, **Elmer Mayhew**, **James Barrowman** (Purple Heart Medal and Past Commander of Chapter 11, Disabled American Veterans), **Charles Schmitz**, **Robert Caldwell**, **Earl Bowman**, **John Bowman**, **Walter Sorley**, **John Nicola**, **John J. Martin**, **Herman Beringer**, **Harvey Barrett**, **Frank Wilson**, **James Sisk**, **David E. Jones**, **Maurice Romain**, **Clarence Owens**, **Edward Brazil**, **Dan Phillips**, **Gene Perkins**, **Gus Flieg**, **George Martin**, **S. Hansen**, **L. Hoffman**, **N. Thnos**, **Make Costos**, **Elwood Petty**, **William League**, **Louis D. Davis**, **William Misenhelke**, **George Heckenkamp**, **Evert Fugar**, **Lawrence Howland**, **Lorer. Freed**, **Alfred L. Cornell**, **Clarence Rice**, **Joseph Koesch**, **William Hockinson** and **Jack Barry**, Past Commander, American Legion, Post 14.

FATHER of this handsome soldier is Dan Considine, payroll audit, Ordnance Department. The soldier is Daniel J. Considine, Jr., and the last his father heard from him he was enroute to Alaska.

Pete De Palma, one of the hardest workers in the group, will soon be in the Army. . . . When **Art Salvatore** asks his men for an extra spurt he gets results because he pitches in and works beside them himself. . . . **Vito Patuto**, bay foreman, is buying a bond a week and that's what is called "all out for Uncle Sam." . . . **John Scullans** was paper bailer for a night or two but was taken off because of vocal failure. . . . **Turner Albright**, a first rate performer on the piano or sax, is said by his friends to be A-1 orchestra timber.

ENGRAVED CUPS symbolic of their prowess on the softball field were presented to the managers of the two teams which competed for the championship of the EOP Loading Line League by Comptroller John J. Cole. The award was made after the game September 29 when the Machine Shop, Group 70, team defeated Group 62, Inert Storage, 6 to 4. Pictured here left to right are John Kusinski, Recreation Department; Mario Zaninni, third baseman, Group 70; Paul Becker, manager, Group 70; Henry Schilling, Group 70; Raymond Peter, Group 70; Mr. Cole, Gene Mantia, Group 70, and Edward Spiezio, captain of Group 62.

1942 CHAMPIONS of the EOP Loading Line Softball League are these members of the Machine Shop, Group 70, team by virtue of their 6 to 4 victory over Group 62 September 29. Shown left to right are: Front row, Raymond Peter, Henry Schilling, Delmo Gavoni, William House and Kenneth Wheling; back row, Leroy Wilhemi, Mario Zaninni, Lou Haake, Paul Becker (manager), Gene Mantia and William Aschenbrenner.

Shell Loading Plant Built by S & P

(*Continued from Page 1*)

struction of the plant, but faced the enormous amount of detail and technicalities pertinent to design and installation of equipment to process the actual shell.

Thus, it was not until May 15, after considerable preliminary studies, that the first handful of "key men" reached Charlotte. Here the first "bottleneck" reared its ugly head—a scramble ensuing for possession of the four available desks.

No contract had been formally signed; however, the foundation of what is now a smooth-running, hard-hitting organization was instituted, and took occupancy in the equivalent of two full floors in the Liberty Life Building—Charlotte's outstanding skyscraper.

Amazing Progress Made

Signature of the contract June 11 was the "green light" that released the pent-up energies of the force, resulting in progress amazing to observers.

Starting with the handful of men who arrived May 15, our payrolls now carry 3,000 names. The prime contractor and Navy are with us in good force, and have their able hands on the reins.

On August 24 all personnel was moved from Charlotte to the plant site, and are now performing in temporary offices, set up in one of the completed storage buildings.

Like the kinfolk of the Navy (Marine)—we have landed, and have situated well in the land!

The nucleus of this "Navy Division" of Sanderson & Porter is composed of individuals from the various Sanderson & Porter projects; from Arkansas, Illinois, West Virginia, Pennsylvania, New York, etc., whom undoubtedly a lot of you old timers will recognize: **S. A. Covell**, chief engineer; **C. P. Lyman**, chief mechanical engineer, and **A. W. Malone**, general superintendent.

List of Personnel

In addition are the following "malihinis": **W. O. Rice**, electrical engineer; **J. H. Black**, progress engineer; **C. C. Saner**, railroad engineer; **H. V. Rinderman**, structural engineer; **Phil DeLa Cruz**, senior draftsman; **E. A. Korevec**, senior draftsman; **R. J. Derby**, senior draftsman; **W. Boeing**, senior draftsman; **E. J. Delaney**, mechanical inspector; **H. E. White**, junior draftsman; **W. H. Kellen**, senior draftsman; **G. A. Ford**, engineering office manager; **A. C. Andrews**, blueprint room; **Florence Kaiser**, progress; **W. H. Wardell**, chief clerk; **Donald C. Marks**, materials and records superintendent; **C. B. Rose**, superintendent water and sewers; **F. C. Waggoner**, foreman water and sewers; **T. M. Muzzy**, party chief; **R. J. Neal**, party chief; **C. W. Syphax**, instrument man; **T. G. Dry**, instrument man.

You old timers, if still in harness, are cognizant of the difficulties that lie in the path of construction at this hour and day—mainly the *time* element.

So, loaded with priorities, restrictions and prohibitions, changes and technicalities, we pursue the line of *most* resistance . . . maintain schedule, regardless of all the things that try builders' souls.

Thus, we concentrate on a design based on research into what *not* to use, so that after intensive and complicating studies, we determine what is permissible—then try like h—l to get it.

Sends EOP Greetings

This being a temporary type of construction, innumerable restrictions on use of critical materials are rigidly enforced, making it decidedly hard to gear down the layout; in addition property restrictions abide on all sides.

And then to build a plant that will collapse like the "one horse shay" on the 1826th day—that's a job, too. Couple this with difficult topography and fixed safety distances, and you have a slight insight into why we "burn the midnight oil."

Further, the shortage of experienced construction key men, now being absorbed by the Army at an increasing rate, is a continuing wrinkle-maker.

Sufficient and workable equipment is another factor in the struggle.

Yet, with all these obstacles, we have kept our head above water, and are riding the crest of a wave we sincerely believe will carry us through.

Elwood, our pater noster in Ordnance—we salute you and extend our heartiest greetings.

Salvage

ANDY VAIL
Correspondent

Lyle Safford explained why he wears his shoes on the wrong feet every other day. Said he: "It wears the heels and holes down even all the way around."

No one could understand why the sweeping compound was disappearing until it was discovered **Art Voss** was using it for snuff.

George "Mayor" Sangmeister hired a firm of experts to recommend improvements in the city government. The experts recommended that the mayor's job be abolished.

Mary Vent remarked that a man who won't lie to a woman has very little consideration for her feelings.

Milford O. Hintzes has joined the office force.

Harlan Kadow, upon being stripped for an examination by the doctor bared an abdominal tattoo reading, "Hello, Doctor."

Henry O'Reilly was in a phone booth talking to his girl, but someone wanted to use the phone. So they had to get out.

Scotty Soper's daughter is recovering from a recent operation.

The Fire Department rushed out the other morning to the other side of the plant guided by a glow in the sky. It turned out to be the sunrise.

Mike Doyle, historian, tells how it started. The term "hitch-hiker" started when two men with only one horse between them went on a journey. One man would mount and ride an alloted distance, dismount and hitch the horse to a tree or fence and proceed on foot. The other man would walk until he came to the horse, then ride on until he caught up with the hiker.

Lucille (reading from her diary): "Up at 8. Felt a little seasick so took two pills. Passed an iceberg at 10."

Greta (listening): "My dear!"

GOOD OBSERVATION is obtained from the elevated watch stations provided for EOP guards at strategic points. The guard on duty at the time the picture was made of the one shown here is Arvin Lerch.

Guards

GENE RYAN
Correspondent

Detected, arrested, finger-printed and locked up by **C. J. "Spike" Klafta** *during vacation of Gene Ryan.*

Walter L. Bayer, supervising sergeant, who is on vacation, is going after the big ones at Lake Mille Lac, Minnesota.

The Guards' bowling team is entered in the YMCA League. They bowl at Jahnekes Alleys in Joliet every Thursday at 7 p. m. The team is composed of **Sergeants Bayer** and **Harry Dowden**, and **Guards Paul Elliott, Darwin Matter, Vincent Stiglich** and **Walter Sack**. They have won 7 games out of 9.

Military drilling of the guards began September 15 and will continue under the able direction of **Capt. J. A. Hardy**, security officer at EOP. Sergeant Dowden and **Corp. Frank Pate** were selected by Captain Hardy as his platoon leaders. Every member of the Guard realizes what this means to them and not only will it make the Guards a more efficient organization but the training may come in mighty handy when that old call comes from Uncle Sam. Since this training began many have heard the Guards counting off 1-2-3-4 as they walk down the hall.

George E. Madden, Joliet, a former guard, graduated with the highest honors in a class of 51 marines who qualified for second lieutenants' commissions. A former platoon sergeant who first enlisted four years ago, the Joliet marine took an intensive month's training in a special course at the officer's candidate school at Camp Elliott. Lieutenant Madden reenlisted in the marines early this year after spending two months at his home following the expiration of his former period of duty with the leathernecks.

The following members of the armed forces who formerly were Guards paid a visit here last week; **William Sklut**, now a sergeant of Military Police stationed at Brownsville, Tex.; **John Krogstad** of the Navy, stationed at Great Lakes, and **Laverne Smalt** of the Military Police stationed at Hype Park, N. Y.

Corporal Pate: "Frequent water drinking prevents becoming stiff in the joints."

Corporal Pate was instructing rookie guards in drilling.

From the rear ranks: "Yeah, but some joints don't serve water!"

A picture was found hanging above the radio in communication room.

Dispatcher John Smith: Who in h—— put that up there?

Dispatcher Carl Kornmeyer: The Chief put it there.

Dispatcher Smith: Pretty isn't it?

1st Guard: "I feel like telling that Sergeant off again."

2nd Guard: "What do you mean again?"

1st Guard: "I felt like it yesterday, too."

Word was received from a former guard, **Gordon Peterson**, who is stationed at Mather Field, California, as an Army aviation cadet. He said he was injured in accident at the flying field and would be confined in the hospital for a while. He was due to graduate in six weeks, but due to this accident will be set back about two months. He would appreciate hearing from former fellow-workers. Drop him a line or two . . . his address . . . Cadet Gordon Peterson, Mather Field, California.

Sgt. Matthew "Moose" Mueller will be leaving in a few days. Uncle Sam has called him to service.

Corp. Herman Walter is eagerly awaiting the next EOP get-together.

Custodian "Dime Pie" Morgan is getting into everyone's hair lately. When someone requests change for a quarter so that cigarettes can be purchased he furnishes the change. *25 pennies.* Wonder how the baby's bank is standing up under this strain!

With the Women

Chevrons are being worn by some of the women guards. **Gladys Armstrong** is wearing the emblem of a supervising sergeant. **Eve Anna Castle** and **Helene Harbison** are sergeants. **Billie Taft** and **Rachel Morehead** are corporals.

Sergeant Harbison, a veteran woman guard, is leaving to return to Kentucky. Mrs. Harbison watched this department grow from "five to fifty." She will be missed. It was a pleasure to start the day after she sent each and every one off with a cherry, "you all look very nice." **Ruth Chidsey** has been appointed to replace Mrs. Harbison as sergeant.

Another loss to this department is that of **Pauline Morrow**. Mrs. Morrow is going home to Minnonk, Ill.

Due to ill health, **Fay Melville** has resigned.

Four new women have been added "to the fold." They are **Florence Bradeacick**, Kankakee; **Josephine Fench**, Morris; **Nora Ann Secor**, Joliet, and **Beatrice McInerny**, Wilmington.

Lucia Jane Pearson represented the women guards at the first meeting of the Employees' Activities Committee.

"Chattanooga" Pearson is planning on chartering a "choo-choo" to take her to and from work. According to Lucia Jane, "highways aren't happy ways." The other day the battery fell out of her car on her way home from work. After a great deal of time and considerable trouble, she had it repaired, but had gone a short distance when "boom" . . . a flat tire. Elapse of time . . . again she started home only to run out of gas. "Now tie that," said Lucia Jane.

Production Planning

LORETTA RYAN
Correspondent

In a previous issue, it was mentioned that **Frank Falwell** and Hearse Inc. was having difficulties. Since that time it has been learned that the name of the bus is the one and only "Arabella."

Rowena Roberts enjoyed a two-week vacation, touring Washington, D. C., and Ohio. **Elva Thomas** has returned from her vacation in Indiana. **Roy Chasteen** has left the Traffic Audit Department, and all miss his smiling features.

Mrs. Dorothy Riebert, who returned from a leave of absence, will leave the department permanently soon.

Dick Naughtin, who has been doing some pretty serious pleading not to print anything about his romantic ideas, has informed us that he has been married to the young nurse for a period of three long months or 90 days. He also states that they had a very enjoyable vacation last week, touring the northern part of Illinois and Wisconsin.

Wallace Bensen has recovered from a short illness.

Tommy Burns, now in the Navy, visited the office recently. He was formerly a chauffeur here.

Among the new members of the group are **Ronald Murphy**, Traffic Audit; **H. L. Dempsey**, progress clerk, Group 3, and **Dorothy Bollig**.

CHECK-UPS are taken frequently at the gate stations throughout the EOP area. Here Corp. Leonard Williams, Group 61, is shown attending to the task.

Production Planning has certainly had some very long and gloomy countenances since **Leo Thompson** and **Agnes Freuhauf** left. They are missed very much.

The writer finds that it is easier to dig up *dirt* for the editor than to dig up answers to people inquiring why there was no *dirt* dug up for the last issue.

Wouldn't it be a dull place without **Martha Craig's** incessant chatter . . . **Marjorie Gall's** last call for "Mr. Jim" . . . **Myrtle Cooper's** collection of bottles . . . **Dick Court's** "Miscellaneous Mat. Transfers" . . . **Dorothy Maxwell's** "Gurgle" . . . **Frances Mores'** "Giggle" . . . **Helen Duval's** questioning remarks . . . **Mae Norem's** commands and demands . . . **Fred Mastin's** friendly corrections . . . **Mary McGovern's** blushes . . . **Harry Brown's** everlasting patience . . . **Bud Wright's** helper . . . **Dick Ebben's** "teletypes" . . . **Ewald Becker's** noise . . . **W. Dronsfield's** call for less space . . . **Rowena Robert's** *"aide"* . . . **Argyle Dalziel's** quiet presence . . . **Paul Picken's** poetry . . . **Irene Blotnik's** pennies . . . **Fred Legris'** "Equipment Files" . . . **Frank Falwell's** "Railroad Books" . . . **Larry Crawford's** "dashing in and out" . . . **Jim Murphy's** ability to carry the adding machine away . . . **Elva Thomas'** "you don't say so" . . . **Jim Wilson's** friendly help to everyone . . . **Dorothy Riebert's** happy disposition . . . **Dick Naughtin's** long move orders . . . **Dorothy Bollig's** typing ability . . . This reporter to look after them and take roll call?

John Connors has become the new chief of progress clerks at Group 1. Mr. Connors hails from Morris, Ill.

Personnel

DORA PREW
Correspondent

They say it's a woman's world and from this date forward it will be the *woman's word* from the Personnel Department as the girls tattle. Erstwhile reporter **Jack Garnant** started a few weeks' training at Ithaca, N. Y., October 1 prior to becoming a full-fledged ensign in the Navy.

Since frost has killed the pestiferous chiggers, the Personnel Department has missed them so that they have created their own personal *chigger*, **"Chigger" Howard Hauze**, to be more explicit. In the first days of getting his new schedule as a receptionist organized so that applicants could be given an approximate time for interview, he bounced about so fast in and out of offices that he was christened anew. By the way, he is very proud of the new "moniker."

Upon calling some of your old friends over here in the building outside the fence, don't be alarmed if an almost strange voice answers the telephone's insistent ring. "De col' in de head" is responsible for some new bassos in the group so that as many rejoice over the coming of frost as the end of hayfever season others join the sniff and sneeze club. **Helen Bardi** is welcomed back from the second week of her vacation. (Don't mention it to her, but she spent two of those seven days in bed with a cold and then got up to see the "Icecapades," only to have a sore throat again.)

June Morgan insists that she has the perfect cure for those figure troubles known as "stenographer's spread." Since she purchased her new riding horse, she moans (or secretly condones) the loss of five pounds.

By the way of the rumor trail, comes a hint that **Marge Bittles** was spotted in the Blackhawk Saturday night with no less than 14 sailors.

Jeanne Gay has the "strangest malady." If you have a spare half hour some day, ask her about it and follow her all over the world as she takes the cure.

Words of explanation flew fast as a card from **Carmen Steed Oldani's** soldier husband came in from Alabama addressed to "Mrs. James Oldani & Children"—signed "Papa." It seems that the fun-loving girls in Carmen's office had sent a letter to Jim addressed to "Dear Papa" and signed "Your Affectionate Daughters."

If **George Barford** didn't have the nickname of "Dagwood," wonderment might have started at the rehearsal of "Pinafore" the other night in the Bent home. By way of complimenting **Mrs. George Bent** on her excellent coffee, he began, "This is sure a lot different from the coffee I make every morning!"

Incidentally, the choral group was also refreshed by the presence of **Edward L. Walkup**, recreational director, who spread words of wisdom and encouragement in an impromptu talk.

In a recent discussion Miss Bardi reiterated that the gingerbread did have dates in it, when **Marcella Burnham** commented with a drawl, "I had a date once." Needless to say, that ended the comments.

There's a new wrinkle between **Loren Ross's** eyebrow, but both the transfer and photograph departments are running smoothly.

Newest wrinkle from the Army Front comes from former receptionist **Pvt. John Koch**, Camp Grant, Ill. As you will remember, John was one of the weightier of EOP employees and he said that he will be at Camp Grant for a while—*until they get a pair of pants big enough to fit him*, in fact. He hopes to become a receptionist there, too, as that's how he's classified. **Larry McGann**, a former timekeeper, is there too.

The ever-smiling Swede, **Merna Wemstrom**, the girl who never leaves her sunny disposition at home, is now wearing an SAE pin.

The latest to tax the patience of interviewers was the case of an old man who had not completed the list of his personal references on his application blank. Probing gently, the interviewer asked him if there wasn't someone whom he had known for a long time who would write him a recommendation. After pondering, the man slowly drawled out two names of which he couldn't verify spelling. A few minutes later he quietly added, "Of course, they're dead."

A Frenchman came to America to learn the language and soon got into difficulties with his pronunciation, especially with the group comprising "though," "plough" and "rough."

When the film "Cavalcade" began its run, one newspaper review was headed "'Cavalcade' Pronounced Success," and the Frenchman gave up the struggle and went back home.

SUFFICIENT GADGETS to meet all conditions surround George Horton, Personnel Department photographer, who has contributed numerous pictures to recent issues of "The Bomb-Shell."

Inert Storage

CHARLES MANN

WILLIAM DENVER

Correspondents

Charles Mann, our married assistant superintendent, returned to his desk smiling as usual after taking a bride and enjoying a grand vacation. He, as well as his bride, wish to thank the boys for their gifts. He has dismissed his personal secretary and believes all the questions were answered . . . any further questions will be answered by his ex-secretary, except a few. They will reside in Aurora temporarily.

Best wishes go to **Donald McCauley, Joe Bodrero, Walt Stewart, Charles Turner** and **Dale Metzinger** who are entering the armed forces.

Just who **Betty Ross** was coming to see the other day was a problem to the office staff . . . it turned out she was one of the new girl mail carriers.

Walter Mork is welcomed to the material checking staff and it is hoped he will enjoy his association with the department.

Charles Ashworth and **Charles Gorham** will soon be among those able to administer first aid.

A. P. Balston, superintendent, served as chairman of the EOP Fellowship Meeting October 1st. If you really want to enjoy an evening with good food and get acquainted with fellow workers, plan to attend these meetings.

Thanks go to the Utilities Department for the road program . . . no more slipping or mud wading. The Mann Road from North to South saves much trouble for the timekeepers.

Ted Hintz soon will be seen picking flower seeds at Group 27.

If anyone has any problems, see **Harold ("Dr. Anthony") Albee** at South Inert and he will set you straight.

Lawrence Lavicka of South Willie has broken many a heart as the result of his marriage last month.

David Lardi tells us he has hopes of becoming mayor of Brooklyn (Ill.) since he built a new house there.

Art Kettleson is still the envy at South Inert—why?

Instructions on how to use a slide rule are now being given by **Charles H. Gorham.**

Earl Ziemer had the misfortune to be put on the accident list with an injured toe.

Some of the boys wonder if the gardners at Central Fire Station will remember them at lunch time with some of those green vegetables.

George Gray has returned from his vacation in New York City . . . just cannot stop talking about it.

Many of the boys will be writing to **Tom Reay**, a brother of **Matt Reay**, who is in the armed forces.

George Shaw soon will be eating steak again—has a new set of China.

The early bird is **George Newton**—he discovered at the gate he left his badge at home, boarded a bus back home, got his badge and then drove to the plant and punched in ten minutes early.

Seen hereabouts recently were **Charles Connell, Oakley Norman** and **Ed "Jerk" Jurjevich** of the Planning Department . . . just checking lots of lots.

Watch the *birthday column*—your name will appear. Among those for the month of September were **William Allison** and **William Denver.** *The Guide Post* might sell your car or get you riders.

The 10 per cent War Bond Club continues its popularity—many of the boys are hitting 20 per cent and more.

The little black dog of the Fire House occasionally enjoys breakfast at North Inert.

Now that baseball and outings are at a standstill, barnyard golf and bowling are leading the list of fall activities. If you think you can, or would if you had a chance, you have the opportunity before you to try your luck for a place on the teams.

Twins (Siamese) are now on the nick name list — **Ed Zarley** and **Kenneth Jones.**

Winfield Arthurs returns from a second vacation allotment . . . no fish, no golf, no baseball—just rest.

Richard Ashworth is quite the trouble shooter. When an ugly squeak was heard in the office Dick proceeded to oil the chairs. On his way back to the boiler room he heard it again and again . . . if he oils the drawers it will not help, if he oils the typewriter it will not help, if he oils the windows it will not help. He'll have to find it, no one will tell.

The boys at Inert have pledged themselves to follow the moral of the following lines—

The wise old owl
sat in an oak,
The more he heard
the less he spoke,
The less he spoke,
the more he heard,
Why can't we be
more like this bird.

First Aid Is Added Punch

(*Continued from Page 1*)

first aid given during the first 15 minutes following the accident usually determines whether the victim lives or dies.

There is no charge for first aid training. There is a nominal charge for the manual used. The lessons are presented by qualified instructors in an interesting fashion easy to absorb.

See the chart on Page 10 of this issue and determine now to spend a small portion of your spare time this fall and winter in acquiring this additional knowledge. For additional details, telephone Extension 4227.

ACCURATE INSPECTION of ordnance requires maintenance of correct standards on all gages. This is a responsibility of the Inspection Department. Harold Troupe, shown here with some of his apparatus, is gage tester for the department.

I Have Written A Poem

(*Continued from Page 2*)

If we must do without
Do not let out a shout,
Just remember
The Soldier, the Sailor and the Marine.

When the day is over
And we homeward trek,
Pause a moment and think of
The Soldier, the Sailor, and the Marine.

Let's buy bonds and stamps,
More shells, more bombs and more tanks,
And remember in our daily thanks
The Soldier, the Sailor, and the Marine.

—**S. H. Faupel,**
Ordnance Department.

For Sale: One Kankakee Bus

From Kankakee to EOP,
Over 9-foot paving it flits.
Thru mud and dust, in God we trust,
And the riders pay two bits.
It's famous for one piston ring,
Two front wheels and one rear spring.
Carburetor busted half way thru,
Engine isn't gone, just misses on two.
Twenty years old, twenty-one in the spring,
Riders get the shocks, makes 'em sing.
Tires blowed out, ain't worth a cent,
Ten spokes missing, front end bent.
Without any fenders, seats or plank,

DADDY won't have to work overtime again tonight, hopes Carolyn, cunning daughter of Frank Zupancic, Inert Storage Department.

Boils oil by the gallon, have to crank.
Radiator busted, sure does leak,
Differential bone dry, you can hear it squeak.
Got plenty of speed, runs like the deuce,
Burns hi-test gas or tobacco juice.
Tires all off, been run on the rim,
But it's a darn good bus for the shape it's in.

—**Arlene Schloendorf,**
Mimeographing Department.

The Ordnance Workers

They're a humble crew and a modest one, they'll decline all praise with thanks,
Though composed of many races, they're all proud to say
"We're Yanks."
Far from the din of battle, they work from sun to sun,
For they're the guys who stand behind the man behind the gun.

They're the chaps who keep him shooting while amidst the fiercest strife.
He battles to perpetuate our good old way of life,
And they'll stay right in there pitching, eschew all joy and mirth,
Until the oak of freedom doth shade a gladsome earth.
And when the knell of tyranny and force at last is rung,
And the doves of peace have settled upon those fields far flung,
They will lend their strength to build a world from which all hates are gone,
That all may know they're keeping faith with those who've traveled on!

—**Winifred O'Connor Rajala,**
Payroll Department.

SCALE TESTING is an important function of the Inspection Department and Bill Kirban, who is in charge of that phase of shell loading, is shown here testing scales for accuracy.

Elwood Bombs

"Look out, Herr Hitler, here we come
With these Elwood bombs we'll make you run.
And you, Mussolini, playing second fiddle,
Will be torn asunder in the middle.
Hirohito, you'd btter make a dash
'Cause these Elwood bombs will grind you to hash.

—**Geraldine Ward,**
Ordnance Department.

It's Great to Be a Fireman

It's great to be a fireman;
I'm going to tell you why,
You couldn't join a better bunch
However hard you try.

What explains all this? Some people say
Uncertainty is the answer.
You never know from day to day
What kind of call you'll answer.

When the alarm is sounded by the Chief
Oh boy! How the shoes do fly!
And into rubber boots they jump—
To protect the Plant's the reason why.

You may go out on a false alarm,
You may look for some lost soul,
And once in a while your duty calls
To get a cat down from a pole.

This is quite different, to be sure,
From other organizations:
They have their meetings, time and date
At definite locations.

But take the fireman, if you will,
And compare him with the others.
They don't know when and where they'll meet,
But still they too are brothers.

They might be dressed in gay attire,
Or may not be dressed at all,
But when they hear the call of "Fire!"
They'll be there, one and all.

Their plans are made right at the scene,
And not two weeks before.
Their thinking must be fast and keen
Or the public will get sore.

We have no set dismissal time
But work until we hear
The officer in charge call out:
"Load up, let's get out of here."

It's great to be a fireman.
I think this tells you why.
It fascinates you more and more
As days and years go by.

—**F. J. Rutkowski.**

Hey Mister

ARE YOU

Man or Mouse?

You pride yourself on your ability to take care of your loved ones fistically and financially, but could you take care of them in disaster or catastrophe? Fill that gap in your ability to provide, to be prepared, by taking a first aid course. Read the story on Page 1, see the chart on Page 10 . . . then act. Put your spare time in first aid training . . . your spare cash into War Bonds. Both will pay dividends in happiness and satisfaction. Enroll today. Telephone Line 4227 for additional details.

EARNEST CONVERSATION continued without interruption when W. E. Canniff, EOP manager of engineering and operations (left), and R. L. Hamill of New York, a partner in the Sanderson & Porter firm, were photographed in Mr. Canniff's office as shown here. Mr. Hamill was here for several days representing the firm during the absence of Harrison Smith, resident partner.

Groups 4-9

Fuze-Booster-Primer and Detonator Lines

JUANITA HARTER
Correspondent

Norman Crocker, formerly employed in the Fuze and Booster Chemical Laboratory, recently blossomed into picture and print in *The Tribune* when his picture was snapped on the University of Chicago campus. He is now in the Army Air Corps and is at the U. of C. studying meteorology.

Group 6 "Booster Boasters" have challenged Group 8 "Primer Rollers" on the bowling alleys at the Recreation Building. Both teams are open for games.

Vic Dagenais has promised instructions on the technique of removing the thumb from the ball to prevent sliding down the alley and kicking the pins over.

Group 6

Marlene Kramer left for her new home in Amarillo, Tex.

Myrtle Odle left to reside in Highland, Ind.

Al Nelson has returned after an illness.

Dalton Daly, foreman in the assembly room, returned from a vacation in Larchmont, N. Y. Considerable time was spent in sailing the briney deep.

Theresa Kump became the bride of **Bert Adams** in St. John's Catholic church in Joliet, September 12.

Mr. and Mrs. Jack Bergstrom and **Mr. and Mrs. Washko** are happy over the arrival of baby daughters.

Mr. and Mrs. Edwin R. Daniels spent their vacation in Ohio, which according to Danny is the only state in the Union.

The men have organized a bowling team and challenge all comers, so get in touch with **Harry Engel.**

The girls are all ready to move back into the new change house this week end.

If **Larry Patton**, assistant superintendent, doesn't get new tires soon, he will have to thumb his way to work. Fixing flats daily gets pretty tiresome.

Have you noticed the new timekeepers office? They moved in September 28.

Marie Partak and **Juanita Thompson** report having a glorious time on their trip to California. They saw several movie stars such as **Claudette Colbert, Abbott and Costello, Shirley Temple** and several others.

Art Jensen, foreman 6-4, moved into the Foreman's Quarters last week.

Farewell to **Ola Heck, Glenna Zimmerman, Theresa Moroski** and **Flo Harvey** who are leaving this week.

Ruth Starkman, office girl, and **Mr. Jensen**, have been selected as representatives of Groups 6 and 7 for any and all recreational activities. If you have plans for bowling, basketball, volley ball, ping-pong, etc., get in touch with Ruth or Art.

Willie Vail is back again looking hale and hearty after a siege of illness.

Elsie Bundy was married October 3.

Jimmy Ewing is the proud father of a daughter born September 21. The baby has been named **Marsha Kay.**

Joe Keefe is spending a week's vacation visiting friends and relatives in his old home town in Iowa.

Group 8

Bob Selfridge has passed his exams for the Air Corps and expects to leave soon.

H. E. Tuntland, Group 8 electrician, lost a little time because of a tooth extraction, which was not so little.

Rose Blazekavich and **Gertrude Haldorson** don't believe in signs or maybe they need their glasses changed.

Emma ("Marie") Nutt, 8-11, was in a serious accident and everyone wishes her a speedy recovery.

Twenty men including superintendent, assistant superintendent, foremen and laborers started a bowling team which met for the first time September 29. Twenty men and each an expert challenge all comers.

You should see **Eli ("Bill") Petan** throw out his chest now that he is the proud father of an 8½ pound son.

You should see some of the cut-ups from Group 8 sprinkling Ben Hur perfume on everyone's clothes. Believe it or not the next day **Robert Otte** had chicken in his lunch. He was the only one who had any good luck.

You should see **Alice Pruss** and **Veronica Gordon** do their stuff on the crimping machine and head machine. There's two gals who think they can replace any man.

Group 5

Juanita Buztow, forelady, has returned to work after a three months' illness.

Pat Gallagher, assistant foreman, always looks in his lunch box before leaving the Change House.

Ida Moers, forelady, tried to start her car in a hurry. After working on the car for ten minutes she finally discovered that she forgot to turn on the ignition.

Kathleen Bautre was recently presented with a powder girl badge given by **Eddie Burns.**

Ray Turner, powder boy, plans to join the Navy soon.

Rose Di Salvo is reported to have found a few sailor boy friends while she was in Chicago over the week-end.

Inspectors are trying to figure out why **Bob Welch** is wearing his hat at work all day.

Ordnance

HELEN McGINNIS
Correspondent

John Welch of Auditing has been in the hospital for the past month recuperating after an operation. All hope he will be able to report back to his desk soon. Sorry this writer didn't know about it sooner, but remember the old saying, "better late than never." . . . **Jim Pavel**, that suave gentleman from Transportation, sure makes a nice appearance when he struts down the avenue. . . . Poor guy . . . he never gets *The Bombshell* . . . his exercise consists of yawning profusely . . . he's still a member of the Traffic Club in Chicago and his hobby . . . well . . . ask him to tell you some of those Railroad stories of his.

Si Faupel of Auditing is quite a guy . . . have you ever seen him without a cigar . . . he likes to dance with **Ann Gubbins**, the cutie blondie from Auditing . . . and escorts **Helen Harmon** from Payroll to all the shindigs at the plant. . . . A letter from **Jim Walker** of Transportation reports he's in the Hoosier state . . . Fort Benjamin Harrison to be exact. . . . Promises a picture soon and wants everyone to write him . . . stop around for the address.

This bit of intrigue came via the grapevine. . . . **Walter Mooney** of Payroll, who has just become a professional sponger, is now searching for his next victim . . . the guy who wants to buy him another cup of coffee. . . . For further information contact his manager, **"Tightwad" Ream.**

On a recent expedition to Cherryville, Kan., **Chief Inspector "Duke" Douville** found a new meaning for the popular slogan "V for Victory." . . . They enhanced the sweat shirts the gals were wearing there. . . . Ask "Duke" what they meant. . . . The Cherryville inhabitants must have taken George Washington literally . . . 'cause the truth and nothing but the truth seems to prevail there.

Personnel received a letter from their former messenger, **John Hausser**, he's in the Marines . . . stationed at San Diego . . . and from all reports . . . is really in the "boot" training stage.

The duties of the expeditors of Operations and Engineering have almost reached the "tea dancing" stage . . . what with ten lovely visitors apiece for **Bob Kennedy** and **Ken Bull**. . . . Questions galore, but you can bet they had the right answers. . . . The "Ollie" gang from Payroll sure have some fancy nicknames . . . f'instance: . . . **Kay Cusick** is "Casey," **Jo Anne Comerford**, "Coach"; **Mary Dagon**, "Beautiful"; **Rachel Johnson**, "Termite"; **Juanita Kliegl**, "Tarzan"; **Joan Malloy**, "Squeaky"; and **Dick Shelly**, "Flask" . . . next issue will bring you more. . . . By the way . . . have you heard that there is a priority on the drinking fountain across from "Ollie's" office . . . reason . . . all the gorgeous gals he has in there.

Mail and Record will be running extra smooth now. . . . **Ralph Clutts** . . . the guy what got himself mixed up with a truck many moons ago . . . is back on the job. . . . Bet **Molly Baker** will be glad to get back on that day shift . . . course the boy friend won't . . . Not much . . . **Mary Lou Schwartz** of the same department spent a few days in Wisconsin on a second honeymoon . . . and don't let her fool you . . . that's what it was. . . . Heard that **Harold O'Keefe** has enlisted in the Air Corps. . . . Boy, oh boy . . . somebody's heart will be sad, definitely **Marge Jesberger's.**

Bill Perkins has moved his belongings to Wilmington . . . and what do you know . . . it's Streator he moved from? . . . Watch **Anne Kakara** boil when she reads this. On the romantic beam . . . **Kathleen "Don't you dare call me Lois" Dugan** has a yen for **Bob Stewart**, messenger. . . . **Ann Melovic** has been overloading the mail for Hawaii these days. . . . Have you heard . . . **Flossie Babecke** will be a Mrs. soon.

James George has the nicest voice over the phone . . . sure makes a difference when you pick up the phone and hear a friendly voice.

Heard that **Mary Biernat's** husband is now somewhere in England . . . the pride of the office, **Harold Kapsch**, will be inducted into the Army soon. . . . **George Margetts** of Group 1 has returned from a visit with his son at Camp Crowder in Missouri.

Bar the doors and put cotton in your ears . . . the Timekeeping gals have formed a bowling team. . . . They will challenge one and all . . . want to know who they are . . . all right. . . . **Mary Biernat, Martina Schomas, Shirley Campbell, Mary Gliha, Lorretta Franke, Elaine Levanduski, Geraldine Parthun** and **Betty Lou Page.** . . . P. S. Never mind . . . some girls in the Administration Building have been practisin', too, and they'll issue a challenge soon.

Betty Jane Jensen is now tagged "Flying Jane" . . . yeah . . . she flew to Cleveland last week end to visit friends. . . . **Otto Zenke** and **Louis Schuck** are now "Dormitory Dons," having moved into the dorms at Wilmington.

Lt. F. G. Kuether, that swell fellow, is now area engineer at Lewistown...sure miss him around here. . . . The gang welcomes **Lt. Robert Johnson** who is taking his place . . . he's got a nice smile, don't you think? . . . "Tommy" Haigh has been angling for a date with an unidentified lassie.

Capt. George Reece has been spending some time away from the office . . . a week's leave.

Gerry Stephen is the new appropriation in Personnel. . . . **Ginnie Harrod** got a diamond t'other nite and she hasn't hit ground since. . . . *Ya know someone asked me once, and I mean once . . . why I didn't get married. . . . I coyly said "I can't afford a husband." . . . After all, they are somewhat of a luxury.*

Capt. John Hardy sure has a time with his "boys" over on the tennis courts . . . have you ever seen them . . . they are shaping up nicely and will be a source of pride to him.

Women

By
CATHERINE NOONAN

The women's Change Houses in the Fuze and Booster area are a constant bee-hive of activity. Morning rest periods blend into lunch hours and then revert to afternoon rest periods. A shift change and the process begins all over again. So the job of keeping the lunch rooms and locker rooms clean and orderly is no snap job. But they always are, and the credit is due to 12 Negro girls who make the job look easier than falling off that log you hear so much about. They also have a fund of information on anything from "what shall I do about the tear in my uniform" to "has the area bus gone yet?" **Ann McFarland**, supervisor of the women's Change Houses, will take you on a tour of inspection at the drop of a hat. And she doesn't have to use an ounce of her Irish charm to convince you that everything is just what good housekeeping should be.

Vignette Portrait

In response to 19,137 requests from the Army, Navy and Marine Corps, we herewith publish a picture of **Norma Fratia** who was the subject of last issue's vignette. All further communications should be addressed to Norma at the Personnel Building.

Ingenuity Saves Day

A few weeks ago women in the Fuze and Booster area were thrown into chaos when hairpins were put on the taboo list as a safety measure. Shoulder length bobs and braids to the waist were doomed. But **Veronica Gordon** of Group 8 has a husband who thought the whole situation over and saved the day. He devised a clever wooden hairpin that is "the McCoy" and thus passes inspection.

EOP Road to Success

We now have two more supporters of the theory that all roads from EOP lead to success. **Lucy Harkness**, former Hospital correspondent, writes that she is doing very nicely on her new job in Joliet but that her heart is still with EOP and *The Bomb-Shell.* **Agnes Crownover**, former timekeeper, made the jump from overtime to quarter time and is now a star attraction at the Ivanhoe in Chicago where she plays the electric organ.

FASTER DELIVERY of War Bonds to employee purchasers at EOP is due in considerable measure to the Bond Department's efficient staff shown here at work. Delivery is now made within a week after the last payroll deduction is made. Pictured left to right are Beverly Wynkoop, Kathleen Conway, Marjorie Connoly, A. E. Kinson, supervisor, and Arthur Witty.

General Offices

MAE BELLE ANDERSON
Correspondent

The Engineers' Bowling Team has four players by the name of Peterson, yet the present standing is 4 won, 5 lost. Poor teamwork?

O. K. Madsen visited his adopted American mother at Champaign, Ill., September 25. She is 86 years old. He visits her every year. During the last war her son and he were buddies at Chanute Field. They went to her home for a visit and since then she is his "Mother." The two boys went across together and after being together 18 months, O. K. was wounded and they separated. Since the Armistice he has always been in touch with her.

Max Wolffson lives in a 13-apartment building in Chicago. Each apartment has a new baby. Four are boys. Max's son is grown up at 27 months. He calls his dad "Hey Max."

George Rummel has two weeks' vacation coming up. He is at a loss as to what to do with it. Any suggestions?

Fred "Pop" Poplausky is a "Book of the Month Club" member. Many are pleased because now they can have quiet (?).

In **J. C. Quades** express to Elwood the question was "What is the capital of Massachusetts. **Don Roberts** said Boston. **Audie Allison** and Pop yipped and said nope it is Salem. The debate became heated until **H. T. Rostron**, who lives near there, told them which was which.

Walter Krohn kibitzes on the drilling of the Guards each lunch hour. They are becoming quite expert under his guidance.

Art O'Neil is really "holding" up the bowling team. He uses a green ball. His splendid score is around 90. He also uses green golf balls. His war stamp bouquet will be given to the nosiest bowler.

Harry Mac Rae is sporting a new hair-do or else he needs a haircut.

Don Lewison received a letter from **Fred Oman** and **Henry Lockwood**, two former engineers, now in Pearl Harbor. They are happy and would appreciate letters from their friends.

Robert "Wimpy" Forst is thinking of opening a Court of Human Relations. Many go to him with problems domestic and otherwise. Yes, he solves all except his own.

Nels Gronholm is a bit sleepy driving at the new 35-mile-an-hour limit to Chicago. His riders have to keep him awake.

Group 3-A

F. G. TAMBLYN
Correspondent

Now that most of the boys who have left this line for the armed Services of Uncle Sam receive *The Bomb-Shell*, **Gerald "Whitey" Hall** suggests that we send our regards and expression of full support.

Frank Renchen returned from his vacation this week but no one has learned where he went and with whom.

It was heard that **Thomas Patton** has been seen making several trips to the first aid station lately. After all, when one has a chronic headache aspirins do help.

Dean "Two-Shot" Harrison and **Howard Gueller** were squirrel hunting a few days ago. Howard said Dean bagged the limit and after checking up found that he had fired twice as many shells as he had squirrels in the bag. He should take a double barreled shotgun next time and give 'em both barrels.

It was necessary for the boys in Building No. 10 to give **James Musso** a sedative during the ninth inning of the first World's Series game. Wonder what they gave him after the second game.

The bowling team added two more victories to their string the past week.

When **Arthur Thompson** put on a safety shoe he learned that you can have Bees in your shoes as well as in your bonnet. However, there was an argument and the result was a victory for the bee.

Jack Willhoit and **Donald Schlemmer** are leaving to join Uncle Sam's fighting forces this week.

Donald Breen, Building No. 4, would like some good advice. He would like to know what a bridge costs. (Automobile Bridge.)

Eddy Arnold (not the movie actor) says the time has finally been reached when a flat tire means something besides a bum date.

John Dillon is on leave of absence due to illness.

What **Emory Akeman** says about good housekeeping — "No one single factor has contributed as much to safety as good housekeeping. Essentially, it is cleanliness and orderliness, twins of any safe production program. These two not only reduce hazards of all types but are morale builders. Men are proud of a plant that is both clean and orderly. A certain amount of Group pride and loyalty is desirable in any of the groups at EOP. Men must feel keenly a loyalty to their group if things are to move along to a successful production program. Pride and loyalty do not thrive in disorder and uncleanliness. Our men are sold on Group 3-A.

Ordnance Inspection

GERALDINE M. WARD
Correspondent

The Ordnance Inspection Department consisting of 370 employees is 100 per cent in donating at least 10 per cent of their salary for War Bonds.

Chief Inspector William F. Douville and Edward J. Nemanich, Gr. 9 Inspector, visited the Kansas Ordnance Plant at Parsons, Kan., September 21 and 22.

The winner of the War Bond for the pay period ending September 30 was **Clara I. Wehner**, chief clerk.

Catherine Tomlianovich entertained at a dinner party September 19 at the Hotel Louis Joliet in honor of **F. Warren Weithofer** who celebrated his birthday anniversary September 18. The guest list included **Mr. and Mrs. R. W. Thompson, Mr. and Mrs. Chalmers Wooley** and **Mr. and Mrs. Gordon Birkey.**

Donna Joan arrived September 28 to brighten the home of **Mr. and Mrs. Paul R. Smith.** Mr. Smith is a division inspector. **James G. George** loaned the bassinet used by his two sons to the Smith family. When he was taking it over to the Smith residence, his son, **Jimmy**, said "Daddy, don't take our bassinet away, we are saving it for a little baby sister." Whereupon Mr. George replied, "Son, I'm merely loaning it *temporarily* to the Smiths."

Two new employees are welcomed. **Vieana Wheeler** in Mail and Record and **Betty Ross**, who is delivering the mail out in the groups.

John Ney, Group 62 North, is endeavoring to survive on a half-sandwich and an apple for lunch. It seems that he has been gaining weight rapidly and the little wife wishes him to retain his youthful figure, hence the diet. It is pathetic though, especially that John had been accustomed to drinking a quart of milk and devouring at least three "Dagwood's," a generous portion of pie, etc., before the arrival of **Mrs. Ney** who formerly resided in Wisconsin.

It was reported in the last issue that sympathy is extended to Alice Steinberg whose mother died, whereas it should have read **Ellis Steinberg**, Group 71.

There are some real horsewomen in the inspection force. **Catherine Kemp** and **Eleanor Landers** of Group 4 visit Woodruff Stables frequently.

There is a magician in Group 4, none other than **John L. Habes.** Talking about prestidigitators, see **Warren Hoffman** for some real stories.

The inspectors in Group 4 felt a great loss when **Marie Plankar, Kenny Abbott, Norman Roski** and **Max ("uncle") Krup** were transferred to other groups. **Ray Lucas, Warren Hoffman** and **Lucille Olson** replaced them and are welcomed to the ranks.

Leo Sreebny left for officers training to help Uncle Sam win a speedy Victory.

Edward Ritter, assistant Group 6 inspector, has returned from a visit to the ordnance plant at Burlington, Ia.

Robert M. Harbison, Group 7 Inspector, journeyed to Cincinnati to attend the wedding of his son. He returned with rosy cheeks and glowing eye; that wonderful Ohio air, no doubt. He was overheard to mutter something about the train pulling out of the terminal sideways; maybe the air isn't the only good thing that can be inhaled in Ohio.

Dorothy Jean Haag, Group 6, is vacationing in Texas.

Mrs. Lottie Maloney recently joined the staff at Group 7.

Ferdie Biegus, assistant inspector, Group 8, has taken over the duties of **Ronald Sachs** who recently enlisted in the Army.

Arnold Hoffman, inspector, Group 8, was transferred to Scott Field where he will be trained to be a radio instructor. He was presented a gift by Shift 3.

Jerry Preboy and **Bettie Stalzer**, Group 8, are hard at work practicing vocal solos and dances with a view of being ready for EOP stage projects.

Cards were received from **Nadine Naese**, Group 8, who enjoyed a week's vacation in Iowa.

Sigmund Wysocki, Group 8, celebrated his birthday anniversary October 9.

Robert Wysock, Group 68, resigned September 19 to enlist in the Navy. His co-workers presented him with a gift.

AUTOMATIC UNLOADING of a tank car of liquid nitrate of ammonia at Group 61 as shown here is supervised by Stephen Juricic, Loren Horrie and James Halpin, pictured left to right.

OPERATION ORDERS to EOP guards in gate stations and squad cars are issued over the two-way short wave radio system from this radio room in the Guard House. Operators shown on duty are John Smith (left) and John Welch.

Timekeeping

NICHOLAS BELLUSO
Correspondent

Now that vacations are over and all the timekeepers are back at their regular stations, the Time Department again is running more smoothly and efficiently. Everyone seems to have had a good time, refreshed and eager to give their all once more for the war effort.

Big **Jim Murphy** let *Young Kid Illness* knock him down for a few days but Jim came back with a savage defense and was awarded a technical knockout. Jim is once more at the Railroad Section House doing the good work he has done in the past.

Donald Riordian, who left to join the Merchant Marine, was presented a gift and number 64 was added to the service flag in a ceremony at the time office. The girls in the office are doing their bit for victory by kissing each boy as he leaves, Donald being no exception. **Carl Cornelius**, recently returned from Hollywood, California, was offered two contracts while there. One being to play the corpse in **Boris Karloff's** new picture, "The Ax Murder," the other to replace **Clark Gable** who is now in the Army.

Geraldine Graham seems to be the girl they left behind. Letters that come back from the boys in service are usually addressed to her.

If the timekeepers ever have a basketball team **Robert Griffin** should be cheerleader. Bob used to lead the Indiana University football team to victory.

The newest additions to the timekeeping staff are **Virginia Conrad, Marcella Corbett, Stanley Chapin, Louis Brainerd, Franklin Guest, Robert Zobel, Bernard Bellot, Lawrence Prodhel** and **Laverne Hohn.**

This one's on me. After running around pulling my hair out and screaming at everyone for news, to be put off with "I don't know any," to finally scrape up a little, make it newsy and get it printed, only to have the "I don't knows" come up to me and say "Why I knew that," then I can only exclaim weakly, like a lion's roar, "Why didn't you tell me about it then?" Oh, nurse, please bring me a strait-jacket!

The exploits of **Eva Sweda**, the Rockdale lotus flower, are of interest. Though she likes **Bernie Smego, Harry Knarr, Carl Cornelius, Bob Griffin, Samuel Epstein** and a few others, they all wonder who "Bill" is.

Notice the new sparkle in **Rosemary Veach's** eyes, created by the presentation of a new fur coat by her parents.

Robert MacEvoy claims Harry Knarr has the biggest feet in the area while Harry insists that Bob's nose was the original eagle's beak used on the silver dollar. They are the best of friends.

"Wish you were here," wrote **George Margetts** while on a recent visit with his son at Camp Crowder. Do you know that **Vince Parry** occupied the first trailer at the Wilmington Housing project? **Joseph Smajd** was the first dormitory "guest." **Bob Balma** is spending his vacation up north fishing.

Hospital

EVELYN RICHARDS
Correspondent

Two of the hospital staff have been called by Uncle Sam to the armed forces. **Dr. Stephan Panzerella** received his commission as first lieutenant in the Army. His service here lasted but one week. He spent several days at the Personnel Building, in the men's medical division. Within two weeks he is to report for duty in California.

Another to hear the early bugle call in the morning is **Joseph Chizmark**, who entered service September 25. He has been an ambulance driver for many months at EOP. His flashy ties, especially a tan one which when properly held in the light displayed graceful, curvaceous figures, will long be remembered.

Before leaving a party was given for him. **Mrs. Joseph Gergovich** and **Mrs. Theodore Busse** made all the arrangements for a successful evening. Guests whiled the night away with dancing. Refreshments were served buffet style. A gift was presented by the group. Among the guests present were **Dorothy Schoop, Elizabeth Russell, Bertha Perush, Evelyn Moore, Marty Noels, Lorene Motta, Lucille Ambrose, Lucille Nahas, Marjorie Hartong, Mary Kulpa, Alma Nahas, Lucy Harkness, Sara Crate, Thersea Nahas, Veronica McGuire, Mr. and Mrs. Thomas Moore, Mr. and Mrs. Edward Robinson, Dr. H. W. Harrison, Dr. B. G. Geil, Dr. L. N. Cohler, Dr. Jacob Wechsler, Roy Picaman, Gladwin Ashton, Tom Singer, Vance Cook, Fred Nahas** and **Joseph Jasper.**

Pete Busanelli, janitor at the Hospital, lost his helper, **Salvatore Cimino**, "Sam" for short. As Sam put it, "I go out to Calie—for—nee-a, by my wife. And-a seet under beeg-a orange tree and-a eet orangees by the bushel. And-a when I eet-a all thaa orangees, aah teenk of-a you."

Whether September 21 was a bright, sunny day or a cloudy, rainy day isn't recalled, but there was a bright new face in the first aid room. There was **Mrs. Anne Johnson** bandaging hands and fingers. She is a graduate of Wesley Memorial Hospital in Chicago. Before coming to EOP she did general duty for several years and was obstetrical supervisor for one year at Wesley Memorial. She now resides at Gardner.

The first aid cars are being driven by a new man this week. And those who are picked up from the groups will find him to be **Edward McKenney**, transferred from Group 61.

Gene Hurley, who suffered with the flu, is back to work again after a week of illness. She left the flu at home but brought a little red nose to work with her, and is wondering if she will ever stop sniffling.

Oswald Blanchard can't quite appreciate his newest coiffure. It seems that he visited a new tonsorial artist. The motif accentuates the old Indian scalp-lock. **Dr. McClure**, hailing from Colorado, near an Indian reservation, almost forgot to leave a lock. In fact, it looked like what the service men call a G.I. job.

High Explosives

Correspondent

Group 66

A letter addressed to "Farmer" from **Ralph Seeley**, former member of Group 66 and now in the Navy, states that he is lonesome at times for his old associates at the group and sends a hearty hello to all the boys. Ralph is a Naval cadet studying at Milton College in Wisconsin. He already has more than four hours of flying and from the schedule outlined he has very little free time. The letter was much appreciated by the fellows in 66 and Ralph concludes by saying, "You make 'em and I'll distribute them."

Earl Hunt is still here—"thanks to providence," say the fellows in Group 63.

Dale Smith, one of the older crew members, is spending anxious hours when away from home these days. Needless to say, he is expecting a new arrival any minute. The new tax "exemption" will be the second in Dale's home. Many here are acquainted with Mrs. Smith, who was the former **Margaret Powell**, supervisor at the Manteno State Hospital.

Did you know . . . that **George Hatting** is the ideal father—he takes his 13-year-old son fishing every evening . . . that **Loyal Olson** has recuperated from a recent illness and is back on the job . . . that Mr. DiPeso wasn't kidding when he said "stay out" to gentlemen of 66—if you don't believe this just take a squint at the new Yale lock on the timekeeper's door . . . that **"Mac" McCray** is not only tops on efficiency but is a great humanitarian as well—he shoots through the "branch" at the squirrel to "lighten the shock" . . . that **William Cota** is fishing—no one can imagine for what . . . that **Donald Green** left for a brief vacation at his home in Moline, Illinois.

Group 63

Paul "Smokey" Davidson has been wearing a broad smile since September 27—wedding bells rang for him and a pretty little Texas girl on that eventful day.

On the sick list are **Claude Heap, Rex Thomas** and **Johnny Zopf.**

Group 63 contributes soldiers-to-be in the persons of **Sam Howard, Christ Athas** and **Dale Robertson.**

Understand **Paul Hall** is plenty alright when it comes to playing a guitar and a harmonica in regular hillbilly style.

If betting is in your line contact **Lorin "Mike" Ellis**, burning pit foreman—he'll always lay a little wager with decent odds on most anything from the weather to a prize fight.

Ray Offerman takes on a few wild ones too.

SWINGING along in a gay mood is Mrs. Marlene Steiskal, recent bride of Robert J. Steiskal, Government inspection office, Group 3.

Group 66A

Three cheers for **"Pop" Redmond**, 66A foreman, who, during his eighteen months at EOP has neither been late nor missed a day of work.

The guards here seem to think 66A is the Eden spot of the area—and maybe they've got something there.

Group 68

Winners of War Bonds for the last two weeks were **Cecil Morrey**, truck helper, and **William Hayden**, better known as "Old Dad."

Laboratory

Saturday evening last, **Bobbie and Brid Bridwell** had "dinner and demi-tasse" with the **Jess Kinsers** at the "Louie." Rumor has it that due to an embarrassing lack of funds, Bobbie and Marge found themselves doing dishes and wearing off their filet mignons simultaneously.

Nelson Tippett has partially recovered from the *pip*, a rare disease which heretofore has attacked only baby chickens. Unfailing symptoms of the unusual illness is the inability of its victims to say "peep." Instead they say "pip." It has been a sad summer for Nelson.

Marcia Mitchell has started a fund for the benefit of **Marcia Mitchell.** It seems that hubby Jim called her Sunday from Camp Roberts—and they talked for thirty minutes to the tune of $26.35—*collect.*

Dog fancier **John Snyder**, who has christened his newly acquired daschund "Rosemary" after **Herb Hafele's "Rosemary,"** has established a haven for homeless dogs and cats. It is this quality in John—the one that he keeps the quietest—that is one of his noblest characteristics.

Rover Overholt and **Teddy Snyder** added infinitely to their aesthetic education by seeing "Good-Night Ladies" at the Blackstone in Chicago last week.

Mr. and Mrs. Ford Teeter spent Tuesday in New York City (well, they can dream, can't they?)

Abraham Agamy entertained at a lovely garden party in his Coal City home the night of the snow. The guest list included **Ellis Steinberg, Ray Hybarger, Vern Holder, Dave Hill, Ronald Beck, Alexander Becker, Charles Clifford** and **Richard Orndorff.** *(It would have been great fun if someone had thought of it.)*

Material Warehouse

FRANK McCORMACK
Correspondent

Mr. and Mrs. Malcolm Stenstrom spent their vacation at Lake Geneva in Wisconsin. Mrs. Stenstrom really enjoyed it, but Malcolm said it was just a waste of time. He sat in a boat three days in succession from daylight till dark with a fishpole in one hand and a hot water bottle in the other, and all he caught was a cold in the head and back. He went to a service station in Wilmington and sat on a greasing pit for two hours while an attendant worked on him with an oil can and grease gun to loosen up his joints so he could return to work.

Leslie Ross spent most of his vacation playing cow-pasture pool, commonly known as golf. Leslie said there is not much to the game for all you need is a ten-acre field, a bundle of wood, a foolish look and a pocket full of golf balls and tees. First you put the ball on the tee, then you tee off on the ball, driving it as far as you can. Then you go looking for the ball. If you find the ball the same day you hit it, you win the game. Leslie tee'd off on the ball and drove it one-quarter mile. He then went looking for it and what do you suppose he found? He found a billy-goat eating the ball. So he tee'd off on the goat and knocked his *goatee* off.

Material Checker **Robert Grady** is in St. Mary's hospital in Kankakee recuperating from an operation performed last week. His fellow-employes at the Hub and the other Material Warehouses wish him good luck and a speedy recovery.

Johnnie Purcell, now working in Group 70-5 Warehouse, was a jockey in his younger days and he was picked to ride a red-hot favorite one day on a well-known Indiana race track. The horse he was riding was a little wild at the post, but finally got off to a good start. Johnnie's mount went into the lead and held it all the way to the stretch, where the horse fell, throwing Johnnie over the rail on to a mule someone had parked there. So Johnnie rode the mule the rest of the way, winning the race only to be disqualified for failing to finish on the same horse he started on. When Johnnie was told the Judges wouldn't pay off on that one he swore he would never ride another horse or a mule either.

Hub News

Harold Ellis has resumed his work after a two weeks' vacation. We understand that Harold spent some time at Cedar Lake, Indiana.

Gerald Fitzgerald, alias Corrigan, spent an enjoyable vacation in Joliet. Gerald did not leave home as he was too busy catching up on sleep.

Quite a few tall fish stories have been floating around the Hub office recently. Some wonder if **Kenneth Pratt** has any pictures of those fish he caught at Monticello, Ind. Kenneth did catch a good sun tan.

***Gaylord Spies** has joined the* staff. He hails from Cabery, Ill.

Can you imagine something like this? **Harold Culbertson** spent his vacation fixing his furnace and laying pipe. Cub says these loose ends must be taken care of. A stitch in time saves!

Congratulations to **John Markley** for his courage and bravery. He still drives that flivver of old vintage and says its good for the duration (that is if the duration is not too long.)

George Duren, genial G-man and engineer, has been transferred to the Administration Building.

Dave Simm has been assigned to the warehouse as G-man and all hope he finds the little gray schoolhouse a pleasant place to be.

James Eib is not in the best of health. All hope that Eib will return real soon.

Schedule of First Aid Classes at EOP and in Nearby Communities

Location	Date	Place	Time	Instructor
Joliet	October 7	Joliet Township High School	7:20 P. M. to 9:30 P. M.	Mary Lou Wagner Meyrlin Hohnenstein
Plainfield	About October 15	Plainfield Library (Basement)	Open	Genevieve Hammel
Lockport	About October 15	City Hall	Open	Contact Local Red Cross office
Braidwood	October 15	P. T. A. Room (Grade School)	7:30 P. M. to 9:30 P. M.	I. W. Hawes—Phone EOP Ext. 4227
New Lenox	About October 15	Village Grade School	Open	Lucille Drake
Gardner	October 15	Gardner Town Hall	7:30P. M. to 10:30 P. M.	I. W. Hawes—Phone Ext. 4227
Wilmington	October 20	Red Cross Chapter (Bank Bldg.)	7:30 P. M. to 9:30 P. M.	Irene Stanley—Phone 5741 I. W. Hawes—Phone Ext. 4227
Kankakee	October 20	Labor Temple—220 W. Court St.	7:30 P. M. to 9:30 P. M.	Mrs. Morris Cooper—Phone Main 2398
Coal City	About October 15	City Hall	Open	Mrs. P. G. Nicholson—Phone 2561 Mrs. Norman Campbell—Phone 2071
Morris	About October 15	County Building	Open	Mrs. Loretta Scavy—Phone 333

Julia Astle, Group 4; Rosemary Becher, Group 1; Chester Bennewitz, Group 2; Ralph Berryman, Guards; Royal Blackford, Group 1; Elizabeth Boldan, Accounting; Roy Border, Utilities; Agnes Brown, Group 4; Vern Bryant, Group 5; Verla Chism, Plant Protection; Claude Cole, Utilities; John Daniels, Utilities; Gerald Delaney, Utilities; Edith Dinon, Group 5; Patrick Gahagan, Watchmen; Clarence Green, Inert Storage; Marion Griffin, Group 7; Walter Horst, Utilities; Elizabeth Kambic, Group 5; Joseph Kolich, Group 66; Monica Kotowski, Group 6; William Malzow, Group 1; Pearl McElvain, Group 4; Paul Moews, Guards; Beatrice Moon, Group 9; Oakley Norman, Accounting; Edith Patterson, Group 5; James Riddell, Utilities; Oladean Rockenbach, Group 4; Robert Rub, Group 2; Clyde Runyon, Group 61; James Ryan, Group 3-A; Anna Seliga, Group 8; Virginia Snader, Group 5; Gerald Tostesen, Group 2; James Turner, Group 7; Elmer Wenbert, Utilities; Wesley West, Group 1; Orval Wolfe, Utilities; Orville Ziller, Guards.

GONE, or almost so, are the days when such poses as these are possible with winter coming on. Shown are Frank Kadlec, auditing department; Mrs. Kadlec and their 9-months-old son, Robert. They have moved from Chicago to Joliet.

October 19

Calvin Ashline, Utilities; Elsie Beach, Group 4; Kathryn Bushey, Group 7; Robert Calahan, Group 2; Charles Chole, Utilities; Ida DeMoss, Group 5; Albert Ferriter, Accounting; Dorothy Formenti, Group 5; Robert Hansen, Group 1; Tony Harding, Group 3-A; Walter Houdlett, Inspection; Paul Lauer, Timekeeping; Clifford Lockwood, Group 3-A; Leo Lovell, Utilities; Donald Lytle, Group 1; Thomas Mills, Utilities; Albert Nelson, Utilities; Charles Page, Group 1; Raymond Pratt, Utilities; George Schlegel, Utilities; Patricia Scofield, Group 7; Lionel Senesac, Utilities; Harley Snow, Group 1; Genevieve Spreitzer, Group 9; Albert Stefani, Group 8; Jessie Sweatt, Group 1; Eileen Terlep, Personnel; Jesse Thomas, Utilities; Helen Welus, Group 5; Paul Wood, Utilities.

October 20

Joseph Allard, Group 1; Alton Allison, Engineering Department; Irvin Anderson, Group 3-A; Michael Bobel, Group 1; Doris Bullock, Group 4; Julia Crate, Group 7; Paul Diggle, Utilities; John Dvorak, Group 3-A; Evelyn Fears, Group 7; George Fikrle, Utilities; Joseph Gura, Group 1; Vearl Heinis, Timekeeping; Dorothy Herlihy, Group 7; Lawrence Huster, Ordnance; Ivan Janelle, Group 2; Harry Laubhan, Jr., Utilities; Catherine Lindblad, Hospital; Thomas Machetti, Ordnance; George Margetts, Ordnance; Emily Murin, Group 4; Kenneth Palmer, Ordnance; Robert Pester, High Explosives; Charles Peterson, Group 3; Howard Rose, Group 66; Jeanette Salzman, Group 1; Kenneth Sandvall, Group 6; Ira Schick, Fire Department; Thomas Shay, Group 1; Angeline Sovinski, Group 9; Ray Spivey, Inert Storage; Ethel Studer, Group 4; Faun Ulmer, Group 4; Joseph Walsh, Group 3-A; Melvin Watters, Group 7; Carl Wekander, Group 1.

ORDNANCE inspectors of Group 62, O. J. Ralston of North Inert and Thomas Dillon of South, are shown discussing baseball in the quiet and cool of the woods.

October 21

Irving Adams, Utilities; Frances Biros, Group 8; Thomas Bruce, Utilities; Helen Camp, Group 6; Everett Denoyer, Group 3; Walter Dixon, Utilities; Bernadine Dolinshek, Group 5; Clarence Dumjahn, Group 66; Leo DuPuis, Group 1; Armando Govoni, Utilities; Harry Hightower, Jr., Group 4; Raymond Hoffman, Group 3; Mary Holeman, Group 8; George Holland, Group 3; Helen Hoyt, Group 9; Albert LaBorence, Timekeeping; Charles Lesnik, Utilities; Anton Loda, Inert Storage; Raymond Mallie, Group 3; Walter Moorhead, Jr., Group 2; Frank Perino, Jr., High Explosives; Oliver Pierce, Personnel; Donald Pinder, Accounting; Clyde Taylor, Group 2; Fedele Testa, Group 1; Orville Schweigert, Accounting; Marion Shaw, Group 4; Connie Singleton, Group 1; Margaret Smith, Group 5; Carl Swanson, Timekeeping; Mary Viggianelli, Group 7; Stanley Wojciechowski, Group 2; Evelyn Wood, Group 9; George Woodworth, Group 4; Freddie Yarno, Group 1; Royce Young, Group 1.

October 22

H. Alexander, Group 1; Clarence Barrows, Inert Storage; Stephanie Bielec, Group 9; Eileen Bombasaro, Group 4; Everett Brannberg, Group 1; Lillian Calahan, Group 5; Bertha Cremer, Group 7; Arneita Dicken, Group 8; Thomas Dixon, Utilities; C. A. Dziurzynski, Group 3-A; Bartho Fioritto, Utilities; Derald Grimshaw, Ordnance; James Hayes, Group 66; Myrtle Horn, Group 9; Paul Jenkins, Utilities; Arthur Jones, Inspection; Walter Jones, Utilities; Ward Kellogg, Group 1; R. LaMontagne, Inert Storage; Andrew Levitt, Group 4; Darwin Matter, Guards; T. A. Matuszewski, Inert Storage; John Merrick, Inspection; Leonard Nelson, Inert Storage; Gladys Odette, Group 7; Mildred Ostoich, Group 4; Stanley Pajak, Utilities; Geno Rugeri, High Explosives; Leo Schroeder, Guards; Walter Sherman, Guards; Robert Smith, Group 3-A; Charlotte Smith, Group 9; Barbara Stacy, Group 7; Floyd Stevens, Utilities; Frank Stuky, Utilities; Paul Trepanier, High Explosives; Joseph Turk, Inert Storage; Ralph Turner, Engineering Department; Edward Wince, High Explosives.

TWIN BROTHERS, Jim and John, 6½ months old, are looked after by Patricia, their 7-year-old sister. The three are the children of Louis "Sully" Sullivan, Accounting Department.

October 23

Robert Attaway, Group 1; Helen Bailey, Group 9; Ronald Blackburn, Guards; Bernard Cavanagh, High Explosives; C. E. Christensen, Group 1; Charles Delaney, Group 3; Theodore Demack, Group 4; George Dennison, Group 2; William Dodson, Group 3; Marvin Dornburg, Group 3-A; William Edmondson, General Operations; Sharon Eriksen, Group 3-A; Irvin Heck, Group 3; George Heckenkamp, Group 1; Mayme Hoskins, Group 6; John Hosler, Group 61; Mildred Jensen, Group 8; Harry Lightfoot, Group 3-A; Regina Manau, Group 8; Marueen McElroy, Group 7; James McFarland, Utilities; Walter Mozden, Group 1; Helen Quinn, Group 9; Alvin Rediger, Utilities; Harry Rice, Group 3; Carl Richards, Guards; Arnold Ronnenberg, Group 3; Thomas Ryan, Guards; Ella Savoie, Group 5; Irene Sekola, Group 1; Roland Sisk, Group 2; Esther Speckman, Group 5; Helen Spisak, Group 4; Orville Stevenson, Group 3; Jessie Strapp, Group 9; Walter Voss, Group 2.

October 24

Francis Bridge, Accounting; John Caruso, Utilities; Lester Castongue, Group 1; Lillie Hale, Group 4; Lavera Holder, Group 5; H. M. Hutchinson, Inspection; Gerald Jacobs, Group 3-A; Wanda Johnson, Group 9; William Kelsey, Group 2; Elizabeth LeBeau, Group 6; Frank Lorence, Group 2; Adolph McClintock, Utilities; Jennie Murdie, Accounting; Carl Peterson, Group 1; John Preberg, Group 2; Beatrice Rodgers, Ordnance; Virginia Ryan, Group 5; Arnold Schweer, Utilities; Thomas Shay, Inspection; Gilbert Simmons, Group 3-A; Elizabeth Strahm, Group 4; Clara Surprenant, Group 7; Merna Wemstrom, Personnel; Floyd Westerfield, Group 1; Myra Winkler, Group 4.

October 25

Maratha Allie, Group 9; Angelo Balbinot, Maintenance; Wilbur Bewsey, Group 3; Jean Bolen, Ordnance; Amy Boughton, Group 7; Eylar Brunskill, Guards; Shirley Cooper, Group 9; Isabelle Doss, Group 9; Walter Duncan, Group 6; Robert Fillmore, Group 2; Michael Forkal, General Operations; Mary Fracaro, Group 9; Irene Gehrke, Group 9; Donald Godich, Group 61; Virginia Green, Group 9; Russell Harris, Group 9; Agnes Jisa, Group 9; Margaret Kormelink, Group 8; Donald Lambert, Group 1; Leona Larkins, Group 9; William Liming, Group 2; Charles Littrell, Group 2; William McCormick, Utilities; Mary Merillat, Group 5; Francis Riley, Plant Protection; Emeline Russell, Group 7; William Ryan, Accounting; Henry Spellisy, Utilities; Frances Sukle, Group 5; Charles Swartz, Group 3-A; James Tucker, Group 1; G. C. Weidenbach, Group 6.

Third Fellowship Meeting Oct. 15

Third in the series of EOP fellowship meetings is scheduled for 6 o'clock Thursday evening, October 15, in the Cafeteria, with a program of entertainment following in the Recreation Building. The committee in charge is composed of **John H. Walker**, chairman; **C. J. Coburn**, steward; **J. J. Fitzpatrick, St. Clair Smith, George F. Bent, Paul L. Deylitz, C. W. Wade** and **John O'Connell.**

All those expecting to attend are urged to communicate with Mr. Coburn by 5 o'clock Wednesday evening, October 14.

About 200 men attended the second meeting October 1. After a turkey dinner in the Cafeteria, Chairman **A. P. Balston** invited the group to go to the Recreation Building, where they were entertained by **Leona Hagen**, of the Personnel Department, **Beverly Swenson**, and **Robert Henderson.**

The rest of the evening was devoted to bowling, billiards, table tennis, cards, and shuffle-board under the supervision of **Chief M. C. Baughman.**

The EOP Guide Post

SALE • FOUND • LOST • RENT — BUY • SERVICE • TRADE • RIDES

Classified ads will be published without charge for EOP employees and their families. If you can offer transportation, want transportation; want to trade, buy or sell something; have a house or apartment to rent; have lost or found something, you are invited to make use of this service. Deadline is Wednesday, ten days preceding publication.

For Sale—1937 Ford, 4-door sedan, radio, heater, 5 good tires. $175 cash. Call **Carl Anker**, Line 4280.

Riders Wanted—For Chicago or intermediate points either by Route 6 or 7. 1940 Oldsmobile. See **J. E. Ryan**, Room 39, Administration Bldg., or call Line 2263.

Riders Wanted — Between Wilmington and EOP. Leave Wilmington at 6:45 a. m. Pass Group 8, Group 4, Group 68, Group 63, Group 70 and Richards Farm. See **T. Tomaszewski**, Group 68, or call Line 3163.

Riders Wanted—To and from Wilmington on 4 to 12 shift. Call **M. Stenstrom**, Line 4291.

For Sale—At public auction at 10 a. m., October 15, at Court House in Joliet, 5-room house and acre of ground in Custer Park opposite Wabash depot. Write or call **Pence B. Orr**, 201 Chalstrom Bldg., Joliet—telephone 2-0255.

Lost — Ladies' yellow-gold wrist watch with gold band. Lost Friday, September 25, in Group 8 change house or on area bus between change house and shakedown house. Call Group 8 superintendent's office, Line 3244.

For Swap—Will trade model airplane kits and supplies, poster stamps, cigarette cards, etc., for Raleigh cigarette coupons only. Will also trade coupons. Write **Robert J. Steiskal**, Government inspection office, Group 3, or Hawthorne Station, Chicago.

Wanted—Riders from Morris to EOP on the 7 a. m. to 3:30 p. m. shift. Call Extension 61 at Richards Farm.

Ride Wanted—To and from Joliet. Arrive in Joliet at Rock Island station about 7 a. m. Want ride about 7 or 7:30 a. m. Leave EOP about 4 or 4:30 p. m. Will try to arrange hours to fit driver's. Call **G. S. Hedrick**, Line 3182-3.

ELWOOD ON PARADE

SOLDIERS' kits will be furnished by the EOP Red Cross Chapter with the $50 presented to Mrs. Don M. Hoffman, chairman, by J. E. Olson for War Dept. Employees Service Group.

STENCILING the brass cases for 105 mm. shells is the job of Fern Timm (left) and Priscilla Shepperd, shown here at work in Group 1. Men and girls work together in this bay.

FORECASTING the weather to aid in loading line operation is the task of Guy Ward, EOP meteorologist, shown here in his observatory atop the Administration Building.

BRASS CASES for 105 mm. shells are shown here being unboxed and sent to a loading bay by feminine employees of Group 1. Pictured left to right are Cecelia Bebey, Violet Mitchell, Louise Ariagno, Catherine Gabrys, Eloise Kelley, Violet Goffin, Phyllis Pement, Dorothy Parks, Vera Lee and Mae Abney.

INSERTING PRIMERS in the 105 mm. shell cases is rapidly done by the agile fingers of Louella Hilgert (left) and Nelda Bergman after they come off the conveyor in the receiving room. This is another of the assembly assignments given to girls in the loading lines and is followed by insertion of powder bags.

MUSCLE AND SKILL are required in the loading operations shown here, a close-up of part of the bay pictured on Page 1. A heavy hammer and wrench are used to tighten the fuzes in the 105 mm. shells, but the girls in Group 1 have proved equal to the task. Shown left to right are Ruth Welch, Martha Mings, Marie Heintz and Billy Gibbs. Julia Kirby and Pat Fitzgerald are in the rear.

LETS GO! U.S.A. KEEP 'EM SHOOTING!

Vol. 1, No. 11 JOLIET, ILLINOIS, OCTOBER 23, 1942 EVERY OTHER FRIDAY

New C. O. Served Long in France in World War I

Purple Heart Given Major Haber for Combat Activities

(Pictures on Page 3)

Major Kenneth M. Haber (pronounced Hobber), new commanding officer at Elwood Ordnance Plant, saw considerable overseas service during World War I and was awarded the Purple Heart decoration when he was wounded in Belgium. He came here from the Ravenna Ordnance Plant at Ravenna, Ohio, where he was executive officer.

Major Haber, who was graduated from the Case School of Applied Science at Cleveland as a chemist and mining engineer, and also took a journalism course at Columbia University in the interest of his writing avocation, was founder and general manager of the Chamberlain-Haber Chemical Company, Cleveland. He retired from this business in 1940.

He served with the 112th Combat Engineers in France and Belgium, and received the Purple Heart. He was in service 26 months, and overseas 13, and took part in the Meuse-Argonne, the St. Mihiel, the Vosges, the Pannes sector and the Lys-Escaut sector campaigns. He was a master engineer, highest non-commissioned rank with the engineers. After the war he returned to civilian life, and for a time was interested in the conversion of war gas plants to peacetime purposes.

Although he has not been writing for several years, Major Haber formerly was a frequent contributor of short stories to national magazines, and Mrs. Haber, who writes under the name of **Elizabeth Haber**, is an author of stories for children. Until a few years ago she was a columnist for the Cleveland *Plain-Dealer*. Major and Mrs. Haber have two sons, both in school. Mrs. Haber and the boys do not plan to come here, the major said.

Horseshoe Tournament Starts October 26

Entries have been closed for the championship Horseshoe Pitching Tournament and the schedule drawn up. The nineteen entries will bring together some of the best players in the plant.

Play will start on the courts at Fire Station No. 1 Monday, October 26, and will continue daily until the championship is decided.

Next year this will be made a major event; new courts will be built in the recreation area back of the Recreation Building and every evening will see men and girls throwing Dobbin's castoff footwear.

The schedule will bring together the following teams for the first round: **Grover Alexander vs. Francis Downey; William Hayes vs. Louis Residori; Fred Wesselhoff vs. John Arnold; Walter Lueder vs. E. Bramhall; Virgil Bell vs. Robert Irwin; Joseph Vacarro vs. Ralph Sassenger; Sidney Leeve vs. Virgil Fear; Angelo Amorose vs. Leanord Terry.** The following have drawn byes for the first round, **Julius Naurot, Frank Pavlick** and **Paul Lester.**

Promoted to Greater Ordnance Assignment

LIEUTENANT COLONEL DON M. HOFFMAN

"Miss Victory" of EOP to Be Selected

In co-operation with the Chicago *Herald-American's* nationwide contest, EOP employees have the opportunity to select from among their girl co-workers one who by outstanding contributions to the war program through daily work and extra-time efforts can earn the title of "Miss Victory."

With other newspapers, the Chicago paper is seeking to have some girl war worker named "Miss Victory" for the Nation. The divisional contest, embracing the Chicago area, will select an entrant who will be sent to Washington to compete for the national title. EOP's entrant will compete in Chicago with representatives from other war plants in this section for the divisional title.

Some 35 or more EOP girl war workers will be considered by a committee of judges for the EOP title. They can be nominated by any employee and those receiving the highest number of nominations will be considered as semi-finalists, from whom EOP's "Miss Victory" will be selected by the judges at the Hallowe'en dance, October 31, in the Recreation Building.

For your convenience, a ballot is enclosed with this issue of *The Bomb-Shell*. Please act according to instructions at once, as the deadline for entrants is Thursday midnight, October 29. Fill in your ballot, put in the name of your nominee, indicate the reasons for your support, sign your name and clock number and mail to "Miss Victory Committee," Elwood Ordnance Plant, Joliet, Ill.

The semi-finalists will be called before the judges' committee at the dance, and an entry who will go to Chicago will be selected. The winner of the national title of "Miss Victory" will receive a $1,000 War Bond as a prize and will be entertained without expense to her in Washington.

Members of the EOP judges' committee are **George F. Bent**, chairman; **Helen Bardi**, secretary; **Helen Shimek, John H. Lower, John Condi** and **Capt. David P. Tunstall** as EOP public relations officer.

Delay may be costly to your candidate's chances, so send in your ballot at once. Only those postmarked on or before midnight October 29 and received Friday morning may be considered. You may find help in the following excerpts from the Chicago newspaper's contest rules:

"Contestants shall include girls and women of any age, single or married, working in war industries, who are regularly employed. They must have good attendance records and must be approved for honesty and efficiency by their employers.

"Selections will be made on the basis of the candidate's record, in-

Col. Hoffman Leaves After Two Year Stay

Takes St. Louis Post; Succeeded Here by Maj. K. M. Haber

Lt. Col. Don M. Hoffman, commanding officer of the Elwood Ordnance Plant since March 10, left October 13 to assume new duties as executive assistant to the Field Director of Ammunition Plants at St. Louis.

Colonel Hoffman was succeeded here by **Maj. K. M. Haber**, who previously was executive officer of the Ravenna Ordnance Plant, Ravenna, O.

Colonel Hoffman was accompanied by **Mrs. Hoffman** and their 14-year-old son, **James R. Hoffman.** Another son, **Sgt. William R. Hoffman**, 22, has been in Egypt since February, 1941, attached to the British Middle East Armies, where he has participated in the campaign of that sector.

Arriving in Joliet, October 27, 1940, Colonel Hoffman has represented the Ordnance Department at EOP continuously since that time. Ground for the plant was broken in November, 1940, and Colonel Hoffman has played an important part in its planning, construction and operation.

Native of California

On January 17, 1941, he was made executive officer of EOP and retained that post until his promotion to commanding officer last March. In the meantime, the staff of Army officers has been increased to 20.

Born in San Francisco, Calif., July 4, 1898, Colonel Hoffman is the third generation of a family of newspaper owners and publishers in the state. He was graduated from the University of California in 1917 with a degree in Civil Engineering. Enlisting in the Army after this country's entrance into World War I, he was assigned to the first Air Force ground school at the University of California and later was transferred to the 27th Engineers. With this outfit and the 472nd Engineers, Colonel Hoffman participated in World War I.

From that time until 1927, when he was promoted to first lieutenant and transferred to Chemical Warfare division, Colonel Hoffman was with the U. S. Army Engineers, attached to the

Next Fellowship Meeting October 29

The next of the popular EOP fellowship parties will be held Thursday evening, October 29. Dinner at 6 o'clock at the Mess Hall will be followed by a program of entertainment in the Recreation Building.

The committee in charge is composed of **George F. Bent**, chairman; **R. T. Read**, assistant chairman; **H. H. Clark**, steward; **George Mowitt, R. C. Wilhelmi, E. G. McAloon** and **Joseph Salmon.**

All men desiring to attend the party should contact Mr. Clark by 5 o'clock Wednesday evening, October 28.

The Bull's Eye

Some article around the house was wanted the other day. The "head" of the family suggested that it was probably in our boy's room.

In our boy's room! I hadn't been in that room for weeks. It was quiet in there, neat, everything in its place. The sunlight filtered fitfully through half-drawn curtains. One of the sunbeams lighted up a picture on the mantle over the fireplace where he used to take off his shoes and stockings at night. It was his graduation picture from military school. I remembered how proud he was when he brought that picture home, brave in its uniform and the bars of his school commission—and how proud we were.

And then I knew why that was so quiet and so neat. He had worn another uniform that day when he marched away to camp. It was a real uniform then, that which Uncle Sam had given him. He walked with squared shoulders, head held high, proud again that he was wearing that new uniform. And, again, we were proud —proud that we had a *son* to give to Uncle Sam.

Maybe it was a bit of mist before my eyes but in that room again I saw a disorder of boys' clothes piled on a chair, one shoe here, another there, a baseball bat in the corner, a gun on the wall, a football with the name of a half dozen of his University's gridiron heroes scrawled on it. Then I looked in the bottom drawer of his dresser. Yes, they were there—the tin soldiers that were an early Christmas gift that he had treasured through all the years.

I could see him in knickers and shirt-waist marshalling those tin soldiers, parading them on the living room floor, flushed with victory as "his army" put most of the opposing army hors-de-combat. And then I saw him again with wooden sword and paper hat, marching in a column of neighborhood boys and girls parading in the street in front of their homes at make-believe war.

I walked over to the bed, half hoping to rumple the tousled, sleepy head and in assumed stern tones command him to get up, get washed, eat his breakfast and be on the way to school.

Strangely, I went back down the stairs without even having thought to look for the thing I was to get. But his mother did not mention it to me as I began talking about getting right out into the yard to do some work around the yard.

And as I puttered around the lawn, I wished that I, too, were young enough to be out there with my boy carrying a gun, to pat him on the back again and say, "that was a good job you did."

—**B. C. Wollan**, Group 3.

October 17, 1942

TO ALL DEPARTMENT HEADS:

I am sure you will all be glad to know that the payroll deduction for purchase of War Bonds for the payroll period ending October 10, 1942, was 10.56% of gross earnings.

I think this is a fine record and I hope very much that it can be maintained.

(Signed)
W. E. Canniff

Manager, Engineering & Operations

THE BURNING PIT

By Scorchy

This dispatch shall deal with that favorite, but often badly handled, subject of women. In fact, it may take on the proportions of a warning to some of the more securely situated male members of that great EOP family that they had better be on their toes or they may soon find themselves relegated to the world of "not necessary" men.

Each and every one of us sooner or later is going to arrive at the sudden conclusion that we have a war on our hands and, also, that despite the individual gigantic mentalities that seemingly know all the answers, it takes men to win the war itself but nonetheless, the wheels of industry are going to turn at home, or the war might be won by someone else than our side.

The fellow who thought up the idea that the fair ladies might pitch in and turn out a respectable day's work really had something that you and I should have thought up sometime back. The possibilities of little dames, dames, and yea, verily, even the mesdames, dancing an industrial minuet to the accompaniment of grinding gears, sparking metal, puffing locomotives, and grunting superintendents sort of takes the imagination by the hand and leads it into the world of the fanciful and eerie.

I have for some time been speculating on the potentialities of the idea as it might be applied to the one and only EOP. Picture, if you will, the feminine touch as it would inevitably pervade the atmosphere of "the area" if and when the substitutions are made Catherine for Carl, Edith for Edward, Joan for John, Dorothy for Donald, Helen for Henry, and Zelda for Zilch.

FIRST Accomplishment of Scorchy's diatribes is pictured here . . . St. Clair Smith, superintendent of High Explosives, now wears a conventional hat.

As the transition becomes a fact, it is not unreasonable to expect that the finished product that rolls out of our production lines will be painted in gay, colorful designs with many of cupid's hearts and arrows and other cryptic messages, which could accurately be interpreted as "Love and Kisses from Josie, inspector 982, to the Lug That Pulls the String on the Howitzer." In other fields, the same delicate touch would manifest itself in chintz curtains for the windows of that broken-down timekeepers' shanty that remains from the construction days at Group 3A.

To get down to brass tacks, or to be more specific, to EOP Waacs I nominate that terrifying demon of the Personnel Department, **Helen Bardi**, as the future assistant superintendent of railroad maintenance. It is felt that she would perform admirably as the working boss of a gang whose sole daytime activity consisted of tossing rails and ties back and forth and having them end up in pairs parallel to one another and at all points fifty-six inches apart.

The imagination need not be stressed too far to envision **Billy Nicholson** of **W. E. Canniff's** office rolling empty bombs from freight cars into those gluttonous tombs of storage more familiarly known as the Balston Caverns. The great **Arlene Schloendorf**, Mistress of the Mimeograph, seems ideally suited for the radio department. If one of those long necked antennae should go haywire, she could stand alongside and reach up with a piece of picture wire and a handful of putty and mend the break at the very top without even a chair to stand on.

It would seem only sensible to take advantage of past experience and generous exposure to forceful language and elect **Helen Shimek**, from down Utilities way, as assistant superintendent of the earth moving gangs. It would not be long before each caterpillar tractor would be equipped with a double swivel vanity mirror, a crepe de chine valance to cover up those ugly treads and, of course, each would carry the coat of arms of its dainty operator. The wags would immediately suggest the phonetic relationship of "Cat," the abbreviation of these mechanical dinosaurs with the derogatory tag sometimes tied on to that sex whose representatives we have suggested for promotion.

Travel through the area would soon bring out that lovely touch that only the fair ones can apply. The shakedown house would be neatly lettered with the message "Ye Olde Frisking Shoppe." Some of the smaller structures that have heretofore borne no particular legend would perforce be inscribed "Menanwimmen — Be Sure and Lock the Door." Similarly, the esthetic values of latrinic poetry should rise to lofty heights.

I feel that my immediate mission has been fulfilled by throwing the spotlight on the germ of an idea. You can fill in the details. It may not be long before the boys will foregather and, in plaintive voice, intone, "May we join the ladies?"

I have written . . . a poem!

Fear Goes

There's a smile back of every tear drop
As the sun's behind every cloud,
And the man who today
Thinks he's just a flop
May soon laugh long and loud.

It's not what we plan for tomorrow,
For tomorrow never comes;
It's what we do now
That does 'way with sorrow
And rids us of fear that numbs.

We ask ourselves, how can I do it,
This thing that I'm counting on?
But if we just go ahead,
Get going, begin it,
We find that our fear is gone.

—**Clifford Day**
Time Office

America First

Life isn't just a bouquet of roses.
There's many a thorn before life's chapter closes,
But may these thorns cause us not to stumble—
Let's make "America First" our motto be we rich or humble.

A country divided cannot stand.
Let's all fight together to keep ours a free land.
Let's keep "America First" without falter or fail
So the red, white and blue, we all love, forever prevail.

Let's all buy our share of stamps and bonds today,
And do our part for the boys across the way,
For when they've attained the goal they are fighting for
It will be "America First" forevermore.

—**Angeline Gunnerson**

Wednesdays Set as Women's Play Days

By Myrna Faris

You women, indivdually and collectively, are contributing enormously to the war production effort here at EOP by turning out vital military needs. You represent a sizable proportion of the many thousands of workers in the factories, offices, etc., who are releasing much needed man power for the Army. We realize that our first and most important job is to "keep 'em shooting" by turning out our full production quota. But "all work and no play makes Jane a dull girl," therefore, it is the aim of the Recreation Department to help each girl build for herself a sane program of leisure-time activity which will keep her mentally and physically fit for her job as a Production Soldier.

Beginning Wednesday, October 28, and every Wednesday thereafter, the Recreation Department will sponsor a Ladies' Day. The facilities of the Recreation Building will be exclusively their's from noon until 8 p. m. This will enable women working on the second shift to take part in the various activities before going to work and the girls working the day shift will be able to have a few hours of recreation after working hours.

All facilities, including bowling, basketball, volleyball, badminton, ping pong, shuffleboard, pool and cards will be in full swing. So come on over. We'll be tickled to see you all. Don't forget the date —Wednesday, October 28. Bus transportation to Joliet will be provided if there is sufficient demand, so, if you want transportation after the day's activities, call Recreation Department, Line 4109, and give your name.

18 Teams Enrolled in Bowling League

Eighteen teams have registered for the Bowling League for men. Many groups have not as yet sent in their entries, but it has been definitely decided to close the list as soon as 24 teams are in, as that will reach the capacity of the alleys and yet allow time for non-league bowling.

Since the alleys have been resanded and re-finished they have been one of the most popular spots in the Recreation Building. Teams have been getting a lot of practice. Some of the entries have been from Group 8 with two teams; the Guards with about 4 teams registered; the Paint Shop; Group 1 with two teams; Inspection Department; Bus Drivers; Group 70; Group 5; Operating and Engineering; Telephone Building, and Carpenters.

John Kusinski is a busy man these days lining up his basketball teams, and he is going to have a jump on all by having them playing early. Already the gym is pretty well scheduled for practice. Group 62 may have come in second in softball but they are going after basketball with a vengeance. **Edward Sheridan** is managing the team. **Paul Becker** hopes to repeat again with his Group 70 team. **Bill Galbraith**, Group 2, is also going to make it a tough season for the others. The Fire Guards and Guards have teams lined up. Managers should contact Mr. Kusinski and arrange schedules.

Hallowe'en Dance To Climax Fall Activities Here

Naming of "Miss Victory" Scheduled; Fun Features Due

If you want to breathe fast and laugh hearty
And fear not ghosts, witches and bats,
Then come to a dog-gone good party,
We're sure you'll say it's the Cat's.

Leave the world of reality and join the supernatural. See Hecate bowl a mean game. Hear the mutterings of the three Weird Sisters as they mix a strange concoction in their cauldron. Have a toasted marshmallow, hot from the fire of Mephistopheles, served by a witch. Watch the ghost of Hamlet's father cut a rug. Watch yourself having the time of your life at the Hallowe'en dance at the Recreation Building October 31, starting at 9:00 p. m., central war time (by courtesy of the groan witch company).

Helen Shimek, Utilities; **Dara Prew**, Personnel; **Helen McGinnis**, Ordnance; **Ruth Starkman**, Group 6, and **Arlene Schloendorf**, General Office, all of the advertising committee, will leave no tombstone unturned to remind you of the date, the place and the occasion.

Wilbur Galbraith, Group 2, and **C. O. Finnegan**, Field Engineers, who have been listening to sepulchral voices over their invisible wire, report that tickets will be fifty-five cents per mortal.

Charles Harris, bus driver, is lying awake nights, going on midnight walks through graveyards and is in daily conference with the *spirits* who are giving him confidential advice for his special project, the Chamber of Horrors.

Colby Eriksen, Group 3-A, one-man committee of entertainment, is dreaming up something fancy and non-spiritual for a floor show. "Mr. E." is a man of vision, too, because he definitely promises a real fortune teller.

Lucia Pearson, woman guard, and **Harvey Steffes**, Group 61, are looking gravely artistic as they plan decorations. They think it will be on the corny side. **Robert C. Wilhelmi**, assistant chief inspector and currently head of the refreshment committee, says that no spirits will be charged.

Edward L. Walkup, recreation director and guiding spirit, says that it's o. k. to trot the family skeleton out of the closet, but to leave your city slicker clothes there and come strictly informal. You'll really want to get hep when the EOP band gives out with that solid music.

Get your ticket at the Recreation Building or from any member of the Employees' Committee.

EOP's entrant in the "Miss Victory" contest will be announced and introduced.

Col. Hoffman Leaves After 2-Year Stay

(*Continued from Page 1*)

U. S. Geological Survey, the Bureau of Public Roads and the Federal Power Commission. The Power Commission assignment was for several years and during that period he was engaged in design, construction and studies connected with the activities of that agency in California, Oregon, Nevada and Arizona. He had a part in the early surveys and designs for Boulder Dam and Shasta Dam as well as other projects of that era.

For a period of about three years, Colonel Hoffman was in private contracting business engaged in highway building and other construction. In 1931 he returned to active duty with the Army as a captain and for five years was engaged in construction and other activities in both Eastern and Western parts of the country.

In Private Business

In 1936 he was engaged in his own business as a consulting civil engineer and served simultaneously as county engineer of El Dorado County, California.

Recalled to active duty in August, 1940, Colonel Hoffman was assigned to the office of the Chief of Ordnance in Washington and, following a short course of several months at Picatinny Arsenal, was assigned to duty in Joliet with EOP. He was promoted to major in September, 1941, and to lieutenant colonel in February of this year.

Colonel Hoffman is a member of the American Society of Civil Engineers, American Chemical Society, Society of American Military Engineers and is a fellow of the American Geographic Society.

Although they know it is due to the needs of war time, the many friends of Colonel and Mrs. Hoffman, both at EOP and in the surrounding cities, regretted to see them leave. Mrs. Hoffman was a leader in women's activities and was chairman of the EOP-KOW Chapter of the Red Cross.

TABLOID IS PRAISED by Maj. Kenneth M. Haber, EOP's new commanding officer, who said "The Bomb-Shell" is a means of cementing the employees and their families into an efficient, hard-working organization intent on "keeping 'em shooting."

Fire

STUART MOLONEY
Correspondent

That week-end short change has been made much more pleasant by the eloquent (and loud) singing of **Fireman Lawrence Dailey** of DeSelm. A real Caruso —in the rough.

How it got on the grapevine isn't known, but when **Fireman Robart DeBolt** was asked about a cigar treat a few days ago he replied that if he was guilty he would also be very proud. Nuf sed!

Fire Station No. 2 mourns the loss of an old reliable: **Fireman Charles Crain**, better known as "Mule Skinner," who is going to work in Uncle Sam's Army.

A big home-coming was tendered **Fireman Gerard Hanlon**, who has just returned from his vacation.

For good clean fun see Magician-Fireman **Ira Schick**.

By looking at **Fireman Carl Richards'** car you can see that fire hydrants are put into the ground a bit too securely. For further information see Mr. Richards.

Information Wanted

Robert Everhart — "Do they pitch horseshoes in the Army?

Walter Hilgert—"Where can I put my locker key?"

Harry Swartz — "Am I big enough to drive the La France?"

Fire Inspector Johnny Connelly is quite proud of that new front tooth and he points it out to everybody he meets, showing the tooth, the whole tooth, and nothing but the tooth.

Otto Mietz, an efficient inspector, is also quite capable in his home work. In spite of the continuous rain last month he did a swell job of painting on his North Hickory Street home. The "Mrs." should most certainly give Otto good marks for the month.

Inspector Walter Panian should tell why he didn't fix the defective wiring for his lady friend in Rockdale last week.

Several new inspectors have joined the department recently and they especially like the way the experienced men have shown them around. Thanks go to the veterans, for courtesy such as this creates the co-operation that keeps a branch operating with efficiency.

A Day at the Central Station

"Here" . . . Line up for Roll-call, and with bass and treble voices sounding off, the apparatus and men are warmed up and made ready for action. **Sgt. John Alar**, happy to distribute a very small number of hazard cards, assigns the boys to their posts and sends them off to work. The kitchen boys and their coffee. "Routine duties and drills," which never lets you guess how much hard practice and hours the boys put in. The shrill sound of the fire bell and a "Signal 3." The telephone rings—is it a "hot" one? The boys have been up on their toes so long that they all have fallen arches. Water barrels to be filled, a faulty hydrant fixed, a tank truck on the job. The sweeping detail and the fly-spray and poor **Frank Scoma**. Dinner time and what's cookin'? Two o'clock and gas mask training—clean up and shine the truck. All's quiet until some inspector wants a relief. Roster and schedule changes and 3:30 . . . time to go home . . . another day and another dollar.

The recently held "Get Together" at the Recreation Hall was glamorized by the presence of **Policewomen Luella Lipschultz** and **Marie Klein**. **Marjorie Howerton**, who makes a classic of the High Explosives column, proved herself a rug-cutter super de luxe. **Mr. and Mrs. Nicholas Cleary** and the **Jimmie Dillrees** represented the Fire Department. If this list is incomplete it is only because your correspondent could not see through **Guard Edward Stonich**, who gave a beautiful demonstration of a windmill, what with knocking himself out on his "gittar" and waving to all the boys in his department who helped make the affair a success.

Anyone wishing to relinquish a used Irish-mail, suitable for cross country hops, will kindly contact **Chief Roy W. Mortenson**, if you can catch up with him.

Oral Cox, a former member of the Fire Department and now in the armed services, writes from "somewhere in England" that he is receiving regularly issues of *The Bomb-Shell* and enjoys them immensely.

WHOLESALE SHARING of rides is practiced by nine girls who have traveled daily from Kankakee to EOP in the fashion shown here. There happened to be ten riders when the picture was taken and they are, right to left, Betty LeBean, Electa DeVore, Dorothy Serle, Mattie Redfern, Edna Smith, Isabel Reynolds, Ann Schaforth, Jeanette Guertin, Julia Swenson and Vina Memengo.

GROUP 3

NORBERT McLUCKIE
Correspondent

Now that baseball season is over, **Bob Hankes** will have to find another excuse for the old one—"Played a double-header tonight."

George Pilcher is back after about two weeks at Group 3-A. He thinks he has finally landed permanently now.

What happened to **Bill Beringer**, former correspondent for this group? Well, Bill is doing bigger and better things up in Building 16. It also gives Bill more time with his rabbits between shifts.

Charlie Robbins and **Harry Melby** think they are pretty good hunters after getting their limit of squirrels with 16-gauge shotguns, so they borrowed a Thompson sub-machine gun for the opening of hunting season November 15.

Woodrow "Woody" Koerner says time is getting very short, but he should know there is no need to chew his finger nails down to the knuckles.

R. Waggener, Building 5A, probably has some comments about one-armed driving. He needs a new paint job on the rear fender of his car.

If, in the future, you notice **Ray Rivard** losing any weight, it may be because Ray has been donating half of his allotment of milk for the cats in the Boiler House. They are gaining rapidly.

It seems the Army boys can't forget good old Group 3. Letters have been received from **Joe Garavalia, Don LeRette, Ray Gaddo** and many others. Keep up their spirits by writing to all former associates who are in the armed forces. Letters from all the other boys would be appreciated, too.

Eddie Wicks has an appointment with Uncle Sam. He feels that he can help out a lot. That's the right spirit and is also claimed by **Kenneth "Speedo" Fendrick**, who is going to leave after serving a long term in Group 3.

The men in the Power House are still chuckling over the fact that **George Weber** and **Charles Robbins** went fishing at Two Rivers, Mich., and caught nothing but a cold apiece. **George Pilcher** offered his raincoat when they left, but it was refused.

Will wonders never cease? Someone saw **Wayne Munyon** running the other day. Did **Al Matteson** teach him to try such a great task?

Henry "Little Boy Blue" Risk has decided that his blue suit has seen enough service, so he may be expected to blossom out in a new regalia soon.

Vern Worden and **Harl Son** have decided to bag some ducks on opening day. We don't care for wild game, but will help you add up the totals.

Charles "Chuck" Gorman says that his New Deal is proving successful.

Mrs. Gorman is probably the boss.

Walter Jones and the little Jones' had the time of their young lives viewing some Wild West movies, and does Papa Jones love them.

A **Raymond Whalen**, Building 10, is now showing great respect for explosive trucks. He always thought these drivers were very friendly and waving to him to pay their respects.

Stan Pearson still shies at having women riders, as somebody objects.

Did you ever hear of the former secretary that was very much surprised by the fact that they went right on making shells when her boss asked her to work overtime? She said, "This war production must really be serious stuff."

Group 61

JOE MOTTA
Correspondent

"Never was a Jap or Nazi born tough enough to *lick* a U. S. War Stamp," says **Whitney C. Miller.**

Seen at the EOP dance . . . **Harvey Steffes** eating ice cream—? . . . **Harold Rouff** guttering three bowling balls (score 103) . . . **Wayne Howard** playing ping pong . . . **Fred Colombo** with a handful of bottles . . . **Tony Ganz** dancing with a couple of girls and his wife of course . . . Enjoying themselves were **Robert Churchill, Paul Burke** and **Amos Campbell** . . . **John Meyer** looking over the situation . . . **Lyle Hazel** also enjoying himself . . . **Art Swinghamer** not doing so bad.

Ill with typhoid at the Silver Cross Hospital is **Mrs. Leonard Williams.** Here's hoping she recovers soon. Husband Leonard has lost fifteen pounds eating his own cooking.

Lou Bartholme has purchased a new "Brownie" rifle. He plans to do some hunting. Rabbits and squirrels, beware.

Jack Auberry gives out short and sweet information. He says "I have a new grandson." However, it is possible that the young lad isn't named yet.

Two active fellows here are **Bill Busing and Victor Fournier.**

How about a toast to two swell guys, **Corp. Jack Alberts** and **Corp. Roy Fox?** Jack was transferred to Group 2 and Roy has replaced him here.

After a few days' visit with folks in Wisconsin, **Ralph Walter** is back working.

Everyone here is proud of **George Kushner**, former guard, and **Gerald Riley.** George holds the guard shooting record on the pistol range with a score of 96.66, and Gerald plays a saxophone in the plant orchestra.

At home ailing was **Bill Powers.**

Planning a few days' leave are **Lee Minton** and **Dick Unmisig.** Lee is going to Southern Tennessee and Dick to Plainsville, O.

Welcomed to the group is **Donald Sharp.** Fellow employees have their fingers crossed that as timekeeper he won't make a hobby of moving the time cards around every night.

Back from their vacations are **Grover Taylor** and **Elmer McCans.** Whitney Miller is still enjoying his.

On the "gone but not forgotten list" are **Bob Brumbach, James Halpin, Loren Horrie** and **Jess Shelby.** All are Uncle Sam's boys.

It would be nice if . . . friends knew that **James Decker** is sporting a new jacket . . . **Ed Hasse** gained the knowledge that oil stoves had to be turned on before heating . . . when making out reports, **James "Shooter" Sinkular** didn't boast too strongly—his statement for one day to **Harry Brown**, Production Planning, was seven million pounds . . . in person, **Ronald Blackburn**, had the pleasure of thanking **Bill Biggs, Paul Burke** and **Bill Johnston** for the duck dinner they invited him to but he didn't receive . . . the real reason were known why **Edgar Bartlett** has a swelled jaw . . . all lunches were packed as delicious as the ones by **Mrs. W. C. Miller** . . . **Willis Lee** didn't have to drive sixty miles a day to work . . . while visiting the Brown Derby, **Allen Heaven** sat further away from the stage—a good way to keep out of the "doghouse" . . . more people had **Clifford Kidney's** curly hair . . . **Earl F. Johnson** didn't lose so much of his 204 pounds . . . it were known why **Wilbur Connor** doesn't bring his lunch to the building any more . . . **Melvin Moore** had the price of a haircut . . . you saw **Howard Cadwell's** new hat . . . **John Strufe** would save **Pearl King** a seat on the Dwight bus.

Women

By
CATHERINE NOONAN

Smart efficiency took a strong upward curve in the Ordnance Department when the women came forth in their uniforms on Official Uniform Day, October 13. "Who are they," was the unofficial question of the day. The curious were informed that they were not visiting Wacs or Waves, but girls they have seen every day for months and months. The uniforms have complete approval of all employees with the exception of one man who, after gloomily surveying four uniformed girls, exclaimed, "Gosh, now it's just like an Army camp."

Play for Fitness

The shape of things to come is going to be plenty good if the returns on the women's recreation questionnaire mean anything. **Myrna Faris**, director of women's activities, says that bowling, calisthenics and skating are taking the lead. If you didn't get your bulletin call Miss Faris at once over Line 4109. Your job of "Keep 'Em Shooting" is the most important in the world, but a little play will make you better fit for your big job. And don't forget about women's day at the Recreation Building.

Save Worn Hose

As you wistfully gaze at that run in your last pair of nylons, be cheered by the fact that now they can serve your country. The War Production Board asks all women to save their discarded nylon and silk hose. The stockings can be processed into supplies needed by the Armed Forces, chiefly powder bags. So save those that can't take another mend until the date for the stocking collection is announced.

Women Bus Drivers

All cracks about the women drivers are now out . . . or on their way out. Five brave females have joined the bus drivers in the Fuze and Booster area. The girls at the present time are doing conductor's work in the trailer trucks used to carry employees to and from work within the area. They are also being trained to drive the trucks and are doing all right according to instructor, **"Sweeny" Leggero. Margie Stevens** was the first recruit. After passing the acid test, **Tillie Davis, Eunice Mantia, Edith Cerre** and **Pearl Raridon** followed in her footsteps.

Material Warehouse

FRANK McCORMACK
Correspondent

Charles Herbig, superintendent of the Material Warehouse Department, and all his employees extend their deepest sympathy to the wife and family of **Edgar Ashley**, one of Mr. Herbig's loyal and faithful employees, who died suddenly Saturday afternoon, October 10, while at work.

Mr. Ashley was not only a trustworthy asset to his employers, but a real friend to his fellow employees, willing and ready to help them when ever and where ever he could. Mr. Ashley started work here November 6, 1940, and was the first material checker on the job.

Paul Roy became the proud father of an 8½-pound son last week while on vacation and the boys enjoyed the cigars he passed around on his return to work; all but **Perry Bruno**, who made a mistake by stenciling his cigar "EOP" and put it into stock.

The Material Warehouse Department is about to lose another loyal and very popular employee, **Ray Puffer**, who has been handling the checking in of material received in Warehouse 62-1 of the South Inert Group. He is going to Texas, where he hopes the change of climate will benefit his wife's health, which has not been the best. His friends and fellow workers wish him good luck, and his wife a speedy recovery.

Lester Patterson went into a restaurant in Monee, Ill., one morning last week for a cup of coffee and when the waitress told Pat about all the big fish she caught the week before, he got so excited he became a fish himself, giving the waitress a $5 bill for the coffee and walking out without receiving his change.

The Lord gave all two ends to use, one to think with, one to sit with. The war depends on which one is chosen, "heads we win . . . tails we lose."

Funeral Services for Mrs. H. L. Schultz Held

Funeral services for **Mrs. Esther E. Schultz**, 47 years old, wife of **Dr. L. H. Schultz**, head of EOP's Medical Department, were held October 20 at the Wunderlich Funeral Home in Joliet. Burial followed in Mount Auburn Cemetery, Berwyn.

Mrs. Schultz died Saturday night in Silver Cross Hospital, Joliet, following a brief illness. Surviving are the husband, her mother, **Mrs. Charlotte Ericsson**; her brother, **Anthony C. Ericsson**, and two sisters, **Mrs. W. L. Whitman** and **Mrs. B. H. Palmer.**

Group 2

EDWARD KEENAN

WILBUR GALBRAITH
Correspondents

Congratulations go to **Glen Bohm**, Building 4, who left the bachelors club last Saturday. Glen took the vows at his home town of Pontiac, Ill. "Wee Willie" Zauratsky, often referred to as the hero of one of Kipling's poems, enjoyed the wedding reception no end. He added a novel touch to the affair.

Someone asked why **Joe Alberts** enjoys coffee and—with a very pretty nurse in this Group.

John Johnson, assistant superintendent, is reputedly being sued by the makers of a well known breakfast food due to certain remarks passed at the recent Murphy's Boys Victory Banquet. It seems that "John" accounted for the bulge in front of his coat with the explanation that he is an ardent admirer and user of puffed rice and that he didn't have the hotel silverware concealed under his coat.

Glen Rub is still asking if the World Series Baseball Pool operated by **Mike Bruno** and **Don Bryant** was on the up and up. He won on the Cardinals and asked for the pool winnings to which Mike and Don replied that he had bet on an International League Team and didn't have anything coming.

Hoarse O'Kane, Government inspector in this Group, was ordered to report to the Army October 20.

A lad by the name of "Jerry" reports on two fellow EOP employees, namely **Raymond "Red" Powers** of Group 66A and **Juanita "Red" Milmaker** of Group 7. "Muggin" at the College Inn is the answer, it seems

Melvin Umphenour, it is rumored, cleaned up enough on the Illinois-Minnesota game to buy a new car and a couple of new suits.

"Jersey" Klegman is still keeping his fingers crossed these days hoping **"Boiler Maker" Joe Connors** answers a call from Uncle Sam. This, "Jersey" explains, will leave him free to claim all of Joe's silk shirts as well as the entire wardrobe Joe has accumulated over a period of time.

Talking about rabbits lately, **Don McMillan**, safety engineer, remarked "the rabbit suddenly sprang up in front of me and began running as only a rabbit can. I immediately let out a loud whistle, the rabbit apparently charmed by the sound stopped and I shot him." Now all the fellows want to borrow the whistle or have "Mac" go with them when they go rabbit hunting.

Murphy's Stadium has been converted into a football field and some hard fought pass and tap games are being played there as **Gene Hunt, Chuck Pierce, Bill Stanley, Sam Hoffman, Ray Murray, Roger Lotz, Bill Galbraith, "Jersey," Warren Hambourger** and **Ed Keenan** will attest with all their aching muscles. Sam remarked, "there's no use kidding ourselves," meaning the old legs will take so much and that's all.

Farewell greetings are extended to **Loren Blazer**, former storekeeper in this Group, who left to join the Army October 7. **Fred Mogle** has replaced Loren in the Storeroom.

Karl Ulrich reports that **Paul Tucker**, a former Murphy's Boy, is now attending St. Ambrose College in Davenport, Ia., where he is studying medicine.

Jay "Burt" Folk has been revealed as an amateur poet with this contribution:

Le Borences' chicken dinners are
the rage at Group 2,
Any old hen does the trick, roasted,
fried or stew.
Pagnusat, his Italian chef, certainly has fits
When Archie eats an 8-pound hen
And gives poor "Pag" six bits.

Inert Storage

CHARLES MANN

WILLIAM DENVER
Correspondents

Many of the boys are following the crowd to the Thursday evening Fellowship Meetings. The committee advises a surprise of entertainment awaits each evening and that rides are plentiful always.

Plans are under way to form a bowling team and all who are interested should turn in their names to **Charles Mann**, giving their average score. Both day and night shifts can participate.

A Victory letter has been received from Corp. Edward L. Heard in Hawaii saying he missed his friends at Inert and enjoys reading of them in *The Bomb-Shell*. Why not drop him a line? Call the office for his address.

The boys at Group 27 are wondering when **Otto Heap** will pass the cigars for his new grandchild.

Congratulations go to **Del Rabe** of South Inert . . . is the father of an eight pound boy.

Pictures of the mascot (goat) at South Inert can be obtained from **Jim Whitley**. Jim says he had first aid treatment for the goat, which stepped on a rusty nail. A new rooster has been added to the pet list at South. The North pet list includes birds and snakes. The other day they captured what they thought was a rattler, but it really was a garden snake . . . it will climb a broom handle to enjoy a feast of roast sparrow . . . no sparrow, no climb.

Among the visiting inspectors at Group 3-A is **Myron Shampoo**, with hair all combed and pencil in hand.

Something new has been added, **Leonard Spooner** to the clean-up gang and then to the service gang.

Frank Zupancic carries his lunch with two hands since the picture of his daughter was published in *The Bomb-Shell*.

The Timekeeper's Gallery at North includes pictures of **Gen. Douglas MacArthur**, as well as favorite movie and baseball stars.

The department's accident barometer is nearly at the bottom. Keep it there by safe and sane working, and reporting all scratches or bruises immediately even though they may seem unimportant.

Among the boys being inducted into the Army are **Cyrus Cobb** and **Joseph Monroe**. They have everyone's best wishes.

Art Kossak found first aid a real help the other day when his finger became infected from a scratch . . . **George Newton**, a first aider, performed. Mr. Newton said four similar cases were treated recently.

Matt Reay seems to enjoy the company of a vivacious blonde in a distant city who holds her own even though Matt plays two ends against the middle at Fuze and Booster . . . the winner still undetermined.

The landscapers are busy again . . . South Inert's lawn and picket fence are receiving attention.

Ed Spezio of Group 27 is organizing a basketball team. Ed would like for you to report to him if you want to try for a place on the team.

Group 27'rs are enjoying drinking water from the fountains . . . no more bubblers.

Frank Abbott of South Inert has made a vow to obey all traffic rules including the 35-mile-an-hour limit.

South Inert welcomes the following new employees: **James Newsom, Cloud Ulmer, George Love, J. J. Wood** and **H. G. Bellamy**. North welcomes **Herman Boston**.

The Morris *Herald* recently published a picture of **Thomas Delockery's** bride-to-be with the following lines— "**Supervisor and Mrs. Carl Oswood** of Saratoga Township have announced the engagement of their youngest daughter, **Inez**, to Thomas Delockery, son of **Mr. and Mrs. William Delockery, E. Jackson Street**". Another good timekeeper taking an important step!

The window washers are active again both at North and South offices, and everyone's happy. Now it can be determined if cars or trucks are coming.

War Bond deductions are on the increase . . . keep it up, boys. Just fill out the increase slip and give it to your foreman.

The Bomb-Shell note-boxes are for your convenience in turning in interesting facts or figures which you feel would make good news for your paper.

Kenneth C. Jones will have to change all his plans for the fall hunting trip . . . his duties are more important these days.

Cyrille Grandame of the Ordnance Department enjoys living at the barracks in Wilmington and is considered the sheik of the department . . . single and free.

Hospital

EVELYN RICHARDS
Correspondent

Dr. and Mrs. Bascom H. Palmer, guests of **Dr. H. L. Schultz**, visited the Hospital before returning to their home in Miami Beach, Fla.

Expressions of sympathy were sent to **Lucille Nahas** by the Hospital staff, following the death of her father.

Dorothy Schoop almost succeeded October 6 in celebrating her birthday without anyone knowing it, until her co-workers saw the date in *The Bomb-Shell* birthday column.

Theresa Licht, nurse at the first aid station in Group 3-A, celebrated her birthday October 15. Following her close was **Catherine Lindblad**, nurse at Groups 8-9, whose birthday was October 20.

One-two-three-shift. Three-two-one-shift. **Mrs. Nellie Lazio**, formerly at the first aid station in Groups 7-6, is now at the Hospital, and **Mrs. Helen Edwards**, formerly at the Hospital, has shifted to her place.

Let's see (*thinking out loud*), you turn this valve on—that one off—wait for the meter to register 15 pounds pressure—you now open this valve, wait awhile—and begin to time the autoclave. Tick—tock—tick—tock—minutes go by and time is up. Now turn all valves off—let cool. Hummmmmm huh—that's what I did, I did it right. Now why in the world don't this (darn) door open? At this we saw **Evelyn Doran** pulling and tugging on the autoclave door to open it. After trying it again we heard a voice call out, "Mr. Sidell" . . . (no answer) "Oh! Mr. Sidell!" (louder this time). "Yes, can I help you?" he asked, as he gingerly started up the hall to the autoclave room. "The door won't open, I mean I can't get it open." **R. R. Sidell** turned and said "you forgot to open this valve." The next thing we saw Evelyn Doran all smiles again and holding her precious flasks of culture media in her hands she went tripping down the hall to the laboratory. Upon entering she mumbled something like this—"Glory be! I thought I'd never get this out. Glory be!"

James "Jimmy" Hartshorne, who has been a patient at the Hospital for a number of weeks and occupying a ward by himself, was glad to get a fellow partner, **Jess Hartly**, even though it was only for a few days. He is feeling so good now that he wants to go home and beat people—at playing checkers. Thanks go to his mother for the luscious apple squares that she sent to the Hospital.

Dr. L. N. Cohler is being nursemaid to their 4-year-old French-Boston bull dog this week. When asked if the dog could do tricks, he answered, why, yes, he does tricks. He eats, he loves to eat; barks and obeys me. He can even dance, especially if he is offered food. However, the dog has no inferiority complex and follows his own fancy in obeying orders especially with a little bit of encouragement from **Tom Moore**.

A new talent was found in **Elizabeth Russell** this week. Her cartooning ability was brought to light when she donated to the Hospital a complete character cartoon plaque of the Hospital staff. It was good fortune to obtain an interview with the great artist, but every word had to be coaxed from her. It seems she started to doodle at the early age of three, on the wallpaper of her home, but this was stopped abruptly by her mother. Discontinuing her doodling for a while, she later took to drawing and admits most of her drawings were on blank checks. However, she doesn't remember when or who put an end to her drawing initiative. This is when she made her mind up to be a cartoonist. "You see," she said, "I am rapidly approaching middle age spinsterhood and had to do something to idle my hours away while waiting for a catch, and the persons I work with inspired me so much that I just couldn't resist the temptation to cartoon them.

Group 3-A

F. G. TAMBLYN
Correspondent

The master mind of **Alonzo "Red" Buell** is still clicking on new gadgets and devices for more efficient operation of this line. However, there seems to be some question about Red's four missing front teeth; were they extracted by a professional man or did he present his inspiration to the wrong person?

After spending a strenuous week-end, planting fir trees and shrubs, the landscaping around the home of **Robert Walsh** looks much improved.

Allen Ackerman and **Charles Christy** are leaving for the services of Uncle Sam.

All the employees of this group extend sympathy to **Mr. and Mrs. M. Sanders** in their recent bereavement.

Ned "Torchy" Belesio, the walking delegate for the pipe-wrench carriers, is back on the job and looks fit as a fiddle after two days of rest.

The blood-pressure of **Evan Lewis** must be alarming when he has to be accompanied to an EOP party by a nurse.

The boys of this line, including **Albert Bailey**, are glad to see **George Costello, Jr.**, back on the job as efficient as ever after a brief illness.

It is evident that harmony exists in the Inspection Department. **Govt. Inspector Roy Hallihan** and Mr. Walsh, the company inspector, are always seen together.

It cost **Walter "Buttercup" Sipe** exactly $150 to return a smile from a pretty girl. He is now riding on his thumb.

Corp. Cecil Johnson and **Thomas Cerre** have returned from a vacation, destination unknown.

Crawford "Keep 'em Rolling" Kerr can advise how to keep fit and expand your chest. Crawford still has a big chest, but it slipped a little though still expanding.

It was heard that **Jim Hendershot** misunderstood someone who was trying to advise him on the care of his mustache. Instead of buying mascara he bought cascara.

Groups 61 and 1 Praised for Safety

The Ammonium Nitrate Plant, Group 61, has gone nine months without a lost-time accident; in fact, has a perfect record since starting operations. Group 1, largest single group at EOP, joined the EOP No Lost-Time Accident Club for September, and supervisors and workers are being congratulated on the feat.

WAR WORKERS of 1915-19 looked like this. If you want to make a comparison, you'll see Vic M. Dagenais, office manager, third from left in the back row, and in the front row, second from left, T. M. Burns, superintendent of Groups 4-9, and at extreme right, Supt. James J. Murphy, Group 2. The three were employed by the Oliver Shell Loading Plant at Runyan, N. J., during World War I. Mr. Burns was recovering from a motor accident when photographed.

Inspection

ROBERT PIERSON
Correspondent

Robert Wilhemi, assistant chief inspector, is back on the job after a short illness.

Rumor has it that Lorrayne Ostrem of the Inspection Department and two of Mr. Watts' typists of the Investigation Department are seen quite frequently visiting the local socialite spots in Joliet.

Is there any one working here who can talk faster than **Frank Lewis**, Group 1 head inspector?

No one seems to see or hear much about **Bob Schmitz**, head inspector of Group 2, lately. It must be that the little woman has him under control now.

Would someone tell who has more troubles and headaches than **Godfrey Herscher**, Group 3 inspector?

Harold Troupe, gage technician of the Inspection Department, nonchalantly whistles his way in every morning, and is always willing to work late in the evenings.

The boys from the Inspection office agree that **Mrs. Robert Wilhelmi** is quite a pie maker.

Bob Walsh, Group 3-A head inspector, is trying very hard to get his yard in shape before the snow begins to fly.

Al Rosier, inspector in Group 9, is a candidate for Will County Superintendent of Schools in the November election. Al has worked in Groups 2, 8 and 9 and he knows that his many friends wish him all the luck in the world.

Elmer Nesius, head inspector for Groups 6 and 7, is negotiating for an important role in one of the Joliet playhouses. Hollywood, here he comes.

Shift Inspector John Smith of Group 61 blames everything on tough "Irish Luck." All of his men are sons of Erin.

Willy Vail is back after an operation. He is looking fine again.

Famous last words regarding **Edward Vani**, Group 9 inspector. "Have you lost weight or had a hair-cut?"

Mary Jane Clennan looks mighty "perky" these days—could it be the Irishman she encountered in Coal City?

Some are wondering if **June Siebert** has had a "line" on **Bill "Mac" McCormick** since he left to attend Dayton University.

Best wishes go to **Mrs. Stanley Jean**, formerly **Beatrice Crosiar**, on her recent marriage.

Many thought that **"Wally" Gable** was telling a "fish story" when he told all about a spotted adder snake which he had captive in a bottle, but seeing is believing. One of the girls in the shipping room saw it in the ramp and Wally came to the rescue and transferred it into the bottle and bravely displayed it. Now he is wondering how to dispose of it.

Vitamins and iron might be good for most, and all that, but there is one person who says that "too much is too much." He is **Gordon Schroeder**. Gordon tells that he got just a little excess of iron in his foot a few days ago, in the form of a nail. He is now limping around and is having a "devil of a time."

"Bud" Brown has been inducted into the Army and was ordered to leave for service Saturday, October 24. **Glen Sparks** is welcomed to the staff and has taken over the work that "Bud" is leaving. Everyone extends best wishes to "Bud."

Open House Called Success by 800

The Open House activity sponsored by the Employees Activity Committee to acquaint the people from all groups with the many activities to be found operating in the Recreation Building, was an outstanding success. While the bowling alleys, under the supervision of **Eddie Murphy**, were the center of attraction, table tennis and shuffleboard enthusiasts as well as those interested in pool were keeping the equipment going all afternoon and evening.

Enough interest was shown in badminton, one of the really fast tennis games, it is going to be necessary to organize a club and set aside time for play in the gym.

The crowning event of the day was the dance in the evening with an attendance of about 800. The EOP Orchestra, under the leadership of **George Zelke**, made many new friends.

Many requests have been received by the Recreation Department for more of these popular dances on Saturday night. The Employees Activity Committee, however, will sponsor only three dances during the winter, the Hallowe'en Dance, one about the holiday period and one late in the spring. It is their plan to encourage different groups to sponsor similar Saturday night dances throughout the winter.

EOP Lions Invited To Ladies' Night

The Lions' Club of Joliet will sponsor a Ladies' Night Thursday, October 29. All members of Lions' Clubs, either in Joliet or other communities, employed by EOP, are invited.

A chicken dinner will be served at the Rialto Cafeteria at 7 o'clock. **Dr. Rudolph Malek**, world traveler and lecturer, will speak on "The Occident Faces the Orient."

Reservations can be made by calling **Harold J. Cripps**, president, over Joliet 2-8557, or **Fred A. Trehn**, secretary, over Joliet 2-1161. The charge is $1 a plate.

CONTEST DETAILS for EOP's selection of a "Miss Victory" are in the hands of a committee headed by George F. Bent, Personnel Director. Pictured here are the members of the committee, left to right, Helen Shimek, Utilities Department; John H. Lower, representing the Fuze and Booster area; Helen Bardi, secretary; Capt. D. P. Tunstall, Public Relations Officer; John Condi, Group 1, and Mr. Bent.

Personnel

DARA PREW
Correspondent

Since this column has been taken over by the girls, several of the men in the Personnel Building have voiced their apprehension that perhaps they would be excluded from the printed page. That isn't the case, as it is planned to serve all the people all of the time; but if the men don't do things interesting enough to include . . . well!

Pink-cheeked **Jimmy Barrowman** has been voted the sweetheart of the building; especially since he has taken to carrying typewriters the entire length of the building for girls when the need arises and is the champion gum "go-getter."

Then there was the investigator who was hired one day and resigned by the next noon. Since the Investigation Department is under the same roof with the Personnel Department, they've been rather adopted. So when a box, which was identified as confidential evidence, appeared on a desk one morning, the girls just couldn't resist the temptation to open it. They found a live mouse as curious as they. Perhaps it wasn't the same rodent which reposed in the desk of **Marge Forrest** in a box from a typewriter company, either, but it certainly must have been his brother. Marge still avers that she isn't afraid of the little varmints if they'll just stay on the floor.

Elroy "Bud" Kile, who left for Marine Corps base in San Diego, Cal., early this week, came back for a visit one afternoon just before his departure. With his riding breeches carefully pressed and those shiny boots, he was the Bud all knew so well with the exception of that haircut. The girls in the fingerprint division practically took sides debating whether the brush cut was becoming or not. Others in the department had already decided for the "not" side.

Dire threats have been distributed promiscuously by **Margaret "Dolly" Lundquist** to her friends if they let a certain bit of gossip get into the hands of the Personnel reporter. Certainly it isn't known what that could be unless it concerns her avowed choice of Pablum as a breakfast food, preferably when a baby's formula is used over it instead of cream.

Credulous **Mary Cunningham**, whose pet word is "really," with a long drawl, hit the crest in questioning the other night enroute to Joliet. After being told that a celebrity had committed suicide, she queried, "really, did he die?"

From a letter received recently from **Lynn McCoskey** who is now at Fort McClellan, Alabama, it is learned that he has just been awarded a medal for sharpshooting. Of course, he was a trouble-shooter, but this is the first indication of his activity with a gun. He reports that he now has more clothes than he ever had in his life. This must be a slight exaggeration as Lynn was konwn as one of the best dressed men in Personnel.

"One bright morning in the middle of the night" was a perfect quotation for the girls in Personnel one morning last week when they stepped into the rest room. Besides the regular haze, there was a positive blackout as the bulb had burned out and with no window it left the two rooms as black as a hole in Calcutta.

As she looked down at the application of a man who wished to be rehired, one of the girls gasped and then doubled up with silent laughter. It couldn't be, but there it was in green and white—the man had resigned—deceased. However, it wasn't a ghost on that sunny afternoon but merely a timekeeper who had jumped to conclusions. **William Goble Rakes** had been sick but he was still active and kicking when last seen.

Peg Collins found out that trying to be the early bird that catches the worm doesn't always pay. While running ahead of a group of people to clock in she caught her heel in the door and in addition to having a sore heel, she was the last to punch her time card.

A brief report from **Rita Cooney**, as to her short vacation in Erie with soldier-husband **Ken**, was "Heaven and roses, Ken and Erie."

For an anthology it is desired to record **Kathryn Smith's** description of the new rayon mesh stockings. She swings in a sort of sing-song accompanied by a demonstration—a little water on the knee and a pouch in the back, if I wear these they can't have my husband.

Debonair **Gordon McQuiggin** stepped from his pedestal of suave manners the other afternoon to caution **Charlotte Doxsee** seriously, "Why that carbon-tetrachloride will take out the grease all right, but in about two hours it will eat the goods away." For a few minutes there was a perturbed girl as the office watched to discover her reaction as Charlotte had already applied some of the cleaner to a spot on her favorite suit.

While she haunts the room into which the mail comes, **Carmen Steed Oldani** yearns for a letter from husband Jim in the armed forces in Louisiana. Last weekend she journeyed there to help him celebrate his birthday.

No Personnel column would be complete without recounting one of the experiences of the interviewers which they call their causes for murder or how to turn gray over night.

Clement Lambert told of his first one the other day. After carefully interviewing an applicant, Mr. Lambert explained that the man couldn't expect a call before a week or ten days had passed. In reply, the man casually remarked, "Oh, I don't want a job. I'm just killing time while waiting for a friend."

Production Planning

LORETTA RYAN
Correspondent

Lucille Brown of Wilmington and **Helen Cutler** of Dwight are welcomed as new members of this department.

Ray Van Hook left to join the armed forces and, by the way, that's why **Dorothy Mihelic, Mary O'Connor** and **Marie Sanders** have a bit of grease on their faces, a screwdriver ever in hand and a hammer nearby, for they have been forced by Ray's absence to become full-time mechanics. They are also strutting about with new uniforms for the purpose. With the aid of **John Daily** of Wilmington they should be able to carry on successfully.

The Planning Department has found new quarters in the East wing of Administration Building. Everyone seems to be pleased over the fact that there is more space and a tranquil atmosphere of quiet.

Dorothy Bollig, one of the newest members of the department, has been, or still is, a very lucky girl. She took a flying trip to Texas Saturday afternoon to attend the graduation of a friend who received his wings. She returned Sunday—accompanied by said party.

Dorothy Riebert was presented with a lovely gift as a going-away token from her associates who miss her very much.

Much discussion has been going on about the football teams, especially where Northwestern is concerned, because **Dorothy Maxwell** seems to be of the opinion that this university is the winner at all times.

Larry Crawford still makes that weekly trip to LaGrange. Could it be the one and only?

Tommy Burns, U. S. Navy, has written that he is now stationed at San Diego, Calif., and would appreciate hearing from all in the department.

Have you noticed **Dick Court** sailing along like the clouds, light of heart over a certain blonde miss at the Cafeteria. Along with that fact, he hums the tune of Sylvia continuously, and wonders if there is no justice.

Frank Falwell will not auction any more series tickets for the small fee of 50 cents. **Mary McGovern** purchased such a ticket, and was the winner of same, thanks to Mr. Falwell.

Group 1 has two Progress Clerks added to their force, **Alfred A. Remillard** and **Edgar A. Martin.**

Agnes Freuhauf, a former member of the Department, sends her greetings to all, and wishes to thank everyone for the remembrance.

Other new members of the Department are **Benjamin H. Money**, Classification Yard; **John Cann**, equipment checker; **George K. Hayward**, Groups 4-9; **H. E. Dempsey**, Group 3; and **Merritt E. Godwin**, Group 3.

Mrs. Irene Blatnik has become the proud aunt of a new nephew.

George Sangmeister, a member of the department, is running for the office of Probate Clerk for Will County, and would appreciate any votes that are cast for him. From his past record as Mayor of Frankfort, Ill., you can be sure that he is well qualified for the office.

Group 1

JACK BARRY
Correspondent

Jack Barry, Group 1's stirling correspondent, is confined to his bed with pleurisy. A few of the boys in the back room uncovered these choice morsels—to wit and woo woo as follows:

Ode to a Missing Truck Driver

Hail and farewell to **Dan Paunovich**
Our group truck driver, a job in which
He slaved to please people, from top to bottom.
But to no avail—the Army got 'em.

Three of the members of Group 1 Inspection Department sponsored a stag party ($2 per ticket) in honor of some of their boys who were leaving for the Army. Food and drink were promised in abundance and some of the boys say they are still hungry. Anyone who is dissatisfied, see **Dave Rosen**, claim agent.

The search for "Miss Victory" brought the photographers swarming the other day. **Mary Danser, Ophelia Quinn, Emma Sprouu, Betty Marvette, Edith Kesich** and **Bessie Danisen** had their pictures in the Chicago papers and are awaiting the Hollywood talent scouts. The girls held an election October 16 to pick their choice. She will most likely be in the line-up for the judges of this plant to see. If she is the one we have in mind-m-m-m-m.

Marcus Davis, assistant superintendent, was on vacation last week. A-fishing he would go but a-catchin' was no go. Result: Mr. Davis is writing a treatise on "The part canned sardines play in our daily diet."

Congratulations go to **Walter Norman** who has been made foreman of the Drilling and Boostering building.

Pvt. Harvey Levasseur, Co. D., 14th Bn., 1st Platoon, Camp Wheeler, Georgia, (they ought to give soldiers clock numbers so you wouldn't have to write a book in order to address them), writes to his friend **Don Kurbis**, who used to be his foreman, that everything is hotsy-totsy in the Army. . . . **John Policandriotis** is a foreman whom the Greeks designate as *kalla*, which means good. Under pressure to make a quota in September shipping, he pushed his men hard and got the job done much to their own pleasure. The crew of table 6 in his bay shattered a long-standing record on the last day of the month. The men were **Sam Azzarelli, Jerome Benoit, Ed Jesonowski, Bob Lewis, Sam Hansen** and **John Munich.** . . . **Rudy Wirth** doesn't know which side of a baseball is up, but has an uncanny faculty for picking winners. . . . **Frank Kakacek**, who used to live in the trailer camp at Wilmington, has bought a home at the new town of Lidice. . . . **Eugene "Lightning" Holland** keeps a-crying. He wants to go back to Oklahoma and ride horses. . . . **William Hamilton** of Mazon, Ill., is trying for the Air Force and all wish him happy landings. . . . **George Galvin**, foreman of the magazine line, moans that the walnut crop in his area has been harvested by two inspectors, namely, **Harold Canady** and **Michael Keller.** . . . The lads in **Leo Keefe's** warehouse gang gave a purse and a party for **Ted Caldwell**, who left for the Army October 6.

Timekeeping

NICHOLAS BELLUSO
Correspondent

Five more boys have accepted the challenge and have joined the armed forces. They are **Edward Bishop, Robert Vollmer, Everett Quayle, Robert Hartley** and **Oakley Roat.** Edward, better known as "Bish," started out as a timekeeper but is now a clerk in the Posting Department. Quiet and unassuming, he has done good work in the year and a half he has been with the company. Robert Vollmer, good looking and recently married, will leave a lot of friends behind. Bob has been on the staff for nineteen months. Everett Quayle, neat appearing and well liked, will be missed most of all by a pretty brunette from Kankakee. Robert Hartley, good personality and flashy dresser, will be missed by the feminine sex in Group 9. Oakley Roat, who has been plugging away, working nights continuously, got a lucky break by joining the Army. He got to work the day shift his last week. These boys are all a bunch of swell fellows and a great bunch to work with. Each member of the Time Department wishes them all the luck in the world.

Love and romance blossoms even in keeping time. Wedding bells are not too far distant for **Frank Zupancic** and **Doris Tatro.** They have their furniture all purchased and an eight-room house. The bug seems to have hit **Tom Delockery**, who will also take that certain step soon, while **Alice Secor** is expected to be happily married by the time this hits print.

Flowers to **Big Nick Earthly** for the quiet way he goes about collecting dues on Sunday. Merthicolate to **Angeline Gunnerson** for bruising her knee while skating. Compliments to **Emily Kexel** for her always neat appearance. Appreciation to **Dwight Reitz** for worrying about **Eva Sweda's** ride to work. Perfume to **Rosemary Veach** because she is always wearing it. A bowl of stuffed avocados to "time on his hands" **Bernard MacShane** since installation of the dial phone forestalls his chinning with the telephone operator. A tube of shaving cream to **Thomas Tomaszewski**, who, since he stopped taking girls out, goes days without shaving. A big, juicy persimmon to all who think two bits a week is too much to give to the fund for timekeepers entering the armed forces. A pouch of Cupid's arrows to **Milton Treitel** for his continuous fixing of dates for the girls in the Time Office. A string of pearls to **Marcella Corbett** for doing war work while her husband is in the Army. A toast to **John O'Connell**, who is always toasting everyone else. Thanks to **Homer Smalt** for helping me get out this column.

TRANSPORTATION PROBLEMS are the forte of E. J. Egan, superintendent of EOP's railroad, shown at his desk at Richards Farm.

Utilities

HELEN SHIMEK
Correspondent

Electrical Epitomes
By Ray Charles and Dan Webster

Some wise guy said, "Continuous drops of water will wear away a stone." Thus, after much persuasion, the Line Department has reluctantly and ruthlessly torn asunder the veil of secrecy which has so long surrounded it and here joins the Electric Shop in the Utilities column.

October 10 was moving day for the Bonding Department and Line Department. They are now located at their new quarters in Group 70. The Line crew say they will miss the old place on Hayden Farm, but that the new quarters are not so bad—just too close to the "Narrow Backs."

With tears in their eyes the Line Gang said farewell to one of their oldest and hardest working members, **John Wagner,** last Saturday night. He is a chief petty officer. John left October 20 for the Construction Battalion of the Navy and the party was held in his honor. The gang presented him with a gift as has been their custom when one of their members leaves for the armed forces. **Tex Bunch** left in August to join the same branch of the service and is now on his way to (censored) outpost to begin work on new bases for the Navy.

Forrest Reeves left October 15 for the Navy service of Seabees.

Although the Line Department always call the inside electricians "Narrow Backs," it is gratifying to announce that they have moved into the Electric Shop neighborhood. Now they are close by for necessary information.

The Electric Shop claims the title for the handsomest and best dressed man should go to one of their number. **Sherman Hendrick.**

Some interesting tales are reported by **Carlos "Flying Richards** about his trips with the Civilian Defense pilots.

John Follett was called to the Air Corps camp in North Carolina to see his son who has been ill.

Transportation Tales
By George O'Reilly

Just got back from a grand trip spent in "Ole Miss." Had a wonderful time down among the "you-alls." Visited the Army air base in Columbus and got a real thrill seeing so many planes at one time and also so many cadets and officers. It sure makes one realize what an important job there is at home to support these lads who are flying day and night in order to build up the greatest air force in the world.

Was very much surprised to see **Bunny Arthur's** waist line still expanding. He was going on a diet, but he's getting like the women—no will power.

Supt. E. J. Egan attended the Stanford - Notre Dame football game and, of course, was very happy with the outcome.

Robert Peterson and **Ernest Raunser** are contemplating going to see the Iowa Naval Cadets play Notre Dame at South Bend. Of course they will have feminine companions.

Fred Strobel, train dispatcher, is leaving and will be succeeded by **Maurice D. Denbo.**

Howard Stockum, regular first trick dispatcher, is vacationing in the general vicinity of Chenoa, Ill.

Sheet Metal Shop
By Jess Thomas

Mr. and Mrs. William M. Ryan recently held open house at their home in Joliet in honor of their silver wedding anniversary.

The entire shop sympathizes with **Don Haines** in the loss of his mother.

Clarence Ryncarson, blacksmith, has decided that his new power saw is just not made for delicate operations. Manicure scissors might be a little more appropriate for trimming finger nails.

Motor Pool Memos
By Frank Kern

Wonder why **Bill Handlon** says he worked last week for nothing. Couldn't have been that trip to Lemont last Thursday night?

Wanted: Someone to challenge **"Bim" June** to a marble contest.

Ernie Steinbach has recently been made superintendent of the Yards. He changes flats and cars now.

"O.K." Hatting is quite a fireman. He's trying to find a substitute for fuel oil, but has been unsuccessful so far. Water really doesn't work so well. **Frankie Zembruski** isn't a bit worried about the Army. He's being drilled daily by Mr. Hatting with a broomstick.

Tom East is transferring to the Classification Yards.

Radio Ramblings
By Kathryn Richardson

Lt. Glenn Johnson of the Army, former Radio Department employee, has joined the ranks of benedicts, it is reported.

There is a war stamp pool at this department each week. **Ken Storch** was overheard asking **Clarence Coope** if he wanted to "get into the pool." "Do I have to bring my own soap?" queried Coope.

Ed Soulon brought that big green job (his Packard) out to work the other day. Many eyes looked longingly at it and one employee remarked that to own just the seat covers would make him happy for a week.

Labor Pool Logs
By Edwin Geeding

'Tis reported the EOP Fellowship Meetings have proved financially successful for the **Milford Green-Jack Watchorn** combination. Nice work, if it works.

The Labor Pool extends it's wishes for a speedy recovery to **Thomas Scott,** labor foreman, who has been very ill in a Joliet hospital.

Eddie Geeding, clerk, has been accepted by the Navy Construction Battalion, the "Seabees," as petty officer third class, and is now on inactive duty awaiting his call to active service.

Claude Sayre has finally found a way to his wife's heart. He just buys her a few bantam chickens. Well, the dog house has been empty for some time, anyway.

Why does **Edward Kocielko** have such a forlorn look on his face these days? Could it be that the women just aren't to be found in the "boneyard" at Group 70 like they were at the Fuze and Booster Area? He should take heart, they'll be there eventually.

Locksmith Shop
By "Doc" Craig

"Tim" Thompson has been a fancier of fine poultry for some time and now has a considerable flock of his own. According to "Tim" these birds are real egg producers. With the rationing of meat almost certain, "Tim" says boastingly that no one need go hungry as long as he has any chicken left.

Bus Transportation
By Seveno "Sweeny" Leggero

Ray Pratt, mechanic, has been visiting down in old Missouri.

Wonder why **"Sweeny" Leggero's** hair is turning grey the last few days. Could it be because there are five girls learning to drive busses, oh, boy! You can hear him saying, "left turn, right turn, back up, look out, oh, gosh, this way not that way." The new bus girls are **Tillie Davis, Pearl M. Raridon, Margie P. Stevens, Edith Cerre** and **Eunice Mantia.**

"Lucky" Davis gave **F. J. Aster,** bus transportation superintendent, a song book. Now you can hear him croon, "Look out, Bing Crosby."

John Hennessy, dispatcher, always keeps mumbling something about horses. Wonder if he is a farmer.

Pete Peterson, the Bus Dispatchers motto is, "get them in and get them out."

Eddie Koerner has enlisted in the Navy and is waiting call.

Service Garage
By S. J. "Kelly" Kukulski

John F. Enrietta was scheduled to leave the "Royal Order of Bachelors" October 24. He has heartiest wishes for a very happy and successful married life.

Uncle Sam is calling, so several more buddies are ready to hede that call. Those scheduled for induction are **"Tony" Kuzma, Clyde Sheridan** and **Bill Barr.**

"Buck" Rogers and his night crew in the body shop are right on schedule with their truck refinishing project. Some ask if they can keep up the pace. Well, two will get you five if you think they can't.

Joe Szwja has acquired an extra title, that of rubber administrator, and one of his recent duties in that *capacity* was to estimate the approximate mileage remaining on each tire. Imagine him looking over a tire that was vulcanized in eight spots and worn down very smooth and then putting his approval of 2000 miles on it. Wonder if he meant that it could be lugged around for 2000 miles as a spare? Joe may have an answer in the next issue.

Did you know that:

Ralph Groll looks very dignified when wearing his glasses. . . .

Francis Rabe and **Lionel Senesac** have a weakness for chicken. . . .

Harry Laubhan and **William Booker** have started smoking cigars (cigars don't care who smoke them nowadays!) . . .

June Wood is the *toughest* person to get riled-up about anything. . . .

Jim Stuver is going back to the land as a gentleman farmer. . . .

Leroy Hutchinson and **Joe Gutierrez** are musicians. . . .

Robert Watts does fender work and cooking as side lines. . . .

Jimmie Wilhelmi is a farmer at heart, and **Paul Swisshelm** an aviation mechanic. . . .

"Heinie" Johnson is still collecting some of his winnings from the recent World Series?

High Explosives

MARJORIE HOWERTON
Correspondent

I haven't fully recuperated from all the activities in which I participated during open-house October 10. After bowling so many lines that I reached the point of having to be picked up off the floor every time I lifted a bowling ball, I foolishly indulged in several games of shuffleboard, ping-pong, and pool. Wow! What a day.

Bea Bovee has acquired a new hobby, but she won't reveal it.

Group 66

Paul Lester was spotted in a jewelry store recently purchasing what looked to be a '43 model wedding ring.

George Attaway, Inspection Department, submitted to a medical examination October 7 and it *wasn't* for insurance.

Ray Offermann, material checker and "duck" salesman, left for the service October 14.

By the appearance of the "aileron fenders" on **Vic Skorupa's** car, he's taken up flying.

George Hatting reports that amusement is rather hard to find, now that it's getting too cold to fish.

Bill Cota spent his last week's check for storm windows and long underwear.

It may interest you to know that "66" now supports an innovation in the way of a "Jam Band." These boys can really go—they read 'em, fake 'em and their theme is the "Box-Car Blues." You should hear them swing it. Tops was reached when a fellow by the name of **Joe Morin** joined up recently. Joe is a natural born "swingster" and he wasn't born yesterday either. He has trouped with the best of 'em and can bark "licks" on his trumpet faster than a cat can lick milk. The page never gets so cluttered with hen tracks that Joe can't straighten 'em out, in fact he can even write 'em.

The three-piece "Box Car Band" covers a list of instruments as long as your arm, such as trumpet, sax, clarinet, bull fiddle, guitar, violin, trombone and vocals. Sessions will start soon during the lunch period.

MODERN LABORATORY technique is utilized by EOP's Water Department in assuring a plentiful supply of pure water. Supt. J. W. Stark (right) is pictured here watching Waldo Weaver (left) and Eugene Dowell run one of their frequent tests.

It is rumored around 66 that **Homer Peters** of Group 63 is landscaping his premises, which is a splendid gesture. However, it is reported with regret his misfortune of falling into his sunken garden.

Some unidentified malady has overcome **Bill Zarley** of late. A change of diet might help.

The inspectors here are still in the dumps since last Saturday's Illinois football game.

Barnyard golf and flyball are occupying all spare moments during this beautiful Indian Summer.

Earl Hunt is catching up on his "home-work" before leaving for the Navy. With reference to the seven-day week proposition—as a matter of choice between work here and at home, the boys are voting for EOP.

Group 68

Lucky winners of Group 68's War Bonds for the previous two weeks were **Irving Bovee** and **Lynn Wade.**

Group 65

Leonard "Frenchy" Guenette is recuperating at St. Mary's Hospital in Kankakee and wishes to thank the fellows for their kindness and generosity. **Sparky Adams** is losing weight rapidly Wonder why?

Group 63

Ed Oard has left for the Army—he was presented a cash gift. **Leonard Johnson** is the new night foreman here.

Andy Perino will surely look into the cans labeled "fly spray" before he trades again. Imagine trading three empty cans for what was supposedly a full can of fly spray, which incidentally was filled with good old aqua.

Here's one for the books! An innocent bet was wagered between **Elmer Zost** and **Frank Perino** on the World Series. Losing was such a shock to Frank that he walked out the door without the aid of his faithful crutches.

Otha Lewis, Knut O. Axelson, Robert Askew and **John Austin** are members of Uncle Sam's Army now.

Group 66-A

Sound the trumpets for the boys at 66-A. They've gathered keys for the scrap drive and the last count was way up there in the hundreds.

"Pop" Redmond's little finger recently saw sunlight for the first time in three weeks.

Art Skorupa, baby of the Igloos, was taken to the last game of the Cub-Sox city series by **Guard Flash Gordon.** The game was enjoyed immensely by both, since they are rabid Sox fans. They were accompanied by a Cub fan, **Vic "Buttercup" Skorupa.**

High Explosives Laboratory

John Snyder and **Charles Clifford** have been suffering with severe colds. Their condition is not believed serious, but on the other hand, pneumonia may set in at any moment.

Nobody thought he'd make it, but **Palmer Overholt** finally caught the 9:45 train out of Chicago last Saturday morning and went to Columbus to spend a couple of days with his family.

The Ford Teeters are looking for a new home—a job with hot water, they hope.

After covering some very rough territory, the course of true love is running smooth again for **Ellis Steinberg,** Government inspector at the lab. (It may get rocky again if the girl hears Steinberg and **Assistant Chief Ray Hybarger** getting together on those gobstick duets.)

The **Charles Bridwells** and the **Jess Kinsers** saw sights at the L. and L. Club in Chicago recently.

Speaking of musical geniuses, **Alexander B. (B. for Bilious) Becker** isn't one on the trumpet.

Rosemary, the collie who spent several happy months at the laboratory and then sojourned for a spell at the Administration Area fire station, is rumored to have welcomed fourteen little strangers to her nest.

Speaking of nests, **Nelson Tippett's** landlady (poor, long-suffering woman) thinks his room looks more like a nest than a human habitation.

Vern Holder and **Baron Rothschild,** with a party of friends from Columbus, are attending the Northwestern-Ohio game in Chicago October 24.

Marcia Mitchell, who's been slaving on the midnight shift, arrived at a party one night recently just in time to greet the departing guests . . . hail and farewell.

Guards

GENE RYAN
Correspondent

Corp. Orville Warren, veteran Guard Department employee, has entered Officers Training School. All wish him the best of luck.

Guards Byron Culley, Lincoln Linn and **Ira White** have been called to the armed service, all qualified men who will perform their duty well.

Several of the boys enjoyed the last EOP Fellowship Meeting and are awaiting the next one. Their joint approval has enticed more of the boys for the next one.

Dispatcher Carl Kornmeyer has been walking around headquarters in a daze since the last issue of *The Bomb-Shell.* He made arrangements to have the photographer take the picture of the dispatchers, and he was to be one of the boys in the picture, he had a fresh haircut, clean shirt and new tie, but when the photographer finally arrived it was Carl's day off.

Sgt. Frank Butala in the barber chair:

Barber: "Shall I go over your face again for a closer shave?"

Sergeant Butala: "No! Just wipe the tears outa my eyes and lemme outa here."

Some of the sergeants have had to be content with a little ribbing of late. It seems that a group of dispatchers defeated them in a bowling game recently.

OFFICIAL UNIFORMS are now being worn by girl employees in the Ordnance Department. Shown here, being inspected by Lt. Col. Don M. Hoffman just before he retired as EOP's commanding officer, left to right, are: First row: Betty Wilhelmi, Anamarie Schroeder, Florence Babecke, Kathryn Reubart, Ann Melovic, Margaret Jesberger; second row, Bess Moore, Ann Kulpa, Helen McGinnis, Ethel Dirker, Josephine Kush and Dorothy Olson.

Ordnance

HELEN McGINNIS
Correspondent

Everyone was sorry to hear of **Lt. Col. Don M. Hoffman's** leaving, for he was a friend to one and all, the only compensation being the appointment of **Maj. K. M. Haber** as Commanding Officer. He's a fine fellow, a good soldier, and will fill the bill to perfection. A hearty welcome to the Elwood Ordnance Plant is extended to Major Haber.

The armed forces have claimed some more of the boys, **Harry Wiseman, Walter Murphy, Ray Coesfeld, Lyle Ingraham** and **Robert Kasten.** Sincere best wishes go with them, and word from them will be eagerly awaited.

Well, the gals have done it . . . yep . . . it's salute, saluta or what have you . . . the uniforms are here, and the girls look swell . . . don't you think? . . . They sort of lend an air of dignity to the Ordnance Department now . . . not sayin' they weren't always dignified . . . (*remember whoops my dear*). . . . Talking of uniforms . . . there was sure some commotion when **Ann Melovic** of Mail and Record walked in . . . they couldn't decide whether she was a WAAC or a WAVE . . . but we know, don't we? . . . and believe me, we are proud to be members of the Ordnance Department.

Catherine Stortz is doin' some worrying lately . . . she can't figure out who **Mel Houston,** the teletype operator, gives all his apples to now . . . how about getting Scotland Yard on the phone? . . . If you'd like to get rid of those five o'clock blues, ask **Charlie DiLorenzo** for a ride home. . . . That bunch will sure blast your blues away . . . and that ain't all.

Betty Kovach was very much "put out" when the gals in the Auditing Section decided that they didn't want her to wear bangs . . . ask her about it.

Mary Scahill of Stores and Transportation is getting her sleep these nights . . . yep, you're correct . . . the one and only is in the Army . . . Mary has lots of pals in the same boat . . . Me included . . . (sh—sh—that was supposed to be a secret).

Everyone had a good time at the farewell party given for **Harold O'Keefe,** who joined Uncle Sam's mighty Air Force. . . . Wonder when **Claire Shols** will stop getting her Rays mixed up . . . and sun ray isn't meant, either.

Didja know that **J. E. "Ollie" Olson** calls his gals and guys by these names: **Vera "Gussie" Gussman, Patricia "Patty Cake" Haley, Hazel "Rollie" Koller, Anamarie "Peanuts" Schroeder, Dick "R. F. D." Dean, Charles "Wacky" Wachendorfer** and dear **Dan Considine "Danny Boy"?** . . . By the way, have you ever heard Dan tell those dialect stories of his? . . . they are a riot. Now for the flash of the week . . . they have nicknamed me "Maggie" . . . why, only the boss man "Ollie" can tell.

Johnny Phelan, that slow motion gentleman from Property, can sure tell a good looking blonde a mile away. . . . Heard that **Sy Kurantman** had a good time at the theater the other night—"Junior Miss," wasn't it? . . . **Ginny Harrod** has a keen picture of her boy friend . . . he should be in the movies instead of the Army. . . . Everyone sure was glad to see lovely blonde **Helen Weber,** the amiable escort, back in the fold again, after a sojourn in the "lines" . . . did you ever notice her dimples? . . . If you noticed a lot of the girls limping around last Thursday it was due to the bowling season being opened . . . several of the girls have formed a bowling league and are going *hot* after that prize money.

From the Tick Tock Timekeepers

Frank Bravato is now the new chief time inspector . . . **Dave Horwich** resigned to accept a position in Chicago . . . **Ed Reichert** can be seen these days huddling in a corner with a pencil stub in his hand—he is preparing a 15-minute speech on "How to Sleep on a Windy Night." . . . Complimentary passes may be obtained from the Time Office . . . that ought to be good, no??

The welcome mat is spread for **Anita Cleveland, Rita Lipotich, Dorothy Johnson, Beverly Bell** and **Dorothy Setina.** . . . Everyone will be calling **J. P. Zagade,** "Ziegfeld," after viewing the lovely ladies of the Timekeeping section.

Lorretta Franke had a group of the kids up to her house the other night for a picnic supper . . . weiners and buns . . . cider and doughnuts . . . were on the menu . . . sure was a swell party from all reports.

Have you heard . . . **Frank Levanduski, Clark McKeehan** and **William "Pappy" Henderson** were wandering around near the city limits the other Saturday night??? . . . Clark portrayed the hidden talent of "Paderewski" when he banged out a tune or two for the boys. . . . Also **Ann Gubbins** is quite a drummer . . . a Conga would go good.

There has been much rivalry over the best-looking haircuts in the Timekeeping Department . . . so far **George Stevens** and his G I haircut is in the winning section . . . but **Eddie Reichert** with his soft waves is running him a close second.

Off the Beaten Path

Wonder why **Helen Harmon** doesn't smile any more?? . . . did someone break her dolly? . . . **Kay Rosenbaum** had quite a conversation with **Francis McCarthy** of the Army the other night . . . via long distance . . . wonder if Kay told him all? . . . Have you ever noticed how strong **Lt. M. G. "Brandy" Brandon** is? . . . yeah . . . he gets that way by "romping" in the woods . . . nothing like exercise, is there?? . . . **Lt. D. A. Yeoman,** "Dale" to his friends, usually accompanies him on his "Tarzan trips."

Well, well . . . the gals are going to have a recreational program . . . reading it over there was calisthenics (or words to that effect) . . . immediately I put a little red mark there 'cause since the uniform situation I find that a few extra pounds make an awful difference . . . so beware, dumbbells . . . here I come.

Ordnance Inspection

GERALDINE M. WARD
Correspondent

Lt. Carl E. Beilharz prefers titians to blondes or brunettes. Lest it be inferred that the sale of "Henna-Pak" is attempted, let it be known that the reference is to natural titians.

Chief Inspector William F. Douville and **Divisional Inspector Paul R. Smith** visited the Savannah Ordnance Depot on October 12. They reported the trip uneventful, except for the inconvenience they experienced in obtaining a room for the night. There were no hotel accommodations at Savannah, which necessitated their driving to Dixon, Ill. Upon arriving at Dixon they discovered no available rooms. Mr. Douville settled for a cot in the hotel office. However, Mr. Smith was more fortunate in securing a bed from an elderly gentleman who was sympathetic when Mr. Smith confided that his new baby daughter had him walking the floor the previous night.

NATTY in her uniform is Margaret Jesberger, secretary in the office of the commanding officer.

Reluctant farewells were bid to **Dale Lorentzen, Ralph Weiss** and **Bernard Kapsch,** who joined the Navy. Each were presented with a "buddy" kit and cigarette case from their co-workers, who wished them smooth sailing.

Lois Martin and **Rose Haley,** who joined the office force October 1 and 8 respectively, are welcomed by their co-workers.

Helen Boula and **Ethel Dirker** were the first girls in Ordnance Inspection to don uniforms, and they looked stunning.

Jerry Shirtino is quite a chef, especially when it comes to Italian dinners.

Bernice Shroba, mimeograph operator, was missed when she was absent due to illness.

Kermit Long, assistant divisional inspector, is conducting classes in connection with the training of girl inspectors. Particular notice was taken that he is quite concerned over his personal appearance before leaving the Divisional Office for classes. It was heard that one of his pupils presented him with a huge red apple.

The girls in the Inspection Department are very much interested in the activities offered by the Recreation Department. Despite the fact that lunch period consists of one-half hour, they manage to play a ten-minute game of table tennis, shuffle board or bowling. These sports are very efficiently coached by **Myrna Faris,** women's recreational director, who hails from Texas.

The other morning it looked as though the boys in Group 61 were getting in practice for the football season. There was quite a scramble as to who should carry the mail to the box. **Joe Motta** was badly bruised in the rush, but he says it was worth it to get a glimpse of the new mail girl, **Betty Ross,** who is replacing **Ralph Weiss** in delivering and collecting the mail out in the groups. Since Betty is on the job, the mail is coming in so fast that girls in Mail & Record will be requiring assistance.

It Happened One Night!!!!!

Clara Wehner and **Linnetta Parry** were enroute home after working late at the office. After the driver of the station wagon had discharged one of his passengers, **Geraldine Ward,** he accidently drove into a closed road near a cemetery, in an attempt to get back on the highway. The station wagon became imbedded in mud and it was necessary for the driver to call the plant for assistance. The girls were left alone while the driver was in search of a telephone. Being late at night and so close to a graveyard, they naturally were upset. They started out in search of the Ward residence, but in the excitement, and neither of them being Jolietans, they could not recall the Ward address although they were but three blocks away. They were exposed to the elements and were thinking how good a warm cup of coffee would be. In the meantime, Clara's roommate, **Helen Harmon,** became alarmed over Clara's absence and telephoned **Stanley Eisler** at 1:30 a. m. When the telephone rang, Mr. Eisler became excited and leaped out of bed and stubbed his toe. Helen said, "Mr. Eisler, do you think Clara has met with an accident?" Mr. Eisler said, "I don't know, but I d—— near broke my toe." Mrs. Parry was somewhat upset because she feared her husband would be worried over her absence, but when she arrived home he was snoring loudly and she didn't know whether to awaken him and tell him of her plight or to drench him with cold water. He was in the doghouse for several days. (*All this over a little mud.*)

Mr. Douville was the lucky "winnah" of the War Bond for the October 15 pay day.

Margaret Kertes, inspector, Group 8, is making a tour of the Fuze and Booster Area. The inspectors in Group 8 wonder what frightened Miss Kertes when she opened a desk drawer. Could it have been a mouse?

Wedding bells will ring for **Georgia Byrd** and **Park Paxton** the latter part of November.

Andre P. Lombardi, inspector, Group 1, is always so much more cheerful after he has had his Chase & Sanborn kiss each morning . . . *with sugar.*

When you see the Government girls of Group 9 coming to work under tons of good food, you can be certain they're on **Wally Zukowski's** shift. It seems they believe the saying "The way to a man's heart is through his stomach."

Want to see something really cute? Go to the Joliet Court House some evening about 10:30 and study **Mary Benac's** technique in saying goodbye to her fiance before leaving for the midnight shift. Woo-woo!!!!

Group 9 has welcomed many new inspectors in the last few weeks with more on the way, and you can bet your boots they will agree with all the "old timers" that **E. J. Nemanich** can't be beat for a swell boss.

Congratulations and best wishes are in order for **Margaret "Butch" Saloski,** who became **Mrs. C. Olsta** October 10.

Doreen Birr seems to rate OK with the fellows in blue and white, as seeing is believing if you happen to be down River Street way in Kankakee.

It's a pleasure to go to Group 9 any day and be met at the door by that little ray of sunshine, **Lea "Jigger" Dalton.** Her motto is "a little smile will go a long, long way," and it sho' works. Her co-workers all think she's tops.

Group 5 welcomes the following new Government inspectors: **Lorna Haller, Jean Gunderson, Catherine Cyphers, Margaret McGawan, Ann Jansky, Therese Balck, Ann Balck, Evelyn Slater, Carolyn Cleaver** and **Agatha Drager.**

Naomi Apgar has forsaken her trips to the farm suddenly. Could it be because of someone's diverted interest to that belle of Jones Street?

Horses with black wavy hair and blue eyes prance through the dreams of **"Ivy" Wellman.** Anyone with a charitable heart and owning such a creature will be warmly received at the Group 5 inspection office. Flash—just heard of a hobby horse with five good tires for sale cheap.

Milt Krissman, Group 5 inspector, is nursing a fractured toe, the consequences of a bowling match at the Recreation Building. He says the ball *jumped* off the rack. Ha!

Helen Zivic and **Helen Skumanick,** Group 5, are making a five-week tour of all the other Fuze and Booster groups.

Eddie Kluza, assistant Group 5 inspector, has all the feminine hearts a-flutter. His zuit suit is the combination of a real pleat and a snuff cuff.

A lot is heard about sister teams and mother and daughter teams, but a good illustration is furnished by **Lea Dalton,** Group 9, and **Elinor Lea Gudath,** Group 5. You wouldn't know, but they are mother and daughter. You pick which is the mother and which is the daughter.

Phil Horwitz, acting assistant Group 5 inspector, has suddenly lost his glamour. Could this be due to his making up his mind about the only one, a very nice girl from Joliet?

Sympathy is extended to **Mildred Ashley,** inspector, Group 4, in the loss of her father, who died October 10.

George Attaway, Groups 64-66, was inducted into the Army October 21, and all wish him the best of luck.

"Miss Victory" of EOP to Be Selected

(Continued from Page 1)

cluding the quality of her work, her character and her attitude. Secondarily, consideration will be given her activities in outside patriotic programs, such as the Red Cross, U. S. O., Civilian Defense, Servicemen's Canteen work."

Any girl employee of EOP is eligible for nomination. Be certain that her name, group identification and clock number are included with your reasons for believing she should have the title of "Miss Victory."

SEVENTY STUDENTS from the Rock Island Arsenal, Rock Island, Ill., are shown arriving at the main gates on one of their periodic visits for inspection and instruction.

Groups 4-9

Fuze-Booster-Primer and Detonator Lines

JUANITA HARTER
Correspondent

Group 4

Leading dental dispensers are missing a bet by passing up **Loretta Delaney**, "The Belle of Manhattan." The gleaming smile she uses so freely even makes those gawshawful badge pictures look like a Hollywood press agent's daydream!

Nino Lewis, Group 4, is a little worried these days about her husband, **Lester Lewis**, who was recently operated on. Lester is employed in Group 1.

Isabel Miller of Group 4 is having quite a time keeping her mind on her work these days, because in another week she will become the bride of **Bud Nickel.**

Rena Reynolds, inspector in 4-14, is going to Harrisburg for the week-end.

Mary Campbell is leaving Tuesday for New Jersey, where she will become the bride of **Albert Drazy.**

Dorothy Stahler of Group 4 and her daughter are leaving over the week-end for Cincinnati, O.

Dorothy Vehrenkamp, former office girl of Group 4, has returned to her home in Minnesota.

Gerry Morris is now a sergeant's wife since hubby got a promotion. He is in the U. S. Army Finance Corps, Camp Crowder, Missouri.

Bernadine Hughes, the strong arm girl of Group 4, is slowly but surely developing a lot of muscle on the material truck. Says she's ready to give Atlas lessons now.

Harriet Porter, otherwise known to everybody as "Aunt Harriett," had her tea leaves read recently. There seems to be quite a bit of money involved in her near future.

Betty Russell, forelady in Primers, spent two weeks in Oklahoma visiting her boy friend. Betty has been very jubilant since her return. Did she change her mind?

Group 5

Foreman Joshua Garlick of 5-14, dubbed "Pop" by his loyal crew, was as pleased as a pointer pup last week when the "kids" surprised him with a hand-tooled wallet for his birthday. With his usual twinkle when thanking them, he suggested that they could *fill* it for his next surprise!

Joseph Sqellati and **Charlie Boyse**, firemen at No. 5 Boilerhouse, take great pride in their title of championship housekeepers. Their concrete and equipment usually shines like a bride's kitchen. Gee, if they could only cook!

Group 5 comes to the front with their much vaunted "Super-Supers" bowling team, composed of **Edward Burns, John Lower, Don Leonard, Bob Welch, William Lipsey** and **Jack Dempsey.** They have flung their challenge to the four winds, but it's liable to bring back a blizzard.

Demure little **Adalyn Frederich**, forelady at 5-14, received a lovely purse from "The Gang" on her birthday, October 6.

Joe Schuster, Group 4, and Jack Dempsey, Group 5, had a hectic home-coming down at Illinois for the Minnesota game. Murmured Joe, "After three blowouts, a small wreck and a large headache, upsets were no novelty to *us!*"

John Chladek, foreman, thought he was getting a swell table supper. He had the spoon, dish and crackers. He also had what he thought was a thermos jug of chili. When he finally got it open, with the help of three fellows, like Old Mother Hubbard, his cupboard was bare.

Martha Gibbons is walking on air these days, since her boy friend from Fort Louis, Tacoma, Wash., phoned her.

Harvey Studer is still flustered over the coming of his new daughter, **Nancy Lee.**

Harry Smith, Group 5, returned to work Tuesday after a month's illness.

Ronnie Carlson has a sparkle in her eyes these days. It may be on her left finger soon.

The Primer Room, Group 5, is looking forward to the day when **Mary Ann Culick** will return to work after her recent accident.

The girls of Delay Building presented their forelady, **Eleanore Fay**, with a bouquet on her fifth wedding anniversary.

All miss **Audrey Moisant**, inspector, who is ill.

Lorraine Kerouac, who was ill for three weeks, has returned.

Delphine Harsted left her work here to live in California.

Congratulations go to **Nora Doyle** on her recent marriage.

Wedding bells will soon be ringing for **Charlotte Wielock.**

Did you know that **"Marsh" Marshall** is an excellent cook? Just ask any of the boys who attended his Italian spaghetti dinner the other evening.

"Wild Bill" Watt and **"Sweetie Pie" Noble** have a quaint version of the story about "Little Red Riding Hood."

Midge Weir is wearing bows these days. She hopes they are contagious.

June Handley of Odell is leaving Friday. The following week she is going to California and there are rumors of a wedding. The fellow who must be getting all of her attention is **Bombardier Bob Kesslar.**

Edward P. Purns, assistant superintendent of Group 5, is now a resident of Joliet. Chicago's loss, Joliet's gain.

Group 5 has a real "Abbott and Costello." They are **Ray Turner** as Costello, and **Art Myers** as Abbott.

Did you ever see **Rose Di Salvo's** nails? They're real, too.

Ann Bartholme, secretary to **Eddie Burns**, surely is afraid of mice.

Jim McCauley plans to leave in December to try to be an army pilot.

Many wonder what the excitement was around **Frances Ransey's locker.** Could it have been the arrival of **Brenda Startz, Jr.?**

Group 6

Eddy Liebelt, foreman of 6-4, looks a lot like those oomph lads the Arrow Collar people used to doll up their ads with.

Lucille Hritz is in St. Joseph's Hospital, Joliet, Ill., recovering from an appendicitis operation.

Farewells go to **Ida Smith, Mary Swanson, Mary Kuna, Cecelia Cheffer, Bob Benjamin** and **Bernard Smith.**

And—welcomes are due **Hester Cheatham** on a new matron in the change house.

Have you noticed **Paul Gay's** crew haircut? It's grown at least one-sixteenth of an inch in the last eight weeks, says Paul.

Remember the Group 6 Victory Dancing Party to be held at Dreamland Ball Room located five miles west of Kankakee on Route 17, Saturday, October 24, from 9 to ?. Music by Weber Rhythm Masters. Admission, $1.50 plus 15c tax. The proceeds are to be given to a worthy cause, so help make this party a big success.

Clifford Marlett, 6-2, was inducted into the armed service last week.

TRANSFERRING to the U. S. Employment Office in Chicago, Bess Moore, shown here, will be missed by the Ordnance Department, for which she was chief, personnel, for 19 months.

Group 7

When Hitler is only a dusty name on a tombstone, and Hirohito has been stuck for the drinks by "Harry Carey" . . . **Al Nahas**, "The Paint Shop Impresario," need never worry about a job. It is reported that he is a warbling wonder, and as nutty as a Christmas cake, so Crosby and Hope had better begin to look to their laurels!

Earl Schmalz, 7-2, is thinking seriously of asking for a Service Flag for his department, as quite a number of the lads now serving came from "the south end of Seven." For instance, **Frank Taylor**, U. S. Medical Corps, is in North Carolina, and **Corp. Earl Smith** of the U. S. Medical Corps is in Arlington, Calif. They would appreciate cards occasionally from the "Old Gang."

Well, the poor abused ducks are gonna get a well deserved break this week . . . **Herb Cracraft**, 7-3, is going hunting. . . . From the bag he brought back last trip, Herbie musta been usin' rejects!

It has been heard that **Eva "Smitty" Smith** can bark like a dog, **Gracie Ross** has acquired a new walk, **Masie Chamberlain** is cutting a wisdom tooth, **Kay Larson** is leaving soon, lil' **Gracie Muller** is called "Sooner," and **Terry Drancik** has an "owl" look but says she doesn't give a hoot.

Isn't this a *capital* idea! **Sylvia Titrant** is visiting her folks in Springfield this week-end.

Nelle Barnett is out in Arizona.

Helen Walick is vacationing in Florida.

Bertha Koehler's husband, a former EOP employee is home on a ten-day leave from San Angelo, Texas. On the other hand, **Henrietta Ellberg** is visiting her husband at Fort Riley, Kansas, for a week.

Congratulations go to **Robert "Chef" Sweetland**, who is the proud father of a five and a half pound daughter, born October 9.

Jimmy "Keep 'Em Flying" Batson left last week to report to Pre-Flight School in Iowa.

Is the romance between **Viola Van Meter** and the "lad" from the Canal Zone serious?

The girls are wondering if **Orpha White** is really crazy about pork sandwiches.

Mary Jane Pucel has a new ring on her finger, and it's not just a friendship ring.

Mrs. Dot Boldak is back at work from a recent honeymoon and happier than ever.

Ange Terzick and **Dick Leighty** are the perfect couple.

Ed Hemmerlle from the paint shop left to join the Navy. Lend an ear and **Margaret Davis** will tell you a story about an operation. When it comes to eating, **Genger Bortoli** has a theme song, "Meat and Potatoes."

Dorothy Bick has gone knee high with a pair of bright red socks.

Dorothy Blanco's birthday was celebrated with a huge cake and she received a very lovely gift from the girls.

Helen Du Lany spent the week end in Davenport, Ia., with her folks.

Mary Shekey left October 17 for Florida to join her husband.

Group 8

Anyone desiring to know that "certain technique" of changing flat tires in wee hours of the morning is referred to the assistant superintendent of Group 8, **George Elum**, and his book on changing tires, page 42. **Joe Basinger** might be of some help?

Jimmy Dvorak shouldn't deny **Margaret Cacello** her desire, a cornstalk corsage and pumpkin banked altar when they say the "I do's" October 31.

Everyone hopes **Al Mandrella** doesn't get sick or lose any time because it really keeps a fellow busy when he has eight little mouths at home to be fed.

Cecelia Grzegorek became **Mrs. Wilbur Monk** last Saturday in Manteno. **Lorrain Nelson** and **Russell Hansen** were married October 11. **Doris Hunter** and **Pauline Moore** left for Spokane, Wash., October 17. They will stop and visit a friend in Colorado, then on to Washington, where Pauline will become the bride of **Pvt. Owen Coon.**

Dorothy Linnard, Ann Runyon and **Mary French** visited **Marie Nutt** in St. Mary's Hospital in Kankakee, where she is recovering from injuries suffered in an automobile accident.

Frank Soule resigned to join Uncle Sam's armed forces.

Margy Anderson, Buildings 8-11, is going to take up flying.

Dorothy Lehman and **Bill Birtwistle** are Group 8's representatives on the Employees' Activities Committee. They will welcome any recreational ideas given to them and will in turn submit them at the committee meetings.

Group 9

Glenn Allen, timekeeper, is vacationing, touring the southern states, trying to catch the big ones . . . fish.

Group 9 was not so well accounted for at the Open House. How about doing better at the Halloween Dance. Those who did attend really had a good time!

The girls and boys are trying to get a bowling team together; anyone interested can see **John Neely** or **Dorothy Murphy**, both of Group 9.

Some *one* person of Group 9 by the name of **W. D. Whaley, Jr.**, really did some good bowling at the Open House. It was strike after strike, and spare after spare. That man certainly has a lot of good points.

Speaking of bowling, who was the girl for whom they had to set up pins in the gutter, because they felt sorry for her.

Many are wondering if the song, "He Met Her on Monday," had anything to do with **Frances Graham's** long weekend.

Personnel when reported for 9-4 goes something like this: "Today we have all hens, 3 roosters and a mouse," in other words, 11 female operators, 3 male operators and one Foreman. Original? Yes!

REDUCTION OF ABSENTEEISM is the goal of all EOP departments and here is illustrated the manner in which the Inert Storage Department is tackling the problem. Supt. A. P. Balston (left), Frank Zupancic and Ray Lee (right) inspect a chart in Group 62-S which shows the weekly standing of the various squads, with space making it necessary to leave the bottom squad off each week.

SAYING LITTLE, but doing much is the reputation built by J. J. Fitzpatrick, shown here at his desk, as superintendent of Group 3-A, one of EOP's loading lines.

Salvage

ANDY VAIL
Correspondent

Perhaps it is just as well the search for "Scorchy", pictured elsewhere in this issue, was unsuccessful. It was thought that the new buildings were pretty swell, but they were tossed right back into the scrap pile when that burned out cinder 'Scorchy" referred to them as a "Den of Dilapidation".

Good friend **George Sangmeister**, Mayor of Frankfort, who is a candidate for Clerk of the Probate Court in this county, is looking very confidently toward November 3. His friends here are all with him and wish him success.

Henry O'Reilly and **Jeanette Kamp** have set the big day for November 1. Everyone here extends best wishes.

Scotty Soper insists upon his daughter powdering her nose with a marshmallow before eating it.

Presley Hankins remarked that Major Doolittle beat Leon Henderson to it by raising the ceiling on Japan.

Mike Doyle, who in addition to his duties here, runs a small dairy farm outside the area, said: "all that I am I owe to udders".

Bob Milus is recovering from an appendectomy he underwent recently.

Supt. Hugh S. Robb says, "Social tact is making your company feel at home, even though you wish they were".

To **Ted Groskreitz** who is leaving Saturday to join the service, all wish the best of luck.

The scrap drive is still on and the Salvage Department is willing at all times to co-operate with and assist every group as well as those who live in the area. Send all your scrap, regardless of the amount.

Anita Scott, secretary to **R. T. Bassett**, says that a compliment should be inhaled like perfume and not swallowed.

FUTILE SEARCH for "Scorchy" was in progress amid the piles of scrap at the Salvage Yard when the photographer happened on the scene pictured here. Employees, including those shown left to right, Harlan Kadow, Arthur Voss, Andy Vail, Mike Doyle and Albert Sandahl, were convinced that "Scorchy" was somewhere about after reading his column in the last issue.

General Offices

MAE BELLE ANDERSON
Correspondent

Due to the death of Miss Anderson's father, **Swan Anderson**, in Chicago October 18, **June Schick** and others compiled this column.

The boys leave, not by ones any more, but by twos, threes, etc. Little **Maurie Doyle**, the lad with the map of Ireland written all over his face, who has been delivering mail the past months, left to join the Navy. His co-workers gave him a going-away gift. **Bud Lipsie**, only 85 pounds overweight now, left recently to go into the Army. Of course, the best of luck to them both!

The baffling two or perhaps the "terrible two," **Elaine Levandowski** and **Dorothy Mihelic** actually turned shy on their latest escapade. They joined a welding class at the night school at JTHS and later—not much later, though; in fact, the same night—quit—too many men (?) and too much muscle.

Katherine Glynn, Arlene Schloendorf's cohort, receives and ships (really ships—so heavy) mail to an un-named sailor in New Orleans. She'll show his picture, though.

The DuPont men (aren't they the ones, though?) are keeping **Mary O'Connor** busy putting tooth picks between her eye lids to keep awake—between 8:30 and 5.

John J. Fairfield, the new King of Swat, closed his fly swatting season with a rare .999. For proof, notice that new fangled wrist band—a little wide for a wrist watch—yes, you guessed it—he tore a ligament in his forearm using too much of that Hinsdale vim, vigor and vitality!

Dot Beverly is relaxing and enjoying a trip to the east and a little bit south. The little person in the south that little Dotty is visiting is an air Corps man—you know, the one in the song "He wears a pair of silver wings."

Gene Bennington, that redheaded woman killer, is now a member of the Company, **Mr. and Mrs. G. Bennington.** For, October 10, Mr. B. took unto himself a bride.

Alice Hess looks especially charming with a dash of the steno's peeve — ditto — running from the corner of her mouth to her chin. Gives that suave impression, if you know what is meant.

Arlene Thorsen is proudly displaying the sparkler on the third finger, left hand, the lucky man, **Wayne Sebby.**

Margy Brennan, former employee, is now the junior meteorologist at the Joliet Airport.

Mary Philbin enjoyed the last week in Chicago at the races and taking it easy in general.

Jean Hines' birthday was celebrated in Joliet by **Jean and Jackie Dailey, Anna Marie Kinney, Mary Philbin, Rosemary Kane, Edith Lewis** and **June Schick.** The evening consisted of a spaghetti dinner and bowling.

The Administration Building is represented in the Joliet Industrial Bowling League by the following bowlers: **Jack Breitfuss, George Becker, Vance Cook, Russell Voss, William Leeland, Charles O'Connell** and **William Oldani**, manager. Give them a hand on Friday nights at 7 at Jahneke's Alleys. The boys will like it.

The duck hunters are praying for cold, damp, rainy weather for the next three week-ends. In spite of the fact that they want bad weather, **Francis Gonce** still insists he is going to wear his yellow pants, red jacket and green beret. Sounds like camouflage! He says he needs something to attract the ducks. Mr. Gonce was presented with a sling-shot to take on his expedition!

Henry Schelling has been having good luck lately—many wonder why! ! !

Santa Claus has promised **Stephan L. McGann** a nice new pair of red suspenders for Christmas, if he is a good boy.

Henry Bale is known to all his friends as a crystal gazer. There should be a correction on that. He just has that far away look from trying to find out the color of various people's eyes!

Tex Jackson of Engineering Files says that his assistant, **Richard M. Russell**, has been tentatively accepted for Officer's Training on the Merchant Marine. Now the 'phone traffic on the Fuse and Booster lines will not be so heavy.

Maxine McBride has retired as secretary to **E. K. Cortright** and is probably close to the altar with **Howard Cox** at her side. **Lorna May Perry** succeeded her here.

John Nicholson returned from his honeymoon looking very happy.

Eleanor Goss in Engineering Files has a romance with **Bill Sullivan** of the Kankakee Ordnance Works. This helps to bring the plants closer in friendly relations.

Robert "Wimpy" Forst was enjoying malted drinks the other evening. Meeting a friendly stranger, they got to talking about way back when. Robert: "When I was born I only weighed 5 pounds 6 ounces.

Stranger: "Gosh, did you live."

Robert: "Sure, you ought to see me now."

William Herbst, Heating Department, is now a Cadet Sergeant in the Air Corps.

William Shaw, Heating Department, also has won his wings as an aviator.

Robert Holmes, division head of Mechanical Engineering and Heating Department, has been ill at home for the last few days.

H. E. Rostron, squad leader of the architects, has taken an interest in ping pong. He is open for challenge.

The only news **Harry Carlin** has is that he works for **"Shug" Sperling.** Boy, that really is news.

It is a pleasure to see all the folks of Irish descent working here at EOP. **Ralph W. Turner** is Commander of an auxiliary Irish-American navy, which practices in rowboats in Lincoln Park, Chicago. Yes, that is all that is needed to knock the ears off the Axis. With this combination, Victory is certain.

Art O'Neil received a letter from **Corp. John Consdorf**, Stockton, Calif. John was formerly a heating engineer here. In receiving *The Bomb-Shell* he feels at home, enjoying it with his fellow soldiers. He sends all his best regards.

Harry MacRae had his hair-do trimmed so now he looks a bit more masculine.

The following is offered by **Fred Poplausky**, plumbing engineer:

"I am going to keep on thinking, working, enjoying life and making conditions more perfect, remembering all nationalities are my brothers and sisters, that the world is my country, doing good my religion, with liberty, happiness and plenty for all forever."

The car of **Al Scheer**, electrical engineer, refused to start. After nervous hours of working on it he found a mechanic. Trouble? His choke was stuck.

Audie Allison, architect, is a student of electrical engineering also, but his K. V. A's are a bit lame as he is better equipped to handle water and sewers.

O. K. Madsen made a mistake in his letters in selecting the teams for the football pool. Result "0."

In **Max Wolfson's** apartment building, with 13 apartments and 13 babies, the family in the basement apartment expects the stork this week. This breaks the unlucky 13.

The Victory Garden of **Herb Burch**, architect, yielded 25 bushels of potatoes and he had to clean them. Yes, he is still going to raise another garden.

Fred Leslie is ill and all wish him quick recovery.

Girl shy **LeRoy Anderson** of the Water Department is still waiting for some nice girl to speak to him. If you do, make him lean against the wall as he is timid he will faint.

Francis Gourley, Heating Department, and **Tex Jackson**, Engineering Files, and their families had a splendid visit to Rock Island, Moline and Davenport on the Mississipi River. They are now experts in speed-boat and ferry riding.

"Tiny" Walter Peterson of the bowling team says that Art O'Neill's green ball has gone from a 90 score to 190.

William Simonds, progress engineer, the water boy from Elwood, has been practicing walking. He is getting ready to walk from Elwood to the plant because of gas rationing.

Safety Department

By Jimmy Hart

There is absolutely no truth in the base rumor that **George Long** is having **Henry J. Kaiser** build him a pair of bowling shoes (or IS there?).

K. J. Ulrich's three pugnacious pups, "Ginger," "Cinnamon" and "Rusty," almost *assure* his newest pet (the famous rabbit from Group 2) of leading a dog's life.

Emery Akeman has a growing conviction that cafeterias for the night shifts will solve a lot of productive problems—now, if he could only get his conviction to growing like that rotund protuberance he's carting—boy, he'd have something!

Jimmy Hart *will* open . . . but not so much since he kiddingly queried a gruff foreman at Group 6, "Don't you think I look a little like a Greek God?" and got the terse reply: "Greek God, *no!*"

Sweet li'l **Emily Noramczyk** always blushes so prettily whenever she has to spell her name for strangers, but she probably won't have to use *that* name much longer!

Guy B. Ward quite readily answers to the handle of "Luke," which he used extensively 'til he was 22, the day before he put on shoes.

That's quite a baby **Lewis Walsh** has, to hear him tell it. Sez him: "Very latest Model, Two Lung Power, Screamlined, Gravity Feed, Uses Very little Oil and comes equipped with Changeable Seat Covers!" Lew sez his Doc was the Technical Assistant. His Missus was the Production Manager and he was the Designing Engineer. He goes on to say the New Creation is on Display at the home showrooms, but that the management assures the public that there will be no new models added to the line.

Murphy's Boys Celebrate Successful Softball Season with Victory Banquet

Record of 38 Wins and 5 Losses Climaxed by Division Championship in Joliet League

Murphy's Boys of Group 2 celebrated their victory in the West Park Division of the Gold Medal Softball League with a banquet October 4 at the Woodruff Hotel in Joliet.

Guests of honor included **Supt. and Mrs. James J. Murphy, Mr. and Mrs. John Johnson, Jr., Mr. and Mrs. Eugene Hunt** and **Mr. and Mrs. John Kelahan.**

An excellent job of toastmastering was done by **Charles Pierce**, who not only introduced the guests of honor, but displayed an outstanding ability to hold the interest and atteniton of everyone present. Mr. Murphy presented third baseman **George Zobel** with the most valuable player's award, asking as he did so that George make a few remarks, to which George replied that the "only time he made speeches or attempted to make a speech was when he bummed a cigarette from someone."

Bill Stanley, manager of the team, was to have had the awards at the banquet so the presentations could be made, but due to war conditions the awards were not received by the Recreation Department and this part of the ceremonies was postponed. Bill, however, filled in with humorous remarks much to everyone's enjoyment.

"It was beyond my fondest hopes to be able to assemble such a wonderful group of boys as we have in Group 2," Mr. Murphy said in opening his address. "Willingness, sacrifice and sheer perseverance helped this team to accomplish what it did, and I want everyone to know that I am deeply appreciative of his efforts both at work and on the ball diamond."

Gaglione Makes Speech

Various speakers were called on for additional remarks and the banquet was progressing nicely when Mr. Pierce called on **Frank Gaglione** to make a few comments. Frank delivered a very sentimental and touching speech closing with "I only hope that I will be able to return to Group 2 next summer for I consider Mr. Murphy, the assistant superintendents and the entire staff just about the finest friends I have ever made."

A vote of thanks was given to all the assistant superintendents for their co-operation, which contributed much in making the season a success. The banquet was concluded at 9 o'clock.

The boys went to the Will County Gold Medal finals to meet the Raino Aces of Joliet and after eleven hard fought innings lost by a score of 5 to 4. Thanks are extended to **Eddie Washburn** of Group 70 for his spirited efforts during the summer and to **"Horse" Tammen** for his contributions to a successful season. Eddie pitched the final game, striking out 16 men and allowing only 5 hits.

Team Is Listed

The Boys are to be congratulated on this and all other games of the season for being good losers as well as good winners. Murphy's Boys won 38 games and lost only 5.

The trophy for second place can be seen in Mr. Murphy's office after next week. The team thanks all of its loyal supporters who followed them and cheered them on to victory.

Following are names of the fellows who played with Murphy's Boys. Some, of course, are in the army now, but all played in one or more games:

Mr. Zobel, Ray Murray, Bob McGuire, Mr. Keenan, Don Zier, Mr. Washburn, Mr. Tammen, Don Bryant, Bob Murphy, Otto Koch, Andy Feeney, Ode Golden, Stu Marlette, Harold Spier, Larry McKeon, Dan Glenney, George Harms, Mr. Hunt, Bill Galbraith, Ray Bell, Bill Stanley, Ken Peterbok, Joe Furlan, Mr. Gaglione, Dick Oldani, George Schoppe and **Bob Sievert.**

The EOP Guide Post

SALE · FOUND · LOST · RENT · BUY · SERVICE · TRADE · RIDES

Classified ads will be published without charge for EOP employees and their families. If you can offer transportation, want transportation; want to trade, buy or sell something; have a house or apartment to rent; have lost or found something, you are invited to make use of this service. Deadline is Wednesday, ten days preceding publication.

Riders Wanted—From Aurora or Joliet to plant. 11:30 to 7:30 shift. See **Roy Lynam**, 318 South Broadway, Aurora, or Group 62, Building 1, Line 4286.

For Sale—Late 1941 model Travellite cabin trailer. Sleeps four. Excellent condition. Complete with tires, fuel oil, cooking gas, running water, paint and trailer hitch. Desire immediate sale. Price—$640.00, cash or terms. See **T. Brown**, 2201 North Broadway, Joliet, Ill. Phone 29473.

Ride Wanted—Living at Irving Park Boulevard and Pulaski Road in Chicago. Want ride from Chicago to EOP. Will arrange hours to fit driver's. Call **Howard E. Whipple**, Line 2255.

Ride Wanted—From Gardner to Administration Building. Steady hours, 8:30 a. m. to 5:00 p. m. See **Rowena Roberts**, Room 34. Line 4228 or Gardner 3681.

Room and Board—In Wilmington, for day shift men. One single and one double room. Reasonable rates. Phone Wilmington 4271.

Riders Wanted—To and from Wilmington. 7:30 to 3:30 shift. Call **Forest McGowen**, Line 3283.

Riders Wanted—From Braceville to plant. Leave Braceville 6:30 a. m. Pass Groups 4, 5, 6, 7, 8, 9, and 68. Call **Leo Trickler**, Group 68, Line 3163.

For Sale—1941 Convertible Coupe, 20,000 miles, tires in excellent condition. Will arrange financing. Contact **Red Harbour**, Road Dept., Line 3141 or 5263.

For Sale—1940 model auto gas (gasoline) cooking stove with four burners, oven and broiler. First class condition. Also 1 large enameled heating stove. See **Mrs. H. Milling**, Symerton, Ill.

For Sale or Trade—One 12-gauge double barrel hammerless shotgun and one six shot 410 gauge shotgun. Call Line 2290 after midnight, or write to **John Sorenson**, 129 Hobbs Ave., Joliet, Ill.

Riders Wanted — Heated Chevrolet. 4 to 12 shift. Wilmington to plant. Call anytime, **Edward Westcott**, Wilmington 2861.

Riders Wanted—From Morris, Ill., to EOP. 4:00 to 11:30 shift. Call **Dr. George Luke**, Line 3246.

ELWOOD ON PARADE

AUTOMATIC oiling of flanges on passing cars is made possible by the use of the tank-supplied oiler, pointed out here by Supt. E. J. Egan.

CHECKING of all railroad car numbers in the EOP area is the task of John "Bunny" Arthur, shown here while engaged with his work.

LISTENING to radio orders from his dispatcher, Engineer Donald F. Lehndorf is shown in the cab of one of EOP's diesel locomotives.

ADMINISTRATIVE WORK connected with EOP's railroad is handled by an efficient staff quartered at Richards Farm. Pictured left to right are Mrs. Charles Mann (the former Margaret Hayden); A. W. Walters, Robert Peterson, George F. O'Reilly and Ernest Ranunser.

OPERATING ORDERS to all train crews are issued by dispatchers by way of the radio transmitter shown here. Each locomotive is equipped with two-way radio facilities. Shown here at the controls of the transmitter are George Ricketts (left) and Clyde Wade.

POWERFUL DIESEL LOCOMOTIVES are the backbone of EOP's railroad system. The one pictured here is one of the largest with 100 horsepower. Members of the crew shown with their charge are Donald Lehndorf, engineer; William Ellinger, switching foreman; Andrew J. Hendrix, switchman; I. S. "Slim" Moore, oiler, and James Challender, switchman.

Gas Rationing For Employees Handled Here

Local Committee to Issue Books As and When Ordered

Employees who drive to and from work will be required to get their gasoline ration books from EOP's tire rationing committee, composed of **R. T. Bassett, A. E. Kinson** and **R. R. Kuntz**, according to **Frank M. Bray**, chairman, Joliet board of price administration.

Service to all employees is the ordinary aim of the local board, Mr. Bassett said. Committee meetings will be held daily until as late as 10 p. m. in the Recreation Building November 12, 13 and 14.

The Joliet board's announcement follows:

"With the rationing of gasoline the assistance of transportation officials and committees in plants doing war work and employing 100 or more people will be of vital importance in securing necessary transportation for their employees.

"When registration of the car is made an "A" ration book will be issued which will allow for 90 miles per month for family use and 150 miles occupational use per month. If this should be too little, an application should be filed for additional gas. This should be reviewed by the transportation office and the mileage the car must travel per month ascertained as nearly as possible and certified as correct by the officer or committee and is to be returned to the War Price and Rationing Board for final action. If, for example, the car requires 450 miles per month for occupational travel an additional book for 300 miles will be granted as his "A" book provides 150 miles.

"In securing extra gas the same rule applies as in getting tire service. If public conveyances are available he cannot be allowed extra gas and as with tires, he must agree to carry passengers to the capacity of his car unless he can prove that this is not possible.

"It now is permissible for groups to alternate the use of their cars, but if more than one car is used by a group the extra gas will be divided among those furnishing the cars.

"At the time of registration it will be necessary to furnish the state registration and the serial numbers of all tires and an affidavit that not more than five tires are owned by the registrant or any member of his family or household.

"A suggestion has been made that where an officer or group of officials administer transportation, it will be very helpful if an advisory committee of employees be appointed to assist in this work as it has been proven that such a setup assists in instructing, advising and policing the program throughout the organization."

More Gifts to USO

John M. Joyce, chairman of the Joliet United Service Organization, has acknowledged additional contributions of $30.35 from various EOP employees.

Girls Assigned Bomb Loading Tasks

TOPPING OFF after bombs have been filled with explosives is one of the jobs on which men and women work side by side in Group 3-A. Pictured here are Hildred Shewmaker (left) and Verna Blair.

Judges Send 36 Girls to Miss Victory Contest

EOP's entry in the Chicago *Herald-American's* contest to select a "Miss Victory" from the war workers of the district will be not one, not two, but 36 girls. Judges who listened to background histories and looked over candidates at the closing session Saturday night, decided that all girls who were entered as semi-finalists should have their chance in Chicago.

R. T. Bassett, assistant comptroller, acting as toastmaster, made the following address.

One time a passenger asked a Sea Captain why a ship was called a "She." The Sea Captain answered that it took a man to run her. Maybe so, but the Sea Captain evidently didn't give much thought to what he said. Had he given a little thought to the matter, he would have thought of Liberty and of Peace as both being symbolized by a woman. Maybe some of you men won't agree on that Liberty symbol especially when your wife says to you that you can't go to that Poker Game. And as for the Peace Symbol, you probably won't have peace for the rest of your life if you do go to the game.

But regardless of what the men think about Liberty and Peace, there cannot be any question about Victory being symbolized by a woman. Without the women there could be no victory. Every day we hear of more and more women filling gaps in industry left by men who have gone to war. When we think of Miss Victory, let us not be as short-sighted as the Sea Captain when he said a ship was called a "She" because it took a man to run her.

Let us think of "Miss Victory" as symbolizing a message from the employees of the Elwood Ordnance Plant to our fighting men wherever they may be. A message that carries the thought that wherever they may be fighting and singing "PRAISE THE LORD —PASS THE AMMUNITION," the Ordnance Corps will be able to say "Thank God we have the Ammunition."

Uniform Shift Changes to Aid Workers Ordered

Permanent Riding Arrangements Made Possible By Plan

Uniform times for changing and rotating shifts of EOP workers, effective November 1, were undertaken as the first step in a determined effort to meet the ever-growing problem of transportation to and from work, it was announced by W. E. Canniff, manager of operations.

Other steps will be taken as developments indicate and there will be no delay in changing any rule if it fails to do the job it was intended to do, Mr. Canniff said.

Existing regulations of tire rationing boards, including the demand that automobile drivers carry passengers, and the expected regulations under gasoline rationing made it absolutely necessary, for the benefit of employees, to set up a uniform shift-change time and shift rotation, Mr. Canniff added.

Shift-change times have been set at 7:30 a. m., 3:30 p. m. and 11:30 p. m. Shifts will be rotated every two weeks. For illustration on November 15 the 7:30 to 3:30 shift will advance to 3:30-11:30, the 3:30-11:30 to 11:30-7:30 and the 11:30-7:30 to 7:30-3:30 with further rotation in that order every two weeks thereafter. In those groups where only two shifts are employed, the change November 15 will be 7:30-3:30 to 3:30-11:30 and 3:30-11:30 to 7:30-3:30.

So that those employees who must depend on bus service can continue to go to and from work in that manner, office hours in the Administration Area have been changed from 8:30 a. m. to 5:00 p. m. to 8:45 and 5:15. This will permit the buses which serve the shift workers to serve the office workers also.

"Getting employees to their work and back to their homes, is of primary consideration," said Mr. Canniff, "and we are determined to make this as easy as possible and still co-operate with all the requests made by the Government to aid the war program.

"The Office of Price Administration, through the various tire rationing boards, said the use of private cars must be curtailed and that tires would not be made available to a driver unless he or she carried a full quota of passengers. Our people are meeting this requirement wholeheartedly, increasingly so day by day.

"A survey of private cars entering and leaving the area June 1 showed each to be carrying an average of 2.86 passengers. A similar survey October 13 revealed that this average had been increased to 3.33 passengers. This means, in other words, that every three cars are now carrying a total of ten passengers. In some instances, a single car now carries eight, nine and even ten passengers.

"This co-operation of the workers means considerable saving of rubber and a lightening of the burden on bus transportation. We believe that every step possible should be taken to permit this co-operation to continue. Studies re-

We Are the Little People

We're the ones who, in our own little way, are helping blast the Japs and the Nazis. We don't sit back in smug complacency and let someone else do the worrying about the outcome of this world conflict. We know we're going to win. It may be a struggle; we'll have to sacrifice many pleasures, many luxuries and not a few of the things we just took for granted not so long ago—like bacon and eggs, for instance. It never occurred to us that we'd be having the eggs without the bacon, and liking the idea, so that our boys in the front lines, in camps and in far away outposts would have the food which is so vitally necessary to help win this war.

There are lots of things, like coffee, tea, and sugar—and tires for that automobile which was once so indispensable in our everyday living, and which we now share with our friends, with our neighbors, and which we pool with other cars for essential transportation to and from our work.

We don't complain about our sacrifices—we just go on, lending a helping hand where we can, buying fewer clothes, investing all we can possibly spare of our salaries and our savings in war bonds and stamps, and being all around good, loyal Americans. Yes, we're the little people who, loving our country as we do, say "Thank God for America! Keep 'em shooting, boys! We'll give you the stuff, and you give 'em hell!"

—**Kay Reubart,** War Department.

THE BURNING PIT

By Scorchy

There comes a time toward the end of the year when the heart swells with warmth and your fellow man begins to look a little more like a human being than he did all year long. Even such cold-hearted brutes as your correspondent break down and forgive all those brickbats that have been tossed at him in ungrateful appreciation of his efforts to record history at EOP instead of making it.

Yes, Christmas comes but once a year but this year the early call for remembrances to the boys in the Service have reminded me to get together that Christmas list now instead of the usual mad scramble on the 24th of the 12th month, Anno Domini. That Yuletide spirit is an all-powerful sedative against the normal impulse to avenge all the kicking around you have received during the last twelve months. That "peace on earth, etc. etc." spirit even prompts one to think kindly of **Charlie Herbig** as he throws you bodily from the warehouse just because you don't happen to have a signed requisition for that measly little screw driver. And then to make matters worse as you scrape the mud off those dungarees, you are firmly told that after trying to get away with that one, you couldn't have the screw driver even if you did have a requisition.

Charlie should be remembered. He will be! An endowment Fund will be established (as soon as I get around to it) to provide him with a warehouse full of screw drivers, bolts, nuts, wrenches, spark plugs and the like, and all will be free.

People can come and get things and no requisitions will be needed, and as the trucks back up and disgorge their loads of mechanical trivia, Charlie will be privileged to sit there and tell someone to put it on the selves without any receiving tickets, and there will be no governmental material checkers around to ask funny questions. After that, Scorchy isn't such a bad boy, is he, Charlie?

Clarke Wilson, of automotive fame, will be given a fleet of brand new sedans, and the first time any one of them breaks down, it will be hauled away and a new one put in its place. As to **James Truka,** way out west in Fuze and Booster, brevity will be served by awarding a pair of stilts. **Andrew P. Balston** gets the deed to one of those deserted yellow gasoline stations—just an empty Shell, so to speak.

To **Charlie Mann,** his noble Sergeant-at-Arms (this one's too easy) a book of nursery rhymes. **E. John Egan** gets a complete toy railroad—one that really runs. **Connie Carlson,** of the Purchasing Department, is quite able to buy his own—or is he? **Captain Seymour Kurantman** will be feted appropriately at two bars in Joliet. **Dr. Schultz,** if he will be patient, will get a dose of his own medicine.

And as to Scorchy, remember folks, it's Peace on Earth, etc. etc.

Uniform Shift Changes to Aid Workers

(Continued from Page 1)

vealed that after driver and passengers had made mutually satisfactory arrangements for transportation, staggered shift-change times and different shift rotation periods were disrupting these plans.

"Therefore, it was decided to make change times and rotation periods uniform so that each employee can continue to depend on his present method of transportation and so that those now compelled to make temporary arrangements can make permanent ones.

"The problem of transportation in war time and this first step toward its solution does not mean the matter is closed. It is entirely open to change and improvement. We shall be glad to receive suggestions from any employee who believes he or she has something of value to offer."

Employees who wish to take advantage of Mr. Canniff's earnest invitation are urged to send their suggestions in writing to the Editorial Office of *The Bomb-Shell* in the Recreation Building. Each letter will be acknowledged.

S & P Rush Pine Bluff Arsenal To Completion

Story of Project Similar to Tale Of EOP Progress

By Louis J. Kessel
Comptroller, Pine Bluff Arsenal

On November 16, 1941, three men, Sanderson & Porter men, arrived in a small city in southeastern Arkansas located deep in the cotton country and bounded on the north by the Arkansas River. The city is Pine Bluff.

Whatever else may have been in their mind they were conscious of the fact that at least they were going to participate in the opening moments of what promised to be the construction and building of an arsenal, the first of its kind in this country. This was to be a plant for the production of incendiary bombs for the United States Government.

The plant site was almost completely covered with pine trees and out of this soon was carved the various proposed areas for manufacturing plants, roads and facilities.

Three months after beginning this construction the plans were substantially enlarged for the construction of a chemical manufacturing plant.

So by the end of July, 1942, upwards of 17,000 men and the largest assembly of construction equipment anywhere in the country were busy day and night in the construction of Pine Bluff Arsenal.

On September 15, 1942, ten months to a day, the incendiary bomb plant as required in the original plan was completed. The completion of the chemical manufacturing plant is only a matter of a little more than three more months.

Aside from engineering and construction staff needed by Sanderson & Porter for the construction of the plant, it was also necessary to create and bring together a large staff of chemical engineers for the purpose of designing the technical chemical facilities.

The construction of Pine Bluff Arsenal is under the direction of **L. R. Shattuck,** partner, Sanderson & Porter.

Col. A. M. Prentiss is commanding officer and **Maj. Curtis A. Nelson** is area engineer for the War Department.

In the few moments left to the employees of Sanderson & Porter outside of their work, they found time to enter two baseball teams in the Southeastern Arkansas League, operate two complete all Sanderson & Porter eight-team Softball Leagues, and last and best, buy War Savings Bonds on the Payroll Deduction Plan, reaching a peak of $41,000 in one week.

In a few months the job will be finished and we believe it will be a good one. It will be Pine Bluff Arsenal, a part of that great "Arsenal for Democracy."

Fellowship Party Set for Nov. 12

The next fellowship party will be held November 12 with dinner at the Cafeteria followed by entertainment in the Recreation Building.

The committee in charge is composed of **R. T. Read,** chairman; **H. D. Dougherty,** assistant chairman; **W. A. Beyer,** steward; **E. O. Huey, W. G. Lanterman, Charles Mann, James Truka, W. H. White** and **Edward L. Walkup.** Those desiring to attend should contact Mr. Beyer by 5 o'clock Wednesday evening, November 11.

Owners of Cameras Asked to Claim Them

Employees are urged again by **M. C. Baughman,** chief of guards, to go to Guard Headquarters in the Administration Area to claim cameras and other articles which have been confiscated in the past year. Proper identification and proof of ownership only are required for return of the property, Chief Baughman said.

I have written . . . a poem!

Seven Persons in Fiscal Audit

Here is a treatise with a little fun
Of seven persons who work in Fiscal Audit.
All hail and hearty, their work is well done,
When you know them you will have thought it.

Each has his special way to work
And all have peculiar traits of their own.
None seem to ever try to shirk,
Though all are happy when it's time to go home.

Gladys Groeneveld, the long lanky girl,
Is the one that comes down so early;
She works with such ease, without a swirl,
Just smiles, is sunny, and not a bit surly.

There is **Dorothy Rohr,** efficient, refined,
Little timid at first, she'd hardly talk,
But now we've learned or we opine
That the man who gets her will have to walk.

Eunice Russell, married lady, who never gives up;
Works willing, but wonders and worries,
Then forgets all about her bitter cup,
And back to her duties she scurries.

Roy Eckberg is a fellow doing a good job,
Very thorough and good at "long talk."
He never has to be given the nod
To bring the books out of the vault.

Phillip Hahn is one who enjoys a good joke,
An intense worker with fine thought.
I don't believe I've heard him croak
About the War Bonds he has bought.

Frank Kadlec is the department head
Who keeps smiling right on through.
To him the "gang" has always said,
"You need us all, and we need you."

Last is the lad who wrote these lines.
The name is **Henry Handy,** as you know it.
Some weeks ago he had the whines
But now writes jingle, and thinks he's a poet.

—**Henry B. Handy**
Fiscal Audit

Production Planning

Once upon a morning dreary,
As I wandered, weak and weary,
Suddenly my eyes were scanning,
Men and women, planning, planning.

What was this I saw before me?
Please don't leave me, I implore thee.
Enough of nonsense and suspense,
You've read this far, so I'll commence.

In this room which I was scanning,
People of Production Planning.
Headed by J. C. Schmeh of the South,
Forever with a cigar in his mouth.

So first, we have Thompson and Court,
Miss Cooper, to make their report.
Naughtin with Miss Morres' aid
To see that data cards are made.

Wright is next in our little scene,
Then Miss Craig—quiet and serene.
Rustling of papers and a sigh,
Only Speed Benson getting in high.

Groesbeck and Miss Norem enter,
Next it's Miss Ryan, "Front and Center."
Miss Freehauf the typewriter pounds,
Ebben starts the mail on its rounds.

Miss McGovern keeps parts on the move,
Mrs. Ray keeps right in the groove,
Wilson checks all the reporting,
Marlett dreams—horses cavorting.

Mastin with the Packard is next,
Brown helps keep tabulating vexed,
And then Miss Maxwell and Miss Gall.
Believe it or not, that is all.

In a two-by-four room, we have twenty-one
Managing to mix both grim business and fun.
We have not time for worry or taxes,
Our job is to put a nick in the Axis.

So please don't pass us by, throughout the whole day
Come in with your troubles, we'll ask you to stay.
The latch string is always out on Room "12" door,
We can always make room for one or two more.

—**Fred Mastin**
Production Planning

To Group 8

The Group 8 folks are sure swell friends,
They're full of fun and true to the end.
They play and sing but do their work
That's one sure thing—they never shirk.

With their Uncle Sam on their side
To help them over the rising tide,
They toil and labor — but no remorse:
They think of the boys in the armed force.

General MacArthur will want no praise
While he protects them for future days.
So these true friends will never pine,
But just push those primers down the line.

For the soldiers, sailors and the marines,
They'll help lick the Japs and Germans to smithereens;
For Old Glory—God bless her—will always rise
Over every man's nation — his Paradise.

For Alma and Joe, who treat them fine,
They do their work and never would resign;
For God who gave them all their wisdom,
And for EOP and its perfect system.

—**Phyllis Morris**
Group 8

A War Bond

If I were a little War Bond,
Do you know what I'd do?
I'd join the March to Washington,
So see this darn war thru.
There I'd be turned in for something useful,
What, I wouldn't care,
A wing, a tube or a tire,
I'd know I'd done my share.

—**Mac Balbinot**
Group 5

Stars

I have seen stars
Brighten the sky at night
Like a million diamonds
That have been cut and polished to a radiant glow
And then laid on a huge, velvety carpet
. . . of space.

—**Nicholas Belluso**

Fuze-Booster-Primer and Detonator Lines

JUANITA HARTER
Correspondent

Group 4

Girls from 4-14 motored to Champaign to see the Notre Dame-Illinois football game and certainly brought luck to the Irish, which was properly celebrated.

Lillie Hale, 4-14, left to join her husband in Detroit, Mich.

"Shirl" Boissa, 4-14, received a letter from her soldier boy "Mike" telling her of the waterfall showers nature provides in India.

Bernice Cornale, 4-14, was feeling kind of blue until Tuesday when her husband, **Martin**, sent two letters from Australia, and Wednesday she received two more.

A surprise pre-nuptial supper was given by her friends for **Isabel Miller** of New Lenox, who will soon marry **Bud Nickel** of Joliet.

Betty Arnstrom, general superintendent's office, and **Fred Blatt, Jr.**, Chemical Laboratory, have been the center of attention in Group 4 for the last few days. They were married at a candlelight ceremony in Symerton October 24.

Theresa Travis, formerly in the general superintendent's office, has returned to her home in Aurora.

Francis Graham, formerly of Group 9, is welcomed to the general superintendent's office.

The old saying goes that, "All roads lead to Rome," but **Betty Foster**, forelady in 4-14, says that as far as she is concerned, it will soon be, "All roads lead to Alaska."

Dorothy Howell of Wilmington has been ill at home for several days.

Oliver Curry has a skinned face after a hunting expedition. He claims it was from the kickback of his gun.

Group 5

Olivia Zimmer left to join her husband, a lieutenant at Fort Knox, Ky.

Lovella Arp has joined her husband, who is in the Navy at Norfolk, Va.

Sam Koons, Chemical Laboratory, appeared in Group 5 the other day with his pajama tops still on.

Mary Ellen Rocket has returned from a visit with her brother, **George Rocket**, who is studying for the Army at the Briggs Manufacturing Co. in Detroit.

Geneveive Kuhar has joined the WAACS.

Lucille Olson is leaving November 11 for Florida to join her Army husband.

Group 6

Eddie Liebelt took in the Illinois-Notre Dame game last weekend and **Art Jensen** traveled to see the Minnesota-Michigan game.

Betty Palmer's husband will be with the Amphibians starting November 4.

Watch out for **Tetryl Pelleting's** bowling team, "The Tetryl Modernettes," also the Assembly Room's "Bugarooes." They are all strike queens deluxe.

Dorothy Furrow is happy these days. Her husband recently came home from Panama, where he has been employed for the past year.

The dance held at Dreamland Ballroom near Kankakee was a big success.

Eddie Kroll will be leaving for the Army Air Corps soon.

Jack "Fox" Stuckel sure missed his calling—as a carver he is 100 per cent; as a machinist, 99 per cent.

Alice Secor, timekeeper, center-aisled it October 17. The lucky man is **Walter Sears**, Group 1.

Mr. Liebelt's bodling team beat **Harry Engle's** team in a match game the other night.

All the girls on the 103 line sprouted white hair bows this week. The girls are wearing a new hair-do on the 104 line with their helmets.

Vince Murphy closes doors very carefully since he broke his thumb in one, and **Hank Starr** takes the same precautions with hammers since he broke his thumb.

Now that tires will be available (?) to all motorists—**Larry Patton** probably will be the first in line.

Group 7

Elsie Steard attended the Luther League Rally at Anchor, Ill.

The reason for the happy look on **Janet Laborence's** face is that recent trip to Camp Crowder, Mo., where she visited her husband, who is in training there.

Another Army wife who is going to see her husband somewhere in Alabama this week is **Prudy Koonce.**

Kathryn Bushey's home was destroyed by fire.

Bill Saffell, foreman, and **Dick Jett**, machinist, are always glad to get a hand-out when it comes to good home-cooked food.

Margaret Fisher is back again after several days' absence with an attack of flu.

Wedding bells will ring soon for **Martha Fleming** of 7-4.

Irene Zivec is back at work, feeling fine and in good health.

Betty O'Reilly and **Angela Terzick** have taken examinations for the WAACS.

Orpha White can swing out the song "Wonder When My Baby's Coming Home."

Frances La Casio gets letters by the dozen from the boys in service.

Viola Van Meter will see a friend from the Canal Zone soon. He is coming home on a furlough.

"Truka's Gems" really trounced the Group 5 team in a recent bowling match, even though the anchor man did roll 98. Anyone wishing to schedule "Truka's Gems" can get in touch with Mr. Liebelt.

Dorothy Ohman and **Don Lindstrom** middle-aisled it this week.

Nelle Barnet likes Winslow, Ariz., for vacations.

Congratulations go to **Mary Liker** and **Harold Smith**, who were married recently.

Jim Seward has only *nine* riders for his '37 Dodge—now he's seeking six more for the top and trunk.

Roy Abdnour not only has *polish*, he sells it—and speaks it too!

Stell Johnson has a recipe for "zero soup," called "chopla-chopla."

"Felix," the Change House cat, has recently been awarded a badge, complete with picture and paw prints No. 102142, for "Distinguished service in the face of the enemy"—to wit, one nazi ol' rat.

"Doc" John Lyman may not be a registered pharmacist, but he can certainly mix the paint.

No, there are no canaries in the paint shop—that warbling is done by lil' **Polly Evans!**

Katie McMurray has a new ring on that certain finger.

Martha Flemming, 7-4, left for Oklahoma City, Okla., where she will be married.

Group 8

Robert Otte, foreman, recently moved into a new home he purchased in Joliet, Ill.

Juanita Gordon is going into the mouse business. Tuesday the mouse was almost beaten, but Wednesday the mouse ate the trap. Last minute reports that the trap and mouse were both found and Juanita has chalked up another victory.

George Blair has been at home ill for a few days.

Marge Spurling is moving to Joliet, as her husband is leaving for the armed forces.

Marge Anderson was going to be an aviatrix, but has changed to welding.

Katherine Rumf is leaving for San Antonio, Tex., where she is going to live with her brother, who is stationed there.

Buck Weese, Group 8 chief expeditor, should really know Group 8. Since starting inventory he has worn out two pairs of safety shoes and gained 20 pounds.

Sam Cusimno's son left Monday for the Army and enlisted in the Air Corps.

Group 9

Congratulations go to **Lois Johnson, Ruth Koth, Maxine MacKay, Norine Balma, Inis Ross** and **Dolly Matia** on their weddings.

After waiting all these weeks, the girls finally got moved into that new Change House. And are they proud of it! All that gets them are those combination locks on the lockers.

Theresa Lehnert says a long lost friend just started working at EOP. One day she ran into a girl friend she had not seen since leaving her home town.

"Chuck" Hickok and **"Doc" Daughtrey** are going to have to start setting pins to earn enough money to "bowl."

Speaking of bowling, **Mary Stegler** isn't half bad. Her average is 172, but champ of the bowling allies is **Hattie Brusatori**, witn an average of 202.

Dorothy Murphy pays off her football bets with pennies and dimes.

While on the subject of football, **Bob Hartman** seems to be making money on his alma mater's team this season.

Glenn Allen and **Del Millican** talked **John Neely** into buying that fishing outfit, which they bought from him at half price at the end of the season, 'tis reported.

Willard Deschaud has more cute gadgets and signs in his '36 Studebaker than you'll find in a carnival!

Women

By
CATHERINE NOONAN

Mrs. John J. Cole succeeds **Mrs. Don M. Hoffman** as chairman of the EOP-KOW chapter of the Red Cross, which is a unit of the Joliet chapter for women who live within the areas of the two plants. Mrs. Cole has been an active member of the Red Cross unit since its organization and formerly was recorder for production workers. Last August, Mrs. Cole was chairman of the committee that arranged the benefit bridge party at EOP which raised more than $250 for the Will County USO. The women meet every Wednesday in the EOP guest house to make surgical dressings, sweaters and articles of clothing which are badly needed by the Red Cross during this crucial time. Other new officers of the unit are **Mrs. R. T. Read**, who succeeds **Mrs. T. M. Burns** as secretary and treasurer and **Mrs. H. D. Dougherty** who has been appointed assistant to **Mrs. E. A. Evans**, vice chairman of production. **Mrs. C. P. Bohannon** continues as production chairman.

Ladies' Day Popular

More than 300 women turned out on Wednesday, October 28 to whoop things up (in a lady-like fashion, of course) on the first Ladies' Day at the Recreation Building. The response to the recreation questionnaire sent out by **Myrna Faris**, director of women's activities, was terrific.

Recipe of Week

Now that you have mailed that Christmas gift to the men overseas, you'll have a little time to whip up a batch of cookies for the man on this side of the water. **Geraldine Ward**, Ordnance Inspection, and high priestess of the kitchen, sends in the following recipe and all you have to do is get busy with the utensils. The ingredients are ½ cup butter, ½ cup Spry or Crisco, 2 cups brown sugar, 1 teaspoon vanilla, ½ teaspoon salt, 3 eggs (well beaten), 7 tablespoons milk or cream, 2/3 cup chopped nuts, 2/3 cup chopped dates, 4 cups flour (all purpose) and 1 teaspoon soda. The directions are to cream shortening and sugar. Add vanilla, salt and eggs and milk. Sift soda with flour. Add remainder of ingredients, mixing lightly. Chill dough thoroughly. Drop portions from end of spoon and flatten on a greased cookie pan. Bake from 12 to 15 minutes in a moderate oven. You can mail these cookies a long distance inasmuch as they keep their freshness for some time.

DRAFT BOARD OFFICIALS were the guests of EOP October 22 when they were shown the intricacies of bomb and shell loading. John J. Cole presided and utilized a loud speaker system to explain operations to the visitors.

Draft Board Members from Nearby Counties Shown Through EOP Plant

Selective Service officials who were invited to the meeting included **Col. Harris P. Ralston, Maj. Baird Helferich** and **Paul G. Armstrong** from State Headquarters; **Ray E. Bassett, Joseph H. Birsa, Edward Brennan, Paul Clarkson, Laura I. Daley, Evelyn Dauwalder, Anita Egoletti, J. W. Faulkner, D. J. Feely, Fred Formento, Rosemary Garavali, A. J. Garrity, Frank J. Gospodaric, A. C. Geuther, P. E. Greene, Roy Hemphill, R. I. Jones, A. J. Kelly, Lee Klopfenstein, D. V. Knowlton, O. R. Laraway, Edna D. Larsh, John Legan, William Leser, Jack Madden, Alfred Martin, C. A. McCay, James F. McGuire, Walter Meyers, Mathias Pisut, Walter J. Ruddy, S. F. Sergeant, Jayne Sevar, John Sicinski, Carlton F. Stiegle, C. Steevens, Frank Tushek, R. Williams, John Woock,** all from Joliet; **Monroe E. Curtis, J. G. Ginger, Ben Gower, Claude M. Granger, Frank J. Karcher, Victor Laurinsen, H. Lussenhop, William H. Maitland, Fred Stitch,** and **Joseph Tolsen** all from Kankakee; **J. L. Berhman, P. E. Carroll, T. F. Flesher, Frances Groene** and **R. J. Kennel** all from Streator; **Margaret Daugherty, Dr. Robert Graham, C. R. Hulls, Paul J. Kuhn, C. A. Schults, Raymond E. Shea, John Warne** and **B. L. Waters**, all from Aurora; **Chester Crabtree, W. J. Eggleston, Robert R. Kirkton, Fred Rieger, Walter G. Roeder, L. M. Shugart** and **L. W. Tuesburg** from Pontiac; **James P. Curry, Finley T. Fitch, Ertle C. Lane, Dr. F. G. Loomis, Everett Morrison, Sheldon J. Sauer, Lee Shaddle** and **L. T. Wells** from Yorkville; **Bernice Heggen** and **Levi C. Robinson** from Morris.

EOP executives who attended the meeting included **Maj. Kenneth M. Haber, Capt. George A. Grant, Capt. David P. Tunstall, Harrison Smith, W. E. Canniff, John J. Cole, E. J. Walsh, J. E. Salmon, George Gibson, James J. Murphy, John Kelehan, Eugene Hunt, John Johnson, Jr., Henry Dougherty, Donald Macini, W. G. Reed, John Fitzpatrick, T. M. Burns, John A. Lower, James E. Truka, John H. Walker, W. D. Whaley, Jr., P. L. Deylitz, H. O. Cadwell, A. J. MacLellan, E. O. Huey, Chief M. C. Baughman, Chief Roy Mortenson, L. D. Edwards, A. M. Lockwood, R. T. Read, St. Clair Smith, A. P. Balston** and **George F. Bent.**

Dramatics Next On Play Program

E. L. Walkup said that dramatics will be the next feature activity to be started, so all of you thespians that have had either professional or amateur experience in either acting or play writing, get in touch with the Recreation Department. Here is an opportunity to get started in an interesting and educational activity during the winter months.

HAULING BOMBS from one bay to another is a necessary job as the loading process is pushed forward, and Jennie Stroh is shown here operating one of the electric motors.

Inert Storage

CHARLES MANN

WILLIAM DENVER

Correspondents

Among the attendants at the Thursday Evening Fellowship Meetings were found **Supt. A. P. Balston**, also **Jim Whitley** (with a little tobasco sauce trouble), **Charles Mann** (with sticking cards), **Charles Gorham** (in need of a money changer), **Richard Ashworth** (full tummy), **Frank Zupancic** (ride trouble), **Turk Argyle** (bowling trouble), **Stanley (Poker Face) Wiencek.** The committee deserves thanks for the fine entertainment.

Former employee **Pvt. Ed. McCauley** is our best correspondent in the armed forces . . . always starts his letters with "I'm in the Army Now." Fan mail is received from **Pvt. Louis Morone**, U. S. Marines, somewhere in Nevada, saying he enjoys *The Bomb-Shell.*

Visitors at Inert, **John Balston**, young son of the superintendent. He met many of the boys and displayed unusual ability in sketching aeroplanes. **James Wilson** of the Planning Department also enjoyed a visit with the Inert Staff . . . discussing lot numbers mostly. **John Nye** of the Government Inspection office reported a visitor . . . this little fellow was in the cushions of his car and was discovered after he had investigated Mr. Nye's lunch . . . just a mouse.

Chester "Gimme" Holt just cannot stop asking for requisitions for one of this and two of that. **Ibra Adams** not only lost his chinaware, but also a big truck somewhere in the area.

Group 27 bids farewell to **Wilbur Marcier**, who is leaving to join the Army, and **Harold Davy**, who is entering the Navy. **Edward Spiezio** reports his basketball team is complete and will be ready for all comers. Inert Storage also produces musicians who will add to the entertainment at Fellowship meetings. . . . **Mack Willis** and **Ray Spivy.**

Matt Reay now believes in traffic laws since he received a ticket . . . stop signs mean stop.

Russell Kuntz of South Inert says not to bother him . . . he never tires.

Fred Ford, Jim Whitley and **Francis Greenwood** will soon invade the woodlands on a big game hunt.

Thanks to the Carpenter Shop for the fine first aid kits. **George Newton**, first aider, says they are the best ever.

Missing your ride makes one feel terrible, but when you miss your ride and hire a taxi and then leave your lunch and pipe in the taxi . . . well, ask **C. A. Kemper** how you would feel.

Football dopesters at South are having trouble . . . just cannot pick the winners.

South Inert bids farewell to **Francis Maine** who will be a member of the armed forces.

John Wald has promised to attend the next Thursday Evening Fellowship Meeting . . . he will be wearing a new suit and a new overcoat, so he says . . . if someone will furnish them for him.

Stanley Wiencek faithfully promised to replace his summer cap . . . probably with a toboggan cap.

HELEN SHIMEK

Correspondent

Machine Shop Messages
By Marie Studer

In the October 9 issue of *The Bomb-Shell*, it was stated that **Mario Zinanni** was the proud father of a baby daughter. Correction: Make that a boy, who has been named **Joseph Charles** just to clinch matters.

Helen Mandzuk has been feeling just a little blue the past two weeks. A very good friend of hers has enlisted in the Army Air Corps and is now stationed in Texas.

About the last word in hats is worn by **John Nilson.** It wasn't known the felt shortage was so acute.

Tom Dooley will do some center-aisling within the next fortnight.

The war in the Pacific brings back memories to **Charlie Gollick.** He spent many years with the Marines in the very islands which are big news today. And, it was no Sunday school picnic then, either.

Radio Ramblings
By Kathryn Richardson

The doughnut detail is well taken care of each morning and there are all types of dunkers. If asked "What's up your sleeve" the answer would have to be "coffee."

Kenneth Storch says he is taking medicine for a "code" in his head. And I always thought you had to study to get "code." This modern age is really wonderful, what?

Larry Jack requests that the banana truck (or so inscribed) seen in the area drop off a bunch or two. The driver will be paid—but definitely.

It's wondered if a priority is necessary to get a horn like the one on the car **Gust Hahn** rode to work in last week. It'd be real nice on a boat. No offense, no offense.

Percy Miller would make a good news commentator. He does a good job of keeping your correspondent posted and that's for sure.

Motor Pool Memos
By Frank Kern

The boys in the Motor Pool have had to dress up their language since the arrival of feminine chauffeurs.

Ed "the birdie" Silc is all atwitter now that his girl is finally in high school.

Ed Suffern has been newly christened "Chico Marx" due to his great piano playing ability.

Wonder when **Frank Kern** is going to win a bet?

Del Jensen is finally going to find out if two can live as cheaply as one.

Ford "Bim" June is back after a week's "vacation."

Frank Zembruski has received his last call for the Army. The Irish get all the luck.

The two new members of the Motor Pool are **Lee Davis** and **Pearl Raridon.**

Jack Knarr is one of the best contributors to the soldiers' fund. Ask the boys how the soldiers' fund came into being—it's really all right!

Service Garage
By S. J. "Kelly" Kukulski

A recent addition to the **William C. Sheridan** homestead is a baby daughter who was appropriately named **Ann.** Being proud of his little "Oomph Girl," Clyde passed out 10-centers on the occasion.

The garage boasts of an All-Irish "clean-up" crew in **Jim O'Keefe** and **Clarence Murphy.**

Speaking of the Irish, the "real McCoy," **Raymond E. McCoy**, who was transferred from the Motor Pool to the garage office and also assigned additional duties in the parts department, can't be overlooked.

They say that **Ralph Gallup** has artistic aspirations. Some day perhaps the FBI may be able to use him, judging by some of his *wanted* posters.

Ralph Nickleski is having priority difficulties. You guessed it, tires and tubes!

Leroy Stutz, Marvin Christensen and **Robert St. John** call their body and fender work "wrinkle massaging." Wonder what **Glenn Bitterman, Bud Wood** and **Buck Rogers** call their work?

A recent check-up of phone calls on the night shift disclosed that almost half of the calls were made between **Gene Gorski** and **Carl Adams** of the Richards Farm Garage. Trucks due for service, performance records of past overhauls, and parts used were the main topics of conversation. Strictly business, as **C. I. Wilson** would say!

Did you know that . . . **Sylvester Learned** is an ex-cabby?

Milford "Live-wire" Green once wanted to become a fireman?

Ralph Groll once sold a 10-cent cigar for a nickel and the next day bought it back for a dime?

Edward Lopeman is an ardent WLS fan?

Russ Benway has been giving the typewriter such terrific workouts lately that he can't be kept supplied with "ribbons."

Labor Pool Logs
By Edwin Geeding

The Labor Pool is glad to welcome back to their number, **Thomas Scott**, who was very ill for several weeks.

Luck and good fortune are extended to **Mr. and Mrs. Claude Sayre** who are departing this week for a much earned vacation. The Sayres plan visits with friends in Wisconsin and Kentucky.

Welcome to **Victor Maleski**, a new face in the Labor Pool.

Laundry Letters
By Bernadine Meister and "Dickie" Lieb

The new addition to the Laundry, which is the sewing and repair department, is now in operation. This unit adds 16 more employees. Hearty welcomes are extended to the new workers.

A welcome goes also to **Julia Ursettie** and **Harley Benge.**

"Shorty" Mossberger, former chief engineer of the American Institute of Laundering, is now helping with maintenance of equipment here.

Best wishes go to **Alta Davis**, formerly **Alta Iserman**, on her wedding.

Picture **Jennie Maiden** and **Bernie Meister** "rubber necking" at the tall buildings in Chicago recently, surrounded by a crowd of "leathernecks."

Round House Resume
By Jim Thompson

Dave Morris, congenial yardmaster, and **L. J. Kearns** enjoyed the sights on the south side of Chicago recently shopping for "Mid-Nite of Paris" perfume.

Congratulations go to **Mr. and Mrs. James Vitale** on the arrival of a son.

A card was received from **John Boe Burns** who is now stationed at Fort Belvoir, Virginia.

William Weitzel and **Ken Morgan**, comedy dance team, will appear without charges—benefits to go to some worthy organization.

Pipe Shop Presentations
By Edward Paulsen

Roy Abbot and **Jack DePratt, Jr.**, recently underwent appendectomy operations.

Roy Benson is certainly one of the most likeable chaps the Pipe Shop has had, excepting **Buck (Good Boy) Dale.**

Jerry Donahue is a new addition to the efficient hard working Pipe Shop office force.

Bob Stack has joined the Army.

The Pipe Shop bowling team is organized and all set to go.

Electrical Epitomes
By Ray Curtis

The Line Department Nimrods, **Jim Boyd, Ed Gannon** and **Charlie Hebert** told the boys not to buy any meat this week as they were going wild duck hunting. Well, here it is Wednesday and all that's been heard are alibis which are very disappointing to an appetite built up for roast wild duck. The weather has been too good or too stormy, or the wind was wrong. Smitty bought two quarts of oysters for oyster stuffing for the promised ducks, but finally served oyster stew.

The timekeeper for the Line Department, "Little Round Man" **Vearl Heinis** has a beautiful, well-trained, operatic tenor voice and a swell line of bedtime and parlor stories. Any groups which may be planning parties can call Heinis on Line 3130.

Bay Nicholson, material checker, is on vacation this week.

Here and There

J. P. Simpson spent his vacation visiting friends and relatives in and around Wichita and other Kansas points. On his return he spent a few days loafing around some of his former vacation spots in the "Shepherd of the Hills" country of the southern Missouri Ozarks. He brought back a bushel of Golden Delicious apples for the Foremen's Quarters and remembered other friends with gifts from that famous "Land of Smiles."

Everett Thompson, carpenter, and **Chuck Jiskra**, fireman, recently took over the facilities of a Coal City beauty shop to administer shampoos to each other.

Joe Giardini has been seen handing out cigars—not one, but two. It's twin boys at the Giardini homestead.

Kenny Christianson has entered the armed service.

Sheet Metal and Blacksmith Shops
By Jess Thomas

Mr. and Mrs. Tony Darin are the proud parents of an 8-pound boy, born October 27.

John Gaffney's hand is almost well again after being seriously bitten by a wild duck.

Maynard Weidenbach has joined the armed forces, enlisting in the Aviation Corps.

The Blacksmith Shop is sorry to lose **Gus Hollman** who was forced to retire by ill health.

Martha Herrity, chief operator, is vacationing in New York.

Production Planning

LORETTA RYAN

Correspondent

It seems that little **Marjorie Gall** has just been in blossom with smiles due to the fact that she has received word from her brother, **Sgt. John Gall**, who is located in the Hawaiian Islands.

Mrs. Ray Banker of Wilmington, **Betty Welch** of Morris and **Shirley Wissells** of Odell are saluted as new members of the department.

Since draft boards are taking so many male members, girls have been given preference in the positions of progress clerks in the various groups. Their teachers seem to enjoy the daily trips up and down the lines, to gather their reports. Perhaps, delay in receiving them will be unheard of now.

Larry Crawford is strutting about with a tie on these days. Quite unusual, don't you think!

Mae Norem received word that **David Gianuzzi**, formerly of Group 1, is now at Camp Roberts, California, and that he would appreciate hearing from all of us.

Wallace Benson is quite the one now that he favors all with special coat hangers, which are so scarce.

A secret agent reports that **Mary McGovern** has ordered a new shirt through **Frank Falwell.** But he says they are not so easy to secure. Perhaps **William Dronsfield** can explain.

Mary O'Connor says that she is thinking seriously of trying to join the WAACS or the WAVES.

Have you heard that **Dorothy Maxwell's** favorite color is red, especially on little boxes. Could it be gift boxes or . . .?

The writer would appreciate sincerely contributions for this column from the progress clerks in all the groups, from the Traffic Audit Department, and from anyone else who might be interested.

SPRAYING of bombs and holders is a task which girls have been able to take over in Group 3-A. Shown here with the spray gun is Anna Jancuska.

Group 2

EDWARD KEENAN

WILBUR GALBRAITH

Correspondents

There have been many requests for another "Scorchy." Only this time some of the boys want to get together and write a column about correspondents. Just take it easy, fellows—if you knew where they got their information you wouldn't feel the way you do about them.

Best bet of the week . . . **Shorty Kirkland** trying to get the operator on the inter-group telephones so he could get the long distance call through from Building 7 to Building 4.

With the passing of the softball season, Murphy's Boys are now organizing bowling teams to represent Group 2. A large number of the fellows have announced their intentions of joining one of the bowling teams and the start of league play is anxiously awaited.

Clayton Bryant, a former employee, who is now at the Naval Training Station, University of Wisconsin, Madison, Wis., wrote asking to be remembered to all the boys.

Tom Frew finally managed to take a one night's leave of absence from his domicile. Tom attended the dinner at the Mess Hall last Thursday evening.

Beatrice Merrick, nurse, reports that **Roy Healy**, former safety engineer here, is now at the Green River Ordnance Plant as chief safety supervisor. All the fellows wish him the best of luck.

Sympathy is extended to **Claude Massey**, assistant foreman, whose father died recently.

Many commendable remarks have been heard about **Bob "Tubby" Sohan's** ability as a poker player. "Tubby" also is reported making a habit of toting packages for young ladies in Wilmington and they say that a collection is being taken to buy a red cap for him.

Art McMahon is now known as "substitute nurse" and anyone requiring first aid attention can find Art at Building 16.

Con Clennon says his son, **Jimmy**, has invented a new steering wheel which promises to replace the conventional wheel now supplied on most automobiles. "The driver starts turning the wheel about two blocks before the corner and by the time the car arrives at the corner it automatically makes the turn." Con has been experimenting and reports it is too early to comment as yet.

Tommy Kenner is reported very fond of after dinner mints.

Johnny Ala, so the story goes, while hunting ducks scared up some six ducks without firing a shot. It might have been "duck fever."

Frank Delaney recently celebrated his 25th wedding anniversary October 24 at Manhattan, Ill.

"Woe is me, woe is me," shout each of the fellows who has ridden in **Pete Kelder's** "green hornet." With **"Tex" Riley** acting as salesman, the "green hornet" was sold to a wealthy man for the staggering sum of $100 with a $10 down payment being made on this 1935 Chevrolet. The buyer plans to make a trip to Boston in the near future and has asked Bill to accompany him as navigator.

John Johnson has two potential world champion lightweights in **Ed "Tiger" Wren** and **James "Wildcat" Scobell**, it is reported after a big battle just outside the city limits of Braidwood. Both of the boys are sporting black eyes and numerous bruises.

The big question is: Where is the softball trophy? **Frank Gaglione** and **Bill Stanley** have just about exhausted their supply of answers.

Ask **Chuck Pierce** about the "Polish Backfield," or better yet. ask **Gene Hunt**, **Archie La Borence** and a few of the other associates of these fellows just what this means. Probably **Sam "Barbasol Man" Hoffman** could explain this enigma.

Bob Schmitz, group inspector, reports **Tom Todd** and **Art Ricketts** have completed the preliminary course in Commando fighting. By the middle of the month they will complete the advanced course; then watch out, boys.

Sympathy is extended to **William Lawrence**, inspector, whose mother died recently.

Bill Malone has acquired himself another "nickname." This time it is "Black Snake Bill." As everyone knows black snake is another name for a horse whip. When asked how he got the new name, Bill replied, "I ain't talking to any stooge from *The Bomb-Shell*. It could be that Bill started to drive some men and they hung the new tag on him.

Joe Connors would like to start suit against any responsible person connected with *The Bomb-Shell*. After he and **Art McMahon** and **Tom Frew** got their heads together they decided that they could not sue because the facts printed in this column are all true and fit for publication. Besides, it is believed they like the publicity and really eat it up.

Ev Bradley decided to do a little hunting just a few days ago. He armed himself with three boxes of shells and drove about forty miles from home to the old stamping grounds. When he got there and found out that he had left the gun behind he was very much put out. If you could have heard him you would have gotten a high school education in five minutes.

During lunch hour on a day a couple of weeks ago a friend overheard a conversation between **Texas Riley** and **Dan Obrien**. Danny asked Texas to shine his shoes and Texas replied, "What's you number, fellow?" To which Danny said, "It's in the 59,000 series. Why?" Texas scratched his head a bit and said, "Get you feet up here, that clock number is good enough for me. Why, the foremen have only got clock numbers in the 25,000 series and you have them doubled and 9,000 to spare."

Inspection

ROBERT PIERSON

Correspondent

The picture of **Harriet Gassensmith** in *The Bomb-Shell* has resulted in several letters from soldiers overseas.

The Inspection School sponsored by the Inspection Department has proved successful and educational to all group inspectors and supervisors. In these classes were shown all points of inspection, assembly line and functioning of complete shells and bombs, making it easier to pass or reject any item of inspection in all groups. Thanks go to **Albert Rosier**, Group 9, for his fine teaching, **A. J. MacLellan**, chief inspector, for perfect attendance, **Bill Hartman**, for fine cooperation and all group-inspectors for their lectures.

Someone asked **Verna Lazor** what sort of work she does. She said, "Praise the Lord, I pass the ammunition."

At the inspector's school no one asks more questions than **Supervisor Mary Piunti.**

Sophie Matkovic would make a good WAAC. She's on the Slovenian Cadet Drill Team.

Sincere sympathy is extended to **Velma Grills** upon the recent death of her brother, **Pvt. Lawrence Lemenager.**

Now that **Stephanie Bielec** has reached her 20th birthday, is she really going to grow up?

Anita Dupuis received the nicest surprise when her brother, **Lionel**, who is in the Navy, came home on a 15-day furlough.

Jeanette Cahan of Kankakee spent last week-end with **Moline Burris** of Joliet.

Ed Jilek is considering a "rear gunner" for his DeSoto—he recently was "blitzed" from that direction.

"In again out again" **Jack Abraham** is once more inspecting at Group 2—seems the Army just can't decide about Jack.

Pvt. Clem Birch, former Group 2 inspector, postals from Camp Grant that he is leaving for—*censored.*

Walter Moorhead reports that the Naval Reserve, Brooklyn, N. Y., variety, is a breeze in comparison to the Inspection Department.

With the oncoming income tax, "income" **Ralph Pratt's** troubles. Someone said he didn't realize this income situation could give him such a "come on."

The girls at Group 8 sure keep their fingers moving fast. They seem to like it and never complain of being tired. They are "real soldiers," and the inspectors keep up with them, inspecting primers with their trained eyes and experienced fingers.

Happy birthday to **Dot Ulbrich**, Group 8. About 19 years ago her mother was lullabying on October 27.

Something old, something new—Something borrowed, something blue? Certainly not **Betty Novatney**, who was scheduled to become the bride of **Lt. Herman Doehring** October 24.

Elsie Reeves is going to make her home in Los Angeles, Calif., and the girls wish her a lot of luck, but will miss her.

Clarence Hartford swears that if the LaSalle Bus Company doesn't initiate faster service to Marseilles he will commute to EOP on a mule.

Best wishes from 3-A this week go to **Gil Miller**, the veteran who became one of the "Klan in Khaki" October 29.

The 3-A boys have begun to wonder whether **Myron Champoux** was a cog in the machine or a squeak in the stairway at Group 1. Anyway, according to the last issue of *The Bomb-Shell*, the Group 1 boys haven't missed him yet and he has been in Group 3-A for ages and ages.

Congratulations are in order for **Bob Manning.** Yep, he "dood" it.

"Moe" Brennan is showing all the signs of an approaching second childhood. Recently he emerged from his daze long enough to mumble "dit-dah-dit, dit-dit-dah," etc., the worst was feared. Investigation and careful diagnosis revealed he isn't "khaki-wacky," but "radio radical" and "code-crazy." It gets him the day shift steady, though, so watch for more baby-talk to come forth.

Meek and mild, but firm and persistent, **Paul Rusher** will endeavor to break a few bones for the benefit of the USO at the Lake Geneva wrestling meet Wednesday night. The opponent's right forearm will make a good souvenir.

Plump but happy **Gene Morrow** finally dropped to despair the other day when someone swiped his lunch. Oh well, he should quit eating, since girdles have been put on the priority list.

Corn

Percy (working on drill press): Bring me two bits from the store room.

Merle: If I can't find them, is it my vault?

Gust: What's the matter, are you tired?

Larry: Yeah, I wish my car was.

Ed: What kind of coffee is this—drip?

Coope: Quit calling me names.

U. S. Distributes Gasoline Ration Forms

OPA Form R-534 PART A
(Rev. 10-1-42)

FORM APPROVED
BUDGET BUREAU No. 08-R084-42

UNITED STATES OF AMERICA
OFFICE OF PRICE ADMINISTRATION

TIRE RECORD AND APPLICATION FOR BASIC MILEAGE RATION BOOK "A" OR "D"
(For Passenger Automobiles or Motorcycles Only)

(Print plainly or type)

(Name of registered owner)
(R. F. D. or street and number)
(City or post office)
(State)

(Print plainly or type)

(Vehicle license number)
(State of registration)
(Year model)
(Make)
(Body type)

The registered owner of the vehicle must sign this form unless good cause for failure to do so is shown to a War Price and Rationing Board. A separate form must be filled out for each vehicle.

If a Gasoline Ration Book *has* been issued covering the motor vehicle described herein the filing of this form is a condition to the right to retain such gasoline ration. The completed form is to be filed with the applicant's present War Price and Rationing Board.

If a Gasoline Ration Book *has not* been issued covering the motor vehicle described herein the filing of this form will serve as an application for a Basic Mileage Ration. At the time of application the registration card of the vehicle must be presented.

Vehicles falling into one or more of the classes listed below are not eligible for "A" or "D" ration books. In such cases application for ration should be made on another form to be obtained from the applicant's War Price and Rationing Board.

1. An ambulance or hearse.
2. A vehicle held by a dealer for sale or resale or operated on dealer license plates.
3. A taxi, jitney, or vehicle leased from or held for rental by a car-rental agency.
4. A vehicle owned or leased by a Federal, State, local or foreign government or government agency.
5. A vehicle which is one of three (3) or more passenger automobiles (or three or more motorcycles) owned or leased by and used principally for the business or occupational purposes of the same person or organization.

(Not to be filled in by applicant)

(Ration book number)
(Date of issue)
(P. O. and State of issuance)
(Registrar)

APPLICANT WILL NOT WRITE BELOW THIS LINE (OVER)

(Applicant does not fill in next portion of form which is retained for government records.)

List serial numbers of tires mounted on the vehicle described in this application (including one spare):

In the spaces below give the information indicated regarding all other passenger-car tires (tires designed primarily for use on passenger cars), including scrap tires, which are owned by the registered owner of the vehicle or by any person living in his household and related to him by blood, marriage, or adoption, and which are not mounted on motor vehicles or equipment. Mounted tires include one spare per motor vehicle. Do not include motorcycle tires or tires which have been reported on OPA Form R-17 or R-17 (revised) or reported by a manufacturer to the WAR PRODUCTION BOARD.

State number of tires (.....) and list their serial numbers.

GASOLINE RATION BOOKS OUTSTANDING FOR USE IN CONNECTION WITH THIS VEHICLE

Class and Serial No.	*Date of issue*	*City and State where issued*

I HEREBY CERTIFY that there is no gasoline ration book outstanding for use in connection with the motor vehicle herein described, except as listed above; that said motor vehicle is in use; that the tires on this vehicle will be kept in serviceable condition by repair and not operated beyond the recapping point; that I will not drive in excess of 35 miles per hour; that no passenger-car tires in excess of those listed above, except those mounted on other motor vehicles or equipment, (including one spare per motor vehicle) are owned by the registered owner of the vehicle or by any person living in his household and related to him by blood, marriage, or adoption; and that all of the statements contained herein are true and accurate to the best of my knowledge.

Section 35 (A) of the United States Criminal Code makes it a criminal offense, punishable by a maximum of 10 years' imprisonment, $10,000 fine, or both, to make a false statement or representation to any Department or agency of the United States as to any matter within the jurisdiction of any Department or Agency of the United States.

(Signed) .....
(Person submitting application)

(Date) (Address)

Applicant will fill in only box in heavy border below in Part B.

OPA Form R-534 Part B

OFFICE OF PRICE ADMINISTRATION

FORM APPROVED, BUDGET BUREAU No. 08-R084-42

TIRE INSPECTION RECORD

The serial numbers as listed herein by the applicant are the same as those registered with the War Price and Rationing Board.

(Board No.) (Date)
(City) (State)
(Signature of registrar)

SERIAL NUMBERS OF MOUNTED TIRES; INCLUDE SPARE

(Name of registered owner)
(R. F. D. or street and number)
(City or post office)
(State)

(Vehicle license Number)
(State of registration)
(Year model)
(Make)
(Body type)

Applicant fills in all information within this heavy line

OPA Tire Inspector makes all entries below this line

(Applicant does not fill in next portion of form which is retained for government records.)

Here is the application which motorists must fill out to obtain basic "A" gasoline rationing books. Consisting of a single sheet, printed on both sides, the applicant fills in only half, retaining the remainder for tire inspection purposes.

HEAVY WORK doesn't deter Susie Garner, left, and Esther Knauer from their bomb handling jobs in Group 3-A.

Group 1

JACK BARRY
Correspondent

Tex Fast, conductor of the Diesel operating here, was wed recently to Helen Bergbower, formerly secretary at the Illiopolis Ordnance Plant. The honeymoon is over and Tex is just as hard to find as ever.

Flowers for the *living* are the kind which count. Supt. Joseph E. Salmon posted a recent communique thanking one and all for the effort which had enabled this group to make its quota for ten months in a row. Incidentally Building 10 was cited especially and awarded the group E for excellence . . . signifying Edward for the middle initial.

Charley Lackey saved a couple of lives one Sunday. He picked up Morris Perry and Walter Vickery, who were about to be late for services, and brought them to work.

The Army got the group pick-up drivers, Dan Paunavich and Dick Peterson, so the war won't last long now. There are two smiling new ones to take their places, Tiny Bertram and Bob Blaine.

Ernest Kinzer and Raymond "Tony" Montayne have also taken up arms and all are agreed that both will acquit themselves well.

Ruth Thompson complained, "Howcome I don't get my *Sky-Rocket Scoop?*" Of course, she referred to *The Bomb-Shell*, so she was told something which should be of use to others. Quote: "Send your new address and your old one to the Payroll Department, and you will start receiving a noospaper which is acknowledged as "tops." Unbuckle.

The stork brought Mr. and Mrs. Leonard Anderson a baby girl October 22 and Leonard passed around the cigars. If the little tyke is as good as the cigars, she will be a dandy and that's high praise, for the smokes were very fine indeed.

Harvey Barrett is entering a poster in the current contest and all are pulling for him to win the prize.

Wuxtree! Wuxtree! did youse girls and boys notice that Group 1 headed the list in the last issue of *The Bomb-Shell* as having had no lost-time accidents during the month of September?

Recently this column carried the names of 50 veterans of the World War I who are now employed at Group 1. Without further ado, about 70 others declared war on account of because they were left off the list; "so, Lafayette, here they come":

Leo Finlan, Arthur Reigh, Sam Hansen, Walter Wilcox, Robert Blaine, William Kampf, Les Southcomb, Charles Schmitz, Howard Fread, L. B. Hayden, Sam Marx, John Orzechowski, Tego Larsen, George Mulligan, Andrew Dalziel, Frank Miller, Mathew Wykoff, Paul Vosberg, Earl Crouch, Meyer Harwick, Charles Witten, Joe Vacca, Turner Albright, Clyde Merkey, John Memenga, John Ludwig, Glen Stitely, George Perkins, Michael Bobel, Walter Bruhn, James Hoffner, Matthew Vohanich, Stanley Russell, Nicholas Harris, Arthur Diedrich, D. E. Jones, Jacob Lucht, George Mears, Scott Starts, R. Finke, R. B. Templeton, Clarence Eide, Frank Miller, Thomas Buckley, August Lampe, Vern Brown, C. C. Wright, Carl Stirlen, B. W. Hill, Homer Cole, I. W. Holman, Paul Bloomquist, Oscar Swanson, Thomas Reilly, William Sloan, Clarence Erickson, Ralph Ritter, Ray Whipple, Emmone Isenberg, Charles Durham, Edward Anderson, Robert Doyle, James McGrath, A. R. Klassy, Paul Ashline, Robert Findlay and Lewis Tucker.

Look for casualties in the list when it appears, for an old-fashioned soldiers' whoop-de-doodle at the Legion Hall at Lockport is planned for November 7 to celebrate Armistice Day.

Here go some more of the lads to help various branches of the armed services: Joe Ambrosovich to the Coast Guard, Dan MacMillan to the Army Air Corps, Leo Cromwell to the Army, Robert Nelson to the Army Air Corps and George Prodehl to the Army Signal Corps.

Hospital

EVELYN RICHARDS
Correspondent

Heartfelt sympathy of the entire staff goes to Dr. H. L. Schultz, whose wife died last month.

Louise Thompson, nurse at Group 4, was scheduled to leave for the Navy October 30. She will be commissioned as an ensign. On November 17 she is to report for duty at San Diego, Calif. Before leaving a lovely pen and Eversharp pencil engraved with her name was given to her by the nurses and technicians of the hospital and groups.

Something new has been added to the hospital. A tight situation was relieved upon the arrival of two new files for the X-ray Department. Elsie Baer, technician, is very happy over her new files for her X-ray films.

You will also be seeing a new shiny white ambulance around the area soon. The ambulance drivers practically need chains to prevent them from using it until it is fully equipped.

Elizabeth Russell and her rider, Bertha Perush, sure knew it was getting close to Hallowe'en when they saw her car after work. Running out of gas, they had to leave the car along the roadside and thumbed a ride to work. Returning to the car at night they found it to be decorated with cornstalks, etc. It truly looked like the last rose of summer in ghost town or perhaps an autogyroscope from the same world. They now know what trouble one gets into by trying to drive a car on their imagination in the month of October.

The staff sends birthday greetings to Dorothy Lundin, nurse at Group 1, who celebrated her anniversary November 4.

General Offices

MAE BELLE ANDERSON
Correspondent

Pinch hitting again for May Belle Anderson, the news lines up as such:

A visitor to the women's first floor lounge early this week was little Minnie Mouse. She spent a good part of one a.m. greeting one and all with a cheery good morning while she went merrily on with her setting up exercises, running wildly from one corner to another—frightening everyone to near paralysis. Couldn't tell whether it was Minnie's squeak or Jackie Dailey's squeal that was heard all the way down the hall.

Ethel Connor is a lover of rainy weather. Yes, indeed. She especially enjoys it when friend husband leaves her the keys to the little car that's no longer there and she has to canter around the parking lot, drenched to the skin, fury in her eyes, and finally, wrath in her manner, to learn that he has moved the car to parts unknown.

Gerry Drexel—the gal of many whims—displays the latest shade, Mrs. Miniver Rose—at its best.

Elva Thomas is willing to bet one and all that her next trip to the "Windy City" will not be sooner than next year. Her last was the last for some time to come, she tells. To spend a perfectly lush fall evening traipsing all over the city of Chi for one item, and then not find it—well, it was just too much. So now she'll stick to Joliet, and like it.

A request — from: Rosemary Kane—in full, read following: If any of you make a trip — or a jaunt — or take a ride — or even a walk, maybe, do send her a picture post card. Gosh, she gave one friend a dime just to send her a souvenir from Chicago one Saturday, and the chum sent the article, special delivery, to Rosemary Kane, Wilcox Street, Chicago, instead of Joliet. So the other package is probably still making the rounds of the Chicago post offices. Rosemary still hasn't gotten any mail. So hurry, hurry, hurry—

And now, till next time, and your regular news gatherer—

Welcomed back to the old haunts this week is Ginny Krause, secretary to G. B. Pumphrey. Ginny has had quite a battle with a malaria germ that was doing its best to get her down. It's so nice to see her back.

Edith Lewis, until last week an Administration Area miss, is now keeping time out in Group 4. And she reports that she does like it.

Another person leaving us, but this one to go quite a distance, is Verne Schoenberger, who left last week for California—you know, that place where the sun is supposed to be always shining.

On October 17 in Norfolk, Virginia, Marian Hyland, former secretary to E. J. Walsh, general superintendent of loading lines, became the wife of Lt. Frank Dorr of the Navy. They are now residing at Portsmouth, N. H., where Lieutenant Dorr is stationed at the Navy Yard. Taking Marian's place is Mary Virginia Gallagher — an Irish lass that you're sure enough going to like.

Arlene Schoendorf says that she whiles away the lonely hours drawing pictures of bunnies, robot men, etc. The rest of the time she draws pictures for all of the posters which come to the ditto room. And good they are, too.

June Kaehlert, Ruth Meyer, Veranice Quade and Rita Dwyer are out of exercise in a big way this season. At least three nights a week finds them at one of the local bowling alleys knocking the pins down ten at a time.

Robert "Wimpy" Forst coins a new word. He said that in this cold weather the oil in his car "*Cogilates.*" He is one of the finest dressed men in EOP with his pretty fingertip coat and screaming light tan hat.

Le Roy Anderson, the girl shy youngster, called the Motor Pool for a car and driver. He got it with a lady driver by the name of Lucky Davison.

Riding in J. C. Quade's car the folks do take an interest in the splendid country and animal life. Always on the lookout for something new. Looking for ducks at the dam, if you please the "Dam Ducks," locating pheasants, new plant life, etc. One subject was the number of crows in the area. The other evening a bet was taken that no crows would be seen. No crows were seen, R. W. Turner won. Another was the number of rows on an ear of corn. Try this and enjoy this real country.

Harry Mac Rae went to the game at Notre Dame, but he sat on the Illinois side. His new hairdo was mussed up from the excitement.

Max Wolfson says the 14th baby has arrived in his apartment building. Max will probably be the godfather.

Herb Burch is eating chocolate sundaes now.

E. F. Washburn has drawn an imposing poster depicting the EOP war efforts.

Don Lewison is an artist, too, now being occupied in drawing pretty girls for the Joliet University Club.

Robt. "Wobbles" McKeon feels romantic in the fall instead of spring. He is different!!!

Cris Neff and Mike Chuck of the blueprint department have been named the Golddust twins.

"Tiny" Walter Peterson reports that the bowling team is winning two out of three games now.

George Karas holds the speed record going down the hallways of the Administration building.

There are sweater girls and sweater girls—but have you seen the sweater boy? He is none other than Francis Gonce from way down South—and what a boy!

After a little sleuthing, it was learned that Russell H. Watt is better known to his most intimate friends as "Superman."

Rosemary Hebert is the smiling little brown-eyed miss at the Pass Desk. She was formerly in the Plant Protection Department office.

Esther Heavens, formerly employed in the Personnel Building, is now a member of the Plant Protection Department in the Administration Building.

Stephen McGann is addicted to wearing pink bows on the back of his coat—much to the delight of all the employees in the Personnel Building.

Edmond Van Winkle, guard, formerly at the Pass Desk, has now joined the Fingerprint Department in the Personnel Building.

E. O. Huey, superintendent of Plant Protection Department, reviewed the policewomen drilling last Saturday morning. He became so enthusiastic that he started in to drill. He came back to his office in the afternoon and complained of having a charley-horse. He'll probably just stand at attention next time!

Mary Kleeberger's compass went off the beam, and she found herself in unfamiliar surroundings recently.

High Explosives

MARJORIE HOWERTON
Correspondent

A calamity took place October 15—date of the third Fellowship Dinner. Someone, by accident, picked up St. Clair Smith's orthodox hat and left him a similar one, though not nearly as becoming. However, the hat was returned Tuesday, October 20, 1942, and now everyone is happy and contented.

High Explosive Laboratory

There was a blessed event at the Alexander Becker home in Chicago October 25. On October 26, poppa, government inspector at the lab, passed out cigars, proudly announced that the arrival was a boy, weighed six and one-half pounds and answered to the name of Ronald. (The Beckers had selected the name Ronald long before he became acquainted with *Ronald Beck, another of the government inspectors.*)

Verneille Holder and Sylvan "The Baron" Rothschild saw the Ohio State-Northwestern game at Dyche Stadium last Saturday, ate broiled, stuffed lobsters at the Latin Quarter and then spoiled the whole day by losing Vern's purse, containing some $40, her EOP badge and an uncashed paycheck.

The Charles Bridwells, Jr., saw some Ohio friends at the Ohio State - Northwestern game and afterwards held open house at an apartment they had taken for the week-end at the Seneca Hotel.

Dave Hill, group inspector, is moving from Kankakee to La Grange, Ill., where he will live with his brother and family. Dave will be a big help around the house, especially in the practice of culinary arts, if the gingerbread he made for the lunch pool is an indication of his cooking prowess.

According to later information, the report in the last issue of *The Bomb-shell* of the birth of quite a number of puppies to "Rosemary" Hafele was without foundation.

STIRRING EXPLOSIVES is another task now assigned to girls in Group 3-A. The two workers shown here work just ahead of the loading crew, part of whom are shown on Page 1.

John "Teddy" Snyder spent several days at his home in Ohio last week.

With the opening of the duck season, the lab's mighty hunters got out their guns, put on their boots and started blowing on those whistles which fool the poor ducks. Charles and Ruth Clifford went out last week, shot four ducks and almost got shot themselves by a nimrod who didn't seem to care where he pointed his gun. Earlier Clifford, Dick Orndorff and John Clark had gotten five ducks between them.

Nelson Tippett has contracted intermittent fever.

The Jess Kinsers have moved from Joliet to the Westgate Hotel in Chicago.

Marcia Mitchell entertained her in-laws from South Bend last week-end. Mamma-in-law had the back of the car loaded down with fried chicken, cookies, marmalade, etc., for which Marcia was appropriately grateful.

Ray Hybarger and Palmer Overholt surprised everyone by arriving at the lab bright and early Tuesday all shaved and shined. They had been informed that they were going to have their pictures taken, but the posing was postponed.

Group 66

The goose hangs high at 66, and everything's running in the groove. Business is on the upward trend and the boys are all on the beam. E. L. McCray is still holding sway and the Igloo Boys are setting in for a long, but successful winter. One young fellow, Newman E. Tyree, got out of the groove last week when he took on a new "skipper" whose name was formerly Mary Finerty of Chebanse. They drew up the contract in Missouri some place and the elated groom returned last week for double duty. One look at the "skipper" is quite enough to lower the resistance of any confirmed bachelor. The local mentors couldn't believe the lucious descriptions offered by the boys in the "know" so they went down to take a gander for themselves at the big dance last Saturday night in Kankakee where the bride was on display. The "Box-Car" boys from 66 rendered the "Swing" and the young couples was handed a cash gift.

Earl Hunt didn't go to the dance because he hasn't completed that home work yet and, like John Zopf, he is still waiting for that invitation from Uncle Sam. By the way of comparison, writes Tony Tamazaitos, ex-66, when some of the rest of the fellows hit the service, they will look fine. He tells Ivan Parr, foreman, that he has gained 35 pounds in the seven months he has been at Camp Barkley, Texas. He appreciates *The Bomb-shell* and sends a hearty hello to all the boys —and girls.

Bob Irwin, Inspection Department, invited several to a duck dinner and brought his own duck —'tis said he used a Pompom gun —anyway the bird tasted mighty good. Speaking of dinners, some of the boys at 66 have taken their "soup and fish" out of the moth balls and are preparing themselves for the next "Timekeepers Ball"— it's said they are very snappy and the company *dee-vine*. The barnyard golfers going "ritz" for an evening should make a vivid picture.

Group 63

Ed LaRocque really has plenty of the three V's since his dentist extracted two teeth—maybe now Mrs. LaRocque can get him to complete her fall house cleaning.

Group 65

Paul A. Trepanier, Group 65, has left for the Army.

Group 66A

St. Elmo "Kansas" Stewart claims to be a second Atlas—one of these days he'll be asked to demonstrate his prowess.

Joe Billy, better known as "Butterball," is just as contented with a hammer and nails as a baby is with a bottle of milk.

Jim Tormey would be absolutely lost if someone took his old standby—a plug of tobacco.

Ordnance Inspection

GERALDINE M. WARD
Correspondent

Capt. A. G. Resch visited Washington, D. C., October 26 on official business. While in Washington, Captain Resch saw Adolph Menjou in the Army War Show.

Captain Resch, William F. Douville, chief inspector, and William H. Peterson, divisional inspector, spent October 23 at the Jefferson Proving Grounds, Madison, Ind. There were no hotel accommodations at Indianapolis due to a convention of 10,000 school teachers, so they stayed with obliging friends.

Mr. Douville and Stanley L. Eisler visited the Green River Ordnance Plant October 19. They conferred with Maj. C. G. Tolson, commanding officer, and Lt. D. E. Hornbeck, both of whom were formerly stationed here.

Clara I. Wehner spent a week-end at Louisville, Ky., where she visited with her sister, Mrs. S. G. Hickman, and family.

Mail has been received by Ethel Dirker from a Coal City boy at Guadalcanal in the Solomon Islands, who says he is using an empty EOP ammunition box as his desk, which indicates that EOP ammunition is playing an important part in distant lands.

Miss Dirker and Betty Ross assisted the Grundy County Red Cross chairman in soliciting funds and packing kits for the boys who are scheduled to leave for foreign service. Sixty kits were packed. The contents consist of the following: Story book, bar of soap and container, razor blades, stationery and pencil, chewing gum, cigarettes, sewing kit, shoe laces, shoe shiner, playing cards. The kit is made of khaki fabric and is very useful for storing wearing apparel.

Carl Anker had an exceptionally busy day October 24. In the morning he attended the wedding ceremony at St. Raymond's Church, Joliet, uniting Joan Hart and Harold Bowler. Immediately after the services, he and a group of alumni of Ohio State motored to Evanston, Ill., where they witnessed the Northwestern-Ohio football game. The party consisted of Joseph Ralston, Roald Evenson, Robert Cretcher, William Proudley, and Mr. Anker.

Vieana Wheeler attended the Northwestern-Ohio game also. However, she refused to sit with the boys because she was cheering for Northwestern.

MORE ORDNANCE INSPECTION

The Ordnance Gage Lab bowlers, Roy Scherer and F. Warren Weithofer, whitewashed the Technical Division's Eisler-Anker team last Friday night.

Alexander Becker, Group 71, became a proud daddy when his wife presented him with a son, Ronald James, October 25.

Maj. Kenneth M. Haber, commanding officer, and Fredrick G. Robinson, Safety and Security Division, should be able to tell some very interesting stories. Both are Ohioans and saw plenty of action in World War I. Major Haber served as a combat engineer with the Army, while Mr. Robinson, now retired, was a commander in the Navy.

Congratulations go to Bernard O. Brown, Safety and Security Division, who was married recently. Mr. Brown likes good cooking and is desirous of securing tested recipes so that the new Mrs. Brown can try her culinary art. Send your favorite recipe to him at the Administration Building, Room 8.

Home isn't home any more since Maggie O'Laverty and Frances Olroyd left Group 4 on an inspection tour of the other groups.

Group 4 is looking forward to the visits of Margaret Carter, Helen Skumanich and Helen Zivic, and hope they are all as enjoyable as the visits from Merle Denny, Group 7; Margaret Cohil, Group 9, and Margaret Kertes, Group 8.

Group 5 lost one of its best inspectors in Harriet Nadelhoffer when she was promoted recently to the Fuse and Booster Laboratory.

Milt Krissman, Group 5, should receive the award of achievement for guest entertaining. The last time Phil Horwitz spent an evening at Mr. Krissman's home, they ended up bandit hunting.

Helen Biernat, Group 5, is advocating an advanced dancing class for those who are interested —with herself as instructor, of course. Someone suggested a class in *walking* with Lea E. Gudath as the main pupil.

Group 6 wishes Elizabeth Button a speedy recovery from her injuries, suffered on her way to work.

Marie Donahue and Dorothy Haag are representing Group 6 in the advanced inspector's class.

Mr. and Mrs. E. L. Crumbaugh recently spent several days visiting relatives in Kentucky.

Personnel

DARA PREW
Correspondent

Delores Courtney and Marge Lawhead have been going steady on Thursday nights for several weeks now. The fact that checks come on Thursday might be the reason they meet in Joliet for dinner and a show.

The changes in the building since the new addition has been completed have Claude Sayre, assistant superintendent of utilities, completely befuddled. Stalking determinedly into the building, he wended his way to Room 9 only to find that one of the physicians had taken possession. Admittedly puzzled, he stuck his head into another door with a querulous, "Where does F. C. Schauland hang out now? Is this change permanent?"

Lucille Dillon is the newest of brides from the Personnel Building. Last Saturday she left the plant and Thursday saw her enroute to Sweetwater, Tex., where her new husband is stationed as an Army denist at Camp Barkeley. All good wishes from the department go with good-looking Lucille and her new spouse.

Although the first letter has not been written from either end of the mail route, Charlotte Wolcott couldn't help wondering the other noon what there was in Egypt besides dates (the kind you eat) and camels. Soon forthcoming will be the address of a soldier stationed there, and her plans are almost completed for a trip next summer.

It's a feud down in the transfer department with the main participants Margaret "Dollie" Lundquist, Catherine Smith and Rita Cooney. Katie and Rita have purchased raincoats similar in each and every detail but color, and they insist that Dollie is merely jealous, while her resplendent raincoat is her pride and joy and she patiently explains that she likes to be different.

Receptionist Fred Cadwallader has an amusing anecdote of just how completely the new hours spoil his Saturday evening and Sunday holiday. He gets home late Saturday afternoon, eats his dinner and then, when he wants to go out Saturday night, he isn't hungry. If he does eat, he's stuffed. If he doesn't, he's so hungry by the time refreshments are served that he makes a pig out of himself and then goes home only to toss all night because he's eaten so much rich food so late at night. Thus Sunday morning he doesn't feel his usual "chipper" self and the whole deadly mess starts right over again. If you don't believe this tale, and have a spare half hour, he'll tell you about it any time.

Coming upon Evelyn Melby almost running down the hall one day, several of the girls decided it was their duty to discover just why she was fleeing. The root of all evil was not among the roots at all but up among the leaves, as it was the necklace of almonds and hazel nuts which caused the trouble. Some of the co-workers wouldn't believe that the nut meats were still intact and were about to take drastic measures to prove the point when that 11:30 a. m. starvation period ended.

From the annals of literature (composed in the Personnel Department) comes this precious tidbit on how to open a paper cup full of coffee in one simple lesson:

"Grasp the cup firmly in the left hand. Take hold of the tab on the lid of the cup with the thumb and index finger of the right hand. Brace feet against the desk and pull with an upward movement of the right arm. Place the rim of the cup to your lips and a-h-h delicious, delight and yum-yum. Just like a shot in the arm."

Irene Mulligan travelled all the way to Columbus, O., last week-end to visit her Army boy friend.

Just to prove that the man who talks the loudest about his bowling shouldn't scare out his timid opponents, comes the bedtime story of the little boys from Personnel who arrived at the Recreation Hall with two teams set to fight to the last pin. Receptionist Howard Hauze, with his voiced average of 165, didn't seem to have the necessary steam and went down to ignominious defeat, while Olive Pierce of the Reference Department, who has never bowled, sent his first ball down the alley for a perfect strike. Alfred Dearth, also from the Reference Department, was the champion for the evening, with Clement Lambert, interviewer, a close second. But the great bowler from the interviewers who wanted to make bowling worth while for his team and place a little wager on the side was Robert Withey. He was so anxious for his team to win that he sent his first three balls straight down the gutter with his hook.

INTEREST IN CONTEST to select Miss Victory was shared by Army officers at EOP. Four of the entries are shown here with Maj. Kenneth M. Haber (right), EOP's commanding officer, and Capt. David P. Tunstall. They are, left to right, Virginia Andreasen, Norma Castle, Betty Ross and Virginia Anderson.

RECREATION DEPARTMENT assisted in selection of EOP's Miss Victory Contest entries. Myrna Farris (left) of the department, is pictured here with Erva Willford, Frances Biros and Lois Peterson.

Ordnance

HELEN McGINNIS
Correspondent

Well, well, another week has rolled around and this reporter is at a loss for words . . . and no remarks from the 50-cent seats . . . so the ear was put to the ground and lo and behold what happens . . . strange noises . . . yep, I'm hep with the news. . . . Welcome mats are spread for **Capt. John Rhinelander** . . . he's that nice new addition in the Operations and Engineering Section . . . his cohorts are **Lt. C. P. Bohannon**, he of the southern drawl. . . . **Lt. Dale Yeoman**, "Romeo" to his friends . . . and **Lt. Sol Jacobs.**

"Gerry" Ward of Inspection, a fellow dirt disher, is quite a culinary artist . . . cakes and pies.

Jane McVay, that cute little damsel from Safety, is quite a bowler . . . and a certain member of the scarce sex (male to be exact) was particularly bowled over t'other nite.

"Red" Bowler is honeymooning now . . . so when he returns he'll probably be "redder" than usual . . . the best wishes of this columnist goes to him and his missus. . . . If anyone would like to know the time a milkman comes to the Elwood Plant they can get the dope from **Jo Kush** of Mail and Records . . . and how she knows . . . boy, did the guys and gals in the station wagon hide for a few hours.

Ev Vilt of Personnel was on the sick list for a few days. . . . **Gerry Stephan** of the same department was also on the disabled list.

Kay Reubart, Capt. Seymour Kurantman's right hand is worrying about the "Roses" in Ireland these days . . . yep 'tis right . . . sure and her "by fran" is in the good old Isle.

Have you noticed how smart the guards look since **Capt. John A. Hardy** has been giving them the once over . . . boy, oh boy, . . . do their chests stick out.

The Ordnance Department expresses its sympathy to **John E. Olson** of Payroll . . . his dad died a short time ago and "Ollie" has just returned from New York.

Pickeled Pellets. . . . Yep, the payroll had a party . . . everyone and their brother was there. . . Confetti party was an indirect name for the shindig and **Gert Lindemann**, who didn't show up for a long time since can tell more. . . . Anyway the kids are razzing her for taking some time off . . . it is surmised she took a jaunt up to see that Navy husband of hers.

Harry Denny departed for Lewistown the other day . . . best wishes on the new venture. . . . **Norman Long** of Auditing joined the armed forces Saturday and will surely be missed by all his friends.

What one hears when they don't wear earmuffs: "You're like unto a wild and lovely tropical flower." . . . To whom did they refer? . . . none other than **Lt. Robert Johnson's** sec . . . **Claire "Hoosier" Donoghue**. . . . **Jane Finney** of Auditing will be wearing Uncle Sam's uniform 'fore long . . . yep . . . she done dood it . . . the WAAC is her new home . . . or will be by the next issue. . . . Didja know that **Robert "Speedy" Cohen** got himself pinched in the Area last week? . . . yissir, he was a-breaking the law . . . he'll never live that down. . . . He also got his car frozed up . . . during that cold spell and couldn't get to work.

'Tis reported that **Joseph Zagade**, the audit king, doesn't like the uniforms the gals are wearing . . . seems as though they don't look feminine.

Via the Telephone Tapper: **Lt. Carl Beilharz, Jr.**, has new interests these days . . . no one can find out whether they are brunette or blonde. . . . No wonder **Bernece Carlson** looks kinda blue—her lieutenant has gone on tour . . . and we don't mean one-nighters.

A certain nite spot on the DuPage River was the scene of quite a gala affair the other night. . . . The occasion . . . a send-off for three of the boys who were going to the army, **Lyle Ingraham, Robert Kasten** and **Raymond Coesfeld.**

Joe Peters of Group 1 has enlisted in the Army Air Corps.

Didja know that **Chester Tomes** has other accomplishments besides being the champion peanut eater of the department? . . . Any additional information can be secured from **Frank Bravato.**

Poster Contest Winners Named

Winners in the poster contest, with the "Keep 'Em Shooting" theme and sponsored by the Recreation Department, were announced Saturday, October 31 by a committee of judges from Joliet.

George Zelke, fire guard, won first place; **Edward Washburn**, engineers, second place, and **Robert Williams**, Group 1, third place. The winners will receive a letter of commendation from the War Department in Washington, D. C.

The judges were **May Lang Grady**, American Institute of Laundrying; **William Hart**, Joliet Herald-News and **James Talcott**, Gerlach-Barklow Company.

Timekeeping

NICHOLAS BELLUSO
Correspondent

Decorated with a Hallowe'en air, the Morris Country club was the setting of a fall festival dinner dance as the Timekeeping Department enjoyed a night of fun and frolic. With everyone joining in on an opening community sing, ably led by master of ceremonies **John O'Connell**, the party started off with a bang. Soon after everyone dug in with a hearty appetite and enjoyed one of those rare delicious chicken dinners. Pleasing still more than the chicken was the gay background music of **Barney Faletti** and his orchestra.

When the last of the dessert had been eaten, Mr. O'Connell introduced three special guests. They were **Pvts. Edward Bishop, Robert Vollmer** and **Paul Palmer** of the U. S. Army. Each was presented with a gift by Mr. O'Connell from the Time Department. **Milton Treitel** and **Bernard J. McShane** gave short pep talks to the boys. Then the fun really began

Six door prizes were given out amid the howl and laughter of those present. **Eddie Kollman** won a nightgown with the ruling that each winner must wear what he wins or suffer the consequences. **Virginia Conrad** won a baby bib and bottle with nipple. **Chuck DePeso**, the old master of the culinary arts, won a kitchen apron to go with his cooking. **Doris Tatro** had to take off the cute green hat she was wearing and wear a baby bonnet while Mr. McShane won a piece of feminine wearing apparel which he wore with an air of nonchalance.

Carl Parker won the only sensible prize of the evening, a $5 book of War Stamps. When the laughter had subsided, **Larry Baudino** played a beautiful piece on the piano solovox. Then Mr. Parker on the drums, **Frank Zupancic** on his sweet accordion, and **Les Nelson** and his Hawaiian guitar joined together and played several swing numbers in a real jam session. **Barney Faletti** and his orchestra then took over for the rest of the evening with much singing and dancing, surrounded by the spirits that always accompany a Hallowe'en party.

Newest additions to the Timekeeping Department are **Edith Lewis**, formerly of **George Alstadt's** office, and **Dee Johnson**, who hails from Pontiac, Ill.

Word has been received from **Francis Buhl** who is now in the Coast Guard. He says that it is really the life, but a lot of hard work.

T. V. Brennan and **Geraldine Graham** attended the Notre Dame-Illinois game at Champaign while **Thomas Tomaszewski** attended the Illinois Wesleyan homecoming game at Bloomington.

Wonder what "Louie" is to **Shirley Van Dyne?** Shirley, by the way, was one of the first girl timekeepers to enter Group 1.

Through the eagles eye . . . **Harry Knarr** was very attentive to **"Angee" Gunnerson** at the party. **Bill Prindle** still claims he cannot sing. Les was very worried about his expensive guitar. **Rosemarie Veach** was sporting handsome boy friend, **Paul Langstett. Ben Sloan** was the life of the party. **Tom Delockery** was showing off his beautiful fiancee. **Bill Dwyer** escorted Victory queen of Group I, **Rita Fang. Virginia Conrad** was helping paint the club red. **Eva Sweda** was rushed by the boys from Group 3-A. If Mr. Knarr were given a fur coat he would leave timekeeping and take up the pipe cleaning business. **Robert McEvoy** was taking pictures with his flash camera, proof of were you or were you not.

LaVerne Hahn tied his last knot when he got married recently to **Margaret Luhisen** of Elgin, Ill.

Hal Roach is still trying to get back five shirts that he took to a Chinese laundry. Seems that he lost the tickets for their return. **Arch LaBorence** has compiled a little poem for his good friend, Hal.

Roach had five shirts no tickee
Now he has just two
His case comes up next Monday
He'll get beat by Lung Dung Soo.

A tournament was held recently in Wilmington when **Elmer Dames** and **Mr. O'Connell** fought it out on the pool table. Seems that Elmer won. **James McHugh** was the official.

Guards

GENE RYAN
Correspondent

The Guard Department bids farewell to two more guards who joined Uncle Sam, **William Reilly** and **Chris Steger.** Mr. Reilly will be remembered as serving at Post 18 (Richards Farm Gate).

Usually an interesting subject at the Guardhouse is ways and means of keeping brass and leather shining. Countless methods are used, but evidently some of the secrets of the trade are held by men who have served in some branch of service in the past. **Sergt. Harry E. Dowden** is a shining example.

The boys in the stock room at the Guardhouse wished to have space saved for this issue for some of their items, but after seeing a load of uniforms arrive, they changed their minds, or rather a corporal changed their minds.

Sgt. Clarence White reportedly is in the poultry business, not a butter and egg man, just a "fowl" man. He'll never worry about those meatless days.

It was an exciting afternoon as the boys awaited the final outcome of the Illinois-Notre Dame game. It seemed there were enough supporters for both teams to make the betting interesting. Some of the boys evidently had some explaining to do when the little wifey saw the empty purse. In the meantime **Dispatcher John A. Smith** was sitting comfortably on the 50-yard line at Urbana second guessing the coaches.

Elmer "Buttercup" Martinson, the rotund guard at the Administration Building, is still talking about his recent vacation.

With the recent cold snap, guards have been swarming to retail stores for that good long underwear. **Rudy Fredrickson** is reported as winning the prize with his bright red longies.

A certain dispatcher that works (?) in the office at B-5, Group 60, delights in getting home each night after work so that he may get behind the stove to take off his shoes and light his corncob pipe, in order to enjoy the daily newspaper and also to tan himself some. If in doubt as to who it may be, contact **Mrs. Casimir J. Klafta**, Odell, Ill.

Corp. Robert Darrel Morrow, former EOP guard, who is stationed in Hawaii, sends greetings to all whom he knew on the EOP Guard force.

Pheasant season will soon be here and all the boys are wanting to take their vacations starting November 10. It is a good thing that pheasants are plentiful in Livingston County because three guards from that county are starting their vacation on the 10th, namely, **James Verdun, James Fitzpatrick** of Odell and **Robert Farrell** of Pontiac. It is also believed that **Sgt. Joseph Trecker** of Odell will accompany them the first day of the season. Anyone wanting a pheasant will probably get one by contacting one of these men.

Sherman F. Simpson is looking for cold storage locker space to keep his over-abundant supply of pheasants, taken while on vacation in Wisconsin.

Murray Livingston, usually on duty at the main gate, Group 60, has been in deep thought the past few days as to how he might pay his income tax for this year. He may have been thinking of raising hogs.

James C. Piercy seems to be quite content to be assigned permanently to Group 60 after brief visits throughout the area by squad car.

The outer gate squad men have had a more pleasanter smile this past week, since **Sgt. John L. Sullivan** has returned from a brief illness.

David Wayne Baker, Casimir J. "Spike" Klafta and **Paul W. Stacel** are a most energetic trio at Guard headquarters nowadays after receiving their dispatcher's rating.

Orval B. Barnfield had the misfortune to lose the tip of a little finger. Orval will be glad to give anyone first hand information on thawing out automobiles.

Three efficient corporals, **Joseph Noel**, formerly at Group 1, **William Bantner**, formerly at Group 2, and **Frank Pate**, formerly at front gate, Administration Area, have been promoted to sergeants. Congratulations go to them and to **Peter Lazar**, Group 1, and **Roy Fox**, Group 61, who were promoted to corporals.

The next time you see one of the police women "dolled" up in a new gabardine topcoat, you'll know she's plenty warm and hasn't sacrificed a bit of style. The coats are exactly what every well-dressed woman guard not only should, but wants to wear.

If **Pauline Morrow** shed any tears of regret when she left the department a short while ago, she balanced them in smiles when she saw how happy all were to welcome her back last week.

A special school for women guards was held October 24 and it was reported successful by all. **Mr. Huey** spent several hours instructing them in how to be better qualified for their work. **Capt. John A. Hardy** lectured on military courtesy and discipline. He also conducted a period of drilling. **Mrs. Gladys Armstrong**, chief of women guards, explained the various group badges. **William Hartman**, head divisional inspector in the Fuse and Booster Area, explained the various parts of a shell. **I. S. Hawes** gave various pointers on safety and first aid.

Margaret Cosgrove, veteran woman guard, has left the force. Goodby was said also to **Bernice May** and the **Drassler** sisters, **Rose** and **Alice.**

Several new faces have been added to the force, including: **Beatrice Sondergaad**, Dwight; **Marjorie Bryant**, Morris; **Ruby Lantz**, Joliet; **Grace Day**, Kankakee; **Frances Dempsey**, Joliet; **Cecile Martin**, Aurora; **Marjorie Kelly**, Coal City, and **Evelyn Brooks**, Joliet.

EMPLOYEES' ACTIVITIES Committee officers, elected last week, shown here, left to right, are R. C. Wilhemi, vice chairman; Dorothy Murphy, treasurer; C. O. Finnegan, chairman, and Lucia Jane Pearson, secretary.

Group 61

JOE MOTTA
Correspondent

Many are in the dark wondering why **Frank Kachelhoffer** gave his wife her Christmas present early this year. Maybe he should be told that sending gifts this early pertains only to soldiers.

An 8-pound boy was born to **Mr. and Mrs. Harold Wilkins** October 22.

Stewart Anderson is rejoicing. Reason being, **Mrs. Anderson** is home recuperating from a recent operation.

Two popular fellows here are **Nelson Williams** and **Clarence Wells.**

Saturday, October 17, was a happy day for **Mr. and Mrs. Russell DeLong.** A brand new son was born to them. Baby and father are getting along fine.

Ailing have been **William Johnston** and **Joe Sullivan.**

Frequently heard are the names of **Kenneth Cox** and **Alvin Gansch,** who are in the armed forces. This proves that, though gone, they are not forgotten.

Paul Burke attended the funeral of his aunt, **Nora Burke.**

Dorothy Reynolds is recovering from a minor accident.

Frank Ariagno reports that his son, **Joe,** is stationed in camp in Nebraska.

Fred Colombo and **Don Morsch** are going through the procedure of enlisting in the Army Air Corps.

It would be nice if . . . a greater number would have had an opportunity to attend the Machinists' Convention—detailed information can be had from the Machinist Department or **Asst. Supt. H. O. Cadwell** . . . **Allen Mayes** could be convinced that, until further notice, men will handle the Oil Department . . . **Charles Hinz** wouldn't misplace important addresses . . . **John Kelly** learned that a match burns . . . you knew that **Wayne Howard** has a star boarder . . . all drove their cars like **Elmer Bergeson**—never over 25 m.p.h. . . . the reason were known why **Ralph McDowell** keeps saying "boy, can she cook!" . . . **Forrest Clatterbuck** knew how to keep his friends, **Lemuel Barnhart** and **Gilbert Morgan,** from arguing . . . **Ed Schellhorn** remembered that his car needed anti-freeze . . . it were possible to find out why **J. Condon** was so anxious to get home last week . . . next year **William Dooley** remembered to remove his awnings earlier . . . more were allowed to go to floor shows on their wedding anniversary—**Bill Brown** did, his wife was with him, of course . . . **Leo Blottiaux** didn't miss the bus . . . there were a chance of **Bob Hinz** going out with the boys more often . . . interested people knew that **Joel Johnston** doesn't work overtime any more . . . **Larry Baudino** taught others the new bends in angle iron . . . it were known how to explain that **Ray Ruffner** is here, but on vacation . . . an explanation were known as to why **Seward Brown** is a home boy lately . . . something could be written about **Harvey Steffes.**

Joe Motta attended the funeral, October 28, of his grandfather, **Thomas Motta,** retired Joliet merchant, who died October 26.

Group 3-A

F. G. TAMBLYN
Correspondent

"Something new has been added." Yes. . . Girls are now working on the loading line. They are doing their job well and seem to adapt themselves to their work like old timers. **Whitey Hall** is being very cautious. He has given up shaving to hide his charming face so as not to distract the girls' attention from their work. **Anton Sarheim** is now wearing a necktie every day and seems to spend much of his time in a certain section of Building 4. **Frank "Simon" Adams,** known as "Czar of the Nitrate," says if he can't have women working in his building, he is going to get them as riders. **Lloyd Zenor** is reserved in his talking for fear of expressing himself in the wrong language.

Edward Peterson, Carl Strickler, John Crowe and **Andrew Babb** have left to join the armed forces.

James Macon is the proud father of a new daughter, **Candace Lana.** Congratulations are sent to the proud parents.

Bob Helmick has turned promoter. His next card features a rematch of a little nurse from Bloomington and a Fuse and Booster miss.

Aurora Elmblade, nurse, complains of chill-blains. 'Tis said that going to bed with your shoes on doesn't help any.

The inter-group bowling league was suspended this week due to absence of pin-boys at the Recreation Building. The problem has been solved and play soon will be resumed.

Ned Bilesio and his gang seem to find plenty of work around Building 12. **Alonzo "Red" Buell** is all smiles as he passes the building.

James Snedden's moustache seems to be getting shorter every day. His reason, he said, for the trimming was that lip-stick does not wash off.

Supt. John J. Fitzpatrick is sure fire with his bow and arrow. Sharpening up for the hunting season, some say. He has expressed wonderment why there are so many visitors since the girls came to the group.

The following card of thanks was sent in by **Morris G. Sanders:**

"On behalf of my wife and myself, we wish to thank all the electricians and boys at Group 3-A for the thoughtfulness and good fellowship shown through the short illness and death of our daughter. As long as there is unity such as this among free men there will be no country nor any power big enough or strong enough to dictate to us or down us for we are Americans."

Joliet Training Courses Attract Many From Here

Similar Classes Of U. of I. to Start Soon in Kankakee

Extension courses of the University of Illinois available in Joliet have enrolled a number of EOP workers, according to a report submitted to **W. E. Canniff,** manager of operations and engineering, by **R. T. Read,** safety supervisor.

Similar courses are being started in Kankakee. EOP employees attending classes in Joliet include the following:

Safety Engineering

Edward L. Arnold, Charles A. Balch, Marino W. Califello, Ruth H. Chidsey, Vance W. Cook, Clifford W. L. Day, Paul H. Embick, Frank P. Floryan, Richard Hayes, Lt. Robert T. Johnson, Theresa J. Johnston, James W. Macon, Charles W. Marth, John L. McManus, Veranice M. Quade and **Leon J. Venturoni.**

Personnel and Industrial Relations

John M. Alexander, Nicola R. Altieri, Charles T. Anders, Albert O. Bailey, Lilla R. Clyne, Howard B. Hauze, John L. Jevitz, Margaret H. Kangley, William J. Leeland, George H. Long, John J. Machias, Helen L. McGinnis, Elmer C. Nesius, Carmen M. Oldani, Robert F. Peterson, Kathryn E. Reubart, James S. Simpson and **Frank J. Skoff.**

Fundamentals of Radio No. 1

Emory M. Akeman, Ronald D. Beck, Everett J. Brannberg, Raymond P. Brennan, Donald V. Butts, Clarence J. Coope, Frances M. Craig, Jesse Dorsey, Jr., Richard T. Foley, Fred W. Foster, Elinor L. Gudath, John T. Haigh, Jack I. Heller, Charles M. Howell, Raymond A. Hybarger, Lawrence D. Jack, Paul E. Jackson, Arnold J. Johnson, Bernard F. Kahn, Edith O. Kesich, Ray J. Lee, Alexander J. MacLellan, Stanford S. Maresh, Julean C. Meyer, Joseph A. Nicoletti, David Pearlman, Clarice C. Petrelli, Henry A. Risk, Helen Skumanich and **Edward G. Vaughan.**

Elements of Electrical Engineering

Alton O. Allison, Clyde A. Baker, Glen C. Baldwin, Charles B. Clifford, Norman A. Keck, Thaddeus J. Kowalski, Philip N. Lipson, Ray J. Rossi and **Edward F. Washburn.**

Metallurgy of Iron and Steel

Frank X. Crotty, Frank L. Rogel, Harold J. Rouff, Roy A. Scherer, Harvey A. Sessi, John C. Snyder, Ellis P. Steinberg, Albert Wainstock and **Lt. Dale A. Yeoman.**

Industrial Accounting "B"

Clare V. Johnson, Norman E. Long and **Frank W. Weithofer.**

Foundations of Engineering "A"

Ward L. Edwards, Gaylen E. Ford and **William C. Hartman.**

Office Management

Robert L. Cohen, Frances A. Graham, Sylvia A. Titrant and **Clara I. Wehner.**

Supervisory Training

Bernard O. Brickett and **Robert L. Irwin.**

Shift Meeting Held Within Group

Group 3-A held the second of a series of group meetings at 3:15 p.m. Saturday, October 24. All the men of the second and third shifts were assembled in Building 3. A similar group meeting was held for the first shift October 27.

The general purpose of these meetings is to bring before the entire group at one time, topics of common interest, particularly those pertaining to production, shift changes and group safety problems.

Supt. John J. Fitzpatrick stressed that the necessary drain of men for the Army had made it necessary that these men be replaced by women. Women workers will not mean the loss of a job for any man now working in Group 3-A. The question of careful use of gloves, shoes and coveralls were also stressed as necessary war economy. He spoke very definitely of the value and necessity of good housekeeping and said, "We'll either get the bombs out, or the Japs will bomb us out."

Emory Akeman, speaking for the Safety Department, stressed the necessity of "Saving Manpower for Warpower," urging the men to guard every possible act which would result in an accident. Accidents become allies of the Axis. Friday we had only five first aid cases—four redressings and one headache. Quite a record! Let's keep it up."

Shifting from the field of safety to a pep talk, he closed by saying, "Group 3-A has a record of getting bombs out on time. Here in 3-A we can show to the three enemies of democracy that American free labor can and will produce more and better bombs—faster—than the peons of Europe and Asia. This can only be done with due regard and respect for safety. Safety saves time for production. It is our business not to be 'hit by, caught between or fall from objects.' Keep our accidents down and our production will go up."

BOMB LOADING girls of Group 3-A held quite a ceremony October 31 to elect Frances Biros as their queen and entry in the Miss Victory contest.

GROUP 3

NORBERT McLUCKIE
Correspondent

Group 3 has entered a bowling team in the Recreational League. Anyone in the group wishing to bowl or play basketball may get their name on the list by dropping a note with your name and clock number in one of *The Bomb-shell* boxes in the change houses.

There is on exhibit in Change House 20-A an excellent group of caricatures picturing **John "Red" Boucher, Jack Homel, George "Arky" Holland, Don Rister, Dick Green** and **Jimmie Ray** in their characteristic poses in Building 4.

Mr. Boucher and **Thomas Sprague,** foremen, are back at work after a brief illness.

The next time **Jim Fagan** hears a siren, he will pay more attention to the speedometer and less to the radio. It pays to learn.

Raising rabbits is getting to be quite a fad. **Edward "Tiger" Born** has some big enough to pull his garden plow around.

Among the boys who have gone to the armed forces (and the list may not be complete) are **Edward Ustaski, George Nelson, Stanley Buck, Francis Storm, Eugene Egizio, Kenneth Fendrick, Everett Weatherhead, Lawrence Hauser, Charles Sanders, Joseph Dvorak, Julie Lavazza, Harry Adams** and **Lewis Donaldson.** All are wished the best of luck.

Many stories of how wedding bliss has upset persons have been told but it seems **LaVern "Joe" Hohn,** timekeeper, is the hero of two of the best. First, one night Joe was out checking at the card racks; the last man from the line punched out. One card was left in the rack. Joe waited and waited and soon started to cuss the "so-and-so" who didn't come and clock out so he could take the cards into the Time Office. After a long wait, Joe finally decided to see who was holding things up. On second glance, Joe discovered it was his own card, for which he was waiting to be punched out. Of course, he must have had a good excuse for taking his cards in late to the Time Office.

Another day, last week, Joe almost emptied all the candy machines in the change house trying to satisfy his hunger. He couldn't figure out why he was still hungry after having spent all his money. When picking up his lunch bucket to go home, the weight of it reminded him that he had forgotten to eat his dinner. Seriously, the gang extend wishes for lots of luck and express the belief his new wife will straighten him out and see that he gets plenty of good meals.

Elden Flint should be commended for being the only person to post any news items in *The Bomb-shell* boxes. Surely, other people notice some happenings or sayings over a period of two weeks. They should be heard from.

Remember, anyone who is not receiving his copy of *The Bomb-shell* should drop a slip with his name, address and clock number (and a good news item) into *The Bomb-shell* box.

Former Employee Hailed as Climber

Under the heading "Japs Won't Be Safe in Trees," a newspaper in Banning, Calif., described a feat accomplished by **Pvt. Bill Woodard,** a former EOP employee and son of **John Woodard,** a foreman in the Electrical Department.

The story follows: "If Pvt. Bill Woodard ever chases a Jap up a tree when he gets into action, such a refuge won't do the Jap any good, for no matter how tall the tree is, Woodard will be able to go right up after him.

"That can be assumed, at least, from Bill's feat in Banning Saturday afternoon. The rope by which the flag at San Gorgonio Inn is hoisted came out of the pulley at the top of the 50-foot steel pole. Woodard, who had a room at the inn, learned about it and offered to climb the pole and put the rope back in place for **Mrs. Marian Bird Barbour,** owner of the inn.

"Mrs. Barbour wanted to take a picture of the pole climber while he was at work, but he went up the pole, hand over hand, put the rope through the pulley and was back down again before it would have been possible to get a focus on him—it was done in less than a minute. Woodard was formerly employed as a munition man at the Elwood Ordnance Plant in Elwood, Ill. It was there he learned to climb poles. He is now at Camp Young, in a Signal company, where his service as a pole climber should come in handy."

Mr. and Mrs. Woodard, who live at 916 South Richard Street, Joliet, have another son, **Jack,** who is in an Army camp in New Jersey and who is also a former EOP employee.

FRIENDS in Group 2 presented this tiny rabbit to Karl J. Ulrich, assistant safety supervisor, who immediately put safety goggles on it.

Leisure Program Here Praised By Chicago Editor

Recreation Congress Sees Visual Record Of EOP Activities

The fascinating story of how 36 million American families combined their effort in the nation's war program for victory was shown at the War Recreation Congress held recently in Cincinnati.

In a special article written for *The Bomb-Shell*, **J. W. Mullen**, editor of *The American Family* magazine, Chicago, praised the contribution of EOP to the visual presentation of the accomplishments of the American family in wartime recreation.

Discussing the pictorial display of the large news pictures, many of which were reprinted from *The Bomb-Shell*, Mr. Mullen said, "This proves that the recreation of the greatest American institution—the home—need not necessarily be a play program. The American people have turned their play into constructive activity. Men, women and children of our homes are bent upon one main objective—are using every working and leisure hour to one end—more and better production to keep 'em flying and shooting toward victory."

Elwood Plan Lauded

"We know that recreation is an essential even in wartime. The mind and body need change. The display shows how we have made the necessity of change serve the war effort. Thousands of ordnance workers enjoy daily a great variety of recreation activities, making for better fellowship and teamwork.

"These same people may often disagree, may in their homes fight among themselves, may go about their several businesses in normal times, but when attacked from without there is a unity of purpose which is fine and pregnant of possibilities never realized. At Elwood, in one of the largest war plants in the country, something constructive is being done about the play life of thousands of workers. They realize that war has suddenly and challengingly given play a new objective; its main product is no longer amusement, but diversion—a diverting of thought from tragedy and destruction—a replenishment.

"We recommend a study of the pictures of the Elwood Ordnance Plant, as an example of what can be done to make play productive in wartime. These workers are on the road to some real accomplishments: First, we believe they are building hope—getting some real fun out of life. Second, they are building health, mental and physical. Third, they are building character that can face the crises of life without disaster. We will not even speak of the enduring satisfaction they are building into their work, their community and their homes. We heartily endorse these play activities as a means to help us win military victory."

I Have Written a Poem

My Day

The telephone rang all that livelong day,
"Who were you calling? Mr. Brown? O.K.
I'll call the boss, just hold the wire."
(Now, she's got a voice that I really admire.)

"The condensers came in and are at 70-5,
Will someone please get them, c'mon, be alive.
Stop at Utilities on the way,
We have no maintenance blanks for today."

"Guard House calling—'expect a storm.'
I'd never believe it, Gene, it seems so warm.
I used to worry when the storm was here.
I'm reminded ahead of time now,
Who wanted Sunday off to work Monday instead,
Or was it Monday off and work Tuesday he said?
Better open the window, it surely is hot;
Boy, what a splitting headache I've got.

My gosh, is it really that late?
Better get my badge before we get to the gate.
Oh, get me a drink, I think I'll faint,
I thought I had my badge, but uh, uh, I ain't.

—**K. Richardson**
Radio Communications

You Back Us Up,
We'll Knock 'em Down

Verse:

A group of boys had volunteered for service across the sea
To do their bit for Uncle Sam, to fight for you and me.
The band was playing, the flags were waving, the crowds stood all about,
One volunteer held his head up high and the people heard him shout.

Chorus:

You back us up, we'll knock 'em down,
We can't help but win that way
We'll do our utmost just for you,
You must help to see us through.
We'll all do our part for Uncle Sam and the U. S. A.
You shoot 'em to us, we'll shoot 'em at them,
We'll both keep plugging night and day.
You buy your bonds, save your scrap, send us shot and shell,
We'll blast Berlin and Tokio, and blow those Axis plumb to—Well,
You back us up, we'll knock 'em down,
We'll dish it out in the good old Yankee way.

—**Walter Shaughnessy**
Group 1, Bldg. 13

Supplies

When you bring a requisition,
Put yourself in my position.
When you have a form number wrong,
We waste time, and take too long.

And if you want a pencil; here's the rub,
For a pencil, you must have a stub.
For ink when your pen is dry,
Bring a bottle for a refill on the fly.

Desk blotters are hard to get.
Have you turned it every which way yet?
Erasers are almost a thing of the past.
Make no mistakes, and it will last.

We are Scotch with tape, as you know.
Have you an empty dispenser? No!
When rubber bands are slightly wore,
Remember—there are no more.

We don't like to cut your list very much,
But there are others who need supplies and such.
This is just a little rhyme,
Try to remember, and save our time.

—**Earl W. Moline**
Stationery & Supplies

The Bomb-Shell

Take a closer look at this cute little toy.
Don't tell anyone, but it's the real McCoy!!!
WHOOOOPS—there, don't jar it in any way,
For if you do—your life is the pay.

I've read all of your papers thru and thru
And you're doin' a fine job for the Red, White and Blue.
Out here we all work hard and together
In rain or snow, in fact, all sorts of weather.

Let's keep it that way from here on out,
Then when it's all over we all can shout.
I sincerely hope you can *digest* this Bomb-Shell,
As I know we all do yours, so very well.

—**Martha G. Herrity**
Chief Telephone Operator

Material Warehouse

FRANK McCORMACK
Correspondent

Material Checker **Robert Grady**, who recently underwent a serious operation, is expected back soon.

Lester Patterson was a recent caller at the Hub. Although Pat was in a conversational mood, he refused to divulge any information as to where he got that bright red sweater he is wearing. **Al Kravitz** said he met Pat on Maxwell Street in Chicago last Sunday morning.

The Material Warehouse Department employees extend their sympathy to Material Checker **Joseph Horrell**, whose sister, **Mrs. Sadie Hadsel**, died October 24. Funeral services were held October 26 in St. Louis, Mo.

Robert Gulso is back on the job and reports he feels completely relaxed and ready for work. Bob spent an enjoyable week with his parents, who live at Mount Pulaski, Ill.

Gaylord Spies seems to be offering **Gerald Fitzgerald** some competition for the title, "Wrong day Corrigan." It seems Spies came to work on the wrong night.

Dave Sime, Government inspector, was seen walking down the railroad track the other day. When questioned as to why he was walking instead of riding Dave replied, "I've got to keep in fighting trim, looks like a bad case of *German goiter*."

Now that **Supt. Charlie Herbig** has become a first class driver, it's easy to imagine him gazing into a crystal ball, taking off from the Elwood Ordnance Plant in his helicopter on Saturday night and setting down in his own back yard in New York half an hour later. Of course this all happens in the world of tomorrow.

George Duren, Government inspector, is back at the Hub after a week's vacation spent in the Windy City. George has gained quite a reputation as an expert chessman.

COMPOSED and restful as pictured here, Dale E. Lorentzen, Stores and Transportation Department, now has a different pose since he joined the Navy Air Corps.

"Hello, was that Diesel number 42?
O.K., Dispatcher, we'll send out the crew.
It'll be at the Classification at half-past three?
Maybe the battery needs charging, our man will see."

"Radio Department, yes, this is she.
Requisition number again? Hold the wire, I'll see.
Yes, we received them on the 27th,
But the shipment was due on August 11th."

"Radio Shop calling Car 98,
Signal 1 when you get to Post 8."
"Mr. Brown, you're on the picnic committee,
You've 50 tickets to sell—what a pity."
"Oh, I'm s'posed to sell them? Oh, I see,
Fifty tickets—10 employees here—Gee!"

Salvage

ANDY VAIL
Correspondent

Bob Milus returned to work Monday, wearing a ten-gallon hat and spurs that jingle jangle.

Henry O'Reilly said he noticed when old No. 144 came by, it not only smokes a lot but it choos.

Harlan Kadow has been spending homecoming day at Aroma Park for the last two days.

Willie "Torchy" Peebles came into the office with his vest pocket so filled with cigars and pencils, he looked like a small pipe organ.

Joe Green thinks that having got all wrinkled up with care and worry, it's a good time now to get his faith lifted.

Scott Soper believes that high heel shoes must have been invented by a woman who was kissed on the forehead.

Art Voss remarked that a man should try praising his wife, even if it does frighten her at first.

Presley Hankins, historian, said that medieval customs hold sway on the main streets of America today. The man who tips his hat assures the person he meets that, in medieval language, he is removing his helmet and therefore has no fear, and when he extends his right hand he declares in the same tongue that his sword hand is free and that the other person need have no fear. The man who takes the outside when walking with another person perpetuates the spirit of protection that once was demanded in parlous times.

Lyle Safford was telling about a rolling pin throwing contest his wife won at a picnic last summer. She threw the rolling pin 57 feet. He did not mention that he won the 100 yard dash for married men.

Swan Sandahl was telling about a fish he had almost caught. "About the size of a whale, was it not? asked **Alvin Smerker**. "I was baiting with whales," answered Swan.

BELIEVE it or not, but both of these photographs are of Clifford Kidney, assistant foreman at Building 2, Group 61, although taken a few years apart.

Our Daily Work

The Guard Force
Is a wonderful place.
You wash your feet
And shave your face.
You try to keep clean
In every way.
You take a bath
Both nite and day.

You must get there
By a quarter after eight,
For if you don't,
You know that your late.
You rush thru the door
And down thru the hall;
You rush to your locker
Against the wall.

You reach for your key
Without any fuss,
When you find that it's gone,
You really do cuss.
You rush to the window
Like a dog in a fit.
The master key, Sir!
I'd like to get it.

You rush back like mad
And unlock the door;
Your uniform then
Falls to the floor.
You grab up the pants
And sock in your feet,
You pull them up
Snug on your seat.

You fasten your belt,
You grab for your cap,
You're not home now
Taking a nap.
To the squad room you go
With a nice easy stroll
And listen to the Corporal
Calling the roll.

Then to the bus
We all troop;
We are headed at last
To work in the Group.
With sternness the Corporal
Assigns all the Tramps.
You go to a tower,
A Gate or the Ramps.

While standing out there
On the ground so hard,
You happen to think
About your time card.
You failed on one thing
And now you feel blue;
You'll study and fret
All the day thru.

FOUR HOURS you'll get
For not taking your time
And punching your card
At the end of the line.
Three months have gone by
And this faithful Tramp
Has done nothing at all
But guard that damn ramp.

Former Elwood Supervisor Now On Santa Fe Job

S. G. Joseph Heads S & P Dam Project In New Mexico

By D. S. Pelletier

Sanderson & Porter, in the midst of war and war work, is completing the design and constructing a water supply dam and reservoir on Santa Fe River in the canyon above Santa Fe, N. M. This work is being done for the New Mexico Power Company.

This dam is of the earth fill type, with low cutoff wall and puddle core, water being released from a control tower into a discharge conduit. Both tower and conduit are 5 feet in diameter. It is a comparatively small dam, 80 feet high, to impound about 70 feet of water. The maximum width of base is 469 feet with crest width of 30 feet; its maximum length is 622 feet. Some 175,000 cubic feet of fill is required for the dam, and it will impound about 250,000,000 gallons of water.

Available materials are sand and gravel, generally coarse, and it is not possible to construct this dam by the rolled fill method, but the impervious core must be made from fines washed from the sand and gravel shoulders.

The dam is being built at Elevation 7500, which makes a relatively short building season. The contract was signed June 26, 1942, thus giving a period of about five months in which to complete the project. Under normal circumstances this would be a simple matter, but under existing conditions it is quite a task.

This is a repeat performance, as in 1926 we built a similar dam *farther up the canyon. The first* job, known as Granite Point Dam, was built under the supervision of the late **R. V. Rosenbaum**, with the late **C. J. Kemery**, formerly superintendent of carpenters at EOP, as job superintendent. Also of interest to EOP folk is the fact that **S. G. Joseph**, also of Elwood fame, where he was superintendent of concrete, is job superintendent of the new project, which is known as Four Mile Dam. The work is being done for acceptance by **J. R. Snider**, president, New Mexico Power

Happy Birthday to You!

This is a regular feature in which the birthday anniversary of as many EOP workers as possible will be listed for 2 weeks in advance. Watch for your own. Call your friends.

Recreation Plans Call for Participation

More than 40 bowling teams will soon be in serious action and competition on the EOP alleys, meetings have been held with **Eddie Murphy** and plans are for three leagues of about 12 teams each, according to their team averages, to be set-up and play will start immediately.

The twenty-six entries in the Horseshoe tournament are dodging the weather to play off their games as fast as possible. One of the outstanding players is **Henry Pointkowski** of the Building Maintenance Department, the 67-year-old player that throws an average of 8 out of 10 ringers. Fire Station 3 has the largest list of entries.

John Kusinski is lining up a real basketball team for the Industrial League in Joliet and Kankakee, building his team around a man new to this territory, **"Slim" Clark**, 6 feet 9½ inches tall, formerly with University of Tennessee. He also has other outstanding players. Groups 62 and 70 will both have strong teams and will continue the feud that they started with their softball teams.

CAFETERIA WORKERS also have a job to do in an ordnance plant. Those shown here, left to right, are Rosemary Whall, Theresa Trussa, Marjorie Olson, Kitty Blinstrit, Marie Connett, Grace Harlan and Lillian Sitton.

Fire

STUART MOLONEY
Correspondent

All members of the Fire Department are busy co-operating with the recent request to conserve on plant electricity and they are looking for some suitable stories to accompany the subsequent dim-out periods. The chosen name for these tales is "Dim-out Ditties from Distinguished Derelicts," and will embrace discussions on the finer arts, true experiences (no proof demanded), embarrassing moments, bright sayings of the in-laws (proof demanded), tales of the hunt, etc. **Chief R. W. Mortenson** has been named head censor and bouncer and a collection is being made to send him to the Big Smokies at the correct time. If the venture proves successful, any interested outsider may obtain 3 or 400 complimentary tickets from **Lola Early** for one pint of Tail-spin a request. It is hoped to create a spirit of good fellowship, not only among the firemen, but with anyone else in the plant who cannot make connections with Mr. Anthony, Beatrice Fairfax or the many fortune tellers in the adjacent towns.

Hedy Lamarr: "And what is your age, Wonder Boy?"

Frank Scoma: "4F, my pet."

Now that the fox has been tamed by the boys at Central Fire Station, it was decided to go after bigger game. To the surprise of everyone, a "wolf" is now being tamed. According to its trainers, a better job can be done if a larger collar were purchased. They say the fox had a smaller neck than the chief clerk (**Stuart Moloney**).

The boys at Station 3 had been missing silverware lately, but the culprit was found and apprehended through kangaroo court. **Frank I. Goldenstein** doesn't like **John Harbison** as an attorney.

James Livengood says his wife makes the best jelly rolls in the state.

Charley Hendrickson is all smiles lately—daughter and **Mrs. Hendrickson** are doing very nicely.

Any of the boys wanting hunting tips should contact **Henry Stege** at Station 3.

John Watkins has given up the horses for checkers—profits are the same.

Anyone wishing to secure a ring as a birthday present should learn the proper technique from **Robert Connelly**.

The other day Chief Mortenson went on one of those "all Quacks and no Waacs" hunting trips. His partner, **Charles Davis**, had much the better luck on the excursion, as Charlie's catch for the day amounted to one decoy.

A farewell dinner was given for **Len Jessen**, who is on his way to earn a pair of silver wings. Len was presented with a gold badge.

The boys in the department are anxious to hear from all of their ex-mates who are in the armed services. Every letter received will be answered immediately.

Sir Walter Raleigh had nothing on **Kenny Brooke**. "Squeaky" uses his coat to thaw out the gals' radiators, but refuses to split on any rewards received.

Tomorrow

"Over There," across the Pond,
They're fighting "teeth and skin,"
While "over here," we're fighting, too,
For victories, that will win.

For this is the War to end all Wars,
That begin with dissatisfaction,
And anyone greedy, selfish and cruel,
Will be crushed in this last demolition.

So now you see why we are here—
To "back" our boys over there,
The EOP's just one of them,
But we're here to do our share.

So have no doubt, it may take time,
But we'll take it in our stride,
Before they know what they're up against
We'll have stemmed the yellow tide.

—**Harryette Werling**

The EOP Guide Post

SALE • FOUND • LOST • RENT • BUY • SERVICE • TRADE • RIDES

Classified ads will be published without charge for EOP employees and their families. If you can offer transportation, want transportation; want to trade, buy or sell something; have a house or apartment to rent; have lost or found something, you are invited to make use of this service. Deadline is Wednesday, ten days preceding publication.

Riders Wanted—From Kankakee for steady day shift, preferably from Group 9. Call **Gene Center**, Group 9, Line 3138.

Riders Wanted—From north or west side of Chicago. See **Harry Sugarman**, Group 1, Building 10, Bay 1.

Riders Wanted—Leave Chicago at 6:00 a.m. from 74th and Morgan streets by the way of Southwest highway. Will carry two or three passengers. Call **William Weitzel**, Aberdeen 8554.

Found—Pair of glasses. Stop at Room 9, Building 73-3, Richards Farm, or call Line 3180.

Lost—Man's gold wedding ring on October 27. Initials "I. U. to E. G." and "12-28-41" appear on the inside of band. Call Line 3142.

Riders Wanted—Or alternate driving in vicinity of Elmhurst, Villa Park, Lombard or Glen Ellyn, Ill. Shift work. Call **Edward Egan**, Group 2, Line 2162 or 3296.

PICTURED left to right are Dorothy Connors, Group 6; Norma Castle, Group 8; Iona Calhoon, Group 7, and Betty Palmer, Group 6.

SHOWN HERE left to right are entries from Group 9; Catherine Gorman, Virginia Anderson, Amy Redington and Edith Klenz.

FOUR ENTRIES were selected by Group 1. Shown here, left to right, they are Ruth Barr, Betty Jensen, Mary Danser and Wanda Merritt.

FUZE AND BOOSTER entries included, left to right, Virginia Andreasen, Group 5; Ann Grobarcik, Julia Corzan and Rouray Stinson, all of Group 7.

THREE ENTRIES from Group 4 are pictured here. They are, left to right, Harriet Porter, Maxine Enger and Ruth Sanderson.

WAR DEPARTMENT entries included the two girls shown here, Betty Stalzer (left) and Betty Ross, who is one of the first mail delivery girls employed here.

General Groves, Who Spoke Here, Knows EOP Well

Numerous Visits And Conferences Mark Relations

By Harrison Smith

Brig. Gen. Leslie R. Groves, whose photograph and inspiring message to the workers of Elwood Ordnance Plant appear in adjoining columns, is intimately acquainted with personnel and progress of EOP and *The Bomb-Shell* takes pleasure in presenting a story of his career and activities for the information of employees.

Many of our readers were present when General Groves addressed Elwood Ordnance Plant workers October 16, 1941, on the occasion of the flag raising ceremony and barbecue, in celebration of the completion of Group 1 Loading Line. General Groves consented to make this address despite the heavy duties of his office, which do not usually include the making of public addresses. But whatever General Groves does, he does well, as evidenced by his outstanding address, remembered by all so fortunate as to have heard it.

The Office of the Chief of Engineers has the responsibility for discharging so many duties that the mere enumeration of them would require an extended article. As applying to Elwood Ordnance Plant, however, it may be stated briefly that in December, 1941, the Office of the Chief of Engineers took over from the Office of the Quartermaster General the direction of construction of this plant and all plants of similar character.

In December, 1940, shortly after his assignment to the Construction Division, Office of Quartermaster General, General Groves visited

(Turn to Page 4)

Huge Scrap Total Obtained in Drive

Iron and steel scrap, totaling 213,120 pounds, has been accumulated since the start of the war salvage drive October 9 at EOP, according to a report by **Hugh S. Robb**, superintendent of salvage. Copper wire totaled 9,520 pounds. Scrap lead amounted to 1,760 pounds.

These accumulations are in addition to the regular salvage operations and represent contributions from individuals as well as operating groups.

Residents within the EOP area and employees of the Cafeteria have been asked to aid the salvage drive by saving tin cans regularly. A special bulletin requested that the empty cans be cleaned, flattened and placed in a box near garbage containers for pick-up by the garbage disposal crew. Pick-ups will be consolidated at the Salvage Yard for shipping.

Plant to Observe Thanksgiving Day

All departments will suspend operations on Thanksgiving Day, Thursday, November 26, 1942, except for personnel required for the protection of plant and property.

W. E. Canniff, Manager,
Engineering and Operations

". . . Elwood mark spells death and destruction . . ."

BRIGADIER GENERAL LESLIE R. GROVES
Deputy Chief, Construction Division, Office, Chief of Engineers, U. S. Army

An Important Wartime Message to the Builders And Workers of the Elwood Ordnance Plant

"SCARCELY MORE than one year ago I had the honor and privilege of addressing you on the occasion of the flag-raising at the Elwood Ordnance Plant. The shadow of the world-wide war against which we were preparing at breakneck speed was already upon us. Less than two months after that colorful, patriotic ceremony, the flag we so proudly raised October 16, 1941, was under the fire of a treacherous and ruthless foe.

"We were talking mostly about Hitler in those days. When the first blow fell, however, it came from one of his stooges —Japan, a nation with which we were on supposedly friendly terms. But that is now history—an infamous chapter that time will but magnify with the passing years.

"What counts is the fact that when December 7, 1941, arrived, the great plant you constructed with such speed and efficiency, had been in production several months and was already supplying our own troops and those of our allies with the shells and ammunition for which it was designed and built. We needed them sooner than we thought—and you had them ready!

"I recall saying at our ceremonies a year ago:

No one knows what the future holds in store. We all read the war news in our daily newspapers. The totalitarian nations and their allies will assuredly not hesitate to gang up on us if England and Russia do not stop Hitler in Europe. America may be placed in extreme military peril at any moment. When we need the shells you

Six EOP Girls In "Miss Victory" District Finals

32 of 36 Plant Entries Appear Before Judges

(Picture on Page 12)

Six girl war workers from the Elwood Ordnance Plant entered the district finals in the search of the Chicago *Herald-American* for "Miss Victory." They were scheduled to compete with 34 other girls from numerous war plants for the title at Aragon ballroom in Chicago Thursday night, November 19.

The six finalists are **Betty Foster** and **Maxine Enger** of Group 4, **Betty Jane Jensen** and **Mary Danser** of Group 1, **Erva Willford** of Utilities Department and **Dorothy Connors** of Group 7.

These six and four others were selected from approximately 150 girls who appeared before the newspaper's judges at the Hotel Sherman Sunday night, November 15. Thirty-six EOP girls were selected by employees at the Hallowe'en frolic to represent the plant in the contest to name a typical girl war worker as "Miss America."

Thirty-two of them were escorted to Chicago by **George F. Bent**, chairman of the local committee of judges, and **Capt. David P. Tunstall**, EOP public relations officer.

(Turn to Page 5)

S & P's Operating Contract Extended

Extension of Sanderson & Porter's contract to operate Elwood Ordnance Plant for the War Department was announced by **Maj. Kenneth M. Haber**, commanding officer.

This contract with the United States of America for the design, construction and operation of the plant was one of the earlier contracts signed under what was then known as the "defense program." War Department commitments then were for shorter periods than now. Because of the uncertainty existing then, September, 1940, the EOP contract was for a short period, with provisions for extensions for additional periods at the option of the Government.

Because of war, the Government deemed it advisable to exercise its option so that continuity of management can be provided to insure sustained production at the plant. Major Haber said Sanderson & Porter's operation of EOP had set an enviable record for other plants of the same type and that the Ordnance Department was pleased that the contract had been extended.

Pearl Harbor Edition Planned for Dec. 4

The December 4 issue of *The Bomb-Shell* will be a special "Pearl Harbor" edition in observance of Pearl Harbor Day, December 7. There will be pictures and stories of what has transpired at EOP during a year of war. If you have any stories or pictures related to the Japs' attack on Pearl Harbor, *The Bomb-Shell* will appreciate your calling Line 4206 and offering your contribution.

Let Us Be Truly Thankful

There is a prayer we would utter now—as Thanksgiving comes again to America. A prayer we live and feel and know—but cannot find the countless words—the million tongues and voices to repeat.

It comes from the centuries that have molded this nation—and made her great and strong. It comes from the canyons of towering cities . . . from the echoing quiet of countless village streets . . . from the roaring tumult of industry . . . and a fisherman hauling his nets.

It is the heart of a nation giving humble thanks. For blessings we cannot measure. For gifts we cannot appraise. It is a people—saying in one reverent voice: "Thank God I live in America."

It is a people aware, as never before, of the greatness of their nation. The wealth of her resources. The riches in her lands. The strength and courage and unity of her people. A people giving thanks for a nation built from a wilderness to limitless power. To stand firm against those who would plunder and steal and enslave. And thanking a beneficent God for His gifts.

In a world, long suffering from the barbarism and cruelty of war—we have lived in a land of peaceful sky and earth. There has been no ceaseless horror in the heavens above us. No endless devastation to lay our lands and homes in waste. No despot rules that our children shall starve and die.

We are free. Free, in a world of prejudice and intolerance. Free to live and speak and act and work and worship as we choose. Free to elect our own leaders. Free to live by the laws of our own making. Free to decide our own destinies. For this we give thanks—and pray that God may guide us in the exercise of this freedom—that others of the earth, now slaves, may share it. That in the end—they may again be free.

America gives thanks, for the men who saw with clear, unflinching eyes, the nation to be. Who fought as we fight in the cause of freedom and humanity and brotherhood. And for those who now fight—knowing that history has given few men the privilege of fighting for so great a cause.

* * *

This, then, is the greatness of America. And in our prayer of thanks—there would be the voices of all who share this nation's glory. All who now work and save and fight as one—that no power, however great, may ever be allowed to assault or plunder this freedom that is our lives.

The Saturday Evening Post

Keep On Loading

The 1942 season of ghosts, goblins, witches, etc., now a memory, brings to us this more serious and important occasion to anticipate. Many will have these thoughts in mind, "no turkey and pumpkin pie this year, there isn't anything I have to be thankful for." That is wrong. Show your appreciation for what you have. Carry on. The way you celebrate Thanksgiving may be important ammunition in one of our greatest weapons, Morale.

Don't say it, I know. Your tires are bad, coffee is hard to get. Soon you will have to eat more fish. Next is gasoline on the ration list.

On the other hand most of us don't know what war is. Outside of Pearl Harbor, air raids are just subjects to talk about when you aren't busy at something else. No one is starving. None of us is getting gray worrying about being sent to enemy factories to work. Two or three hundred aren't shot because one said something about the enemy government.

Let "Thank God I Am An American," be one of your Thanksgiving prayers. Take a little time and think of the historical significance behind that day. Then get into harness and work; work ever so hard so that next year, pray to God, our heroes will be at home eating pumpkin pie and turkey.

In other words don't sing that old song "I am sorry for myself," but load shells, lots of shells, so that our boys can show the Jap that a big *Yank* is more effective than a bunch of small *jerks*.

—Joe Motta, Group 61

THE BURNING PIT

By Scorchy

Folks, I made a mistake! After all the effort and careful planning in getting out my Christmas list in the last issue of the World's most scintillating journal, all I get is a truckload of abuse. Instead of mail bags of messages complimenting my foresight, and co-operation with the Postal authorities, retail merchants, and other "whatshall-Igive" sufferers, all I got was a bunch of vitriolic sight drafts from various members of our group calling for certain grandiose gifts and insinuating that if I didn't come through as requested, the consequences would be more pleasant to the undertaker than to me.

The fellow who invented that sound axiom that said, "you can't please all of the people all of the time . . . etc.", really had something. Is he telling *me?*

Yea, verily, the path of the pioneer is strewn with brickbats and Coca-Cola signs, but the real sturdy pioneer never wavers in the face of a new challenge, and even though the Christmas list will go down in history with only one good point in its favor—it got out early—your correspondent deems it his honored privilege to dilly-dally a bit with some New Year's resolutions.

As a result of a lengthy tabulation setting forth past years' resolutions against corresponding performance, you might as well know the truth. My record has been perfect. Every resolution seems to have become just a scrap of paper.

In view of my apparent determination to break every resolution thought up for the improvement of my well being, it seems more in the spirit of the time for me to spare you many busy-bees the task of compiling your individual New Year's promises by doing it for you. You will all readily appreciate that many appropriate and much needed resolutions are unprintable and they will be delivered privately in fire-proof envelopes.

Coming now to the less critical reformations, it seems in order that **John Ryan** promises faithfully to have a box car at the loading line whenever requested regardless of the short notice; **Clyde Utley**, the old Volt-and-Ampere man, shall agree that the lights stay on, *watt-ever* may happen to the wires, poles and other electrical victims of local windstorms,

(Turn to Page 11)

I have written . . . a poem!

Carry On

Just ten months ago tonight
You left to fight
For freedom and right.
You said "Don't say 'Good-bye,'
dear.
Just smile and say 'Solong.' "
Then you left without a fear—
Without a thought of being wrong.
But yours was a one way ticket to
A lonely grave across the blue,
Terrifying, greedy waters.
While we watched, hoped—
Waited with dread—
Came a final word "He's dead."

There were glorious speeches
Of heroics true and brave—
Of battles on faraway beaches—
Of a man who gave
His all to keep his country free,
For an aging Father and loving
Mother,
For his countrymen—his family.
Amid this I hear you say "Skip it,
brother."
As of old you want no praise,
Then as through a haze
I hear you whisper "Will you carry
on?"
So now for the sake of you and
our son—
I remember our plans — and
carry on.

—Your Wife
—Glennie Duckworth
Group 5

A Nursery Rhyme

So, you turned your pretty ankle,
Running in the change-house
ramp?
Well—you'd *oughta* get a spanking,
(And you *know* it, too, you
scamp!)
But instead you'll get a bandage,
Be it early shift or late . . .
From our smiling first aid nurses,
Misses Rimmer, Thompson,
Grate!

Oh, so you've a tarnished toenail?
Yours is splinters? Tummy Ache?
Yours is tenosynovitis?
(Heaven help you if you fake!)
These, and sixty-seven others
Can be treated, have no fears . . .
By efficient first aid nurses,
Misses Lindblatt, Edwards,
Speers!

L'Envoi

Yes, they *try* to guard you hourly,
But, won't *you*, too, have a
heart?
And *use your head* to *think* of
safety,
Not just to keep your ears apart?

—Jim Hart
Safety Department

Tomorrow

"Over There," across the Pond,
They're fighting "teeth and
skin,"
While "over here," we're fighting,
too,
For victories, that will win.

For this is the War to end all
Wars,
That begin with dissatisfaction,
And anyone greedy, selfish and
cruel,
Will be crushed in this last
demolition.

It's called the War of Christianity,
I really believe that's true,
For the way of the heathen seldom
finds,
A land that's all true-blue.

A son, a sweetheart, or a Dad,
So many of you have sent,
You hope and pray that God is
good and will
Return him as he went.

Your prayers are not
unanswered,
Your hearts may break and
bleed,
But never, for one moment, think
That God did not take heed.

He's with them every minute,
For is it not His war
To fight the men, the *parasites*,
who
Monopolize His door?

The avaricious, greedy things
Who live, but yet, to die,
Will soon have met their judgment
Under a red, and blazing sky.

While America, the U. S. A.,
The home of the brave and the
free,
Shall count their losses, one by
one,
But will "Thank God, for
Victory."

So now you see why we are here—
To "back" our boys over there,
The EOP's just one of them,
But we're here to do our share.

So have no doubt, it may take
time,
But we'll take it in our stride,
Before they know what they're up
against
We'll have stemmed the yellow
tide.

Former Workers Increase Mail From Overseas

Pleas for Letters, Greetings to Pals, Stories Included

Mail addressed to *The Bomb-Shell* from former EOP employees in the armed services, both overseas and in this country, continues to increase as copies of the tabloid catch up with them in their travels.

Two V-Mail letters were received from Hawaii. **Corp. Edward L. Heard** sent greetings to the "old gang" at Group 62 and said life "on the Hawaiian Islands is as good as expected. The other V-Mail missive from Hawaii was from **Pvt. Thomas P. Landers.**

From "somewhere in England," **Corp. Peter Dinelli** asked by V-Mail that regards be sent to his former superiors here, **Supt. E. J. Egan** and **J. Redman,** Transportation Department. He related he had suffered a slight accident and was in a hospital, but praised the physicians and nurses located there.

Pvt. Fred Carpenter of the Marines wrote from the South Seas. He said he formerly worked on construction of Group 3 and in Building 16 after the line was completed. "I'd be glad to hear from any employee in Group 3 . . . come on, Pop and Dan, pick up that moldy old pen and scribble me a few lines," was his closing plea.

Sends Personal Regards

Burton C. English, Hendricks Field, Sebring, Fla., said he had just received his wings and his commission as a lieutenant. "Now I'm learning to fly bigger planes," his letter continued, "for the bigger job at hand. I am learning to fly the 'Flying Fortresses' you read about and maybe in the very near future shall have a plane loaded with bombs made at EOP. If such happens, I hope that I shall be able to bear the message which all of you put into each product which is made, each shell and each bomb, that we shall see this war to a victorious end. Give **Joe Shepley** and **Jimmie Cronan** of Group 1 my regards."

"The September 25th issue of *The Bomb-Shell* has been chasing me through several states," said **Lyman C. Bedwell,** former timekeeper, Officers Candidate School, Grinnell, Ia. "My old address was Ft. Leonard Wood and that is where the paper went first. From there it was forwarded to Nashville, Tenn., and then on to Grinnell, where I am studying to be an officer."

Sgt. Albert "Benny" Kallai, Jefferson Barracks, St. Louis, Mo., in addition to a request for **Jack Barry** to write more about Building 10 in his Group 1 column, said "it won't be long until I and all the rest of us will be dropping EOP projectiles on the enemy."

Laundry Story Seen

Lt. W. J. Durrenberger, formerly stationed here, wrote that he failed to get the last copy of the paper and that this "approaches the catastrophic since *The Bomb-Shell* is my main link to my ol' alma mater, EOP. Quite a few ex-EOPers are stationed at this, the chief testing and training center of the Ordnance Department, and all of them agree that *The Bomb-Shell* is, to put it mildly, an excellent paper."

A long letter was received from **Tech. Sgt. Joseph A. Cassani,** who entered the Army in March, 1941, and has been in foreign service for several months. He said strict censorship prevented his telling his location, but added he was doing work similar to that shown in the pictures of Supt. Francis R. Walsh, and his associates in the EOP Laundry, in the July 31 edition of *The Bomb-Shell.*

Pvt. Coy Bobbitt, Fort Sill, Oklahoma, said he would like to hear from the employees in Building 13, Group 1, and his wife, who is there with him, would like to hear from Group 4. "I have had several occasions to be with gun squads who fire the (censored) guns, and my regards go to the men and women who are making the shells," he added.

"Being in an ordnance company," wrote **Tech. Sgt. Hiram D. Whittemore** from somewhere in New Guinea in acknowledging the first five issues of *The Bomb-Shell,* "there is a great deal in it of interest to me and to many of the fellows in the outfit. I am glad to see that work is going along so well at the plant; that end of things is just as important as our work out here."

Wants Group 1 Letters

Johnny Milton Harrison, U. S. Navy, Great Lakes, Ill., sent a request for the men and women in Building 14, Group 1, to write to him. Regards to workers in Building 13 of the same group were sent by **Pvt. Louis J. Sedivy,** Camp Davis, North Carolina, who said he had been "pearl diving" ever since he arrived two months ago.

Pvt. John Brannick, Portsmouth, Va., sent greetings to Group 2 and said he hoped "they continue to keep production rolling, so that us boys in the service can have plenty of opportunity to fight for our country's freedom." A hello to Group 66-A was sent by **Pvt. Walter A. Simpson,** Port Stockton, California.

Pvt. George D. Turner, who wrote from the Army Bombardier School at San Angelo, Tex., said he would like some letters from his former associates in Buildings 10 and 12 in Group 3-A. He said one of his first jobs was to mop up every morning, but that this was easy as he had lots of practice at EOP.

Pvt. Harold E. Johnson, Fort Sill, Oklahoma, made a special plea for letters from **Supt. John O'Connell,** his former superior in the Timekeeping department, and from **Leo Gaffney** and **John Machias.**

Marines Like Paper

Pvt. Leo "Tony" Walters, who formerly worked in Groups 6, 7 and 8, wrote from the Marine Corps Base at San Diego, Calif., that there are several former EOP employees stationed there and that they looked forward to each issue of *The Bomb-Shell* with eagerness.

Mrs. Robert Terzick, Joliet, said her brother, **Pvt. Joseph Badorcki,** a former EOP employee, is now "somewhere in New Guinea."

Nicholas Belluso, Timekeeping Department, received an interesting, detailed letter from **Fred Semitekol,** a former timekeeper, who has been assigned by the Army to the Mira-Loma Flight Academy, Oxnard, Calif., for training as a pilot. He reported his marriage to a Joliet girl, who is residing at Santa Monica, near the school.

Mrs. Mary C. Fitzgerald, Joliet, mother of **Joe Fitzgerald,** former EOP timekeeper, wrote that he had passed all of his tests and had been sent to the gunnery school at Las Vegas, Nev., from Jefferson Barracks, Missouri. Another son, **Bob Fitzgerald,** formerly a construction worker here, is with a Coast Artillery unit in Hawaii.

Many Others Write

Letters and cards also were received from the following: **Pvt. Irving Katz,** Camp McCoy, Wis.; **Pvt. Ivan C. Nelson,** Lincoln, Neb.; **James H. Dunn,** Chicago, Ill.; **Harold Conrad,** AS, Newport, R. I.; **Pvt. Harley LeVasseur,** Camp Wheeler, Ga.; **Corp. Robert B. Crow,** Angel Island, Calif.; **Pvt. Frank Branger,** Dallas, Tex.; **Pvt. William F. Boehnert,** Fort Bragg, N. C.; **Pvt. Robel V. Gustafson,** Camp Haan, Calif.; **Pvt. Julius H. Dorich,** Aberdeen Proving Grounds, Md.; **Joseph Postula,** AS, Great Lakes, Ill.; **Pvt. Robert W. Walling,** Camp Bowie, Tex.; **Pvt. Jack Horn,** Keesler Field, Miss.; **Pvt. J. L. Waldvogel,** Hawthorne, Nev.; **Pvt. Stephen J. Rusina,** New Orleans, La.; **Pvt. Patrick L. Benoit,** Fort Bragg, N. C.; **James E. Koerner,** Naval Training Station, Great Lakes, Ill.; **Pvt. Lawrence McCann,** Fort Lewis, Washington; **Pvt. John Hibler,** Fort Lewis, Washington; **Pvt. John Vilt,** Camp Rucker, Ala.; **Mrs. M. Jacovec,** Braidwood, Ill., who wrote in behalf of her son, **Pvt. Albert Jacovec,** New Orleans, La.

Corp. Paul McCormick, Camp Robinson, Arkansas; **Jerome O'Leary,** U. S. Naval Training Center, Great Lakes, Ill.; **Pvt. Thomas W. Birkey,** Waycross, Ga.; **Pvt. Jesse G. Leenerts,** Blytheville, Ark.; **Tech. Sgt. E. W. Cockbill,** Fort Meade, Maryland; **Pvt. John White,** Camp Crowder, Missouri; **John Mazur,** U. S. Navy, Memphis, Tenn.; **Pvt. Joseph Smutnak,** New Orleans, La.; **Pvt. R. L. Schultheis,** Camp Breckinridge, Kentucky; **Pvt. Arthur Florian,** Camp Polk, Louisiana; **Corp. T. Q. Stukel,** Camp Stewart, Georgia; **Pvt. Joseph Zalud,** Niland, Calif.; **Pvt. F. M. Padley,** Fort Hancock, New Jersey; **Mrs. Adele Green,** who wrote in behalf of her son, **Pvt. David Green** at Kelly Field, Texas; **Mrs. E. McShane,** who wrote in behalf of **Pvt. Eugene Kelly; Pvt. Robert Kelly** and **Pvt. Francis Kelly; Mrs. M. L. Bolos,** who wrote in behalf of her brother, **Casimir Smigielski,** U. S. Navy, St. Augustine, Fla.; **Barbara J. Vilt,** who wrote in behalf of her brother, **Joseph J. Vilt,** U. S. Navy, % Postmaster, N. Y.; **Mrs. Roland Torkelson,** who wrote in behalf of her husband, **Pvt. Roland Torkelson,** Camp Wheeler, Georgia.

Forwarding Papers Excellent Service

Excellent service in forwarding copies of *The Bomb-Shell* to former EOP employees in the armed forces as they are moved from camp to camp in this country and then to overseas stations is rendered by the Mail Sections of the Army, Navy and Marine Corps. An illustration is a letter from **Lt. James F. Gilreath,** postal officer at Fort Lewis, Washington, asking that the addresses of seven former EOP men be changed to an overseas station.

Capt. G. A. Grant Named Executive Officer of EOP

Major Johnston Sent To Replacement Group At Aberdeen, Md.

Capt. G. A. Grant has been named executive officer of the Elwood Ordnance Plant to succeed **Maj. A. C. Johnston,** it was announced by **Maj. Kenneth M. Haber,** commanding officer.

Major Johnston has been assigned to the Ordnance Officers Replacement Pool at Aberdeen Proving Ground, Aberdeen, Md. He reported there November 16, after inspecting ordnance plants in other states.

Captain Grant previously was chief, operations and engineering division, Ordnance Department, here. He came to EOP September 20, 1941, after entering the Ordnance Department of the Army at Benicia Arsenal in California, August 8, 1941.

A native of Coulee Dam, Wash., **Captain Grant** was graduated from Washington State College with a degree in mechanical engineering. He was employed as an engineer in the construction of the Grand Coulee Dam for five years before entering the Army. He is married, has one daughter and lives within the area.

Capt. J. Rhinelander, formerly of the office of Field Director of Ammunition Plants, St. Louis, succeeded **Captain Grant** as chief of operations and engineering.

NEWLY APPOINTED Executive Officer at EOP is Capt. G. A. Grant, shown here at his desk in the Administration Building. He succeeded Maj. A. C. Johnston who has been assigned to the Aberdeen Proving Ground, Aberdeen, Md.

The boxing match between the Democratic Donkey and the Republican Elephant last Tuesday, November 3, was really a great fight. Of course, both boxers claimed foul blows in the later rounds. But the referee, John Q. Public, wouldn't allow it and he warned them to break clean in the clinches. The Donkey's seconds, "The Democratic Party," claimed they won all but two rounds. The Elephant's seconds, "The Republican Party," claimed they won all rounds, but the foxy referee, "Old John Q.," called it a draw and told them to shake hands like a couple of good sports and leave the arena. The judges and the referee would like to see them in a return engagement at a later date, and, if they are smart, they should both be in better fighting condition than they were this time. All they need to do is knock out all their sparring partners, Japs, Germans and Italians, while they are training and we will all be there the next time they meet.

The Donkey hee-haw'd a little too loud and kept the voters awake, but he shouldn't fear the Elephant too much because although the Elephant carries a large trunk on the front end, in case of a long stay, he also carries an overnight bag on the other end just in case.

John Bradeich refused to vote when he couldn't find **Thomas Jefferson's** name on the ballot.

Clinton Jones refused to vote because **Abraham Lincoln's** name wasn't on the ballot.

Gerald Fitzgerald, material checker at the Hub, stayed up all Monday night so he would be the first one to vote Tuesday morning, and when he couldn't find "Miss Victory's" name on the ballot, he not only refused to vote; he got so mad, he said he will never vote again because these politicians are all full of bunk.

Production Planning

LORETTA RYAN
Correspondent

Funeral services were held November 2 for **James R. Wilson,** 52 years old, Production Planning Department, who died as a result of a heart attack. Mr. Wilson had been employed here since the plant was started. He was formerly a divisional manager for the Florence Stove Company, Kankakee. He is survived by his wife, **Mrs. Alice Wilson,** one son, and two grandchildren.

Goodbyes are being said almost daily in Production Planning. Three boys left in one week for the armed forces. **Dick Ebben** and **Dick Court** will be in the Army and **Larry Crawford** in the Air Corps. Other members of the department are beginning to wonder if an all-girl office force is imminent.

Things never known until now: That **Loretta Ryan** can blush . . . Mr. Court's fondness for the song "Sylvia" . . . **Harry Brown's** development of literary talent . . . **Dorothy Maxwell** does not like to ride in the front seat . . . **Mary McGovern** does not like to be called "McGovern" . . . **Fred Mastin** does not know all the gossip . . . **Wallace Bensen** is now smoking 15-cent cigars, thanks to a fellow passenger . . . **Bud Wright** is arriving at the crack of dawn to churn the wheels of progress.

Fellow members of the department extend sympathies to the family of **James Wilson,** who died suddenly.

A few new members have been initiated including **Genevieve Karr,** who has taken over the duties as chauffeur for the office.

William Stanley of Group 2 is soon to leave for the Army.

John Connors of Group 1 has been presented with two assistants, namely, **Pearl Corbin** of Aurora and **Lois Bobbie** of Joliet.

All miss the friendly smile and carefree manner of **Martha Craig,** who has returned to school.

Harbour Lieutenant In U. S. Engineers

Irving C. Harbour, who resigned as superintendent of road maintenance early this month, has received a first lieutenant's commission in the Army Corps of Engineers. He reported for duty at Fort Claybourne, Louisiana. Mr. Harbour joined the EOP organization November 16, 1940. His wife, **Mrs. Margaret Haley Harbour,** and son, **Frederick,** live in Joliet.

FIRST GIRL SAILOR from EOP, Louise Thompson, nurse in first aid station for Groups 4-5, has left to be an ensign in the Navy. She is shown here at right as Nurses Dorothy Busse (left) and Marie Ulrich told her farewell at the EOP Hospital. Miss Thompson will be stationed at San Diego, Calif.

General Groves, Who Spoke Here, Knows EOP

(Continued from Page 1)

the Elwood site and his visits continued through his successive assignments as Chief of the Fixed Fee Branch and Chief of the Operations Branch of the Office of the Quartermaster General. Any one who has been associated with General Groves knows that his visits were not perfunctory. His sources of information are such that his questions are pointed, his criticisms just and his attitude helpful.

Gives Full Co-operation

Elwood Ordnance Plant has been fortunate in enjoying full and complete co-operation from General Groves and his assistants, brought about by keen understanding of difficulties inherent in a large construction project of this kind. During the whole construction period of this plant, many problems were continually met and solved, and the successful completion of this plant on time and ahead of schedule, reflects great credit, not only upon General Groves, personally, but upon both Offices of Quartermaster General and Chief of Engineers.

In General Groves' administration of the assignments given him, he was ably assisted by **Frank Creedon**, his principal assistant, and by **Messrs. Widmyer, Chellman, Seider, O'Brien** and **Maher**, and many others in his Washington office, who made frequent visits to Elwood during the construction period; by **Col. L. D. Worsham**, Division Engineer, and **Col. Charles Keller**, District Engineer, U. S. Engineers Office, Chicago, Ill.; and by **Maj. Elvin R. Gates, Maj. Curtis A. Nelson** and **Capt. K. D. DeYoung**, successively, either Construction Quartermasters or Area Engineers, located on the site.

General Groves' message to Elwood Ordnance Plant workers is based upon first-hand information gained during the performance of his arduous duties. That he should consent again to give us a message is typical of the man, and demonstrates the spirit which impels him to do his every bit toward making our war efforts successful. We at Elwood appreciate the high compliment which General Groves has paid us, and we know that the response to his message will be whole-hearted and complete.

★ ★ ★

General Groves' Career Varied Here, Abroad

Born at Albany, N. Y., August 17, 1896, **General Groves** studied at the University of Washington and at the Massachusetts Institute of Technology and was graduated from the U. S. Military Academy at West Point in 1918.

He was appointed second lieutenant in the Corps of Engineers November 1, 1918, and was promoted to first lieutenant May 1, 1919, while attending the Engineer School at Camp A. A. Humphreys—now Fort Belvoir, Virginia. From Camp Humphreys he was ordered to France in June, 1919. While there, with the American Expeditionary Force, he served on a tour of observation from June 20, 1919, to September 10, 1919. At the end of that tour he returned to the Engineer School at Camp Humphreys.

From June, 1920, to February, 1921, **General Groves** commanded the Engineer Demonstration Company at the Infantry School at Fort Benning, Georgia. He returned to the Engineer School at Camp Humphreys, and was graduated July, 1921, from both the basic and the civil engineering courses.

General Groves afterwards served at Camp Lewis, Washington. From August, 1921, until September 20, 1921, he commanded a survey detachment at Fort Worden, Washington. There followed a tour of duty for one year with an Engineer Training Company at the Presidio of San Francisco, California. In November, 1922, he was ordered to a three-year tour of duty in Hawaii with the 3rd Engineers, stationed at Schofield Barracks, T. H.

Served in Nicaragua

Returning to the United States, he served as Assistant to the District Engineer at Galveston, Tex., from November, 1925, until October, 1927. He then joined the 1st Engineers and served with this regiment as a company commander successively at Fort DuPont, Delaware, until November 10, 1927; at Fort Ethan Allen, Vermont, until April 15, 1928; and again at Fort DuPont until October 15, 1929. He then took his company to Nicaragua where it formed a part of the Army Engineer Battalion that surveyed the Nicaraguan Canal Route. During this period he participated in relief work after the Managua earthquake disaster—restoring water and electric service to the city. He returned to the United States in August, 1931, for duty in the Supply Section, Office of the Chief of Engineers, Washington, and later became chief of that Section.

August, 1935, found **General Groves** in attendance at the Command and General Staff School at Fort Leavenworth, Kansas. He was graduated from that school in June, 1936, and was assigned as Assistant to the Division Engineer, Missouri River Division, at Kansas City, Mo. He then entered the Army War College at Washington, D. C., in September, 1938, from which he was graduated in June, 1939.

After graduation from the Army War College, **General Groves** was detailed in the War Department General Staff in Washington—in the Operations and Training Division. He had been promoted to captain October 20, 1934, and, July 1, 1940, he became a major. Three weeks later, July 22, 1940, he became a special assistant to the Quartermaster General in connection with construction. On November 13, 1940, he was promoted to colonel (Temporary) and assigned to the Construction Division, of the Office of Quartermaster General. He served as Chief of the Fixed Fee Branch of this Division until its merger with the Operations Branch. He then became Chief of the latter branch and served in that capacity with the Quartermaster Corps until the transfer of the Construction Division from that Corps to the Corps of Engineers December 16, 1941. On that same day he was assigned to the Office of the Chief of Engineers and continued as Chief of the Operations Branch until early in March, 1942, when he was appointed to his present position. On September 6, 1942, he was promoted to the grade of Brigadier General (Temporary).

To the Builders and Workers of EOP

(Continued from Page 1)

are loading here, we will need them very badly, and we had better have enough on hand so that we can do business with Hitler on our terms rather than his. . . . In the shells sent abroad from the factory you have built, you are striking a second blow in the defense of freedom. Every shell you finish here gives Hitler another worry! Shells and bombs are the only talk the Nazis understand. You can't reason with a Panzer division.

"Well, they *have* ganged up on us and what we feared might happen has come to pass. In retrospect, we may now look at the job you have done and view it from the new perspective of a nation at war, a nation now engaged in an all-out, knock-down-and-drag-out fight for its very existence. It is then and then only that we begin to realize the true significance of the vital contribution which has been made to the security—indeed to the very survival of our country by the men and women workers of Elwood.

"Together with all those who have made the assembly-line full partner of the firing line, you constituted the first army in the first theater of operations — military construction on the home front.

"The battle is on and there can be no pause or compromise until we have achieved complete victory. Only one job lies ahead of us—the job of winning this war. Elwood, where production lines went into use two full months ahead of schedule, is typical of the American drive and energy which will bring that day of triumph.

"Through the medium of this brief message, which has been requested by **Harrison Smith**, it is a personal pleasure for me to renew the ties that bind us all together, not merely in the construction and operation of this large war plant, but in the spirit of determination, sacrifice and cooperation which will overcome our enemies.

"American heroes have died in action since we gathered at the foot of your tall flagpole and broke bread together at your hospitable barbecue in those peaceful days of October, 1941. Their blood cries aloud for vengeance and victory. Today you have the satisfaction of knowing that your labors have not been in vain and that the great factory you built in such a hurry and the shells you are now producing in such volume are doing a personal job for us all in the fight for freedom and democracy.

"Your products carry the Elwood mark—a mark that today spells death and destruction to the Axis Powers. Keep them coming! Yours for an ever and ever-increasing production!

—Brig. Gen. Leslie R. Groves.

Our Job

Government inspectors are we
Just as happy as can be.
We see that things are done
just right
For our dear boys who have to
fight.
The enemy had better watch
out
For the Fuzes we inspect are
good and stout.
We buy War Bonds and Stamps
To make the U. S. world champs.

—Frances Olroyd

GROUP 3

NORBERT McLUCKIE
Correspondent

William "Tiny" Kautz, foreman of Building 3, was scheduled to report for an Army examination November 13. Being accustomed to examinations after taking two in one week, he shouldn't mind at all. Here is an attempt to give you the results of part of Tiny's examination at the EOP Hospital:

Doctor: Step up on the scale.

Tiny: That's where I got you. That scale only goes to 300 pounds.

Doctor: Then stoop over and touch your toes.

Tiny: That's where you got me.

Who said the women are not taking-over now days? If in doubt, ask **Dick Gordan** of Building 10; he's just a passenger in his own car.

Donald Riley, electrician, is almost ready to set sail for Siltha Bay, Alaska. War construction is calling him, and he really loves to roam. Every one wishes him luck and a pleasant journey.

Stanley Pearson and family have returned from a few days' visit in Minnesota.

Earnest Hoffman, carpenter foreman, has been reading a book called "Love Encyclopedia." He may turn out to be another John Barrymore.

Peter Golgin, assistant foreman in Building 3, has been sporting a white shirt and brown tie lately. His associates are wondering.

Tony Gomora acquired a new nickname when his oil stove went "hay-wire." The boys now call him "Blackout."

Frank Underwood and **Julius Block** of Building 3 have started a new business, selling lunch boxes which are given up by men going to the Army.

Wilbur Sanders is now on his way up. He has been promoted from oiler to machinist.

As a patron of the arts, **Stanley Kroger**, happy-go-lucky foreman of Building 16, says that he has gone completely overboard on music and esthetic exercises connected therewith. "Of course," he said, "music to please me must be of the better sort, as I have no use for the "low-brow" form. However, when they put on the old "Boogie-woogie" with plenty of "Gut-bucket," then I'm the "hep-cat" who can really "cut a rug."

If there is anyone who wants information on taking care of babies, ask **Bob McMahon**. He has good experience given him by his daughter, **Pat**. She just got over a bad case of the whooping cough.

Herschel "Kankakee" Laughlin is looking for some cash customers to and from Kankakee. Somebody will have to pay for those new tires.

Among the boys from Group 3 going to the armed services in the past week are: **Paul Higgins, Donald Sutton, Wilbur Bowman, Jr., Jack Probisky, Henry Blackmer, Paul Browman** and **James Recchione**. Best of luck is wished for these boys, and for those whose names may have been overlooked.

Woody Koerner is fully recovered. The blessed event finally took place. Woody is now the proud papa of a son. Congratulations are due both Woody and **Mrs. Koerner**.

It is wondered: What has happened in the top-off bay of Building 16—such a nice display of color. It seems everyone has donned a loud tie and shirt combination. Could it have started because of that black bow tie that **"Mack" Persinger** introduced recently? . . . How **Ed Jones** can stand to work an eight-hour shift and then go home to attend a midnight show on Hallowe'en. . . . How **Paul Lambert** feels in those distinguished blue coveralls after wearing brown and gray so long. . . . Why **Wally Britz** carries those bowling scores around with him. . . . Why **Junior Ballentine** had such a smile on his face when he was asked whose picture that was stuck on the wall, lately. Congratulations are in order. . . . Why **Herman Goselin** says he is getting in such a condition that he can see better at night than in the daylight?

Wayne Munyon has finally shifted to second gear (second great wonder and only five more to go). He is able to get up and chase people "when he wants to." He soon may be able to walk from 20A to 10 in less than an hour, or even run it.

Joseph Zelinko, the cowboy from Coal City, seems to have rope trouble. The other day, his boss asked him to splice a rope and he finished up with a sailor's knot.

Nimrod Tales—Good and Bad

Bustling **Bill Testa** of Building 5-A is quite enthusiastic over his great preparations for the hunting season. He claims to have perfected an attachment for his gun that should have wonderful results. In describing it, he said that the gun will fire both barrels, and will then throw rocks in all directions for five minutes, thus insuring him a successful day. Mr. Testa said that he could not claim complete credit for his invention because after some discussion with **Jack Hummel**, the idea came to him in a flash. Should Mr. Testa become lost in the wilds near Coal City, **"Jolly Joe" Oldani** will be on deck with his engaging smile and in there pitching for him as usual.

Arky "Hill-billy" Holland wants to sell his hunting dog. Prospects are asked to form a line on his right.

Harl Son should be told that **Vern Worden** got six ducks his first time out.

Charlie Robbins, Power House, was seen eating wild duck sandwiches. He says he shot a whole mess and at least brings proof that he got one.

Fred Dvorak, Building 3, went pheasant hunting after promising ten pheasants to his friends. It seems nine of his friends were disappointed.

Ed Upham, genial taskmaster of Buildings 6 and 7, *tells of a very* unusual experience in the wilds of Wisconsin. "Pheasants were out of season," he said, shaking his head sadly, "and for some unexplained reason, one of these birds—a very large one—seemed to conceive a violent dislike for me. As long as it merely pecked at the back of my legs, I restrained myself, but when it started jumping higher and delivering very hearty pecks, indeed; I lost all patience and discovering a gun on my shoulder, I absent-mindedly shot it in self-defense."

Anyone needing shotgun shells, might be able to talk **Veryl Schmidt** out of some of his stock. He may be seen any time and is really anxious to get rid of his surplus.

Robert Fox, John Hakey and **Joe Tonkovic** were discussing their prowess with the mighty muskets. According to their claims the birds might just as well give up.

Henry Risk is going around feeling like a duck. He has heard so much talk about duck hunting from a few boys in Building 15, that he was talking to someone the other day and he filled in all pauses with "Quack, Quack." It's good that it's too cold to swim, or he might have been tempted to take a dip.

Elijah Pugh did it again. He was on the state team that won the National Championship Trapshoot Meet. He hit 196 out of 200. The team knocked off 983 out of 1,000. Some of the hunters should take him out on their hunting trips; it would save them all that embarrassment that has been so prevalent.

Frank Underwood is all decked out with a very bright red plaid shirt as a result of compliments from feminine riders in his bus.

The latest solution to the manner in which the large stone quarry on the Joliet highway can be moved over to make room for the new road was made recently by one of the staff here—namely—they need merely engage Yehudi as the contractor and he will use sky-hooks to fasten pulleys and move the hole.

Girl Reporter's Heart "Walks On Tiptoe" As She Tours EOP Groups for Story

Impressed By Bombs, Shells, Safety Precautions, Recreation Program and Interviews With Girl Workers

By Ann Marsters

There is something about a roomful of bombs that can make you feel both proud and horrified.

You are proud in the knowledge that they are OUR bombs—and that there are so many of them. And yet, there's that feeling of horror when you look at them and can even dimly visualize their terrible power for destruction.

From a respectful distance, the Elwood Ordnance Plant, near Joliet, looks more like a military academy than an arsenal. The outside of the long, low buildings, scattered over many acres, gives you no hint of what is going on inside.

Searched First

Before entering any of the various sections, you must pass inspection at a "shakedown" house. It seems that every time you turn around there is a "shakedown" house, always located at a good distance from the buildings they protect.

Here you turn over your matches and wrist watch. (I could understand about the matches, but the wrist watch matter was never made quite clear to me.) There are uniformed officers, both male and female, ready to search your pocketbook and to politely frisk you.

All the while I was at Elwood I was conscious of an element of excitement in the air. The very presence of the high explosives, the detailed precautions taken for our safety, made me feel closer to the war than I had ever felt.

It was all so impressive and thought-provoking that my heart seemed to walk on tiptoe.

Bury Explosives

As we were driven toward our first objective, I asked Capt. Tunstall, who was acting as my escort, about the countless, grass-covered mounds which dotted the earth around us. Igloo storage magazines, he said they were, covered with soil to keep the explosives cool.

The really touchy explosives are kept wet as well as cool, until they are ready for use.

At last we entered a building where about 500 girls were working with fuzes and boosters. A booster (in case you are as ignorant of such things as I was) is a small cup filled, eventually, with tetryl powder which boosts the fuze from the shell.

Sunny Room

The big room was filled with sunshine from many windows. Everything looked neat and clean. The girls were all dressed alike in trim blue uniforms which had been designed by the War Production Board.

Each line of girls (there are about 23 to a line) is supervised by a forelady rather than a foreman.

One of the foreladies, Miss Harriet Porter, introduced me to some of the girls and explained the type of work they are doing.

Miss Porter herself was trained for her job in three months, during which time she learned how to do every job on the fuze line. She said:

"The competitive spirit of the girls is splendid. One line is always trying to beat the production record of another line. You see, there is an inspector at the end of each table who keeps an account, on paper, of the work produced." So the girls have only to glance at the account sheet of a rival line to know who is ahead.

The lunch room and "change" house, so named because it is where the girls change into their uniforms each morning, is reached through a long corridor hooded by corrugated asbestos. The lunch room is the only place in the plant where the girls are allowed to smoke, but even here they cannot use matches. There is an electric lighter on the wall.

Elwood Story Is One of War Series

The story by Ann Marsters, reprinted here through the courtesy of the Chicago *Herald-American*, is one of a series Miss Marsters is writing from factual information obtained at various war plants.

These rooms are also called the "bomb shelter," because always during a thunder and lightning storm the plant ceases production and the workers congregate here and in similar "bomb shelters."

I was eager to move on to another section of the plant where the bombs and shells reached the last stages of production.

Searched Again

An army car took us to the shakedown house near the entrance of the bomb line. And here I had to part with practically everything in my pocketbook, including my comb, which was classed as inflammable. For there was T.N.T. in that building — T.N.T. mixed with nitrate of ammonia, which makes a fine explosive called by a name that sounds like a sleeping potion. "Amatol," I think it is.

Before we entered the bomb building, we were asked to touch a metal plate, designed to ground any electricity in us.

Then I was ready for my first closeup view of bombs as big as elephants.

And there they lay—row upon row—looking as peaceful as sleeping tigers in all their awful symmetry.

For a minute I felt sorry that men had ever become smart enough to make such things. If they had never learned how to produce the deadly, magnificent implements of war, we might still be fighting with bows and arrows. And these same workers might be busily engaged in making the BEST bows and arrows in the world.

Women Working

Well—it so happened that I arrived on the very day that women had for the first time been put to work on the bomb line.

They were working side by side with the men, learning the various operations which might soon be performed entirely by feminine hands.

Several of them were working on either side of a conveyor on which was a line of bombs. One of the girls tried to explain to me what she was doing.

"First," she said, **"the nose plug is removed and the fuze seat liner inserted. Then the tail plate is removed, the threads cleaned, and the interior painting inspected."**

Knows Her Job

Even though she had never worked on bombs before, she seemed to have a perfect understanding of "fuze seat liners," "nose plugs" and "tail plates."

When such details have been attended to, the bombs roll along on the conveyor to the paint spray booth.

Here I found another new employe—**Mrs. Anna Jancuska**—who was having a fine time spraying the bombs with paint.

Because she was so new at it, she was really having fun. She said:

"Isn't this a wonderful way to paint? You just press a button, swish the spray around, and there you have a freshly painted bomb."

Placed On Racks

From here, the bombs are placed on racks which are hitched to a little truck and carried to the line, where they are loaded with explosives. (I was allowed to try my hand at driving one of the trucks after **Ida Anderson** and **Angela Murayski** had hitched bomb-filled racks to it.)

So now we are ready to move on to the department where the actual explosives are; where a lot of young women are working with live shells, handling each one with skillful and respectful fingers.

You couldn't miss seeing the big sign which read:

"Immediately Upon Entering This Building, STOP. Have Your Shoes Inspected."

I was at the Elwood ordnance plant near Joliet and had finally arrived at the department where tremendous bombs and shells are filled with explosives and sent on their journey toward victory.

Safety shoes are in order here—shoes which have no nails in them, no metal of any kind. The heels must be rubber (in spite of everything) and attached to the sole by wooden pegs. It's easy to understand that a nail in a shoe might cause a spark as you walk, which, in turn, might come in contact with explosives.

Working On Shells

Girls were working on shells stacked before them on long tables. They were putting fuzes on projectiles; carefully cleaning the shells, brushing off whatever TNT dust might be on them. They were doing spot painting—touching up the shells where the paint had worn off. And some of them were zoning the shells, which means making certain dents on the steel that designates firing distance of the weapons.

A girl in khaki overalls came sliding up to one of the tables. She really slid, because she was pulling a small truck loaded with shells and as she approached the table she let the momentum of the truck slide her along.

She was blonde and pretty. She told us her name—**Shirley Stafford**—and she said:

"When my husband joined the Army I decided to get a job in a war plant. I started in the fuze and boosting department, but this is the job I like best. It isn't work. It's like play.

"I'm living with my girl-friend, Margaret Kormelink. She works here, too, and her boyfriend is in the Army. She does what is called 'spilling the fuze.' That means unpacking the fuzes into trays."

Jean Kane and **Dorthy Carlson** glanced up from their shells to tell us about their connection with the Army. Jean said:

"I have two brothers—one somewhere in the Hawaiian Islands and one who, as far as we know, is still at Pearl Harbor."

Dottie has a boyfriend, to whom she is "practically engaged," in Hawaii.

Splendid Recreation

Apart from their work at the plant, the girls are offered splendid recreational facilities. Every Wednesday is Ladies' Day at the big Recreation Building, where the girls may take their choice of bowling, basketball, volleyball, badminton, ping pong, shuffleboard, pool or cards.

In last week's edition of *The Bomb-Shell*, the plant's newspaper, there was printed the following message to girl workers:

"You represent a sizable portion of the many thousands of workers in the factories, offices, etc., who are releasing much needed manpower for the Army. We realize our first and most important job is to 'keep 'em shooting' by turning out our full production quota. But 'all work and no play makes Jane a dull girl,' therefore it is the aim of the recreation department to help each girl build for herself a sane program of leisure-time activity which will keep her mentally and physically fit for her job as a production soldier."

Dances At Plant

There are occasional dances at the Recreation Building—the most recent one being a gala Hallowe'en party at which the workers selected a number of "Miss Victory" candidates.

All the war plants I visited seemed very much concerned with improving the girls' social lives. And I can't imagine a girl war worker ever finding it necessary to write a Lonely Hearts column.

I spent most of the afternoon learning more and more about shells and their final operations. I even followed some of them to the shipping room where they are packed in containers and loaded into waiting freight cars.

But there was one thing I learned for which I was especially thankful.

I learned the exact purpose of the countless little screws which I had inserted into shells when I worked on the production lines at Mills Novelty Company.

I knew at last that I had put in the screw that holds the booster that holds the fuze.

The night shift was about to take over when I left Elwood Ordnance. On my way out, I walked again past the rows of smooth, fat bombs. I reached out and patted some of them—and wished them lucky landings.

FAMED REPORTER and feature writer of the Chicago Herald-American, Ann Marsters, is shown here interviewing Charlotte Doxsee, Personnel Department, while A. Berardi, Herald-American pix man, focuses for a flash.

Student Outlines War Jobs at Home

By Deborah Deylitz, Sophomore, St. Francis Academy, Joliet

This country, the United States, has entered a second World War to help free the world of men like Hitler, Mussolini, and Hirohito. Our men and boys are willing to defend the rights of all the nations, which are together opposing the Nazis and Japs on the fighting front, while our women work in war plants and on the home front.

Since December 7, when the Japs bombed Pearl Harbor, many have died, not in vain, but for a cause which is just and true. Not all who died have been men; women and children also have died. They all have not died fighting as soldiers and nurses, many have been shot, bombed, starved, and yet some do not realize the seriousness of this war. They have read the newspapers but still they go on helping the Nazis and Japs. This seems impossible to some people, yet it is true.

Even though there is a war, a war which in the end will show whether we will be ruled by a dictator or will have a free democracy, people go on helping our enemies by having strikes which slow up the much needed war materials, by giving information, some of it unintentionally and some on purpose. Isn't it better to give your life to guard a military secret than to give it to our enemies and have them use it against us?

Yet with all the jobs this war gives, people say what can I do, and how can I help win the war? Those at home can help by giving to the USO, working in a war plant, being an Air Raid Warden, Airplane Spotter, Civil Air Patrol Pilot, or doing any kind of Civilian Defense Work. Women can join the AWVS, the WAVES, or the WAACS, while men can join any one of the armed services, or work in a war plant if over the age limit. All sorts of jobs have been opened since the war, still others have been left vacant by those who have been called into the armed forces.

No one can really say that there is nothing that they can do to help with the war effort. We must work hard to help the war plants produce the vitally needed war materials to aid in fighting our enemies, to protect our homes, and we will fight to prove that this government of the people, by the people, and for the people, shall not perish from the earth.

Six EOP Girls In "Miss Victory" Finals

(Continued from Page 1)

In addition to the six district finalists, other EOP candidates were **Betty Ross** and **Betty Stalzer**, War Department; **Ruth Barr** and **Wanda Merritt**, Group 1; **Harriet E. Porter** and **Ruth Sanderson**, Group 4; **Catherine Laske, Delores Nelson, Veronica Carlson** and **Virginia Andreason**, Group 5; **Betty Palmer** and **Juanita A. Thompson**, Group 6; **Rouray A. Stinson, Ione Calhoon, Ann Grobarcik** and **Julia Corzan**, Group 7; **Norma J. Castle** and **Mina Nordstrom**, Group 8; **Virginia L. Anderson, Lois M. Peterson, Edith F. Klenz, Helen J. Johnson, Jean Nelson, Ilene A. Buckmaster, Genevieve M. Bendrick, Catherine J. Gorman** and **Amy M. Redington**, Group 9; **Frances Biros**, Group 3-A; **Margaret Turner** and **Arlene Schloendorf**, Administration Building.

In commenting on the six EOP semi-finalists, the *Herald American* published the following:

Miss Danser, 18, of Kankakee, an explosives operator. She left high school at Lawrenceville, Ill., last Spring to enter war work, is active in war bond drives and Red Cross work, and has a boy friend in the army.

Miss Jensen, 18, of Kankakee; Red Cross and USO worker, sings at service men's canteen and leads a war bond selling team.

Miss Willford, 20, of Wilmington, Ill., mechanic-machinist, welder and truck driver; Red Cross, USO worker, OCD first aid trainee, aircraft instructor in machine shop work, student of aeronautical engineering.

Mrs. Connors, 29, of Kankakee, bomb fuse reject division; active in war bond drives; has two brothers in army and maintains regular correspondence with group of home-town soldiers in New Caledonia.

Miss Enger, 20, forewoman; singer at USO center; active in war bond drives; maintains regular correspondence with service men on various fighting fronts.

Miss Foster, 22, Kankakee, forewoman on fuze assembly line; USO worker; canteen dance director, maintains regular correspondence with soldiers in Alaska and Egypt.

Readers of *The Bomb-Shell* in the armed forces also took an interest in the contest. In a letter from the Army Air Forces Technical School at Lincoln, Neb., **Pvt. Stanley Sporar**, a former EOP employee, wrote that he and his buddies had taken a vote which resulted in the selection of Miss Jensen as their favorite to win the title.

Ordnance

HELEN McGINNIS
Correspondent

The miners were extremely busy over the week end . . . diamonds were the vogue Monday morning . . . specially in the Mail and Record section. **Anne Kakara** and **Catherine Stortz** were the lucky gals. . . .

Marge Kangley heard from her big brother **Norm Long** . . . he's in Miami, Fla., learning the ropes of the Air Corps. . . . He is surely missed around here. . . . Didja know that **Esther Johnson** of Stores and Transportation, joined the WAAC's? . . . Yep she done did it, she's just waitin' for the call to the Armed Forces. . . .

Have you ever heard **Mavis Emerson's** stories about political big shots? . . . It's understood that **Cecil Wheeler** knows them. . . . How about it? . . . Off the cuff. . . . **Ken Bull** is anxiously awaiting the return of his car . . . it has been in the "garage" for about three weeks . . . he sure wants to get to Aurora. . . . Hope the gas rationing doesn't go into effect before he gets it out of hock?

Understand that **William Leeland** has remarked that all this country needs is a good 6c cigar. . . . But did you know that Room 10 in the Personnel Building never has to have the fumigators . . . reason—Mr. Leeland's cigar and **James George's** pipe . . . really it's colossal. . . . Mr. Leeland himself said he couldn't believe it was so bad until he left the room and then returned a little while later. . . .

Have you ever heard the horn on the **Dix (Ev and Lois)** car? . . . it's a riot. . . . 'Tis heard that **Clara Wehner** is contemplating a trip to Galesburg. . . . What goes on down there?? . . . **Bernece Carlson** and **Bea Berge** are making that trip about every other week end. . . . Perhaps the train ride has something to do with it??? . . .

Course, you must have read that **Mrs. "Red" Bowler** doesn't get up in the morning to get "Red's" breakfast. . . . (The local gazette carried the story.) . . . **"Ollie" Olsen** was heard giving Red the once over concerning it. . . . P. S. Wonder if "Ollie" isn't in the same boat? . . . Ask **Dottie?**

"Tommy" Haigh is in the dog house with **Helen Harmon** . . . it has something to do with the dance. . . . So far, that's all that's known. . . . **Harold Kapsch** is now in Camp McCoy going through the works. . . . Hope he sends that picture he promised. . . . **Marie Maren** has become an "enthusiastic" bowler . . . in fact, she most disrupted the whole bowling alley when she got the first "spare". . . . **Hazel Kossack** and her better half, **Arthur,** were having quite a serious conversation on a downtown corner the other nite . . . yep . . . they couldn't decide where to go. . . . They sure look like the happily married couple. . . .

"Ginny" Harrod will be burning up the mail soon . . . her fiance is on his way to the armed forces. . . . **Evelyn Tecotsky** has been mysteriously absent from bowling Wednesday nights lately. . . . Wonder who he is??? . . . Have you ever noticed how much **Betty Wallace** looks like **Bette Davis?** . . . **Jane McVay** has gone home to stay —she'll be missed. . . . **Claire Shol** has been moon eyed lately. . . . **Kay Rosenbaum** is knitting a sweater for the Red Cross . . . she is worried about the size and wanted to try it on **Lt. Robert Johnson** . . . so far the result of this experiment hasn't been learned. . . . **Ruby Mosteller,** of Personnel, was embarrassed no end the other morning when the horn on her car wouldn't stop blowing?? . . . some good samaritan came to her rescue. . . .

Wonder where **Ralph Clutts** keeps himself . . . since he is on the night shift he is sure a spook. . . . What metamorphosis has come over **Lewis Shuck** of Timekeeping????? . . . He comes to work all slicked up . . . tie, shoes lined, pants pressed and in fact the whole works. . . . Anyone know the reason????? . . .

Did you know that **John Hugo Green** hails from the wilds of Wisconsin, **George Kelly Stevens** and **Betty Lou Page** from Texas, **Anita Cleveland** from Minnesota and **Charles Downes** from any place on the continent you might want to name? . . .

Ed Webster is going to take a vacation before he is called to the Air Corps. . . . **Sam Fischman,** the genial gentleman, is leaving too . . . he's going somewhere in the Chicago area. . . .

The Tick-Tock Timekeepers had quite a session the other Thursday night . . . it was a dinner party at a nite spot on the Du Page River . . . the event . . . just a get together for the Department. Everyone really devoured the good steaks and after dinner a song fest was started by **Miss Page** and **Mary Kay Lohman.** . . . Pert little **Joan Malloy** is now with the Frankfort Sailplane Co. . . . **Martina Schoman** has a good looking boy friend. . . . Talk about good looking people, **Juanita Kliegl** of Payroll has a brother or cousin that is "keen" and that **Patty Haley** has been looking his way of late . . . but not to such an extent that **Gerry Kestel** doesn't know it. . . .

The Dot and Dash Club reveals that **Lt. Bill Durrenburger,** formerly of this plant, has had quite a time in Aberdeen? . . . **Mr. Wheeler,** that shy little gentleman of Purchasing, has the cutest daughter you ever saw . . . boy, will she be a honey when she grows up. . . . Ask **Ann Lipsar** and **Lois Dix** how they enjoyed their trip?

Ordnance Inspection

GERALDINE M. WARD
Correspondent

The Hurley Machine Company of Chicago, manufacturers of war material, has organized its women ordnance workers into an organization entitled "The WOWS" and is encouraging all other war plants to form Chapters to affiliate with the original group, thus making it a national organization of "WOWS." EOP girls could be classified as "WOWS."

William H. Peterson, assistant chief inspector, is sporting a new chapeau. He won't say how he obtained it.

Lawrence E. Myers, divisional inspector of Inert Storage, attended an "Ordnance Container Course" at the U. S. Forest Products Laboratory, Madison, Wis., November 9 to 13.

Mother of twin sons, **Brian** and **Bruce, Mrs. Maxine Hillenbrand,** pictured here, is the wife of **Willard K. Hillenbrand,** Government Inspection Department.

Garr Burt's overtime check is spent taking **Kathleen Dugan** to lunch. Kathleen is the little girl with the big appetite. Her father, **Melvin Dugan,** and Garr are coworkers and for some time it was Mr. Dugan's obligation to take his daughter to lunch. However, tiring of the responsibility and the deficiency of funds, he eventually devised a method of discontinuing the practice by matching pennies with Mr. Burt. Mr. Dugan carries a rabbit's foot and Mr. Burt is usually the loser, or perhaps "Winnah."

Ordnance Inspection extends congratulations to **Elmer Martinson** and **Harry Larsen** as courteous and pleasant officers guarding the Ordnance Inspection Department offices on the first floor, west wing, Administration Building.

Morris Banks and **Kenneth Palmer,** former Government inspectors, Group 2, are with the Air Corps in Miami Beach, Fla. Incidentally, they are in the same company and stationed within a half-block of the beach. They were never known to do much corresponding, however, they have been writing frequently to the boys in Group 2, keeping them advised of the ideal weather which prevails in Miami. They may be receiving a commission from the Florida Chamber of Commerce, or they may be lonesome. They should be told of the good duck hunting in Illinois.

A rather unusual contest is to take place in the Ordnance Department Divisional Office on Saturday morning, November 14. **Homer Peters** claims to be the champion "Devil's Food" cake baker and **Geraldine Ward** also claims the distinction. Each contestant will bring their cake, unmarked, to the office where the judges (self-appointed) **Kermit Long** and **Paul R. Smith,** will decide, after sampling, the better of the two. There are certain rules in a contest, but these have been dispensed with, because Homer has threatened the judges should they select the wrong cake. Geraldine did not say what she would do if she lost. The winner will be announced in the next issue of *The Bomb-Shell* should the judges make the correct decision. If not, well no one will ever know that a man could bake a better cake than a woman.

WAACS have claimed another from the EOP family in the person of Jane Finney, Ordnance Auditing Department, shown here. Miss Finney has taken the oath and expects a call to service momentarily.

A Hunting We Will Go!

TIME: 3:00 A. M.
DATE: Sunday, November 8.
PLACE: Lacon, Illinois.

HUNTERS: **Lt. M. G. Brandon,** Ordnance Department, Chief, Stores & Transportation. **Robert I. Irwin,** Government inspector, Groups 64-66. **Captain J. S. Gates,** Kankakee Ordnance Works. **Paul H. Embick,** EOP Safety Department.

Four hunters lay on the banks of the Illinois awaiting the break of dawn. They are anxious to obtain their quota of wild ducks, *so, oh so plentiful,* this season. Dawn approaches; noon; afternoon; the day is practically gone and not a duck has made its appearance. **Robert** becomes rather impatient, he had been boasting of his hunting ability and agreed to bring back his limit so that a certain group could partake of a duck dinner. He inquired of Paul if he knew of a butcher shop enroute home, but **Lt. Brandon** discouraged the plan, saying he was a Montanian and would solve the problem by capturing, dead or alive, the first fowl, regardless of species, that made its appearance. Dusk would soon be upon them and the weary hunters had given up hope when **Lieutenant Brandon** faintly whispered "Hush boys, I have sighted my quarry." Stillness prevailed and two shots rang out in rapid succession. He rushed over to the river only to find a lot of wooden fragments floating about. Yes, you have guessed it, he shot the decoys. His only remark was "And I needed a new feather pillow so badly, how can I make use of these splinters?" He persuaded the boys not to disclose his error, but news does get around, especially since there were several in the party.

Carl Anker took a big rock down to Little Rock the weekend of November 7. In the future all the little Ankers will be singing "way down in Arkansas, that's where my good papa met my good mama, and etc."

Pvt. Leo "Wiggles" Waldvogel, former inspector in Group 1, is stationed with the Marine Corps at Hawthorne, Nev. He is the son of **Max Waldvogel,** Accounting Department.

Group 5

Inspectors seen at the Hallowe'en Dance included **Eddie Kluza,** charming the Army widows, and **Theresa Bolck** dancing with an ardent admirer.

Ivy Wellman, equestrienne, is back on the job after a slight accident while riding a horse. She is more determined than ever to own a certain horse.

Mr. Kluza was accompanied to the dance by his friend, **Cy Potempa,** a professor of N-economics from Chicago, who made quite a splash with the female employees of the War Department.

Bernice Ksiazak can now come out of hibernation. She finally got her fur coat out of hock, or perhaps it was *storage.*

A second advanced class for Government girls has started with **Naomi Apgar** and **Bethel Snevely** the lucky students.

Group 5 is proud of **Phil Horwitz,** but will miss him when he's gone. He qualified for the electronics course given by the Army Signal Corps.

Helen Skumanich and **Helen Zivic** send their thanks to all the Government personnel of the Fuze and Booster Area for the co-operation given them on their recent tour.

If all doors were made of glass, business would be excellent, as **Elinor Gudath** is very adept at slamming doors carelessly.

Group 6

Inspectors here regret that **Julia Turk** had to give up her work because of ill health.

Edna Guernsey has resigned from her position and will soon become a member of the WAAC's.

Catherine Fitzmaurice and **Mildred Schmitz** have been transferred to the loading lines.

Group 6 was happy to welcome **Margaret Carter** back from her month's tour of the other Fuze and Booster groups.

The birthday of **Bernice Unwin** was celebrated with a pot-luck luncheon.

Jerome S. Foster has returned after several weeks of work at Group 45.

The girls in Group 8 are becoming aware of a poet in their midst. The poetry **Josephine Podobnik** has been displaying is quite interesting.

Park Paxton, Group 8, has recently returned from an enjoyable trip to New York.

George Huster, former Government inspector, Group 27, was honor man of his company at Great Lakes Naval Training Station and was selected to attend one of the Navy's service schools.

Chemical Laboratory

There have been many changes in the Fuze and Booster Chemical Laboratory, due to **Howard Johnson's** enlistment in Electronics Division of the Army Signal Corps, and **Joe Ralston's** enrollment in the Navy's V-7 program.

Two women inspectors, **Lorraine Kinsley,** formerly of Group 9, and **Harriet Nadelhoffer,** formerly of Group 5, are now stationed here.

The laboratory has saved on electricity since **Marie Plankar** received an engagement ring. Her fiance is serving in the Signal Corps at Camp Battle, N. C.

Melvin "Pliny" Hurwitz will be moving back to the YMCA one of these days to get into condition for the Army.

Group 1

JACK BARRY
Correspondent

Ernest Entwistle is back on the job after being confined to his home for seven weeks in a finish battle with double pneumonia. . . . **Tom Shay** and **Mack McLean,** of the expeditors, have signed up in the reserves and will soon be going away to get their commissions and help to win the war. . . .

There are some pretty girls in Group 1 as represented by **Ruth Barr, Wanda Merritt, Betty Jensen** and **Mary Danser,** who recently gave all a treat by visiting around complete with identifying placards. . . .

Marion Zobel, nicknamed "Smiley" for a self-evident reason, has been making a clean-up around building 10 which just goes to show the advantages of higher education. . . .

In a recent extolling of Table 6 in our shipping bay the names of **Don Lambert** and **Mathew Kovach** were inadvertently omitted so here they are to take a bow. . . . **"Zipper" Zintarski** went to the Army November 1. He's a big man and ought to be able to hold up his end of the war work. . . .

Margaret Pesavento left for a position in Chicago and will be missed here.

Buck Jones scored another victory. He was in a race with his buddy, **Clarence Turner,** to see which one would be a proud father first. Buck won as his fine son, **Duane,** arrived on the scene first. . . . **Timothy O'Donnell** and **Scotty Stephens** have left the carpenter force for Army duties. The boys had a party for them and started them off with money to spend and a watch to tell the time.

Some of the lads and lassies in the group tried the bowling alleys and all agree that they are pretty slick. . . . Your correspondent is *going all out for the girls in this* issue. You take **Rose Kellner,** beautiful ballistics girl, and the correspondent will take **Bernice Skriner,** assistant to the foreman in Building 10, or **Julia Jensen,** her swing girl. It is hoped they are single as complications must be avoided. . . .

Well the Veteran's Armistice party was a grand success, judging from the lasting effects and repercussions which still hang over the field of battle. A big crowd was there and all agreed that it was a lalapalooza. Much credit is due to **Clarence Beck, Pop Kent, Jim Barrowman, John Kinsella, Herman Beringer** and **Walt Wilcox** who worked so hard to put it over.

In the Fall a young man's fancy . . . **Joe Nicoletti,** young and debonair Government inspector, proved that it's not the season, but the reason. He's got himself engaged to charming **Josephine Musengo** of Chicago. . . . And a man doesn't have to be extremely young either. **Joe Farrell,** Beau Brummel maintenance man, has ideas along similar lines, it seems as though. What with five-pound boxes of candy, flowers, ice cream, and proposed movies, he has the popular girls all atwitter. . . .

Johnny Loughran, big munitions man, has finally made up his mind. After many years of courtship he has married the lady of his heart, **Grace Werner** of Joliet. All his friends wish the happy couple many years of prosperity. . . .

Edna Cairns has married a man from Group 3. . . . **Rita Fang** had a party. The girls in building 14 decided that she should be called "Miss Victory" and so they threw a party and presented her with a gold compact, so inscribed. . . .

Jimmie McNulty, bay foreman, has dubbed pretty **Frances Nichols** "curly locks" and the name is well-applied. . . . On Hallowe'en night while the girls in building 14 were enjoying their lunch, a poor harmless mouse entered the room and took charge of the situation. The girls were all up in the air on tables and what-nots and there they would be to this day if an intrepid "feller" had not come upon the scene (lucky fellow) and subdued the bloodthirsty mouse.

Personnel

DARA PREW
Correspondent

Margaret "Dolly" Lundquist's fiance, **Al Streitzel,** was home from Fort Lewis, Tacoma, Wash., on his first furlough since he entered the armed forces in June, 1941, so she took the rest of the week off to help him celebrate.

"Isn't he the cutest thing? Just look at how sweet he is. Wonder what his name is. Peter? Now, isn't that just the right name for him? But you say his girl friend is waiting for him at home. Just like all the men."

In the midst of these exclamations stood **St. Clair Smith,** proudly beaming as everyone admired his peppy little wire haired terrier that he brought into the Personnel Building when he came visiting.

Well-behaved Peter investigated the vicinity thoroughly and accepted all the attention enthusiastically. As he skittered about he looked as if he were a stuffed puppy suddenly granted life.

All the way from Camp Rucker, Ala., comes word from **George Harrop** wishing all his friends at EOP the best of luck. Hobnobbing with **George** was **Charles Hansen,** formerly of group 3-A, proudly sporting his former service stripes and his bride of three weeks who has moved near the camp.

You could almost feel **Rose LeBeau's** disappointment. For years she'd been hearing about cider, both sweet and hard, and for some reason had never tasted any. When she discovered that cider was going to be served at a party which she was to attend, she could hardly wait for refreshments. The next day, everyone was anxious to know if she had liked the new beverage, "Aw, it tasted just like plain, old, every-day apple juice," was her disgusted rejoinder.

It has always been the opinion that **Marge "Stormy" Bittles** wasn't afraid of anything or anybody. However, when **Stephen McGann** rendered "LaPaloma" in Spanish with that dreamy look in his eyes, she just ran out of her office. Mr. McGann looked like somebody's birthday present with the fancy pink bow on his coat tail the other day. Could it have been an election bet?

Jane Schnepper had new shoes on (at least they were new to her) and **Eula Weaver** was sitting twiddling her toes in unaccustomed freedom. Rumor was running neck and neck as to whether it was a bet, but verified facts proved that Jane just couldn't take the wear and tear on her feet any longer so she made an exchange with someone who didn't have to walk around so much. Everyone was well satisfied with the arrangements.

Rita "Rusty" Cushing, the little red-haired messenger with the sunshine disposition, was asking everyone she met if they had a penny. Being the day before pay day, people thought that she must be badly in need of money and felt sorry for her. Finally someone offered to lend her some money until the next day if she really needed it.

"Oh, I have plenty of money but no change," she remarked. "My legs ache so much from running up and down the hall that I thought it would help if I could buy some gum. Everybody asked me if I thought they were millionaires when I asked for change for a dollar on a Wednesday so I changed my plea to a single penny and I can't collect even that."

The joke of the week (should it be said it isn't punny?) came from **Floyd Schauland.** Driving home a little late from work one night, the girls in the back seat began to work a crossword puzzle. Of course, it takes an almost superhuman will power to resist asking what is a three-letter word beginning with "a" meaning . . . etc. Well, the riders didn't even attempt this feat and soon queries were filling the air. One particular word was returned to again and again. It was supposed to be a synonym for wash basin and right in the middle of the space was a "Z." Everyone racked what passed for brains at that time of day and finally Mr. S. relaxed with the final effort, "Must be crude zinc."

Miss Weaver, Leona Hagen and **Helen DeLach** think that they have reached the peak of their careers as hitch-hikers back from the Olympic Cafeteria. It was a grader who came to their rescue and the girls had a "whooping" good ride.

Casualty of the week was an olive pit. On this **Carmen Oldani** broke out a front tooth. Warning to all olives, "stay away from Personnel." Carmen has fully recovered now with the aid of the dentist, so you can all relax.

Instead of "Gabriel, blow your horn" it's going to be **"Helen,** blow your horn," in the Personnel Building if **Helen Bardi** doesn't approach corners a trifle more carefully. The other day she almost knocked one of her fellow-workers down when she came rushing out of the Reference Department. In order that **"Miss Bardi"** wouldn't feel so tall when she stood and talked to him, jolly, rolly polly, comedian of the Reference Room, **Francis Peck,** climbed onto a chair and stood there looking down on her from the heights. While he was in Aurora for a few days recently, girls missed him, or his cigars.

One of the applicants kept the whole waiting room amused the other day by imitating dogs and pigs, etc. For a little while he put on quite a show. There's always something different in the Personnel Building. There was the man who was having his eyes examined. **Dr. Madura** said, "Put your hand over your left eye and read the chart." As soon as he saw that order followed, the doctor aimlessly said without looking up, "Now the left"; then, "Now Both." He almost jumped when the man exclaimed, "I can't see a thing." *He had covered both eyes.*

L. D. Ross, head of Personnel's photographic and finger print departments, has returned from a vacation and will jump into the job of making pictures for *The Bomb-Shell.*

Timekeeping

NICHOLAS BELLUSO
Correspondent

Homer Smalt, the fellow who is always suffering from a "code" in the head, celebrated his birthday recently in a manner that left him a bit befuddled. He had no sooner arrived at the office on this memorial day, than he was instantly grabbed by several of the stronger fellows and was given a sound paddling. Then "Happy Birthday" was sung to him by those present. Events calmed down for a few hours after that, but soon started again. Homer was called before **John O'Connell** and the rest of the office crew. Mr. O'Connell honored his birthday and then **Milton Treitel** in behalf of the Time Department presented Homer with a large box. Upon unwrapping, a smaller box was found within and finally he came to the gift. It was a dog license with a short note attached which read that Homer, being in the dog house so long, should be properly decorated to fit his position. Homer took it all in good spirits like the good fellow he is, but when his phone rang all afternoon and each call was some hoarse voice singing "Happy Birthday," it almost got him down. Homer celebrated his 32nd birthday and, incidentally, his second year with EOP.

Elmer Dames was in the dog house for several days when **T. V. Brennan,** as part of a conversation, asked Elmer how his poker game came out the previous Friday night. Seemed that the question was asked in front of Elmer's girl friend, with whom Elmer had broken a date for the same night.

Mike Bolero would like to hear from some of the fellows he used to work with. He is stationed at Jefferson Barracks, Missouri, and details of his address may be obtained by calling Line 2189. Drop him a line.

Harry Knarr is sporting a college crew haircut. Seems Harry got tired of pulling his hair out and is now chewing his finger nails. If he bites one off he won't be able to disburse any more wrong checks.

Rosemary Veach celebrated her birthday November 11. She is pretty and definitely 19.

Angeline Gunnerson likes the candy at the Cafeteria. Ask her about it some time. She really tells people off, since she took a few lessons from Mr. Knarr and **Robert McEvoy.**

Mr. Treitel and **Barney McShane,** the gold dust twins, had Mr. Smalt's goat recently when they got in an argument about

PRIDE of Clyde Baker, electrician, is his 3-year-old son, Kenneth, shown here with pipe in mouth.

Homer's home raised chicken eggs. Seems Homer was getting more for his eggs than the grocers and they were kidding him about it. The argument went on all day.

Mrs. Bessie East received a gift from her son, **Bob.** It was his wings insignia that Bob received in commemoration for his two years in the Army Air Force.

Mary Keene is taking a leave of absence to join her husband in Texas. It is hoped she doesn't pull a **Judy Smith** and forget to come back.

Bernie Smego has been so dressed up lately, despite the mud and rain, that it is suspected the girls in Group 1 have something to do with it.

Eugene Schuck has two fine hobbies. He likes to write poetry and also delves in archeology.

Three former Government girls have joined the Time Department. They are **Shirley Cairns, Geraldine Parthun** and **Louise Ardolino.**

Salvage

ANDY VAIL
Correspondent

This department thanks all the groups and each individual for their contributions to the scrap drive. You are urged to keep on sending the scrap so that Uncle Sam can continue to carry the *scrap* in the form of ships, tanks and guns to the enemy.

Joe Smerker wonders why he can't sleep as soundly at night as he does when it is time to get up.

Donald Foutch, who had a new arrival in his family, found that the stork is the bird with the big bill.

Henry O'Reilly says what he would like to see in regard to fall styles for men, would be some change in the pockets.

Presley Hankins has moved from the farm to Joliet where he can get pork chops for breakfast, as he claims he was tired of fried chicken.

Swen Swendahl remarked that if he were running the world he would have it rain only between 2 and 5 A. M. and if anyone were out then they ought to get wet.

Scott Soper and **Bob Milus** went hunting last Tuesday. Scotty had Bob singing to scare up the birds, but it frightened him so that he was unable to shoot.

Lyle Safford is trying to locate a place in the city on account of the country being at war.

Fire

STUART MOLONEY
Correspondent

Smokie, the pet fox, made an unscheduled jaunt to Group 3, via the broken chain route, the other day. **Asst. Chief Charles Davis,** fortified with a brand new pork chop and three mice, out-foxed the fox in exactly 2 hours and 33 minutes.

Just received a flash that former firemen **Charles Crain, Len Jessen** and **Harry Crubaugh** have taken over Camp Grant, but not for the duration.

It seems that a certain **Bill Dust** has adopted the "For the Duration" slogan as his old friends have not received their cigars as the result of a recent increase. It couldn't be that he is taking his new Fire Guard job too seriously.

Harry Swartz is always smiling lately, but who wouldn't with such beautiful biters.

The boys at Station 2 are finally convinced that clothes do make the man after seeing **Willard Essington** in his fire guard uniform.

The 3:30—11:30 shift has a new addition to the crew, better known as the Gold Dust Twins, **John Meyer** and **Alvin Rediger.**

"Congrats" are due the **Robert Connelly clan.** The new one's name is **Judy Ann.**

Mr. and Mrs. Roy Wright are the proud parents of a new boss in the House of Wright.

The Department extends its sincerest sympathy to **Lowell Horath** and family in the recent death of his little niece.

Fireman Meyer Horowitz is spending the next few weeks in the Edward Hines Hospital.

Lt. Glynn Seale, of the fire inspectors, has joined the Marines. **Fireman Wiley Bell** has clicked with the Army and **Fireman Robert Schreffler** left for the U. S. Merchant Marine. With guys like these going in, it's a cinch that there is bound to be some more good news from the fighting forces.

The boys at Station 2 are soon sending their sixth member to the colors. The latest to leave is **Jerry Hanlon,** who started with the department just 20 months ago, along with **Chief Roy Mortenson** and **Asst. Chiefs Walter Lueder, William Reichert** and **Clifford Weiss.** These men have watched the Department grow into the second largest in the State in this comparatively short period of time.

A farewell dinner was tendered **Jerry.** It was a sumptuous repast including cakes and gold-wrapped cigars. The guests were **Ira Shick, Ralph Rausch, Dave Forcell, Carl Richards, Dick Jensen, Lafe Martin, Mike Ryan, Harry Swartz, Walter Hilgert** and **Stu Moloney.** Mr. Weiss was invited but found he could not attend, due to the pressure of unfinished business.

One slightly used Hydrant Wrench goes to the party who can solve the mystery of **George Rogina's** damaged ear.

The world is waiting for the sunrise and the Fire Department still waits for **"Scotty" Rodgers'** debut with his kilts and bagpipe.

It's a darn good thing that **Charlie Kammerman, Dick Pearson, Jimmie Dickson, Art Flahaven, Ralph Johnson, Ogle Garrett, Harold Guderjan** and many of the other lads do not have names that the poisonous poet can put into rhyme in his special bulletin, but many of the boys who have been missed will see their names in print before long.

Inspection

LORRAYNE OSTREM
Correspondent

The inventive genius of **Ed Jilek** is really being put to test. **Clem Birch** writes from Fort Lewis, Washington, requesting a *gadget* to replace hiking and drilling!

John Merrick said his red nose was from a sun lamp—then it was learned he receives his mail at the Joliet Eagles Club Tap Room. Tap Room tan!

Bob Mobus got a pheasant in the first half-hour of shooting.

Harry Miles, now a "Seabee"—Camp Bradford, Norfolk, Va.—writes that the Norfolk girls are really *honeys.* (Ed. note:—bees + honey = bum joke.)

Syl Stearns is learning the pleasures of auto ownership. He bought a car one afternoon and the radiator froze that night. What, with flat tires, no gas, and the finance company—the Army looks better every day.

Art "Gordo" Ricketts must have lost the formula for his majic hair restorer. Haven't heard a word about it in weeks—and Art still keeps his hat on.

Bertha Koehler left for Texas to join her husband, who is in the Army.

A speedy recovery is wished for **Frank Curran,** who was injured in an automobile accident.

The inspectors wish luck and happiness to **Nellie Barnett,** forelady in Group 7, who is moving to Arizona.

Doris Callaway, Group 4, is very busy lately with her new duties, now that she has her pilot's license. She is also very proud to be a member of the Civil Air Patrol.

Inspectors in Group 8 said their goodbyes to their associates, **Vivian Kimberlin, Betty Roge** and **Fern Davis.** Betty's going to California to see what the West Coast looks like. Fern is moving to Chicago and Vivian back to Indiana after hubby gets his silver wings. California, Indiana and Illinois, here they come, and best wishes go with them.

Betty Novatney, Group 8, said "I do" and became the bride of **Lt. Herman Dachring** at St. Paul's Lutheran Church in Streator, Ill., October 24.

It seems as though **Elvera Barney** has a bet that she won't be married in the next year. Some say that 5-spot could be stopping her.

Group 6 acquired some new inspectors this week from Groups 4 and 5. They are **Wilma Smith, Evelyn Strunk, Evelyn Gallaway, Olga Zema** and **Ann Gifford.**

Norma Castle, Group 8, represented her group in the "Miss Victory" contest at the Hallowe'en Dance in the Recreation Building October 31.

Mr. and Mrs. William Cusick of Joliet celebrated their 25th anniversary. Mr. Cusick is employed in Group 8.

What, again? **Mrs. Harold Johnson** just couldn't wait any longer to see her husband. She left November 1 after receiving a telegram.

Group 6 inspectors express their deepest sympathy to **Ethel Partridge,** who was called home to Oregon by the sudden death of her father.

The former **Gladys Allie,** Group 6, has returned from a week's vacation in Little Rock, Ark. While there she was married, October 31, to **Pvt. William Patchett.**

COMING EVENTS cast their shadows before and this scene photographed at the Main Entrance to the Administration Area shows what winter may have in store for EOP this year.

JOE MOTTA
Correspondent

The associates welcome **Edward S. Goble, Charles K. Wagoner** and **George Steinke** into the organization and wish them every success.

Two EOP employees were united in marriage October 31 when **Delores Peterson**, nurse at the Hospital, became the bride of **Richard McCollem**, explosives operator here. One week of matrimony and Dick forgot his badge, and most think that only single fellows are guilty of such.

Cecil Abbott was married recently.

The Avery Emersons are receiving congratulations on the birth of a son and heir to the Emerson fortunes. The event occurred November 5 and, at press time, no name had been chosen.

In her column recently, **Geraldine M. Ward** related that **Joe Motta** was bruised in the rush to see the new mail girl, **Betty Ross**, when she made her first Group 61 delivery. For Miss Ward's information, Joe had another misfortune, not a bruise, just a plain old "tummy" ache. It couldn't possibly have been caused by the cookies his mother made from Miss Ward's recipe in **Catherine Noonan's** column, "Women."

All indications point toward **Don Morsch** and **George Diment** being accepted for active military service.

Someone else gained when Group 61 lost **Mike Enich, Bill Bixby** and **Julian Oliskifski**, Government inspectors, by transfer.

John Williams journeyed to his home town in Southern Illinois to spend a few days with old acquaintances.

At the Hallowe'en dance, **Harold Rouff** approached pretty **Wanda Merrit**, candidate for the title of Miss Victory, and asked her for the next dance. Her answer was "sorry but I am here with a *gentleman*."

Companions wish **Nick Pagoria** good luck, since enlisting in the Army Signal Corps.

Pvt. James Halpin wrote and said he had a hundred and one things for dinner—beans.

News flash from **Commentator Bill Brown** Sunday, November 1, "there is a dense fog between Carbon Hill and EOP." Could that be why **Al Pope** didn't show up for duty?

It would be nice if . . . **Melvin Moore** and **George Kushner** catch something other than a cold on their hunting trip . . . when going out on a pleasure jaunt, **Larry Holz** didn't meet too many relatives . . . someone knew of a way to prevent **Leonard Williams** and **Clarence Scott** from arguing . . . in a hurry, **William Johnston** would get well . . . everyone chipped in to buy **Walter Boughton** a new shirt . . . all interested knew that **Ray Ruffner** brags, then when in Harvey, Ill., he is meek as a lamb . . . **James Adams** had fewer flat tires . . . more knew about **Bob Plese's** new fool-proof system but never wins in football pools . . . **Junior Albright** rode his motorcycle again . . . the real reason were known why **Hans Koenning** had a good time at the last dance . . . you saw at the Hallowe'en dance, **Ed Rashid** dancing with a dark haired girl; **P. L. Deylitz** sitting with **Mrs. Deylitz** enjoying the music; **James Glade** dancing with **Mrs. Glade**, who was wearing a pretty white dress; **Mr. and Mrs. Norman Johnston**, who seemed to be doing all right, and **James Decker** and **Ray Carlson** coming in late . . . **Harry Norman** could learn to speak the same language as his maid—they would get along better . . . you knew that **Robert Briese** was rejected.

High Explosives

Having heard nothing from the Igloo boys, I've come to the conclusion that they've taken to hibernating. So, I'll not disturb them 'till the next edition. — Correspondent.

Laboratory

It's a battle for survival at the laboratory these days and the question is, who'll survive, mouse or man. So far it's a losing fight for the little grey rodents, who, with the coming on of winter, determined to take up warmer quarters and migrated from the fields to the lab. But unless the supply is unlimited, the lab will soon be mouse-free for 16 in the past three days have met death in traps set by Janitor **Abraham Agamy**. No one is suffering more from the mouse invasion than Secretary **Vern Holder**, who screams at the sight of one, dead or alive—and that means several good, healthy shrieks a day. It's a good thing it was not Vern who became ill one afternoon, lay down on a couple of crates in the basement and had his ear nibbled by a particularly bold mousie.

The lab isn't quite the same without the southern drawl of **Jess Kinser** who, after working in the laboratory several months, has returned to her home in the Old South—in Memphis, to be exact. At the lab Mrs. Kinser answered to "Scarlet O'Kinser," a name concocted by the facile mind of **Inspector Ellis Steinberg.**

The **Ford Teeters** have moved from Raynor Avenue to Illinois Street and they're happy about the change.

Nelson Tippett is a fine boy. This week he nearly doubled his weekly deduction for War Bonds—and he was already having 10 per cent allotted from his salary.

Flash!

Just received—**Antone Yedlicka** and **Cecil Morey** were War Bond winners in Group 68.

Play Committee Invites All to Join Program

All Workers Have Voice in Plans as Desires Are Sought

By C. O. Finnegan, Chairman Employees Activities Committee

All employees of EOP are invited to participate in the expanding recreation program under the guidance of the Employees Activities Committee and the direction of E. L. Walkup.

The purpose of the committee is to determine the program desired by a sufficient number of EOP employees to make the activity a part of the recreational program.

Men and women of each group are represented on the committee by one of their co-workers, whose duty it is to learn the interests and hobbies of the workers in their respective groups and report to the committee as to the number interested in any particular activity.

It is hoped that all employees will help the Activities Committee make it possible for everyone to play and take part in a well rounded activities program. You'll do your daily job better if you take time to play.

Members of the committee are **George Barford** and **Dara Prew**, Personnel; **Jack Barry** and **Beverly Garing**, Group 1; **Wilbur Galbraith**, Group 2; **Norbert McLuckie**, Group 3; **Colby Eriksen** and **J. E. Hendershott**, Group 3-A; **Rita O'Connor**, Group 5; **Art Jensen** and **Ruth Starkman**, Groups 6 and 7; **W. V. Birtwistle** and **Dorothy Lehman**, Group 8; **Dorothy Murphy** and **James J. Neely**, Group 9; **James Murphy** and **Arlene Schloendorf**, Group 60; **Harvey Steffes**, Group 61; **Sgt. H. E. Dowden**, Guards; **Lucia Jane Pearson**, Women Guards; **C. O. Finnegan**, Engineers; **Charles Harris**, Bus Drivers; **Helen Shimek, E. G. McAloon** and **Walter H. White**, Utilities; **Mary Jane Clennon** and **Robert C. Wilhelmi**, Inspection; **Loris Hart**, Fire Guards; **Keith Gail**, Paint Shop, and **Frank J. Wehrli**, High Explosives. Others will be added as they are selected by their groups.

READER of The Bomb-Shell during his spare moments at Camp Chaffee, Arkansas, is Pvt. Charles L. Wolcott, a former EOP guard, shown here when he was stationed at Boyce, La.

Fellowship Meeting Deferred to Dec. 3

A. E. Frosch and **E. A. Evans**, co-chairmen of the Employees' Fellowship meetings, announced that the sixth session will be deferred to December 3 because Thanksgiving Day falls on the regular date. Dinner will be served at the Mess Hall at 6 o'clock followed by a program of entertainment in the Recreation Building.

The committee in charge of the next meeting consists of **H. D. Dougherty**, chairman; **E. J. Egan**, assistant chairman; **H. E. Barclay**, steward; **J. H. Lower, R. W. Mortenson, H. O. Cadwell, J. W. Stark, A. J. MacLellan** and **E. L. Walkup.** Those desiring to attend should call Mr. Barclay by 12 o'clock noon, December 2, over Line 2116.

Groups 4-9

Fuze-Booster-Primer and Detonator Lines

JUANITA HARTER
Correspondent

Best wishes go to **Shirley Hommes** who became **Mrs. Joe Grady** November 7 at Elmhurst, Ill.

Edna Guernsey, Government inspector, and **Judith Wilkinson**, of 7-6, have been accepted for officer's training in the WAACS and WAVES respectively.

Monelle "Tennessee" McLemara was married November 7.

Leo "Miami" Rintelmaun and **L. E. "Parson" Tilton** have gravely conferred the title of "Major Hoople" upon **Tom Harris.**

Group 5

Betty Price and **Ruth Taylor** are welcomed back to 5-5 after their recent illnesses.

Zezella "Tiny" Silveius was the life of the Springfield Board of Education convention.

Mice are an old story to the primer room, but when a snake makes an appearance it's news. **Eddie Kluza** refereed the battle, **Pat Hickey** screamed, **Betty Hengl** and **Lucille Garner** killed it.

Wedding bells will ring for **Mildred Wilkey** December 6. The lucky man will be **Ed Girot**, of Braidwood.

Bessie Lough will join her husband, **Pvt. Archie Lough**, in Lincoln, Neb. Bessie also has three brothers in the armed forces.

The "gang" in the shipping room had a birthday party—big cake and everything—for **Annie Marie Klein, Mary Merillat, Dorothy Formenti** and **Otis Stapp.**

Group 5 does miss its songstress, **Pearl Whittemore**, who is away on a leave of absence.

The joy has gone out of **Joy Mann** because Uncle Sam has called her **"Rich."**

Rita Rossetto was pleasantly surprised when **Len**, her sailor boy friend, came home on furlough from his convoy duty.

Tillie Watson is driving a truck now, and capably too.

Group 4

Catherine Kemp and **Frances Olroyd** *insist* that **Winifred Prickett** has turned his jumble and bolt machines to "Dad's Old Fashioned Root Beer!"

Harry "Two Ton" Amyx has a new nickname—"Blockbuster."

Larry "Bashful" Nelson, and his brother, **Len "Bull" Nelson**, report that **Marion Dilliard** had t'fight so many guys over his first name that he scrapped his way right into the Golden Gloves.

Group 8

Veronica Roemer became the bride of **Darrell Taylor** October 31 at St. Patrick's church in Joliet. Darrell is awaiting a call for active duty in the Navy.

Marjorie Sperling is leaving in a few weeks to join her Army husband, who is stationed in Texas.

From all indications, **Al Mondrella** will be thumbing a ride to work from now on.

Frank Zupancic, Group 8 chief timekeeper, has finally taken the great step, and is now happily married.

Mike Molar promised birds for everybody, but, since opening day, he has been getting the "bird" from everybody.

Group 9

Now that it is time for all good men to go hunting, the men of Group 9 are really going in after it tooth and nail. Duck hunters in Illinois River Valley were surprised one Sunday when what looked like a full sized battle ship, with all the guns manned, came floating downstream. Their fears were soon overcome, when it became visible and turned out only to be a large Towboat manned by **William Whaley, Glenn Allen, Del Millican** and **Clarence Wilkins.**

Ed Nemanich is adding to his collection of pigeoos, and, believe it or not, they come right up to his desk in 9-12B and beg to be taken to a good home.

LeRoy LaCost, better known as "Smokey," couldn't see very well Tuesday morning, because he certainly did not see that ditch.

Some of the Lead Azide gang are going around with long faces because **Keith Smith** is Army bound.

Congratulations go to **Leonard "Dutch" Larson** and his wife, **Eleanor**, on that 10 pound 4 ounce son, named **Louis Richard.** Best wishes go to **Violet Maxwell** who is to be married November 21.

Helen Wissert is visiting her husband in Tampa, Fla., where he is in the armed forces.

Lucille Kulkissen has returned to work after being away for six weeks with a broken arm.

Sergeant Leonard Rabideau was home visiting his mother, **Agnes Dora Rabideau**, on a 15-day furlough. He is stationed in Seattle, Wash.

Wedding bells rang last Sunday for Foreman **Bob Hartman.**

Group 3-A

F. G. TAMBLYN
Correspondent

"Always ahead of time, that's us girls," says **Frances Biros.** Already the main topic of conversation at lunch time is Christmas—doings for the girls and boxes for boys in service.

Robert McEvoy, known as the "Lunch Box Parasite" in 3-A, says bread crumbs, orange peels and so forth will be greatly appreciated.

Birthday cake was enjoyed by the girls at lunch the other day when **Victoria Scuteri** celebrated her 20th birthday.

Irving Slutsky straightens his tie quite often as he goes down the line. It shows what women will do to a man.

A certain male clerk has made a disparaging remark about the change house since the girls took over. The natural resentment of the gals is over-shadowed by their curiosity as to how he comes to know anything about the inside of 20-A nowadays. Perhaps **Roland Oertel** can furnish a clue.

Group 3-A has lost to the services the following men since the last issue of *The Bomb-Shell:* **Francis Marshall, Paul Timm, Robert Helmick, Merville Helle, John Christensen, Kenneth Rubin, Henry Burrers, John Dion** and **Donald Breen.**

Margaret Scardina and **Jennie Hoffman**, matrons at 20-A, have been getting some valuable experience in shoe-fitting. The girls in 3-A are now safely shod and finding their new shoes very comfortable, but **Anna Jancuska** says they are too heavy to let her do the Conga.

After **Supt. John J. Fitzpatrick** gave a little talk to the girls on the purchase of war bonds, they rushed **Gerald "Whitey" Hall** for applications 100 per cent like women rush a clerk at a bargain counter, shouting "Praise the Lord and pass the applications!"

You've heard of going off the gold standard. **Arthur Cleary** has now gone off the *ivory* standard. Since he has had all of his teeth extracted, he won't be able to eat peanuts for a couple of months.

George Costello has become so adept with a lasso that he was able to bring in a ring-necked pheasant as proof of his skill.

Group 3-A girls pictured cooling powder in the last issue of *The Bomb-Shell* were **Hattie Biggerstaff** and **Alma Eklund.**

Addresses of Service Men Are Available

Employees and members of their families who desire the present address of any former EOP employee now in the armed forces may obtain it by telephoning the office of *The Bomb-Shell*, Line 4206. Space does not permit the publication of these addresses in the tabloid, but an up-to-date file is maintained and it is available to any employee.

Group 2

EDWARD KEENAN

WILBUR GALBRAITH
Correspondents

The latest theme song at this group is "A hunting we will go, a hunting we will go, hi ho the merry oh, a hunting we will go." **John Johnson, Jr.,** and **Jersey Klegman,** who are now enjoying a few belated vacation days, report the hunting is very good.

Fred Mogle and **Winston Wascher** are doing a fine job in enrolling all new men in the pay-roll savings plan for War Bonds. Group 2 proudly reports it is 100 per cent.

"Praise the Lord and Pass the Ammunition" will be the theme song of **Sgt. Albert Frankovich,** former corporal in this group, who is leaving for the Army some time in November.

Congratulations are extended to Timekeeper **Bob Bright** who recently joined the Married Men's Club. The cigars tasted swell.

Congratulations are also in order for **Corp. Leo Kiegher** and **Earl Jarvis,** stationed here, who were promoted to the corporal rank recently.

Possibly the reason **Bill Malone** bought a horse is because the "Green Hornet" has been sold and, with the tire and gas rationing now in effect, the most available form of transportation is either a bicycle or horse and Bill decided on the latter.

George Zobel expects to become one of Uncle Sam's boys soon, so he's taking a last fling at some of the brighter spots. The same goes for **Robert McGuire** who is known as the "King" of the night spots. Bob denies it and he's probably right.

Ray Murray's wife must be packing enough lunch for him these days. If you think she isn't, just observe the lunch he brings to work daily.

Many of the fellows are asking why **Chuck Pierce** and **Sam Hoffman** are such inseparable buddies. You see, these two pals agree on most everything except football rules and close decisions that come up during a pass and touch football game. A rule book would help settle some of these close ones.

Belatedly, but no less sincerely, congratulations are extended to **Sgts. Emmett Bantner** and **Frank Harrelson** on their recent promotions to the sergeant rank. Both were formerly corporals here.

Some one said that Vince Fogarty shot at four wooden duck decoys on a recent hunting trip and some of the boys are thinking that a collection for a pair of extra good glasses might be in order.

Now that there is a bicycle here some of the boys are wondering whether or not **Bill Galbraith** and his cohorts will break the speed law of 15 miles an hour riding from **Supt. James J. Murphy's** office to Building 12. Or, 'tis further wondered, will they have enough endurance to last the distance?

Cy Thompson, who is an ardent supporter of the gas rationing program, has a new nickname "Barney Oldfield." Just ask Cy how he got the name.

They call the three men loading cars on the day shift in Building 12, "the three fibbers." **Ferris Bales** and **Bill Van Asdlen** are tied for first place, with **Bill Rogers** a close second.

Ode Golden, inspector, is still moaning the fact that he faces three more weeks of night shift work.

Much comment has been heard about **John Kelahan's** ability to walk the line many times a shift and it has been suggested that John should enter a Walkathon now in progress in Chicago.

It is rumored that **John "Pete" Fleming** got into a little argument with **Tim Thompson** from the Lock Shop. Pete isn't saying a word, but he is wearing glasses.

Mr. Mogel is disappointed. When the new bike arrived he wanted to be the first to ride it. Well he wasn't first, but came a close second. **Gene Hunt** got out of the house before breakfast and to work before Fred arrived.

Bill Stanley will be leaving for the Army shortly after this issue goes to press.

Fred Hansen says that trying to make *The Bomb-Shell* is the same as trying to make the *Wake of the News*. Fred did tell about **Whitey Butler** driving home from work. He heard a train approaching, so stopped (right in the middle of the tracks) to see from which way the train was coming.

Bob Reid reports that he is ready to start collecting all bets made and won by him. It seems as though the boys would bet Bob a steak, knowing that Bob couldn't eat it. Now he has his new choppers.

Guards

GENE RYAN
Correspondent

Chief M. C. Baughman recently had to endure the old saying "Grin and bear it." It seems, he went bowling in the Recreation Building and during the course of the evening submitted to a rubbing treatment rendered by a couple of fictitious rubbing doctors. (The alleged doctors, **P. L. Deylitz** and **J. W. Stark,** are now under surveillance by state authorities for operating without a license.) It is reported that **George Halas** of the Chicago Bears is scouting these Tuesday bowling engagements for possible football material after hearing the following casualties. Mr. Deylitz—injuries unknown. Chief Baughman—injuries (assumed)—broken hip and pair of glasses broken ($10 claim) and possible internal injuries. Mr. Stark—injuries—stiff joints; other injuries not reported. **V. L. Knudsen**—injuries—broken watch and other mishaps. To add insult to injury, the chief was notified by phone the next day that he had lost the bet and the bowling match by *one pin*.

The Guards will miss two fine sergeants. **Sgt. Albert Frankovich** and **Sgt. James Connor** leave soon for the armed forces.

That man you see walking through the halls with the tape measure around his neck, is now **Sgt. H. Walters.** Other recent promotions are **Sgt. Leo Boyle,** former corporal at Group 3; **Sgt. Frank Harrelson,** former corporal at Group 2, and **Sgt. Don Hoffman,** former corporal at Fuse and Booster Area. Best wishes go to all and the men who succeeded them. **Cpls. Russell Dunham, Foster Jarvis** and **Threll Childers.**

Boyd "Bud" Sorenson, who repairs, remodels and refinishes all the guns, said they must of put those bars on the stock room windows near his work bench to remind him of those prison days. (He was a guard.)

Arnold Hahn has returned to the Guard force. Arnold was one of the original members of the force, and resigned in 1941 for a business venture. He was given a hearty welcome.

Group 2

A "short change party" was given in honor of Sergeant Harrelson and Corporal Jarvis, who were recently promoted, at Wilmington November 7 by **Guard John Pearce** and members of Sergeant Harrelson's former shift at Group 2. Among those present were **George Buck, Herbert Jones, Al Planing, Cecil Godbey, Glendon Lade, Elbert Lemley, Steve Rittof** and **Dewey Pohlman.** Refreshments and a friendly rummy game were enjoyed.

Mr. and Mrs. James Roberson announced the arrival of a daughter, born November 3 at St. James Hospital, Chicago Heights. She was named **Jonelle,** weighed 7 pounds and both mother and child are doing nicely.

It is reported that **Guard "Nig" Bennett** was injured by a Greyhound bus in Joliet November 7.

Groups 4 and 5

Arnold Branz has a new son.

Harold Armes had a long weekend off and went to his home town, Peoria. He reports he had a pleasant time with friends.

James Cox' riders are hoping he gets the hole in the side window of his car fixed before cold weather, although it does make a good ash tray.

Bob Lockard has returned from a pleasant vacation in Southern Illinois. Did quite a little hunting, and the meal and its price will be announced later.

Ray Wiseman, who is the father of two lovely daughters, is now the father of a bouncing son. And is he proud!

Russell Nash was on the sick list for a week.

Group 3

John Long reports after a recent scouting trip that quail are very plentiful and of good quality this season. This should be of special interest to hunters who are eager to go.

U. S. Houses at Wilmington to Be Ready Soon

Occupancy Is Seen Within Two Weeks As Work Is Rushed

Occupancy of the dwelling units of the Federal Public Housing Authority at Wilmington is expected in about two weeks, according to the present stage of progress in the installation of heating equipment.

As the result of a visit to the Federal Public Housing Authority in Washington by **R. T. Bassett,** assistant comptroller of EOP, delivery of a pump was speeded. It has been installed and pressure tests are now being made. Heating equipment has been delivered and is now being installed. Work on the roads is progressing and sidewalks of precast concrete stepping stones will be laid promptly.

Employees who are interested in renting one of the dwelling units should apply at the office of the housing manager, **E. C. Fortmann,** in Wilmington. Applications are then sent to EOP for approval and certification. Approximately 200 applications have been certified here to date.

Rentals established are $27.50 for a one bedroom unit, $31.50 for two bedrooms and $35 for three bedrooms. Charges for utilities such as electricity, water and fuel are additional. Each unit will contain a coal fired heating stove, kerosene cooking range, icebox and hot water heater.

*—One month without lost-time accidents.

Groups not appearing in this column have been eliminated because of lost-time accidents during October.

More Power to You

ANYTHING AT ALL is acceptable for the scrap drive was the verdict of the Salvage Department when a bed and springs were contributed by Supt. James J. Murphy of Group 2. Pictured here left to right are Presley Hankins, Henry O'Reilly, Swan Sandahl, Supt. Hugh Robb and Andrew Vail.

Using the old Army parlance, a "natural" has been discovered on the shift of Corp. Joseph Chavez in the very amiable person of **Bill Landers,** who qualified recently as a pistol expert, with a score of 91.7 per cent. Bill attained this remarkable score although he had *never previously fired a revolver.* This certainly speaks well for the genial pistol instructor, **Sgt. William Maskel,** may he always keep them in the "black," bulls eye to the uninitiated.

Edward Bray, Harry Bloomquist, George Smith, Asa McGuire, Prentice Antle and **George W. Day** have participated in nocturnal military tactics and are well advanced in their course of drill. These hard working World War Veterans say the new formations are much easier to learn, and far less complicated, and have been streamlined for maximum speed.

The family of **George L. Stephen,** former guard who died October 14, wishes to thank the men at the Hub, the Saunemin bus drivers and riders for their grateful remembrance and kind expression of sympathy in their time of sorrow.

With the Women

The Women Guards are feeling more and more they are a part of a great organization. Hardly a day passes without a new surprise. Last week it was bunks, eight of them, in rebuilt quarters. It gives those who started here when the department was in its infancy, a feeling of pride when it is realized how much has been gained in personnel and equipment. The one-room office has grown into a four-room suite. The women certainly appreciate the fact that they can now say "I'll call Headquarters," instead of the usual "Phone the Office."

Drilling is still a new phase, but under the careful guidance of **Capt. John Hardy** and the capable assistance of **Thresa Johnston** it is hoped to perfect the squad to 100 per cent.

Another all day class was held October 31. **Supt. E. O. Huey** talked about many problems. **Chief M. C. Baughman** answered questions. **Captain Hardy** gave a lecture on "Military Hygiene." In the afternoon **I. W. Hawes** gave another lesson on "First Aid."

Pearl Barsalou has left the Women Guards to return to her profession.

New Faces that will soon be seen at the various post include: **Marcella Bowden,** Morris; **Lola Blue,** Danville; **Lelah Warner,** Joliet; **Katherine Koncor,** Manhattan; **Sarah VanSlyke,** Joliet; **Ellen Nugent,** Joliet; **Victoria Matteson,** Morris; **Wanda Foutch,** Wilmington; **Pearl Halberg,** Danna; **Alma Trittipoe,** Joliet, and **Henrietta McBride,** Joliet.

Utilities

HELEN SHIMEK
Correspondent

The opening day of hunting season found several members of the Machine Shop holding forth in duck blinds. It is reported that **Merle Jones** caught—a cold; **Lloyd Widup** had a close shot at a cow; **Bill House** shot seven (his point is five); **Fran Rogel** brought home a bag full—of air; **John Nilson** thought someone said it was the open season on *peasants* so he took a bead on a farm hand; **Del Govoni** caught, you know what, when he got home; **Fred Rohder** downed a big one (but he quick took a chaser). Some hunters!

Frankie "Irish" Zembruski, Motor Pool, had a big disappointment when he tried to join the Marines. He wanted to take his B.B. gun along, because it doesn't kick.

Radio Communications **Barney Johnson** is passing out some fancy cigars these days inscribed, "It's a boy." He described the new baby as being "a cute little bugger." Barney is wearing a smile on his face that just won't wipe off nohow.

Martha Herity, chief operator, was greatly missed around the Telephone Building while she vacationed in New York and Canada.

'Tis reported that the Bus Drivers' Ball Saturday, November 14, was a grand success. Everybody did a little truckin' and a good time was had by all.

"Pick a Winner" Senter has good horse sense. But how about those "also rans" that are never heard about?

Another one of the boys from Bus Transportation is leaving for service and his friends are certain that **Joe Santucci** will make a good soldier.

The new telephone directory has been delayed, but it was hoped it could go to press by November 20.

Mix-up in the Motor Pool—**Del Jensen** has decided that two can't live as cheaply as one. Maybe it was a member of the armed forces who helped him decide.

Everybody at the Machine Shop knows that it was sawdust **Scotty Meyers** was wearing on the top of his head, and not a crop of golden blond hair, as he was trying to make people believe.

Richard Grendheim is now a private at Fort Lewis, Tacoma, Wash. He has given up EOP's truck division for Uncle Sam's tank division.

The Bus Drivers' bowling team is really progressing since **John Hennessy** started to bowl those 249 games.

Welcomed to the Telephone Department is **Joseph Thompson,** who is a new outside man.

W. A. Buck, wire chief, has been running around greeting streaks—not of luck, but lightning.

Another hunter in the Machine Shop? **Tom Riordan** is taking his vacation during the season, anyway.

Louis Peterson, bus dispatcher, celebrated his third wedding anniversary November 11. Even after three years, Pete says it's great to be married.

The Motor Pool's **John Moon** is practicing for gas rationing. He ran out of gas twice in one week.

There'll be no one happier when he gets his tires from the ration board than Bill House of the Machine Shop. It gets mighty monotonous changing flats.

Lyle Sweetland, right hand man to **Tom Singer** at the Paint Shop, has left EOP. The efficiency and willing co-operation behind his quiet manner will be missed.

TIMEKEEPING OFFICE takes on a more feminine appearance as men employees leave for the armed forces. Shown here left to right are Maria Darin, Emily Kexel, Mary Keene, Cele Harte, Irene Morris, Eva Sweda, Rose Mary Veach and Margaret Downs.

Sanderson & Porter Design Allatoona Dam and Power Plant in Georgia

The firm of Sanderson & Porter, since it was established some 45 years ago, has specialized in powerplants, having designed and constructed both hydro-electric and steam plants aggregating close to $100,000,000 in value.

Last January, in addition to its already enormous volume of war work, the firm undertook to design the Allatoona Dam and Power Plant for U. S. Army Engineers.

The dam will be built on the Etowah River in Georgia, just below its confluence with Allatoona Creek, from which latter stream its name is derived. The site is near Cartersville, Ga., some 30 miles northwest of Atlanta, and not far from Kenesaw Mountain, which gave General Sherman so much trouble on his famous march to the sea.

The dam as originally planned was for the purpose of controlling the floodwaters of the Etowah and its tributaries, thus protecting much valuable farm land, and a number of towns, particularly Rome, Ga., which is built only a few feet above normal high water and is frequently damaged by floods. Because of the shortage of hydro-electric power in the southeast, due to lack of rain for some years past, and the increase in the need of power for war industries, it was decided to build a powerplant in connection with the dam and use the stored floodwaters, as well as the normal flow of the river, to develop 100,000 kilowatts of electric power which would add materially to the power supply for the war effort.

Project Costs $20,000,000

The entire project, including purchase of land, clearing, relocating highways, bridges, and railroads will cost approximately $20,000,000. Of this sum, the relocation of highways and railroads is estimated at about $4,000,000, leaving about $16,000,000 as the cost of the power development.

The dam will be of concrete, about 200 feet high, and 1,325 feet in length, with curved axis, in order to take advantage of the best natural rock for the foundation. The water of the Etowah River will be raised about 160 feet, forming a lake of 20,000 acres in extent. The drainage area at the site of the dam is 1,100 square miles.

Design Nearly Completed

For water control, there will be nine radial gates, 25 feet high by 40 feet in width, and two double regulating gates of the same height and each 20 feet in width.

The power house, of structural steel and reinforced concrete, will contain three main hydraulic turbines and generators, each having a rated capacity of 36,000 kilowatts at 13,800 volts. In addition, there will be a service unit of 2,000 kilowatts. The dimensions of the power house will be 96 feet by 247 feet by 131 feet maximum height. The three main transformer banks, each of 40,000 KVA capacity, one for each generator, are designed to step up generator voltage to 154,000 volts for the outgoing transmission lines. They are the outdoor type and will be located in the switchyard between the power house and the dam.

Sanderson & Porter's Hydraulic Department has nearly completed the design of this hydro-electric development. Just when construction work will start depends upon the allocation by the War Production Board of materials.

Women

By CATHERINE NOONAN

Rush for your date book at once and make the following correction: Ladies' Day at the Recreation Building has been changed from Wednesday to Friday. **Myrna Faris**, director of women's activities, has started classes in calisthenics. There are two classes every Friday. The first class meets from 4:15 to 5:00, and then all over again from 5:30 to 6:15.

Red Longies Next?

The mail must go through. And it does with the aid of three charming feminine messengers, slacks and bicycles. The new additions to the central mail room in the Administration Building are **Betty Fedderson, Margaret Ott** and **Wilma Stevenson** who have replaced boy messengers who have business elsewhere at this time. The service is par excellence. The girls whiz through the air with the greatest of ease between the Personnel and Recreation Buildings with the Administration Building as home base. The slacks are because of the bicycles and the bicycles are for speed. With the on-coming of winter the question is whether the girls will take to red flannels or the conventional ski suits?

Sanderson & Porter

The combination of Sanderson & Porter is hard to beat all the way from making bombs to "Miss Victory" candidates. Of the 36 candidates pictured in the last issue of *The Bomb-Shell*, unwittingly grouped in the same picture were **Ruth Sanderson** and **Harriet Porter** of Group 4.

Pass the Bacon, Pappy!

Reach for a chicken leg instead of a T-bone steak. You can have bacon for breakfast and a conservative serving of meat for dinner and still stay within the bounds of voluntary meat rationing. If workers on the home front restrict themselves to 2½ pounds of meat a week, the consolation prize is knowing that our men on the fighting front are the best fed in the world, anywhere in the world. Nutritionists in the Office of Defense Health and Welfare Services in Washington have been working on balanced menus for the war workers. Here is a typical lunch which includes vegetable soup in a vacuum bottle, 2 chicken sandwiches on whole wheat or enriched bread, cabbage and green pepper salad, 2 nut cookies and a pint of milk.

Inert Storage

CHARLES MANN

WILLIAM DENVER

Correspondents

Shoes and more shoes is the issue at Inert these days. The boys have been shod with arch support numbers and safety toes . . . now their little corns and tootsies will be safe from all harm.

C. H. Mann, assistant superintendent, served on the committee for the Fellowship Meeting November 12th. Among those attending were **Supt. A. P. Balston, Jim Whitley, Calvin N. Kemper, Stanley Wiencek, Bill Denver, Frank Zupancic** and **Charles Gorham. George Newton** came through at the last minute . . . his excuses just wouldn't hold water.

Wally Fang and his squad of men are anxious to return to South Inert after spending some time at Group 27.

The boys at South report a flock of snow geese over Kemery Dam . . . also some ducks. **Del Neece** has offered him farm land as a hunters' paradise and **Mr. Wiencek** and **Mr. Newton** will try it out soon. **Mr. Whitley** reports he will spend the Thanksgiving holiday earning his spurs playing games.

'Tis reported that scrapper **Harold Johnson** did some work at Group 27.

Inert's candidate for "Miss Victory" scored a picture in the Chicago *Herald-American* . . . her name is **Betty Ross.**

Visiting at Inert was the Fire House Fox . . . the real one.

Gloom hangs over South Inert since the safety department informed the boys that their mascot (goat) must leave the area.

The sick list claimed **Eddie Sheridan** of Group 27 for a few days. He says it was a cold. Best wishes for a speedy recovery go to **Sammy Vivana** who was seriously injured in an auto accident.

Leaving to enter the Army are **Walt Merchont, James McFadden, William Gibson, George Gray** and **George Rankin.** In the armed forces, **Donald McCauley** holds the honor of being the best correspondent. Why not try to equal him with a card to the old gang at Inert? **Cy Cobb** went one better with a personal visit while on a furlough and really enjoyed it.

New employees welcomed are **Bernard Kahn** and **James Brooks** at South Inert.

Something has been dug up and it is the question of the week where Inert men speak. Here it is—

Question: What do you think you, as an individual, could do to make Elwood Ordnance Plant a better place to work?

Mr. Newton: Be courteous to all fellow workers, whether in line of duty or not.

Mr. Neece: Partake of recreation to your liking not because a friend wants you to, but because you really like to do it yourself. . . . I suggest hunting or fishing as it is always a healthful outside interest from your work and makes you better fit for duty.

John Meditz has been making frequent trips to the EOP Hospital.

Edward Speizo recently bagged four pheasants, 12 rabbits, six quail, one empty stomach, two wet feet and one pair of wet trousers.

John Burke admires himself so much lately that the boys at 27 are sorry they did not run him in the "Miss Victory" contest.

Horace "Clux Gable" Clark has started a new band called "The Dream Boggie Boys."

Alex "Bing" Ciarletta has recently been giving a certain gang at 27 vocal lessons on his new song "Give Me A Little Kiss, Will You Hon"?

The Basketball team of Group 27 has not played any league games yet, but the boys have been doing a lot of practicing and are in tip-top shape. Suits for the team were obtained through money raised by the sale of chances on a War Bond.

The boys at 27 would like to know if pipe, tobacco, and lunch were all **C. A. Kemper** left in the taxi cab.

Ray McGrath thinks there is power at Group 27. . . . Yeh Man!

Mose Williams, the old rail, is noted as the key expert in the Barrel Department at Group 27.

A number of the boys have worried about **Eddie Sheridan** getting under the weather, not wearing a hat.

Basketball Now Occupies Sports Spotlight As Winter Recreation Program Begins

Bowling, Skating, Dancing, Music, Dramatics Are Making Progress As Devotees Develop Plans

By E. L. Walkup
Recreation Director

Drop into the gymnasium any afternoon or evening nowadays and you will find one or more basketball teams hard at work getting themselves in shape for a heavy season.

There will be an EOP League of about 10 teams and a plant-wide team that will represent EOP in the Industrial Leagues in Joliet and Kankakee.

The Industrial League players are having tryouts almost every day under the guidance and eye of **John Kusinski**, and, from appearances, he should have a team that could meet all of the big ones. Some of the men trying out are **Roy Wright, James "Slim" Clark, Warren Hair, William Askenbrenner, Hershel Peterson, Roy Rudder, Robert Peterson, Howard Gulick, John Phelan, Eugene Grove, Eugene Telleson.** Kusinski said that all positions are still open and any one interested should get in touch with him at the Recreation Department.

Among the group teams that have already signified their intention of joining the local league are Group 62, **Edward Spezio**, captain, and **Edward Sheridan**, manager; **Joseph Sarti** is captain of Group 61 and **Harvey Steffes** is manager; Group 1, **Captain "Bunny" Farnango, John Burdette**, manager; Guards, **Sergt. William Dowden**, captain and manager; Fire Guards, **Roy Wright**, captain, and **Roy A. Martenson**, manager; Army, **Lt. M. G. Brandon**, captain, and **Lt. D. A. Yeoman**, manager; Fuse and Booster Laboratories, **Jed Mees**, captain, and **Charles Bridwell**, manager; Bus Drivers, **Tiny Moss**, captain and manager; Group 70, **Mario Zaninni**, captain, and **Paul Becker**, manager.

A complete schedule for practice dates is now being drawn up and forwarded to the managers. Play will start in a week or so, but there is still time to get in, just call the Recreation Department, 4109. There have been many dances planned by the different groups, all rushing to get in ahead of gas rationing. Just watch your bulletin boards for dates. Some of them include the Bus Drivers, Group 1, Group 3 and the Government Inspection Department. The latter is an annual affair and is not open to the public. Last year it was held in Joliet, but this year they expect to take advantage of the many facilities offered by the Recreation Department and use the gymnasium.

★ ★ ★

We in the Recreation Department are looking forward to the cold weather and winter sports. If you are a skater—speed or figure—or are interested, let the representative of the Employees Activity Committee for your group know about it, or visit the Recreation Office.

★ ★ ★

No definite plans have yet been made for dramatics. These plans will depend on you. Let us know if you have had amateur or professional experience in either the drama or musical comedy. Many opportunities come up for use of small groups with one act plays and musical presentations.

★ ★ ★

The EOP Orchestra, under the direction of **George Zelke**, is really making a name for itself. The library is growing fast and includes all of the latest numbers as well as many of the older tunes, with special arrangements, which are so popular now.

General Offices

MAE BELLE ANDERSON
Correspondent

Irene Keenan casually strolled into a Joliet drug store which does not sell papers (she was unaware of the fact). She walked up to the soda fountain, saw a *Tribune* and picked it up and proceeded to pay the clerk for it. A man sitting at the counter spoke up and said, "I beg your pardon, madame, but that is *my* morning paper, they don't sell papers here."

Lt. Stuart Moloney, of the Fire Department, is thinking of appealing to Mr. Anthony's court. He is greatly perplexed. He received a card from Aurora, signed "Sweetheart Mary." Now his problem is: Will you please identify yourself "Sweetheart Mary" and don't keep me in suspenders!

Gerry Almon told a tall tale to **E. O. Huey**—her story has not been verified as yet. She said she recently accompanied her husband on a pheasant hunting trip (during the season). He had only one shell with him. He fired the one shot and killed three pheasants. Believe it, or not!

Rita Washburn has been adding, subtracting and worrying. She's trying to figure out how many miles a week she drives; she has a hunch she'll need more than 4 gallons to drive 180 miles.

When asked if she would like a drink the other day, **Betty Barkelew** asked, "What can you get around here besides coke?"

Marian Alexander found her shoes, she thinks. Now the question is, where did she lose them?

There's really no reason why **Stephen McCann** can't continue with those tea parties every afternoon, as it is reported he is always in hot water anyway.

Jacqueline Binzen, Mail and Files Department, spent a vacation in San Francisco and Stockton, Calif.

Frank J. Leiss has been added to the staff of the Comptroller's Office.

Slower Driving Reduces Accidents

Reduction of maximum speeds for driving within the EOP area has resulted in a material lessening of accidents, according to **M. C. Baughman**, chief of guards, who pointed out this advantage in addition to the conservation of rubber primarily sought in the change of driving regulations.

Mr. Baughman said the present speed regulations are: In loading lines, 15 miles an hour; East and West Road through Group 70, 15 miles an hour; passing fire stations, 20 miles an hour; throughout the plant area, 25 miles an hour.

Any employee having an accident, where damages to a Government vehicle are involved, is given a hearing to determine the cause and to fix the blame. All damages must be paid by the guilty person.

A new addition to the Recreation Building is a juke box—oh! Yes, dancing is permitted. It's your club, make use of the building as you would a country club. Watch the Bulletin Board, for now that the weather is keeping everyone indoors there will be many new activities you will be interested in.

Happy Birthday to You!

This is a regular feature in which the birthday anniversary of as many EOP workers as possible will be listed for 2 weeks in advance. Watch for your own. Call your friends.

W. F. Futterer

J. F. Futterer

Albert Futterer

Arthur Futterer

THREE of the four Futterer brothers, shown here, now in the armed forces, are former employees of the Ordnance Department here. The three are J. F., Albert and Arthur. W. F. and Arthur are overseas.

23 Complete Joliet First-Aid Class

Twenty-three EOP employees have completed the standard first-aid course given in Joliet, according to **Karl J. Ulrich,** assistant safety supervisor. The standard first-aid course consists of 20 hours and a certificate is awarded to each person who successfully completes the course.

Those who have received their first-aid certificates are **William Briddick, Robert Gibson, Esther Leverich, Quentin Leverich, George Newton, Frank Platt, Henry Risk, Roy Shepherd, Louis W. Walsh, Jr., Vernon Worden, Elsie Allen, Marion Ambrosic, Minnie Benedino, Adolph Bronx, Pauline Crakovic, Margaret Oxepregi, Marie E. Mock, Eugenia Pasternak, Arlene Nash, Frances Ramsey, Helen Skumanich, Ann Stimac and Martha Swinford.**

LIKE A TOY is the appearance of the 10-ton Diesel locomotive shown here, but it does a big job as its part of the EOP railroad system. Pictured left to right are Roy Sawyer, switchman; Charles Kastner, engineer, and B. F. Berden, foreman.

Hospital

EVELYN RICHARDS
Correspondent

Roscoe Sidell, supervisor of the Hospital Laboratory, attended the funeral of his father, who died suddenly.

Nearly all have read the story of the three pigs, where the big bad wolf "huffed and puffed and blew their house in." **Dorothy Schoop** huffed and puffed and shook the back door of the Administration building, trying to get in and clock out. When suddenly a gentleman opened the door and **Dottie** turned crimson, and thanked **Maj. Kenneth M. Haber.**

A good suggestion is to begin pooling pennies for cigars soon, as November 19 will see **Dr. B. G. Giel** celebrating his birthday. It isn't necessary to say what he likes but you can always see him flicking ashes off a cigar off duty.

Clare V. Johnson left the EOP Hospital November 11. His new position is that of Director of Food Rationing at Springfield, Ill.

October 31 saw **Doris Petersen** and **Richard McCollem** exchange nuptial vows at Ottowa Street Methodist Church. **Mrs. McCollem** is a nurse at the hospital and **Mr. McCollem** is an explosives operator in Group 61. They are to reside in their newly purchased home in Sunnyland District on the Plainfield Road.

Lucy Harkness, former secretary here, received a letter from **Pvt. William Bryant,** former insurance was stationed in Massachusetts, has been transferred to Camp Davis in North Carolina. He also has been promoted to corporal.

Maurice Bremer, of Pontiac, hospital ambulance driver, recently received a letter from his son, **Sgt. Gordon Bremer,** attached to the U. S. force somewhere in Africa as a meteorologist, that he has started a "private zoo." So far he has acquired a young ostrich, a young giraffe, several horses and chameleons. The chameleons are larger that those sold in circuses and carnivals here, and have a sort of a crest-like design on their heads. They turn two shades of green and black. He expects to be transferred shortly and says that he likes the country he is in very much.

November 1 brought a letter from **Pvt. Joseph Chizmark,** former ambulance driver. He recently had his knee operated on and is in the hospital. Several persons have asked for his address and they may obtain it by calling Line 3246.

Eddie Murphy reports that even though the alleys are being used more than the average commercial alleys, he still has the best alleys in northern Illinois. While about 40 teams have signified their intentions of getting in the Plant League, due to travel and gas rationing, it is expected that plans for leagues might be dropped and throw the time open for scheduled bowling, so until it is definitely decided whether leagues will be organized or not, call up for reservations. Alleys are in operation from noon until 11 o'clock at night.

The Burning Pit

(Continued from Page 2)

tornadoes and meteorological uprisings, or should I say "uprootings?" **Karl Ulrich** of the Safety Department might, in the interests of mental relaxation, be advisedly persuaded to step out and take a chance, even if it be only a drug store punchboard. This last may seem like treason but it would help that worried look. I suggest you *Read* these lines with caution, Mr. Ulrich.

There are many other worthy subjects to be recommended but with the picture roughed in by the paragraphs I hope you have just read, you can daub in the colors and details to suit yourself. And of course don't forget the promise we are all going to make to put in just a bit more effort every day during the coming year so that before the next set of resolutions goes to print, the word of the day will be *VICTORY.*

The EOP Guide Post

SALE · FOUND · LOST · RENT · BUY · SERVICE · TRADE · RIDES

Classified ads will be published without charge for EOP employees and their families. If you can offer transportation, want transportation; want to trade, buy or sell something; have a house or apartment to rent; have lost or found something, you are invited to make use of this service. Deadline is Wednesday, ten days preceding publication.

Riders Wanted—To and from Streator, Ill. 11:30 to 7:30 shift from Nov. 16 through Nov. 28. Steady ride. Call **Ed Rashid,** telephone 36201, Streator.

Riders Wanted—From Chicago to EOP. Will pick up riders on 63rd Street anywhere between Cottage Grove and Western Avenue. Call **H. G. Bellamy, Jr.,** Line 2140.

Riders Wanted—From east side of Joliet. Six days a week. Call Group 62, Building 62-1, Line 4286, or telephone 7956, Joliet.

Riders Wanted — From Braceville, Braidwood or Wilmington. 7:30 to 3:30 shift. Call **Leo Trickler,** Line 3163.

For Sale—Three guard shirts. Size 15 neck and 33 sleeve. $1 each. Also 1 pair guard shoes. Size 8. $2. Call **E. Van Winkle,** telephone 4271, Wilmington, Ill.

For Sale or Rent—Bowling ball. Slightly used and in good condition. Call **Howard Henderson,** Carpenter Shop, Line 3283.

For Sale—4-door '41 Pontiac. Tires and car in good condition. Heater. Call **Evelyn Murphy,** Line 4104.

Ride Wanted—From EOP to Earlville, Ill., at 7:30 a. m. on Sundays and 11:30 p. m. on Mondays; returning from Earlville to arrive at EOP at 3:00 p. m. on Mondays and 11:00 p. m. on Tuesdays. Require regular transportation for these trips. Write **B. W. Meads,** Group 23, Building 7, c/o **R. E. Brown.**

For Sale—'41 Ford Super DeLuxe station wagon. Five new tires. New navy blue paint job. Contact **Clifford H. Scott,** inspector, Group 1, or **Mrs. Roy Hawthorne,** Streator, Ill.

ELWOOD ON PARADE

PRESSING tetryl pellets behind a concrete barricade is being watched through a peephole by Winifred Robbins at her station in Group 6.

FRAMED through the cab window of his Diesel locomotive, Joseph E. Dunn is checking his orders by radio before leaving the round house.

ASSEMBLING operations in the Fuze & Booster Area are numerous and Estelline Reece is shown here in Group 7 performing one of the tasks.

BOOSTERS FOR SHELLS are assembled on tables like the one shown here at which Marjorie Woodward, Group 6, is shown working. After assembling is completed, the components are sent by trucks to the loading lines.

MASKS ARE WORN when tetryl pellets are placed in boosters. Pictured here, left to right, are Alice Martin, Helen Karl, Bonnie Lewis, Virginia Himmerling and June Randolph, all of Group 6.

EOP'S SIX DISTRICT FINALISTS in the "Miss Victory" contest are shown here among the ten selected by the judges. Pictured left to right are Lucille Blaida, Zenith Radio; Evelyn Tolustad and Irene Houch, Elgin Watch; Betty Foster, EOP; Geraldine Vickers, Guardian Electric; Betty Jensen, Mary E. Danser, Erva Willford, Maxine Enger and Dorothy Connors, EOP. (Herald-American photo.)

S & P Present War Bonds to Victory Girls

Six District Finalists In Chicago Contest Are Honored Here

(Pictures on Page 9)

War bonds have been presented by Sanderson & Porter to EOP's six district finalists who participated in the "Miss Victory" contest, sponsored by the *Chicago Herald-American*. To **Betty Foster** of Group 4, who won second place, was given a $200 war bond. **Maxine Enger**, Group 4; **Betty Jane Jensen** and **Mary Danser**, Group 1; **Dorothy Connors**, Group 7, and **Erva Willford**, Utilities, were awarded each a $100 war bond.

The bonds are a token of appreciation to the six girls who represented EOP with such outstanding success in the contest. **W. E. Canniff**, manager, engineering and operations, made the presentation in behalf of Sanderson & Porter in his office November 30.

In a letter to each of the finalists, Mr. Canniff said in part: "It is right that we should all be gratified because 6 of our 35 candidates from some 500 competitors received final consideration. We are proud of each of our candidates, but it seems appropriate that the 6 finalists, including our own "Miss Victory," should receive some special token of appreciation from Sanderson & Porter."

The 6 finalists were escorted to the "Miss Victory" ball at the Aragon ballroom November 19 by EOP'S "Miss Victory" committee which consisted of **George F. Bent**, chairman and personnel director; **Capt. D. P. Tunstall**, public relations officer; **John A. Lower**, superintendent of Groups 4-5; **Helen Bardi**, Personnel; **Helen Shimek**, Utilities, and **John Condie**, Group 1.

The 40 contestants, representing different companies in the Chicago area engaged in war work, made the stage of the Aragon a common battlefield for the coveted title. They were presented in groups of 6 to the audience and judges. **Patricia Dougherty**, women's editor of the *Chicago Herald-American* introduced the girls and kept the audience amused with her repartee while the judges gave sincere consideration to each contestant.

While the votes were being cast, the audience was lavishly entertained by **Sophie Tucker**, **Grace Moore**, **Ben Bernie**, **Bert Wheeler**, **Boris Karloff** and many others.

The 40 contestants were eliminated to 18, then to 5 and then to the big 3. They were **Mary Hoffman** of Western Electric, **Margaret Helen Reed** of Ammunition Container Corp. and Miss Foster. Two more votes were taken and then **John A. Malloy**, executive editor of the paper, announced that Mary Hoffman was "Miss Victory" of the Chicago area.

But Betty Foster is the official "Miss Victory" of EOP.

Wreckage of U.S.S. Arizona at Pearl Harbor

THE U.S.S. ARIZONA was sunk in Pearl Harbor when Jap bombers attacked the fleet and airfields December 7, 1941.

—U.S. Army Signal Corps Photo

Military Accomplishments of Elwood Ordnance Plant Are Many and Varied During War's First Year

This Nation's first year of war, which began on that fateful Sunday of December 7, 1941, when Japanese bombers attacked Pearl Harbor and other points in Hawaii, has seen many contributions made to the war program by the Elwood Ordnance Plant.

Within three days after the attack, the first shipment of bombs and shells was made from EOP. That December of a year ago also saw the beginning of assembling and loading operations in Groups 4 and 7, the first two of the Fuze and Booster groups to get under way. Construction was still in progress, although Groups 1, 2 and 3 were in operation. The automatic telephone service was placed in operation and the railway system was turned over to the operating department.

In January Group 5 was put into operation. The fire station at the North Gate was completed. The Nitrate of Ammonia Plant and the radio maintenance and repair shop were put into service. On January 21, **Charles J. Kemery**, superintendent of carpenters and a leading figure in the construction of EOP, died. A flood seriously interfered with construction in February.

Col. T. C. Gerber was succeeded as commanding officer by **Lt. Col. Don M. Hoffman.**

Group 8 was placed in operation in March. There was a considerable increase in the number of women employees in the Fuze and Booster area. The Construction Department ceased to exist March 15 and this work was reorganized under the Utilities Department, which assumed operation of the railroad, all shops and maintenance divisions. Loading and assembling of anti-tank mines got under way. The first women timekeepers were employed.

Group 3-A was placed in operation April 9, loading bombs. Groups 6 and 9 also started operations, completing the loading and assembling groups. A testimonial dinner was given April 10 for **Capt. Curtis A. Nelson**, who as area engineer of the plant, after serving as constructing quartermaster and area engineer since July, 1941, was succeded by **Capt. K. D. De Young.**

A transportation survey made in May showed that EOP workers lived in 187 communities and in 16 counties and commuted to and from work each day. The first EOP block-buster bombs were loaded in this month. Extensions to the east and west wings of the Administration Building were started. A recreational program was launched and plans for employee use of the Recreation Building were made. A campaign to sell War Bonds on the Payroll Savings Plan was launched and to date employees have invested $1,398,147.50 for this purpose.

The first issue of *The Bomb-Shell* was published June 1. Tragedy struck June 5, when an explosion in Group 2 cost the lives of 48 "soldiers of the home front." Seventy-two were injured. A memorial service for the heroes was held in front of the Administration Building June 17.

Group 2 resumed operations July 6. Extensions to the Administration Building were completed in this month. One of the first war restrictions was put into effect with launching of the motor pool for all Government-owned vehicles. Plant guards were made a part of the Army's Military Police July 18.

A fund of $16,943.50 was raised by employees and the management for the survivors of those who were lost in the June explosion. August also saw completion of the new shipping building at Group 2 and beginning of its operations. EOP's first WAAC, **Alice Pichon**, was sworn into the Army August 3 and since has received her commission as a lieutenant. A gigantic service flag honoring EOP workers who had been called to the armed forces was dedicated August 8.

The construction program was officially terminated September 30. Richards Farm, site of construction headquarters, was fenced in.

A snowstorm hit the vicinity September 26. Girl employees of the War Department donned uniforms September 15.

October saw tire rationing well under way. The speed limit within the plant area was reduced from 30 to 25 miles. Women were employed as bomb loaders in Group 3-A. A scrap drive was launched October 9. Colonel Hoffman was succeeded by **Maj. Kenneth M. Haber** as commanding officer.

In November plans were made for co-operation with the gasoline rationing program to become effective December 1. A uniform shift change time was inaugurated. Announcement was made that Sanderson & Porter's contract with the United States for operation of the plant had been extended. Changes in some of the War Department divisions at the plant were started.

Yes, all in all, an eventful year. EOP has contributed its full share to the war effort in men, women, money, scrap and millions of pounds of bombs, shells and anti-tank mines.

Emergency Calls

To report a fire.....Dial 17
To call police.....Dial 2229
To call ambulance
(emergency only).Dial 4262

Report the nature of the emergency. Be prepared to answer all questions a doctor may ask. He has good reasons for asking these—in order that he may come prepared with the necessary equipment.

Fear Buses May End Service For Lack of Riders

Dwindling Patronage Presents Problem of Serious Nature

Employee co-operation must be forthcoming quickly if bus service to and from EOP is to be maintained by the public carriers, who are alarmed concerning the lack of patronage despite the restrictions of tire and gasoline rationing, it was announced by **W. E. Canniff**, manager of operations.

EOP workers now travel daily to and from work from more than 300 communities and curtailment of bus service would be a hardship on many of them. Such curtailment will be forced unless there is a pick-up in the number of riders, the bus operators told Mr. Canniff in a meeting last week.

Employees who now use bus transportation should attempt to get other riders and those using private cars for long trips should switch to buses where they are available, was the advice given by Mr. Canniff.

The situation arose with the necessity for car riders to double up as much as possible to meet the requirements of the tire rationing boards. This doubling-up apparently has been more than successful; it has been carried to an extreme in many cases where car owners took passengers from the buses so they might continue to drive their own cars.

Mr. Canniff pointed out that the various county rationing boards have the authority to refuse to issue a supplemental gasoline book if, in the opinion of the boards, adequate bus service is available. This authority may be called upon if necessary to keep the buses operating for the benefit of those who must depend on them.

The situation is being given careful study and everything possible to maintain bus service will be done.

The Japanese Are Tough

A RADIO ADDRESS BY THE HONORABLE JOSEPH C. GREW
Former United States Ambassador to Japan

First of all, I should like to say how deeply we have been moved, my associates and myself who have just returned on the exchange ship *Gripsholm*, by the many greetings of friends and the great volume of messages of welcome which have come to us from all over the country. The welcome given us has warmed our hearts, and it is one that we can never forget, nor can we ever forget the really inexpressable joy of coming home after the difficult months and moments through which we have passed in Japan and Japanese-occupied territory. It may be impossible to answer all those messages individually. Please let me express now to all who hear me our most grateful thanks for them.

Release From Torture

Never before has my native land looked to me so beautiful. Never before has a home-coming meant so much. I think you will realize a little of what it meant to us when I tell you of those last 7 days at anchor off Yokohama before our evacuation vessel finally sailed from Japanese waters. We were awaiting the completion of the negotiations for our exchange, not knowing whether those negotiations would be successful and whether, if they were unsuccessful, we might not all be returned to our imprisonment in Japan. Among us were many Americans—missionaries, teachers, newspaper correspondents, businessmen—who had spent the preceding 6 months in solitary confinement in small, bitterly cold prison cells, inadequently clothed and inadequately fed, and at times subjected to the most cruel and barbaric tortures. I will not go into the nature of those tortures, which were many, except to mention an incident on the *Gripsholm* when three elderly Americans, one of them over 70 years old, gave me a demonstration of the water-cure which had repeatedly been inflicted upon them. We went up to the bow of the ship early in the morning, where a friend posed as the subject of the torture. He was tied up with his knees drawn up to his chin, his neck being attached to his knees, and his hands securely bound behind him so that the cords in the actual torture had penetrated deep under the skin. He was then rolled over with his face up and water was poured into his nose and mouth. It was a realistic performance, but only from the oral description of those men could I visualize what the actual torture must have been. Six large buckets of water were used by the Japanese police, so that the subject lost consciousness and then was brought back to consciousness merely to have the same thing repeated. One of those elderly missionaries was given the water-cure six separate times in order to make him divulge information which he was supposed to have acquired as an alleged spy. Nearly all of the American missionaries, teachers, newspaper correspondents, and businessman were regarded as potential spies. The stupidity of those Japanese police was only surpassed by their utter cruelty. That same American told me that once while he was lying tied on the floor a Japanese had ground his boot sole into his face and then had brutally kicked him, smashing a rib. When he was finally untied, he could barely stand, and he said he feared that a rib had been broken. One of the Japanese police asked where the broken rib was and began to feel his body. As the Japanese came to the broken bone he said, "Is that the place?" and when the man answered "Yes" the policeman hauled off with his fist and hit that broken rib as hard as he could. In another case a well-known American had been seriously maimed as a result of the gangrene which was caused by the ill treatment that he received in his prison cell. I had known him in years gone by, and seldom have I had so great a shock as when I saw him on the ship, a mere shadow of his former self. There were many, many other cases.

"Honorable 'Son of Heaven' wishes to forget Pearl Harbor—it becomes bad pain in the neck!"

The Real Story

I had heard indirectly of the horrible atrocities perpetrated in the rape of Nanking and of the fearful things done in Hong Kong when soldiers who had been taken as prisoners of war were bayoneted to death. But on shipboard we had direct evidence, for the dying shrieks of those soldiers were heard by a woman, a fellow passenger of ours, who herself told me the terrible story. This was no second-hand evidence but the reports of reliable first-hand witnesses and, in the case of the torture, the first-hand evidence of those who had suffered the tortures themselves.

Do you wonder that during those 7 days of waiting in the harbor of Yokohama several of those people told me that if the negotiations for our exchange failed they would commit suicide rather than return to their imprisonment in Japan?

And then came one of the greatest of all moments. I awoke at 1 a. m. on June 25 sensing that something was happening. I looked out of the porthole and saw a piece of wood slowly moving past in the water. Another piece of wood moved faster. We were at last under way, slowly accelerating until the ship was finally speeding at full steam, away from Yokohama, away from Japan, pointing homeward. Ah, what a moment that was, even though we had 18,000 miles to cover and 70 days in all before we should pass the Statue of Liberty in New York harbor and repeat to ourselves, with tears pouring down many a face.

"Breathes there a man with soul so dead
Who never to himself hath said,
This is my own, my native land?"

I shall have something to say tonight about the Japanese military machine which brought on this war and against which we are fighting today. But before turning to that subject there is something else which I cannot leave unsaid. I have lived for 10 years in Japan. I have had many friends in Japan, some of whom I admired, respected, and loved. They are not the people who brought on this war. As patriots they will fight for their Emperor and country, to the last ditch if necessary, but they did not want this war, and it was not they who began it. Even during our imprisonment in Tokyo many of those friends used to contrive to send us gifts, in spite of the usual obstruction of the police who wished to cut us off completely from the outside world. They were not the usual gifts of flowers but gifts of food, sometimes a piece of meat, which was the most precious gift they could confer, because they themselves could seldom get meat. For 10 years I have broken bread in their houses and they in mine. They were personally loyal to me to the end.

This Is the Issue

But there is the other side to the picture, the ugly side of cruelty, brutality, and utter bestiality, the ruthlessness and rapaciousness of the Japanese military machine which brought on this war. That Japanese military machine and military caste and military system must be utterly crushed, their credit and predominance must be utterly broken, for the future safely and welfare of the United States and of the United Nations and for the future safety and welfare of civilization and humanity. Let us put it in a nutshell: There is not sufficient room in the area of the Pacific Ocean for a peaceful America, for any of the peace-loving United Nations, and a swashbuckling Japan.

I shall come back to that subject, but first it may interest you to know something about the last hours in Tokyo preceding the dastardly attack on Pearl Harbor. That story is of important interest.

Late in the evening of December 7 I received a telegram from our Secretary of State, Mr. Hull, containing a message from the President which I was to communicate to the Emperor at the earliest possible moment. I immediately asked for an appointment with the Minister for Foreign Affairs, Mr. Togo, around midnight, and drove at once to the Minister's official residence and requested an audience with the Emperor in order to present the President's message. Mr. Togo said that he would present my request to the Throne, and I left him at about 12:30 a. m. This must have been only a few hours—Japan time—prior to the attack on Pearl Harbor.

Declaration of War

At 7 a. m. on the morning of December 8 I was awakened by a telephone call from the Foreign Minister's secretary, who asked me to come to the Minister's residence as soon as possible. He said that he had been trying to telephone to me ever since 5 a. m. but had been unable to get connection. I hurriedly dressed and arrived at the official residence at about 7:30. Mr. Togo entered the room grim and formal and handed to me the reply to the President's message to the Emperor, whom I was told he had seen at about 3 a. m., presumably just after the news of the attack on Pearl Harbor. At the same time he handed me a long memorandum ending with the statement: "The Japanese Government regrets to have to notify hereby the American Government that in view of the attitude of the American Government it cannot but consider that it is impossible to reach an agreement through further negotiations." I asked the Minister if he had presented to the Emperor my request for an audience. The Minister merely replied that he had no intention of standing between myself and the Throne. He then made a little speech thanking me for my efforts to preserve peace and, as usual, came downstairs to see me off at the door. He said nothing whatever about the outbreak of war between our countries, and I returned to the Embassy in entire ignorance that developments more serious than the breaking off of the conversations had occurred. It was not until at least an hour or more later that a press bulletin was released announcing the attack on Hawaii and the outbreak of war between Japan and the United States and Great Britain. When the bulletin was handed to me I could hardly believe that the news was true. However, it was soon confirmed from other sources, and later in the morning an official of the Foreign Office brought to my secretary the official note declaring war. Almost immediately afterward the Embassy's gates were closed and locked by the police, and from that moment we were regarded and treated as prisoners. A group of Japanese radio experts then immediately came and went through all our houses with a fine-toothed comb, taking away all short-wave radio sets so that thereafter we should have no contact with the outside world save through the Japanese newspapers which were regularly delivered to us.

(Continued in next issue)

THE BURNING PIT

By Scorchy

Most of the individuals who make up the EOP family can go about their daily stint with some measure of satisfaction in having turned in a good week's work every week and really having made some appreciable contribution to the winning of the war. The mere routine fact that they got paid for it is beside the point as far as this epistle is concerned; it still can be said that they gave everything they had and tried to do their best. In unhappy contrast to this respectacle group, we regrettably have amongst us many who do not seem to be fired with any sense of patriotism or any desire to put their shoulder to the wheel—and keep it there.

Folks, I refer to that ignominious but always squawking individual more unpopularly known as the *absentee*. He is the present day personification of "the little man who wasn't there." The fertility of his brain demonstrated by the variety of excuses for not having been at work yesterday gives rise to the thought that these non-working "workers" might really amount to something if their well-rested mental equipment could be exercised a little more than their muscles.

Another phase of this problem should be of considerable interest to the medical profession. It has always been puzzling to this observer as to just how a man can be in rugged health on Thursday night, completely incapacitated and bed-ridden all day Friday, but through some biologic mesmerism completely regain his health, and report to work robust and ruddy on Saturday morning.

Your reporter hesitates to cast any stigma on the pseudo-patriotism of these *intermittently emaciated* victims by suggesting that Friday is the day after payday, but now that the idea is out in the open, you can draw your own conclusions. Similarly peculiar, is the current fact that there is a decided dearth of red corpuscles on Mondays. It would also be grossly unfair to intimate that these Monday sufferers had not worn themselves to complete exhaustion by helping with the chores around the farm on Sunday, but here again let your imagination roam into the fields of the more pleasant but, nevertheless devastating, pastimes that are open to the "drugstore cowboy" who in these war times seems to have demonstrated that he has more money than brains.

Your correspondent hesitates to "view with alarm," "look with concern," or "ominously warn" the body politic, but it is difficult to resist the temptation of suggesting an Army-Navy "A" flag to be ceremoniously pinned to the rear of each absentee on the morning that he returns from his rest cure. It seems also appropriate that his fellow-workers take up a collection as congratulatory appreciation of his self-denial in cutting short his certainly deserved respite from his physical efforts, which, in altogether too many cases, have never remotely approached the point of exertion, not to mention exhaustion.

An added convenience for these erstwhile chanters of "Brother, Can You Spare a Dime?" should be the provision in drugstores, taverns and filling stations of pads of standardized doctor's certificates which each "Prodigal of the Rest Cure" could fill out for himself and thus maintain the same degree of integrity as his attendance record indicates.

I warn you—the worm will turn.

Yanks' Letters From Overseas Describe Life

Friends and Kin Also Write in Behalf of Men

Thanks from EOP Yanks from all over the world continue to flood *The Bomb-Shell* office. Whether it's North, South, East or West, or the mysterious c/o Postmaster New York City, N. Y., or San Francisco, Cal., *The Bomb-Shell* goes through and hundreds of former EOP employees, now serving in the armed forces, keep up-to-date with the news just as they did when they punched the old time clock at 3:30 p. m. and called it a day.

From "somewhere in the tropics a long and interesting letter was received from **Pvt. Albert Jacovec**, ex-Group 1 man, who is stationed there with another former EOP employee, **Pvt. Edward Dalian.** About receiving *The Bomb-Shell*, Pvt. Jacovec wrote: "Finally received a copy of *The Bomb-Shell*, the August issue, but I can't explain to you how happy it made me. I received it after coming off guard. It just takes a soldier's spirit from his shoe tops and brings it up there where it belongs." Pvt. Jacovec wants his former co-workers to keep 'em rolling and says hello to **Bob Kelly, Jim Hibber, Jersey Klegman, "Speed" Whreli, Dick Cuningham and Bob Bryant.**

"I'm in the wilds of Australia," wrote **Pvt. Bruno J. Duma,** "where books, magazines and papers are scarce and I sure was tickled to death when I received *The Bomb-Shell.* I want to thank the staff for it and their trouble in sending it to me."

With a "Greetings from England" card and a letter, **Pvt. Harry E. Kimmel** said, "We are usually a couple of jumps ahead of the U. S. mail. However, it always catches up with us and, though it's a bit late, we really are thrilled when we get news from back home. Received the July and August issues of *The Bomb-Shell* over here, which is like receiving a personal letter from all the boys in the plant, especially my fellow workers in Group 64 and 66A. Am sending thanks and sincere greetings to all."

OSC Glenn G. Wheeler wrote that on November 17 he would be transferred to the Ordnance Department, Officers' Candidate School, Aberdeen Proving Ground, Md. As an EOP employee he worked under **Charles Herbig** and **Pat Patterson** and did operations accounting in the Tin Shop. "It was a pleasure to have been associated with EOP, and I will always remember my employment there. I have found army life to my liking and have met and worked with a grand group of fellows. I would appreciate hearing from any of the fellows there, in the Tin Shop, especially **Jess Thomas.**"

Happy memories of EOP also filled the letter from **Pvt. William O. Howen,** Camp Livingston, La. He said: "I am writing you to thank you for sending me *The Bomb-Shell.* I really appreciate it. I wish to say that there isn't a finer place to work than EOP and that I never worked for any finer fellows than **Edy Burns** and **John Lower.** I don't believe there is a better group to work with than the boys and girls in Group 5. The army is swell. We have good food and fine clothing."

James E. Koerner, F/C at Great Lakes, Ill., said that his copy of *The Bomb-Shell* went the rounds and the fellows were much interested in the work the girls and men are doing at EOP. In fact, he went on to say, two copies were delivered to his company because **Burton Peet,** formerly of Group 3, is one of his buddies.

Real army spirit was revealed in the letter of **Pvt. Robert E. Guess,** who is stationed at Traymore Hotel, Miami Beach, Fla. He wrote: "I wonder if *The Bomb-Shell* can be sent to a guy who misses the old gang in Buildings 10 and 13? But I wouldn't trade places with **Joseph E. Salmon** if I could! Boy, is this the life! Living in hotels, swimming, when in Joliet I'd be freezing, and, the most important thing, we're being trained to do a job where we can help get this fracas over with. If any of the old gang in Buildings 10 and 13 have time, I would like to hear from them."

Pvt. L. L. Ruphard is constantly on the move. He spent five months in school at Keesler Field, Mississippi, one month at Baltimore, Md., one month at Pendleton Field, Oregon, and now at his present station, Camp Stockton, California. "Still the large manila envelopes carrying *The Bomb-Shell* always catch up with me." From Key Field, Meridian, Miss., **Lt. J. D. Youd** said, "I have found *The Bomb-Shell* a source of interest and enjoyment ever since the first copy and look forward to receiving it every other week. I enjoy searching through its pages for names of men I knew while I was there. The pictures and explanations of the various manufacturing processes strike a familiar note. Thanks for sending the paper."

"It certainly was a favorable surprise to receive *The Bomb-Shell.* Please extend my greetings to **Sergeant Murphy** and the rest of the Guard force," from **LeRoy Gunderson,** Camp Carson, Colorado; "Received two copies of *The Bomb-Shell* and am always glad to hear from home," from **Joseph J. Cassetto,** Camp Luna, New Mexico; "I've been getting *The Bomb-Shell* for some time. I worked for **Bill Dooley** at Group 61. One of the best guys I ever worked for," from **Pvt. William Ducey,** Camp Forrest, Tennessee; "Thanks for sending me *The Bomb-Shell.* Could you put my address in the paper so that the old gang could write to me?" from **Herman A. Lundstrom.** F 1/c U. S. N. R., Navy 8155, c/o Fleet Post Office, New York, N. Y.

Letters and cards with "thanks for *The Bomb-Shell*" and "please send future copies to my new address" were received from: **Ralph E. Adams,** RT 3/c, Great Lakes, Ill.; **Pvt. George Rockett,** Tyndall Field, Florida; **Pvt. Gene M. Newton** (who would like to hear from men in the Fire Department), Fort Bragg, North Carolina; **Cpl. Roy D. Colby,** Camp Hood, Texas; **Pvt. Ernest F. Hoenes,** Fort Lewis, Washington; **Pvt. Edward L. Kurth,** Brownsville, Texas; **Cpl. W. G. Grohne,** Fort Sill, Oklahoma; **Pvt. Timothy O'Donnell,** Camp Grant, Illinois; Candidate **James H. Edwards,** State College, Miss.; **Pvt. Frank J. Rifel,** Rapid City, S. Dak.; **Pvt. Stephen J. Rusina,** Columbia, S. C.; **Pvt. Donald J. Breen,** Camp Haan, California; A/C **Joseph J. Peters,** Nashville, Tenn.; **H. D. Roles,** HA 1/c General Hospital, Brooklyn, N. Y.; **Pvt. James P. Hudson,** Camp Wallace, Texas; **Pvt. Harley E. LeVasseur,** Camp Maxey, Texas, and **Pvt. Earl Gene Potter,** Camp Roberts, California.

Letters and cards received from friends and relatives of former employees in the armed forces included: **Esther Koen,** Group 8, who wrote in behalf of **Pvt. Aldo Zinonni,** Camp Robinson, Arkansas; **Mrs. Melvin S. Oard,** who wrote in behalf of her brother-in-law, **Pvt. Edward L. Oard,** Camp Adair, Oregon; **Myron D. Cobb,** who wrote in behalf of his brother, **Pvt. Cyrus Cobb,** Fort Riley, Kansas; **Mrs. A. S. Brown,** who wrote in behalf of her son, **Russell S. Brown,** Fort Sill, Oklahoma; **Mrs. Paul J. Roy,** who wrote in behalf of her husband, **Sgt. Paul J. Roy,** c/o Postmaster, San Francisco, Cal.

OFFICERS' QUARTERS at Pearl Harbor and Hickam Field were fired by Japanese bombs. —*U. S. Army Signal Corps Photo*

High Explosives

MARJORIE HOWERTON
Correspondent

GROUP 64's loss and the Army's gain is **Henry "Hank" Hyde.**

Anyone interested in motorcycle riding lessons, contact **"Pee Wee" Luther Prince.** You get wings with your diploma.

Fred Morris has started training for the 1943 baseball season.

Group 65

Even though one reads or hears little about Goup 65, it is still an important cog in the wheel for victory at EOP.

Chief duty-giver is Supervisor **Joe Studyvin.** He assigned the window washing job to **"Frenchy" Guenette,** who was recently released from the hospital. **"Deke" Adams** fires the stove so as to keep the boys warm. **Leo "Cookie" Shea,** who is nursing a broken hand, reads temperatures in the Igloos; he can't explain the high degrees, especially the Igloo in which the boys are working (might be the fault of **Maurice Nichols**).

Group 66

Loyal Olsen, chief inspector in 66, has been devoting hours and hours to studies known as Army Curriculum Preparatory Studies the last few days.

Dale Smith recently passed out cigars. Reason, the arrival of an eight-pound fourteen-ounce daughter whom he calls **Evelyn Jane.**

Johnny Zopf, former checker at Group 63, sends greetings from the Great Lakes Naval Training Station where he enlisted two weeks ago. Says Johnny, "The routine is tough, but I'm enjoying it."

John E. Giacoletto, Bill Clark and **"Lucky" Jimmy Wensh** have left 66 in answer to the call to the colors. The remaining boys presented a cash purse to the departing boys.

Group 66A

Joe Ellison, better known as "Kentucky Joe," rear admiral of the last hitch, has been seeing Big Bertha, or Big Bersa, as he would say, at one of Joliet's favorite night spots.

Because of his recent bowling scores, **Wendell Overacker,** material checker deluxe, is beginning to think he should be a protege of **Ned Day.** Wendell is ready to take on all comers.

Harry Anderson would be the exact image of Uncle Sam if he would grow a beard and don the proper attire.

Octave J. Cartier, genial clerk, is quite proud of his grandson who was aboard the WASP during her recent forays in the Solomon Islands. Mr. and Mrs. Cartier celebrated their 45th wedding anniversary November 24.

Little Art Skorupa, inspector, can no longer be called Junior G-Man of 66A. He recently entered the fold of Sanderson and Porter.

St. Elmo "Kansas" Stewart is indeed a very happy man. His wife is now a full-pledged government inspector.

Just about the busiest man in the area is **Emil Becker,** custodian.

Flash Gordon, the jolly guard, celebrated his birthday November 22.

Verneille Holder has a two-weeks leave of absence and is visiting her sister in El Paso, Texas.

The **Ford Teeters** and **Nelson Tippett** are spending the Thanksgiving holiday in Columbus, Ohio.

Chief Chemist **H. E. Hafele,** assistant chief **Ray Hybarger, John Snyder, Charles Clifford** and **Ronald Beck** were among those from the laboratory who visited the National Chemical Exposition at the Sherman Hotel in Chicago last week.

Marcia Mitchell is anticipating a visit from **Corp. James Mitchell,** who gets several days furlough when he moves from Camp Roberts in California to Fort Sill, Oklahoma.

Little **Ronald Becker,** the Alexander Beckers' new arrival, kept mamma and papa up all night last Monday. Ronald was suffering from that well-known baby ailment, colic.

War Department Wins 3 Games from Officers

In a special match rolled on the Recreation Alleys Armistice Day, the War Department defeated the Officers in three games. **Kenneth Bull** led the winners with a 521 series, while high series for the Officers was **Lt. C. E. Beilharz** with 422. The scores were as follows:

War Department			
Olson	110	133	155
Koch	153	113	155
Bawler	146	180	129
Bull	182	190	149
Nemanich	107	130	130

Officers			
Bohannon	135	130	89
Grant	120	137	131
Bach	154	139	107
Beilharz	127	128	167
Tunstall	120	141	112

In the second match of the evening the Inspection Department turned on the heat to defeat Payroll three games, for a total of 2512 pins. Colby of the Payrollers rolled 503.

Inspectors			
Lutkus	169	191	142
Walsh	170	141	180
Troupe	144	142	163
Spiers	191	142	179
Caananon	151	243	164

Payroll			
Jackman	148	192	115
Berg	171	153	117
Colby	193	166	144
Prince	122	122	107
Mooney	119	151	161

In the final match of the evening the Auditing Department under the leadership of **Bill Oldani** defeated the Auditing Department three games. High series for the winners was shot by **James Smid** with 459, while **Jim Hart** had a 511 series for the losers.

Auditing			
Platz	114	144	127
Oldani	139	140	145
Smid	138	145	178
Sauer	197	103	147
Murphy	164	190	167

Safety			
Crowther	130	139	123
Hart	182	156	173
Hamson	132	210	168
McMillan	96	121	128
Scure	114	103	127

General Offices

ARLENE SCHLOENDORF
Correspondent

Somebody went and dood it. Your capable correspondent, **Mae Belle Anderson**, decided that she would not be able to continue the work, so here I am. If you guys and gals will bear with me for awhile, I'll try to make this column interesting, without personal slams or ridicule — the same honest American practice my predecessor used.

Those who know **John Fairfield** of **C. R. Reilly's** department regret his leaving the plant. The effective date is December 5.

A whole flock of smiles was noticeable in the Administration Area November 18 when **Maurice Doyle**, formerly of the Mailing Room, came visiting all decked out in the new "soon-going-to-sea-suit," and an admiral could never display more admiration for his uniform than did this bundle of dimples.

Someone displayed intelligence when he or she changed the time clock and rack. Now someone won't be saving shoe leather by walking all over another person's feet at night.

Since I met three girls from the groups in Chicago, **Betty Palmer** of Group 6, **Julia Crozan** and **Ann Grabarcik** of Group 7, I must admit that I had more fun than a monkey on 20 feet of grapevine. If these represent the girls in the groups, all I can say is the girls in the Administration Area are missing a lot of fun by not knowing them.

It's about time that someone handed a bouquet to **Jerry Chaney** of the Kankakee Motor Coach for getting the office crew to work on time since it started operating last March. Santa Claus should be advised to make a special stop at his house this year.

Jackie Dailey made a gallant one-woman stand last week in her own defense.

If you heard a lot of sighs and wolf calls around this building last Friday, it wasn't Miss Victory. It was none other than **Jim Koerner**, formerly with **F. J. Aster**, down for a short furlough and was he ever decked out in a navy uniform. It's no wonder that song, "I've got Gobs of Love for the Navy" is such a success.

Marie Sanders, Multilith Room, left November 21 for Chicago and plans to go later to sunny San Francisco (Pass the Umbrella), Calif.

Mrs. Minnie Kemery is the new addition to **J. C. Schmeh's** Department of Multilith.

Jerry Drechsel, Expediting Department, took her smiling face to Washington, D. C., to work for Uncle Sam. She left November 21.

Katherine Glynn let her love for the Irish get the best of her and went South Bend way to see a good Irish scrap when Notre Dame took Northwestern.

A. E. Kinson returned to work after a week's absence on the sick list. He certainly missed a workout on the Mileage Rationing Board.

Moonlight and roses are what **June Schick** found at Charleston, S. C., when she went to visit her brother at the Citadel School. That fur coat and fur hat she bought were *too* warmly received.

Rosemary Kane has a very stiff third finger on her left hand—caused by a diamond placed there on her birthday.

The Industrial bowling team of the Administration Area (all men) beat the Santa Fe team of Joliet three games last week. That handsome gentleman from the Bond Department grabbed high score for the EOP keglers.

Wayne Sebby of the Mailing Room took a well-earned vacation. He also received notice that Uncle Sam wants to see if he is eligible for this man's Army.

Greetings.—That is what Uncle Sam's mailman brought to **Elmer Pratto** from Uncle Sam himself. He was scheduled to answer December 4.

Two to leave EOP last week were **Mrs. Ruth Naylor** of Wilmington, whose hubby has been transferred to Houston, Tex., and **Beverly Hester.**

Ed F. Kionka, control technician of Engineering Department's Heating Division, who entered the service of the Navy as aviation machinist's mate at Great Lakes, has completed his training and is ready for sea duty.

Sgt. William R. Herbst, aviation cadet, was injured while in flight the week of November 9. He landed, but is in the hospital. Write him and cheer him on to recovery. Call 4206 for his address.

Robert Esbensen, Architectural Engineering Department, who entered the Navy as an ensign, has been promoted to captain of an Amphibian Force and is now assigned to Norfolk, Va.

Edward F. Washburn was awarded second prize in the EOP poster competition. His son, **Edward, Jr.**, former half-back at Wabash College, enlisted in the air corp.

Lee "Lucky" Davis is the driver on the station wagon assigned to the new inter-group bus service. **Joe Luzbelak** and **Ralph Turner** had occasion to use the service to Group 4—**but they had to walk back!**

H. Walker, ventilating engineer, is helping his children solve their home work. He has the department work the problems during lunch time so the students can have the right answers when he gets home.

Walter "Tiny" Peterson, heating engineer, is an expert on pipe coils such as box coils and trombone coils for heating. **Walter "Buck" Dale**, Superintendent of Pipe Shop, goes in to see "Tiny" for a daily lecture.

The romance between **Eleanor Goss**, Engineering Department, and **Bill Sullivan** of Kankakee Ordnance Works is reaching the critical stage. They are doing all they can for inter-plant relations.

Robert Holmes, Mechanical Engineering Department head, is going to have difficulty getting to the plant from Channahon because of gas and tire rationing.

Al Scheer could lend him the bicycle that threw Al a short time ago, seeing that he is afraid of its wildness. Bob could tame the "critter."

Art O'Neil, Heating Department inspector, has left to take a position with the Sanitary District of Stickney, Ill., as operating engineer. Art left a lot of good friends at EOP as he was very popular.

Don Morsch, formerly of Mechanical Engineering Department, and later from Group 61, a member of the Joliet High School concert band, has enlisted as an aviation cadet in the Army Air Force.

I. E. "Tex" Jackson, Engineering Department, has a son who is in "boot" camp at San Diego, Calif. **Tex Junior** assures his Dad that now the war will be over quickly.

To see the large flocks of ducks and geese at Kemery Lake above the dam is a rare treat to all. One car stopped each morning to see them come in. **J. C. Quade**, engineer, opened the windows to hear the calls. They were clear and sharp until **Audie "Curley" Allison** looked back and saw **O. K. Madsen** blowing an artificial duck call. Yes, J. C. has been hunting for 30 years and knows all the animal sounds.

Herb Burch bought a new car and now gets to work on time. He has been graduated from eating plain chocolate sodas—he now has whipped cream added.

In the engineering office they work to the sound of beautiful music. **Max Wolfson** whistles symphonics; **Harry "Lovey" Macrae** whistles popular works, and **Joe Luzelak** does the dancing.

The way **Don Roberts** enjoys the fine countryside on the way here and home is by promptly going to sleep.

Jerry Wall, former head of electrical engineers, had a splendid party at his home in Joliet November 21. His guests were all from EOP. **Mr. and Mrs. Don Lewison, George Rummel, Dorothy Rubins, V. Lieth** and **E. C. Cortright.** They won't tell what games they played, but all admit they had a wonderful time.

Fred "Pop" Poplansky is going on moonlight hay rack rides this week. At the parties he dances the "Krakowiak," a Polish dance.

Mike Chuck is going to be promoted in the Engineering Clerical Department. He is "breaking" in now as a stenographer.

Robert "Wobbles" McKeon is an expert on popcorn. He was sampling his usual quota Sunday when he met some friends. *Aw, you guessed it*—He had to buy some more.

"Happy Zephelrs" George, Doris Skinner, Evelyn Tolf, Frances Gourley and **Mary Passeni** have a desk lunch every day — **Helen Grutka** also "kibitzes."

Leroy Anderson has unearthed a large vocabulary of misunderstood words. He has glamorized the language used in the Engineering Department.

Plant Protection

An apology is due **Hank Schelling** for the unjust accusation that he is seeing a lot of a young woman at the Hospital. It was really his son about whom they were talking about. At least that is Mr. Schelling's story!

A welcome to the Plant Protection Department is extended to **D. B. Sime.**

When hams piled up so high you couldn't see **Russell Watt**, it was felt certain there would be at least one spare ham sandwich—but no such luck.

Anyone interested in seeing a morgue should visit Mr. Watt's office after the big bowling matches — no one will even talk about their bowling scores!

Anyone interested in seeing the latest jitterburg dance should take a lesson from **Paul Tamillo.** Girls, he's really "Hep."

Wanted: A small step-ladder or stool so that **Charles McKay** will be able to reach his file.

Groups 4-9

Fuze-Booster-Primer and Detonator Lines

JUANITA HARTER
Correspondent

Fuze Group 4

Lydia Kirkendahl has been ill for two weeks and her friends hope she will soon be back to work.

Barbara Vilt is recovering in St. Joseph's Hospital from an appendectomy.

Ann McFarland, superintendent of women's change houses, is back to work after a six-weeks' illness. Ann is looking grand, and her friends certainly welcome her back.

Wanted: An alarm clock for **Kathryn Flatt.** The wee hours of the morning are no time to catch a bus.

Mabel Overstake, forelady, is taking a short vacation. She plans to visit relatives and friends out in the wide open spaces.

Chemical Laboratory

"The Fulminate Five" A-1 basketball team from the Fuze and Booster Chemical Laboratory issues an open challenge for games with other teams from the Elwood Ordnance Area, from Joliet, or vicinity. They are particularly anxious to arrange games with Joliet teams, or to join a Joliet league.

Games may be arranged with **Charles Bridwell**, Fuze and Booster Chemical Lab. Phone 4167, or Joliet Phone 2-3093.

Fuze Group 5

Milt Stein's theme song is "Five by Five."

Delores Wrunk has an awful yearning for the State of Nevada —or is it the State?

Mrs. Harold Johnson has just returned from Fort Sill, Oklahoma, where she enjoyed a brief visit with her husband, **Pvt. Harold Johnson.**

Booster Group 6

Best wishes for a speedy recovery go to **Elizabeth Button, Christine Franklin** and **Thora Stoner.**

Paul Harris, ass't foreman in receiving room, said "I do" on Thanksgiving Day. The bride is **Lucille Boersma**, of Chicago.

Congratulations to **Eddie Schultz**, of 6-4, who was married November 14th in St. Charles, Mo.

A postal card from **"Tex" Simpson** says she's having a wonderful time in her home State of Texas.

Ann Pasternak and **Vincent Dolosin** have announced their engagement.

Emma Bloom of Group 6 wants to thank the honest person who found her purse and turned it over to the woman conductor on the East Gate area bus.

Co-workers wish a speedy recovery for **Gertrude Freeman**, who is confined to Silver Cross Hospital, Joliet.

A certain **Betty Johnson** is now wearing a lovely engagement ring. Boy friend joined the Air Corp.

EXTRA! The "Speed Demons" from Group 6 beat "Truka's Gems" Group 7 in a bowling match Tuesday afternoon.

Artillery Primer Group 8

Remember the Fable of the girl, the eggs, the baby chicks she counted, etc., but she spilled the milk or somethin'? Well,—ask **George Elum** about geese.

Al Mondrella has a little deer. He shot it in Wisconsin. It's not from the Fuze and Booster area.

It is reported that the Three Blind Mice are **not** blind, 'cause they sure pick a pretty girl's desk to nest in. It's a scream, really!

Lila Williams, Bldg. 8-8, is journeying to St. Louis, November 28th to visit her boy friend. It is suspected that wedding bells will ring.

Group 8 has started a reducing school. Nine girls started an 18-day diet. The entrance fee is $1.00. The girl losing the most weight receiving first prize of $5.00, and the runner-up receiving second prize of $4.00. The schedule, according to latest reports, has been called off because of Thanksgiving week.

Eddie Foley believes that alarm clocks just don't ring loudly enough.

Detonator Group 9

Group 9 girls certainly are enjoying their new change house into which they recently moved.

The girls of Group 9 were invited over to **Nellie Cairns'** house to pick the bones of her Thanksgiving turkey.

Luella Williams' friends wish her a speedy recovery from her illness, and hope she will soon be back to work.

Bessie Bumgarner said she couldn't duck quick enough—sooo —the black eye.

Wilma Heminover's new theme song is "Praise The Lord and Pass The Ammunition."

It is reported here that **W. Zukowski** has *enlisted in the Navy* and is expected to leave soon.

First Baby in Residence Area

I'm the Whaley's first baby and the residence Area's first baby. My name is **John William**, and I arrived at Silver Cross Hospital in Joliet on November 14 at 5:30 P. M. I weighed five pounds, eight and three-fourth ounces, and I have blonde hair, and blue eyes.

Mother is fine and Daddy survived too.

My Mother wants me to thank all the EOP friends who called at the hospital. The flowers were pretty, too. I'd like to thank you for the lovely gifts and good wishes you brought me. I think Johnny Walker, Uncle Tommy, and Uncle George are **my best** Press Agents. A baby as small as I am is lucky to have so many nice clothes, toys, blankets and accessories.

I'm here now, come and let me say hello to you.

GENERAL'S STAFF CAR is shown as it appeared after the Wheeler Field bombing of December 7, 1941.

☆ ☆ ☆ **What's a Pound of Meat?** ☆ ☆ ☆

Bomb Loaders Of 3-A to Give Dance Dec. 12

Raffles, Bingo and Door Prizes Also Will Be Featured

December is the month for all EOP employees to keep their shoes and spirits in good dancing condition. Added to the list of merriment is The Bomb Loaders' Frolic given by Group 3-A at the Recreation Building Saturday, December 12, from 9 until 1 o'clock.

Colby Erikson, Group 3-A and member of the Employees' Activities Committee, says that the frolic will have more than meets the dancing foot. There will be such goings-on as raffles, bingo, door prizes and cider plus the doughnuts. Don't plan the Sunday dinners in advance because, if you have a small piece of change and a big piece of luck, you might walk off with one of the turkeys which will be raffled.

Eight committees are hard at work to make the frolic a real Group 3-A success. Heads of the committees are: Tickets, **Jim Snedden**; entertainment, **Jim Hendershott**; transportation, **Bob Walsh**; decorations, **"Red" Buell**; advertising, **Amy Losby**; bingo and raffle, **Jack Carrol**; prizes, **Bob McEvoy**, and refreshments, **Ethel McCann.** Music for the dancers will be played by the EOP orchestra. Tickets are 50 cents each and can be purchased at the Recreation Building.

A week's respite is granted for all heel blisters to heal and then the fun starts all over again at the beautiful Snow Dance which will be given by the Recreation Department December 19.

War Bond Ownership Certificates Available

The Controller's Department has purchased a supply of War Bond ownership record certificates and they will be distributed to EOP employees by the Timekeeping Department. An owner can enter each bond as purchased in the record and will show date of purchase, number, maturity date and maturity value, which will be of help in case any bonds are lost.

Guards

GENE RYAN
Correspondent

Capt. Thomas Murphy and **Capt. William Maskel** have entrained for Burlington, Ia., to attend the Instructor Training School for Plant Guards. The purpose of this school, in part, is to train key plant officers in order that they may assist in the training of all plant guards in their respective plants. They expect to be gone for a week.

There has been considerable confusion around the Guard House of late, mostly because of change in titles. The supervising sergeants are now titled captains, and the sergeants are lieutenants. It will take some time to become adjusted to the new titles, in fact there have been reprimands already. For all outsiders there will be no excuse, as the captain and lieutenant bars are prominently displayed.

Guard Headquarters has received word that former **Sgt. Johnny Burke** is now stationed at Camp Claibourne, La. He may visit here soon.

Word has been received from former **Guard Michael "Mickey" Gorman,** who is now stationed at Fort Riley, Kansas, at a MP training school. Mickey is anxious to receive *The Bomb-Shell*, and it is hoped this one reaches him.

Former Guard House timekeeper **Larry McCann** is now stationed with the 130th Infantry at Fort Lewis, Washington.

Sympathy is extended to the following guards who lost members of their families during the past week: **Vernia Boatright, Charles Horn, Ray Butler** and **Joseph Hall.**

Groups 8-9

Wilbert Curl is anticipating a two-weeks vacation trip in Michigan.

Harry Ross is a happy gentleman, as he plans to move to Joliet within the next ten days.

Corp. Philip Oberg now sells his eggs with the following label: "Eat at your own risk." This is the result of that terrible catastrophe out West last week.

Corp. Cecil Johnson, Group 3-A, is experimenting with facial creams since he was marred up last week. The boys wonder who is paying the luxury tax.

Corp. Eugene Ryan enjoyed his first Big Nine football game watching Indiana triumph over Purdue, 20 to 0. Gene had choice seats at the Ross-Ade Stadium, through the courtesy of his cousin. They were on the one-yard line.

Group 60, Front Gate

Harlan Arens and **George Sweeney** at the main gate have vowed to make their shoes last till Uncle Sam fits them out in his latest. From last reports it can truthfully be said both boys are really on their feet. Donations are being accepted.

James Touhey, who drives nightly into Chicago, was forced to stop at his favorite restaurant one night last week because of the fog. Things were seen in a different light, he claims, when he emerged.

Lest it be forgotten, the dramatic talents exhibited by **Earl Ayers** on his recent visit to Joliet should be mentioned.

Murray Livingston has been seen smoking cigars lately. Speculation has arisen as to how many shoats were sold.

Frank Spesia has fully recovered from his shopping ordeal.

Corp. Joe Kelly, Group 60, has been seen at a certain place on Cass Street. The boys wonder what the attraction is.

Donald "Killer" Kane, guard of Personnel fame, expects to cure his colds one of these days by secluding himself in the photographer's developing room and turning on the steam, just like a Turkish bath.

Words from Women Guards

Twenty-one women guards have been added to the department. They are sincerely welcomed and it is hoped they will be happy in their new work.

Birthday congratulations are extended to **Helen Dillon, Villa Eggleston** and **Lieut. Eveanna Castle.**

Zelma Kinard, Mary Bennewitz, Mayona Nelson and **Pauline Morrow** have been transferred into Headquarters as drivers.

Corp. Billie Taft has been appointed secretary to **Capt. Gladys Armstrong.**

Mrs. Mabel Graham left the department because of ill health.

Laughter and tears mingled last November 19, when the policewomen entertained at a tea in honor of **Corp. Rachel Morehead.** Mrs. Morehead has returned to her home.

Group 3-A

F. G. TAMBLYN
Correspondent

The office of Group 3A has been pleased to receive letters from several of the boys who have left this Group for the armed forces. **Edward Peterson** writes from Miami, Florida, that army life is swell. **Charles Hubert** writes from Washington, **Joe Postula** from California, **George Turner** from Texas, **Eugene Johnson** from Colorado, **John Rossi** from Georgia, and **Frank Waters** from Texas. All say they received *"The Bomb-Shell"* and enjoy reading it. All are always glad to hear from and interested to know how the boys are doing in the armed forces.

Dean Harrison, well-known Moskovie duck hunter, had some unusual sport during this season. After an early cup of coffee, he rowed downstream and across the river where he had sighted what he thought to be a flock of mallards. With great stealth he crept up on the unsuspecting prey and let fly with both barrels. Followed an interlude over which is drawn a curtain because of censorship. Dean is now studying a catalog to learn the difference between mallards and decoys.

The boys from 16A would like to know if **A. C. Jones** knows any other song besides "I got spurs that jingle." A little variety would help a lot.

Emory Akeman is assured of an endowment now that he has purchased the controlling interest in the Oyster Cracker Farm.

Inspector **Jack Carroll** has been telling newlywed **Robert Manning** how to cook chili. "Cook the beans first, Bob. And if you can't get red beans, use peas." Some cook.

Julius Nawcot is taking a lot of kidding about being a violin player. When asked why he gave it up, he replied, "Did you ever see a violinist without any hair."

Due to the regulation forbidding the use of hairpins on the line, **Flossie Marshall** suggests that clothes-pins be substituted.

The office force benefitted when the girls in 20-A had a pot-luck dinner last week. Plates of good things to eat were sent over to the men in the office.

Utilities

Transportation Tales
By George O'Reilly

The Transportation Department in general is looking forward to the next "Fellowship Meeting" to be held December 3. **Supt. E. J. Egan** is assistant chairman of the affair and promises that it will be the best meeting ever held.

Ernie Raunser went hunting last week, as did many others, but it seems that Ernie either forgot to load his gun or the birds gave him the *bird*. The final score, two sore feet, a sore back and, of course, no birds.

It was a surprise the other day to meet an old pal, **"Wiggles" Waldvogel,** walking through the farm. He is in the Marines, stationed in Idaho. Says he gets every copy of *The-Bomb-Shell* and really enjoys reading it.

The office force spent a grand evening at **Andy Walter's** home playing cards and partaking of some wonderful food and, of course, other refreshments. It was discovered that Andy plays best on his own grounds, the result being that every one but he admitted losing a little change.

Alberta Delaney spent last week-end in Rockford.

Machine Shop Messages
By Marie Studer

Clyde Hunter is an inquisitive sort of a guy. He's always trying to *find out*.

The benedicts have a new member in **John Fassio.** Well, he can't be blamed. What with gas rationing and everything, that was the only solution for those long trips to Odell. The gang sends congratulations.

The most recent additions to Uncle Sam's armed forces from the Machine Shop are **Tom Koenig** and **Tony Schlais.** Those still here wish the boys the best of luck and hope they give 'em h——!

One of the younger members of the Machine Shop, **Assistant Draftsman Hank Schelling, Jr.,** has received his questionnaire. Hank insists it's the Navy for him. By the way, the boys want to know where he got that hat, perhaps he shouldn't wear any.

Radio Ramblings
By Kathryn Richardson

Merle A. Eberhart has forsaken his duties at the Radio Shop for a week and is enjoying a vacation.

When it comes to sharpshooters, **R. A. Brown** isn't bad. Two pheasants got in his way, it seems, but not for long. He killed the two birds with one stone (er, bullet is meant) and that's what you call saving ammunition.

Percy Miller is the owner of a new spaniel which he calls "Joly" because it comes from Joliet. He should have called it "Carpenter" because he took it to his home in Carpentersville and because it does little odd jobs.

Electrical Epitomes
By Ray Curtis

Members of the Line Department are wondering why **Ernest Johnston,** genial warehouseman, never buys any doughnuts for his family.

Si Peterson, vim and vigor boy, has taken unto himself a blonde wife and a vast improvement in his work is expected.

E. McKay, substation operator, announced that he will be "walking down the aisle" soon.

Pipe Shop
By Mary Wynne

It was noticed that **Ray Kral** is losing weight lately. If anyone knows the reason, he should divulge it. Liquid diets are wonderful things, *some* think. Anyone who does not value his life should ask Ray what *he* thinks.

Bill Sexton is driving in the area at a greatly reduced rate of speed. A phone call makes a lot of difference!

A new addition to the Pipe Shop is **Mary Wynne,** who takes the honor as being the first girl employed here. The boys have it figured that she might hit 95 pounds in weight.

Laundry Letters
By Bernadine Meister and "Dickie" Lieb

A welcome goes to **Robert R. Webber,** who recently joined the family at the Laundry.

Julia Ursettie is seen around home quite a bit since she missed the first telephone call from her husband, who is in the Navy.

Julia Fance sends her thanks to all those who expressed their sympathy when her father died.

The Laundry is now displaying a service flag with one star. **George Griffith** left November 12 for the armed forces.

Administrative

Welcomes are extended to **Jo Ann Comerford, Leona Hagen** and **Ethel Barman,** new additions to the Utilities Department. A farewell goes to **Leontine Loodeen,** who has returned to her home in Escanaba, Mich., and to **Nancy Sherwood,** who has joined her family in Arizona.

William T. Dunsmuir, 58 years old, New Lenox, an employee of the Utilities Department, died November 24 as the result of a heart attack suffered at his work at Forsythe Farm.

Roy Benson is moving from River Forest to one of the new Government houses in Wilmington about December 5.

Fire

STUART MOLONEY

FRANK J. SKOFF

Correspondents

For some unknown reason "Smokie" the Fox" was losing weight, and all were losing a lot of sleep over the pet. The mystery was solved when **Joe Vacarro** was seen taking the fox's meals to her (in his mouth).

Chief R. W. Mortenson's hunting trip was a great success—The safari wound up in the Wilmington meat market.

A barber shop quartette has been formed by **James Dickson, Ed Koren, Bill Bolton and Fred Habing.** Freddie holds the towel that people are always throwing in.

Tom Singer of the Paint Shop was found to be a lover of sweet music. The poet is now trying to whip up a pun about Singer and his yodelers.

The Department gives out high praise to **Fireman Louis Hildebrand** for his fine work in the sugar and coffee line.

The last edition of *The Bomb-Shell* mentioned that **Charles Crain, Len Jessen** and **Harry Crubaugh,** former firemen, took over Camp Grant. This terrific trio, augmented by **Bob Everhart,** now holds sway at Camp Siebert, Gadsden, Ala. The boys write that it is true what they say about Dixie, and promise to report about the Chinese situation when, as and if they get there.

Chief Mortenson was showing **Chief M. C. Baughman** his pencil display the other day. These two experienced collectors un-earthed a beautiful red and white specimen that added wonders to the appearance of the chief's office.

Well, here's one way to get many of the boys' names in the column—The following men are going to bother **R. T. Bassett** to sign their "C" card gasoline application for them: **George Rogina, Ed Dickens, Frank Pavlich, George Bexson, Don Trimmer, Howard Arnold, Bud Ochs, Mike Olson, Bill Hayes, Frank Hayes, Matt Froncek, Otto Engstrom** and **Bill Day.**

Here's another way. The following men are lots better looking than **Stu Moloney: Bill Day, Bob Tures, John McGee, Archie James, Walt Murphy, Hopper Combs, Tate Ehman, Roy Wright, Joe Drazy, "Bunny" Marek, Ermand Marco, Frank Ryan, George Learned, Jim Kerwin, Charlie Thompson, Herman Guyot, Max Reick, Jake Schuck,** "Smokie the Fox" and **Bob Connelly's** dog "Patsy."

Or still another way—The members listed here have asked for a raise at least 32 times: **Pat O'Donnell, Al Newman, Al Rediger, Lon Noland, George Hayes** and **Frank DuPuis.**

Now everyone is mentioned except **Al Schomas, Don Trainor, Bert Benson, Lloyd Rector, Ralph Batty, Laddy Lazar** and the gentlemen whose names are withheld for the next issue.

Last week the engagement of "Smokie" to Teddy Red-Top," recently imported from the wilds of Southern Illinois, was announced. Under the expert tutelage of **Capt. Frank Nolan,** this affair has rolled along until the two lovers are ready for the fatal step. Captain Nolan has agreed to officiate at the ceremonies, and linger on during the honeymoon. Cards of announcement will be sent out. The bridesmaids will include the four assistant fire chiefs, **Walter Lueder, Clifford Weiss, Charles Davis** and **Bill Riechert.**

Mr. Davis, **Virgil Hidlebaugh, Wayne Barber** and **Tom Billadeau** have collaborated on a 30 page booklet titled "Care of the Dog-House—and How to Escape It."

Some of the boys at Station 2 would like to know why the police stopped **Charles Jiskra** on U. S. 66. Was it for having his lights on bright, or because Charles was hurrying to get home, is the question. The rest of the boys at Station 2 are wondering if **Alvin Rediger** has found his boots yet.

A perfect dream shift would be for the following men to be grouped together at one station house, 24 hours a day for the duration, listed according to rank:

Chief—Clifford Weiss.
Chief Clerk—Tom Billadeau.
Lieutenant—Ernest Rasdall.
First Engineer—Charles Jiskra.
Assistant Engineer — Lon Noland.
First Nozzle Man—Alvin Rediger.
Assistant Nozzle Man — Robert Connelly.
First Hook-up Man—John Meyers.
Assistant Hook-up Man—Walter Hilgert.
First Axe Man—Frank Scoma.
Assistant Axe Man — Edward Carter.
Wrecking Crew: Pat Rodgers, Pop Hayes, Norm Lubes, Ralph Rausch, Jake Schuck, Tizzy Lish, The Three Stooges and Dracula.

Fire Inspection

Otto Mietz spent his vacation most delightfully, painting his house. . . . Have you tried that kind of chewing gum that **Frank Clark** carries? . . . **Steve Jarvis** has finally got that new home he was talking about for so long a time—now he works one shift at the plant and the other shift beautifying his new mansion.

"**Crash**" **Connelly,** Chicago's best football picker, claimed a foul when one of the teams he bet on failed to play (it was a West Coast affair and he thinks the fourth interceptor command was behind the whole thing). Now everybody says he's of *welch* blood. Still he did all right on the other games, he didn't lose as much as last week (because he bet less, the smarty).

That puzzled man, **Robert Debolt,** is still trying to figure out what they mean by saying he's the type of fellow that chases people up trees.

Gas rationing really has **Harold Guderjan** down, for he's "barreling" over 150 miles per day. . . . **Frank George** is back on the job after spending some weeks in the hospital; now he's going on a strict diet. . . . **Kenneth Curry** of Curry & Hart, Ltd., did all right on the football games last week. That's what comes of *not* believing the experts in the newspapers.

William Davis is still trying to convince the rest of the department that he knows the difference between bowling and billiards. So far the department is skeptical. . . . **James Small** bet on Illinois against Great Lakes—now he wishes he hadn't. . . . **Jeemy Dillree** no longer bets on football games since Notre Dame didn't do right by him a couple of weeks ago (serves him right—he never went to N. D.).

A new successor is being suggested for **Rudolph Valentino's** movie role in the person of **Frank "Beau Brummel" Scoma.** His only rival is **Frank "Hemingway" Nolan.**

Personnel

DARA PREW

Correspondent

Striving to get the most effective pictures of the entries from the Elwood Ordnance Plant for the title of "Miss Victory" for the Chicago area, **Loren Ross** was well concealed behind a heavy satin curtain on the Aragon stage when one of the band members, namely **Harry Kool,** swept the drape away. There was Mr. Ross standing on a wooden crate so that he could get in the most advantageous position while **Robert Wilhelmi** mounted guard over the supplies. The apparent calm with which he descended from his lofty pedestal was belied by the rosy flush which started upward from his coat collar and didn't stop until it reached the roots of his hair. P. S.: He got the pictures!

Investigator **Francis Gonce** started his return trip to Kentucky last Saturday. After a short visit with his family, Mr. Gonce will enter the armed forces. "Lambchop" Gonce, as he was known in the Personnel Building, was still wearing his hat "on the corner" of his head and teasing everyone he met when last seen. Good luck is wished for a gentleman from the South.

Trust **Kathryn Smith** to find the unusual. Missing the man "who comes around on Thursday with the long slips of green paper," she made telephone calls over a good portion of the area trying to find out when and how she could catch up with her check. Finally at the end of the day, the hot tip came. The timekeeper was in the Guard House. A good-looking guard ushered her into the building and then left her. Finding herself alone in the aisles between the lockers, she hurriedly made her exit through the nearest door.

Fred Cadwallader has been troubled with a persistent cold which affects his speaking voice. In fact, he can hardly squeak. Stubbornly refusing to give in to his ailment, he was trying to talk when someone advised him to save his voice. " 'Tain't worth saving," was his cryptic comment.

Many have heard about persons falling out of bed or trees, but when a grown woman like **Peg Collins** falls out of church it's time that an investigation is started. Peg insists that the step was only three or four inches high and that she merely tripped. She's done a lot of suffering for that one little *mis-step.*

It was in one of the Kankakee stores that the elevator stuck just about half way between the ceiling and the floor. Who were the three perched up there but **Marcella Burnham, Jean Hershey** and **Selma Brown.** Even this would not have been so remarkable if the attendant hadn't sought to free them from their temporary prison. He brought a small stool and placed it with one leg almost dangling over the shaft. Between the boy on the floor and the girls above him the position was finally righted and the escape began. Bravest of the trio, Marcella timidly began the ascent. As her feet barely touched the stool it fell into kindling wood. Selma and Jean retreated far back into the corner and waited until the fuse was replaced. Well, what if people in the store did laugh? They felt like monkeys in a cage anyway.

Then there was **Marge Bittles** who doubled for the cleaning girl on her day off, but **Leona Hagen** was jealous and now they take turns in "tidying up."

For weeks the force in the Fingerprint and Photograph Department has been working on a new simplified form of classification for the thousands of fingerprint cards. Small index cards had been filed alphabetically in one large drawer at the top of one file. During the humid weather this and the other drawers began to swell. To relieve the difficulty in opening it, the carpenters were called. Everyone gave a sigh of relief at the sight of the men when they came to plane off the sides; the days of pulling and tugging at those files were to be ended. Soon that sigh was changed to a gasp of horror. The complete drawer on which they had been laboring, no longer complete, lay on its side on the floor and cards were scattered all about. The re-alphabetizing has begun, and the file drawers don't stick.

Florence Dunterman is threatening to hang out a sign for cooking with a specialty of Thanksgiving dinners. She started out preparing the holiday dinner for her immediate family and ended with about ten guests. What's more, they all want to come back again.

From one of the letters addressed to "Carmel Sneed" in the Personnel Department "c/o Sanderman and Proctor," it is learned that this is the "Elmwood Orderly Plant."

BOMB DAMAGE to the Army airfield is shown here after the December 7 attack on Hawaii by the Japs. *—U.S. Army Signal Corps Photo*

U. S. PURSUIT SHIP looked like this after the Jap bombing of Hickam Field, Hawaii, December 7, 1941. *—U.S. Army Signal Corps Photo*

GROUP 3

NORBERT McLUCKIE
Correspondent

If you all remember, this column in the last issue of *The Bomb-Shell* contained numerous articles which were boasts from expert hunters as to what they were all going to do to the wild game, etc., but for this issue there was not a single one who was willing to report the results of his hunting expeditions. Too bad, but if someone has something to offer, he should speak now or forever hold his peace.

Nor, has anyone heard of **Supt. H. D. Dougherty** eating any of the pheasants he went after.

On a recent hunting trip, **Asst. Supt. W. G. Reed** walked so many miles he and his companions had to carry one of the dogs back to the car. The dog was older than Mr. Reed, 'tis certain.

Wayne Munyon, fleet - footed progress clerk, is now spending a two-week leave on a business trip through the northwestern states.

Gordon Schaeffer is buying Bermuda onions for his boss. The boys in Building 10 are curious as to the results.

Joe Hohn seems to be getting adjusted to married life. He is now working the "graveyard shift."

The marriage of **Joseph Ballantine**, Building 16, and **Charlotte Wielock**, Fuse and Booster area, was announced for November 22. Although Jay is a current favorite of Uncle Sam's selective service, the boys sincerely hope he will enjoy a genuine and thorough taste of wedded bliss.

Oddities

Corp. Edward Oetter was seen shining the brass on **Guard John Feeney's** Sam Brown belt. **Woody Koerner** was observed working for his "father."

Some time ago, **John Boucher**, Building 4, noticed that **Jack Homel**, his assistant, seemed very pensive and somewhat melancholy as he surveyed his domain. On being questioned as to the cause of his grief, he wiped his eyes on the cuff of his coveralls and said, "It must be something like homesickness, because every time I look into Bay 2 and see Jonesy and the other inmates, I feel like I'm back on the old job again."

Ray Whalen, Building 10, is passing out cigars. He said, "It's a boy."

Robert Bolte has been appointed foreman of Building 3 to succeed **William "Tiny" Kautz**, who left for the armed forces. The gang sends good luck wishes.

Hats are doffed to **Lee Doyle** and **Charles Brewer**, two grand old gentlemen from Channahon. Rain or shine, they are always on the job.

The workers in Building 3 are wondering if **Herman Winkler** is going to get married before Uncle Sam gets him first.

Guess some of what was said before has to be taken back. Results of two hunting expeditions just came in—**Leo Wagner** did quite well, so he says. He got the limit, but some of the boys say that some farmer's tame ducks might be missing. **Ed Doyle** said he also had very good luck. Ed always has been known to get what he goes after.

A member of the Safety Department said, "Monkey business is a business which has no business in any business; particularly in the Ordnance business."

Roy C. Sosnoski, who formerly worked in Building 16, is now studying to be a flying cadet at Kelly Field, Texas.

William Maschner is studying to be an aerial gunner, with a rating of staff sergeant. Bill spent some time in the Army before working here, which should assure him quick success.

Raymond Rivard was scheduled to leave for the armed forces December 3. Ray was the first employee to come to Group 3. He has worked as secretary to the superintendent since his arrival here in July, 1941, having worked for both Mr. Dougherty and **J. J. Fitzpatrick**, who is now at Group 3-A.

Other employees who have left for the armed forces, and for whom the best of luck is wished are: **Lawrence Oakley, Donald Johnson, Daniel Radakovich, Francis Arnold, Jerry Jaskowiak, Ralph Kapchinske** and **Erwin Suntken.** Apologies are offered to those whose names are omitted.

ARMY PLANES are shown at bomber airfield after bombing of Hickam Field, Hawaii, December 7, 1941.

Ordnance Inspection

GERALDINE M. WARD
Correspondent

William H. Peterson, assistant chief inspector, attended a committee meeting at Milwaukee, Wis., November 19 and 20. Mr. Peterson was very quiet when inquiries were made regarding the trip. Remember the old saying, "still water runs deep?"

Carl Anker will now be in a position to make the second installment toward the purchase of furniture for that new little home intended for his future bride, **Eloise O'Quinn**, Little Rock, Ark. Being an Ohio alumnus, he naturally placed his bets on that particular team and his assets were increased $5.50. Of course Ohio was playing an exceptionally good team, Michigan, and Carl was concerned during the entire game. The majority of Carl's friends have left the rank of bachelors and he, too, is seriously thinking of joining the benedicts.

Lois Martin was the recipient of a beautiful compact containing a miniature watch from her fiance who is a lieutenant in the armed service at Panama.

Linnetta Parry spent Thanksgiving with her family in Champaign, Ill.

Jerry Shirtino certainly gave his conception of "Kiss the Girls Good-bye" a good demonstration when he was transferred to a Sanderson & Porter department. using a few Army inspection girls as his victims. They didn't seem to object either.

Helen Boula is the envy of the Inspection Department. It isn't every girl who can find a man who will buy an orchid these days—*or a man!*

Causes for wonder . . . What **Edward Nemanich** said to make **Lois Martin** blush the other day—if **Mrs. Stanley L. Eisler** knows how many candy bars her hubby eats on the sly—why **Mrs. Clara Brennon** was blushing so the other morning — why **Catherine "Tommy" Tomlianovich** was stranded in Peoria — why **Betty Ross** is wearing her heart on her sweater—about the patch **Delores (Penny) Dagon** wore on her face for a week (she says she was struck with a ping pong ball) — why **Linnetta Parry** was hitch-hiking last week —why **Kermit Long** looks sad?

The pleasing personalities of **Ernestine Thompson** and **Rosemary Haley**, who are no longer here, are missed. Ernestine had as her guests for dinner November 24 **Ethel Dirker**, Miss Boula and **Bernice Shroba.** The girls report their hostess an excellent cook and a lovely housekeeper. Ethel and Helen stayed for the night and incidentally Ethel received a 7 a. m. telephone call from Texas. They say she was quite elated and got to the telephone in one second flat.

Most have read Shakespeare's "Romeo and Juliet," but few have been informed of a greater romance which is progressing very nicely. Recently **Roy Scherer** was seen getting into a Cadillac with a beautiful brunette. The following day he was unable to locate his identification pass and contributed the loss to his inability to think clearly. He couldn't recall whether he had left it home in another suit of clothing or just what had happened. He was doing considerable worrying when the mail arrived and enclosed in a perfumed envelope was Roy's pass. It was not until then that he actually relaxed.

A class of 37 girl inspectors completed a training course in Ordnance inspection of shells, anti-tank mines and bombs November 27. The class was conducted by **Kermit Long**, assistant chief inspector, operations, Division 1. **Ann Jansky**, formerly of Group 5 and a member of this class, is quite an artist, according to Mr. Long, who said that she drew an excellent sketch of a bomb on the blackboard.

UNEXPLODED BOMB, 12 by 43 inches, which fell from Jap plane brought down by fire from U. S. guns on Oahu, is shown here.
—U. S. Army Signal Corps Photo

Thanks go to **Robert Irwin**, inspector, who made good his promise. He originally planed a duck dinner for a group of friends. However, weather conditions prevented him from obtaining the duck (he's a hunter by the way). During the pheasant season he shot, yes *shot* several pheasants. His contribution provided delicious sandwiches for the major portion of the Ordnance Inspection Office and a few special friends in certain other offices. For the information of a certain "doubting Thomas," the pheasant had buck-shot in it, as one of the girls almost lost a tooth.

Lt. M. G. Brandon, chief, Stores and Transportation, and **Capt. J. S. Gates**, Kankakee Ordnance Works, planned an early Sunday morning hunting trip during the pheasant season. So that they could get away before sun-up, Lieutenant Brandon invited Captain Gates to spend the night with him at the Guest House. He knew that **Lt. Dale A. Yeoman** was dating his Irish lassie from the West Side of Joliet and would arrive home in the "*wee*" hours, so was very generous in offering Captain Gates the use of Lieutenant Yeoman's bed. The boys set the alarm for 4 a. m. Lieutenant Yeoman arrived home around 3 a. m. and discovered his bed occupied by the captain. Being a gentleman he did not arouse the occupant, but sat up the remainder of the night. (*Idleness is the devil's workshop*). The boys did not awaken at 4 a. m. as the alarm failed to ring, not because it wasn't set, but due to certain developments that occurred later. The boys also being gentlemen made no accusations despite the fact they were several hours late on their trip thereby inconveniencing the group, who were awaiting with their hunting dogs, at Wilmington.

An honor roll, bearing 42 names, graces the wall of the Ordnance Inspection Office. The list comprises former employees of the Ordnance Inspection Department who have entered the Army, Navy, Marine Corps, Air Corps, and last, but not least, **Lorene Heckman** and **Edna L. Guernsey**, who have joined the WAACS.

William A. Van Houten, Gage Laboratory, is mighty proud of his Pontiac. He claims most of his evenings are spent keeping it in condition. He does not frequent The Hitching Post in Joliet, he states, as some of his co-workers report. However, he usually dines at the Eden Restaurant where he insists the food is excellent, also the *service!*

On Friday morning, November 20, 5:15 to be exact, a 7 pound, 9 ounce baby girl made her debut into the world. Her proud parents are **Mr. and Mrs. Richard Schuba.** Mr. Schuba is an inspector in Group 3.

Katherine Etchison became Mrs. **Joseph Baron** November 19 and surprised all of her co-workers at Group 7. She says that she didn't decide to take the step until she was on the way home from work the night before.

The Ordnance Inspectors at Group 7 seem to be restless with all the recent comings and goings. Both **Martha Stipanovich** and **Naomi Eddings** have left, much to **W. J. Proudley's** chagrin. Now **Millie Stutz**, office gal, is contemplating a transfer to Group 5. On the other hand, the services of **Ray Lucas** have been obtained at last until the Army calls.

Bob Harbison has been transferred to the Chemical Laboratory.

Co-operation Given Recreation Agencies

The Recreation Department is co-operating with agencies which are operating in the communities where many EOP employees live and hopes soon to have programs of leisure time activities going in some central spot in these communities.

In Wilmington, employees are urged to visit the new Center just opened by USO. It is set up for your use. You will find games, library, writing facilities, kitchen, shower baths. **Anne Lindsay** is in charge of girls' and women's work and **Harry Mantle** in charge of men's work. Every Monday the Wilmington gymnasium is open for your use. A special dinner will be given for men in the Methodist Church December 8. The speaker will be **Franklin H. Brown**, who for 18 years was athletic director in Japan.

Girls! If you are not in one of the calisthenics classes yet, be sure to get in as soon as possible. Two classes are held each Friday; one at 4:15 and one at 5:30. This gives you plenty of time to participate in other activities in the Recreation Hall before 8 o'clock.

WILBUR GALBRAITH

Correspondents

For a real motoring thrill, it is suggested that you take a ride in **Kenneth "Curly" Hodgson's** cast iron vibrator. Due to an oversized wheel and tire the passengers shake and roll about as if they were on an ocean liner.

Charlie Haines has finally made the grade. It seems he tried in vain to find a place to live in Wilmington, but was unsuccessful until just the other day. Quite a wait, 18 long months.

Louie Klinger has moved to Braidwood, across the street from **Harold "Owl" Jackson**, and you can be sure things will start to pop around Braidwood.

Sympathy is extended to **Vince Farrell**, whose father died recently.

Joe Connors is going steady again. Some one called Joe, "Tommy Manville," and Joe took after the fellow with a club.

Anton "Moose" Miller and **Dominic "Bingo" Magnani** told **Otto Koch** that the draft didn't get them, but tire and gas rationing did. They say "Moose" was one of the best tinsmiths ever to handle a pair of tin snips. Otto is in the dog house again. It seems he went pheasant hunting and didn't get home until 8 p. m., which made his wife angry, as Otto had promised to take her to the show at 7 p. m.

Help! Help! **Glenn Bohn** shot the back window out of **Wee Willie Zauratsky's** car and Willie is suing in a local court for the damages.

John Johnson is reported to be a path hunter and spends most of his time hunting paths, so briars, weeds and mud won't trouble him while hunting.

Kenny Sandvall has a sign in his window reading "free moving pictures tonight." Kenny was very embarrassed to find the projector bulb had blown out.

Bill Malone was bragging to **Jersey Klegman** about his over and under gun. The reason, says Jersey, is when hunting pheasants, Bill either shoots over or under the birds.

It is reported that **Gene Hunt** is selling the same chances over and over again for an old broken down turkey that was raffled off last year.

Sam Hoffman is supposed to have received an ultimatum from **Bill Kirvan** that he should work *or else*. Sam can't figure out the *or else* part of it.

Bill Stanley and a friend celebrated his induction into the Army by a weekend in Chicago and topped it off with the Notre Dame-Northwestern game at South Bend. Bill said he had a corkin' good time.

All the boys are congratulating **Chuck Pierce** and thanking him for the Corona-Coronas (50 cent cigars), that he passed out last week in honor of his new daughter.

James Boggetto expects to answer Uncle Sam's call any day now.

Andy Grandpre's new nickname is "Put." The reason, **Harold Sonday** explains, is everything Andy does stays *put*.

Bill O'Connor, they say, is just crazy about *sour milk* and will go out of his way to get some.

Cy Neverman and **Lawrence Crawford** are in a hot race to see who can develop the biggest second front.

Jimmy Paul's lunch is big enough to supply most of Group 2.

Leonard Frieling and **Tom Reichert** will soon be passing out the cigars. Both hope the additions will be boys.

When **Bob Rutherford** started to work here a few months ago it was thought he was working during his summer vacation and would return to school in September. It was learned Bob was a little older than was thought and he had been graduated from high school. He walked the middle aisle recently, so even if he does look like a school boy he is a married man.

Meet the Kankakee Terror! He is none other than **Art Preston**, who claims he eats rock candy and can lick his weight in postage stamps.

Bob Murphy is leaving for the Army about December 7 and the best wishes of all of Murphy's Boys will go with him.

Ed Egan, foreman of Building 12, walked up to one of his new men the other day noticing his shoes and asked the man if they were not too big for him. The man answered, "Oh, no, you see, my job is to push the boxes down the conveyor and I must have good traction." When asked his name the man answered, **James "Whirlaway" Adams.**

Don Carlson has been showing up with that tattle tale gray—nite club complexion. Don was told if he kept company with **Bob McGuire** and didn't stop making so many trips to the Nurses Home he would get to look like that.

It comes out—**Ed Keenan** did not buy his wife a rolling pin and also that he did burn the two that were given her as presents. Ed said if his wife should ever go to work on his head with one, he wouldn't be able to get his new hat on.

If **Bob Schmitz** asks his wife to believe the story about a business trip, he should remember that it is an old story and doesn't always work.

A hearty welcome is extended to **Stu Marlette** who has rejoined the forces of Group 2. Congratulations on his recent marriage are also sent.

Fred Mogel's pet peve is to answer the phone at Building 4, only to have someone greet him with, is **Bill Galbraith** there?

Emil Knutson of Building 12 would like to sell a small table radio. Just after he purchased this new set a week ago, **George Williams** offered to sell him a kerosene radio. This set is quite the thing. Just think, a radio which will play music and give heat at the same time. On the more expensive sets a person can use ethyl gasolene in place of kerosene and get foreign stations. Emil wants to get one of these, but he must sell his other radio first.

William "Cat" Bell is still waiting for the game promised him by Jersey Klegman. "Cat" said that all of these hunters have the same story, namely, "Gee you should have seen the beautiful bird and he was this big, but as luck would have it he was out of gun range."

JACK BARRY

Correspondent

Now that the girls are all fitted out with new service shoes, there is curiosity to know who is the real Cinderella of the loading lines. At the moment, there are **Regina Phillips** and **Evelyn Knowles**, each of whom wears size 3½, and finds them too large.

There've been a lot of voluntary contributors to this column who wished to tell about their wonderful prowess in duck and pheasant shooting. Shucks, that's common in these parts. If one of the lads ever brought this reporter a portion of one of these birds, that *would* be news.

It's been said, too, that **Helen Melosevich** is the best cook in the group, but suppose this reporter will never know for sure.

WOUNDED at Pearl Harbor, Ernest Freeman was discharged from the 122nd Field Artillery and is now an explosives operator in Group 3, still carrying on with the war program. He said there is lots of water in the Pacific and there was that much blood at Pearl Harbor.

George Kennedy won his bets from all comers. Yes, you've guessed it; it's a boy.

It's said that **Roy Gabriel**, maintenance man, is going to send back to Florida for a lot of alligators for his friends in the group at Christmas-tide.

Among the latest contingent to leave for the armed forces are **Byrl Matheny**, who has taken up a military career at Scott Field; **Arthur Anderson**, who left for the Army December 1, and **Roy W. Noye**, who left for temporary duty at Fort Sheridan November 26. Roy passed an examination which qualified him for training as an ordnance cadet and one of these days he will be out there where he can see and appreciate the quality of ammunition passed out here. . . . Praise the Lord . . .

Donald Hayes, mechanic, has gone to the Army with best wishes and **Tex Fast**, conductor, has gone to Moberley, Mo., on a delayed honeymoon, but he is coming back.

Ordnance

HELEN McGINNIS

Correspondent

The Ordnance Department regrets to announce the departure from the folds of **Dottie and Ollie Olson**. . . . Yep, they are hieing themselves to the East . . . back to Brooklyn. . . . They'll sure be missed around here.

Bernece Carlson fought the old demon "flu" for a few days and is now back on the job again.

Lt. Carl Beilharz now answers to "Uncle" . . . he sure took that job of becoming an avuncular seriously.

Wonder how the Divisional Inspection office gets along without **Gerry Ward's** cookies.

Anne Kakara, **Lee Sopher** and **Jo Kush** took in the performance of "Porgy and Bess" last week . . . from all reports a good time was had.

Ray Sayers of the Executive Office had quite a time the other morning when the gals had him drawing names for the Christmas grab bag. . . . It's a good thing he's a tall guy.

Ray Marquardt and **Claire Shola** have that look in their eyes.

Marie Maren of Mail and Record is sure burning up the mail these days, ever since **Jimmy Veatch** has joined the Army . . . by the way, he's down Florida way—as is **Norm Long**. . . . One hears that the only bathing beauties on the beach now are of the male species.

The juke box in the Recreation Building sure gets a play these noons . . . you can get yourself a jam session most any time . . . sure helps to pep things up.

Aubrey Brockhouse and his pal, **Don Hubbard**, are pretty foxy at that game of ping pong. . . . 'Course, don't ask them to bet on it.

Ruby Mosteller, the nice gal from Tennessee, formerly of Personnel, has decided to make a full time job of housekeeping.

Wonder why **Marion Yeager** has mentioned the idea of taking up knitting???

Betty Jane Jensen was all prepared for the rainy season . . . raincoat and all, looked like she was enjoying her walk, too.

Seems funny not to see **Bob Kennedy** and **Betty Wilhelmi** struttin' down the hall these days. . . . Bob is due to join the Army soon.

Gert Lindemann has joined her husband . . . he's stationed at the Navy Base at Glen Ellyn, Ill.

Through the trap door . . . or . . . who threw that rope? . . . **Jim Pavel** of Stores and Transportation should be called "Smilin' Jim" . . . his secretary, **Charlotte Matheny**, sure looks spic and span all the time. . . . She should give out a book of rules for that well-groomed look. . . . Wonder if **Beverly Bell** is still in the groove with the Du Pont Boy?? . . . haven't heard lately. . . . **Marge Kangley's** favorite song is *not* "Beautiful Dreamer." . . . **Dick Dean** does not think blondes are preferable to brunettes . . . in fact, he likes the titian haired damsels. . . . **Carl Anker**, the decorating demon, will write a book soon . . . yep, the title—something like "Why I Like Small Girls" . . . or words to that effect. . . . Get **Frank Floryan** from Richards Farm to expound his ambitions . . . they are really good. . . . **John Phelan, Jr.**, has moved into the offices formerly occupied by the Divisional Inspectors.

Have you ever noticed **Marjorie Glover's smile???** . . . She's the cute little girl in Auditing. . . . Noticed **Betty Wallace** and **Ethel Dirker** having a *tete-a-tete in* Safety and Security?? . . . Probably about Christmas shopping—that's what seems to be bothering everyone lately?? . . . That and Income Tax, oh well????? . . . **Edna Eaton** of Personnel has returned after a session with a cold. . . . Does anyone know what happened to the motorcycle that **Ann Melovic** used to ride??

Mary Lou Schwartz has a terrible time keeping up with her sister, **Gerry Stephens**. . . . Bowling is the game and it's quite a rivalry . . . if anyone is interested . . . the gang bowls on Wednesday nights at Jahneke's. . . . 'Course some people have another name for it . . . if you don't believe it ask **Claire Donoghue's** father??????

Walter Murphy has joined the Navy and expects to leave shortly.

THE EMPLOYEES' ACTIVITY COMMITTEE

of the

RECREATION DEPARTMENT

extends to all employees of Elwood Ordnance Plant an invitation to attend a

Snow Dance

Saturday, December 19, in the Recreation Hall. The EOP Band will provide the music for dancing from 9:00 P. M. until 1:00 A. M. Admission—55c per person, tax included. Your family and friends are invited.

Inert Storage

CHARLES MANN

WILLIAM DENVER
Correspondents

The boys at Group 27 understand that **Ben Sloan** is trying to get a patent on a windshield wiper. The only drawback is that it caused Ben to go barefoot one day last week—it takes two shoe laces to keep the invention together.

Group 27 went one better . . . they ran a Mr. Victory contest. **Jay Hancock** defeated **"Lefty" McGraw** for the title. Mr. McGraw missed victory by one vote.

Ray Gate is getting his car overhauled by an expert mechanic and will be ready (the car) to run next spring.

At North Inert **LaVern Lyons** discarded his brown cap and replaced it with a bright yellow hunting cap matched with snow white gloves and is all set for winter weather.

Chester A. Abell calls **Ross A. Miller** grandpa and in the presence of Mr. Shaw, too.

E. F. Moore is welcomed as a new employee at Inert Storage.

Inert Storage men speak through the question of the week.

Question: How did you spend the Thanksgiving Holiday?

Mr. Ashworth: Enjoyed a full course dinner with relatives.

Mr. Cloyd: Our family did not celebrate it until the week-end with a fine dinner.

Mr. Zagor: Went hunting in the morning and home to dinner. In the afternoon I went to a theatre and in the evening to Chicago to enjoy a hockey game.

Mr. Baudino: I took my family to Chicago to enjoy dinner with my sister.

Mr. Spooner: I went to my home in Indiana for the first time in seven years.

The boys at North enjoyed a smoke on **Ray Hess** who was married November 6 to **Joyce Ferguson** at Kohoka, Mo.

John Wald cannot wait until each foreman belongs to the safety committee.

Safety rails have been installed at South Inert and safety posters have been placed in the buildings.

Thomas Dillon likes the new arrangement where he receives his wage check every week.

Fred Ford's mother is recovering from an illness.

Individual uniforms of corduroy in many colors can be ordered from the tailor, **Andrew Cherrie**. . . . It is not obligatory to wear them or any other at Inert, but the boys like this little number.

The Basketball team at Group 27 is at a standstill, having played no league games. Reports are that the War Bond raffle will come soon . . . some wish it were sooner.

Inspection

LORRAYNE OSTREM
Correspondent

Sam Mount and his girl friend have taken gas rationing seriously. It is reported that they bought a horse in partnership. The big question that bothers Sam is, which end does he own? After all, he wants to keep up his end of the transaction.

James Finnegan of Group 61 has a pair of hip boots for sale. The reason may be that Building 6 has been shut down for repairs.

Mrs. John Smith is extended many thanks for seeing to it that her husband returns Inspection Department pencils.

Little **Donelle Koenning** suggests that **Jim Glade** trade in the conventional *Rock-a-bye Baby* tune for *Hallelujah* in singing **Junior** to sleep. Her dad is nominated as the No. 1 Hunter of the Inspection Department.

Because **Norma Castle**, Group 8, spent Thanksgiving in Virginia, it is certain there must be a soldier attraction.

Phyllis Filetti is walking on air since she received the last letter from that certain someone in Colorado.

Did you notice the smiling face of **Florence Anton** while her soldier husband was home on a furlough?

Congratulations are sent to **Bud Picknell**, Group 6, who has joined the armed forces as first lieutenant.

Several of the girls from Group 9 spent the week-end in Chicago. The party included **Anita DuPuis, Lucille Boudreau, Velma Grills, Maxine Burris, Jeannette Cahan, Stephanie Bielac, Betty Meents, Marge McGuire** and **Jaunita Schulze.** They enjoyed, among other things, a lovely evening at the Aragon, where Betty and Marge showed the boys of the windy city the new "Detonator Hop."

Elmer Henning mentioned a very unusual experience he had some time ago. He said that while running to catch a bus he lost his uniform which he was wearing at the time. "Well," he said, borrowing a cigarette, "truth is stranger than fiction."

It would appear that **Herman Ascher** has decided that his present assignment is not so bad after all. As an inducement to trade jobs **Art Kidd** offered him a highly polished red apple (which it was rumored had been meant for another purpose), but there was no deal.

Arthur Kidd, Group 3, as a musician is rapidly becoming quite proficient on the "Eucalyptus." **Godfrey Herscher** after listening to some of his numbers said, "Words fail me, fantastic and unearthly, Lord help us."

Ira Pearson's nephew was inducted into the Army several days ago—Ira accompanied him to Chicago but hadn't returned when this was written. His friends hope he likes Africa.

WAR BONDS were presented to EOP's finalists by W. E. Canniff, manager, operations and engineering, November 30. Shown, left to right, are Maxine Enger, Erva Willford, Betty Jensen, Mary Danser, Betty Foster and Mr. Canniff. Dorothy Connors, out of town at the time, received her bond later.

EOP'S SIX FINALISTS the night of the "Miss Victory" ball are shown here, left to right: Mary Danser, Group 1; Betty Jensen, Group 1; Maxine Enger, Group 4; Betty Foster, Group 4; Dorothy Connors, Group 6; and Erva Willford, Utilities.

NARROWED TO THREE, Mary Hoffman (51), Western Electric, was finally chosen "Miss Victory"; Betty Foster (62), EOP; Margaret Helen Reed (86), Ammunition Container Corp., and John A. Malloy, executive editor of the Chicago Herald-American, who announced the winner and presented the bond, are also shown.

JOE MOTTA
Correspondent

"Cannonball" Sarti, alias **Joe Sarti**, reports to be having extreme difficulty with the FBI. As yet there seems to be some question as to whether Joe really was born.

Gene Telleson of the Timekeeping staff left for the Army November 14. He is now temporarily stationed at the Quantico Marine Base where he will study to be a Link—Trainor instructor.

Barney Beoletto, ace kettle operator at Building 4, traveled to Toluca during the Thanksgiving holidays—Barney reports his little "Bambinos" all welcomed dad home.

Harry Willis, foreman at Building 4, had a very successful hunting season. He claims to have bagged several rabbits and one white pheasant. Some say it was a white leghorn.

Charlie "Small Eye" Usewich attended the wedding of his niece, **Stella Mallanoski.** It was a Polish wedding with all the trimmings; ask Chadlie what is meant by trimmings.

Albert "Dink" Mattern's 11-months-old youngster is destined to be an aviator. Already he insists on eating air-mail stamps.

Mrs. Mary Plese is recovering from a major operation.

It would be nice if . . . everyone could pick football winners like **Marvin Friedmann** . . . **Larry Lahrman** went one week without an argument . . . Thanksgiving came every week . . . a secretary were available to **John Smith** . . . a desk, he could call his own, were owned by **Larry Holz** . . . **Harold Rouff** could shoot something besides hedge balls . . . an explanation were given by **William Brown** of a report to the superintendent's office he had the time as 14:25 p. m. . . . a car dealer would sell **Hans Koenning** a windshield wiper for the right hand side of his automobile . . . **Clyde Stahley** learned that badges are made to be worn at work and not in theatres . . . the Timekeeping Department appreciated having helpful neighbors . . . it were possible for **James Glade** to be half as serious about paying off as he is when making a wager . . . **Alfred Pope** and **Donald Baldwin** could get their game with less difficulty.

Material Warehouse

FRANK McCORMACK
Correspondent

George Vercimak, who left the Material Warehouse some time ago to enter the armed service, came back home last week to attend funeral services for his mother. He paid a visit to the Warehouse Saturday and his former co-workers were all pleased to see George in his Army uniform and looking so well. They extend to George their deepest sympathy and hope he will see them again on a happier mission. George is in the Field Artillery stationed at Fort Smith, Arkansas, and is very thankful for receiving *The Bomb-Shell* regularly. He said he gets a lot of pleasure reading about his former place of employment.

Harvey Ingersoll, former Government material checker, has been transferred to the Fuze and Booster Area. He is now a bus dispatcher.

George Durin, former Government material checker, has left the service and the boys wish George good luck and hope he won't forget to let them know how he is going along.

Dave Seine, John Higgins and **Leslie Ross,** former Government material checkers, have all been transferred to other positions in the Area and their fellow workers wish them good luck in their new positions.

Material Checker **Stephen Felix** has been imitating the trained seal act so often his hands and feet are gradually turning into fins and he is growing a thin coat of fine fur. The only way to hold Felix in a normal conversation is to keep throwing peanuts and fish to him.

Your correspondent is back in harness again after a vacation and the staff of *The Bomb-Shell* extends a sincere welcome home.

Hospital

EVELYN RICHARDS
Correspondent

James Hatz, Group 3, who was injured November 13, is doing nicely.

Since November 6, **Ralph Sexton,** guard, has been doing a good job of bringing group workers to the Hospital for their physical examination. He really keeps them coming in and the laboratory girls are kept stepping around very fast.

Part of the statistical department was moved to the Hospital November 16. **L. M. Ross** has succeeded **C. V. Johnson,** who left for Springfield. **Mary Elizabeth Philbin** also was transferred from the Safety Department in the Administration Building and is working for Mr. Ross.

Margaret Gergovich seems to be improving her bowling score and beat **Dorothy Schoop** in a recent game with a score of 120, although she has to admit that her first game of 46 wasn't anything to write home about.

Nurse Dorothy Kenny is exceedingly happy these days, as her brother, **Lt. James J. Kenny, Jr.,** bombardier, made a cross country flight from Midland, Tex., to Portland. This was his first visit home in eleven months.

You can see **Elizabeth Russell** weeping these days, as she is about to part with her old "chevvy," which has been dear to her for many, many years. The time the brakes failed and she went through the front gate one winter day is one vivid memory of the car.

The Hospital will be rich in birthdays December 4. Three nurses will participate in sharing the special event. Each one has a definitely separate personality. On the day shift you will find blonde, blue-eyed **Marie Ulrich** taking care of the patients. The direct opposite of her is black-haired and dark-eyed **Bertha Perush,** who helps with the physical examinations which are given to group workers. While on the 11:30 to 7:30 shift you will see red-haired, blue-eyed **Nellie Lozio.** A specially built paddle to stand the strain of three salutes will be needed.

☆ ☆ ☆ *Remember Pearl Harbor!* ☆ ☆ ☆

GASOLINE SEEKERS crowded the Administration Building for days as rationing drew near. Receptionist Wanda Hudak and Corp. Clare Cosgrove are shown in the foreground.

Women

By
CATHERINE NOONAN

The first year of the war is over. The position of the American woman has changed so drastically that it is difficult to realize that 12 whole months have passed. There were all types of readjustments. Some of them were awful and everything seemed all mixed up at once. But that year is over now. You can't forget Pearl Harbor. You can't forget the horror and terror, too, that clutched our hearts the day the news reached America. You can't forget **President Roosevelt's** declaration of war speech. You can't forget things like that. But sometimes when you are browsing through your mental diary, surprisingly enough, it's odd bits of uncorrelated information that pop into your mind and they lead to a whole chain of unrecorded history. Ten years from now when you look back, maybe these will be some of the things that you will remember.

From Across the Seas

Beautiful stories of courage and humor have reached us about the women on the other side. The bravery of the English women under the seemingly endless bombings and the stoicism of the Russian and Chinese women. Perhaps you will remember the one about **Winston Churchill's** trip to a London slum after a particularly heavy bombing. He saw an old woman and asked her how she survived the bombing. She answered, "I didn't mind it so much, sir. It sort of takes your mind off the war!" Then there was the American visit of the Russian sniper whose difficult name we shortened to **Ludmilla.** Everyone wondered about her reaction to sniping on the wholesale plan. She answered simply, "I'm very glad I killed them." There are the beautiful stories of **Madame Chiang Kai-Shek,** whose work is faithfully carried on with little or no publicity. You can't forget the faces of our own nurses smiling at us from the newsreel as they try to make an old tent look like home in the wilds of Bataan.

On the Home Front

Will you remember the fun and the jokes that were poked at the WAACS and the WAVES? And how the quiet dignity and intelligence of **Director Oveta Culp Hobby** of the WAACS and **Lt. Commander Mildred H. McAfee** of the WAVES let the fun run its uncertain course and wound up winning the respect of everyone. Then you remember **Alice Pichon,** EOP's first employee who left for the WAACS and **Louise Thomson,** a nurse, who left to be an ensign in the Navy. You won't forget sugar rationing, "Praise the Lord, and Pass the Ammunition" and your first war bond, priorities, the time you said good-bye and a flat tire with ten minutes to make the graveyard shift. And that first V-letter.

Right Here

You won't forget the first day you worked at EOP. The first time you saw black powder. Your first pay check as a munitions worker. The look on your foreman's face when you tried to tell him you couldn't turn out a good-looking bomb with a shiny nose. You'll remember the bigness of EOP and the bus rides inside the area. The time you were fingerprinted and got the first look at your badge picture. The woman guards in their blue uniforms. The first women timekeepers. The first day the Ordnance girls wore their uniforms. How everybody agreed on "what pretty girls they are" when pictures of the Group 1 girls were in *The Bomb-Shell.*

You will probably remember that **Helen Shimek** was the very first girl employed for EOP and that **Lola Early** was the next . . . that **Grace Henderson,** Group 4, and **Mary Stuart,** Group 8, did war work during the last war . . . that **Erva Willford** was the first girl employed in the Machine Shop . . . **Betty Foster** and "Miss Victory" . . . the personality of **Ann McFarland,** supervisor of the women's change houses . . . sandwiches, sandwiches, sandwiches.

Of course, this is just the last paragraph of Chapter 1.

Production Planning

LORETTA RYAN
Correspondent

The department is continuously losing young men to join the armed forces, and although bidding adieus is regretted, the staff is honored to think they are going to be the ones to conquer for peace and liberty.

Dick Eben has reported that he is to be at Shepherd Field, Texas, as a member of the Air Corps. How nice for him to get his wish to become one of Uncle Sam's flying boys. He will appreciate any letters which are sent to him. **Dick Naughton** left to become a soldier.

Fred Mastin must be campaigning for votes on some future election as he was seen to be patting the chin of a tiny baby right in the middle of a busy intersection of Joliet. It will probably mean at least three votes anyway, whatever the office.

During the past few weeks efforts have been more successful in getting **Ewald Becker** to give forth with a hearty laugh. It is good to hear.

Did you ever see anyone take work so seriously as **Lucille Brown,** and she sets a very good example which seems to be taking effect. She is going to preside over the problems of Groups 6 and 7 during the absence of her associate, **Myrtle Cooper,** who is planning a visit to her brother who is in the Air Corps in Texas.

Mrs. Leatha Williams is now a member of the Planning Department and is very jubilant about the fact that her son is on furlough from the Army.

There seems to be a few obstacles in the way of a chance meeting at work for **Argyle Dalziel** and **Rowena Roberts,** since he is assigned to night duty. There should be some kind of a solution that could be offered.

Elva Thomas has been subjected to numerous remarks from her assistant, **William Dronsfield,** but they are all in fun and he can deliver them properly, and that is the kind of fun that helps war production increase more rapidly. It is just the humorous happenings that add to the joys of their department.

Mrs. Helen Cutler suffered from an attack of influenza, but is back again and everyone's happy.

There certainly was a great deal of excitement the day that **Dorothy Maxwell** misplaced her badge and couldn't get into work. After **Wallace Bensen** came to her rescue, and the company's squad car located her at one of the far acres of the reservation, it was still thought that further aid would have to be sent to bring them to work.

Frances Mores insists in competing with **Mae Norem** during their Friday luncheons. It will be an exciting and surprising outcome for both.

Group 1 Scores Big Hit With Harvest Dance

Specialty Acts, Hot Music, Decorations Entertain Large Crowd

Group 1 still maintains the social pace set at its first annual picnic held at Lockport last summer. On Saturday night, November 21, the group put on its Harvest Dance at the Recreation Building and all who came to take part in the festivities agreed that it was a worthwhile affair in every way. About 1,000 employees with their wives and sweethearts attended and left with a feeling of appreciation to those whose earnest efforts contributed to the success of the party.

The hall was decorated by employees in a truly professional manner. The backdrop behind the orchestra was adorned with two large and brilliantly colored cornucopiae, surrounded by autumn leaves in silver and at intervals around the walls were other Horns of Plenty, illuminated by hidden lights and pouring forth the fruits of the vine and field. In addition, the walls and ceiling were festooned with colored ribbons.

Under the direction of **John Condie,** general factotum who also designed the decorations, a corps of assistants, including **Frank Syssens,** former commercial artist, **Tony Fermin,** student artist, **John Mackender** of the Electrical Department, **Kenneth Chandler** of the Carpenter Shop, **George Long** of the Safety Department, **Tom Shay,** expeditor, who put over the ticket sales, **Mrs. Louis Morrison** and **Beverley Garing** of the plant recreational committee, the immense hall was transformed into a palace of beauty. Everyone had a grand time and through the thoughtfulness of **Joseph E. Salmon,** superintendent of Group 1, the decorations will be allowed to remain for a time so that others might enjoy them.

Mac Willis and his Doctors of Rhythm provided the music, but hot. During intermission several specialty numbers were presented by group talent. **Fidele Testa** sang "White Christmas" as only he can do it and for an encore rendered the new hit, "My Devotion." **Shirley Stafford** gave a splendid take-off of the "Dark Town Strutters Ball" and afterwards some plain and fancy tap dancing. Under the expert leadership of Miss Garing, there was group singing which started off with the National Anthem and wound up with "God Bless America." **George Gibson,** assistant superintendent, acted as master of ceremonies and performed like a veteran.

At one time during the dancing **Wanda Merritt** and her boy friend from Florida stopped the show and enthralled the crowd with a truly splendiferous Conga. It was breath-taking and no less. There was applejack for all and for those not caring to dance there were card games, shuffle-board, ping pong, and bowling. It must have been a heart-breaker for **Mr. Salmon** to miss the party, but the press of business held him elsewhere. However, his house was well represented by the presence of **Mrs. Salmon** and daughter, **Paula.**

Patrons and patronesses included **W. E. Canniff, Mr. and Mrs. John J. Cole, Edward J. Walsh, Mr. and Mrs. John J. Fitzpatrick, Mr. and Mrs. R. T. Reed, Mr. and Mrs. A. M. Lockwood, Mr. and Mrs. James Murphy** and **Mr. and Mrs. Henry D. Dougherty.**

Barry's Son at Pearl Harbor

Capt. Jack Barry and his wife, **Betty,** were at Pearl Harbor on the day the Japs struck. He's in the regular Army with a famous division which was decorated with the Croix De Guerre in World War I. His station is at Schofield Barracks but he got action and is waiting with the rest for the Japs to come back. Captain Barry is the son of **Jack Barry,** Group 1 correspondent for *The Bomb-Shell,* who served in France during World War I.

"Clipper Jack" and "Jungle Jim"

Imagine the surprise on the night of one of the Fellowship Meetings to walk into his office and find **E. K. "Jungle Jim Cortright** preparatory to going over to the party at the Mess Hall, being shorn of his iron gray locks by none other than **E. J. "Clipper Jack" Egan,** sometimes known as the "Chattanooga Clipper. Nevtrtheless, "Clipper Jack" did a good job and now "Jungle Jim" can postpone that fateful trip to the barber for another three months.

12 Basketball Teams To Start Play Here

Twelve teams will start play in the EOP Basketball League December 7. The full schedule will be drawn and sent to each manager. Games will be played Monday, Wednesday and Thursday in the Gymnasium at 4 p. m. The schedule for the first two weeks follows:

Monday, Dec. 7—
Group 1 vs. Army Officers.
Group 3 vs. Fuse and Boosters Lab.

Wednesday, Dec. 9—
Group 3-A vs. Fire Guards.
Group 70 vs. Police Guards.

Thursday, Dec. 10—
Group 62 vs. Bus Drivers.
Group 61 vs. Inspectors.

Monday, Dec. 14—
Group 70 vs. Inspectors.
Group 62 vs. Group 61.

Wednesday, Dec. 16—
Group 3 vs. Police Guards.
Group 3-A vs. Group 61.

Thursday, Dec. 17—
Group 1 vs. Fuse & Booster Lab.
Officers vs. Fire Guards.

HARVEST DANCE figures of Group 1 are shown here. The decorating committee, left to right, includes John Condie, Lois Morrison, Shirley Stafford (also pictured dancing), Anton Fermin, Frank Syssens and Fidele Testa, who also is shown singing with Mac Willis and his orchestra. Beverley Garing was absent.

Happy Birthday to You!

This is a regular feature in which the birthday anniversary of as many EOP workers as possible will be listed for 2 weeks in advance. Watch for your own. Call your friends.

December 7

Margaret Arnold, Group 4; **Edith Barrone**, Group 7; **Carl Bartlett**, Inspection; **Glen Behringer**, Group 3; **Russell Benson**, Group 7; **Parker Billups**, Inert Storage; **August Canto**, Group 2; **Margaret Drake**, Group 9; **Clement Elden**, Safety; **Aline Franklin**, Group 9; **Kathryn Gabel**, Group 7; **Beulah Hemling**, Group 6; **Mamie Koerber**, Group 9; **William Kosick**, Utilities; **Theresa Kump**, Group 6; **Theodore Kweiser**, Group 2; **Carl La Monte**, Utilities; **Betty Meents**, Group 9; **Donald Peay**, General Operations; **Carles Reeves**, Guards; **Catherine Ruffatti**, Group 9; **Kenneth Sabol**, Group 4; **Peter Sadler**, Group 7; **Ethel Spuehler**, Group 5; **Robert Suddick**, Group 3A; **Ottar Swenson**, Utilities; **Robert Terzick**, Group 1; **Joseph Tomasino**, Group 1; **John Williams**, Utilities; **Frank Yasulaitis**, Group 3.

December 8

George Arsenau, Sr., Group 8; **Nina Bracken**, Group 6; **Annie Brignall**, Group 5; **Josephine Charlier**, Group 5; **William Clark**, Group 66; **Robert Cleghorn**, Utilities; **Mike Dubetz**, Group 1; **Esther Emanuelson**, Group 9; **Leona Fischer**, Group 6; **Clifford Geiss**, Group 1; **Irene Harrop**, Group 5; **Stanley Jean**, Group 2; **Theodore Kendzora**, Group 7; **John Lawson**, Group 4; **John Lawson**, Group 66; **Bob Lewis**, Group 1; **George Lockwood**, Group 3A; **Nora McCarthy**, Group 5; **Frieda McKeon**, Group 6; **Caroline Morgan**, Group 5; **Adam Morrison**, Group 3A; **Emil Odchodnicky**, Ordnance; **Richard Orndorff**, High Explosives; **Burl Richardson**, Inert Storage; **Michael Ryan**, Utilities; **Richard Ryan**, Group 2; **Emma Shea**, Ordnance; **Richard Shelley**, Ordnance; **Lucille Small**, Group 8; **Evan Smith**, Group 7; **Wilbur Testa**, Group 1; **Geraldine Todd**, Group 7; **Mable Ward**, Group 1; **Valeria Zupancic**, Group 9.

December 9

Walter Benedict, Group 7; **John Bowers**, Utilities; **Frank Bravato**, Ordnance; **Ledean Cheatham**, Group 9; **Rex Cress**, Group 3; **Herman Dandurand**, Group 61; **Thelma Fortin**, Group 7; **Alice Fosdick**, Group 1; **R. G. Fredrickson**, Guards; **Mary Giancomini**, Group 4; **Mable Harris**, Group 7; **Mabel Hibbs**, Ordnance; **Tracy Horrie**, Utilities; **Henry Jaryembski**, High Explosives; **Glenn Johnson**, Utilities; **William Keating**, Guards; **Richard Kohler**, High Explosives; **Luella Lipschutz**, Women Guards; **Raymond Long**, Group 1; **Harry Minkus**, Utilities; **Marshall Oling**, Utilities; **Cedo Parine**, Group 1; **Geraldine Sizamore**, Group 4; **Don Spiller**, Utilities; **Lee Stevenson**, Group 1; **Claude Willows**, Utilities.

December 10

Laurence Anderson, Utilities; **Walter Beaudoin**, High Explosives; **Leo Budde, Jr.**, Group 3; **Harry Chayer**, Utilities; **Vern Cole**, Group 4; **Frank Coyle**, Utilities; **Frances Estes**, Group 4; **Katherine Filetti**, Group 9; **Allen Goldsmith**, Group 9; **William Graham**, Guards; **Eugene Hedrick**, Auditing Dept.; **James Henderson**, Utilities; **William Jones**, Watchmen; **Mary Lewis**, Group 9; **Lottie Maloney**, Ordnance; **Kenneth McClain**, Ordnance; **Ernest Mortenson**, Group 7; **Russell Olson**, Guards; **Ralph Payne**, Group 1; **Gale Pickett**, Group 68; **Margaret Price**, Group 4; **Perry Rusher**, Group 2; **Alban Scheuber, Jr.**, General Offices; **Dorothy Smiley**, Group 9; **Shirley Van Duyne**, Accounting.

December 11

Charles Balch, Group 7; **Virginia Benters**, Ordnance; **Wayne Biehl**, Group 1; **David Billsland**, Group 3A; **Ruth Bleau**, Group 7; **James Boyd**, Utilities; **Charles Bray**, Group 2; **Elsie Bundy**, Group 6; **Michael Cuttill**, Group 3; **Lile Eldridge**, Group 4; **Clyde Farman**, Group 1; **John Feeney**, Group 2; **Walker Findlay**, Group 3A; **Mavis Francis**, Payroll Dept.; **Daniel Franklin**, Utilities; **Marjorie Glover**, Ordnance; **Loretta Harpin**, Group 6; **Charles Havener**, Group 5; **Esther Ludwig**, Group 4; **Kenneth Mann**, Group 1; **Harriet Nadelhoffer**, Ordnance; **Frank Netherton**, Guards; **Richard Oft**, Group 3; **Verne Parry**, Ordnance; **Frank Senica**, Utilities; **Joseph Stofko**, Group 1; **Louise Thomson**, Hospital; **Raymond Trizna**, Group 1; **Diana Uremovic**, Group 4; **Virgil Vitzthum**, Group 1; **Bernadetta Whitsell**, Group 7.

December 12

Margaret Burden, Women Guards; **Carl Carlson**, Utilities; **Ruth Childsey**, Plant Protection; **John Comerford**, Accounting; **Paul Conrad**, Utilities; **Cyril Coonan**, Group 8; **John Farcus**, Group 3; **Thomas Folwell**, Accounting; **Edward Friedrich**, Group 1; **Dawson Fuller**, Utilities; **Alfred Graham**, Group 1; **Adolph Haberkorn**, Guards; **Melvin Hurwitz**, Ordnance; **Arthur Kelly**, Watchman; **Russell Keyes**, Utilities; **Thomas Kiley**, Guards; **Stanley Kukulski**, Utilities; **George Lauffer**, Group 1; **Charles Mann**, Inert Storage; **Thomas Martin**, Materials and Stores; **Verne McKimson**, Fire Department; **Laurence Patton**, Group 7; **Duane Pfister**, Group 2; **Neal Ransom**, Utilities; **Ralph Ritter**, Group 1; **Howard Rub**, Utilities; **Blanche Ryslink**, Group 6; **Ellis Schuyler**, Utilities; **Robert Seeman**, Group 1; **Phyllis Stinson**, Group 4; **Donald Trainor**, Fire Department; **Robert Weidling**, Group 3A; **George Wells**, Guards; **Thomas Wharrie**, Ordnance; **Brison Yoho**, Group 1.

December 13

Mildred Boles, Group 5; **Bernard Boos**, Group 3; **Leslie Brooker**, Inspection; **Daniel Carey**, Group 2; **William Cotter**, Utilities; **Clarence Crawford**, Group 3A; **Jessie Cuzick**, Group 1; **Howard Davey, Jr.**, Engineering; **Roy Duckworth**, Utilities; **Charles Elliott**, Utilities; **William Ely**, Utilities; **Angelo Fietto**, Group 8; **Thomas Frew**, Group 2; **John McGunnigal**, Utilities; **James Gerkin**, Guards; **Della Gorczynski**, Group 7; **John Haake**, Group 3A; **Mearl Harris**, Group 1; **Helen Hoye**, Group 5; **Russel Jones**, Group 3; **Stephen Joricic**, Group 61; **Benno Judge**, Utilities; **Stanley Maleski**, Group 2; **Mary Marlow**, Group 5; **Mendal Marshall**, Group 5; **Edward Moriarity**, Guards; **Raymond Murray**, Group 2; **Ellen Nahlbom**, Group 9; **James Nolan**, Inspection; **Jerome O'Connor**, High Explosives; **James Scheidt**, Group 3; **Helen Sefcik**, Group 4; **Nora Sweazy**, Group 6; **Jacob Van Duyne**, Utilities; **Clark Wilson**, General Offices.

December 14

Edward Agnich, Group 66; **Marie Anderson**, Group 9; **Robert Brown**, Plant Protection; **Walter Bruhn**, Group 1; **Fred Burgess**, Group 1; **Angelo Cusimano**, Group 1; **Joseph Dement**, Group 3; **Wallace Englehart**, Guards; **Samuel Eppstein**, Accounting; **Geraldine Ferguson**, Group 4; **Arthur Fritz**, Group 3; **John Gagliardo**, Group 3; **Joseph Johnson**, Utilities; **Lavern Kennedy**, Utilities; **Marjorie Ketterer**, Group 5; **Janet LaBorence**, Group 7; **Horace Larder**, Group 2; **Michael Nolan**, Group 7; **Axel Olin**, Utilities; **Marjorie Onsen**, Personnel; **Nazzarino Pozzi**, Utilities; **Frederick Reed, Sr.**, Utilities; **David Richards**, Utilities; **Lulu Rinehart**, Group 7; **James Reynolds**, Group 3; **Andrew Rodeghero**, Group 3; **Margaret Sinchak**, Group 5; **Robert Stanley**, Group 7; **Moses Taylor**, Group 4; **Jeannette Wallace**, Ordnance; **Elizabeth Wicks**, Group 5; **Stephanie Zaremba**, Group 4.

December 15

Hilda Baker, Group 4; **Arthur Brinkman**, Group 1; **George Bruning**, Group 2; **Thomas Chudy**, Group 3; **June Clapper**, Group 4; **Elwood Cook**, Group 3A; **Julia Corzan**, Group 7; **Leo Cromwell**, Group 1; **Matt Ecimovich**, Guards; **Frank Hafner**, Inert Storage; **William Hammond**, Group 1; **Milton Harris**, Group 3; **James Hynds**, Timekeeping; **Clinton Jones**, Materials and Stores; **Josephine Kush**, Ordnance; **John Kusinski**, Recreation; **Zeta McCarty**, Group 7; **Lorraine Miller**, Group 4; **Esther Murray**, Group 9; **Irene Nemeth**, Group 4; **Mary Nemeth**, Group 5; **Mary Nepote**, Group 4; **Helen Pasley**, Group 7; **Gustav Peterson**, General Offices; **Ralph Pratt, Jr.**, Group 8; **Robert Renoldi**, Timekeeping; **Louise Schulthels**, Group 9; **Werner Siefert**, Group 1; **Edward Smith**, Utilities; **Ida Sullivan**, Group 4; **Arthur Swinghamer**, Utilities; **Shelton Tucker**, Group 1; **John Welch**, Ordnance.

December 16

Ray Arle, Group 9; **Samuel Azzarelli**, Group 1; **Fred Cadwaller**, Labor Distribution; **Reeder Campbell**, Group 7; **Herman Chouinard**, Group 5; **Doris Cumpston**, Group 5; **Martin Drendel**, Group 7; **Gwendolyn Flessner**, Group 6; **Forrest Green**, Utilities; **Merl Hicks**, Guards; **Wayne Holeman**, Group 61; **Fred Huxtable**, Group 4; **Suzanne Janovsky**, Group 8; **Betty Bernadine Jehle**, Group 5; **Betty Johnston**, Group 8; **Julia Kirby**, Group 1; **Helen McGinnis**, Ordnance; **Rob-Margaret McGowan**, Ordnance; **Robert Moody**, Group 1; **Oakley Ront, Jr.**, Accounting; **Joseph Ruyle**, Guards; **Marian Stevenson**, Group 9; **Wayne Stuckey**, Group 4; **Lawrence Tyda**, Group 3; **Louis Voytko**, Group 1.

December 17

Ruby Armbrush, Group 4; **Louis Benedino**, Group 2; **Theresa Bolek**, Ordnance; **Antoinette Canto**, Group 8; **William Carr**, Group 1; **Charles Christy**, Group 3A; **Bette Comer**, Group 8; **Cecil Cushman**, Utilities; **Helen Dahn**, Group 9; **Stanley Elsler**, Ordnance; **Bernice Erickson**, Group 1; **Gowain Frick**, Group 1; **Ray Gale**, Utilities; **Joseph Gutierrez**, Utilities; **Stella Jackinowski**, Group 5; **Francis Kangley**, Group 1; **Albert Maierhoffer**, Group 2; **William Milby**, Group 2; **Helen Nelson**, Group 7; **Marian Nelson**, Group 9; **Bernard Nichols**, Utilities; **Lorrayne Ostrem**, General Offices; **Joseph Pesavento**, Group 1; **Gertrude Rogers**, Group 5; **Anamarie Schroeder**, Ordnance; **Roy Shull**, Group 1; **Harrison Smith**, Resident Partner; **Edna Spenard**, Group 6; **Anne Spreitzer**, Group 5; **Vernon Stevens**, Guards; **Norman White**, Accounting.

G. H. Beddingfield, Guards; **Kathleen Coash**, Group 9; **William F. Douville**, Ordnance; **Albert Dow**, Group 8; **Pauline Durham**, Group 7; **John E. Egan**, Utilities; **John Fey**, Inspection; **Peter Forsen**, Utilities; **T. L. Gianopoulos**, Group 7; **Gerald Hall**, Group 3A; **Loris Hart**, Guards; **Delores Hawotte**, Ordnance; **Chester Jessen**, Group 3A; **Raymond Junker**, Group 3; **Ollie Kelly**, Group 2; **Mildred Kreml**, Group 9; **Willis Lee**, Group 61; **Robert Legan**, Group 1; **Donald Manthey**, High Explosives; **Terrance McGovern**, Group 2; **Esther Moir**, Group 9; **Virginia Nowack**, Personnel; **Albert Pelletier, Jr.**, Group 3A; **Helen Pombert**, Group 8; **Herbert Robb**, Group 1; **Ralph Ruddy**, Guards; **John Russ**, Utilities; **Frank Saxon**, Utilities; **Emma Scott**, Group 4; **M. L. Starasinich**, Group 5; **Wesley Strader**, Group 4; **Anna Vernoy**, Group 9; **John Walker**, Group 8; **Vernon Worden**, Utilities.

December 19

Clifford Carls, Plant Protection; **Ruth Casselman**, Group 5; **Eva Coonan**, Group 5; **LaVerne Dite**, Group 5; **Edward Dufault**, Utilities; **Frank Fallmaier**, Group 3; **Robert Gehrke**, Timekeeping; **Francis Gray**, Guards; **Lawrence Gross**, Utilities; **Harriet Hanfeld**, Group 4; **Harold Holz**, Ordnance; **Frederick Howe**, Inspection; **Kenneth Jones**, Ordnance; **Ralph Keek**, Group 1; **Oscar Kelsey**, Group 2; **Ned Kneller**, Group 5; **James Leadingham**, Group 9; **Violet Louch**, Group 1; **Norman Morgan**, Maintenance; **Anita Spaulding**, Group 4; **George Steen**, Group 4; **Donna Belle Steinke**, Group 5; **Fred Sulsdorf**, Group 9; **Ervin Sutter**, Utilities; **Everett Thompson**, Group 3; **Herman Winkler**, Group 3.

December 20

Anna Balicek, Group 5; **Rose Bender**, Group 4; **Velda Clemens**, Group 9; **Myron Drazy**, Inert Storage; **Robert Inman**, Utilities; **Mary Kurey**, Group 5; **Della Larkins**, Group 9; **Helen Luellen**, Group 9; **William McCollum**, Inert Storage; **Louis Puncar**, Group 2; **Hirman Reddish**, Utilities; **Steve Spurlick**, Group 3A; **Clyde Stahly**, Utilities; **Leo Steffes**, Inert Storage; **Nevill Streuter**, Group 5; **Naomi Thrasher**, Group 5; **Mike Varndy**, Ordnance; **Corum Wilson**, Group 3A.

Officials Have Birthdays, Too

Joseph E. Salmon, superintendent of Group 1, observed his birthday anniversary December 4. **A. E. Frosch**, chief engineer, observed his December 2, and **E. A. Evans**, chief field engineer, celebrated his November 23. Another November birthday was that of **A. P. Balston**, superintendent of Inert Storage Department, on November 10. **Harrison Smith**, resident partner, Sanderson & Porter, will observe his December 17.

Early Pay Day Made Possible By Hard Work

Workers' Checks to Be Issued Wednesday Before Christmas

EOP workers received their pay checks on the Wednesday before Thanksgiving, a day earlier than customary, as the result of almost superhuman efforts by the Controller's Department and the Payroll Department, according to **G. B. Pumphrey**, assistant controller.

Such a feat could not be done regularly, Mr. Pumphrey said, but it was done this time as a service to employees and will be done again for Christmas. Workers will receive their checks on the Wednesday before Christmas, but thereafter on Thursdays as usual.

Paymaster J. F. Dolan and his staff worked day and night to accomplish the task, even at the risk of making some errors because of the speed required. **John O'Connell** and his Timekeeping Department also did extra work to attain the goal, Mr. Pumphrey said.

This is why your mileage is rationed

The EOP Guide Post

Classified ads will be published without charge for EOP employees and their families. If you can offer transportation, want transportation; want to trade, buy or sell something; have a house or apartment to rent; have lost or found something, you are invited to make use of this service. Deadline is Wednesday, ten days preceding publication.

For Rent—Room in private home at 25 S. Cagwin Avenue, Joliet. Near bus lines. Call Joliet 2-0932.

Lost—Woman's yellow gold wedding band on November 18. See **Frances Dransfeldt**, Badge No. 68922, Group 4. Reward.

For Rent—Modern sleeping room. Double bed. Board optional. No other roomers. On bus line. **A. B. Wells**, 1013 Richards Street, Joliet, upstairs, or telephone Joliet 2-7360.

Riders Wanted—From vicinity of East Washington Street or downtown Joliet. Accommodate 4 or 5 passengers. Steady 11:30 p. m. to 7:30 a. m. shift. Call **Edward Brennan**, Joliet 2-7090, or Line 3148.

For Hire—Eight piece Negro orchestra available for parties, dances and other activities. Reasonable price for EOP activities. Call **Mac Willis**, Joliet 2-4174.

For Sale—One set of Deitzgen drawing instruments. Call **William Biggs**, Group 61, Line 3254.

Riders Wanted—From vicinity of 111th Street and Vincennes Avenue, Chicago. Shift change every week. Call **L. E. Patton**, Guard House, Line 4156.

For Swap—Send list of anything you have to swap and advise what is wanted in exchange. Write **R. J. Steiskal**, Hawthorne Station, Chicago, or Government Inspection Office, Group 3.

Riders Wanted—From south side of Chicago or on Route 7-45. 1941 Plymouth. Call **Ralph Kurzband**, Midway 2484.

Ride Wanted—From Monee, Ill., to EOP on the 7:30 and 11:30 shifts. 7:30 shift started November 30. See **Verna Blair**, Group 3-A, Building 12.

ORDNANCE IS THE HEART OF VICTORY

The BOMB-SHELL

ELWOOD ORDNANCE PLANT

LETS GO! U.S.A. KEEP 'EM SHOOTING!

Vol. 1, No. 15 | JOLIET, ILLINOIS, DECEMBER 18, 1942 | EVERY OTHER FRIDAY

Victory Tax Is Effective Jan. 1 On All Earnings

5 Per Cent to Be Deducted Weekly Beginning Jan. 7

The 5 per cent Victory Tax on wages and salaries earned in 1943 becomes effective January 1. It will be collected for the Government by employers deducting the proper amount from each check or the cash paid to their workers.

Deductions from the pay of EOP employees will be made on checks delivered January 7 and each weekly payday thereafter.

The Victory Tax is over and above income taxes and social security taxes. Income taxes due March 15, 1943, are on salaries and wages earned in 1942, but the Victory Tax applies to 1943 earnings. There is provision made for a credit or refund of part of the Victory Tax after the war is over. Credits or refunds are as follows: Single person or married person not living with husband or wife, 25 per cent of total amount previously deducted, or $500, whichever is less; married person or family head, 40 per cent or $1,000, whichever is less; for each dependent, 2 per cent or $100, whichever is less.

Taxpayers may annually take credit for certain expenditures, but since the first annual return will not be made by the taxpayers until March, 1944, there is no need to becloud the situation with an explanation of them now.

Chart Is Helpful

The following table, prepared by **Paymaster John F. Dolan**, shows what the weekly deduction will be, based on the 5 per cent tax on income above $12 a week.

Weekly Earnings	Tax Deduction
$ 12.01—$ 16.00	$0.10
16.01— 20.00	.30
20.01— 24.00	.50
24.01— 28.00	.70
28.01— 32.00	.90
32.01— 36.00	1.10
36.01— 40.00	1.30
40.01— 50.00	1.60
50.01— 60.00	2.10
60.01— 70.00	2.60
70.01— 80.00	3.10
80.01— 90.00	3.60
90.01— 100.00	4.10
100.01— 110.00	4.60
110.01— 120.00	5.10
120.01— 130.00	5.60
130.01— 140.00	6.10
140.01— 150.00	6.60
150.01— 160.00	7.10
160.01— 170.00	7.60
170.01— 180.00	8.10
180.01— 190.00	8.60
190.01— 200.00	9.10
200.01—	9.40 plus 5% of the excess over $200

Many persons are now figuring what the Victory Tax and the income tax will cost them and rearranging their budgets to take care of those costs. This is advisable since the income taxes due March 15 on earnings you have already received this year are from three to four times greater than the income taxes you paid this year. Many who paid no income taxes this year will have to pay March 15. It will pay any worker to investigate his situation early.

As a service to employees who may wish to set up their weekly budgets for next year on the basis of these additional taxes, tables of approximate tax costs will be published in the January issue of *The Bomb-Shell*.

Holiday Greetings from EOP Executives

PRAIRIE CREEK IN WINTER furnishes the background for the sincere Yuletide message to all EOP employees and their families and to all former employees in the Nation's armed forces here and abroad from Maj. Kenneth M. Haber, commanding officer; W. E. Canniff, manager, engineering and operations; Harrison Smith, resident partner of Sanderson & Porter, and John J. Cole, comptroller. —*Photo by Loren D. Ross*

Next Fellowship Meeting Jan. 7

The next EOP Fellowship Meeting will be held Thursday evening, January 7, it was announced by **A. E. Frosch** and **E. A. Evans**, co-chairmen of the general committee.

Members of the committee in charge of the meeting held December 17 were **E. J. Egan**, chairman; **E. V. Sperling**, steward; **W. P. Dronsfield, L. R. Reynolds, F. C. Schauland, W. D. Whaley, G. W. Gibson, E. L. Walkup** and **Capt. G. A. Grant.**

Safety Booklets Given to Workers

Copies of the war edition of *Watch*, a digest of safety features from the monthly publication of the same name of the American Mutual Liability Insurance Company, Boston, Mass., were distributed to all EOP employees.

The digest contains illustrated articles on home and highway safety precautions for individuals, families and property.

The booklets were distributed to all employees when they left the plant area by private car or bus after work.

Christmas Envelopes Available Here

Attractive envelopes, furnished by the Treasury Department, for those who wish to give War Bonds as Christmas presents, are at the Comptroller's Office in the Administration Building and may be obtained without charge by applying for them there.

A Message to All Workers at EOP

For the coming Yuletide I would like to give each one of you a personal salute and wish you A Merry Christmas. During the past year you have done a magnificent job in Ordnance production, transportation and maintenance. Even to persons accustomed to astronomical figures, the results are almost inconceivable. This has required hard work by everybody concerned. For our effort thus far, I am sure the entire Army, the Nation and the United Nations are grateful.

L. H. CAMPBELL, Jr.,
Major General, Chief of Ordnance.

New Telephone Directory Is Due January 1

The fourth edition of EOP's new buff-colored telephone directory will be ready for distribution about January 1, it was announced by **Supt. William A. Buck.**

Damage to U. S. Cars Assessed Against Drivers

Court of Inquiry Reports Findings; Charges Are Fixed

Investigation of traffic accidents involving Government-owned vehicles has been assumed by Sanderson & Porter as a part of the rearrangement of Ordnance Department divisions announced in the last issue of *The Bomb-Shell*.

A court of inquiry is held by the Guard Department and its findings are reported to the management, who determines the person at fault and fixes the amount of damages to Government property to be assessed against the guilty person. In the event an employee quits after an assessment is made against him, the commanding officer will refer the case to the nearest United States district attorney because damage to Government property is involved.

Reports of accidents in which assessments are made because of careless driving will be reported in *The Bomb-Shell*.

Some of the more frequent causes of accidents which would be classified as careless driving are backing up when unable to see through a dirty rear window, bumping other cars when parking in a parking lot, sideswiping a parked car, ramming the rear end of a car because of driving too close and therefore unable to stop in time, backing up without looking, not observing the full meaning of stop signs and attempting to beat another car even after a partial stop.

Accidents Are Listed

Raymond F. Pratt, an EOP bus driver, rammed into the rear of a Bowman Dairy Company truck at 8:50 a. m., November 5, between the first aid and laboratory buildings in Group 4.

William Gram, Group 2, was assessed $33.75 following an accident at the intersection of 1 West Road and Group 60 Road at 4:45 p. m., November 23. Gram was driving a coupe which made too wide a swing at the intersection and sideswiped a Government-owned station wagon which had stopped for a stop sign.

An assessment of $12 was charged against **Grace L. Taff**, Policewomen's Division, after the Government-owned station wagon she was driving was backed into a parked car at Group 8 at 4 p. m., November 5.

Jack Knarr, Motor Pool driver, was assessed $5 after the Government-owned car he was parking at the pool received a dented fender when it hooked the fender of a parked pool car at 9 a. m., November 24.

Elmer Pratto, Group 60, was pushing his own car with a Government-owned car when the bumper jumped over and damaged the grill on the latter vehicle at 8:45 a. m., December 3. He was assessed $13.10.

The door of a Government-owned car was caught on the door of a garage while **Lawrence D. Jack**, Radio Department, was backing it out at 7 a. m., November 1, and he was assessed $10.

The Japanese Are Tough

A RADIO ADDRESS BY THE HONORABLE JOSEPH C. GREW
Former United States Ambassador to Japan

(Continued from last issue)

I had long known of Japan's preparations for war, and I kept my Government currently advised of the information which came to my knowledge on that subject.

And now, before closing, I should like to tell you something about the Japanese military machine against which we are fighting today. That machine has been trained and perfected through many years, for it has always had in view, even before the invasion of Manchuria in 1931, the prospect of eventually sweeping not only to the north against Russia but to the west and south in order to control what the Japanese have latterly termed "The Co-prosperity Sphere of Greater East Asia, including the South Seas." It need hardly be said that the phrase "Co-prosperity Sphere" denoted in fact the intention to exert Japanese control, politically, economically—absolutely—over all those far-flung territories.

In 1931 came their invasion of Manchuria. In 1937 came their invasion of China south of the wall, and while their army eventually floundered in China, due to the magnificent fighting spirit of Chiang Kai-shek, his courageous armies, and his determined people, nevertheless the warfare which then ensued proved a practical training for the Japanese soldiers and sailors, who tirlessly developed and perfected the tactics which they subsequently used in their landings and conquests to the south.

The idea should not for a moment be entertained that the failure of the Japanese forces in China has discouraged the Japanese people. It has instead served to steel them for still greater sacrifices and to prepare them better for the war to the death upon which they have finally embarked. As the realization came home to them of the need for greater and greater efforts, they accepted the inevitable war-footing reorganization of the country's life with characteristic calmness and determination.

The Offensive Spirit

Probably no other factor has contributed more heavily to the preliminary victories achieved by the Japanese in this war than the offensive spirit which permeates all of the armed forces of the Empire. This spirit, recognized by competent military men as the most vital intangible factor in achieving victory, has been nourished and perpetuated since the foundation of the modern Japanese army. The Japanese High Command has counted implicitly upon the advantages this would give them over less aggressive enemies. They have put great store in what they consider to be the white man's flabbiness. They look upon us Americans as constitutional weaklings, demanding our daily comforts and unwilling to make the sacrifices demanded for victory in a war against a military machine which has prepared and trained itself in Spartan simplicity and the hardness and toughness demanded by war. They attach great importance to the former disunity in the United States over the war issue, and they still count on an appreciable interval before an aroused nation can find itself and develop a fighting spirit of its own. By that time, they feel, Japan will be in complete control of all East Asia. When they struck they made no provision for failure; they left no road open for retreat. They struck with all the force and power at their command. And they will continue to fight in the same manner until they are utterly crushed.

We Must Go All Out

We shall crush that machine and caste and system in due course, but if we Americans think that, collectively and individually, we can continue to lead our normal lives, leaving the spirit of self-sacrifice to our soldiers and sailors, letting the intensification of our production program take care of itself, we shall unquestionably risk the danger of a stalemate in this war of ours with Japan. I say this in the light of my 10 years' experience in Japan, my knowledge of the power of the Japanese army and navy, and of the hardness and fighting spirit of the Japanese. I feel it my bounden duty to say this to my fellow countrymen. I know my own country even better than I know Japan, and I have not the slightest shadow of doubt of our eventual victory. But I do not wish to see the period of our blood, sweat, and tears *indefinitely and unnecessarily prolonged.* That period will be prolonged only if our people fail to realize the truth of what I have just said, that we are up against a powerful fighting machine, a people whose morale cannot and will not be broken even by successive defeats, who will certainly not be broken by economic hardships, a people who individually and collectively will gladly sacrifice their lives for their emperor and their nation, and who can be brought to earth only by physical defeat, by being ejected physically from the areas which they have temporarily conquered or by a progressive attrition of their naval power and merchant marine which will finally result in cutting off their homeland from all connection with and access to those outlying areas—by complete defeat in battle.

I need say no more. I have told you the truth as I see it from long experience and observation. I have come home with my associates in the Far East to join our war effort with yours, and I realize, perhaps better than anyone else, that nothing less than the exertion of our maximum capacities, individually and collectively, in a war of offense will bring our beloved country safely through these deep waters to the longed-for haven of a victorious peace.

We are fighting this war for the preservation of righteousness, law, and order, but above all the preservation of the freedoms which have been conferred upon us by the glorious heritage of our American citizenship, and for these same freedoms in other countries of the United Nations, and while we are fighting against the forces of evil, lawlessness, and disorder in the world we are primarily fighting to prevent the enslavement which actually threatens to be imposed upon us if we fail. I am convinced that this is not an overstatement. Surely ours is a cause worth sacrificing for and living for and dying for if necessary.

The Burning Pit

By Scorchy

The ordinarily high caliber of service rendered its great multitude of readers by this tall and slender aggregate of the agate line has fallen from its hitherto celestial heights. Now that you have read the confession, let's get on with all the reasons, be they for or against your noble scribe, whose heart beats hard and fast when your common weal is at stake.

The principal reason for my chagrin "as I look into your smiling faces" is that I failed to warn you of the pitfalls of this great word of the day—*rationing.* What with all the multifarious duties in satisfying the gluttinous appetites of the loading lines and keeping **Tommy (T. M.) Burns's** hordes gorged with small metallic chicken feed, it is not surprising that even the omniscient Scorchy should have had the wool pulled over his eyes just because of a word like *rationing* with which he had previously never been on speaking terms.

Not long ago that fine sense of responsibility to his public prompted your correspondent to confer with Mr. Webster as to just what this word *rationing* really meant. It so happened that the only dictionary available was a bit dog-eared when it came to *rationing,* but the next best readable space showed the word *rational.* It seemed only reasonable that *rational* ought to be a blood relative of *rationing* and this is what Mr. Webster ascribes to it:

> RATIONAL — *Having reason or understanding; reasoning; agreeable to reason; not absurd, preposterous, extravagant, foolish, fanciful or the like.*

Now I ask you folks, would any of you, in the face of such etymological research ever suspect that *rationing* would ever be more than a friendly caress by the solons of dear ole OPA?

Came the Questionnaires!

While benumbed by Mr. Webster's comforting definition of our wrong word, we innocently happened in to the **(R. T.) Bassett** Bedlam with a mild request for slightly more than 2,000 miles a month on our jalopy which would, in due honesty, probably suffer a complete constitutional collapse if it were horsewhipped into 2,000 miles a *year.* Imagine me unsuspectingly confronting this demon of the motionless wheel, thinking all the time of what Mr. Webster said about "having reason or understanding" and "not absurd" and all that kind of stuff.

I ask your sympathy at my embarrassment on being informed that the distance from my home to work was only 16.2 miles instead of the 19.7 miles I had so carefully contrived to include a roundabout route permitting a sly daily stopover at "Ye Olde Barbecue Shoppe" which, through some strange accident happens to purvey liquids with a frothy superstructure.

As if this perplexing revelation of my hitherto secret activities were not sufficiently disarming, **R. R. Kuntz,** one of the more active members of the "Rationing Rough Riders," suddenly popped up with the question "Who was that lady I seen you with last night?" In a mood of sparkling repartee, I retorted without a stutter, "That was no rider, that was my wife."

After that wisecrack, I picked myself up from the front lawn, scraped the mud off my trousers and started roaming back toward the plant to think things over.

The Fire Station produced no ideas; Group 70 was even less inspiring, but as the wheezing jalopy swung northward past **W. B. Manchester's** "Salon of the Soil," thoughts suddenly came to mind as to what would happen when the "Quota Quizzers" undertook their forthcoming assignments on such products of the good earth as coffee, milk, butter and the choicer cuts of meat.

It took no stretch of the imagination to envision a local gestapo which might look with much suspicion on a normal ruddy complexion on the ground that it resulted only from a normal-sized portion of roast beef, despite the fact that that same portion could well have been the inspiration of that famous trade slogan, "Nothing Takes the Place of Leather." Even more alarming is the prospect that anyone discovered actually wide awake might be accused of having exceeded his quota of coffee for that day.

It has been the consistent policy of this self-elected pulpit to give you the idea "in the rough" and let you add the spangles . . . I hope you will be *rational.*

"Seems to me there's something wrong with her back end!"

I have written . . . a poem!

DOOLITTLE
"What's in a Name"

'Twas the eighteenth of April in seventy-five,
When the British red-coats were due to arrive;
And a light in the steeple of old North Church,
Was to signal that patriots on the search
Were assured that the enemy soon would be
On the way to attack us by land or by sea;
So that Paul Revere could begin his great ride,
Which would carry alarm to the country-side;
So that farmers and minute-men all would be
Up in arms for the fight for our liberty.

But that famous day, now so far in the past,
Is a part of history buried at last
By the new and desperate struggle today,
When the British and we are standing at bay;
With the aid of the Russians and Chinese, too,
With the Frenchmen who *can* help to see us through;
And the moral assistance of other men,
Who are shackled today but will once again
Breathe the air of the free that will come to all,
Just as soon as the Japs and the Germans fall.

And the eighteenth of April in forty-two,
Found another good man with the will to do;
For our Jimmie Doolittle with his brave men
Went from Shangri La to a devil's den.
Though he didn't set forth with a horse like Paul,
Still he had what it took just to make a call;
And the call, as you know, was to Tokio,
Where he flew to deliver a crushing blow,
Which did *not* save the face of the yellow Japs,
But which *wiped every grin off* from all their maps.

—Jack Barry

The Spirit of Christmas

Why don't we listen and hear the cry
Of The Babe in His manger bed;
Why don't we see Him as Wise Men did,
Who came from far across the hills
To the star beck'ning high overhead.

The world has turned to plunder and hate,
To the things engendered by greed,
But that Baby's cry still comes to us
To think of love and compassion,
If we'd just take the time to heed.

To manhood He grew and labored
With His message for you and me;
To give peace unto all our brothers,
Do to others as we would have done:
To act on His Truth and be free.

There must be something big and fine
That each one of us now can do,
To bring the world back to sanity,
And have peace among nations of men
Instead of war and might of the few.

We can't do our part by wishing
Or waiting for someone to start,
For the star is still there shining,
Directing our thoughts up to Him
Who would put His Love in our heart.

The Spirit of Christmas still lives
With all of its blessing and thrill,
And The Babe of the manger still sends
To us His message that never will die:
Peace on earth to men of good will.

—Clifford Day
Time Office

Soldiers Write Intimately of Life in Service

Tell of Progress, Describe Views, Hopes and Aims

Intimate word pictures of life in the armed forces are painted in the letters received by *The Bomb-Shell* from soldiers, sailors, marines and coast guardsmen formerly employed at EOP.

Pvt. H. L. Knutson, Camp Pickett, Virginia, said he had been intending to write to Guard Headquarters where he was a radio operator, but just hadn't been able to carry out his intention.

"I have been in the armed forces for eight months," wrote Private Knutson, "and I have learned a lot. There is another employee of your plant here, **Sgt. John Stark,** who is in the same battalion. We were inducted at the same time and sent to Camp Grant. We have been through the same basic training together, so therefore have very much in common.

"It was interesting to see a picture of a fellow in your latest edition by the name of Wolcott. He also was sent to the same induction center, but from there I had not heard of him until I saw his picture today.

Desert Is Hot

"I have traveled practically through all the states since my induction and just finished spending four months out in the deserts of California on maneuvers, where the temperature was about 150 degrees every day until September 1 when it cooled off to about 120 degrees. It has been a wonderful experience and I feel fine.

"Right now I am a company clerk, taking the easier side of life physically, but not mentally. At present I am looking forward to a Christmas furlough and will visit the plant then if possible."

"I have been transferred from Maxwell Field, Alabama, Pre-Flight School," wrote **Cadet Robert P. Walsh,** a former field engineer here, "to Decatur, Ala., Primary School. Here we are receiving our primary flight training, learning how to fly PT-17s, which is pretty new to me as yet, as I have only five and a half hours. Please express my best wishes to everyone in the Field Engineering Department, to **Supt. James J. Murphy** of Group 2 and **Supt. Joseph E. Salmon** of Group 1."

Sgt. Paul McCormick, Camp Claiborne, Louisiana, said all of his associates read his copy of *The Bomb-Shell.* He added he was making good in the Army, having moved up to a technical fourth grade sergeantcy, and that he was busy working on Army trucks.

Wants Girl's Picture

Staff Sgt. J. P. Kinsella, Camp Edwards, Mass., complimented *The Bomb-Shell,* but added that it would be "more perfect" if the picture of **Patricia "Pat" Carlos,** Personnel Department, were published. He sent greetings to **E. G. McAloon** and everyone in Group 6 Power House.

"I have been thinking of the old gang at EOP," wrote **Charles H. Yearick,** U.S. Naval Armory, Toledo, O., who has been in the Navy for three months. "I worked over in old Building 10 in Group 2, then later in Building 12. I sure miss being with the gang and would appreciate letters from anyone at EOP. I am in a cooks' and bakers' school."

Corp. Alvin E. Schroder, Fort Bliss, Texas, who sent best regards to Group 1, where he worked in Buildings 13 and 16, said he had just received his corporal's rating as a technical cook.

Another former Group 1 man, **Pvt. Zell L. Smith,** Fort Knox, Kentucky, said he understood that the girls had taken over Building 13. "I have received a letter or two from my old foreman in Bay 7, **Nathan Cohen,**" he continued, "but I guess he, too, is in the Army now. If there is anyone of a year ago still working in Building 13, tell them all hello, a darn good bunch of boys."

Banana Boat Soon

"I have seen several states since I have been in the Army," penned **Pvt. Otis F. Piper,** Camp Pickett, Virginia. "First I spent my basic training at Fort Knox, Kentucky. Then I was sent to Camp Polk, Louisiana, and placed with the engineers. In July we went to California. We spent three months maneuvering in the Mojave Desert. The temperature actually got up to 150 degrees in the daytime, but it was rather cool at night. We are now in Camp Pickett, getting new equipment and likely will catch the banana boat very soon."

"Before joining the Navy as a third class petty officer (radio technician) October 3," said **Ralph Everett Adams,** Washington, D.C., "I was employed at EOP as a railroad switchman (Group 70 Roundhouse) and my immediate superior was **John E. Ryan,** trainmaster. After four months of intensive training at Great Lakes, I spent nine days of leave at my home in Joliet.

"I returned to Great Lakes and placed in the outgoing unit, where I remained until November 25. Then we left for the Bliss Electrical School in Washington, where we will be trained for the next three months in elementary radio theory and practical application and advanced mathematics. If we succeed in maintaining a high enough average, we will proceed to advanced radio schools.

"Everything here at Bliss is of the finest. Our quarters and food, the classrooms and laboratories, the instructors, grounds, all are conducive to study and advancement. The Navy has taken over the school, but the civilian instructors remain."

Proud Mother Writes

In a letter to **George F. Bent,** personnel director, **Pvt. Melvin E. Watters,** Camp Adair, Oregon, said he hoped "you will be glad to know one more of your boys is doing his part."

"I sure liked my work with you and did my best to show it," he continued. He sent greetings to Group 7 and especially to **Ione Calhoon,** Custer Park, Ill., his former forelady, from whom he would welcome a letter.

Mrs. Nyette Kellogg, Aroma Park, Ill., mother of **Wendell E. Kellogg,** one of the fallen "home front soldiers" of Group 2, wrote interestingly about another son, **Elmer Kellogg,** who was at Pearl Harbor when the Japs attacked his ship, the destroyer Dunlap, but escaped unharmed. Mrs. Kellogg asked that her best wishes be sent to all in Group 2.

Writing in behalf of her brother, **Pvt. William Gillan,** Fort Crook, Nebraska, **Celia Gillan,** Minooka, Ill., said he had been receiving *The Bomb-Shell* for some time and enjoys it very much. "In fact," she wrote, "we subscribed for our town newspaper for him, but he has sent us word we could drop that as he does not care for it, but asked me if I would write and tell you he has been moved to a different address, so that he would continue receiving your paper."

Letters and cards were received from: **Pvt. Matthew Mueller,** Chicago, Ill.; **Pvt. Cyril Newman,** St. Augustine, Fla.; **Pvt. Herbert D. Bellot,** Fort Ord, California; **Pvt. Edward Bishop,** Lubbock, Tex.; **Sgt. Glenn D. Jordan,** Camp Blanding, Florida; **Joseph F. Ambrozich,** U. S. Coast Guard, Brooklyn, N. Y.; **Sgt. LaVerne H. Patterson,** Salt Lake City, Utah; **Pvt. A. E. Gresham,** Corpus Christie, Tex.; **Sgt. Rudolph R. Weise,** Camp Crowder, Mo.., and **E. T. Grendheim,** Joliet, Ill., who wrote in behalf of his brother, **Pvt. Richard W. Grendheim,** Camp Young, Indio, Cal.

Personnel

DARA PREW
Correspondent

Festivities of the holiday season were formally begun for the members of the Personnel Department December 10, when about 40 employees and former employees gathered in a private dining room in the Louis Joliet Hotel for a Christmas party. After a delicious dinner, the group enjoyed dancing. The group as a whole will send cigarettes to all of the department's former employees who are now in the armed forces of the United States. Of course, this list includes only those whose addresses they were able to obtain.

While eating is being discussed, it is really only proper to play tattle tale about **Helen Bardi's** lunch that she brought not so long ago. Just as Helen was about to leave the house, her mother reminded her that her lunch was out in the kitchen. Helen raced out, snatched a paper bag off the cupboard and went racing out to catch her ride. Checking up on the good food that she had to look forward to (or maybe she planned a little sneak snack), she uttered an exclamation of protest. The bag was full of grapes. Now the office has the pass word of "Peel me a grape, Beulah."

Little **Rita "Rusty" Cushing** has had the last word. One Saturday morning she wore high heels to work and as no one of the force had ever seen her in such adult attire, there was considerable comment. At last she could stand it no longer, and in desperation threatened to "run up and down the halls in her bare feet if they don't stop." Not one more word was heard on the subject. The object of much teasing about her height, she only laments, "I was behind the door when the brains and looks were passed, and as if that weren't bad enough, I forgot to grow."

Gordon McQuiggin really had to have an anniversary celebration this year. After seven years of married life, this is the first time the date fell again on Thanksgiving. He spent the whole weekend in the North visiting his family.

While **Charlotte Doxsee** was searching for her erasure shield, **Marcella Burnham** made the remark that she never needed one. She immediately became the center of attention, and Lady Rumor states that she was erasing at the time.

Champion bowler at the Recreation Building, at least from the Personnel Department, is receptionist **Howard Hauze.** He has rolled two scores of 254 and 231 respectively.

Georgiana Flavin is the newest interpreter of the dance or terpsichorean enthusiast. On that first cold, should it be said bitterly cold, day when everyone who could pulled out red flannels, ear muffs and galoshes, Georgiana became the proud possessor of a muff. No eye witnesses can be found, but the dance she performed with that muff will be recorded in the annals of history.

Whether **Maurice Evans** will drive the lunchers out of the fingerprint room or draw more of them in for entertainment, is yet to be decided. For one whole noon he told and retold his experience in "cut-throat" pinochle. According to his description, that is a game which provides all the excitement for which one could hope. However, side-kick **Charles Barr** doesn't agree with him, as the game of hearts is his favorite. And the two vie for honors upon which is more interesting and which should be the favorite game. To date the decision is still a tie because a match has never been scheduled.

The long finger of shame is being pointed at **Marge Bittles** this week. She actually was subdued a trifle for one day, but the effect has worn off. It seems that a woman entered the Lemont bus and insisted upon standing directly in front of the only heater in the vehicle. Marge and other passengers gently hinted and then practically hurled suggestions as to where she would be more comfortable. But there the woman remained and complained about the heat. Exasperated, Marge reached in her purse for a handkerchief and there was temptation in the form of her badge. It was only the work of a second to unfasten the pin and thrust it into the coat directly before her. The woman moved and now Marge blushes when one mentions a pin.

Guard Frank "Mickey" Green has become the advice center of the building. You see, he must have read a book on the benefits of sleep because he's been heard commenting to different members of the force as to how much sleep each of them should have each night.

Delores Courtney, her room mate and radios when mixed well and baked in a moderate oven would not tend toward a readily digested cake. Delores has brought two different radios into their common room. She claims that all she has to do is leave the other girl alone with the radio for a little while and when she returns the machine won't work. Sounds like magic, but it's infallible.

The solution to the present problem for taking children to school will be solved by **Robert Wilhelmi** in a rather novel manner. When his children are old enough to attend school he's planning to buy a bus to take his "raft of kids" to school.

It was only a good imitation cigar but what it did to the morale of the girls who found it lying on their desk tops is another story. **William Leland,** government man, has taken a good deal of teasing about his perpetual cigar and a rather careless habit of leaving it in ash trays and then returning to retrieve it. Some of the girls have gone so far as to throw it in the waste basket. When he was able to procure a good facsimile, he rushed into the building with it. At stated intervals he left it lying conspicuously right on the desks of the most conscientious objectors. By the way, last week he wanted to know where **Guard Don Kane** got his cigar and even said someone must be generous.

There Are No Duds Among EOP Bombs

"There has never been a dud among the EOP bombs dropped on Nazi Europe," was the electrifying message brought back to this country from the commander of a Flying Fortress by a friend who talked with him when he inspected an American air base in England. The flyer said he had repeatedly carried EOP bombs in raids over Germany and Europe and they all went off. Obviously identities cannot be revealed, but the authority for the message is unimpeachable.

LOADING SHELLS from a bucket of TNT is the war job of Mrs. Ida Steward in Group 1 as work for women in the loading lines is extended.

Inert Storage

CHARLES MANN

WILLIAM DENVER

Correspondents

Rabbit hunting is prohibited in the area and the boys are upholding the rules by not using valuable time to crawl under ramps and poke broom handles in culverts. Instead their interests have turned to basketball with the boys of Group 27 showing their colors. They played the Inspectors December 7 on the Recreation Building court. **Edward Spiezio** and **Thomas McHugh** were among those to do the scoring. The final point was made by McHugh by a free throw to win for Inert 15 to 14.

Winfield Arthur was the lucky one to win the War Bond raffled for the benefit of the team . . . they are planning on suits and equipment of the latest type.

Among those leaving for the Army are **William Kokal, Charles Connell, Arthur Williams** and **Edward Younger. Edward Sheridan** of Group 27 will leave next month to serve his Uncle Sam.

Jay Hancock displayed a mean scratch on the right side of his face . . . he claims—and some believe him—that he got it wielding a safety razor in the dark.

The sick list claimed **Charles Gorham** (winter cold) and **Darnell Howard** (winter complications).

New faces at North Inert are **Siegfried Hansen** and **Harold Smith.** Another new face is Tommy the Cat who finds a new home at North Inert Office for the winter months . . . he leaves behind his many friends at the clock house, but will return in the spring.

Duffy Barz had a fight punching the time clock around and wished it was the driver who brought him in late.

Inert Storage men speak through the question of the week.

Question: *What would you like to make your Christmas a Merry one?*

Ed Weakley: I would like Santa Claus to bring me a size 50 bathrobe.

Robert Beshoar: I wish I would find a bowling ball with a carrying case under the Christmas tree.

Clarence Sluiter: If in some way I could get a "C" book I would be very happy.

Andrew Tkachik: I want two steam engines—one for my little boy and one for myself.

Charles Mann: Santa Claus will do me a great favor by bringing me a book on how to play a better hand of poker.

Joseph Baudino: My Christmas would be merry if I would receive a pencil sharpener for the clock house.

Chester Holt: I'm giving instead of asking—staying home and giving that gasoline to the men in the fighting forces.

Joseph Jordan: I would like a new alarm clock with a big bell.

Peter Bollino: A waterboy as helper.

Fred Ford: I want so many things the list is too long to print.

George Newton: A new car with heater and radio.

Matt Reay: Five gallons of gasolene and a re-tread.

Ervin Ramsey: A street car line direct from the city of Chicago.

Thomas Dillon: A real loud pair of socks and a tie.

Jim Whitley: A pretty blue handkerchief and tie to match.

In addition to their Christmas requests, the boys would like above all Peace on Earth and Good Will to Men.

Dirt from the Grease and Oil Division. . . . Living in Lexington is **Percy Boulware. . . . Larry Johnson** has purchased a race horse, time unknown. . . . To his home town visiting old acquaintances was **John McElvain. . . .** Sporting a new tractor is **Ed Agnich. . . .** A patriotic citizen is **John Auberry** who gave up a regular day shift in order to share the ride and use one car only. . . . The chief of this department, **Allen Mayes,** is superstitious. He believes that anyone planning on bringing fish sandwiches to work will not get there. He will tell you the reason.

If your car is hard to start just call **Ray Carlson,** expert technician.

Fellow workers welcome **Lester Tammen, William Kilbride, Jules Bunge, Carl Sala** and **Don Lommatsch** into the organization and wish them every success.

Accepted for active military service are **Donald Sharp, Raymond Hill, Dick Pearson** and **Elmer Edmond.**

Stewart Anderson wasn't able to get to Gibson City last week end. It may have been due to gas shortage.

Electric shop boys want to know why **Alan Heavens** likes his home so cool.

The cookies **Geraldine M. Ward** sent your correspondent were very much appreciated.

Robert Brais and **Irvin "Stoney" Shelby** say it is as difficult to make *The Bomb-Shell* as it is to get to the paymaster's desk on Thursday.

Mr. Anderson had the highest bowling score December 7. **James "Shooter" Sinkular** was second. They weren't participating in the Tribune All-Star League, only in the group league.

The Inspection Department has ordered more report paper since the return of **Ed Korevac.** Ed is noted for his ability to write outstanding reports.

Whit Miller has been unanimously appointed advertising manager for Group 61 "high power" nitrate. Not a complaint in a carload!

James Decker, in the near future, is going to tell more about his trip to Chicago.

When the old song, "Yes, We Have No Bananas," is heard, **Jim "Toney" McNulty** is recalled. Jim is putting his time in for the well known Uncle.

Letters were received from **Bob Allen** and **Bill Gillan,** now employed by Uncle Sam.

If in doubt, ask **Fred "Tiny" Kase** about the slenderizing characteristics of homemade sauerkraut juice. He brought his weight down to a little over the 200 mark.

A. E. Frosch and **P. L. Deylitz** are awaiting payment of a bowling debt owed them by **Connie Carlson** and **Joe Stark. Sam Mount** is teaching **Arnet Dressler** how to bowl.

Victor Fournier is the proud father of a baby girl named **Lindy Lou.** The child and father are getting along fine.

ATTRACTIVE is the word for Carol Marie Sonday, 3-year-old daughter of Harold Sonday, sub-foreman of pipefitters in Group 2.

Paul Burke isn't worried about food rationing He is taking vitamin pills. His pal, **Willie Biggs,** thinks that Paul will cause rationing of nourishment by buying so many balls of medicinal substance.

It would be nice if . . . the prescription of cough medicine used by **Charles Hinz** were known to the public . . . everyone knew that **"Tad Bob"** is **Nelson William's** nickname . . . wheels were on the top as well as on the bottom of **Ed Westmeyer's** car . . . girls didn't insist in having **Clifford Kidney** go shopping with them . . . more knew why **Tony "Simon" Ganz** sent the two new men to the Crusher Building — it may have been their size . . . tractor wheels were on the bottom of his car so **Walter Boughton** could get out of the ditch easier . . . the next day after his day off **Vince Madsen** would come to work . . . interested persons knew that **Don Coldwater** is aiding the scrap drive by bursting autos . . . **Clyde Townsend** had a bucket that was easily searched . . . the other electricians knew that their boss, **Frank Kachelhoffer,** has taken out insurance on his dollar watch since he can't carry it into the group . . . **Murrell Albright, Jr.,** were able to see stop signs and not the chief of police.

GROUP 3

NORBERT McLUCKIE

Correspondent

Bits of Gab Heard Along the Line:

"Oh yeah, I got a 'C' book but they tore half of it out."

"I haven't heard about my gas yet."

"*The Bomb-Shell* sure had some good pictures of the Pearl Harbor attack."

"I bought some War Bond chances from **Mary Kulpa** at the Group 3 dance, but she didn't sell me any winning numbers."

"Well, **Ray Rivard** has gone to the Army. We'll sure miss him."

"Who is that working in the office now? Oh, is that **John McCarthy?**"

"Why don't I get my copy of *The Bomb-Shell?*"

A fellow who speaks with good authority says that **Norbert McLuckie's** taste for caramels has vanished. In case any one wants to know the reason, **Leo Wagner** and **Eddie Copp** can furnish the information.

Frankie Underwood, a member of long standing in Group 3, has made better transportation connections by transferring to Group 1. His old pals in Building 3 miss him, but wish him luck.

The Group 3 dance, held at the Recreation Building, was said by all to be a very great success despite the bad weather of that night. Proof of the success of the party can be given by **Gerald Clennon, Tony Gomora** and **Tom Sprague.**

The dance proved to be one of the highlights of the season as far as the EOP Recreational Program is concerned. The morale of all employees is greatly improved by such fine occasions.

The Group 3 basketball team is out to equal the excellent record made by the baseball team. It has made a terrific start and are undefeated, just as they plan to be all season. They are not making any unbased claims, but "watch out" is the word sent to all opponents.

Robert Douglas, Building 10, goes around smiling all the time. No wonder, he and his wife are proud of their new addition to the family. It's a girl!

Army Flyer Stresses Quality of Ammunition

"You've got to have good ammunition when you're flying B-17s," said **Lt. Burton English,** Army pilot of Hendricks Field, Sebring, Fla., when he paid a brief visit December 10 to Group 1, where he was employed before his enlistment January 27.

"When you aim at a Jap or Nazi plane and pull the trigger something had better happen because you might not have time to repeat the performance if your first shell was a dud," continued the pilot. "I'm confident EOP is producing no duds, because I know the gang who is putting them out."

Lieutenant English, who formerly lived in Joliet, expects a combat assignment as soon as his crew is assembled.

Asked if he got a kick out of coming back to EOP, Lieutenant English said he did, but added that he was amazed when he saw in where he used to work, Building 13, all of what he used to think were the hard jobs now being taken over by girls. "But what it takes to keep 'em shootin', these EOP girls have . . . God bless 'em," said the pilot as he dashed off for Joliet from where he departed that same night.

Employees Cautioned Again About Talk

Your attention is again called to reports that some of Sanderson & Porter's personnel have been heard discussing matters relating to the work which this plant is doing.

While we realize that this sort of discussion is for conversational purposes only, nevertheless, you are cautioned against discussing these matters among yourselves or giving to outsiders any information whatever relative to any phase of our work. This policy is necessary if we are to guard against subversive action by those unfriendly to the war effort.

W. E. Canniff
Manager, Engineering and Operations

OPERATING EXECUTIVES of ordnance plants are shown as they held their monthly meeting here December 1. Pictured clockwise around the table are John F. Daley, office of Field Director of Ammunition Plants, St. Louis; E. M. Shinkle, general manager, Iowa Ordnance Plant; E. E. Ware, general manager, Illinois Ordnance Plant; Alexander Cromwell, general manager, Kansas Ordnance Plant; R. D. Hager, assistant general manager, Lone Star Ordnance Plant; W. E. Canniff, manager of operations, EOP; C. L. Taylor, comptroller, Louisiana Ordnance Plant; John J. Cole, comptroller, EOP; Harrison Smith, resident partner, EOP; Maj. Raymond Rebsamen, office of Field Director of Ammunition Plants, and J. T. Power, general manager, Ravenna Ordnance Plant.

Fire

STUART MOLONEY

FRANK J. SKOFF

Correspondents

The *dinner* music for the last Fellowship Supper at the Cafeteria was furnished by the Plant Protection Pla-boys: **Ed Stonich**—guitar, guard; **Clayton Fomento**—sax, guard; **George Zelke**—squeeze box, fireman, and one guy who played such "ungood" drums that his name wasn't even reported.

Bill Reichert:—"What is an icicle?"

Walter Lueder:—"A drip that was caught in the draft."

Another issue of *The Bomb-Shell*, another story of a chain-break. Saturday, December 5, **Asst. Chief Charles Davis**, accompanied by **Firemen Dayle Pratt, Francis Ryan, Dick Jensen, John Harbison, Kenny Brooke, George Rogina, Norm Heath, Mike Olson, Ralph Rausch, George Philip, Joe Drazy, Ermand Marco, Bill Bolton, Fred Johnson, Matt Froncek, Tom Downey, Bunny Marek** and **Ichabod Ichelheimer**, (names are what count in this column) braved one of winter's worst days to retrieve—yeah, you guessed it—Smokie. The little one became lonesome for the great open spaces and invaded the North Inert area, there to be pinched by the pincers of the above named crew. Taking a cue from her name, the boys corraled her in a long stretch of culvert tiling and set the precedent of a Fire Department starting a fire to get their quarry. After 339 whiffs of smoke-filled air the culprit was urged into a sack and taken back to the station where she made life unhappy for your reporters the rest of the day.

The Fire Department menagerie was recently augmented by two mousers. **Chief Roy W. Mortenson** will no longer be made unhappy by the patter of little feet in his office. But there is one person who wishes **Frankie Nolan** would stop calling the smaller kitter "Moloney."

Chief Mortenson tells the story of the would be draft dodger who hurriedly borrowed his friend's truss for the Army medical exam. After one look the doctor marked "E" on the "hero's" leg—which led that worthy to chirp gleefully: "Gee, Doc, does that mean I'm excused? Please tell me what that (E) stands for." So the M.D. gives it to him something like this:—"Excused, my eye, anyone who can get along wearing a truss backwards can ride a camel. That E means you're headed for Egypt."

Overheard at the currency exchange (by those that got that far): Dorothy:—"I heard he was rejected because of his "snoo." Paul:—"What's 'snoo'?" Dottie:—Nothing's new—what's new with you?"

Now that voluntary enlistments have been stopped **Frank Scoma** just doesn't know what to do.

John Connelly, inspector, still thinks he can pick the football winners: —"I'm bound to win eventually—the law of averages is on my side." But **George Collins**, inspector, disagrees and *he ought to know!*

And then there was that fellow **Frank Skoff** who bet on Great Lakes and gave Notre Dame one point. Amen!

The Bowling Team won its first victory in its first start and already has dreams of being unbeatable.

Warren Colby bowled a 265 the other evening—the highest game yet recorded on the Recreation Building alleys.

The Firemen's basketball team is made up of **Roy Wright, Ed Dickens, Joe Catalani, Loris Hart, Larry Dailey, Ed Stricklin, Rudy Getson** and **Herman Guyot. Captain Wright** is trying to line up **Tom Ness** and **Nick Cleary** for cheer leaders.

The boys at Fire Station 1 are willing to bet that **Assistant Chief Davis** can row faster than any one here. Of course, **"Tate" Ehmen** says, Charlie would have to be paced by a mallard hen. **Fireman Ehmen** describes Charlie's recent workout thusly: Charlie cripples duck — duck starts swimming — Charlie starts rowing—duck leads by a length—they are nearing the east shore—duck maintains a slight lead—duck makes shore and safety in weeds—Charlie loses duck.

Ehmen shoots to kill. We will have that duck dinner.

While Davis was having his rowing exercises, Tate got three beautiful black mallard hens. (This story got out in spite of **Pat Rodgers'** efforts to gag the press.)

Swell letters have been received from **Wiley Bell, Bill Scanlon, Charlie Crain** and **Wendell Sumner** in the armed forces.

Charlie Jiskra refuses to answer any mail received during the pursuit of his duties.

Sgt. John Alar is looking for a homestead, preferably in the "Tan-Mallet" district on the banks of the Kankakee River.

George Hayes, Fire Station 2, is the champion banana eater. He says he can eat a stalk of bananas between Granite City and Carlinville. (He does this before he eats a hearty dinner.)

The Fire Department basketball team bested the Truck Drivers in a practice game. The sight of Wright in his leopard-skin panties and Dickens in his bloomers couldn't be withstood.

Pre-Christmas Pay Checks Due Wednesday

Pay checks will be issued to EOP employees Wednesday, December 23, instead of Thursday, December 24, the day before Christmas, it was announced by the Comptroller's Office. This service was rendered to employees also the Wednesday before Thanksgiving Day, but regular Thursday paydays will be resumed December 31.

Groups not appearing in this column have been eliminated because of lost-time accidents during November.

More Power to You

IRELAND is now the scene of operations of Robert E. Cushing, formerly employed here in outside operations. For 17 months. He was at Fort Knox, Kentucky, before going overseas.

EOP's "Miss Victory" Honored by Club

Betty Foster, EOP's runner-up in the district finals of the *Chicago Herald-American's* "Miss Victory" contest, was a special guest of **Mrs. Marjorie Pyle**, president of the Joliet Business and Professional Women's Club, at the organization's Christmas dinner party December 10.

Birthdays on Christmas For 45 EOP Employees

When you send Christmas cards to a certain 45 of your co-workers, don't fail to add birthday greetings, for they have the distinction of observing their anniversaries on the day Santa Claus calls. Their names are listed under December 25 in the adjoining "Happy Birthday" column, so you have a week to change your cards.

CLEANING SCRAP TNT from a cooling tub after the explosive has been poured into shells keeps Venieta Ruddy busy in Group 1.

Meetings Held Here Part of Big Program

Meetings of the general managers and comptrollers of bomb and shell loading plants here November 29 and 30 and December 1 were a part of the program for improving operating efficiency developed by **Gen. Rosswell E. Hardy**, Office of the Chief of Ordnance.

A committee of representatives of all munitions plants was set up under the supervision of **Col. T. C. Gerber**, field director of ammunition plants, St. Louis. This group was separated into sub-committees, one of which represents shell and bomb loading plants. **Alexander Cromwell** is chairman of this committee. **John J. Cole** is chairman of a special committee of comptrollers representing this group.

Reports on costs, production and efficiency are submitted to Colonel Gerber. Committee recommendations and conclusions are cleared through **John F. Daley**, Ordnance Department consultant.

Before meeting here, other monthly sessions were held at the Kingsbury Ordnance Plant, the field director's office in St. Louis, Ravenna Ordnance Plant and the Iowa Ordnance Plant. The next meeting will be held at the Kansas Ordnance Plant, Parsons, Kan.

Don't Take Another Person's Newspaper

It has been reported that while *The Bomb-Shell* is being prepared for mailing in the corridors of the Administration Building, copies bearing the name and address of workers are picked up and carried away by employees who can't wait for their own copy. *The Bomb-Shell* appreciates the implied compliment, but the disappointed workers do not. Please withstand the temptation, and don't "dood" it any more.

COSTS AND PRODUCTION are studied at monthly meetings of the comptrollers of ordnance plant. Shown clockwise around the table as they met here November 29 and 30 are Paul Skilling, Iowa Ordnance Plant; K. R. Huffman, Lone Star Ordnance Plant; H. E. Lester, Illinois Ordnance Plant; Ken Hinman, Kansas Ordnance Plant; John J. Cole, EOP; H. Palmer, Ravenna Ordnance Plant; C. Mayer, Ravenna Ordnance Plant; George B. Pumphrey, EOP, and C. L. Taylor, Louisiana Ordnance Plant.

Mr. War Worker— *Don't Enlist!*

"During the past months a large number of men employed in war plants have resigned their positions in order to enlist in the Army or Navy. The patriotic spirit which has prompted such action is in accordance with the high traditions established in the previous wars which our country has fought. However, in the present world-wide struggle the task of maintaining an increasing flow of the tools with which we fight is as important as that of effectively using those tools in battle. You men who are engaged in this vital work should remember that your Government, and your fellow citizens, are clear in their convictions that you are doing your full duty in staying at your present post unless and until you are called or until your services can be spared. An impression has apparently been created that a man who enlists in the Army will enjoy advantages with respect to promotion, assignment of station, etc., over a man who is inducted. This is incorrect. In such matters the Army treats the enlistee and the inductee on an equal basis. We have no doubt that in many cases it may seem to involve a greater personal sacrifice to stay on the job than to march away. If this is so, it is a sacrifice that we call on you to make. It is only by the unselfish and coordinated effort of the entire manpower of the country that we will be able to complete the great task that lies before us."

Henry L. Stimson
Secretary of War

Frank Knox
Secretary of the Navy

CHIEF CHEMIST H. E. Hafele has set up in the High Explosives Laboratory an institution of which EOP is proud. It is visited frequently by chemists and high explosives officals from other ordnance plants.

Group 1

JACK BARRY
Correspondent

Study in futility—trying to get people to pronounce data correctly—after nearly a year of intensive effort one man has been partly converted. He is **Walt Wilcox**, who timidly comes out with it about once in every ten times. **Mid Slack** says that common usage makes anything correct but your correspondent always has had the impression that it's preferable to be correct rather than common. . . . **Judith Lynn Sassenger** will no doubt use the incorrect pronunciation many times in the next couple of years when she addresses her dada, **Ralph Sassenger.** Judith was born November 20.

Dottie McClellan, better known as "Little Bit," objects to being referred to as being cute as a spotted pony but she is mighty cute.

A friend filched **Fairfield Fergy Ferguson's** forty folding frogskins from foolish Fergy. Frantically Fergy flaunted fists but forgave and forgot when the female friend returned his forty at the finish of the festivities.

Clink Clair says his gray hair is not indicative of advanced age and claims he got that way when as a callow youth he played baseball in the State League. His pal, **John Holman**, has no alibi for his well-known pompadour.

This reporter worked on Thanksgiving Day and was tickled pink when **George Gibson**, assistant superintendent, sent over turkey, cranberry sauce and hot coffee.

Esther Anderson, genial nurse at our first-aid station, startled one and all by asking the telephone operator, "What do I do that's wrong?" Ear witnesses breathed freely again when it developed that it was only a matter of successful dialing.

Someone caught a couple of fat rabbits and put them in a box in the office one day. Fried rabbit was visualized but soft-hearted **Tom Shay** turned them loose. Think of that and he'll soon be out there killing Japs.

Steve Kokas is known far and wide as the big bank-roll man and goes around financing various projects and projectors.

Fred Harris, senior inspector, uses this typewriter now and then and gets it so hot that it has to be set out in the snow to cool off.

Frederick Jacobs fell and sprained his ankle on the icy roads, but was back on the job in two days. Nize work!

Elmer Turner, big booster man, is an unofficial Walter Windshield of the loading line. He comes up with a bit of news and a smile but objects to being termed clown. To put it in his own words: "You might at least dignify a fellow by saying buffoon."

Bob Leroy hails from Tennessee and doesn't enjoy these wintry blasts any more than **Sam McGee** did, but Bob is not in favor of cremation.

George Prodehl, ex-expeditor extraordinary, has passed his various tests and has been accepted for cadet training in the Army Signal Corps. George is supposed to have a trick or two up his sleeve which will help in expediting the end of the war.

All are quite proud of the fact that **Sylvia Hamper**, who used to be round and about as one of the charming first-aid nurses here, has enlisted in the Army, been commissioned a lieutenant, and has departed for Ft. Sheridan to take charge of the situation.

Five brave carpenters a-hunting went and each bagged the limit. **Sim Muzzarelli, Harm Guicken, Doc Davidson, Louis Voiko** and **Al Bloxan** are the nimrods, but from this bird's-eye view none of them knows how to cook.

CORROSIVE ACTION of ammonium nitrate liquor on various metals is a continuing study at the High Explosives Laboratory. Marcia Mitchell, chemist, is shown making a check of a current test of the action.

Timekeeping

NICHOLAS BELLUSO
Correspondent

The main Time Office at Richards Farm is planning a small Christmas party to be held December 23. There will be a light lunch and a program has been arranged during which Christmas gifts will be exchanged. The decoration committee consists of **Ray Bryant, Len Bottomly, Marge Downs** and **Geraldine Graham.** The program committee will be **John O'Connell, Milton Treitel, Bernard McShane** and **Angeline Gunnerson.** The cuisine will be handled by **Marcella Corbett, Irene Morris, Emily Kexel, Marie Darin** and **Nick Earthly.** The gift committee will consist of **Eva Sweda, Rosemary Veach, Tom Brennan** and **Nick Belluso.**

Christmas gifts arrived early in three family households when **Dale Aman's** wife presented him with a bouncing baby boy, **Paul Donahue's** wife presented him with a new son and Mr. McShane, assistant chief timekeeper, became a proud grandfather.

Miss Victory has been chosen but the Time Department has its own Mrs. Victory. She is **Mrs. Bessie East**, who has just given her third son to the armed forces. Besides giving up her sons to Uncle Sam, she also works in a war plant, her husband is in war work, she purchases War Bonds weekly, communicates by letter with soldiers and she saves all her kitchen fats.

A Testimonial Dance was given in honor of timekeepers leaving for the armed forces. They were **Harry Knarr, Carl Parker, Robert Gehrke** and **Samuel Epstein.** Two more fellows who have left are **Donald Sharp** and **Russell Murphy.** Don joined the Seebees while Russell is in the regular army.

Riding the Range

John Hohisel has a wonderful imagination, according to **Bernard Smego. Jimmy McHugh** has taken over as key timekeeper at Group 3-A since Mr. Knarr left for the Army. **Albert Berard** has joined the department. Group 3-A collects more musical talent., Every new timekeeper who comes in has either played with an orchestra or has played some musical instrument at one time or another. **Tom Delockery** has a habit of getting down on bended knees to tie lovely ladies' shoelaces. **Arch LaBorence** has a brother who has been in the Navy for more than 15 years and who saw plenty of action in the Islands.

For the comfort of one of the fellows, it is reported that the youngest grandfather in the world is 29 years old. According to dress, **John Binkowski** is the typical horse trader. All he is lacking is a whip and Mr. O'Connell supplies that. Golden Boy **Carl Cornelius** is still trying to get a priority on his ticket to Tokio.

Paul Lauer is walking in a ditch at St. Joseph's Hospital, caused by pacing back and forth on the floor. **Dwight Reitz** didn't get to go to the testimonial dance because of the sudden snowfall, etc. Miss Gunnerson is leading a very quiet life now that the Army has taken over. **Bessie East** has moved down to Personnel so that new employees would be saved the trip to the Time Office for time cards.

The Timekeeping Department extends its deepest sympathies to **Dwight Reitz**, whose mother died recently.

A newly organized basketball team composed of **Bill Prindle, Mr. Treitel, Tom Delockery, Ray Bryant, Dee Johnson, Nick Belluso, Bob Griffin, Carl Cornelius, Frank Guest, Don Glasgow, Frank Zupancic, Vearl Heinis, John Blatnik, Frank Kopic, Harold Champley** and **Homer Smalt** has started practice. The team is being coached by genial **Ben Sloan**, while the cheering section will be led by **Angeline Gunnerson** and **Rosemary Veach.**

BUSY LITTLE BEE is Verneille Holder, secretary to H. E. Hafele, with the multitude of daily test reports which the High Explosives Laboratory sends to storage and loading officials throughout the EOP area.

Guards

GENE RYAN
Correspondent

Anyone interested in fox hunting should contact **Officer John Kemp** at Group 3-A.

Lt. Joseph Trecker is nominated for the roll of Santa Claus for the coming season in view of his jolly little jingles which continually help to keep up morale. All the little children would be made very happy.

The Grapevine is hot with rumors about the purpose of the new mechanical ears in the squad and locker rooms. However, there seems to be no doubt in the mind of one lieutenant who recently departed for the Army.

Many questions are being asked as to where **David Wayne Baker**, dispatcher, got the name "Psychosis"? Another nickname for the above boy seems to be "I'd like to grow a mustache, if I could, something like **Paul Stacel's.**"

Ed Ritchie must have influence to overcome priority restrictions sufficiently to get enough leather for those gargantuan brogans he wears.

The crack in the floor behind the radio at headquarters has been fixed. So once again it's safe for "I-have-to-stand-twice-to-make-a-shadow" Stacel to venture back there.

A note to the oldtimers! Remember when: It took just one station wagon and a few squad cars to make the relief? And every half a mile or so the crankcase was dragging in the mud? There were no Signal 8s to worry about? Post 14 nestled beneath the cottonwoods and the rustle of leaves lured you close, nay, dangerously close to the arms of Morpheus? No time signals emanated from the Central Station every half hour? The fire house and reclining chair at the Group 2 lumber yard made one of the best posts here?

Question of the day—Who is the "Claw" and his bosom buddy, the "Shadow"?

They wonder if **Bob Pelton**, one of **Sgt. Leo Keigher's** boys, is still keeping an employment record of one whose age should be around 100 or so?

Genial **Ross Briley** has kept his thumb out of the heater recently.

Bidding farewell to two veteran guards, the Department also welcomes back a former guard. The two men joining Uncle Sam's army are **Lt. Frank Butala** and **Tom Ryan. Arthur Metz** has returned to the force.

Word has been received from a former guard, **Bill Blietz**, who is located at U. S. Naval Training Station, Farragut, Ida. He reports that he enjoys his new work very much.

It is rumored that **Walter Britz** won a couple of goats at a raffle. Not being familiar with domesticating animals, he is seeking advice. At present, they are roaming the hills of his vast estate on the banks of the Ill.-Michigan canal.

Joe Verbic has a very sensational story (true) titled "The Cat's Meow." The principal character is Joe himself, and the (in)subordinate character is the poor little cat. For further details, see Joe, as he will demonstrate a window-breaking act.

Arthur Hansen and **Rudy Fredricksen**, who patrol the east side fence, came into Headquarters after work all covered with snow. When questioned, they stated it was not the slippery footing that made them fall down, but the rabbits were so plentiful since the recent snow they tripped over them.

Congenial **Lt. Don Hoffman** is the quiet gentleman stationed in the Fuze and Booster area. For some time your reporter has endeavored to dig up some news about Don, but his efficient manner has prevented.

AMMONIUM NITRATE undergoes a "pH" at the hands of Chemist Palmer Overholt with the help of this intricate apparatus. A "pH" is a test to determine the acidity of the ammonium nitrate received from Group 61.

EXPERT TECHNIQUE is observed when Richard Orndorff, chemist, dons a spotless smock and goes to work at one of the immaculate tables in the High Explosives Laboratory. Here he is weighing ammonium nitrate.

Ordnance Inspection

GERALDINE M. WARD
Correspondent

William F. Douville, chief inspector, will have to take time to familiarize himself with the new gas rationing routine. The first day the new law was in effect, Mr. Douville drove into a service station requesting eight gallons of gasoline. He presented the attendant with coupons and drove off without paying the $1.56 for his purchase. The attendant ran down the highway in pursuit, but was unable to catch up with Mr. Douville who is known to his friends as "Speedy."

William H. Peterson, assistant chief inspector, was awakened at 3 a. m. December 2 by a Wilmington neighbor and a prospective father who asked him to drive his wife to a hospital in Joliet. Mr. Peterson was determined to beat the stork and he did by ten minutes. Everything happens to Mr. Peterson, as the heater in his car failed and the wind shield wiper was not functioning, which made it necessary for him to drive the 21 miles with the windows down and it was 6 below zero.

Reluctant farewells were bid to **Roy A. Scherer**, Gage Laboratory, who was inducted into the Army December 5. His co-workers remembered him with a gift and wished him the best of luck.

Ship ahoy! Ship ahoy! The first sailor boy to visit Ordnance Inspection where he was formerly employed was **Bernard A. Kapsch.** "Bernie" was here December 2, looking healthy and prim in his uniform. He says the Navy is tops.

The customary song sung by men whose wives have gone on vacations is "Hurrah! Hurrah! My Wife's Gone to the Country"! ! ! ! ! Not so in the case of **Garr Burt** and **Kermit Long.** They were weeping on one another's shoulder. Their song was entitled "Oh, How I Miss You Tonight." Mrs. Burt spent a week with her parents in Ohio while Mrs. Long visited with her parents in La Salle, Ill. The telephone wires between the Burt and Long residences were kept hot by the daily conversations between Mr. Long and Mr. Burt. It seems Mr. Long was not familiar with the cook book and all he could cook was eggs—and not very well at that. He was puzzled as to how long to boil eggs so that they would be palatable. Before the return of Mrs. Long he had had boiled eggs, poached eggs, fried eggs and omelet. Of course eggs sell at 55 cents a dozen and the budget didn't balance.

Donna Joan Smith who arrived September 28, is growing rapidly and getting along nicely. Her daddy, **Paul R. Smith**, assistant chief inspector in Division I, can be seen every Sunday morning in the back yard (clothes pins firmly clasped between his lips) hanging up those little dainties, and they're not dish towels.

Clara Wehner, chief clerk, completed two years of service with Ordnance Inspection here November 26. She is now wearing four service stripes on the sleeve of her uniform to signify the length of service.

Ordnance Inspection extends sympathy to **Harry Larsen**, guard, whose brother died recently.

Merry Christmas to all and sincere appreciation to each and everyone of you who contributed news during the year to make the column a success. Will be seeing you in 1943.

This department welcomes **Lt. M. G. Brandon** and **Capt. Julius I. Bach** who have been appointed assistants to the Army Inspector of Ordnance.

CONSTANT TEMPERATURE is required for many tests at the High Explosives Laboratory. Nelson Tippett, chemist, is shown here taking nitrate moistures from an oven in which constant temperature is maintained.

Women

Christmas Salad Recipe

Christmas dinner comes but once a year and that is always a festive occasion. **Geraldine Ward** took a peek at her private file and pulled out a Christmas salad recipe that's good to eat and decorative as well. You need one package lemon jello dissolved in 1 cup of water and cool, one package Philadelphia cheese creamed with ½ pint cream (unwhipped), small bottle maraschino cherries and a few green ones, drain and cut into quarters, one medium can crushed pineapple with juice (reserve ¼ cup for custard dressing) and nut meats. Place all ingredients into cooled jello in an icebox dish or mold. This can be made night prior to serving with the following custard dressing for which you need 4 tablespoons sugar, 2 teaspoons flour, 1 egg yolk, ¼ cup pineapple juice, ¼ cup cherry juice and ¾ cup cream (whipped). Combine sugar and flour and sufficient fruit juice to moisten, add egg yolk and remainder of fruit juice and boil about three minutes over low flame, stirring constantly. When chilled and ready to serve, fold just enough into the whipped cream so that cream retains firmness. Place sliced salad on lettuce leaf and top with custard dressing, garnishing with cut halves of maraschino and green cherries (serves about 6 to 8).

Popcorn Protects Cookies

The boys in the armed forces are putting up a protest. It's not the G.I. shoes. It's just that cookies sent from home with such lovely care and fancy trappings are smashed to bits on arrival. **Lucille Ambrose**, of the Comptroller's office, has the solution. Send two treats for the price of one and they both arrive in perfect condition. After you've packed the cookies, fill the spaces with popcorn.

"She's a WOW"

"She's a WOW" is the caption on the Ordnance Department's latest poster, glorifying the woman ordnance worker. There's a reproduction of the poster, created by **Adolph Treidler**, in the November 23 issue of *Firepower*. And watch for articles by **Mary Virginia Drayer**, women's editor of *Firepower*, for interesting data about women in plants all over the country.

INTRIGUING GADGET is this piece of apparatus on which Charles B. Clifford, chemist, is making an electro-analysis of lead at the High Explosives Laboratory. Note the array of chemicals above the work table.

Scott Soper after returning from seeing a double feature believes a movie hero is one who sits through it.

Jack Shelley was going to kill the turkey to celebrate his tenth anniversary, but his wife said no, it didn't have anything to do with it.

E. V. Sperling furnished such fine locks that it was necessary to place some one to watch *them* instead of the buildings and their contents.

Jack "Simon Legree" Murray was visiting in Streator last week, so **Frank Feeley** was in charge of Old 144.

Leo Changnon, the "hay king," was here on a visit last week.

Art Voss has steam heat installed in the dog house because he says he was in it so much last winter.

Bert Zombracy came in to say goodbye. He left December 8 for Rockford.

Presley Hankins says how quickly the little ones grow up. You no sooner get through sitting up with them than you're sitting up for them.

Group 2

Thomas "Tennessee" Kenner made a special trip to Chicago to see "Maid in the Ozarks." It may be homesickness.

This group welcomes the arrival of **Lester Kammerer, Philip Lipson, Howard Fischer** and **Roald Evenson**, former inspectors at Group 1.

Philip Grove, recently called by the Army, is an officer candidate in the Field Artillery.

Thomas "Tommy" Shanks has put in an appearance at the group after taking a much needed rest cure at the Marine Hospital in Chicago.

Group 5

Amid tears and fond adieus, **Eleanor Lea Gudath** left her cherished position as office "goil" at Group 5 to go to Group 7. She exchanged places with **"Millie" Stutz**, better known as the "blonde bombshell."

Many wonder if **Elsie Doman's** husband, **Tony**, fireguard, is as good a fireman at home as he is at EOP.

"Phil" Horwitz was presented with a lovely Gladstone traveling bag by fellow inspectors as a farewell token. He is soon to be a "boy in khaki."

"Gwen" Denny is now on a diet. Now she only eats enough to keep two horses alive instead of three.

Facts that have come to light: **Billie Snevely** was once a star soloist with **Jack Russell's** orchestra; **"Kathy" Cyphers** was voted most popular girl in her class at high school in Clinton, Ill.

Group 8

Congratulations and best wishes go to **Park Paxton** and his bride, whose wedding took place November 29 in Beverly Hills.

Sig Wysocki saw the Ohio-Illini football game at Columbus.

Mrs. Susan Bullack announced the engagement of her daughter, **Helen**, inspector, to Edward Roziak. No date has been set for the wedding.

It is wondered if **Marge Kertes** used her own money to pay her losses on the Ohio-Michigan game.

Group 6

Group 6 welcomes **Lorna Haller** and **Max Krup** from Groups 5 and 4, respectively. **Donald Sutton** has been transferred to Group 7.

Paul Barhoover has returned after a leave of absence of several weeks. **Julia Turk**, formerly of Group 6, is now employed at East Chicago, Indiana.

Catherine Fitzmaurice is now working at Group 1. **Gertrude ("Gert") Collins** is very stunning in her new fur coat.

Vernice Collette has returned to work after a brief vacation spent at home with her husband, who was on furlough to recuperate from a recent operation. **Elizabeth Button** has returned after an illness.

Fuze and Booster Lab

Howard "Master" Johnson has left to take up work at Northwestern University where he is being trained in the Electronics Division of the Army Signal Corps

Joseph "Slave" Ralston has reported at the Columbia University in New York City for preliminary training for the Navy V-7 program.

Melvin "Pliny" Hurwitz took final exams at the University of Chicago to complete his masters degree in chemistry and has since gone to Boston, Mass., his home.

Robert "Bob Burns" Harbison is giving full time to the Operations Division with office here.

Lorraine Kinsley is back on the job now after an absence due to the death of her father. Deepest sympathy is extended by her fellow workers.

Harriet Nadelhoffer, Lorraine Kinsley and **Marie Plankar** are now "alone" holding down the desks. They're doing so well that

TITRATING TNT is the official name of this test which determines the acidity of the explosive. Ford Teeter is the chemist. Additional photographs of the High Explosives Laboratory are on Page 12.

SIGNS OF THE TIMES are painted for all departments in the Sign Shop at Richards Farm. Three of the painters paused in their work momentarily for this picture. Shown left to right are Harry Dank, Jack Daniels and Earl Whipple.

Ordnance Inspection

(Continued from Page 7)

a new desk was delivered the other day.

Group 7

Physicians sign their names and add M.D. Dentists, of course, add D.D.S., but many are puzzled by the signature **Sylvia C. Nielsen, G.P.**

Ruth Phillips' hands are like cakes of ice but her "dogs" have won every pacing race that they have tried.

The five gals seen with **Bob Cretcher** every day work and ride with him, so he can't be kidded.

Helen Zivic has joined the group.

Ruth Capanash has just returned from a month's leave she spent with her husband in Tennessee.

Irene Bazzarone is, without a doubt, the happiest person in Group 7. Her husband is expected home Christmas.

Samuel Eskridge has resigned to help his Uncle Sam.

Group 7 has welcomed **Bernice Ksiazak** (all out for Army), **Helen Biernat** (Duffy's Tavern Fame) and **Catherine Cyphers** (big blue eyes) from Group 5. Another new member is **Donald Sutton,** as yet unknown.

Group 1

Harvey Barrett has been in the Dwight Veteran's Hospital for two weeks with a serious case of carbuncles. His terrible jokes and his full lunch pail that always seemed to have something else in it no matter how much he took out of it, are missed.

Zigmund X. Pluskota is now stationed at Kelly Field, Texas, with the Army Air Corps. He gained his flying experience while still very young; he used to fly (quite low to the ground of course in his '34 Chevvy from Chicago to Elwood when he was stationed here.

Emil Bruni is *"wid dose bums"* at the Brooklyn Army Base, Brooklyn, N. Y. "Handsome" or "Indian puss" is the most missed man from Group 1. He's right at home with the Dodgers. He'll use his tomahawk if he doesn't get enough EOP ammunition. Twenty girl inspectors are to be added to the staff of **Andre Lombardi.**

S & P Partner Is Visitor Here

D. J. Walsh, Jr., New York, a partner of Sanderson & Porter, in charge of the Industrial Department for the firm, visited briefly here December 8 on his way from the West Coast, where he has been engaged in airplane production projects, to New York.

Emergency Calls

To report a fire . . . Dial 17
To call police . . . . Dial 2229
To call ambulance
(emergency only) . Dial 4262

Report the nature of the emergency. Be prepared to answer all questions a doctor may ask. He has good reasons for asking these—in order that he may come prepared with the necessary equipment.

Group 2

EDWARD KEENAN

WILBUR GALBRAITH

Correspondents

It was with mingled emotions that the news of **Charles "Lockwood" Pierce's** departure from Group 2 was heard. Some fellows were sober-faced, some laughed and doubted the story and some expressed their sentiment by holding back a tear, all of which displayed fondness for Chuck.

An EOP employee for almost two years, Chuck established an enviable record. Blessed with an inexhaustible knowledge of almost any subject, his accomplishments in the construction and operation field left little to be desired. His uncanny ability to get results from both new and older employees won him the respect and admiration of every one.

Supt. James J. Murphy and **Assistant Superintendent Gene Hunt,** in commenting on the loss of Chuck, said "his all around leadership will be sadly missed."

Recently a new employee by the name of Abraham Lincoln reported here and was assigned to Building 3 for work. Later in the day when the news got around one of the boys in Building 12 called Building 3 asking that Lincoln be sent to Building 12 to free the *slaves.* Incidentally, Lincoln says he is a distant relative of the Great Emancipator.

Ode Golden's wife reported that Ode is about the hardest man to awaken in the morning she has ever heard about. Some of the boys are thinking a collection to buy a kerosene alarm clock would remedy this situation. The alarm clock mentioned is the latest thing on the market, according to **Bill Galbraith.**

Many have heard about the recommendations of the renowned **Duncan Hines,** but **Bob Schmitz'** are preferred any day as he and his wife are experts on various eating places.

It is wondered if **Ted Arens** has any new "warm up" recipes to try out on some of the boys. Now that **Jim Clennon** has returned, perhaps **Con Clennon** will have Jim continue his experiments on his automobile steering apparatus.

Bob McGuire's smiling face and jovial personality will be missed. Bob has entered the Army and hopes to be assigned to the Air Corps.

Beatrice Merrick, nurse, reports she and her husband enjoyed their vacation through the Southern States recently.

Bill Kane, chief of the Power House here, is all smiles as he has received his "C" ration book. After reading **Bob Waite's** letter to **Art McMahon** the other day, it was learned that Art is a member of the "Rockdale Club."

A swell post card was received from **Steve Princko,** who is now at Camp Blanding, Florida. Steve says Army life is agreeing with him.

Burton Peet wrote from Air Corps Radio School in Chicago saying he likes his course of study very much. **John Grimm** reported by letter he is in the Radio School in Ashland, Wis.

Bob "Tiny" Conroy is a perfect double for **"Tiny" Hill,** the famous band leader. Bob, it is rumored, has put on 30 pounds since coming to EOP.

Louie Shuler, Government inspector here, will leave for the Army shortly and plans to sell his automobile, nicknamed "the red comet." All interested buyers are urged to call him.

"I've Got Spurs That Jingle Jangle Jingle," sings **Paul "Texas" Riley.** One evening as he was putting on his new riding boots he noticed someone had attached a pair of spurs to them. That was O. K. with "Texas" because he wanted a pair of spurs anyhow, so (quote) "I just went on home with them only to have the wife make me take off the boots for scuffing up the furniture."

WAACS called another EOP girl in the person of Esther Johnson, War Department, Stores and Transportation Division, who left last month for basic training in Florida.

John "Nate" Johnson gave his sugar rationing card back to the ration board in Wilmington. Now he walks into any of the fancy Wilmington restaurants and orders his coffee and then asks the waitress to kindly put her finger in the coffee to make it sweet.

Bob Bright, timekeeper, had some weird experiences during a few days of work here. **Bert Folk** was blamed for the work done by a fellow that looks innocent. **Arch LeBoerence** said that **Grid Wheller** may have had something to do with all of the shenanigans.

This is an unusual story overheard by a friend of your correspondent's. It seems as though **Joe Connors** retired early one night during a recent cold spell armed with two western thrillers and a bag of popcorn. Making himself comfortable lying across the bed and reading for an hour or more he dozed off into heavy slumber. When Joe woke up he saw a figure bending over him and a voice saying put 'em up. Joe did just this and was plenty scared, at any rate he was unable to sleep the rest of the night. **Pete Kelder** said he would never do anything like that again because he would not want a corpse on his hands.

Some last minute hunting news: **Dan Glenney, Bill Malone** and **Leo Bell** started out one morning to bag a few birds. Malone and Glenney had both eyes open and spotted a few ducks in a nearby slough. After crawling on their hands and knees and firing six or seven shots —Bell was sent into the water to gather the game and red faces could be seen for miles when he brought in wooden decoys instead of mallards.

For Rent—3-room furnished cottage on the Kankakee river. Heat, gas and electricity furnished. See **James H. Adams,** Barrack 8, Room 17, dormitory, Wilmington, Ill.

General Offices

ARLENE SCHLOENDORF
Correspondent

Hello, everyone! I'll start off with some seriousness of mine—The Elwood Ordnance Plant Speaks. I am *your* plant. If I am *clean* and *busy* and pleasing to any visitors' eyes, the credit is yours. Some of my boys are called to the colors and as they go forth my *honor* is sent to far places. Those that stay with me help send my *power* to far battlefields to protect these men. Wood, brick and stone —I am more than that; even more than flesh and blood—I am the composite soul of all who call me *their* plant. Any absentees hurt me. Any slackening weakens me. I must be strong! As clearly as the pool throws back the reflection of the sun, *I shall reflect you*—make me what you will. I depend on every one of you. *I am your plant!*

On the anniversary of the attack on Pearl Harbor, **W. T. Dronsfield** came through a headon auto "attack" with a lacerated face and left ear. Also in the car were **Joseph Beukema, John F. Welch, Daniel Donegan** and **W. Sullivan** who were shaken up.

Owing to extreme shortage of bananas in New York, **Fred "Pop" Poplovsky** sent a large quantity to his folks.

Jackie Dailey has more than a sparkle in her eyes—She is flashing one on her third finger left hand.

Max "Godfather" Wolfson has a collection of cartoons and pictures above his drawing table. A public exhibition will be arranged soon.

Herbie Burch has a wood burning stove at home. To insure a stack of fuel for the next day, he brought in from a snow covered pile enough to fill the oven. Then he went to bed. In the early morning hours he awakened when he smelled wood smoke. He yelled "Fire" and ran! He suddenly remembered the wood in the oven. Ho hum! Back to bed after clearing out the smoke.

O. K. Madsen's strict diet to lose weight has netted him—aw you guessed it—seven pounds gain

With rubber shortage and enemies to beat, "we walk to Victory or ride to Defeat."

E. F. "Washie" Washburn tops them all with this:—Relaxing at home one evening, a gold fish jumped out of the bowl and past his face, then right back into the bowl in a graceful arc. The reason:—A moustrap was on the radiator so when the fish touched it, it popped and threw it back into the water.

A farewell party was held in honor of **John J. Fairfield** by the Accounting Department December 3 at the Woodruff Hotel. Those present were: **Charles Reilly, Edward Rowley, Paul Cappel, Mr. and Mrs. Howard Conners, June Schick, Jean Tyrrell, Marjorie Brennan, Rosemary Kane, Alice Hess, Joe Frederick** and **Mr. Fairfield.** Later **Louis Sullivan** and **Edward Sauer** joined the party.

Christmas cards were received this week from **Fred Oman** and **Hank Lockwood** from Hawaii. They wish their friends the best of holidays.

Robert "Wimpy" Forst went high hat after attending the opera in Chicago. The performance of "La Boheme" was repeated when "Wimpy" returned to the office. One thing he can't forget is the "Baton Maestro" — raising both arms aloft with the idea that the music would start with a smash—the result was only a little flute in one corner playing a quiet theme melody.

It's getting so every time your reporter enters an office, everyone either starts digging for the door or into their pockets! Really, folks, the cooperation given in the collection for Christmas boxes for 14 of the Administration Building boys in service is appreciated. It's great to be working among people with hearts.

H. "Hot Air" Walker must be turning violin virtuoso. One can see "Mazurkas" all over his hair.

Alright! Alright!—Here it is! Your reporter answered a fan letter from a certain someone at Camp McCoy, Wisconsin; and don't ask for any more "information please." Miss Schiek sure sees "red." Her heart is beating for a "carrot top" in the armed forces.

Things worth wanting: — **Rita Dwyer's** humor—**Ruth Meyer's** sweet disposition—**V. M. Dagenais'** sincere understanding—**Jean Tyrrell's** generosity—**Dagmar Peterson's** patriotism—**Polly Marston's** smile — **Hazel Gleason's** ambition —**Wayne Sebby's** silence—**Margaret Fitzhugh's** memory—**Dorothy Mihelic's** laugh—**Margie Zarley's** patience.

Won't every one of you send one more card to someone in the armed forces than you had planned on? Keep 'em smiling and pray that they will be smiling across the tables at home next Christmas.

Jack Breitfuss is wondering why **Joan O'Brien** is so friendly with him lately. Perhaps **Anne Lucas** has put in a good word.

As things look now, it seems as if **Emagene Wilson** will soon join the Waves to keep her beau company.

Mary Bostjancic would make a good WAAC. She belongs to the Slovenian Union Cadets who drill and march. Any of the boys who are drafted soon, especially **Ray Berg,** can learn a few pointers from her on drilling and marching.

The following watchmen observed their second anniversary with EOP December 10: **Fred W. Lamb, August Williams** and **Henry G. Janke.** They are the only ones left of the first to start. They came here with the company from the Elk's Building in Joliet. The first two are working the 11:30 to 7:30 shift regularly five nights a week. The third works the swing shift or two nights 3:30 to 11:30, two nights 11:30 to 7:30, and Sundays from 7:30 to 3:30 in the daytime.

GASOLINE RATIONING BOOKS have been issued to most employees who asked for them and now these three young women are engaged in the gigantic task of setting up a card index of all cars and those employees who drive or ride in them. Frequent checks will be made to determine if each driver is meeting the rationing boards' requirements for a minimum number of riders Shown left to right are Marjorie Lawhead, Norma Fratia and Dawn Schultz.

Laundry Letters
By Bernadine Meister and "Dickie" Lieb

The Laundry staff wishes everyone at EOP a very Merry Christmas and a Happy New Year.

Congratulations go to **Roy Frye**—he's a foreman now.

Several persons have enjoyed or are now enjoying winter vacations. They are **Cessie Reichman, Ruby Pinkstaff, Jennie Naiden, Veronica Curry, Freelone Curry** and **Violet St. Aubin.**

The following newcomers are welcomed: **Gus Ulfers, Russell Webber, Harry Lehner, Joe Smeets** and **Elda Greenwood.** In the sewing room, **Bessie Tilman, Earnesteen Allridge, Mildred Chandler, Ann Spivey** and **Vinie Clayton** are welcomed.

Edna Butenis and **Marjorie Bologh** are practicing Christmas carols to sing to the Laundry staff.

Sympathy is extended to **Harry Lehner,** whose father was killed last week.

Jennie Naiden seems to be broken hearted as her boy friend left for duty, but **Julia Fance** is all excited because her boy friend will be home in January.

Billie Lieb's burned hand has sufficiently improved to allow her to return to work on the presses.

The Laundry bags made much use of the snow during lunch hour. A snowman was built in honor of **George Kinard,** foreman.

Transportation Tales
By George O'Reilly

The Transportation Department wishes every worker at EOP a merry, merry Christmas.

Sgt. Dick Carroll, former yardmaster now with Uncle Sam, dropped in for a visit while home on a short furlough from his duties as railroad engineer in Clovis, N. M. All were pleased to see Dick.

Andy Walters and family are leaving December 23 to spend the holidays at their home in Liverpool, O.

O. N. Harstad, general manager of the East Lines of the Chicago, Milwaukee, St. Paul & Pacific Railroad, always a welcome visitor in this office, has been called to Washington for service in the Office of Defense Transportation, Railroad Division, where his many years of railroad experience should prove very valuable in the campaign to "keep 'em rolling."

Electric Shop
By Dan Webster

George Beverly left for the Army December 11.

The Electric Shop welcomes **Mildred Evans, Mary Weil** and **Dera Fellows.** They are the first women employees in the shop and are doing stock room work.

Bus Transportation
By "Tiny" Moss

Petty Officer Eddy Koerner received a warm welcome on his recent visit. He was a former bus driver.

Howard Cardwell left for the armed forces December 14.

Bus Transportation welcomes a newcomer, **Harvey Ingersol,** who assumes duties as a bus foreman.

The department's outstanding basketball team would like to see more spectators at its games.

Cecil Cushman is quite a crooner.

E. G. McAloon, an authority on pinochle, can find numerous players here.

A speedy recovery is wished for **Bert Painter,** who suffered with a broken ankle.

Freddy Aster is receiving many compliments about his new winter cap.

Conductors for the six new semi-trailer buses are **Gerte Koerner, Blanche Genseer, Ruth Gross, Margie Stevens, Kathryn Towne, Lee Schonert, Marge Forbine, Edith Cerre** and **Eunice Mantia.**

A 10 cent War Stamp is offered to the person who can tell why **Vic Kennelberger** doesn't wear hat or cap in winter.

A bowling team composed of **Johnny Hennessey, Bert Day, Harvey Ingersol, Bob Ehersman** and **Bill Markcraft** defeated the Administration Building keglers.

Pipe Shop News
By Mary Wynne

If the rubber situation becomes more acute **Buck Dale** can always come to the rescue with his two giant boots, which **Tommy French** says would easily recap two or three tires.

One of the wonders of the Pipe Shop is seeing and hearing the famous team of **Joe Harkins** and **Eddie Paulson** in their duet of "Open Up the Balloons." Joe says there will never be another song like it.

Genial **Cal Ashline** is always the first to be around whenever there is fun a-brewing. One nice thing about Cal is that he enjoys a joke just as much when it is at his own expense.

A few bolts and screws missing might seem a minor item to most, but to **Roy Benson** of the stock room it is a great tragedy. However, when Super-Sleuth Benson gets on the trail it is not long before the missing articles are accounted for.

Raymond Allen Dunne, 4-year-old son of **Albert Dunne,** pipefitter assigned to Group 1, was drowned in Forked Creek at Wilmington December 10 when the ice on which he and his companions were playing broke. Deepest sympathy is extended to Mr. Dunne and his family.

The following card of thanks was received from **Mrs. Alonzo V. McGuffey,** whose husband, an EOP pipe fitter, lost his life when their trailer was burned November 12 in the Wilmington trailer camp, and her children:

"We wish to express our appreciation to the men of the Elwood Ordnance Plant with whom my husband and our father worked, for their kindness and helpful contributions to us during our great bereavement. Your thoughtfulness will always be held in grateful remembrance."

Mrs. A. V. McGuffey
and Family.

Locksmith Shop
By "Tim" Thompson

Landis "Scotty" Morris passed out cigars December 1 when his wife presented him with a 7-pound 5-ounce daughter, **Vera Jane.**

Ralph Heap went a-hunting and used a full box of shells. He was rewarded for his efforts with one rabbit, a little bunny. **Harry "Doc" Craig** captured more game single-handed, without a gun, and put Ralph to shame.

Tillman Thompson received an advance Christmas gift, a Masonic ring, from his wife. Some one reported having seen **Mrs. Thompson** looking at a fur coat display in a Joliet store.

Welcome is extended to **Harry Hissong,** locksmith helper.

Sheet Metal Shop
By Jess Thompson

Emil Pianca is passing around cigars announcing the arrival of a new daughter.

Maynard "Shorty" Weidenbach, who is in the air corps in Texas was in the shop to see the boys while home on a furlough over Thanksgiving Day.

Ray Reardon is wearing a big smile these days. Ray is the father of a brand new son.

Bill Richards enlisted in the army and left December 11.

Radio Ramblings
By Kathryn Richardson

A new member has been added to the Radio Department, **Beverly Ashley,** to whom a hearty welcome has been given.

Merle Eberhart is back to work after a week's vacation.

At 2:30 **Larry Jack** was asked for the time. Larry replied: "Why does a Chinese go to a dentist?" Uh, huh! tooth hurty!

Clarence Coope still likes the one about the potato clock. It gets you *up at 8 o'clock.* Is he trying to kid someone? He's on the 7:30 shift.

Seems like everyone here is "Dreaming of a White Christmas" in **Bing Crosby** manner. They might be dreaming in that manner but oh!—the singing.

The few members of this department who said they liked corn will probably change their minds after reading this.

Telephone Tid-Bits
By Elaine Christman

Mrs. Don M. Hoffman and **Mrs. Alan Johnston** called Martha Herrity to thank the operators for the courteous and splendid co-operation shown them during the time they were residents of the EOP Area. **Cecil D. Wheeler** also called to thank Miss Herrity and her operators for the good service and courtesy shown him during the year in which he was associated with EOP.

Loretta Bradshaw, relief operator this summer, has returned to fill the vacancy left by **Edna Beach,** who has a leave of absence for sickness.

Helen Louise Sime has resigned her position as an operator and will be married January 5 to **Robert White,** son of **Lt. Clarence White** of the EOP Guards.

Mrs. Jeanette Heischman, the former **Jeanette Dolph,** has resigned as telephone operator for home duties. Mrs. Heischman gave a party December 5 at Sievert's Tea Room for all the operators. The party later went to Mrs. Heischman's home. Everyone had a pleasant evening.

Helen L. Baker, formerly employed at the Telephone Building, has written from the University of Colorado that it was quite a job to get back into the swing of studying. In sending greetings to her former co-workers, she said in her letter to **Supt. W. A. Buck** that she thought he was "a perfect man to work for."

It is reported that **Guard Chief M. C. Baughman** and Mr. Buck are better bowlers with a basketball and may challenge each other to a kegler duel since their feudin' has become so frequent.

Material Warehouse

FRANK McCORMACK
Correspondent

The Warehouse employees are all pleased to see **Karl Neifing** back on the job again after a few weeks spent at home with a severe case of flu.

John Baldon, Jr., the young man whose motto seemed to be "Less talk and more action," is now with the armed forces, stationed at Camp Custer, Michigan. Johnnie bade all good-bye two weeks ago and his fellow workers wish him the best of luck and hope to hear from him frequently.

It took a little time for the boys in the Warehouse to get acquainted with the girl truck drivers' way of handling things. One day last week one of the drives presented a requisition for several kinds of material for the Fuze and Booster Area. **"Pop" Chester Melville, Louis Parys** and **Johnnie Purcell** all got busy filling the order, which included four bales of rags. The girls backed their truck up to the Warehouse door and started loading. The boys were so surprised to see those husky women toss that stuff into the truck that Mr. Purcell got tangled up in the rags and was tossed in the truck with the rest of the merchandise, and they didn't see Johnnie again until they unloaded at the Fuze and Booster. Johnnie weighs five pounds less than one bale of rags.

Your correspondent is very fortunate to be writing this piece for *The Bomb-Shell.* Last Saturday evening on the way home, his car skidded off of the pavement on Route 66, about three miles north of the plant, and turned over in the ditch, left side up.

Your correspondent and the rider with him, **Joseph Harrell,** were finally able to open the door on the side that was up and crawl out, both unhurt.

CAREFUL STORAGE of the components which go into bombs and shells is the responsibility of A. P. Balston, superintendent of the Inert Storage Department, shown here at his desk.

"Inert's" Contest To Reduce Work Losses Success

Keen Rivalry Shown In Cutting Hospital Trips and Absences

A 12-week contest to reduce accidents and absenteeism in the Inert Storage Department was completed December 5 with a record for improvement which led **Supt. A. P. Balston** to continue it for another similar period and which has attracted attention of other groups within the area.

Employees of the department showed great interest in the contest and individual squad members successfully influenced delinquents to become more regular in their work habits. Rivalry was keen and promises to be more so during the second period.

The purpose of the contest, which started September 13, is to cut down lost time due to men not reporting for work; arriving late to work or making trips to the hospital because of accidents. All unexcused absences count against the squad's standing in the contest.

Personnel includes 9 squads (89 men) at Group 62 South, 11 squads (95 men) at Group 62 North and 10 squads (91 men) at Group 27. The leader's name is used to identify the squad.

Squad standings are posted on a board in the various group clockhouses every Monday, showing the results of the previous week. The board is divided into three sections showing:

First: The per cent of time lost in each group based on the total man hours available against the total man hours lost due to hospital trips and absences. All three groups are posted on each board for reasons of comparison and the percentages are based on a six-day period.

Second: The standing of the first 9 squads in each group, shown on their respective boards only. "Per Cent Present" is recorded for a six-day period and is based on the man hours available for each individual gang against man hours lost in this gang due to hospital trips or absences.

Third: The standing of the first 9 squads in the combined Inert Storage Groups. "Per Cent Present" is based on the available man hours for each squad against man hours lost, from start of contest to date of posting. These names appear on all three boards to foster competition between the groups.

The posting of the 12th week totals for the first 9 squads follows:

Squad	Group	Hosp. Trip Man Hrs.	Absences Man Hrs.	Per Cent Present
Morris	62 N	2½	56	98.8
McGrath ...	62 S	None	64¾	98.7
Bull	62 N	5½	73¾	98.4
Alderman ..	62 N	None	81½	98.4
Lardi	62 S	12	72	98.4
Mall	62 N	2	83½	98.4
Argyle	62 S	½	130½	98.3
W. Peterson	27	17¼	85½	98.1
Weincek ...	62 S	None	105¾	98.1

(This covers the records of about 100 men.)

Group 3-A

F. G. TAMBLYN
Correspondent

Supt. J. J. Fitzpatrick spoke briefly to the employees of Group 3-A one afternoon last week on several subjects.

"Putting women on the line was an experiment," said Mr. Fitzpatrick, "and I am glad to say that they are working out like old hands."

In stressing the need for safety, he said, "We're all here to do our job and we can't do it if we get hurt, so it's up to every one of us to be careful and take precautions to avoid accidents. Keep the floors free of anything that might be the cause of an injury to yourself or a fellow worker.

"Now in regard to shift changes, some workers have found trouble in getting rides for the various shifts. We have tried to make necessary adjustments, but our schedule must be completed and we must have enough men on each shift. During the next week and a half you will have to make arrangements so that when the shifts change over next, you'll be all set. We can not make any more exceptions after the next shift change."

Mr. Fitzpatrick urged that rest periods be taken only when necessary and warned that a 30-minute lunch period must be a 30-minute one, not a 40 or 50-minute "time out." He pointed out that there are plenty of good jobs and that it is up to each worker to show that he or she can handle the work. The chance of promotion is always present for the man or woman who is efficient.

He pointed out that inspectors are here to help see that the bombs loaded here do *their* job when they are sent overseas. He assured the workers that his office is always open and he is always ready to listen to any suggestion or complaint. He concluded by saying, "Do as well or a little better at your jobs from now on and you'll be doing your bit to help the Army, Navy and Marines."

Harold Shepherd is the proud father of a new daughter, **Jo-Ann Marie,** who arrived December 3. Congratulations to the parents are sent by the group.

Raymond Karraker, John Coyne and **Charles Halweg** have left for the armed forces.

Limited Number of War Bond Records Available

Ask your timekeeper for one of the attractive records for listing the number, denomination and date of purchase of your War Bonds. It will be most valuable in the event your bonds are mislaid or lost by fire. There's no charge, but the supply is limited. Ask for one today!

Basketball Season Launched With Three Exciting Games in Recreation Building

Group 62 Noses Out Inspectors, 15-14; Bus Drivers Down Group 1, 20 to 19; Group 3 Wins, 27 to 22

Twelve teams representing the groups started play December 7 to launch what promises to be an exciting basketball season. All teams that have had an opportunity to play so far seem to be about equal in strength. The games have all been fast, clean and close in scores.

Group 62 won its first tussle with the Inspectors in the last few seconds of play. **Manager Edward Speizis** and **Mose Williams** were the high scorers, each getting two baskets. **Robert Marlette**, an Inspectors forward, sunk three baskets and two free throws for eight points.

The Bus Drivers won from Group 1, 20 to 19. **Gale Thomas** was high scorer for the Bus men, sinking six baskets and making two free throws for a total of 14 points. This contest kept the spectators on the edge of their seats all through the game. **Russell Testa**, Group 1, made five baskets and one free throw. Watch this team in future games.

The night cap was one of the fastest and cleanest games, with the score 27 to 22 in favor of Group 3. The Fuze and Booster Chemical Laboratory, with **Capt. Jeddo Mees**, former Ohio State University player, who was high point man with three goals and one free throw, promises to have one of the strongest teams in mid-season. **Donald Fread** of Group 3 was high point man for his team.

Following are the box scores:

Group 62—15	F.G.	F.T.	P.F.	T.P.
Williams, F.	2	0	0	4
Speizio, F.	2	0	1	4
Booth, F.	0	0	1	0
Johnson, C.	1	0	1	2
Clark, C.	0	0	1	0
Ramsack, G.	2	0	1	4
Scudd, G.	0	0	0	0
McHugh, G.	0	1	1	1
Totals	7	1	6	15

Inspectors—14	F.G.	F.T.	P.F.	T.P.
Marlette, F.	3	2	0	8
Oram, F.	0	0	0	0
Wilhelmi, C.	0	0	0	0
Layfield, C.	1	0	1	2
Hair, G.	2	0	4	4
Carroll, G.	0	0	0	0
Steger, G.	0	0	1	0
Brennan, G.	0	0	2	0
Totals	6	2	8	14

Group 1—19	F.G.	F.T.	F.	T.P.
Sharkey, F.	1	1	4	3
Singer, F.	0	0	1	0
Sherwood, C.	2	0	3	4
Murphy, G.	0	1	0	1
Testa, G.	5	1	1	11
Totals	8	3	9	19

Bus Drivers—20	F.G.	F.T.	F.	T.P.
Glasgow, F.	1	0	1	2
Thomas, F.	6	2	0	14
Provance, C.	0	0	0	0
Cole, C.	0	0	0	0
Hayes, G.	0	0	1	0
Elledge, G.	1	1	2	3
Scoggins, G.	0	1	2	1
Totals	8	4	6	20

Group 3—27	F.G.	F.T.	F.	T.P.
Fread, F.	5	0	2	10
Emmuelson, F.	3	0	0	6
Helmick, C.	2	1	2	5
Struck, G.	2	0	3	4
Juricic, G.	1	0	1	2
Totals	13	1	8	27

Chem. Lab.—22	F.G.	F.T.	F.	T.P.
Mees, F.	3	1	1	7
Thurston, F.	1	0	0	2
Burke, F.	1	0	0	2
Bridwell, C.	1	0	1	2
Elliott, G.	1	0	0	2
Hull, G.	2	0	2	4
Boyd, G.	0	3	1	3
Totals	9	4	5	22

Games scheduled for the next three weeks are:

Dec. 21—
4 p.m. Group 62 vs. Bus Drivers
5 p.m. Group 70 vs. Chem. Lab.
Dec. 22—
4 p.m. Inspectors vs. Army
5 p.m. Group 61 vs. Fire Guards
Dec. 23—
4 p.m. Group 1 vs. Police Guards
5 p.m. Group 3 vs. Group 3A
Dec. 28—
4 p.m. Group 61 vs. Group 3A
5 p.m. Group 1 vs. Group 3
Dec. 29—
4 p.m. Group 70 vs. Fire Guards
5 p.m. Inspectors vs. Police Guards
Dec. 30—
4 p.m. Group 62 vs. Chem. Lab.
5 p.m.—Bus Drivers vs. Army
Jan. 4—
4 p.m. Group 62 vs. Army
5 p.m. Chem. Lab. vs. Fire Guards
Jan. 6—
4 p.m. Bus Drivers vs. Police Guards
5 p.m. Group 70 vs. Group 3A
Jan. 7—
4 p.m. Inspectors vs. Group 3
5 p.m. Group 61 vs. Group 1

Ordnance

HELEN McGINNIS
Correspondent

Once again the time has come to pound out the items of the week and as the files open their arms to receive a questioning look 'tis found that there are only 15 more days to your Christmas shopping . . . think the nicest gesture of the season is the radio announcer who suggested putting a 10c War Stamp on Christmas cards. . . . It seems that the Holiday season always makes people feel good and even when the old world gets itself in an uproar, the American way to do things is just grit your teeth a little harder and smile if it kills ya . . . so much for philosophy.

Operations and Transportation have gone high hat . . . yep . . . they moved upstairs bag and baggage . . . **Capt. John A. Hardy** is the new chief and a very nice gentleman, too.

Charlie Wachendorfer of Payroll is the man of the hour . . . he has all the gals in there wondering where he parks his dancin' shoes these nights. . . . **Ann Melovic**, the hep cat from Mail and Record, has been going around muttering "I want to be alone" . . . can't imagine why.

John Gravelot, Jr., John F. Welch's able right hand, is a man of many moods . . . has a quick and ready wit . . . and has the essential quality of getting along with people. Members of Auditing please note: **Johnny Odchodinicky**, the dexterous young man from Auditing, will soon assume a new role. . . . Parenthood is about to become one of Johnny's main worries. . . . So if he has that far away look in his eye these days . . . just forgive him . . . he's probably thinking of a name for the heir or heiress.

The Ordnance Department expresses its sympathy to **Emma Shea** of Personnel, whose father died recently.

There were rumors of a Christmas Party, but so far no developments . . . guess everyone is involved in getting those packages off to the boys in service and that's a darn good idea.

Good-looking **Bob Winchell** was a visitor to the plant the other day . . . he was formerly in Auditing and is now stationed at Aberdeen Proving Ground. He was warmly greeted as Bob has a lot of friends here.

Many had their first look at a real, flesh and blood WAAC the other day when **Alice Pichon**, or Lieutenant Pichon it should be, visited the office to see old friends . . . with a gal like that . . . recruiting gals for the Army would be a cinch . . . don't be surprised if more EOP girls join up.

Ask **Monica Limacher** to show you her new boots . . . they are the last word and they make her dainty feet look all the more like doll's feet. . . . **Kathleen Dugan** of Mail and Record has joined the matron class . . . yes, kiddies . . . she is now **Mrs. Ward Rupp, Jr.**, and hubby is a Sergeant in the Army.

If you wondered why **Mollie Baker**, that twinkle-eyed rascal from Teletype, has been looking sad these days . . . it's cause her "baby won't be comin' home" . . . the Army needs him.

Corner **Marie Maren** and have her tell you why she didn't go in the front gate guard house the morning she forgot her badge.

Bernece Carlson has received a staff sergeant insignia from Hawaii.

Carl Anker of Inspection is deserting the supposedly coveted role of bachelor to become a benedict . . . she's a southern gal and has Carl walking in a trance . . . the affair will take place during the Holidays. The blissful look on **H. H. "Red" Bowler's** face these days may be due to Carl making up his mind.

Since the cold North Wind has been howling over the prairie . . . and "Sir Temperature" has been hitting a new low . . . the Timekeeping Office has changed its features . . . everyone has abandoned the north side of the building and moved over to the side of southern exposure . . . however, demure **George K. Stevens**, who is unable to stand the icy blasts, has the most envied place huddled in a corner against the warm pipes.

Pearl Harbor Day was one of special interest to everyone, but you can't deny that adding a new personage to your domicile is a big thrill, too. **Chester Tomes** was seen passing out candy bars and smokes on that day . . . yessiree . . . he's a pappy now . . . a brand new girl came to his house December 7.

"Torchy" Peebles' Christmas request for new clothes is due to **"Chuck" Di Peso's** good cooking . . . Seems that "Torchy" has been overindulging in some of the home victuals.

Mary Biernat has purchased some new galoshes . . . fur trimmed and everything. . . . Can someone please come to the rescue . . . she still gets them mixed up and wears them on the wrong feet . . . help, help. . . . Bess Moore of Personnel has been ailing from a cold lately, but is able to be up and around again . . . by the way, she is now staying in the big city once in awhile.

And so, friends, Uncle Ned will fold his tent like a couple dozen Arabs are doing and without too much noise slip away 'til another day.

LETTERS from former buddies in the Fire Department are sought by Pvt. Gene M. Newton, now at Fort Bragg, North Carolina, who sent in this snapshot of himself.

Hospital

EVELYN RICHARDS
Correspondent

Maj. William J. McConnell, of the Safety and Security Division of the Ordnance Department, was a visitor here November 25. On the same day **Dr. E. A. Johnson**, medical director of Bluebonnet Ordnance Plant in Texas, paid a visit.

Eleanor Kartschoke, representative of American Mutual Liability Insurance Company, has been visiting with **Wallace Koepp**, insurance adjuster for EOP.

Due to a leg injury, **Frank Fischer**, Group 1, has been hospitalized for several days. However, the injury is doing nicely and he hopes to be going home soon.

Ozro Blanchard will be going through the paddling machine December 21 as that is his birthday anniversary. It would be just like him to have under cover a protective piece of wood so the paddler would receive the sting of his own blow.

Dr. L. N. Cohler will celebrate his birthday December 25. He must have a hard time keeping his birthday gifts separate from his Christmas presents.

Mrs. Myrtle Burrus, laboratory and x-ray technician, took up her duties here December 2. She spent four years at the University of Minnesota, and is a graduate of Northwest Institute of Medical Technology. Previously, she had been working at the Kewanee Public Hospital for six years, doing both laboratory and x-ray work. Hailing from Michigan, she now resides in Coal City.

The very cold and icy day of December 2 will be remembered by many, as they practically skidded all the way to work. **Dr. George McClure** had a bit of misfortune by skidding and sliding into a bridge. The same morning **Evelyn Doran** clocked in late due to their car sliding into a ditch but by good luck the car didn't turn over, and they were able to be pulled out. The occupants escaped injury, but minor damage was done to the car.

Emogene — Emogene — here Emogene—All of a sudden a very lovely rusty colored kitten came leaping out of the kitchen. Upon picking her up, it was discovered that she had been getting acquainted with her new home, for on her rusty coat and paws were traces of plaster of paris powder. At that moment she received a talking to, and her behavior has improved some since. All indications point to a spoiled and pampered cat, because she already has snubbed her two brother kittens, Henry and Herman, when they came to visit her. **R. R. Sidell** became claim owner of Henry and Herman. He said they have lost their inferiority complex and are just as important as Emogene and into as much mischief.

Bowling is a wonderful sport—isn't it? It just limbers you up and makes you feel wonderful, doesn't it? Someone might lose a head for this, but after three games **Dr. H. L. Schultz** developed a kink in his left hip and has been walking with a limp for several days.

Groups 4-9

Fuze-Booster-Primer and Detonator Lines

JUANITA HARTER
Correspondent

Group 6

Best wishes are extended to **Larry Patton**, who is taking up new duties in Group 4, and to **Eddie Daniels**, who is in the Chemical Lab.

Stevens Watson and **William Lipsey** are welcomed to Group 6.

Lowell "Soup" Andrews, electrician, is having a hard time handling nicotine, and **Lester Belanger** would like to have a finger nail cleaner.

Betty Palmer's husband is in the Army and is now stationed in Camp Carrabelle, Florida. Betty expects to visit him very soon. He reports the climate is wonderful there and swimming in December is alright, too.

Group 7

Judy Wilkenson received a call to join the Waves and left December 15.

Charles E. Farrington, assistant superintendent, Group 7, is the proud father of a new daughter, born December 8.

Roy Abdnour, foreman, has a new daughter, born December 2.

Group 8

Little **Lila Williams** isn't *Miss* any more, since her recent visit to St. Louis, where she became the bride of a soldier.

Anyone wishing to play basketball, please get in touch with **Chas. Bridwell** at the Chemical Lab.

Capitola Ricketts was ill for a few days, but she's back at work and as happy as ever.

Many wonder what *did* happen to **Bill Birtwistle's** Ford jalopy the other morning. His excuse was "water in the gas."

Supt. John H. Walker has been away for a few days, and his group is reported to be lonesome for that broad smile.

Robert MacMillan, better known as "Scotty" has a record that's hard to beat. He has four sons in the armed forces. There are four stars on his service flag, and that's *something* of which to be proud.

George Blair certainly can't travel very far on that *one* gas coupon he has in his "C" book.

Production Planning

LORETTA RYAN
Correspondent

Well, it seems that the department is again amongst new surroundings with a few added attractions, far away but nice. Bright and homey like, too. This week there are quite a few new members to welcome. They seem to be very silent and gaze in awe at the performers across the way, and can you blame them? It is not very often that one can see the commotion that resembles the scurrying of people at Christmas time.

Among the new members are **Nora Kelliher** studiously entering figures on her cards, and **Harriet Jensen** busy aiding her in typing.

Then there is **Nina Horrie**, who said she received a letter from her brother, **Sgt. Neal M. Horrie**, who is located somewhere in Ireland. Sergeant Horrie reported that he had seen boxes which were received at his Camp with the label of Elwood Ordnance Plant. He was a former employee here, prior to his induction in August, 1941. He has been receiving his copy of *The Bomb-Shell* and extends his appreciation to those who make it possible for him to get such a fine paper.

Bernadine Klausing of New Lenox is another newcomer who seems to have difficulties, also, in trying to meet the 8:45 a. m. deadline.

Her associate, **Mary Serdar**, who so pleasantly agrees with everything that is being done and with everything that comes her way, said she is enjoying her sojourn.

And, last but not least, there is **Dorothy Nemanich**, who has made her services indispensable, and all can see the reason why. The foregoing newcomers are under the supervision of **Joseph Filips**, formerly of Stores and Transportation Division, Ordnance Department.

Did you know that ***Donald Nelson***, Group 4, who is supervisor of the progress clerks, has found himself in the midst of many, many women clerks?

John Connors, Wayne Munyon and **Roland Oertel** are having similar difficulties with their young lady progress clerks. They all have the fear of a bill being passed for the induction of women into the armed forces.

William Stanley, Group 2, left for his term of serving Uncle Sam. Many wonder if they will be able to furnish Bill with his correct size in Army uniforms.

It seems that moving also had complications for one so adept at taking care of such things as **Margaret Fitzhugh**, timekeeper. Did you happen to notice her, racing frantically hither and yon at about that time? She certainly managed all in a remarkable manner.

The Tabulating Department which used to be an aid to this group seems to have lost all of its glamour, or perhaps it is the long walk which seems to get everyone down in trying to make it.

James Murphy enjoys a rainy afternoon when there isn't much stirring. He takes a trip to Building 13 and rummages through the old chests of papers looking in vain for that lost copy of a move order and finished product transfer dated for the month of June.

Ordnance Department Leaves Restricted

Civilian employees of the Ordnance Department have been requested to postpone holiday leaves in which travel by train or bus or plane is involved until after January 10, even though the leave represents a postponed summer vacation, it was announced by Capt. **George A. Grant**, executive officer, who said the policy of restriction had been issued by the War Department in Washington.

The restriction is due to the desire not to interfere with important wartime transportation needs. The armed forces have limited holiday furloughs to 10 per cent of their complement and those who do get leaves may be making their last visits home before entering active combat duty.

Happy Birthday to You!

This is a regular feature in which the birthday anniversary of as many EOP workers as possible will be listed for 2 weeks in advance. Watch for your own. Call your friends.
